DULUTH CONSOLIDATED COPPER CO. **IDAHO.**

Office: care of W. J. Holman, secretary and treasurer, Calumet, Mich. Mine office: Baker, Lemhi Co., Idaho. W. A. Eaton, president; Lucien Merritt, vice-president; Thos. W. Hamilton, general manager; preceding officers, John H. Holman, H. S. Palmer, Geo. W. Logan, John E. Merritt, John Lefevre and Sam P. Dingee, directors. Organized circa 1906, under laws of Arizona, with capitalization $5,000,000, shares $10 par. Lands are near the Calumet of Montana, in the Salmon River valley. Presumably idle.

DULUTH & UTAH DEVELOPMENT CO. **UTAH.**

Office: 26 Mesaba Blk., *Duluth, Minn.* *Operating office*: 208 Atlas Bldg., Salt Lake *City, Utah.* *Letter returned unclaimed* from former mine office,

Stockton, Tooele Co., Utah. H. F. Smith, president; Peter Porter, vice-president; Harvey J. Jones, secretary; E. J. Raddatz, treasurer and general manager. Organized under laws of Utah, apparently as successor of No-U-Dog Mining & Milling Co. Lands, 4 fractional claims, area 50 acres, near the Honerine tunnel, adjoining the Honerine mine on the north, which carries copper at considerable depth, and copper is expected in the Duluth & Utah at depth. Mine has circa 3,000′ of workings, deepest 500′, and ships ore carrying, 35 to 60% lead and 20 to 30 oz. silver per ton. Has produced circa $250,000 worth of silver-lead ores above the 500′ level.

DUNCAN MINING & DEVELOPMENT CO., LTD. BRITISH COLUMBIA

Mine office: Duncans, Vancouver Island, B. C. Lands, 4 claims, in the Cowichan Lake district, showing ore giving assays up to 4% copper, 50% lead, 5 to 10 oz. silver and $2.50 to $5 gold per ton. Idle since circa 1901.

DUNKIRK GOLD & SILVER MINING CO. ARIZONA

Office and mine: Prescott, Yavapai Co., Ariz. E. N. Mitchell, superintendent. Lands, in the Slate Creek district, show auriferous and argentiferous copper and lead sulphides. Has gasoline power and a small mill.

DUPLEX GOLD & COPPER MINING CO.

Office: 57-209 Washington St., Boston, Mass. Location of lands, if any, unknown.

DUQUESNE MINING & REDUCTION CO. ARIZONA

Office: 820 Pennsylvania Ave., Pittsburg, Pa. Mine office: Duquesne, Santa Cruz Co., Ariz. H. T. Herr, vice-president and general manager; H. S. Stewart, superintendent. Lands, circa 800 acres, near the Pride of the West and several miles south of the Mowry mines, in the Patagonia Mountains, showing a contact vein between limestone and granite porphyry, carrying chalcopyrite, associated with sphalerite, galena and pyrite, opened by a shaft of circa 1,000′ depth. Plans building an electric railway from mine to the smelter at Calabasas, which has reverberatory furnaces, and began production 1907, on a small scale, employing circa 100 men. Property considered promising and management good. Idle at last accounts.

COMPAÑIA MINERA DE COBRE DE DURANGO. MEXICO

Dead. Formerly at Otaez, Santiago Papasquiaro, Durango, Mex.

DURANGO COPPER SYNDICATE, LTD. MEXICO

Dead. Lands sold, 1900, to Avino Mines of Mexico. Ltd. Formerly at Avino, San Juan del Rio, Durango, Mex.

FUNDICIÓN EL DURAZNO. CHILE

Office and works· Combarbalá, Coquimbo, Chile. Francisco Greve G., owner. Property is a smelter with one reverberatory furnace, which, in 1903, employed 16 men at average wages of 1 peso daily, treated 810 metric tons of 15% ore from mines in Los Vilos district, producing therefrom 119 metric tons of bars averaging 97% copper, the slags averaging about 1% copper tenor.

DUTCH MILLER MINING & SMELTING CO. WASHINGTON

Letter returned unclaimed from former office, 202 Denny Way, Seattle, Wash. Mine office: Skykomish, King Co., Wash. H. P. Fogh, general manager. Capitalization $2,000,000. Property was leased, for 3 years, with privilege of one-year extension, to Seattle-Boston Copper Co. Creditors of the Dutch Miller asked, 1907, for a receiver, alleging mismanagement on the part of the lessee.

Lands, 2 claims, in the Burns district, 12 miles south of Skykomish, carrying a vein of about 15′ average width, exposed for circa 400′, and opened by tunnels, shaft and trenches showing auriferous chalcopyrite. Property considered promising.

DUTTON MINE. MONTANA

Owned by East Butte Mining Co.

DWIGHT FURNESS CO. **MEXICO.**

Office: Guanajuato, Gto., Mex. Mine office: Etzatlán, Ahualulco, Jalisco, Mex. Dwight Furness, president; W. M. Cummings, manager. Property includes nine groups of mines, in the Etzatlán, Ameca and Ahualulco districts. The Santa Grande group, 31 hectares, 21 miles west of Hostotipaquillo, shows veins of 3' to 50' width, carrying native silver and gold and silver sulphide ore, fairly developed by shafts and tunnels, with considerable ore exposed. The Casadas group, 21 hectares, 25 miles west of Hostotipaquillo, shows veins of 3' to 10' width, carrying native gold and silver and silver sulphides. The Magistral y Anexas group, 24 hectares, 12 miles southwest of Ameca, shows a wide vein, carrying paystreaks and chutes with workable values, of oxidized and sulphide copper ores, both carrying gold and silver, extensively developed by shafts and tunnels. Ores of the oxidized zone are largely worked out, from extensive operations in the past, mainly for the production of bluestone and sulphuric acid. The Calaveras group, 24 hectares, 4 miles south of Etzatlán, shows 4 fissure veins, of 4' to 6' width, carrying mainly auriferous and argentiferous sphalerite and galena, with 650' of workings, estimated to show 20,000 tons of ore.

EAGLE BIRD MINING & MILLING CO. **UTAH.**

Office: care of Geo. A. Whittaker, president, Salt Lake City, Utah. Mine office: Bingham Canyon, Salt Lake Co., Utah. Geo. Yeadon, general manager; E. E. Meyer, secretary; E. G. Mahon, treasurer. Organized 1907, under laws of Utah, with capitalization, $400,000. Lands, 14 claims, area circa 280 acres, near the Highland Boy mine, having a 260' tunnel and a 42' shaft, showing a 6' vein of ore assaying up to 37% lead.

EAGLE & BLUE BELL MINING CO. **UTAH.**

Office: 60 State St., Boston, Mass. Operating office: 700 McCornick Bldg., Salt Lake City, Utah. Mine office: Eureka, Juab Co., Utah. E. L. White, president; Willard F. Snider, vice-president; H. H. Green secretary; Walter S. McCornick, treasurer; preceding officers and Jos. A. Coram, directors; Wm. Clarke, superintendent. Capitalization $250,000, shares $1 par. Was controlled, through ownership of circa $190,000 stock, by Bingham Consolidated Mining & Smelting Co., which failed, and was under bond, March, 1908, to Bingham Mines Co., successor of the Bingham Consolidated.

Lands, 6 claims, between the Centennial-Eureka and Grand Central mines, in the Mammoth limestone, show considerable bodies of siliceous copper ore and lead sulphides, former carrying only small copper percentages, but circa $10 per ton in combined gold and silver values. Development is by tunnel and a 1,100' blind shaft, planned to be sunk to 1,400', showing an ore body up to 66' in width on the bottom level, said to carry values of $10 to $20 per ton in copper, silver and gold. The mine has considerable reserves, and normal ore output is about 75 tons daily. Production, 1907, was 227 carloads of ore. Mine was closed, late 1907, and reopened circa July, 1908. The property has a good machinery plant, including a powerful hoist.

EAGLE CONSOLIDATED GOLD MINING & MILLING CO. **WASHINGTON.**

Dead. Lands sold, 1908, for $13,000, to Blue Star Mining Co. Formerly at Chewelah, Stevens Co., Wash.

EAGLE CONSOLIDATED MINES CO. **ARIZONA.**

Office: care of T. J. Morrison, secretary, Prescott, Ariz. Letter returned unclaimed from former mine office, Wenden dale, Yuma Co., Ariz. A. J. Harrison, president; Dr. R. N. Looney, vice-president; C. A. Peter, Jr., treasurer; T. J. Morrison, secretary; preceding officers, A. J. Dolan, Michael McHale and James Macklin, directors. Organized circa September, 1907. Lands, 5 claims, 6 miles north of Wenden dale, having a 122' shaft showing a 30' vein carrying fair copper values in copper and gold.

EAGLE COPPER CO. **WYOMING.**

Dead. Formerly at Encampment, Carbon Co., Wyo. Succeeded Feb. 21,

EAGLE COPPER-GOLD MINING CO. ARIZONA

Office: 2072 East Fortieth St. S. E., Cleveland, Ohio. Letter returned unclaimed from former mine office, Wickenburg, Maricopa Co., Ariz. Wm. Kuder, president; E. L. Motts, vice-president; A. L. Motts, secretary; J. Zesiger, treasurer; preceding officers, Alex. M. Fulford and Henry Ehr directors; Nicholas McCarver, superintendent. Organized Sept. 8, 1902, und laws of South Dakota, with capitalization $1,000,000, shares $1 par.

Lands, 7 claims, 1 fractional, area 130 acres, known as the Profusion grou in the Blue Tank and Black Rock districts, in the foothills of the Bradsh Mountains, 12 miles east of Wickenburg, with connection by 10 miles of goo and 2 miles of bad wagon roads. Lands are reported to show 5 ore bodies, which 2 are partially developed, one of 12′ average reported width, traceab 3,000′, carrying native copper, cuprite, malachite and chalcopyrite, givin average assays of 4% copper, 2 oz. silver and $3.10 gold per ton. Developme is by tunnels of 35′ and 193′, and by shafts of 50′, 60′, 100′ and 150′. Has 16-h. p. hoist and 4-drill air-compressor, with 7 mine buildings. Company pla deepening shaft to 300′ and building a 50-ton concentrator.

EAGLE COPPER & GOLD MINING CO. IDAHO

Office: Wallace, Idaho. Mine office: Mullan, Shoshone Co., Idaho. O ganized 1902, under laws of Idaho, by J. H. Nordquist, et al., with capitaliz tion $1,000,000, shares $1 par. Lands, sundry claims near the Leslie, opene by a 150′ tunnel, showing copper ore, associated with hematite. Idle.

EAGLE COPPER MINING CO. WASHINGTON

Mine office: Chewelah, Stevens Co., Wash. Lands, 3 claims, lying sout of the Wonderful group, on Stevens Peak, slightly developed by shaft an tunnel, showing auriferous and argentiferous lead and copper ores. Idle.

EAGLE METALLIC COPPER CO. PENNSYLVANIA

Office and mine: Belvidere, Warren Co., N. J. Henry D. Deshler, presi dent; Samuel J. Koehler, treasurer; preceding officers, Frank C. H. Schwyzer Thos. Zellner, J. N. Boone, Owen H. Nagle and Thos. S. Downing, directors Miss Millie Deshler, secretary. Organized 1903, under laws of New Jersey with capitalization $500,000, shares $1 par.

Lands, 500 acres in Adams county, Pennsylvania, including an old copper mine, never worked successfully, on the western Maryland railroad. Property shows a mineralized zone of 400′ average width, carrying native copper, chalcocite, bornite, chalcopyrite and tetrahedrite, averaging about 2 oz. silver per ton, with traces of gold. Development is by a 300′ shaft at 40° incline, in ore from surface, giving assays up to 6% copper, and it is planned deepening the shaft 200′.

Equipment includes a steam plant and a 2⅝″ core-drill. Has a 24x36 office and laboratory, and plans a 200-ton mill. Has circa 5,000 tons of ore on the dump, ready for treatment.

EAGLE MINING CO. ALASKA

Letter returned unclaimed from mine office, Ketchikan, Alaska. E. M. Aldrich, consulting engineer. Lands, in the Martin's Arm district, on the coast, circa 40 miles from Ketchikan and 3 miles from tidewater, have a 5′ to 6′ vein traceable for 1,100′, said to give average assays of 19% copper. Plans a tram-line and bunkers, for ore shipment.

EAGLE MINING CO. CALIFORNIA

Mine office: Needles, San Bernardino Co., Cal. Idle.

EAGLE MINING CO. MONTANA

Office and mine: care of Hon. Patrick Mullins, director, Butte, Silver Bow Co., Mont. Organized March 10, 1906, under laws of Montana, with capitalization $150,000, shares $1 par, and is supposed to have increased capitalizati

r. 29, 1907, to $250,000, shares 50 cents par. Lands, north of La France, e a 250′ shaft, showing a 5′ vein. Formerly was a silver mine, shipping running up to 1.7% copper and 186 oz. silver per ton.

GLE MINING & SMELTING CO. **MONTANA.**

Dead. Title changed, 1907, to Copper Eagle Mining & Smelting Co. Forrly at Butte, Silver Bow Co., Mont.

GLE MOUNTAIN COPPER MINING CO. **OREGON.**

Office: 912-131 LaSalle St., Chicago, Ills. Mine office: Harrisburg, Linn , Ore. Wm. Henry Harris, president; W. K. West, vice-president; D. J. Allister, secretary and treasurer; preceding officers, Peter Basche, Geo. H. ster and Hon. W. G. Drowley, directors; Geo. E. Alexander, superintendent; W. C. Nelson, consulting engineer. Organized under laws of Arizona, with pitalization $2,500,000, shares $1 par. Lands, 8 claims, including the Cox d Van groups, near the Indiana mine, in the Goose Creek camp, 28 miles st of Baker City, showing a prominent gossan on a contact vein between rphyry and limestone. Company claims primary sulphide ores at depth of ' to 20′. Has a 10′ pit and several tunnels, of 30′ to 237′ length, latter said be in a 14′ ore body showing sulphide ore assaying 3 to 20% copper, with hort tunnel showing a 4′ vein carrying chalcocite and bornite assaying 10 to % copper. Nelson estimates long tunnel to show a 14′ vein averaging 3 to % copper, which has given ore assaying 3 to 20% in tenor. Company claims have $1,750,000 worth of ore in sight, by actual measurement, and claims hat it might claim $324,000,000 worth of ore in sight, this being one of the ost monumental prevarications in the history of mining literature, so richly overed with wild flights of the imagination. Has several substantial mine uildings, with 80-h. p. boiler and small Leyner air-compressor. Has a good ater power on Rice creek, which it is planned to harness for a 350-ton mill. roperty is reached by a good wagon road, and company hopes to obtain a ilroad. Employed circa 20 men at last accounts. Property considered promsing, but company's promises of dividends certainly were not warranted by he present showing and status of developments, and the so-called stock guarntee merely is that anyone who visits the property and finds same misrepreented may have his money back with interest.

EAGLE RIVER COPPER CO. **MICHIGAN.**

Dead. Lands sold, circa 1905, to a subsidiary company of the Calumet & Hecla. Formerly at Eagle River, Keweenaw Co., Mich.

EANKOPS COPPER MINING & SMELTING CO.

Office: Spokane, Wash. Organized 1906, under laws of Washington, with apitalization $1,500,000, by A. M. Baldwin, H. M. Allen, John H. Shaw and W. S. McCrea. Location of lands, if any, unknown.

EAST BUFFALO MINING CO. **MONTANA.**

Mine office: Saltese, Missoula Co., Mont. Has a tunnel and shallow shaft, showing ore assaying 5% copper, 15% lead and 8 to 10 oz. silver per ton.

EAST BUTTE COPPER MINING CO. **MONTANA.**

Office: 82 Devonshire St., Boston, Mass. Mine office: Butte, Silver Bow Co., Mont. Robt. H. Gross, president and general manager; Frank M. Sullivan, secretary; preceding officers, Frank P. Son, Wm. H. Everts and Chas. R. Leonard, directors. Organized Oct. 14, 1905, under laws of Arizona, with capitalization $3,000,000, shares $10 par. Is said to have begun business with $150,000 cash.

Lands, 134 acres, freehold, including the Dutton mine and 9 other fractional claims, with total area of 19 acres, in the southeastern part of the Butte camp, near the Pennsylvania mine. *The various properties are said to carry nearly 20 veins, of more or less value, and have 11 shafts,* of 50′ to 1,000′ depth.

The principal shafts are No. 1, at the extreme north, and No. 11, at th extreme south of the Dutton group, connected by tunnel. Shafts are 16x4' in the clear, being the largest in Butte. No. 1 shaft, 1,000' deep, is planned to be sunk to 2,000', and No. 11 is 500' in depth. Good ore has been opened on the 200', 400', 600' and 800' levels, and the mine was claimed, September 1907, to have blocked out, on the 400' level and above, 597,404 tons of ore, the 400' level having a 6' vein of 5% ore, with estimates of 1,000,000 tons of ore of 3 to 4% copper tenor blocked out in the entire property. The Dutton mine carries the extension of the Glengarry vein, about 20' in width, but of low grade. The Oneida mine, having shaft No. 11, has yielded considerable rich ore, up to 16% in tenor. The Lassen mine has produced a little ore carrying up to 16% copper and 10 oz. silver per ton. The Yankee Boy mine is said to show a 9' vein of ore averaging 14% copper, which is an exaggeration.

Equipment includes a 150-h. p. Lidgerwood hoist, good for 1,500' depth. The mine has an office building and several other structures.

The precipitation plant, one of the largest in Butte, doubled in size, 1907, leaches water from the East Butte mines, and also secures the leachings from the old Parrot waste-dumps. This plant apparently was sublet, for reasons of dubious validity, and difficult of comprehension, to other interests that pay a royalty of 25% on gross values extracted, which royalty is inadequate.

The property has 2 small old concentrators, operated by leasers, including the 100-ton Yankee Boy mill, and the management was said to plan a 500-ton concentrator, to cost about $135,000.

The South Butte Mining Co. has been sued for damages caused by the blowing up of the mine, and removal of ore. There also is litigation with the Red Metal Company, started by the latter, intended merely to restrain the pernicious activity of East Butte leasers in going beyond the boundary lines.

Production, 1907, is estimated at 1,250,000 lbs. fine copper, secured exclusively by lessees, about one-half of the output being smelting ore and balance of concentrating grade, operations of lessees being entirely above the 400' level. From Jan. 1, 1906, to Sept. 1, 1907, the royalties of the company, being one-fourth of the gross values extracted, amounted to $149,728.84. Property is considered good, and management, changed 1908, also is good.

EAST BUTTE EXTENSION COPPER MINING CO. MONTANA

Office and mine: Butte, Silver Bow Co., Mont. Chas. J. Schatzlein, president; A. C. McCallum, vice-president; Frank H. Cooney, secretary and general manager; J. K. Heslet, treasurer; preceding officers, John H. McQueeney, Jas. Maher and Dr. P. A. Green, directors; A. F. Monroe, engineer; Chas. Wyburn, superintendent. Organized Apr. 10, 1906, under laws of Arizona, with capitalization $1,000,000, shares $1 par; issued, $560,000. Paid, Oct. 1, 1906, a 1% dividend, amounting to $2,486.

Lands, sundry fractional claims, freehold, area circa 30 acres, lying west of the East Butte and between the Dutton, Belmont and Pennsylvania mines.

The Westlake and Wall mines are said to have produced, under former ownership, circa $300,000 worth of ore. No. 1 shaft on the Great Northern claim, 120' deep, has 2 compartments. No. 2 shaft, circa 200' deep, shows ore, giving assays up to 13% copper and 1 oz. silver per ton. No. 3 shaft, formerly known as the Westlake, is 1,040' deep. A little ore was produced, 1906, shipments reaching 40 tons daily, and there is a small precipitation plant at No. 3 shaft.

EAST COBAR MINING CO., N. L. AUSTR

Mine office: Cobar, Robinson Co., N. S. W., Australia. H. R. Treager. Organized 1907, under laws of New South Wales, with capit *£1,200, shares* 10s. par.

ST COLUSA MINE. **MONTANA.**

Owned by Boston & Montana Consolidated Copper & Silver Mining Co.

ST CUMBERLAND ELY CO. **NEVADA.**

Mine office: Ely, White Pine Co., Nev. Organized Nov. 1, 1906, under ws of Maine, with capitalization $500,000, shares $1 par. Lands, 2 claims, th of the Chainman mine, known as the Rabbit mine, which formerly pped some ore carrying up to 25% lead, 12 oz. silver and $12 gold per ton. s a 600′ tunnel with a 100′ winze.

ASTERN NATIONAL COPPER CO., LTD. **NOVA SCOTIA.**

Dead. Succeeded, 1904, by Cheticamp Copper Co., Ltd. Formerly at Chetimp, Inverness Co., N. S.

ASTER SUNDAY MINING CO. **ARIZONA.**

Office and mine: Bisbee, Cochise Co., Ariz. Has gold and copper ores. le since circa 1905.

AST GREENWATER COPPER CO. **CALIFORNIA.**

Mine office: Greenwater, Inyo Co., Cal. Geo. Badget, superintendent. nds, circa 6 miles east of Greenwater, adjoining the Greenwater Vindicator, ve a 100′ shaft. Idle.

AST GREY ROCK MINE. **MONTANA.**

Owned by Butte & Boston Consolidated Mining Co.

AST GWANDA MINES, LTD. **RHODESIA.**

Office: 32 Old Jewry, London, E. C., Eng. Mine office: P. O. Box 414, lawayo, Rhodesia. T. B. Reynolds, chairman; Maj. Maurice Heany, managg director; A. H. Lawrence, consulting engineer; F. Mackenzie Greene, mine nager; Tom Prest, secretary; Geo. Young, local secretary. Organized Jan. , 1905, under laws of Great Britain, with capitalization £600,000, shares £1 ar; issued, £460,607. Has a bond issue of £125,000 debentures, at 6%, convrtible into stock at par, on 3 months' notice. Lands, 284 claims and a 10-acre illsite, in the Gwanda district of Matabeleland, south of Bulawayo, including the West Nicholson, Jessie and Valley mines. Latter has a fissure vein granite, carrying auriferous chalcopyrite and pyrrhotite, with reserves estiated at 25,000 tons, assaying circa 1.5% copper and 12 dwts. gold per ton. as a 110-stamp mill, cyanide plant and concentrator. Has a smelter, the first Rhodesia, blown in 1906, having a 24″ water-jacket blast-furnace and a verberatory furnace. To end of May, 1907, smelter had shipped 560 tons matte, of presumably about 45% copper tenor. Production, 1906, from ,575 tons of ore milled, was gold and silver values of £77,480, and 2,255 long ns of concentrates, yielding £31,017, and 323 long tons of copper matte, of 14,406 estimated value, carrying circa 725,000 lbs. fine copper. Forces are 60 hite men and 400 natives. Company made some serious mistakes at first, but ese have been rectified, and present development and future prospects are much improved.

EAST HECLA MINING CO. **IDAHO.**

Office and mine: Wallace, Shoshone Co., Idaho. C. F. O. Merriam, president; A. H. Featherstone, vice-president; P. L. Everhardt, secretary; preceding officers, Jas. F. McCarthy, W. H. North and Dr. Geo. Gray, directors. Lands, 25 claims, between the National and Hecla mines. Is driving a 2,500′ crosscut tunnel from Deadman Gulch, in connection with the Copper King, to develop the vein circa 1,000′ below present workings. Property considered promising.

EAST PACIFIC MINING CO. **MONTANA.**

Mine office: Winston, Broadwater Co., Mont. Robt. A. Bell, president and al manager; C. N. Kessler, vice-president; A. L. Smith, treasurer; W. H. inson, cashier; preceding officers and C. C. Newman, directors. Capitaliza— $1,000,000, *shares $1 par. Lands, 14 claims,* area 220 acres. Mine has

about 4 miles of workings, carrying mainly silver-lead ores, with some au erous copper ore. Has a 60-ton mill, and, to end of 1906, had produced worth $1,366,527.

EAST-SIDE GOLD MINING CO. ARIZO

Dead. Formerly at Bisbee, Cochise Co., Ariz. Fully described Vol. VI

EAST SNOWSTORM-COEUR D'ALENE MINING CO. IDA

Mine office: Mullan, Shoshone Co., Idaho. Capitalization $1,500, shares $1 par. Apparently was promoted, circa 1906, by the late Rev. Col. P. Fife, whose promotions proved more profitable to Rev. Col. Fife than the purchasers of shares.

EAST SNOWSTORM MINING CO. IDA

Office: 300 Columbia Bldg., Spokane, Wash. Mine office: Mullan, S shone Co., Idaho. A. Herman, president; J. F. Pasold, vice-president; R. Dunn, treasurer; John M. Scrafford, manager. Organized 1906, under law Washington, with capitalization $1,500,000, shares $1 par. Lands, 4 cla area 75 acres, in the Hunter district, east of the Snowstorm, and supposed carry circa 3,000′ of the Snowstorm vein. Mine has 2 tunnels, longest circa 9 planned to cut the Snowstorm vein by a 600′ crosscut; also a shallow shaft a 6′ vein carrying an 8″ paystreak of chalcocite, bornite, chalcopyrite tetrahedrite, all auriferous. Ores, as developed, carry mainly gold values.

EAST YERINGTON COPPER CO. NEVA

Office: care of Matthew Domm, treasurer, Salt Lake City, Utah. M office: Yerington, Lyar Co., Nev. Lands, adjoining the Contact group, w slightly prospected, 1907, showing a little high-grade copper ore.

J. M. ECHEVARRIA. CHI

Office and mine: Illapel, Coquimbo, Chile. Property is the Quilom mine, opened 1892, which formerly made about 100 long tons fine co yearly. Presumably idle.

ECHO COPPER MINING & MILLING CO. WYOMI

Office: 413-95 Dearborn St., Chicago, Ills. Mine office: Rudefeha, Car Co., Wyo. Dr. Geo. Illingsworth, president; W. D. Meeker, vice-president; R. Stiles, secretary; W. T. Peryam, managing director. Organized Dec. 1902, under laws of Wyoming, with capitalization $1,000,000, shares $1 Lands, 4 claims, area 80 acres, adjoining the Ferris-Haggarty mine on northeast, opened by a 114′ shaft, showing copper stains. Did a little w in 1906. Idle.

ECHO MINING CO. IDA

Dead. Formerly at Sandpoint, Kootenai Co., Idaho. Described Vol.

ECLIPSE-ARGO MINING CO. MONTA

Office: New Britain, Conn. Operating office: Helena, Mont. Mine of Argo, Broadwater Co., Mont. W. F. Quade, president; Frank L. Sizer, president and general manager; E. J. Hoffman, secretary and treasurer; ceding officers, John Boyle, F. R. Bill, I. F. Pulcifer and E. G. Warner rectors; E. J. Clemo, superintendent.

Organized March 6, 1904, under laws of Montana, with capitaliza $300,000, increased, circa November, 1906, to $400,000, shares $1 par, merger of the Eclipse Gold & Copper Mining Co. and Argo Gold & Copper ing Co. Receipts for fiscal year ending June 1, 1908, were $119,093.30, inc ing $88,041.85 from ore sales, and cash on hand was $1,371.59, with $5,94 in accounts receivable; accounts and bills payable aggregating $17,107.57.

Lands, 5 claims, 2 patented, area 100 acres, and a 10-acre millsite, n of Helena. Property shows a 10′ fissure vein, in slate, traced circa one-h mile, carrying bornite and chalcopyrite assaying circa 7% copper, opened *tunnels of about 700′ and 1,300′, with about 3,000′ of workings.*

Equipment includes a 40-h. p. steam plant with a 15-h. p. hoist and 3-drill air-compressor. There are 12 buildings, including a 20x25' wooden carpenter-shop and a 14x18' smithy.

The 50-ton mill, 60x140', of logs and lumber, has a Blake crusher, 2 sets of rolls, 3 Hartz jigs, 2 Wilfley tables and a slime table.

Management was changed, June, 1906, and circa 50 men were employed until November, 1907, when work was suspended. Production, 1903, was 204,570 lbs. fine copper, and in the fiscal year ending June 1, 1907, was 1,124,000 lbs. fine copper.

ECLIPSE (BARBERTON) COPPER, LTD. **TRANSVAAL.**

Office: Johannesburg, Transvaal. Mine office: Barberton, Middelburg district, Transvaal. Percy B. Byass, manager. Organized under laws of Transvaal, with capitalization £600,000, shares £1 par. Lands, 72 base metal claims, in the DeKaap Valley, near Barberton, opened by 3 shallow shafts, Nos. 1 and 2 showing good ore. Shipped, early 1908, a little ore of about 20% copper tenor. Property considered promising.

ECLIPSE GOLD & COPPER MINING CO. **MONTANA.**

Dead. Was merged, 1904, in Eclipse-Argo Mining Co. Formerly at Argo, Broadwater Co., Mont.

EDDY GOLD, SILVER & COPPER MINING CO. **ARIZONA.**

Office: P. O. Box 596, Phoenix, Ariz. Mine office: Glendale, Maricopa Co., Ariz. F. L. Eddy, president and general manager; J. R. Aich, vice-president; S. P. Donnell, secretary and treasurer. Organized Aug. 22, 1902, under laws of Arizona, with capitalization $1,000,000, shares $1 par. Lands, 10 claims, area 200 acres, also a 5-acre millsite, in the Frog Tank Mountains, Old Eddy district. A 3' fissure vein in porphyry, opened by six 10' pits, a shaft of 52' and tunnels of 55' and 105', carries oxide and carbonate ores, assaying 4 to 6% copper, 12 to 60% lead, 10 to 62 oz. silver and $5 to $32 gold per ton. Idle several years.

EDDY MINING CO. **MONTANA.**

Office: Missoula, Mont. Mine office: Saltese, Missoula Co., Mont. A. M. Stevens, secretary. Lands, on Clark's Fork, near Copper Mountain, show a vein up to 34' in width, proven for about 6,000' length by numerous pits and crosscuts, with a tunnel of 355'.

EDISON MINING CO. **BRITISH COLUMBIA.**

Mine office: Yreka, Vancouver Island, B. C. Property is the Superior group, adjoining the Yreka, said to show good ore. Idle for several years.

EDMUNDIAN (MANICALAND) COPPER CO., LTD. **PORTUGUESE EAST AFRICA.**

Dead. Voluntarily liquidated, July, 1902. Formerly at Umtali, Manicaland, Portuguese East Africa.

EDMUNDIAN COPPER MINING CO. **PORTUGUESE EAST AFRICA.**

Office: 8 Old Jewry, London, E. C., Eng. Mine office: Umtali, Mozambique, Portuguese East Africa. H. D. Boyle, chairman; preceding officer, J. Sivar and E. R. Tymms, directors; N. S. Sidgreaves, secretary; Consolidated Goldfields of South Africa, Ltd., consulting engineers. Organized Aug. 7, 1907, under laws of Great Britain, with capitalization £135,000, shares £1 par; issued, 85,000. Was promoted by the Consolidated African Copper Trust, Ltd., which controls through stock ownership, and which advanced working capital, repayable Aug. 15, 1910, in cash or shares.

Lands, 202½ copper claims, including the Edmundian mine, which, circa 1906, shipped 2,377 long tons of 20% copper ore to England for test smelting. Mine is opened to the 7th level, with *estimated ore reserves* of 22,799 long tons of 5% copper *tenor. A small smelter, with a reverberatory* furnace, was built,

circa 1906, and company planned beginning smelting October, 1908. Pro
erty considered promising.

EIGHTY-FIVE MINING & MILLING CO. NEW MEXIC

Office: care of Jas. Barclay, Moline, Ills. Mine office: Lordsburg, Gra
Co., N. M. Organized late in 1907, with capitalization $1,000,000, apparent
succeeding the Eighty-Five Mining Co. Lands, in the Virginia district, sh
ore carrying good values in gold, silver and copper.

EINASLEIGH AMALGAMATED COPPER MINES, LTD. AUSTRALI

Office: Adelaide, South Australia. Mine office: Einasleigh, Queensla
Australia. Organized circa May, 1908, with capitalization £52,500, shares
par, as a merger of the Einasleigh Proprietary, Ltd., and an exploring syn
cate that held Block 55, adjoining.

EINASLEIGH EXPLORATION SYNDICATE, LTD. AUSTRALI

Offices: 20 Copthall Ave., London, E. C., Eng. Mine office: Einasleig
Gilbert Co., Queensland, Australia. W. H. Woodhead, managing direct
Thos. Mullett, secretary. Organized Aug. 16, 1899, with capitalization £4,0
shares £50 par; issued, £3,850. Lands, 100 acres, on the Einasleigh river, G
bert county, Queensland, Australia. Idle practically since birth.

EINASLEIGH FREEHOLD COPPER MINES, LTD. AUSTRALI

Dead. Reorganized, Jan. 17, 1907, as New Einasleigh Copper Mines, L
Formerly at Einasleigh, Gilbert Co., Queensland, Australia. Fully describ
Vol. VI.

EINASLEIGH PROPRIETARY, LTD. AUSTRALI

Office: Rockhampton, Queensland, Australia. Mine office: Einasleig
Queensland, Australia. R. S. Sarcher, chairman. At last accounts, May, 19
planned amalgamating with an Adelaide syndicate owning lease No. 55, und
title of Einasleigh Amalgamated Copper Mines, Ltd.

EINASLEIGH SOUTH BLOCKS. AUSTRALI

Mine office: Einasleigh, Gilbert Co., Queensland, Australia. Lands, sund
claims lying south of the Einasleigh Freehold. Idle some years.

EISFELDER KUPFERGEWERKSCHAFT. GERMAN

Mine office: Glücksbrunn, Saxe-Meiningen, Germany. Capitalizatio
600,000 marks. W. A. Mertens, smelter superintendent, at last accounts. D
velopment is by 2 shafts. Presumably idle.

EL CAPITAN COPPER CO. ARIZON

Dead. Was a swindle, perpetrated by the notorious firm of Douglas, Lac
& Co. This firm reported, Jan. 30, 1904, that the property had been absorb
and that its stock was to be exchanged, but, for purposes best known to t
firm, the company apparently has been kept alive, and the office address
New York continued in the city directory. Formerly at Kirkland, Yavap
Co., Ariz.

EL CAPITAN MINING CO. ARIZON

Letter returned unclaimed from former mine office, Kirkland, Yavapai C
Ariz. Lands, 5 claims, 5 miles from Kirkland, having a 60′ two-compartme
shaft showing a quartz vein, of 18″ to 3′ width, carrying auriferous and
gentiferous copper ore.

EL CARMEN COPPER CO. MEXIC

Office: 52 Front St., New York, N. Y. Mine office: San Juan de Hered
El Oro, Durango, Mex. Thos. P. Ball, president; Stephen A. Levy, secreta
and treasurer; I. Wayne Von Leer, general manager. Organized August, 18
under laws of New York, with capitalization $750,000, shares $100 par. Lan
400 acres, 45 miles from a railroad, also 31,000 acres miscellaneous lands. D
velopment has shown a considerable body of auriferous and argentiferous co

per ore, of concentrating grade. Has a large pumping plant, with a 3½-mile pipe-line, and a 40-stamp mill. Idle.

EL CARMEN MINING CO. **MEXICO.**

Mine office: San Javier, Hermosillo, Sonora, Mexico. Organized 1905, under laws of Arizona. Presumably idle.

EL COBRE MINES. **CUBA.**

Dead. Succeeded Jan. 5, 1907, by Cuba Copper Co. Formerly at El Cobre, Santiago de Cuba. Very fully described Vol. VI.

EL COBRE MINING CO. **MEXICO.**

Office: 248 Equitable Bldg., Denver, Colo. Mine office: Hermosillo, Sonora, Mex. A. S. Mackenzie, vice-president and general manager; Guy C. Cravens, secretary. Organized under laws of District of Columbia, with capitalization $5,000,000, shares $1 par.

Lands, circa 1,000 acres, including La Gran Duquesa and Transvaal mines, and a smelter site, in the Ures district, about 60 miles east of Hermosillo, to which point there is a good wagon road. Ores are claimed to give average smelter returns of 20.1% copper, 1.75 oz. silver and $4 gold per ton. The company's fiscal agent, F. A. Wright, of Chicago, advertised, October, 1904, that it was estimated by experts that on less than 50 acres of this ground the first 50 feet in depth would give more than 500,000 tons of gold-copper ore that, when smelted, would yield a net profit of over $10,000,000. Such abominable lies necessarily place both management and property under suspicion. Idle and apparently moribund.

EL DIAZ GOLD & COPPER CO. **MEXICO.**

Dead. Formerly at San Martín Hidalgo, Ameca, Jalisco, Mex. Described Vol. V.

EL DORADO COPPER CO. **ARIZONA.**

Office and mine: Globe, Gila Co., Ariz. J. M. Bice, Chas. E. Beck, Forest A. Zimmerman, Jas. Rocks and H. C. Hanawalt, directors. Organized Jan. 29, 1907, under laws of Arizona, with capitalization $1,000,000, shares $1 par.

EL DORADO COPPER MINING CO. **CALIFORNIA.**

Dead. Succeeded, circa 1906, by Woodside-Eureka Mining Co. Formerly at Georgetown, El Dorado Co., Cal.

ELDORADO GOLD MINING & MILLING CO. **UTAH.**

Office: 549 25th St., Ogden, Utah. Mine office: Hot Springs, Box Elder Co., Utah. Don Maguire, manager. Ores carry silver, lead and copper. Idle.

ELDORADO MINING CO. **IDAHO.**

Letter returned unclaimed from former mine office, Kellogg, Shoshone Co., Idaho. Organized circa July, 1907. Lands, 4 claims, about 1 mile east of Kellogg.

ELDORA ENTERPRISE GOLD MINING CO. **COLORADO.**

Mine office: Eldora, Gilpin Co., Colo. Ores carry gold, silver and copper. Has steam power and a 10-ton smelter. Presumably idle.

ELECTRA MINING & MILLING CO. **ARIZONA.**

Office: care of Alfred Day, fiscal agent, P. O. Box 513, Steubenville, Ohio. Lands, somewhere in Arizona, are claimed to show ore giving average assays of $27 per ton. Out of money, idle and apparently moribund.

ELECTRIC IRON & STEEL CO. **CALIFORNIA.**

Dead. A fraud, perpetrated by W. C. Brunson and J. W. Turner, who falsely claimed to own 7,000 acres of rich mining land in Shasta county, California.

ELECTRIC MINING & MILLING CO. **NEW MEXICO.**

Mine office: Orogrande, Otero Co., N. M. *In 1907 planned building a concentrator.*

ELECTRIC SMELTING & REFINING CO. ONTA

Works office: Sturgeon Falls, Nipissing, Ont. Was said, early 190 have completed a custom smelter.

SOCIEDAD ELECTROLITICA MANUFACTURERA DE COBRE. CHI

Office and works: Santiago de Chile. Organized Jan. 13, 1906, under of Chile, with capitalization 500,000 pesos, shares 100 pesos par.

ELECTROLYTIC COPPER CO. OREG

Office: 14 Century Blk., Mason City, Iowa. A. L. Ober, chairman; ceding officer, F. S. Kingsbury, F. B. Platt and J. F. Ferry, executive c mittee. Organized under laws of Washington, with capitalization $1,500, shares $1 par. Has no connection with the Electrolytic Copper Mining & Sm ing Co. Lands, 28 claims, partly fractional, said to be located somewhere Oregon, showing 5 ore bodies, said to range 10′ to 25′ in width, with a la gossan covering the wider ledge, veins being crosscut by tunnel.

ELECTROLYTIC COPPER MINING & SMELTING CO. OREG

Dead. Formerly at Imnaha, Wallowa Co., Ore.

ELECTROLYTIC REFINING & SMELTING CO OF AUSTRALIA, LTD. AUSTRAL

Works office: Port Kembla, N. S. W., Australia. Capt. G. A. Richard, g cral manager; Benj. Mangus, supervising engineer. Organized 1907, with c italization £150,000, practically as a subsidiary corporation of the Mount M gan Gold Mining Co., Ltd. Lands, 50 acres, at Port Kembla, in vicinity Sydney, but said, November, 1907, to be negotiating with the Queensland g ernment for new site, owing to trouble with government over an attempt levy oppressive harbor dues, the Australian federal and state governme seeming very obtuse, and perniciously active in penalizing new industri Works are planned to smelt copper ores and concentrates, and to convert ma to blister copper, and are planned to include, ultimately, an electrolytic finery. Works have a capacity of about 40 tons daily of refined metal, a are planned to treat ores and blister copper from the Mount Morgan and oth Australian mines now shipping their products abroad for refining.

ELENITA DEVELOPMENT CO. MEXIC

Office: Wolvin Bldg., Duluth, Minn. Letter returned unclaimed fr former mine office, La Cananea, Arizpe, Sonora, Mex. Louis W. Powell, m ager. Capitalization $200,000, shares $10 par; $5 paid in. Lands, circa 7 hectares, including property formerly owned by Bonanza de Cobre Mining C lying north of the Greene smelter, and extending to a point nearly opposite Puertecitos mines of the Greene-Cananea. Mine gives a promising surf showing, and has 2 shafts, in good ore. Property considered promising management good.

EL GLOBO MINING & MILLING CO. MEXIC

Office: 821 Railway Exchange Bldg., Milwaukee, Wis. Mine office: Na zari, Moctezuma, Sonora, Mex. Chas. A. Romadka, president and general m ager; C. G. Porter, secretary. Organized 1905, under laws of Arizona, w capitalization $400,000, shares $100 par. Ores carry mainly gold and sil values. Has a 15-stamp mill and cyanide plant.

AGUSTO ELGÜE. CHIL

Mine office: Guayacan, Peña Blanca, Aconcagua, Chile. Property is San Pablo mine, 15 kilometers from Peña Blanca, showing a vein of about meter average width, which has produced about 600 metric tons of 9% c per ore.

ELITE GOLD & COPPER MINING CO. WASHINGTO

Dead. Formerly at Index, Snohomish Co., Wash.

KUPFERERZBERGWERK ELIZA. **GERMANY.**

Mine office: Mallau, Elsass, Germany. Idle some years.

ELIZABETH COPPER CO. **VERMONT.**

Dead. Succeeded, circa 1907, by Vermont Copper Co. Formerly at South Strafford, Orange Co., Vt. Fully described Vol. VI.

ELIZABETH MINING CO. **VERMONT.**

Dead. Succeeded, 1905, by Elizabeth Copper Co. Formerly at South Strafford, Orange Co., Vt. Fully described Vol. V.

ELKHORN COPPER MINING CO. **MONTANA.**

Office: Dillon, Mont. Mine office: Argenta, Beaverhead Co., Mont. H. H. Swain, secretary. Mine, known as the Blue Eyed Annie, has a 100′ shaft. Presumably idle.

ELKHORN GOLD & COPPER MINING CO. **UTAH.**

Office and mine: Ogden, Weber Co., Utah. S. W. Cragun, president; M. A. Poulton, vice-president; Carl Allison, secretary and treasurer. Organized circa November, 1907, under laws of Utah, with capitalization $500,000, shares 10 cents par. Lands are in the Sierra Madre district of Box Elder county, Utah.

ELKHORN MINING CO., LTD. **BRITISH COLUMBIA.**

Mine office: Greenwood, Boundary district, B. C. Jas. Sutherland, president. Mine, under development at last accounts, had auriferous and argentiferous lead and copper ores.

ELK MOUNTAIN MINING CO. **NEVADA.**

Mine office: Three Creek, Owyhee Co., Idaho. M. S. Estes, president and general manager; Neil Beaton, vice-president; C. W. Robinett, secretary and treasurer. Capitalization $500,000, shares $1 par. Lands, 5 claims, in Elko county, Nevada, 8 miles from the Idaho line, about 16 miles northwest of Contact, Nev., and connected therewith by a good wagon road. Has a 14′ contact vein, between limestone and granite, of silicious sulphide ore, said by company to average 6% copper, 7 oz. silver and 0.04 oz. gold per ton, apparently from a single streak, opened by a 40′ tunnel. Company planned installing a smelter, 1908, but such installation is not justified by the limited development secured.

ELK MOUNTAIN MINING & MILLING CO. **WYOMING.**

Office and mine: Encampment, Carbon Co., Wyo. T. B. Smith, president; W. R. Phelps, vice-president; S. E. Phelps, secretary and treasurer; J. F. Tillou, general manager; G. S. Taylor, superintendent. Organized 1900, under laws of Wyoming, with capitalization $1,000,000, shares $1 par. Lands, 640 acres, patented, well timbered, in the northernmost hills of the Medicine Bow Mountains, showing contact deposits between limestone and schist, opened by an 80′ tunnel and 3 shafts, deepest 183′, carrying bunches of chalcocite in upper workings, giving place at depth to chalcopyrite. Has steam and electric power. Property considered promising. Idle.

ELLA COPPER MINING & DEVELOPMENT CO. **CALIFORNIA.**

Letter returned unclaimed from former office, San José, Cal. Mine office: New Almaden, Santa Clara Co., Cal. Lands, near the New Almaden cinnabar mine, are claimed to show a 40′ vein of 10% copper ore, which is a wilful and disastrous exaggeration.

ELLAMAR MINING CO. **ALASKA.**

Mine office: Ellamar, Prince William Sound, Alaska. J. D. Meenach, manager; Wm. Page, superintendent. Lands, on Virgin Bay, circa 20 miles south of Valdez, known as the Gladhaugh mine, have a 600′ shaft, with 6 levels cut, on a lense that is about 80′ wide and 190′ long, on the 200′ level, ore occurring as a contact vein between limestone and slate, carrying mainly chalcopyrite, associated with pyrite and pyrrhotite in a gange of country rock,

with occasional massive sulphides, ore bodies apparently improving in d
Was the first copper producer of Alaska, beginning shipments circa 1901.
as shipped, averages about 7.4% copper and 1 oz. silver per ton, with a
of gold. Has substantial mine buildings. Was said in press, May, 1907, to
been sold to the Hubbard-Elliott Copper Mines Development Co., but a
ently this was not true. Production, 1907, estimated at 1,000,000 lbs. fine
per. Property considered promising.

ELLA MINING CO. MONT

Dead. Was capitalized at 16,000 shares. Lands, lying next east o
Reins, were sold, Dec. 1, 1906, for a reported consideration of $240,000,
Reins Copper Co. Formerly at Butte, Silver Bow Co., Mont.

EL MAGISTRAL COPPER CO. ME

Office: 1 Madison Ave., New York, N. Y. Mine office: Choix, F
Sinaloa, Mex. H. L. McNair, president; Hon. C. F. Wright, vice-presider
G. Nash, secretary and treasurer; preceding officers, Hon. W. S. Leib, Th
Carvin, H. R. Woodward, John J. Dowdle, John P. Fiebig, John G. Whi
and Hon. G. E. Green, directors. Property is the entire capital stock
San Lucas Copper Co.

EL MAJIN COPPER CO. ME

Dead. Formerly at Hermosillo, Sonora, Mex.

ELM ORLU MINING CO. MONT

Office and mine: Butte, Silver Bow Co., Mont. Arthur H. Wethey,
ager; preceding officer, Hon. Wm. A. Clark, Wm. A. Clark, Jr., Wm. Bic
and A. J. McGinn, directors. Organized January, 1907, with capitali
$1,000,000, shares $1 par.

Lands, 2 claims, known as the Elm Orlu and Poser, north of Walke
and west of the Black Rock group of the Superior & Boston. Mine has a
shaft, showing, at depth of 500′, a 6′ vein of highly argentiferous coppe
assaying up to 4.5% copper and 100 to 300 oz. silver per ton, with
gold values. The 700′ level shows chalcocite, and management plans
cutting extensively on the 1,000′ level. Property considered promising
management good.

ELM RIVER COPPER CO. MICHI

Office: 60 State St., Boston, Mass. Mine office: Winona, Houghto
Mich. H. F. Fay, president; Geo. G. Endicott, secretary and treasurer
ceding officers, John C. Watson, Stephen R. Dow and Chas. N. King, dire
Capt. Samuel Chynoweth, superintendent. Organized Apr. 20, 1899, under
of New Jersey, with capitalization $1,200,000, shares $12 par, fully paid.
Colony Trust Co., Boston, registrar. Annual meeting, third Wednesd
April, at Jersey City.

Expenditures, 1907, were $40,274.92, leaving a balance on hand, J
1908, of $86,341.74, with liabilities of only $980.62.

Lands, 2,300 acres, in Section 6, Town 52 North, Range 35 West; Se
1, 2, 11 and 12, Town 52 North, Range 36 West, and Section 36, Town 53
Range 36 West; also a millsite in Section 30, Town 54 North, Range 36
on the shore of Lake Superior. Nearly a complete cross-section of the
has been secured by upwards of 5,000′ of diamond drill borings, these sh
a heavy overburden on nearly all of the lands. Borings have given
carrying copper, in variable quantities, from a number of different beds.

Considerable sinking and drifting has been done on several copper-be
beds, at different points. Shafts No. 1 and 2, former 800′ and latter 200′
are on the Winona lode. No. 3 shaft, 100′, and No. 4 shaft, 50′, are on
Shawmut lode. No. 5 shaft was sunk on an unidentified lode, located by dia
drill. *No. 1 shaft*, the first shaft started, was abandoned at 100′, but wa

, 1903. No. 1 shaft is 9x14′ in size, sunk in the footwall of the Winona aloid, at an angle of 72°. Crosscuts and drifts on the 500′ level show a ygdaloid carrying copper in unpayable quantities. On the 800′ level nd south drifts show a healthy bed of 12′ to 16′ width, but no profitable was opened there. In crosscutting west from the Winona lode 12 other ous amygdaloids were cut, but none were found of commercial value. 1907 the equipment was moved from No. 1 shaft to a new site, about st of the Winona lode, and No. 7 shaft was started, in virgin territory, unidentified bed from which a core showing copper had been secured ars previously.

ew vertical shaft is being sunk in search of the Lake bed. This is lo- out 1 mile northeast of the former workings, north of the center of heast ¼ of Section 11, somewhat west of the hypothetical horizon of lode. This shaft was 104′ deep, Oct. 15, 1908, having cut a few string- opper, and is planned to be sunk to a depth of 200′ or 300′, thence ing to the eastward, in search of the Lake lode. A drill-hole, bored owed a little copper in an amygdaloid occupying the hypothetical hori- he Lake lode.

ipment includes a duplex hoist good for 1,000′ depth, 2 Burt marine nd a 4-drill air-compressor. Water is taken from a dam by a Blake Buildings include a 40x40′ carpenter-shop, 28x65′ two-story warehouse, ng house with accommodations for 100 men, schoolhouse and a number ings.

Elm River has been searching nearly ten years for some payable cop- on which to open a mine, and, while results to date have been of a nature, the company is following the correct policy in continuing nd its prospects are perhaps better than ever before, notwithstanding of work without results.

VENIR MINING & MILLING CO. **MEXICO.**

ce: 406 Wilson Bldg., Dallas, Tex. Mine office: Cuatro Ciénegas, a, Coahuila, Mex. J. Y. Webb, Jr., president; W. W. Batcheler, vice- t; Frank Reedy, secretary and treasurer. Organized under laws of , with capitalization $1,000,000. Lands, 244 acres, 30 miles northwest o Ciénegas. Company expects to have railroad transportation within Deepest shaft, circa 250′, remains in the oxidized zone, mine having r mile of workings, with one tunnel in ore. Has shipped several car- low grade ore, returning circa 4.3% copper and 300 grams silver per ton.

OGRESO COPPER MINING CO. **MEXICO.**

d. Stockholders were given shares of Imperial Corona Gold Mining xchange. Formerly at Ayutla, Autlán, Jalisco, Mex. Described Vol. III.

Y GOLD & COPPER MINING CO. **WYOMING.**

ler returned unclaimed from former office and mine, Encampment, Car- Wyo. J. W. Hedding, secretary. Idle since 1905, but annual meeting Encampment, July 15, 1908.

O COPPER MINING CO. **MEXICO.**

e office: Tepezalá, Ocampo, Aguascalientes, Mex. J. Frank Gray, sec- nd treasurer. Organized 1907, under laws of Colorado, with capitaliza- 000,000.

ADAIR COPPER MINING CO. **AUSTRALIA.**

e office: Port Augusta, South Australia. A. M. Hardy, manager, at ounts. Has steam power. Presumably idle.

MINING CO. **COLORADO.**

d. Formerly at *Winfield, Chaffee Co., Colo.*

EL SUEÑO MINING CO. MEXI

Mine office: Tijuana, Norte, Baja California, Mex. Hugh T. Duff, sup intendent. Has auriferous and argentiferous copper ores. Has gasoline po and Huntington mill, and is said to have a very small smelter, known as Cuera de Venado.

MINA EL TESORA. MEXI

Office and mine: care of Don Emiliano Ybarra, owner, Calmalli, Sur, B. California, Mex. Has highly auriferous and argentiferous copper ores, w steam power and 10-stamp mill.

EL TIRO COPPER CO. ARIZON

Office: 5 Nassau St., New York, N. Y. Mine office: Red Rock, Pinal C Ariz. Employs circa 80 men. Franklin B. Richards, president; Edw. B. Kort vice-president; Chas. E. Ellis, secretary and treasurer; preceding officers, Wi Grief, Clement A. Griscom, Jr., Henry G. Moore and Geo. K. Barnes, directors H. C. Smith, general manager; Louis S. Noble, consulting engineer. Organize May 22, 1907, under laws of Arizona, with capitalization $4,500,000, shares $1 par, fully issued. Bonds, $1,000,000 authorized, first mortgage, at 6%; issued $550,000. Was promoted by the American Finance & Securities Co., practically as successor of Cleveland-Arizona Mining Co. Annual meeting, third Thurs day of April.

Lands, 14 claims, 10 patented, area 250 acres, also a 5-acre millsite, in the Silver Bell district, near the Imperial mine. Property shows various contact deposits between quartz-porphyry and limestone, and there are large masses of porphyry containing disseminated chalcocite, with local segregations of oxi dized ores, the zone of oxidation being 50′ to 150′ in depth. Ores developed are cuprite, melaconite, chalcocite and chalcopyrite, with decomposed por phyritic and limestone gangue. Two ore bodies are under development, these being irregular in shape, apparently about 10 acres in combined area, and proven to depth of about 300′.

Development is by several shafts of 50′ to 400′ depth, including the 220′ Daisy shaft; 400′ Kurtz shaft and 120′ Burtis shaft, with tunnels of 750′, 430′, 350′, 250′ and 200′, there being several shorter tunnels, mine having about 6,000′ of workings, estimated to show 250,000 tons of ore, a large body of oxi dized ore on the 120′ level carrying mainly cuprite and melaconite.

Equipment includes a 600-h. p. steam plant, a 150-kw. electric plant and a 120-h. p. gasoline plant. The 600-h. p. mining plant has a 16x20″ hoist with double drum, good for 1,000′ depth, and 3 gasoline hoists. There are Nord berg and Sullivan air-compressors, of 18 drills aggregate capacity. Buildings are 18 in number, and a complete surface plant is being built.

A 50-ton concentrator, 60x60′, of wood, built 1907, for test purposes, has a 7x10″ Blake crusher, 30-ton Huntington mill, 2 rolls, 1 vanner, 5 Wilfley tables, Vezin automatic sampler, Richards pulsator and hydraulic sizer. It is planned to enlarge this mill to 250 tons, when the nature of the permanent ore bodies is fully developed. Smelting ore and concentrates will go to the Sasco smelter 10 miles distant. Property is served by the Arizona Southern railway.

In 1907 ten carloads of mine-run ore returned 7.55 to 14.6% copper, with an average of 9.92%, shipments realizing $11,390. The company plans sinking the Kurtz and Daisy shafts below the 200′ level, and doing extensive opening. No attempt has been made at regular production, but about 400 tons of 10% ore, extracted in regular development work, has been shipped to smelters at Douglas, El Paso and Kansas City, and several thousand tons of 3% ore were treated for experimental purposes, mill giving an average extraction of better than 75%.

The principal officers of the company draw salaries for their services

is proper. The argument that none of the officials are salaried is a
ne, frequently used by developing companies. There is no reason why
ial of a mining company should work for nothing, and very few do so,
ho draw no salaries usually finding their account otherwise. Property
dered promising and management good.

IUNFO CONSOLIDATED MINING CO. **MEXICO.**

ce: 28 Greene St., New York, N. Y. Mine office: Bacoachi, Arizpe,
Mex. Company gives its mine address as El Triunfo, Arizpe, Sonora,
it there is no such postoffice, and the postmaster at Bocoachi returned
addressed to this company, stating there was no such company in ex-
Bocoachi, however, apparently is the nearest postoffice point, being
miles from the company's mine. A. C. Charlott, president and general
; Dr. S. Newton Leo, vice-president; Robt. Friedman, secretary; Julius
, treasurer; preceding officers, W. B. Hunnewell and Dr. Harry Bock,
; Antoino Acuna, superintendent; Augustin Rieutard, mine superin-
John W. Ward, mill superintendent; F. E. Mansfield, smelter superin-
W. C. Albers, engineer.

pany is organized under laws of Arizona, with capitalization $2,000,000,
par. Property is held through a Mexican incorporation, capitalization
sos, shares 100 pesos par, stock of which is owned outright by El Tri-
solidated Mining Co. Annual meeting, first Monday in October.

ls, 55 pertenencias, area 136 acres, circa 10 miles southwest of Bacoa-
2 miles from the Sonora river, said to be within 4 miles of the
mine, circa 30 miles northwest of Las Chispas mine, and about 75
wagon road, from La Cananea. Company claims to have in opera-
Triunfo, Louisiana, Providencia and Esmeralda mines, with 5 ore
der development, of 2' to 5' average width, traceable 2 miles, carry-
chite, azurite, bornite, chalcopyrite and chrysocolla, all silicious, and
l native silver, with an estimated average of 5% copper, 25 to 600
and $3 gold per ton. Mine is reported as having 3,300' of workings,
3,000 tons of ore, with about 3,000 tons on the dump, stated to range
50 per ton in value. Development is by 5 shafts, 6 tunnels and various
. The main vein is a fissure of 4' to 5' width, and practically vertical
ying oxidized ores above and sulphides below.

equipment includes a 90-h. p. steam plant at the mine, and there are
ings, including dwellings. There also is a small sawmill. Wells pro-
er for boilers and potable use.

mill, of 50 tons daily capacity, has 4 Behrend tables and a 25-h. p.
gine.

smelter, ½ mile from the mine, having a 40-h. p. engine, has a 30-ton
rotary furnace, turning out matte carrying 56% copper, 600 oz. silver
oz. gold per ton. The smelter was blown in circa April, 1908, and is
have worked well, but did not remain in blast, owing to poor trans-
facilities, nearest railroad being at Cos, 38 miles distant by mule
the company hopes to get a wagon road.

company claims to have expended about $150,000, and to be out of
l stated, August, 1908, that it expected to declare a dividend in De-
but on what grounds such expectations were entertained is not readily
, as further development seems necessary to put the property on a
orily productive basis.

DE GRANDE COPPER CO. **MEXICO.**

e: care of Percy Sharpe, Nogales, Ariz. Letter returned unclaimed
mer mine office, Imuris, Magdalena, Sonora, Mex. Capitalization

$2,000,000, shares $1 par. Lands are in the foothills of the Sierra Azul, miles from Imuris, which is on the Sonora railroad. Idle.

ELY AMALGAMATED COPPER CO. NEVAD

Office: Salt Lake City, Utah. Mine office: Ely, White Pine Co., Nev. R. Murdock, president; B. F. Grant, vice-president; S. Y. Taylor, secretary a treasurer; preceding officers, J. B. Taylor and A. B. Kingsbury, directors. Ca italization $100,000, shares 10 cents par. Lands, 30 claims, in the Duck Cre district, ownership of 3 of which, lying near the Steptoe smelter, is in di pute with the Steptoe Valley Mining & Smelting Co.

ELY AMALGAMATED COPPER CO. NEVAD

Office: 407 Jackson Bldg., Denver, Colo. Mine office: Ely, White Pi Co., Nev. F. H. Harding, president; J. E. Romer, vice-president; G. A. Killa secretary and treasurer; preceding officers, Fred L. Humphrey and Mat. Root, directors. Organized November, 1906, under laws of Arizona, with ca italization $2,500,000, shares $5 par. Lands, 6 claims, area 120 acres, in t northwestern section of the Ely district. Operations confined mainly to ve lurid advertising.

ELY ARCH COPPER CO. NEVAD

Mine office: Ely, White Pine Co., Nev. Organized circa March, 1907, wi capitalization $5,000,000, shares $5 par.

ELY BELL MINING CO. NEVADA & UTA

Office: Salt Lake City, Utah. Letter returned unclaimed from form mine office, Ely, White Pine Co., Nev. F. O. McFall, president and genera manager; W. T. Binford, vice-president; J. E. Hanway, secretary and trea urer. Organized April, 1907, under laws of Arizona, with capitalizatio $1,000,000, shares $1 par. Lands, 3 unpatented claims, in the Ely district, an 15 claims, area 300 acres, in the Draper district, adjoining the Little Cotto wood district of Salt Lake county, Utah, held under bond and lease, said t show a 12′ vein. Was negotiating, late 1907, for sale of property to Corom Consolidated Mines Co.

ELY BLACKHORSE MINING CO. NEVAD

Letter returned unclaimed from former mine office, Blackhorse, Whi Pine Co., Nev. Organized 1907, under laws of Colorado, with capitalizatio $1,250,000, by M. D. McKane, et al. Is said to have a fair showing of co per ore.

ELY-BONANZA COPPER CO. NEVAD

Dead. Letters returned unclaimed from former office, 148 Broad St., Ne York, N. Y., and former mine office, Ely, White Pine Co., Nev. Francis H Sherrerd was manager. Organized 1907, under laws of New Jersey, with cap talization $1,000,000, shares $1 par. Lands were 12 claims, south of the Giro Consolidated, having a 350′ shaft, with gasoline hoist.

ELY-CALUMET COPPER CO NEVAD

Mine office: Ely, White Pine Co., Nev. A. D. Myers, manager. Capita ization $5,000,000, shares $5 par. Lands, 21 claims, said to have cost $75,000.

ELY CENTRAL COPPER CO. NEVAD

Office: 211 Keyser Bldg., Baltimore, Md. Mine office: Ely, White Pi Co., Nev. O. A. Turner, president; B. A. Hazell, vice-president; H. S. Turne secretary; E. S. S. Turner, treasurer; Fred S. Pheby, general manager; pr ceding officers and J. H. Preston, directors. Organized March 31, 1906, und laws of Delaware, with capitalization $12,000,000, shares $10 par, fully issue Was said, March, 1907, to have paid $323,000 for property. Trust Co. of Nor America, Philadelphia, registrar.

Lands, 35 claims, unpatented, area 508 acres, centrally located in t *Robinson district*, being surrounded by the Nevada Consolidated and E

lines Co., showing limestone carrying a monzonite dyke of 3,000′ claimed width, estimated to carry average values of 3% copper, 1 oz. silver and 40 cents gold per ton. Property also has an ore body of 20′ to 95′ estimated width giving assays of 2 to 17% copper, and shows native copper and chalcocite. The Weber shaft shows copper sulphides at a depth of 400′, and the company plans sinking a working shaft, and has started a tunnel planned to be driven 1,000′. The tract has been quite thoroughly tested by churn drilling, about 150 holes having been bored.

ELY CONSOLIDATED COPPER CO. **NEVADA.**

Office: 1111-25 Broad St., New York, N. Y. Mine office: Ely, White Pine Co., Nev. Willard F. Snyder, president; J. H. Everett, vice-president; Chas. O. Collingwood, secretary and treasurer; preceding officers, Col. Nicholas Luyweek and Gideon Snyder, directors; Olaus Jeldness, manager. Organized Oct. 2, 1906, under laws of Utah, with capitalization $10,000,000, shares $1 par. Windsor Trust Co., New York, registrar. Lands, 15 claims, area circa 300 acres, near the Ruth group of the Nevada Consolidated and Jupiter group of the Cumberland-Ely, bought for circa $125,000, and considered well located. The Brilliant shaft, 625′, is said to show 55′ of cupriferous pyrite on the bottom level, carrying about 3% copper and $1.50 per ton combined gold and silver values. The American shaft is 500′ and the Zack shaft 360′ deep. Shipped a little ore, 1907, carrying excess of iron, reducing smelting cost to 1 cents per ton, and netting $81.99 per ton. Property considered promising.

ELY CONSOLIDATED MINING CO. **NEVADA.**

Mine office: Ely, White Pine Co., Nev. Capitalization, $5,000,000, shares $5 par. Presumably idle.

ELY COPPER CO **NEVADA.**

Office: 815 Ernest & Cranmer Bldg., Denver, Colo. Mine office: Ely, White Pine Co., Nev. Geo. F. Fry, president; F. P. Berchy, vice-president; R. J. Grant, secretary; E. C. Newcombe, treasurer; preceding officers and F. J. Shipman, directors; Lee Lockner, engineer. Organized September, 1906, under laws of Wyoming, with capitalization $5,000,000, shares $5 par.

Lands, 7 claims, 2 fractional, area 225 acres, lying west of the Giroux Consolidated, having some open-cuts and a shaft, reported by company as 400′ deep, having a 25-h. p. hoist.

Stock in this company was placed through the General Finance Co., of Denver, on 25% commission, the fiscal agency advertising that: "The Ely copper district has been held within the clutches of the captains of finance, but by Yankee aggressiveness, the captains of industry and high finance have been thwarted, and after an outlay of vast expense we are able to burst through their phalanxes, and cut the Gordian knot that has kept the investor from obtaining even a small interest in this, the world's newest, and, without doubt, the greatest copper camp ever known since the production of copper as a commercial commodity." It would be a work of supererogation to criticise such a literary gem of purest ray serene as the foregoing excerpt, which would have been a credit to Sir Boyle Roche, though it is not on record that Sir Boyle ever turned his talents toward peddling cheap and dubious mining shares. Idle.

ELY COPPER QUEEN MINING CO. **NEVADA.**

Mine office: Ely, White Pine Co., Nev. Organized circa December, 1906, under laws of Arizona, with capitalization $1,250,000, shares $5 par by E. J. Daughters and W. J. Wallace.

Parker, consulting Organized circa 1907, as successor of the Ely Jumbo, Mizpah Verde conda companies, with capitalization $5,000,000, shares $2.50 par; ,750,000.
s, 24 claims, area 480 acres, including the Cowen group of 4 claims the Nevada Consolidated on the south, property being located south- the Nevada Consolidated and immediately south of the Manhattan pper Co. At last accounts, 1907, company contemplated diamond nd sinking a shaft. Presumably idle.

VADA COPPER CO. **NEVADA.**
: 35 Wall St., New York, N. Y. Mine office: Ely, White Pine Volney D. Williamson, president; F. L. Underwood, vice-president; Bonham, second vice-president and secretary; Hamilton H. Durand, R. H. Eggleston, assistant treasurer; preceding officers, G. L. Rick- Davidson and J. *Markham Marshall, directors.* Organized May 17,

1906, under laws of Maine, with capitalization $1,000,000, shares $1 par. Trust Company of America, New York, transfer agent. Lands, 9 claims, area 17[illegible] acres, near the Cumberland-Ely, considered fairly located.

ELY NEVADA EXPLORATION CO. NEVADA.

Mine office: Ely, White Pine Co., Nev. Capitalization $250,000, shares $5 par.

ELY NORTHERN COPPER CO. NEVADA.

Office and mine: Ely, White Pine Co., Nev. Thos. B. Pheby, president; Jos. Pheby, vice-president; J. W. Biggane, secretary and treasurer; Fredk. S. Pheby, general manager. Organized May, 1906, under laws of Nevada, as successor of Nevada Northern Copper Co., with capitalization $1,000,000, shares $1 par; issued, $750,000.

Lands, 8 claims, patented, area 97 acres, adjoining the Vesta mine, said to show numerous ore bodies, of which 3, under development, are reported by company as of 15′ average width, carrying oxidized ores as replacements in limestone, of 3% copper average tenor, the zone of secondary enrichment not having been reached. Mine has about 1,000′ of workings.

ELY-OGDEN MINING CO. NEVADA.

Mine office: Ely, White Pine Co., Nev. Capitalization $1,000,000, shares $1 par.

ELY & OSCEOLA LEDGE MINING & MILLING CO. NEVADA.

Letters returned unclaimed from former office, care of North American Banking & Trust Co., Philadelphia, Pa., and former mine offices, Ely, White Pine Co., Nev., and Osceola, White Pine Co., Nev. Jos. F. Schwohl, vice-president; B. N. Lesher, superintendent. Lands, 9 lode claims, area circa 180 acres, at Ely, and 8 placer claims, area 320 acres, at Osceola. Employed about 25 men, late in 1907. Idle.

ELY-PHOENIX COPPER MINING CO. NEVADA.

Dead. Organized circa 1907, with capitalization $1,000,000, shares $1 par. Formerly at Ely, White Pine Co., Nev.

ELY-RAND COPPER CO. NEVADA.

Mine office: Ely, White Pine Co., Nev. Organized 1907, under laws of Arizona, with capitalization $2,000,000, by Alfred Adams, Norton Adams and Hunter B. Supple. Presumably idle.

ELY-RESURRECTION COPPER CO. NEVADA.

Office: Herald Bldg., Salt Lake City, Utah. Mine office: Ely, White Pine Co., Nev. C. Freed, president; Jos. Lippman, vice-president; Frank Knox, treasurer; C. R. Raymond, secretary and manager; preceding officers T. Jacobson, G. W. Lynch and Wm. L. Moyer, directors. Organized 1906 under laws of Arizona, with capitalization $1,000,000, shares $5 par. Lands, 30 claims, patented, area circa 550 acres, lying north and east of Ely and considered promising, though somewhat out of the center of the district. Mine has 2 short tunnels and a 140′ shaft, showing 18′ of ore assaying up to 5% copper, with gold and silver values. Also has some high grade ore assaying up to 46% lead and 110 oz. silver per ton, with good gold values.

ELY REVENUE COPPER CO. NEVADA.

Office: Durango, Colo. Mine office: Ely, White Pine Co., Nev. C. E. McConnell, president. Organized circa January, 1907, with capitalization $1,000,000, shares $1 par. Lands, known as the Revenue group, are near the Chainman and Altman mines.

ELY-ROCHELLE COPPER CO. NEVADA.

Mine office: Ely, White Pine Co., Nev. Organized Nov. 23, 1906, under *laws of Maine*, with capitalization $1,000,000, shares $1 par.

SILVER, LEAD & COPPER CO. **NEVADA.**
Office: Whinery Blk., Union, Iowa. Letter returned unclaimed from mer mine office, Ely, White Pine Co., Nev. H. J. Benson, president; R. Sixby, vice-president; E. A. Corfe, secretary; F. K. Long, treasurer; C. R. cr, general manager; preceding officers, J. D. Cundiff and A. R. Bavender, ctors. Lands, 9 claims, area circa 180 acres, having several shallow shafts short tunnels, said to have produced a little silver-lead ore in the past.

STANDARD COPPER CO. **NEVADA.**
Office: care of W. F. Snyder, Salt Lake City, Utah. Letter returned laimed from former mine office, Ely, White Pine Co., Nev. Organized ca January, 1907. Lands, circa 1,000 acres. Idle.

SULPHIDE COPPER CO. **NEVADA.**
Mine office: Ely, White Pine Co., Nev. Organized 1907, with capitaliza- n $1,000,000, shares $1 par.

LY WANETA MINING & MILLING CO. **NEVADA.**
Letter returned unclaimed from former mine office, Ely, White Pine Co., ev. Organized circa March, 1907, to operate in vicinity of Ely. Idle and pparently moribund.

LY WESTERN COPPER CO. **NEVADA.**
Mine office: Ely, White Pine Co., Nev. Organized July, 1906, with apitalization $1,000,000, shares $1 par. Lands, 40 acres. Presumably idle.

LY-WILDHORSE COPPER CO. **NEVADA.**
Letter returned unclaimed from former mine office, Ely, White Pine e., Nev. Organized circa February, 1907, to develop a group of about 18 aims, in the vicinity of Pilot Knob. Idle and apparently moribund.

LY-WITCH COPPER CO. **NEVADA.**
Office: 1204-32 Broadway, New York, N. Y. Mine office: Ely, White ine Co., Nev. J. E. Bamberger, president; D. M. Hyman, vice-president; L. Tilton, secretary; Ernest Bamberger, treasurer and general manager; receding officers and W. W. Armstrong, directors; L. D. Osborne, superintend- nt. Organized Nov. 22, 1906, under laws of Maine, with capitalization 5,000,000, shares $5 par.

Lands, 7 claims, 1 fractional, area 54 acres, patents applied for, said to ave been bought for $275,000, lying in the porphyry zone between the evada Consolidated and Cumberland-Ely mines, showing large blowouts f ferruginous porphyry. Development is by a 300′ shaft, with levels at 100′ ntervals, and by tunnels of 1,200′, 600′ and 1,050′, with 3,500′ of workings, howing ores, mainly chalcocite and chalcopyrite, assaying up to 25% copper nd 2 oz. silver per ton, with traces of gold. Equipment includes a second- ation hoist, good for 500′ depth, and 5 small mine buildings. Property has ome good ore on the dumps, and is well located between the Wedge group f the Cumberland-Ely and the Ruth mine of the Nevada Consolidated.

MERALD COPPER CO. **MEXICO.**
Mine office: Llano, Magdalena, Sonora, Mex. F. C. Emery, president; W. D. Fredericks, superintendent. Lands, 88 hectares, on which develop- ment, begun January, 1907, shows ore assaying 10 to 25% copper, 15 to 20 oz. silver and up to $6 gold per metric ton, silver values increasing with depth.

MERALD MINING CO. **WYOMING.**
Office and mine: Wheatland, Laramie Co., Wyo. H. A. Robinson, man- ager. Lands, including the Cooney Hill and Emerald mines, on Slate Creek, show a prominent gossan. The Emerald has a 60′ shaft in ore, and a 100′ shaft bottomed in a gossan showing *traces of copper* sulphides.

EMERALD MINING & SMELTING CO. MEXIC

Dead. Succeeded by Esmeralda Copper Mining & Smelting Co. Fo merly at Santa Catarina del Norte, Baja California, Mex.

EMMA COPPER CO. UTAH

Office: care of E. O. Howard, secretary and treasurer, Salt Lake Cit Utah. Mine office: Alta, Salt Lake Co., Utah. John A. Kirby, president Joseph Lippman, vice-president; E. O. Howard, secretary and treasurer; pr ceding officers, W. M. Wantland, D. H. Peery, Rufus K. Cobb, S. A. Bang and L. D. Gordon, directors; Jas. E. Beveridge, superintendent. Organize circa November, 1906, under laws of Utah, with capitalization $1,000,00 shares $1 par. Is no relation to the Old Emma Mining Co. Lands, 8 claim area 160 acres, with bond and lease on 3 adjoining groups, near the Colum bus Consolidated. Property is the old Emma mine, which was a considerabl producer in early days, and is said to have been the first mine opened i Utah, with claimed production of about $5,000,000. Development is throug the Flagstaff tunnel, showing a 15' vein, carrying a paystreak of 1' to 4' widt giving assays of 2.5% copper, 11.8% lead, 40 oz. silver and 83 cents gold p ton. Property considered promising.

SOCIEDAD MINERA EMMA LUISA. CHILE

Mine office: Taltal, Antofagasta, Chile. J. S. Marion, superintendent at last accounts. Has auriferous copper ores, with steam power. Idle.

EMMA MINE. BRITISH COLUMBIA

Owned three-fourths by the British Columbia Copper Co., Ltd., and one fourth by the Hall Mining & Smelting Co., Ltd., and is described under title of former.

EMMA MINE. MONTANA

Held by Butte Copper & Zinc Co. at last accounts. Changes hands so frequently it is difficult to keep track of.

EMMA MINE. NEW MEXICO

Mine office: Santa Rita, Grant Co., N. M. Property, owned by Phelps Dodge & Co., is under lease to P. C. Cramer, who was producing 2 to 3 car loads of ore weekly, at last accounts.

EMMA MINING & DEVELOPMENT CO. MONTANA

Dead. Formerly at Butte, Silver Bow Co., Mont.

GEWERKSCHAFT EMMANUEL. GERMANY

Letter returned unclaimed from former mine office, Wülfrath, Rhein provinz, Prussia, Germany. Mine, opened by one shaft, has chalcopyrite an sphalerite.

EMPIRE COPPER CO. IDAHO

Office: 52 William St., New York, N. Y. Mine office: Mackay, Custe Co., Ida. Frank M. Leland, president, treasurer and general manager; John H. Hobbs, vice-president; Robt. Leslie Moffett, secretary; preceding officers John C. Montgomery and Thos. J. Barbour, directors; Ralph R. Osborn, mine superintendent; Timothy E. Guhin, smelter superintendent; Frank L. Sweeney, master mechanic; A. F. Wuensch, consulting engineer.

Organized May 29, 1907, under laws of Maine, with capitalizatio $6,000,000, shares $5 par, reduced, July 16, 1908, to $1,200,000, shares $1 pa issued, $1,000,000. On Jan. 1, 1908, had quick assets of $32,997.42, includin $18,060.65 cash, with liabilities of only $389.58. Annual meeting, third Tu day in May.

Company bought the Mackay property of the White Knob Copper Development Co., Ltd., taking over also a 5-year lease on the property fro the MacBeth Leasing Co., giving 250,000 shares of stock to the White Kn *and 750,000 shares* to the owners of the MacBeth lease, and begun busine

out any cash in the treasury, but with 200,000 shares of stock. Quick ts now possessed have been secured from earnings, in addition to the in- lation of new machinery costing $7,735.69.

Lands, 39 claims, 6 fractional, 6 patented, area 700 acres, also mill and lter sites of 184 acres, and a railroad right-of-way, in the Alder creek dis- t. Property carries a large number of lenticular contact deposits, between ite-porphyry and limestone, of which 31 are more or less developed, these g erratic in size, strike and dip, carrying all of the ordinary copper oxides, bonates and sulphides. Former owners claimed a 23' vein carrying 3 to 9% per and $1.75 to $3 combined gold and silver values per ton, but present own- merely claim what they have, and give the average of one year's ore extrac- n as 3.9% copper, 2.02 oz. silver and 80 cents gold per ton. The property was ned circa 1884, and worked at various times. For some years it was der the control of a succession of White Knob corporations, which suc- ded each other with deadly monotony, each making a flat failure of the ne, until the property was leased, circa July 1, 1905, to the MacBeth Leas- g Co., which worked the mine on a business basis, at a profit, which the owners never succeeded in doing.

The mine has a glory-hole of 125' to 200' width, but extraction is mainly tunnel, the main shaft of 700' depth connecting with the Albert tunnel, circa 1,500' length, the mine having about 7 miles of workings, estimated show 60,000 tons of ore, with 30,000 tons blocked out for stoping. The ine is dry.

Equipment includes steam, electric, gasoline, water and air power, with total of 152 h. p. at the mine and 125 h. p. at the smelter. There are h. p., 10-h. p. and 8-h. p. hoists, and an 8-drill air-compressor. The com- ny has about 20 buildings at the mine, including a sawmill, 20x30' carpen- shop and 20x30' smithy, with a 40x100' machine-shop at the smelter.

The mine is reached by a 96-mile branch of the Oregon Short Line rail- y, running from Blackfoot to Houston, and is connected with the smelter y the Empire railroad, owned by the company, 7¾ miles in length with 36" ge, equipped with two 23-ton Shay mountain climbing locomotives, and 38 rs. The line has a maximum gradient of 6%, with a rise of 2,000', and has 6% grade on a 34° curve.

The smelter has two 125-ton water-jacket blast-furnaces 44x160" at the ayers, with Connersville blowers, making matte carrying about 40% copper, oz. silver and 1 oz. gold per ton, sent to the Murray smelter for conversion, and does occasional custom smelting. The mine also has shipped some ore the Garfield smelter.

Production, 1906, under the old management, was circa 3,200,000 lbs. fine pper, and, for 1907, was 2,750,000 lbs., from 42,800 tons of ore treated. ining costs are about $3 per ton, and smelting costs $4.25, the gold and ver values about offsetting conversion and refining costs, giving copper at average cost of about 10 cents per pound.

The Empire Copper Co. was promoted just in time to be caught in the 07 panic, but every share of stock sold to the public was redeemed, at sub- scription price, for which the promoters deserve great credit. The property considered valuable, notwithstanding its bad record under the various White Knob companies. The present management is efficient, and probably will resume operations shortly, only a few men being employed, doing assess- ment work on unpatented claims, in October, 1908.

EMPIRE COPPER CO. **NEVADA.**

Dead. Lands now held by Pacific Consolidated Mining Co. Formerly at Reno, Washoe Co., Nev.

EMPIRE COPPER & GOLD MINING CO. ARIZO

Office: 217-122 West Third St., Los Angeles, Cal. Mine office: John
Cochise Co., Ariz. J. L. Brooks, president and general manager; M. J. G
vice-president; H. H. Morrow, secretary and treasurer; preceding offic
J. O. Pace, H. Hermanson, Angus Graham and M. M. Gustin, directors.
ganized Jan. 31, 1905, under laws of Arizona, with capitalization $1,500,
shares $1 par. Annual meeting, second Monday in January. Lands,
claims, area 480 acres, in the Little Dragoon Mountains, in 2 groups, incl
ing the Empire group of 16 claims, and the Cowboy group of 8 claims,
miles from Johnson. Lands show a good gossan carrying carbonate stain
Has 2 shafts, one a 2-compartment 400′ shaft, with about 500′ of drifts, sho
ing ore of 3.4% copper tenor on the 100′ level, with some ore assaying up
30% copper, 4 oz. silver and $2.80 gold per ton. Has a hoist good for 1,00
depth, and an air-compressor.

EMPIRE COPPER MINING & MILLING CO. NEW MEXIC

Mine office: Tusas, Rio Arriba Co., N. M. Property, known as the
S. P. mine, has a shaft showing copper ore of fair grade.

EMPIRE-GOLD BUG MINING CO. COLORADO

Dead. Formerly at Empire, Clear Creek Co., Colo.

EMPIRE GOLD & COPPER CO. COLORADO

Office and mine: care of Harry W. Kane, Central City, Gilpin Co., Col
Organized 1907, under laws of Colorado, with capitalization $1,500,000. Land
include the Aduddell group and the Jimtown millsite. Has a 200-ton reduc
tion plant, at Idaho Springs. Production is partly through the Aduddel
shaft, and partly through the Newhouse tunnel.

EMPIRE MINES CO. NEW MEXICO

Dead. Formerly at Hanover, Grant Co., N. M.

EMPIRE MINING CO. ARIZONA

Office: Utica, N. Y. Mine office: Bisbee, Cochise Co., Ariz. W.
Scott, president; A. W. Daggett, treasurer; J. G. Pritchard, managing direct
preceding officers, R. E. King, F. L. Guillame, L. E. Browne, W. A. Fenn, J
A. Losse and F. M. Penny, directors; Alex. Erickson, superintendent. Organ
ized June 27, 1904, under laws of Arizona, with capitalization $1,000,00
shares $1 par.

Lands, 10 claims, area 200 acres, near the Modern mine, opened by
350′ tunnel, claimed to show a 5′ vein of auriferous and argentiferous copp
ore, of circa $14 per ton gross value. Ore is found in small stringers, typic
of this district, and property is not considered well located.

EMPIRE MINING CO. ARIZON

Mine office: Pantano, Pima Co., Ariz. E. A. Pike, superintendent.
supposed to be controlled by Col. Epes Randolph and associates. Mine, f
merly known by the Total Wreck, made small ore shipments, 1908, to th
smelter at El Paso.

EMPIRE MINING CO. MICHIGA

Dead. Lands sold, 1905, to Keweenaw Copper Co. Formerly at Delawa
Mine, Keweenaw Co., Mich.

EMPIRE-NEVADA COPPER MINING & SMELTING CO. NEVAD

Office: 29 Broadway, New York, N. Y. Mine office: Yerington,
Co., Nev. Wm. Gelder, president; L. R. Bittman, secretary. Organized und
laws of Arizona, with capitalization $5,000,000, shares $5 par. Lands, 6
500 acres, 2 miles west of Yerington, having numerous pits and 4 shafts
about 100′ depth each. Considerable drilling has been done. Company clai
an outcrop of red copper ore more than 1,000′ wide, which seems an unde

mistic statement. Is said to have a 200-ton mill and a 100-ton smelter, statement not verified. Presumably idle.

IRE SMELTING CO. **ARIZONA.**

Dead. Property sold, under foreclosure, Sept. 15, 1906, to Walter F. , for $16,193. Formerly at Benson, Cochise Co., Ariz.

IRE & STAR MINING, MILLING & SMELTING CO. **WYOMING.**

Dead. Succeeded by Hecla Mining Co. Formerly at Hecla, Laramie Co.,

RE STATE MINING CO. **ARIZONA.**

LS COPPER MINING CO. **CALIFORNIA.**

ice: 421 Market St., San Francisco, Cal. Mine office: Taylorsville, Co., Cal. Lands, in Light's Cañon, 3 miles northeast of Taylorsville, ng the Superior mine, have a crosscut tunnel running into Iron Cap ain, showing sulphide, carbonate and silicate ores, assaying well in gold and silver.

ISH & AUSTRALIAN COPPER CO., LTD. **AUSTRALIA.**

ice: 17 Gracechurch St., London, E. C., Eng. Works offices: Port de, South Australia, and Waratah, Newcastle, N. S. W., Australia. Harvey, chairman; Wm. Owen Robinson, deputy chairman; preceding , W. S. Cuff and W. Russell, directors; G. E. C. Clarke, secretary; F. S. , general manager; Thos. Johnson, smelter superintendent. Organized and reorganized March 15, 1864, under laws of Great Britain, with limited reduced to £150,000, shares 30s. par; issued, £102,988 10s. De- es, £25,000, at 6%, due January, 1912. Dividends have been as fol- 6d. in 1901; 1s. each in 1902, 1903, 1904, 1905, 1906 and 1907. Net were £4,210 in 1906 and £4,055 8s. 6d. in 1907.

roperty includes smelting works at *Waratah and* Port Adelaide, em- g circa 100 men, *also an interest of 3,904* shares in the Clara St. Dora

Copper Mining Co., principal value of latter being in the way of suppl... ore to the smelters.

ENTERPRISE COPPER MINING CO., N. L. AUSTRA...

Mine office: Barossa, South Australia. Lands, freehold, 2 miles from Williamstown, have a 4′ quartz vein, with footwall paystreak of 6″ to 8″ carrying melaconite, malachite and chalcopyrite, all with good silver values, opened by a 200′ main shaft. Has steam power and a hoist. Property was worked, many years ago, then shipping a little ore of 40 to 50% copper ten...

ENTERPRISE MILL & MINING CO. COLORADO.

Dead. Was succeeded by Enterprise Mining Co., which was merged, circa 1907, in the Swarthmore Consolidated Mining Co. Formerly at El... rado, Boulder Co., Colo.

ENTERPRISE MINING CO. NEVADA

Letter returned unclaimed from former mine office, Tonopah, Nye Co., Nev. At last accounts was prospecting a property in the Lone Mountain district, circa 16 miles southwest of Tonopah, having an 86′ shaft showing vein of 4′ to 8′ width, giving average assays of $12 to $60 per ton in gold, silver and copper. Presumably idle.

ENTERPRISE MINING & MILLING CO. NEW MEXICO

Office: care of W. B. DeShon, secretary and treasurer, Pittsburg, Pa. Mine office: Cooney, Socorro Co., N. M. Geo. A. Freeman, vice-president and general manager. Lands, 2 claims, known as the Kat and Kittens, also the Enterprise group, having a 130′ shaft showing a 4′ ore body and a 200′ shaft bottomed in a 10′ vein carrying values mainly in gold. Has a 150-light electric plant. A 25-ton concentrator and 50-ton cyanide plant were burned June, 1908, at an estimated loss of $33,000, with $20,000 insurance.

ENTERPRISE MINING, REDUCTION & IMPROVEMENT CO. ARIZONA

Office and mine: Kingman, Mohave Co., Ariz. Maj. W. A. Mensch, president, treasurer and general manager; M. L. Summers, vice-president; S. A. Mensch, secretary; preceding officers, J. N. Turrentine, F. M. Townsend, Arthur Gleason and E. E. Engeart, directors. Organized July 15, 1900, under laws of Arizona, with capitalization $1,500,000, shares $1 par; issued $1,165,000. Annual meeting, first Tuesday after first Monday in January.

Lands, 15 claims, area 300 acres, in the Maynard district of the Hualapai Mountains, adjoining the Arizona Le Roy Copper Mining Co., circa 30 miles southeast of Kingman and about 13 miles from the Santa Fé railroad, with good wagon road connecting, lands being well watered, with timber available. Property shows 7 ore bodies, in granite and porphyry, one, under development known as the American vein, being estimated at 30′ average width, opened by a 200′ shaft, with 1,410′ of workings, estimated to show 70,000 tons of ore with 40,000 tons blocked out, carrying bornite, chalcopyrite and tetrahedrite averaging 7% copper, 25% lead and 206 oz. silver, and from $4 to $8 gold per ton, which estimates are unduly high. Has a 35-h. p. steam plant, with mine buildings. Company plans continuous development.

EPHIA MINING CO. MEXICO

Office and mine: Douglas, Cochise Co., Ariz. W. F. Nihart, general manager. Organized 1906, under laws of Arizona, with capitalization $500,000, shares $1 par. Lands, circa 20 miles from a railroad, are in the Nogal-Carrizo district of Arizpe, Sonora, Mexico. Has an 80′ shaft, showing ore assaying up to 27.5% copper and 55 oz. silver per ton. Presumably idle.

EQUATOR MINING & SMELTING CO. ARIZONA

Office: 49 Wall St., New York, N. Y. Mine office: Jerome, Yavapai Co., Ariz. Hon. Wm. A. Clark, president; Jas. A. Macdonald, vice-president; Hart H. St. Clair, secretary and treasurer; preceding officers, Chas. W. Clark and

Jas. H. Anderson, directors. Organized March 19, 1900, under laws of West Virginia, with capitalization $500,000, shares $5 par; issued, $275,000. Annual meeting, third Monday in February.

Property, commonly known as the Iron King mine, is on Equator Hill, in the Agua Fria district, south of Jerome, 4 miles by trail or 6 miles by wagon-road. Property shows a mineralized zone up to 600' in width, with north and south strike, traceable for upwards of 1,000'. It was feared that the ore body was a blanket vein, but diamond drill borings proved it to hold to depth, carrying auriferous and argentiferous copper ores. Mine has a 300' main shaft, and a 5,000' gravity tram-line connecting the portal of the upper tunnel with the roast-yard of the reduction plant.

Property had a 250-ton smelter, and production, 1904, was circa 800,000 lb. fine copper, but operations were suspended August, 1905, smelter dismantled and machinery removed.

EQUITABLE COPPER CO. **WYOMING.**

Office: Altoona, Pa. Letter returned unclaimed from former mine office, Encampment, Carbon Co., Wyo. A. Brile, president; Geo. W. McWilliams, secretary and general manager; A. L. Ritchie, superintendent. Organized 1901. Lands, 9 lode claims, area 180 acres, and 320 acres of placer claims, known as the Mountain View group, between Battle Creek and Roaring Fork, near the Itmay mine, showing a vein in limestone with gossan capping, opened by a 50' shaft. Has a 30-h. p. steam plant and several mine buildings. Presumably idle.

EQUITY COPPER & GOLD MINING CO. **OREGON.**

Office: care of Rev. W. J. Hughes, president and general manager, Baker City, Ore. Mine office: North Powder, Union Co., Ore. F. M. Saxton, vice-president; Kate Palmer, secretary; G. J. Bowman, treasurer; preceding officers, with L. Hughes, H. A. Kenyon, R. W. Hughes, J. Hamilton Smith and R. T. Roberts, directors. Capitalization $150,000. Lands, 8 gold claims, in the Sumpterburg district of Grant County, and 10 copper claims, known as the Equity group, circa 6 miles from North Powder, having a 200' crosscut tunnel.

ERIE & COLORADO COPPER CO. **COLORADO.**

Office: care of Henry Tibbals, secretary and treasurer, Erie, Pa. W. A. Walker, president; Ernst Behrend, vice-president. Lands, 160 acres, patented, somewhere in Boulder County, Colorado, slightly developed and presumably idle.

ERIE CONSOLIDATED MINING & REDUCTION CO. **MICHIGAN.**

Dead. Name changed from Wahnita Copper Co. Both fraudulent. Formerly at Matchwood, Ontonagon Co., Mich.

ERIE COPPER MINING CO. **UTAH.**

Dead. Formerly at Milford, Beaver Co., Utah. Fully described Vol. VI.

ERIEGA COPPER & COAL MINING & SMELTING CO. **MONTANA.**

Dead. Formerly at Bozeman, Gallatin Co., Mont. Fully described Vol. VI.

ERIE-ONTARIO DEVELOPMENT CO. **MICHIGAN.**

Office: 60 State St., Boston, Mass. Mine office: Winona, Houghton Co., Mich. H. F. Fay, president; Geo. G. Endicott, vice-president; Jas. Chynoweth, superintendent. Organized January, 1905, with capitalization $50,000, shares $10 par, fully paid.

Lands, 640 acres, held under option, including the old Erie and Ontario mine, midway between the Champion and Winona mines. The tract shows a copper lode, supposedly a continuation of the Baltic amygdaloid, opened by a 60° shaft, sunk at 68°, running into the hanging wall, which shows a bed of about 25' width, carrying considerable *epidote, but little* copper. Machinery includes a 500' *hoist and 4-drill air-compressor, and* some diamond drilling

was done, 1907, from the bottom of the shaft. Operations suspended by reason of lack of funds.

COMPAÑIA MINERA ESCUADRA, S. A. ME

Mine office: Ocotlán de Morelos, Oaxaca, Mex. Thos. A. Ha manager. Has good silver and copper ores, latter being practically product only. Employs about 150 men.

ESCURIAL COPPER MINES, LTD. S

Offices: 4 Union Court, London, E. C., Eng., and Pelayo, 2, Bar Spain. Mine office: Calmenarijos, Madrid, Spain. Jas. Taylor, cha Joaquin Lorena, mine manager; Henry N. Gardiner, secretary. Org Oct. 17, 1901, under laws of Great Britain, with capitalization £125,000, £1 par; issued, £109,177. Lands, 342 acres, held under perpetual leas the Spanish Government, including the Gloria, Ramón, Jaime and N Señora del Pilar mines. Work is confined to the latter, which shows bodies and was worked by the ancients, either Romans or those who pr them, to a depth of 135', by 3 shafts, with several drifts. Sundry smal ments of selected ore from the Pilar mine have given returns of 7.73 to 2 copper. Property considered promising.

NEGOCIACIÓN MINERA ESMERALDA. ME

Mine office: Chalchihuites, Sombrerete, Zacatecas, Mex. Leopold dero, manager. Property includes the Anaconda, Esmeralda and L mines, developed by shafts and tunnels, and producing argentiferous and erous lead and copper ores. Employs about 75 men.

COMPAÑIA MINERA ESMERALDA DE COLLAHUASI. C

Office: Iquique, Chile. Mine office: Collahuasi, Tarapacá, Chile. ized Dec. 21, 1905, under laws of Chile, with capitalization 200,000 shares 100 pesos par.

ESMERALDA COPPER CO. NEV

Dead. Lands were circa 100 acres, vein carrying argentiferous and erous copper ore of good average tenor, being proven, at intervals, by ing, for a distance of circa 4,500', having 4 shafts, deepest 74'. Forme Luning, Esmeralda Co., Nev.

ESMERALDA COPPER MINING & SMELTING CO. ME

Mine office: Santa Catarina del Norte, Baja California, Mex. Fr Burns, superintendent. Mine, known as La Esmeralda, is opened by with considerable development, and shipped some ore previous to 1902. sumably idle.

ESMERALDA COPPER PRECIPITATING CO. ARIZ

Dead. Formerly at Ryan, Coconino Co., Ariz. Described Vol. VII.

ESMERALDA MINE. AUSTR

Mine office: Rockley, N. S. W., Australia. Has a 100' shaft, with of circa 10' width, carrying ore averaging 8 to 10% copper tenor.

ESPAÑOLA COPPER SYNDICATE, LTD. S

Office: St. Helen's Place, London, E. C., Eng. Stanlake Lee and Marshall, joint managers. Organized Jan. 6, 1906, under laws of Great ain, with capitalization £500, shares 1s. par, fully issued. Proper province of Huelva, Spain, formerly owned by Spanish Minerals Develo Ltd., is supposed to have been sold to Esperanza Copper & Sulphur Co.

SOCIEDAD MINERA ESPAÑOLA DEL NORTE DE ESPAÑA. S

Mine office: Herrera de Rio Pisuerga, Palencia, Spain. Don Fe *Villanueva*, president. Organized 1902. Lands include various conc *carrying coal*, iron and copper. Presumably idle.

MPAÑIA MINERA ESPERANZA y CONSTANCIA. **MEXICO.**

Mine office: Sierra Mojada, Monclova, Coahuila, Mex. Guillermo Hage-an, manager. Operates La Fortuna and San Antonio mines, former opened a 350′ shaft, equipped with steam power. Has argentiferous lead and copper s. Employs about 75 men.

SPERANZA COPPER CO. **ARIZONA.**

Office and mine: Tucson, Pima Co., Ariz. M. G. Samaniego, president; rturo M. Elias, vice-president; H. C. Young, secretary; Francis M. Hartman, easurer and manager. Capitalization $600,000, shares $1 par. Lands, 6 ims, area 90 acres, known as the Esperanza group, 35 miles from a rail-ad, in the Cañada del Oro district, Catalina Mountains, developed by about ,000′ of workings, greatest depth 75′, showing carbonate and sulphide cop-r ores.

SPERANZA COPPER & SULPHUR CO., LTD. **SPAIN.**

Office: 74 Palmerston House, London, E. C., Eng. Mine office: Almonás-r, Huelva, Spain. Robt. J. Price, M. P., chairman; Jos. Pasfield, secretary; dlie & Pringle, consulting engineers. Organized Feb. 14, 1906, under laws f Great Britain, with capitalization £350,000, shares £1 par, as successor of panish Minerals Development Co., Ltd. Debentures, £100,000, at 5%, re-deemable not later than 1916, at 110, by annual drawings of 20% of profits.

Lands, 476 acres, known as the Esperanza group, carrying cupriferous yrites, circa 40 miles from Huelva, property including the Esperanza and Angostura mines, which are the most developed, also the Nueva, Mosquitos, Forzosa, Santo Tomás and Palmira mines. Some of these properties have been worked from very ancient times, mainly on a very small scale, showing characteristic narrow Roman shafts, with footholes alternately on either side for ingress and egress of miners.

The Esperanza mine is estimated to show circa 100,000 tons of ore of all grades, averaging 40.5% sulphur. There also is considerable ore developed by the Forzosa and San Esteban tunnels. Ore is divided into three classes, the lower grade carrying mainly sulphur values.

A railroad is building to pass the eastern end of the property, and the company is constructing a narrow-gauge line to connect therewith. Production, 1907, was circa 50,000 long tons of ore, and, for the first nine months of 1908, was 38,840 tons. Production of fine copper, 1907, is estimated at 1,200,000 lbs. Property is considered promising.

SPERANZA MINING CO. **MEXICO.**

Office: care of W. R. Nicholson, president, Land Title Bldg., Philadel-hia, Pa. Mine office: Ensenada, Norte, Baja California, Mex. Geo. P. Brown, general manager; Harold Playter, superintendent; D. A. Conolly, smelter superintendent. Lands, 83 pertenencias, also 40 acres miscellaneous claims, on Cedros Island, on the west coast. Country rock is diorite, showing particular ore bodies, carrying carbonate and sulphide ores, estimated by company to average 40′ width, 300′ depth and 1,100′ length, and to contain an average of 2.5% copper, 3% zinc, 2 oz. silver and $3.50 gold per ton. Mine has been extensively developed, having about 8,500′ of workings, showing circa 150,000 tons of low-grade ore, with about 100,000 tons blocked out for stoping. Property was opened 1891, closed 1901, reopened 1905. Surface ores change to basic copper ores at depth. Property has produced about $500 in values, from shipment of high-grade ores to smelters at Denver, to San Francisco and Tacoma. A reduction plant started at the mine aimed to have a 50-ton blast-furnace, to turn out matte carrying about copper, 6 oz. silver and 1.5 oz. gold, to be sent to Tacoma for refining.

Fuel at smelter is coke, costing $18 per ton. Production, 1905, 275,000 lbs. fine copper. Presumably idle.

MINAS ESPARANZA y VISITACION.

Mine office: Albarracín, Teruel, Spain. D. Santiago Maora Property is sundry iron mining lands, on which a promising lense ore was discovered, 1903. Presumably idle.

ESPIE BAY MINES DEVELOPMENT SYNDICATE, LTD. TURKEY

Dead. Voluntarily wound up, June, 1904. Formerly at Terebo zond, Turkey in Asia.

JOSÉ RAMÓN ESPINOZA.

Office and works: Petorca, Aconcagua, Chile. Mine office: La Petorca, Aconcagua, Chile. Works office: Pedegua, Petorca, A Chile. Lands include Las Reices mine, 60 meters deep, which in duced 537 metric tons of ore of 13% copper tenor, and La Louisa meters deep, which, 1903, produced 300 metric tons of 5% copper ore. copper, made by leaching mine waters, also is produced, in small q Mines, slightly developed, show large quantities of low grade ore, able commercially until railroad transportation, now lacking, is secu

Has 2 smelters, El Cantarito at Petorca, and El Hueso at Ped Fundicion Cantarito, 13 miles north of Cabildo, has 1 reverberato blast-furnace, burning wood, at cost of 6 pesos per metric ton, near of wood being required to smelt 1 ton of mineral, producing Chil 90% tenor, with slags averaging 1% copper. Works about half time ing circa 40 men when running, at average wages of 1 peso daily.

El Fundicion Hueso, at Pedegua, 24 kilometers north of the rai tion at Cabildo, has a single reverberatory furnace, burning wood, e when working, circa 50 men, at average wages of 1 peso daily. In of a blast-furnace is contemplated. Production, 1903, was 264,243 po copper.

ALEXANDER ESQUER y CA.

Mine office: Baroyeca, Alamos, Sonora, Mex. J. J. Esquer, Property is the Mexicana, Esperanza and other mines, developed and tunnels, carrying auriferous and argentiferous copper ores.

ESSEX COPPER CO. MI

Office: care of Marmaduke Richardson, president, 12 John York, N. Y. Alfred Meads, agent. Lands, which included the old Norw Ontonagon county, Michigan, were sold, circa 1901, and company liquidated. Paid $1 per share, 1906, and a further dividend is to be pa

ESTERBROOK MINING CO. W

Office and mine: Douglas, Converse Co., Wyo. Geo. W. Meter dent; John Foxton, secretary and treasurer. Organized 1897, under Wyoming, with capitalization $10,000; reorganized Sept. 9, 1903, w talization $1,000,000. Lands, 120 acres, also 120 acres miscellaneous Albany county, Wyoming, about 40 miles south of Douglas, show fissure vein, in country rocks of diorite, schist and granite, giving 2 to 4% copper, 25 to 30% lead, 2 to 4 oz. silver and $1 to $2 gold from cerussite, galena, cuprite and chalcopyrite. Has 2 short tunn shafts, deepest 284'.

ESTEY MINING & MILLING CO. NEW

Dead. Succeeded, circa 1902, by Dividend Mining & Milling merly at Estey, Socorro Co., N. M.

NUEVA SOCIEDAD PROPRIETARIA LA ESTRELLA.

Dead. **Formerly at Los Martires, Granada, Spain.**

IEDAD GRANADINA LA ESTRELLA. **SPAIN.**

Dead. Lands sold, circa 1907, to La Estrella Copper Mines, Ltd. Formerly at Los Martires, Granada, Spain.

CIÉTÉ ANONYME LA ESTRELLA. **SPAIN.**

Office: 161 Boulevard Haussmann, Paris, France. Mine office: Los Martires, Grenada, Spain. Capitalization, 200,000 francs. Lizardo González, vice-president; Louis Vardón, agent; Huberto Meersmans, general manager; Antonio Melián, superintendent. Property includes La Jerezana, El Ensueño and other copper mines, at Los Martires, which were undergoing developments at last accounts; an argentiferous copper group at Alpujara, Granada, and an argentiferous copper group at Trevelez.

STRELLA MINING CO. **UTAH.**

Dead. Formerly at Milford, Beaver Co., Utah. Described Vol. VI.

THEL CONSOLIDATED MINES CO. **WASHINGTON.**

Office and mine: Index, Snohomish Co., Wash. Geo. A. Pounder, president and general manager, at last accounts. Organized 1902, with capitalization $3,500,000, shares $1 par, as merger of Ethel Copper Mining Co. and John D. Copper Co. Lands, 37 contiguous claims, carrying 21,000′ of the strike of the vein. The Ethel group has a 2,000′ tunnel, showing a considerable body of low-grade oxidized ores, bornite and chalcopyrite, with quartz gangue, claimed to average 4% copper, with small gold and silver values. Has a Pelton water-wheel and 75-ton concentrator, latter, connected with mine by a 4,000′ gravity tram, having a crusher, rolls and Huntington mill. Ores slime badly in concentration. Company began the payment of 1% monthly dividends in 1903, and mine was shut down shortly thereafter. Property under option to McAllister-Rowland Copper Mining Co. Idle at last accounts.

ETHEL COPPER MINING CO. **WASHINGTON.**

Dead. Succeeded, 1902, by Ethel Consolidated Mines Co. Formerly at Index, Snohomish Co., Wash.

ETHEL GOLD MINING CO. **COLORADO.**

Dead. Formerly at Turret, Chaffee Co., Colo. Described Vol. VI.

ETRUSCAN COPPER ESTATES, LTD. **ITALY.**

Office: 139 Queen Victoria St., London, E. C., Eng. Mine office: Campiglia Marittima, Tuscany, Italy. E. J. Vavasour Earle, chairman; Henry Pope, secretary; E. Hibbert, general manager; R. C. Alabaster, superintendent. Organized Dec. 13, 1900, under laws of Great Britain, and reorganized Dec. 7 1904, under same title, with capitalization £575,000, shares £1 par, fully issued. Debentures, £199,000, at 6%, redeemable at 105, March, 1912, or earlier, at company's option; also £24,000 second-mortgage debentures, at 6%, payable July, 1912. In July, 1907, first-mortgage debenture holders received second-mortgage debentures, in payment of 2 years' accumulated interest, and payment of interest on second-mortgage debentures, due January, 1908, was postponed until July, 1908. Company also is supposed to have a considerable floating indebtedness.

Lands, 2,000 acres freehold, and 600 acres held under perpetual mining rights, including the old Lanzi, Temporino and Rombola mines. These properties show numerous and extensive old workings, certainly as ancient as the Roman era, and probably dating back to Etruscan times. During the Nineteenth Century various Italian, French and English companies attempted, without success, to work these mines, which are honeycombed by ancient inclines, adits, drifts, winzes and stopes. The property was examined by C. Algernon Moreing, Edgar P. Rathbone, R. J. Frecheville, Alexander Hill and J. H. Fawcett, all of whom reported unfavorably. *For statements* made by Mr. Moreing, the company *sued his firm, but dropped the suit, for good* reasons. Mr. Faw-

cett examined the mine, and accepted the management, but resigned after, and recovered damages of £250 from Mr. Earle, for slander. Mr. the chairman, considers all experts incompetent, relying for mining kno upon his own extensive experience as a manufacturer of cement, this, of having given him a peculiarly fitting training for acting as the hea copper mining company, as is shown by the fact that Mr. Earle, his and followers, have spent about £500,000 on this property, which proba worth at least a penny in the pound.

The company claims to have 4 cupriferous veins, of 60' to 120' nearly parallel and traceable 1½ miles, but all competent experts agree the ore bodies, while extensive, are pockety and uncertain, while the prin values unquestionably were removed by the ancients. The present comp has sunk on the Cava del Piombo mine the Walter vertical shaft, of 75 me depth, having a 13-meter headgear and duplex hoist, this shaft showing tensive old workings—more workings than ore. Operations have been pended on the west vein. The Govett shaft, of 100 meters depth, shows tensive old workings, with little ore. The Earle shaft, formerly the Coqu 90 meters in depth, appropriately renamed after the chairman of the pany, shows extensive workings, and little else. Le Marchant shaft, of meters depth, shows a little chalcopyrite, disseminated in pyrite, with phibole gangue. While the property is called a copper mine, it seems the tically unanimous opinion of experienced engineers that the principal va doubtful as these may be, are in lead and zinc, rather than in copper.

The reduction works, at Rombola, are connected by rail with the m at Lanzi and Temporino. The plant includes a concentrator and smelter, having a copper furnace of 100 tons nominal daily capacity.

Despite the claims of the management that the ore returned 2.68% co analysis of the figures shows returns of but 1.5% copper for the first 5 y when only 625 long tons of metal were produced. For July, 1906, the comp smelted 2,565 long tons of ore, said to have given returns of 2.19% co with average slag losses of 0.2%.

The Etruscan Copper Estates, Ltd., is one of the best examples extan a perfectly bad management. There is no suspicion of dishonesty, but t is the amplest evidence of utter incapacity, and a density of intellect scarcely could be looked for in a civilized country. The stone age prod better miners.

EUCLID DEVELOPMENT CO. ARIZO

Dead. Formerly at Benson, Cochise Co., Ariz.

EUREKA CONSOLIDATED COPPER CO. NORTH CAROL

Mine office: Gold Hill, Rowan Co., N. C. J. E. Manter, president; Eaton, treasurer; Walter George Newman, manager. Organized Dec. 1, under laws of Maine, with capitalization $10,000,000. Lands, circa 3,500 including the Troutman and Stockton mines, near the Gold Hill Copper C

EUREKA CONSOLIDATED MINING CO. MEX

Dead. Succeeded by Don Carlos & Eureka Consolidated Copper Co. merly at Nombre de Dios, Durango, Mex.

EUREKA CONSOLIDATED MINING CO. NEVA

Dead. Merged, 1905, in Richmond-Eureka Mining Co. Formerly at reka, Eureka Co., Nev.

EUREKA COPPER CO. ARIZO

Dead. Formerly at Globe, Gila Co., Ariz.

EUREKA COPPER MINES, LTD. BRITISH COLUM

Office and mine: Nelson, Kootenay district, B. C. J. J. Malone, p *dent; A. B. Ritchie*, vice-president; L. B. Reynolds, managing director; H

Anderson, secretary and treasurer; preceding officers and R. Bowlby, directors. Organized March 2, 1906, under laws of British Columbia, with capitalization $250,000, shares 25 cents par; issued, $197,500.

Lands, 7 claims, 3 fractional, area 250 acres, showing 5 ore bodies, of which one, opened by a 200′ shaft, shows carbonate and sulphide ores estimated to average 5.5% copper and 0.21 oz. gold per ton. Has a 40-h. p. steam plant, Lidgerwood hoist and 5 small mine buildings. In 1907 shipped 890 tons of smelting ore, netting $15,806.11. Company plans continuing development work and building a tramway.

EUREKA COPPER MINING CO. **WYOMING.**

Dead. Formerly at Encampment, Carbon Co., Wyo. Described Vol. VI.

EUREKA DEVELOPMENT CO. **ARIZONA.**

Dead. Formerly at Bisbee, Cochise Co., Ariz. Described Vol. VII.

EUREKA DEVELOPMENT CO. **ARIZONA.**

Dead. Formerly at Tucson, Pima Co., Ariz.

EUREKA DIAMOND DRILL MINING CO. **CALIFORNIA.**

Office: 303 Union Savings-Bank Bldg., Oakland, Cal. Letter returned unclaimed from former mine office, Jackson, Amador Co., Cal. Capitalization $1,000,000, in $25,000 preferred and $50,000 common shares, $1 par. Lands, 8 claims, area 150 acres, 4 miles west of Jackson, having a 60′ shaft showing ore assaying 20% copper, 5 oz. silver and $20 gold per ton.

EUREKA EXPLORATION CO. **COLORADO.**

Office: Sioux City, Iowa. Mine office: Eureka, San Juan Co., Colo. Theodore Ivens, manager. Property, known as the Ridgeway group, carries auriferous and argentiferous lead and copper ores. Has steam and water power and a 10-stamp mill.

EUREKA GOLD & COPPER MINING CO. **ARIZONA.**

Mine office: Jerome, Yavapai Co., Ariz. C. W. Woods, president; H. M. Woods, secretary and treasurer; Thos. Taylor, general manager and lessee. Lands, 8 claims, 7 miles south of Jerome, near the Iron King mine, opened by shaft showing a 30′ vein with an 8′ paystreak carrying auriferous bornite and chalcopyrite, with occasional visible gold, but has not developed ore in commercial quantities. Lands were bonded to Thos. Taylor, and mine resumed work June, 1907, after several years' idleness.

EUREKA HILL MINING CO. **UTAH.**

Office: 11 East First South St., Salt Lake City, Utah. Mine office: Eureka, Juab Co., Utah. Moylan C. Fox, president; Geo. W. Riter, secretary and managing engineer. Organized Nov. 12, 1875, under laws of Utah, with capitalization $1,000,000, shares $100 par. Is a close corporation. Has paid considerable dividends, but accounts are not published. Annual meeting, third Monday in February. Lands, 5 claims, area 27 acres, patented, also a 25-acre mill site and 100 acres miscellaneous lands, in the Tintic district. Mine, extensively developed, has a 1,500′ main working shaft, and about 25 miles of workings. Ore bodies are lenticular deposits, carrying cuprite, malachite and enargite, with average values of about 1.4% copper, 6% lead, 25 oz. silver and $3 gold per ton. There is a 450-h. p. steam plant at the mine, and a 500-h. p. steam plant at the mill. Main hoist is 16x48′, good for 1,600′ depth, and equipment includes a 30-drill Norwalk air-compressor. Buildings, 16 in number, include a 30x50′ frame machine shop, 30x40′ frame carpenter shop, frame stables of 30x30′ and 30x40′, and a 30x60′ foundry. The reduction plant includes a 23-ton combination mill, with concentrator and pan-amalgamation all combined, in a 240x250′ wooden building, having 100 gravity stamps, 2 Blake crushers, 2 Gates centrifugal crushers *and 50 vanners.* The amalgamating plant has 32 pans. *Company has a sawmill.* Production is principally

silver and lead, copper being secured as a by-product. Latest reported copper production was 134,000 lbs., in 1904. Production, 1907, was 200 carloads of ore.

EUREKA MINE. ARIZONA.

Office and mine: care of I. N. Kinsey, lessee, Globe, Gila Co., Ariz. D. D. Sullivan, superintendent. Lands, 8 miles west of Globe, in vicinity of Inspiration and Live Oak mines, carry silicious ores of 5 to 6% copper tenor, and shipments were made, 1906-1907, to Old Dominion and Calumet & Arizona smelters, for fluxing purposes. Production, 1907, was 528,000 lbs. fine copper.

EUREKA MINE. CALIFORNIA.

Office and mine: care of H. F. Dimock, Carrville, Trinity Co., Cal. Land 2 claims, in Sections 17 and 18, T. 37 N., R. 7 W. Ore, silicious and low in grade, is slightly developed by a 50′ tunnel. Idle for several years.

EUREKA MINE. HONDURAS.

Mine office: Orica, Tegucigalpa, Honduras. At last accounts was a small producer of gold, silver and copper.

EUREKA MINING & MILLING CO. ARIZONA.

Office: P. O. Box 552, Tombstone, Ariz. Mine office: Ft. Huachuca, Cochise Co., Ariz. O. B. Steen, president; E. P. Drap[illegible], vice-president; F. W. Goodbody, secretary; F. N. Wolcott, treasurer. Lands, 7 claims, in 2 groups. The Copper Glance group, opened by tunnels, is claimed to have shipped more than $100,000 worth of ore and concentrates averaging 27% copper, 184 oz. silver and $6 gold per ton. The Eureka group has produced about $15,0[illegible] worth of ore. Property considered valuable, but is idle, and the company is a dead-beat and apparently moribund.

EUREKA MINING, SMELTING & POWER CO. OREGON.

Office: P. O. Box 53, Clarkston, Wash. Mine office: Imnaha, Wallowa Co., Ore. W. E. Howard, secretary; G. E. Nehrhood, superintendent. Land 40 claims, patents applied for, but adverses filed, poorly located for transportation. Company claims to have well developed mines, with much ore in sight and on the dump, but apparently this is either a mistake or something worse; sundry shareholders alleging grossly fraudulent misrepresentations by the management while selling stock. Idle since circa 1905 and apparently moribund.

EUREKA-SWANSEA EXTENSION MINING CO. UTAH.

Office: Provo, Utah. Mine office: Eureka, Juab Co., Utah. Jesse Knight, president; Richard B. Shepard, vice-president; W. Lester Mangum, secretary and treasurer; preceding officers, Jacob Evans and Will Knight, directors. Lands, 140 acres, patented, adjoining the Centennial-Eureka.

EUSTIS MINING CO. QUEBEC.

Mine office: Sherbrooke, Sherbrooke Co., Que. F. C. Davis, superintendent. Mine has a 2,000′ incline shaft, sunk at 20° to 45°, and a long crosscut tunnel, showing lenses of cupriferous pyrite in schistose rocks, mined primarily for making of sulphuric acid, but carrying appreciable values in copper. Equipment includes an electric hoist with 6′ drums, and a hydro-electric power plant with 2 alternators mounted on same shaft, run in parallel, driven by turbine water-wheels, one 150-kw. generator and one 200-kw. generator, using a 3-phase 25-cycle, 2,200-volt current, with electric efficiency of 90 to 93% for alternators and efficiency of 60 to 80% for water-wheel, according to load. Has a mill for preparing ore for shipment to the acid plant of the company in New Jersey.

EVANGELINA COPPER MINING CO. MEXICO.

Office: 202½ So. Broadway, Los Angeles, Cal. Mine office: Santa Catarina del Norte, Baja California, Mex. D. R. Wilder, president; J. H. Coleman, vice-president; Josephine H. Wilder, secretary and treasurer; Tomás Vidaurraza, *superintendent*. Lands, circa 150 acres, carrying a fissure vein of 3"

idth. Has steam power. Idle.

ANS-TANZER CONSOLIDATED COPPER CO. **CALIFORNIA.**

Dead. Formerly at Lavic, San Bernardino Co., Cal.

ANSTON MINING CO. **MEXICO.**

Mine office: Gabriel, San Juan del Rio, Durango, Mex. J. B. Davis, man-r; F. Boland, superintendent. Property, known as La Purísima group, car- auriferous copper and argentiferous lead ores. At last accounts employed nsiderable force.

ELYN MINING & LEASING CO. **COLORADO.**

Mine office: Leadville, Lake Co., Colo. Morris Sterne, manager. Has entiferous and auriferous lead, copper and zinc sulphides. Has steam power.

ENING STAR MINING CO. **WYOMING.**

Dead. Formerly at Riverside, Carbon Co., Wyo. Described Vol. VII.

VERGREEN BLUFF MINING CO. **MICHIGAN.**

Dead. Was succeeded by Evergreen Mining Co. Formerly at Mass, On-agon Co., Mich.

VERGREEN-EUREKA GOLD & COPPER CO.

Dead. A fake that peddled stock, accompanied by a personal "guaranty" 5% dividends, and a 10-year bond against loss. Formerly had an office at Union Square, New York, N. Y.

VERGREEN GOLD & COPPER MINES CO. **COLORADO.**

Office: Empire Bldg., Denver, Colo. Mine office: Apex, Gilpin Co., Colo. W. H. Grayson, president and manager; W. C. Hollister, secretary and asurer. Organized 1904, under laws of Colorado, with capitalization 00,000, shares $1 par. Lands, 6 claims, 3 patented, area 33 acres, also a acre placer claim and quarter-acre millsite, in the Pine Creek district, show-g 2 fissure veins, one opened by 3 shafts of 40′ to 80′ depth, and by tunnels 550′ and 400′, showing a considerable body of low grade disseminated sul-ide ore, with some malachite and tetrahedrite. Carload shipments, 1905, ve returns of 31% copper and 24 oz. silver per ton, from first grade ore, and % copper and 12 oz. silver from second grade ore. Has a Leyner air-com-ressor. A site has been graded for a 50-ton mill of 40x50′ size, to have rolls, chards jigs and Card tables.

VERGREEN MINING CO. **MICHIGAN.**

Office: 15 William St., New York, N. Y. Mine office. Mass, Ontonagon , Mich. Jos. E. Gay, president; John R. Stanton, secretary. Organized Sep-mber, 1853, under laws of Michigan, with capitalization $500,000, shares $25 , under name of Evergreen Bluff Mining Co., and reorganized, under present e, with capitalization $1,000,000, shares $25 par.

Lands, 600 acres, adjoining the Mass Consolidated on the east and the dge mine of the Mass Consolidated on the south. Mine was worked at in-rvals, 1854-1870, producing 1,351,174 lbs. fine copper, at a cost of $223,582.24. In 1862 the predecessor of the present company deeded to the Ogima com-ny, succeeded later by the Mass Consolidated, 16 acres of land from the rtheast corner of its territory, adjoining the Ridge mine, to enable the Ridge ink its shafts and work the bed lying north of the Evergreen lode, in ex-ange for which the Ogima transferred all right and title to the Evergreen d under the entire Ogima territory to the Evergreen compa..y, hence it fol-ws that the Evergreen Mining Co. owns a portion of the Evergreen lode on e property of the Mass Consolidated. Idle since 1870.

VERGREEN MINING & TUNNEL CO. **UTAH.**

Office: care of H. G. McMillan, manager, Salt Lake City, Utah. Letter turned unclaimed from *former mine office, Alta, Salt Lake Co., Utah.* Lands *opened by tunnel with about 1,700′ of underground* workings, claimed to

show considerable copper ore of low grade. Idle for several years and pany apparently moribun l.

EVOLUTION-KEYSTONE MINING CO. IDA

Letter returned unclaimed from former office, Missoula, Mont. Mine offi Osburn, Shoshone Co., Idaho. Mrs. J. McCormick, president; W. W. Woo vice-president; A. E. Robinson, secretary; preceding officers, J. H. Nordqu and Edw. Lindsley, directors. Lands, in McFarren Gulch, adjoin the Gray a Verde mines. Surface shows rich stringers of silver-lead ore, opened trenches. Has 2 tunnels, longest 400′.

EXCELSIOR COPPER CO. ARIZON

Dead. Was a swindle, perpetrated by the notorious Wm. F. Wernse ga Formerly at Pima, Graham Co., Ariz. Described Vol. V.

EXCELSIOR COPPER CO. QUEBE

Mine office: West Broughton, Megantic Co., Quebec. Mine is develop open-cast and by shafts. Idle.

EXCELSIOR COPPER & GOLD MINING CO. WYOMIN

Dead. Formerly at Riverside, Carbon Co., Wyo.

EXCELSIOR GOLD & COPPER MINING CO. ARIZON

Dead. Formerly at Flagstaff, Coconino Co., Ariz.

EXCELSIOR MINING CO. NEW MEXIC

Dead. Formerly at Organ, Donna Ana Co., N. M.

EXCELSIOR MINING & DEVELOPMENT CO. NEW MEXIC

Office: St. Joseph, Mo. Mine office: Orogrande, Otero Co., N. M. A. Warnock, general manager. Lands include the Nashville and Three Frie claims, said to carry a 4′ vein of 4% silver-copper ore, also lead carbonate to 50% in tenor.

EXCELSIOR MINING & SMELTING CO. NEVAD

Dead. Formerly at Yerington, Lyon Co., Nev.

EXCELSIOR MOUNTAIN COPPER CO. NEVAD

Mine office: Hawthorne, Esmeralda Co., Nev. F. D. Qualey, preside and general manager; J. H. Suits, secretary. Lands, 13 claims, area 260 ac in process of patenting, 16 miles southeast of Hawthorne and 16 miles fr Sodaville, the nearest railroad point, giving promising surface showings of c per for a distance of circa 9,000′ along a contact between granite and li stone. Has several shallow shafts and about a dozen short tunnels, with 500′ tunnel showing ore averaging circa $8 gold per ton. Has a good pow plant, with 12-drill air-compressor, and 15 mine buildings.

EXPECTATIVA MINING CO. MEXIC

Office: care of W. R. Ramsdell, Guadalajara, Jal., Mex. Mine offi Ameca, Jalisco, Mex. Lands, 10 miles southwest of Ameca, show aurifer and argentiferous copper and lead ores, assaying up to 27% copper.

FAEO GRUBE. NORWA

Mine office: Haugsund, Christiania, Norway. Property is several s mines, having ore averaging about 4% copper tenor. Idle at last accounts.

FAIRVIEW MINING CO. MONTA

Dead. Formerly at Basin, Jefferson Co., Mont.

FALLS CREEK MINING CO., LTD. BRITISH COLUMB

Office: care of R. H. Finley, secretary, Spokane, Wash. Mine offi Nelson, Kootenay district, B. C. L. H. Snyder, president and treasurer; J. Porter, vice-president; M. C. Monoghan, mine manager; preceding officers J. P. Swedebery, directors. Organized 1907, under laws of Washington, W capitalization $1,500,000, shares $1 par, and registered under laws of Brit *Columbia.* Lands, 6 claims, 2 crown-granted, area circa 240 acres, adjoi

assaying 17.1% copper, 38.1 oz. silver and 2.3 oz. gold, showing an ave extraction of 3.13% copper, 6.98 oz. silver and 0.42 oz. gold per long ton.

About 300 men are employed at the mines and works. Native labo inefficient, but cheap, wages being about 30 cents per day. The comp having reached the end of its resources, is being financed by the Internati Copper Co., Ltd., up to the amount of £60,000. The property is of consider promise, though much overestimated in its early stages, and, under the cap management of Mr. Arthur Thomas, who is a thoroughly good man, should made a success, if success is attainable, provided his suggestions are follo and the company does not come to grief from lack of funds.

LES MINES DE CUIVRE DE LA FARE, LTD. FRAN

Office: Dashwood House, New Broad St., London, E. C., Eng. Mine at Vaujan, Isère, France. Chas. Dufaure de la Prade, chairman. Organized 25, 1904, under laws of Great Britain, as Les Mines Françaises, and changed to present title November, 1907, with capitalization £47,000, share par, in £30,000 cumulative 8% preference shares and £17,000 common sha issued, £19,997.

Lands, 563 hectares, on the left bank of the river Flumet, on the flank of the Grandes Rousses Alpes, circa 50 kilometers from Grenôble. P erty shows slightly auriferous and argentiferous chalcocite and chalcopy with quartz gangue, company claiming average assays of 16.17% copper, w seems excessive. Mine is opened on 6 veins by 21 tunnels and galleries, about 500 meters of workings, estimated by company to expose 400,000 of ore, which is considered an overestimate.

Transportation is by 6 aerial trams, leading from the mine working the mill, and company plans an aerial tram from the mill to the public r The mine and mill have electric power.

The mill, of 5 tons hourly capacity, has a Classeur centrifuge, which fects dry centrifugal concentration, company claiming to produce a 50% centrate, which also is regarded as improbable.

SOCIEDAD MINERA FARELLÓN DE TONGOY. CHI

Office: Valparaiso, Chile. Mine office: Tongoi, Coquimbo, Chile. Or ized Jan. 21, 1901, under laws of Chile, with capitalization 150,000 pesos, sh 1,500 pesos par.

FARGO GOLD & COPPER MINING CO. OREG

Dead. Formerly at Imnaha, Wallowa Co., Ore. Described Vol. VII.

FARMINGTON GOLD & COPPER MINING & MILLING CO. UT

Office: care of J. Stuart Wallingford, secretary and treasurer, Paris, Letter returned unclaimed from former mine office, Farmington, Davies Utah. H. C. White, president. Capitalization, $250,000, shares $1 par. For manager, Fred. H. Perkins, was arrested, 1906, on charge of embezzling $ from the company. Idle.

FARRELL COPPER CO. MONTA

Mine office: Butte, Silver Bow Co., Mont. W. C. Lewis, president; C ton H. Hand, vice-president; J. D. Slemons, secretary and treasurer; prece officers, A. T. Morgan, Walter C. Lewis, Donald Campbell, W. H. Hall Daniel Tewey, directors. Organized July 24, 1906, under laws of Mont with capitalization $1,000,000, shares $2.50 par. Lands, 17 acres, in the so eastern part of the Butte district, having a 200′ shaft, sunk jointly with Alliance Copper Co., with a crosscut on the 200′ level showing a little ore ca ing copper, lead, zinc and silver values.

FARRELL COPPER CO. MONTA

Dead. Succeeded, circa 1902, by Pittsburg & Montana Copper Co. *merly at Butte*, Silver Bow Co., Mont. Described Vol. II.

WELL MOUNTAIN COPPER CO. **COLORADO.**

Office: care of Elisha T. Hewitt, Evans Blk., Denver, Colo. Mine office: mboat Springs, Routt Co., Colo. Organized 1907, under laws of Colorado, capitalization $5,000,000. Lands, 4 lode claims and 560 acres of gold er claims, in the Farwell Mountains, 3 miles from Hahn's Peak, and circa miles from Steamboat Springs. Plans developing a water power by dam.

UQUIER COPPER CO. **VIRGINIA.**

Mine office: Warrenton, Fauquier Co., Va. Idle several years.

VORITE GOLD & COPPER MINING CO. **WASHINGTON.**

Office: Nelsonville, Ohio. Mine office: Nighthawk, Okanogan Co., Wash. M. Parker, president; J. F. Baldridge, secretary; H. D. James, general man- r; Ed. Williams, mine superintendent. Organized December, 1902, with pitalization $2,000,000, shares $1 par. Lands, 14 full and 14 fractional ims, area circa 300 acres, adjoining the Nighthawk mine, on Mt. Ellemeham, the Wanicutt Lake district, 34 miles from the Canadian Pacific railway, show- 5 veins, of which one, ranging 1' to 5' in width, is opened by a 950' upper nnel and an 850' lower tunnel on the Giant claim, carrying mainly silver-lead lues, with some gold and copper.

AY-CANANEA COPPER CO. **MEXICO.**

Office: 610 First National Bank Bldg., Duluth, Minn. Mine office: La anea, Arizpe, Sonora, Mex. Marcus L. Fay, president and general man- r; W. H. Yawkey, vice-president; Geo. M. Fay, secretary; J. A. Daugherty, asurer and local manager; preceding officers, Peter A. Kemp and Peter ney, directors; Albert Weir, mine superintendent. Organized Sept. 4, 04, under laws of Arizona, with capitalization $3,000,000, shares $5 par, and organized under laws of Mexico as Cananea-Eastern Mining Co., S. A.

Lands are very extensive, having been added to at frequent intervals ce organization of company. Original lands were 2 tracts of 16 denounce- nts, a total of 900 pertenencias, aren 2,127 acres, in 2 groups about 2 miles art, circa 20 miles south of La Cananea, formerly held by Fortuna Mining and Sonora Development Co. Bought, 1907, circa 1,100 acres in the Sierra Mazaral, about 6 miles northeast of Cananea, lying north of the lands of the nora Development Co. Bought, circa November, 1907, lands of Dorotea Min- g Co., in the Sierra Cananea, about 6 miles northwest of Puertecitos Pass, d, from same company, the Dorotea group of 5 claims, circa 50 miles north- st of La Cananea, in the Magdalena district of Sonora, having about 300' workings, showing ore giving fair assay values in copper. Bought, circa ember, 1907, two groups, area 149 hectares, on the southwestern slope of Ajo Mountains, from the Cananea-Eastern Mining Co., including La Zona up, area 49 pertenencias, lying 8 miles southeast of Douglas, Ariz., in the thern part of the Moctezuma district of Sonora, and La Princesa and La ona groups, area 100 hectares, in the Sierra Ajo, 21 miles east of Cananea, ter opened by a 180' tunnel showing promising sulphides, and a 40' shaft rying copper oxides and bornite averaging about 10% copper, with small d and silver values. Lands also include the Forest and Fortuna groups, circa miles south of Cananea, and the Big Duluth, circa 8 miles northeast of Cananea.

Principal workings are on the Sulphide group, having a vein traceable ree kilometers, of which the Fay-Cananea owns nearly 2 miles of the out- p, this vein being claimed to average about 150' in width, but it is improb- le that the full width will be found workable. The Sulphide group includes o shafts having two 100' shafts, from which more or less high grade silver re was stoped in the past. New work *includes 2 permanent shafts, deepest* 227 at last *accounts, and a tunnel planned to cut 20 or more* veins in a length

of circa 6,000′. A 26′ shaft on the Azurite claim shows ore giving averag assays of 6% copper, 10% lead and 30 oz. silver per ton.

Property is considered promising and officers are men of good local stan ing, though company was unable to redeem its promise of beginning shipmen prior to July, 1907.

FEDERAL COPPER CO. WYOMING

Dead. Formerly at Laramie, Albany Co., Wyo.

FEDERAL COPPER CO., LTD. WISCONSIN

Dead. Succeeded, circa 1902, by Federal Gold & Copper Co. Formerly at Superior, Douglas Co., Wis.

FEDERAL COPPER MINING. & SMELTING CO. ARIZONA, NEW MEXICO & TEXAS

Dead. Wound up by receiver, 1907, and property sold. Formerly at E Paso, El Paso Co., Tex. Described Vol. VI.

FEDERAL-ELY COPPER CO. NEVADA

Office: Salt Lake City, Utah. Mine office: Ely, White Pine Co., Nev Adrian C. Ellis, Jr., president; W. J. Craig, vice-president and general man ager; R. J. Evans, secretary; L. H. Farnsworth, treasurer; preceding officers John T. Hodson, Wm. K. Bradley and Hon. W. H. Dickson, directors; Geo. W Kessler, superintendent. Organized 1906, and articles of association amended circa April, 1908, to render stock assessable, and a 5-cent assessment levied. An issue of treasury stock, 1907, was said to be underwritten by Peter Whit ney, et al., of New York.

Lands, 20 claims, 3 fractional, area 383 acres, also the Huesser ranch, ca 600 acres, near Lane, bought Dec. 8, 1906. Mining lands include 8 claims nort of the Nevada Consolidated, 3 claims between the Cumberland-Ely and Turne Ely, and the Queen of the West group, in Robinson Cañon. Company is said to have paid $215,000 for its lands.

The property shows a limestone capping, pitching to the east, said to be underlaid by cupriferous monzonite, and to carry 3 parallel fissures, about 600′ apart, the fissures also being said apparently to be shear zones, carry about 400′ in width, showing a little copper and lead ore, both argentiferous and auriferous. The limestone capping on the Savage claim is said to carry argentiferous lead ore. Churn-drill borings are said to have given a satisfac tory showing of ore, and there also has been some test-pitting and surface trenching.

Development is by 4 shafts, the main shaft, planned to be sunk 400′, being said to be near the contact of the 3 ore zones, which seems peculiar, if they are parallel, as claimed.

The Queen of the West shaft shows, at depth of 110′, a sulphide ore body of considerable size, averaging circa 3% copper, 1 to 2 oz. silver and 40 to 5 cents gold per ton.

The Kessler shaft, about 100′ deep, near the tunnel, shows lead carbonates of fair tenor.

The main tunnel, planned to be driven 1,500′, starts from a cañon, and will connect with the shaft to give a 400′ back. It is expected that the tunnel will cut cupriferous porphyry before reaching the shaft.

The property has a steam plant, and a water supply estimated at 87 miner's inches in the dry season, which will be more than sufficient for the company's own use, and constitutes a valuable asset, as water is scarce in the camp.

Transportation is available by a railroad running through the company's lands that passes near the mouth of the tunnel.

Late 1906 the company was said to plan building a 500-ton mill in 1907

these plans were premature. Idle at last accounts, but planned resump-

DERAL GOLD & COPPER CO. **NEVADA & WISCONSIN.**

Office: 214 Lumber Exchange, Minneapolis, Minn. Mine office: Eureka, reka Co., Nev. C. S. Dudley, president and general manager; M. B. Coburn, e-president; H. S. Dudley, secretary and treasurer. Organized, 1902, under laws of Arizona, with capitalization $2,500,000, shares $1 par. Lands in- de 600 acres in the St. Croix valley, Burnett county, Wisconsin, and 520 res 6 miles southeast of Superior, Douglas county, Wisconsin, these tracts ing on the St. Croix and Minong native copper ranges. Nevada lands are claims, including the Como-Eureka mine, showing 4 parallel veins, estimated management to carry average values of $8 to $20 per ton. Mine has a 0' shaft, with 750' of drifts and crosscuts. Equipment includes an electric ght plant and a 100-ton concentrator. Mill was run, 1905, several months, parently for gold values, and produced about $16,000. As management esti- ates average cost of mining and milling at $3.50 or less per ton, it is evident, ther that value of ore has been overestimated, cost of mining and milling derestimated, or that amount of ore in sight is very small. Idle and appar- ly moribund.

EDERAL GOLD & COPPER MINING CO. **UTAH.**

Dead. Formerly at Blue Acre, Beaver Co., Utah. Fully described Vol. VII.

EDERAL MINES CORPORATION. **COLORADO.**

Mine office: Idaho Springs, Clear Creek Co., Colo. Mine has argentiferous d auriferous lead and copper sulphides. Has steam power. Presumably idle.

EDERAL MINING CO. **ARIZONA.**

Dead. Reorganized, 1905, as Gila Valley Copper Co. Was a bad egg. Formerly at Safford, Graham Co., Ariz. Fully described Vol. V.

OCIETA MINIERE DELLA FENICE MASSETANA. **ITALY.**

Dead. Lands sold to Societa Anonima delle Minière di Montecatini. For- erly at Massa Marittima, Grosseto, Tuscany, Italy.

ENTRESS MINING CO. **NORTH CAROLINA.**

Dead. Succeeded by Century Development Co. Formerly at Centre, Guil- ord Co., N. C.

FERGUSON MINING & SMELTING CO. **NEW ZEALAND.**

Office: Auckland, N. Z. John Strathern, general manager. Capitaliza- ion, £30,000. Lands, 565 acres, in the Thames Goldfield, also upwards of 2,000 cres of native land at Whangaroa, on the Coromandel peninsula, circa 125 iles northwest of Auckland, showing outcrops of cupriferous pyrite. Lands ow nearly 100 veins and stringers, of various sizes and forms, principal ins ranging 2' to 8' in width, carrying mainly massive cupriferous pyrite, ith a little galena, giving average assays of about 4% copper and up to £6 ombined gold and silver values per long ton. Development is by about 20 hort crosscut tunnels. Has a mill and a smelter, latter, on tidewater, erected at a cost of about £8,000, having a 150-ton Colorado Iron Works hot-blast pyrite matting furnace. Previous to erection of smelter, ore was milled, and concentrates shipped in bulk to Australia, Swansea and the United States, concentrates averaging £33 per ton in value. Wages are $2 per 8-hour shift.

ERNANDO. **MEXICO.**

Mine office: San Fernando, Tamazula, Durango, Mex. Property includes Fortuna group, carrying auriferous and argentiferous copper ores. Has team and electric power, with a 100-ton concentrator and 40-ton smelter, and ly was operated by Fernando Mining Co. Production, 1903, was 554,669 s. copper. Idle several years.

FERNANDO MINING CO. M

Dead. Formerly at San Fernando, Tamazula, Durango, Mex. De
Vol. VI.

FERRIS-HAGGARTY COPPER MINING CO. WYC

Mine office: Rudefeha, Carbon Co., Wyo. Is controlled, through
ownership, by Penn-Wyoming Copper Co.

COMPAÑIA DE MINAS FERROCOBRIZAS.

Office: San Isidro, 16, Sevilla, Spain. Mine office: El Carpio,
gana, Huelva, Spain. Don. Salvador Sánchez Castañer, agent. Land
73 hectares, include the Santa Maria de Gracias group, worked in very
days. Property is leased to the Sociedad Française de Etudios. Ore is
erous pyrite.

FIDELITY COPPER CO. I

Office: care of Commonwealth Trust Co., Portland, Ore. Mine
Homestead, Washington Co., Idaho. Capt. Herbert L. Davis, superint
Lands, 17 claims, area 340 acres, 5 miles from Homestead, in the Seven
district, opened by 10 pits and shafts and a 240' tunnel, said to show
tact vein between granite-porphyry and limestone, carrying native
azurite, malachite and chalcocite. Prospectus of company gives no
lars regarding capitalization, organization and officers, and company
regarded favorably.

FIDELITY MINING CO., LTD. MICH

Office: care of I. P. Griswold, chairman, Allegan, Mich. Mine offic
toria, Ontonagon Co., Mich. C. G. Turner, secretary; H. F. Marsh, tre
Organized February, 1903, with capitalization $300,000. Lands are in
15, T. 50 N., R. 40 W., 2½ miles northwest of the Victoria mine. Idl
organization.

FIFTH CREEK CENTRAL SILVER & COPPER MINING CO., N. L. AUSTR

Mine office: Fifth Creek, South Australia.

FAUSTO FIGUEROA.

Office and mine: Morococha, Junín, Perú. Property is the Santo
mine, from which a little ore was extracted, 1905, in development work.

FINDLAY COPPER CHIEF MINING CO. NE

Office: Findlay, Ohio. Mine office: Las Vegas, Lincoln Co., N. M.
N. Dotz, president; P. M. Cox, secretary; R. E. Taylor, treasurer. Org
1907, with capitalization $1,000,000, shares $1 par. Lands, 2 claims,
Yellow Pine district, circa 25 miles southwest of Las Vegas, having a 30
and a 60' tunnel, said to show ore.

FINLEY GOLD & COPPER MINING & MILLING CO.

Dead. Formerly at Castleton, Grand Co., Utah.

FINNISH-AMERICAN MINING CO. FIN

Office: Calumet, Mich. Mine offices: Kisko, Åbo, Finland, and J
Kupio, Finland. John Daniell, president; Edw. Ulseth, first vice-pre
Henry Ketti, treasurer; Oscar J. Larson, secretary; preceding officers
Saari, Chas. J. Wickstrom, John Benson and Albert Julin, directors;
Jacob Wilson, general superintendent. Organized December, 1906, und
of Minnesota, with capitalization $750,000, shares $1 par. Lands, 4
bought of the Fiskars company, including the Orijarvi and Hokka min
mer being the more important. Properties have both water and rail
portation, and have been prospected by 8 diamond-drill holes, one of the
showing gold ore.

The Hokka group, area 240 acres, includes four 40-acre claims, fr
and two 40-acre claims, leasehold, latter held for 25 years under opt

urchase, 2 miles from Joensuu, in the Maanseka Mountains, circa 200 miles om Viborg, near the boundary between Finland and Russia. This mine, pened 1860, secured a small production of chalcopyrite under the most primi- ve conditions, ore having been shipped on horseback to the Pitkaranta melter.

The Orijarvi mine, credited with an output of $5,000,000 in copper and ilver, has surface indications giving little evidence of the large amount of ore ing below, ore bodies being deposits in silicious limestone, near an intrusive uartz-diorite contact, ore being mainly cupriferous pyrite and pyrrhotite, ssociated with small quantities of galena and large quantities of sphalerite, ll slightly auriferous and argentiferous. The Orijarvi tract, of circa 10 quare miles, is a parallelogram of approximately 2x5 miles, opened by 9 hafts, deepest 600', showing large ore bodies, with stopes up to 60' in width. Mine, opened A. D. 1757, and worked until 1873, was idle thereafter until taken er by predecessor of present company, circa 1904. The old dumps at the Orijarvi contain large quantities of sphalerite, discarded as worthless, but robably of present value, as a zinc smelter could be built at a reasonable ost, if shipping were found impracticable. Mine has a good machinery plant, rom Chicago, and employs circa 75 men. Property considered promising and anagement good.

FIRST CHANCE MINING CO. **WASHINGTON.**

Mine office: Excelsior, Pierce Co., Wash. F. M. Lewis, president. Ores re refractory. Presumably idle.

FIRST NATIONAL COPPER CO. **CALIFORNIA.**

Office: 25 Broad St., New York, N. Y. Mine office: Kennett, Shasta Co., Cal. Thos. W. Lawson, president; T. M. T. Raborg, treasurer; preceding fficers, Edgar L. Newhouse, Geo. N. Towle, Thos. J. Barbour and R. N. Bishop, irectors. Organized February, 1908, with capitalization $3,000,000, shares $5 ar; $2.50 paid in. Apparently 525,000 shares were issued at $2.50, providing $1,312,500, less the expense of organization. Corporation is a securities hold- ng company, planned to finance the Balaklala Consolidated Copper Co., which ame to grief, and is practically a reorganization of that company. It was aid, July, 1908, that 98% of the Balaklala stock had been deposited for ex- hange into First National stock, time for exchange having been extended. ompany plans loaning the Balaklala Consolidated $1,312,500, to pay off its hating indebtedness and leave a working capital of $375,000 to $500,000 for he latter. Company is said to have circa 4,500 shareholders.

The mine is fully described under name of Balaklala Copper Co., which olds direct title. It was hoped to have the property on a producing basis by 1908. There was much grumbling by shareholders over the rather rastic method of reorganization, but, while the Balaklala was sadly misman- ged, the plan of reorganization followed seemed to be the only way out of he muddle into which the company had fallen. The standing of the com- any, none too good at best, was further injured by placing Lawson at the ead of the corporation.

FIRST NATIONAL MINING CO. **NEW MEXICO.**

Office: Chickasha, Okla. Mine office: Orogrande, Otero Co., N. M. J. A. ogart, president; John Wells, vice-president; S. Howard Leech, secretary; . Goff, treasurer; preceding officers, Wilton M. Bartlett, N. H. Ledford, . Wells and Edw. Burson, directors. Property is the Forest Queen mine, hich is now a 20' vein, opened by tunnel, with a shaft planned.

FIRST TRANSBAIKALIAN MINING CO. **SIBERIA.**

Office and mine: *corner Sofeyska and Soongareyska Sts., Chita, Trans aikalia, Siberia. Company advertises that it possesses* great mineral wealth,

including copper, but the principal mining values undoubtedly lie in th pewter ore that the company claims to possess. As pewter ore never has be found before, the company's prospects are bright. Doubtless more careful search of the wonderful lands of this corporation would show brass ore als and possibly native babbitt metal.

FISKUM SYNDICATE, LTD. NORWAY

Office: 53 New Broad St., London, E. C., Eng. Mine office: Kongsberg, Christiania, Norway. H. V. Anthony, managing director; C. S. Goodwin secretary. Organized March 2, 1905, with capitalization £2,400, shares £1 par issued, £2,375. Property is an option on 50 claims, carrying copper, lead and zinc, on which a little work has been done. Presumably idle.

FITTS COPPER CO. ARIZONA

Dead. Formerly at Clifton, Graham Co., Ariz.

FITZPATRICK & DODD. MEXICO

Office and mine: Teocaltiche, Ayutla, Jalisco, Mex. Patrick Fitzgerald manager. Lands include the Chapuza, Falda and Puerta mines, carrying argentiferous lead and auriferous copper ores. Employed circa 25 men at last accounts.

FITZROY COPPER MINES, LTD. AUSTRALIA

Dead. Was succeeded, 1907, by Great Fitzroy Copper Mines, Ltd. Formerly at Mount Chalmers, Queensland, Australia. Described Vol. VII.

FIVE BEARS MINING CO. CALIFORNIA

Office: 301 Gaff Bldg., Chicago, Ills. Mine office: Genesee, Plumas Co., Cal. F. A. Meidinger, president; G. H. Goodhue, vice-president and superintendent; A. Vermaas, secretary; J. D. Meidinger, treasurer; preceding officers and E. C. Goeckel, directors. Organized Apr. 10, 1903, under laws of South Dakota, with capitalization $2,500,000, shares $1 par; issued $2,350,000.

Lands, 10 claims, 9 patented, area 200 acres, showing 6 ore bodies, as fissure veins in talcose schist and as contact deposits between schist and porphyry, of which one, under development, of 4′ to 20′ width, is traceable circa 9,000′, carrying chalcopyrite, associated with pyrite estimated by company to average 2.6% copper, 1.8 oz. silver and $1.40 gold per ton. Development is by tunnels of 1,296′, 380′ and 60′, on the vein, and a 240′ crosscut tunnel, with 3,420′ of workings, estimated to show 80,000 tons of ore, with 9,000 tons blocked out for stoping. Property was worked, 1876-1893, for gold values in the gossan.

Company has a 50-h. p. water plant for the mine and a 1,400-h. p. hydroelectric installation for commercial use. Equipment includes 11 mine buildings, a 3-drill air-compressor and a 10-stamp mill. Nearest railroad is 34 miles, but the Western Pacific is to build into the district, upon the completion of which ore will be shipped. Company estimates average cost of mining at only 55 cents per ton. Continuous development is planned. Property, though low in grade, is considered promising.

FIVE POINTS COPPER MINING CO. ARIZONA

Mine office: Globe, Gila Co., Ariz. A. T. Hammons, treasurer; J. C. Britt, superintendent. Is said to be controlled, through stock ownership, by Cananea & Globe Exploration & Development Co.

Lands, 39 claims, including the Peabody group of 5 claims near Bloody Tanks. The Clark, Lockwood and Van Wagenen groups, aggregating 34 claims, are near the Gibson mine, at the head of Pinto Creek, circa 14 miles west of Globe. Property shows malachite near surface, with some azurite and chalcocite at shallow depth, and company claims assays of 38% copper and 49 oz. silver per ton, with traces of gold. Development is by the Solace 150′ inclined shaft, and the Crackerjim 350′ shaft, circa 1,500′ apart, latter showing a vein

of 20′ estimated width, giving assays of 4 to 12% copper, a 20″ paystreak being claimed to give average assays of 25% copper, 415 oz. silver and 38.5 oz. gold per ton, which is entirely too good to be true, with balance of vein carrying chalcopyrite of circa 4.5% average copper tenor, the paystreak figures being gross exaggerations.

Equipment includes a small steam plant and hoist, and plans were drawn for a 300-ton concentrator, which failed to materialize. Shipped, 1906, a little ore to the Old Dominion smelter. Property considered promising, notwithstanding its ridiculously exaggerated claims.

FLAG GOLD & COPPER MINING CO., LTD. **AUSTRALIA.**

Office: Morgans St., Ravensthorpe, Western Australia. Mine office: Kundip, Phillips River Goldfield, Western Australia. Ralph Anderson, secretary; Charles Grant, mine manager. Organized March 14, 1907.

Lands, 70 acres held under gold mining lease, and 5 acres held under tailings area lease. Property shows a 6′ vein, from which former owners shipped 1,222 long tons of ore, yielding 39 long tons fine copper and 889 oz. gold, and present company shipped 405 tons, to the Ravensthorpe smelter, returning 41.84 long tons copper, 250 oz. silver and 559 oz. gold. Test shipments of 32 tons, circa June, 1908, returned 9.7% copper and 21 dwts. gold per long ton. Apparently ores average about 17 dwts. gold per long ton. Development is by 3 shallow shafts, workings not being well laid out. Property has an old stamp-mill.

FLAGSTAFF COPPER MINING CO. **UTAH.**

Office: 902 Wells Bldg., Milwaukee, Wis. Operating office: 17 West Second South St., Salt Lake City, Utah. Mine office: Alta, Salt Lake Co., Utah. Thos. J. Pringle, president; Chas. H. Moss, vice-president; Paul D. Durant, secretary; Kenneth W. Jacobs, treasurer; preceding officers, Wm. P. Hinlow, Bishop Canfield, F. G. Gaston and W. D. Ladd, directors; Jas. E. Beveridge, superintendent. Organized Apr. 22, 1908, under laws of Arizona, as successor of Consolidated Flagstaff Mines Co., with capitalization $2,000,000, shares $5 par. Annual meeting, first Tuesday in October.

Lands, 29 claims, partly patented, area circa 500 acres, and 14 acres miscellaneous lands, in the Little Cottonwood and Big Cottonwood districts, carrying several ore bodies, of which one, ranging up to 300′ in claimed width, and traceable 2,000′, is developed by the 2,850′ Tom Moore tunnel, which also cuts 4 smaller veins, and has a 450 crosscut to the northeast, with about 4,000′ of workings. Property also has the 500′ Burgess tunnel, 1,200′ Burnswood tunnel, 1,200′ Flagstaff tunnel and 700′ Flagstaff shaft. Company plans extending the Tom Moore tunnel, to cut the Flagstaff ore zone at considerable depth. Present workings show mainly chalcopyrite, with occasional bornite.

The mine, opened circa 1869, was operated extensively, and presumably at a profit, by the Flagstaff Mines, Ltd., and by the Alta Consolidated Mining Co. Former produced circa $9,000,000 worth of ore from above the 400′ level, mainly silver-lead carbonates, being unable to treat the argentiferous galena and copper sulphides profitably in early days. A considerable quantity of ore of payable tenor remains on the old dumps, and some of this has been shipped.

Equipment includes electric power, with 7-drill and 3-drill Ingersoll air compressors and necessary mine buildings.

Company is said to have a profitable contract with the American Smelting & Refining Co., receiving a premium of 10 cents for each unit of silica, with base rate of $2.25 per ton. In the case of some shipments company has received a bonus from the smelter, for excess of iron, with smelting charge free. About 30 men are employed, and the company plans advancing the Tom Moore tunnel, *drifting on parallel fissure veins*, and cutting the Flagstaff

ore bodies, at a depth of circa 960', in the Flagstaff shaft. Property ered promising and management good.

FLATIRON MINE. MON

Office: 42 Broadway, New York, N. Y. Mine office: Butte, Silv Co., Mont. Is owned jointly by Adolph Lewisohn and the Leonard L Estate. Lands are circa one-half acre, being a triangular fraction just the Mountain Chief mine of the Butte Coalition Mining Co. Is de with a 3-compartment shaft. Property, though small, considered well and promising.

FLEMING-FOX MINING & SMELTING CO. NEW M

Mine office: Jicarilla, Lincoln Co., N. M. W. G. Fleming, presid general manager. Development is by shaft, with steam power.

FLINT STEEL MINE. MICH

Mine office: Greenland, Ontonagon Co., Mich. Lands, 400 acres, by the Mass and Adventure on the north and east, and by the Mich the south and west. Produced 415 tons, 458 lbs. fine copper and was by the Flint Steel Mining Co. and the Flint Steel Copper Co. Has t developed fissure vein in Ontonagon county, with 3 connected shaft since circa 1875.

FLOREDIA COPPER MINING CO. COLORADO & NEW M

Office: care of Financial Security & Trust Co., Denver, Colo. E. H president; C. A. Hubbard, vice-president; W. E. Kreamer, secretary. ized 1907, with capitalization $3,000,000, shares $1 par. Lands claime claims in the Floredia Mountains, Luna Co., N. M., and 3 cla miles west of Canyon City, Frémont Co., Colo., with total holdings of 9 Apparently was promoted by Financial Security & Trust Co., which sponsible for the Lost Bullion Spanish Mines, and other notorious s and company is regarded with much suspicion.

FLORENCE COPPER CO.

Mine office: Newhouse, Beaver Co., Utah. Lands, 4 claims, near t Amalgamated, slightly developed by tunnel.

FLORENCE SMELTING, MINING & MILLING CO. AR

Office: care of J. H. McCabe, president and manager, Phœnix, Ariz office: Price, Pinal Co., Ariz. Lands include the Mineral Hill group, Blue Bell, Alice and other properties, having lead and copper ores. C has a smelter, with a 35-ton lead stack, apparently moved from Ph Price, and was said to plan erection of a copper stack. Apparently idle since birth, and moribund.

FLYING DUTCHMAN MINING CO.

Dead. Presumably lands sold to Copper Jack Mining Co. Form Ibapah, Tooele Co., Utah.

F. M. & D. COPPER MINING CO. COLO

Office: care of Bernard McCaffrey, Denver, Colo. Letter retur claimed from former mine office, Morrison, Jefferson Co., Colo. Lan acres, patented, near Bear Creek, about 8 miles west of Morrison, op 600' of tunnels and a 165' main shaft, upper 150' passing through a capping of 15' to 30' width, carrying small gold values, and showing s of ore below, mainly sulphide, with some malachite, said to carry cir copper and $3.50 gold and silver per ton. Presumably idle.

FOLDAL COPPER & SULPHUR CO., LTD. NO

Office: 6 Old Jewry, London, E. C., Eng. Mine office: Foldal, Tro Norway. Alex Davidson, chairman; preceding officer, Lee Hoskyns, Stanle Sidney St. J. Steadman, Edw. W. Abrams, Henry A. Barton and E. E. B *directors; Chas. Forbes*, secretary; Pellew, Harvey & Fell, consulting en

and, mine manager. Organized Jan. 27, 1906, under laws of Great Britain, pitalization £350,000, shares £1 par, in 150,000 shares preferred and shares deferred stock. Company has invested circa £100,000 in prop- velopment and equipment. Lands, circa 3,000 acres, on the west bank Foldal river, carrying considerable timber, include 4 old mines, known Juliana Marie, Knutshovd, Grev Moltke and Grimsdal, worked for 0 years, and which produced circa 350,000 tons of ore, under former p. Mines, opened mainly by tunnel, show a vein of about 10′ average rrying massive cupriferous pyrite estimated to average 2% copper sulphur, ore being decidedly arsenical, vein giving every indica- ersistence. Ore, as produced, is divided into 3 classes, first aver- % copper and 48.17% sulphur, other grades carrying less copper and ss sulphur. Property also has some ore of high copper tenor that may become of considerable importance. Ore reserves, 1907, esti- 363,190 long tons. Has a good mining plant, installed at a cost and has expended about £8,000 for substantial mine buildings, includ- eral store.

ny has developed hydro-electric power from a large waterfall on a River, held under 25-year lease, subject to renewal, at rental of . Good wagon roads have been built at the mine, and a 22-mile ial tram, which is one of the longest in the world, has been built from to the Lille-Elvedal Railway, at a cost of £38,412, line having a f 40 tons per hour. Miscellaneous improvements include a telephone quay at Trondhjem, for ore shipments. Production, September, 1907, long tons, but was cut to about 1,000 tons monthly for last quarter wing to a miners' strike. Equipment has been provided for an ore- of circa 100,000 tons yearly. Property is decidedly promising, and nt seems vigorous and effective.

ANONYME DES FONDERIES ET LAMINOIRS. **FRANCE.**

office: Biache, St. Vaast, France. Property is an electrolytic cop- ion plant with five 6-kw. generators and 100 tanks, in multiple ar- , with estimated daily capacity of 2 metric tons fine copper.

PPER CO. **CALIFORNIA.**

office: Georgetown, El Dorado Co., Cal. Has highly auriferous s. Idle since circa 1903.

ILL CONSOLIDATED MINING & MILLING CO. **COLORADO.**

Bondholders foreclosed. Formerly at Tin Cup, Gunnison Co., Colo.

QUEEN COPPER CO. **NEW MEXICO.**

El Paso, Texas. Mine office: Silver City, Grant Co., N. M. H. president; M. D. Gaylord, superintendent. Lands, 10 claims, area known as the Cleveland group, 8 miles north of Silver City, in the s district, having a 700′ tunnel cutting 9 veins of 3′ to 70′ width, halcocite, associated with sphalerite disseminated in pyrite, giving says of 4.5% copper, 20% zinc and 10 oz. silver per ton. Plans a ent shaft. Has office and store buildings, and plans a mill at No. 1 tunnel, to make copper and zinc concentrates. Shipments, practically surface ores, gave returns of 11% copper and 8 oz. ton. Is said to plan a concentrator.

URKE MINE. **AUSTRALIA.**

office: Cobar, Robinson Co., N. S. W., Australia. Has a new plant, not giving entirely satisfactory results at last accounts, circa May,

LL MINING & MILLING CO. **IDAHO.**

office: *Pocatello, Bannock Co., Idaho.* E. E. Howson, superin-

tendent. Lands, 7 miles from Pocatello, are said to give a good sho
medium grade auriferous copper ore.

FORT HENRY MINING CO. AR

Office: care of R. G. Hourtienne, president, Pasadena, Cal. Le
turned unclaimed from former mine office, Wickenburg, Maricopa C
Geo. Dobbler, superintendent. Lands, in the Black Rock district, ha
shaft in a 2′ vein of ore assaying up to 25% copper.

FORT PITT COPPER CO. NEW M

Office: Curry Bldg., Pittsburg, Pa. Mine office: Clayton, Un
N. M. Jared Sater, president; C. L. Mohney, vice-president; W. H.
secretary; Dr. W. W. Wolfe, treasurer. Organized Jan. 22, 1907, under
Delaware, with capitalization $2,500,000, shares $5 par, being said,
press, to have been organized "to acquire mines of gold, silver, copper
etc." The Fort Pitt Copper Co. succeeded the Sater Copper Co., wh
ceeded the Copper Chief Mining Co., which in turn succeeded the Old
Copper Mining Co., all of the dead ones having departed this life acco
by the curses of deluded shareholders.

Lands, 27 claims, area 540 acres, also a 5-acre millsite, in the Blac
district, said to show 7 fissure veins in sandstone, of which 2, sligh
veloped, are claimed to be of 6′ average width, and to carry melaconit
chite, azurite and chalcopyrite, averaging 14% copper and 15 oz. sil
ton, which is a very serious exaggeration. Development is by shafts
and 225′, and by tunnels of 25′, 50′ and 300′, estimated by company
60,000 tons of ore, which estimate is excessive.

Equipment includes a 190-h. p. steam plant, with 2 hoists, and t
has 4 buildings and an 18x70′ mill. Company, by reason of its ba
cedents, is viewed with suspicion.

COMPAÑIA MINERA LA FORTUNA, S. A. M

Office: Aguascalientes, Ags., Mex. Mine office: Tepezalá,
Aguascalientes, Mex. Geo. B. Wardman, president and general mana
F. Westlund, vice-president; DeWitt Crevelling, secretary and tr
Alberto Pez, superintendent. Organized 1902, with capitalization 200,00
shares 100 pesos par. Lands include La Fortuna and adjoining mines,
2 tunnels and a 100-meter blind shaft, mines having a vertical depth
meters and greatest horizontal length of 600 meters of workings,
minly oxidized argentiferous copper ores of good average tenor in both
Has animal power, employing circa 200 men, and shipped, 1905, ab
tons of ore weekly.

FORTUNA COPPER CO. CALIF

Office and mine: Fortuna, Humboldt Co., Cal. P. J. Mulley, p
and general manager; Frank Legg, vice-president; C. A. Eastman, se
Fortuna Merchandising Co., treasurer; A. E. Purdy, superintendent. Or
June 8, 1901, under laws of California, with capitalization $70,000, sh
par. Lands, 32 claims, area 640 acres, in Trinity county, California,
by tunnels of 60′ and 270′, showing ores that have assayed 28% cop
$3 gold per ton, in veins of 12″ to 16″ width. Presumably idle.

FORTUNA GOLD & COPPER CO. AR

Office: J. B. Thompson, secretary and manager, Pittsburg, Pa.
office: Cave Creek, Maricopa Co., Ariz. L. E. Huddleston, president;
N. Whitney, vice-president; F. E. Miller, treasurer; preceding officers
H. Kinner, directors; Clarence E. Dresser, general superintendent. W
tically reorganized, 1907, and old management eliminated. Lands, 12
including the Scarlet mine, circa 28 miles north of Phœnix, said to
promising ore showing. Plans a 150-ton cyanide plant.

UNA GRANDE COPPER CO. **NEVADA.**
ad. Formerly at Ely, White Pine Co., Nev.

NA MINING CO. **MEXICO.**
ce: 274 Canal St., New York, N. Y. Mine office: Ahualulco, Jalisco, Frank E. Lloyd, manager. Property is the Candelaria mine, carrying us and argentiferous copper ore. Has steam power and a 15-ton mill Wilfley tables, employing about 25 men.

NA MINING CO. **MEXICO.**
ers returned unclaimed from former office, Bisbee, Cochise Co., Ariz., office, La Cananea, Arizpe, Sonora, Mex. Sold, 1907, to Fay-Cananea o., its holdings at La Cananea, but is said to have held a stockholder's Oct. 5, 1908, with a view to resumption.

A MINING CO. **UTAH.**
: care of George F. Richards, Jr., secretary and treasurer, Salt Lake h. Mine office: Lark, Salt Lake Co., Utah. Employs 45 men. Simon r, president; Sidney M. Bamberger, general manager; W. H. Rosserintendent. Organized March 10, 1904, with capitalization $300,000. rea 200 acres, adjoining the Ohio Copper Co., showing considerable ent.

ind shaft, starting from a tunnel, is planned to be deepened, on the operty is said to show a 4′ vein averaging 35% lead, 8 oz. silver and old per ton, also a 7′ vein averaging about 15% copper, but these are too high. Has a gasoline hoist and an old mill, which it is o equip with new concentrating tables. Property considered promis-

. Dissolved Feb. 20, 1906. Formerly had an office at 10 Basinghall on, E. C., Eng.

IVE CONSOLIDATED MINING CO. **WASHINGTON.**
. Lands sold to Magus Mining Co. Formerly at Silverton, Sno-o., Utah.

VER CONSOLIDATED COPPER CO. **WASHINGTON.**
: 315 American National Bank Bldg., Everett, Wash. Hon. Albert tire, president and general manager; E. A. Nickerson, vice-president; ith, secretary; Leighton Howard-Smith, treasurer; Milnor Roberts, g engineer. Organized Dec. 10, 1901, under laws of Washington, talization $2,000,000, shares $1 par. Lands, 18 claims, area 328 acres, -acre millsite and 40 acres timber lands, in the Foss River district county, Washington, opened by a 55′ shaft and tunnels of 35′, 45′, 310′, showing several veins, of which the largest, estimated at 180′ rries bornite and *chalcopyrite giving assays of 3 to 54% copper, 2 oz. silver and 80 cents to $44 gold per ton.* Management plans con-

tinuation of development work and installation of water power and a air compressor. Property considered promising and management good.

FOULD et COMPAGNIE. S

Office: Paris, France. Operating office: care of Don Guillermo Sui agent, Huelva, Spain. Mine office: Cazalla de la Sierra, Sevilla, Spain. erty includes La Cartagenera and other mines, undergoing development accounts. Presumably idle.

FOUR B'S MINING CO. COLO

Mine office: Turret, Chaffee Co., Colo. Property is the Jasper having auriferous and argentiferous copper ores. Presumably idle.

FOUR METALS MINING CO. ARI

Office: 21 South Center St., Phœnix, Ariz. Mine office: Wash Santa Cruz Co., Ariz. Lloyd B. Christy, president; Geo. H. N. Luhrs president; F. L. Blumer, treasurer; A. E. Turner, secretary; preceding W. H. Black and Levi Henry, directors. Organized 1903, under la Arizona, with capitalization $2,000,000, shares $1 par. Lands, 40 claim 680 acres, in 2 groups, known as the Gross and Phœnix-Hillside, lying of the Mowry mines, in the Patagonia district, opened by shaft and with circa 3,500′ of workings, showing ore giving fair assay values in lead, silver and gold. A test shipment from the Chamberlain tunnel Paso smelter gave net returns of $60 per ton. Management plans buil mill.

FOUR METALS MINING CO. CALIFO

Mine office: Keeler, Inyo Co., Cal. Lands, 35 claims, 8 miles from showing silver, lead, copper and zinc ores. At last accounts was deve water power on Lone Pine Creek, and had received part of material 8-mile aerial tram from mine to smelter. The Swansea smelter was built 1906, at Keeler, and removed later to Swansea, 3 miles north. Employed 40 men up to time of business depression in fall of 1907.

FOUR METALS MINING CO. COLO

Office: Equitable Bldg., St. Louis, Mo. Mine office: Telluride, San Co., Colo. Letter returned unclaimed from former mine office, Silverto Juan Co., Colo. W. Frank Carter, president; R. M. Scruggs, secretar treasurer. Organized Jan. 17, 1899, under laws of Colorado, with ca zation $2,000,000, shares $1 par. Lands were 47 claims, area 516 ac Silverton, San Juan county, and sundry claims, known as the Andrus in Ingraham basin, near Telluride. Had a mill at the Palmyra mine, steam plant at the Andrus. Presumably idle.

FOUR METALS MINING CO. U

Office: Salt Lake City, Utah. Mine office: Callao, Juab Co., Uta Hugo Brandeis, president; R. P. Hill, secretary. Lands, in the Dugw trict, carry auriferous and argentiferous copper, zinc and lead ores. M opened to depth of 400′ and has a small concentrator. Idle several year

FOURTH OF JULY MINING & MILLING CO. COLO

Mine office: Eldora, Boulder Co., Colo. Mine is opened by shaf has a 220′ tunnel, planned to cut the Olympic and Fourth of July veins which assays of 25 to 45% copper, some lead, 50 to 125 oz. silver, and $80 gold per ton, have been secured. Idle several years.

DUNCAN FOX y CA. C

Mine office: Cobija, Tocopilla, Antofagasta, Chile. Firm owns a number of copper claims, near Cobija and elsewhere, in the Tocopilla d of the province of Antofagasta. Presumably idle.

Office and mine: Mullan, Shoshone Co., Mont. W. J. Hughes, pres

. E. Wilson, vice-president; W. G. Newberry, secretary and treasurer; pre- ding officers, J. W. Brown, C. A. Adams, Geo. E. Hughes and W. S. Mor- reidge, directors. Lands, 9 claims, circa 6 miles east of Saltese, on which is planned to sink a shaft.

OCIÉTÉ FRANÇAISE DE ETUDIOS. **SPAIN.**

Office: Paris, France. Mine office: El Carpio, Cortegana, Huelva, Spain. Property is sundry old mines of cupriferous iron pyrites, leased from the Compañía de Minas Ferrocobrizas. Presumably idle.

COMPAGNIE FRANÇAISE DES MINES DE CUIVRE D'AGUAS TENIDAS. **SPAIN**

Dead. Succeeded by Société Française des Pyrites de Huelva. Formerly at Valdelamusa, Huelva, Spain.

COMPAGNIE FRANÇAISE DES MINES DE CUIVRE D'AKHTALA. **RUSSIA.**

Office: Rue Tronchet, 27 bis, Paris, France. Mine office: Alverdski, Bortschalo, Tiflis, Russia. Lands, circa 5 miles south of Tiflis, include ancient mines of auriferous and argentiferous copper and lead ores. Production, 1903, was approximately 2,000,000 lbs. fine copper. Presumably idle.

SOCIÉTÉ FRANÇAISE DES PYRITES DE HUELVA. **SPAIN.**

Offices: Rue de Chateaudun, 39, bis Paris, France. Mine office: Valde- lamusa, Huelva, Spain. Don Carlos Marchal, agent; Victor Prevost, superin- tendent. Organized December, 1899, under laws of France, with capitalization 2,000,000 francs, succeeding Société Française des Mines de Cuivre d'Aguas Tenidas. Lands include the Confesonarios mines at Valdelamusa, Perrunal and others at Cortegana, and El Carpio at Huelva, all carrying cupriferous pyrite low in copper tenor but of good sulphur average. Production, 1904, was 157,821 metric tons raw ore and 13 tons cement copper.

SOCIÉTÉ FRANÇAISE MINIÈRE ET MÉTALURGIQUE EN SERBIE. **SERVIA.**

Office: 147 Rue de Courcelles, Paris, France. Lands are sundry copper claims in Servia. Idle.

SOCIÉTÉ FRANÇAISE POUR L'INDUSTRIE ET LES MINES. **FRENCH CONGO.**

Office: 45 Boulevard Haussmann, Paris, France. J. Belmone, manager. Property is concessions covering a cupriferous district circa 200 miles from the coast in the French Congo, presumably in the Kouilou-Niari basin, on which some exploratory work was done, 1906-1907.

SOCIÉTÉ DES MINES ET FONDERIES DE FRANCARDO. **CORSICA.**

Office: 46 Rue de Londres, Paris, France. Mine office: Francardo Ajaccio, Corsica. L. Bizouarne, manager. Organized Oct. 30, 1905, under laws of France, with capitalization 3,600,000 francs, shares 100 francs par. Lands are extensive, including the Morosaglia, San Lorenzo and other old copper mines, claimed to carry an average of 7% ore, which probably is too high. Paid, 1906, a dividend of 10%.

ANDRES FRANCHY. **PERÚ.**

Mine office: San Marcelo, Yauli, Junín, Perú. Mine has argentiferous copper ores. Was a small producer at last accounts.

COMPAÑIA MINERA DE FRANCISCO DEL AZUL. **MEXICO.**

Mine office: Matehuala, Catorce, San Luis Potosí, Mex. Has copper ores, developed by tunnel. Idle.

Organized Apr. 3, 1857, under laws of Michigan, with capitalization $5
reincorporated, 1887, for 30 years, and capitalization increased, lat
$2,500,000, shares $25 par. Has paid dividends of $1,240,000. Federal
Co., Boston, registrar. Annual meeting, third Wednesday in April.

Lands, 160 acres at the old Franklin, and 1,359 acres at the Fr
Junior, with surface rights to 160 acres additional, and a millsite at
Pointe, of nearly 200 acres area, with one mile of frontage on Portage
The old mine is the SW. ¼ of Section 2, Town 55 North, Range 33 Wes

The old Franklin mine, opened on the Pewabic bed, is surrounded o
sides by the Quincy, which has cut off the Franklin from following th
beyond the boundary lines. Parallel with the Pewabic lode and lying
300′ west, is the so-called west lode, which carries copper in variable
tities. Several fair stopes were developed thereon, 1905, and worked t
extent through the old openings. A little native silver is produced
Pewabic lode, which is picked out by boys at the stampmill. Min
almost exclusively scramming old ground and robbing pillars, the lower
having been gutted. The pillars removed are usually of fair grade, b
ground reworked varies greatly, ranging from very good to rock that is
barren. The old mine has been on its death-bed for 15 years, but co
to supply about 300 tons of rock daily, and predictions of imminent
have been proven false so frequently that it is unsafe to set any date
death. No. 3 shaft is 3,200′ and No. 5 is 2,850′ deep, both bottomed
Quincy line. No. 5 shaft, damaged by fire, March, 1908, has been re

The Franklin Junior mine, bought 1895, was opened, 1860, as the
& Boston, and was reopened, 1882, as the Peninsula. The Franklin
consists of two distinct mines on parallel beds, these being the old Alb
Boston mine, opened on the Allouez conglomerate, and an amygdaloid
opened 1896-1899, on the Pewabic lode, the Pewabic lying 475′ west
parallel with the Allouez conglomerate. The first work on the Franklin
was done on the Pewabic lode, which returned an average of only about
or 9 lbs. fine copper per ton of rock stamped, hence the amygdaloid
were abandoned, February, 1902, and work was transferred to the old
& Boston workings, the reopening of which was begun 1900.

The Allouez conglomerage averages 18′ to 22′ width, with an e
width of 30′, and 3′ to 5′ of lode rock of very poor grade is left unmi
hanging wall, very little assortment being attempted. The conglome
somewhat more regular in its copper contents than to the northward, w
is very bunchy at the Allouez, but is distressingly low in average grade
points.

No. 1 shaft of the conglomerate mine, size 7x20′ over all, with
measurement of 6′6″x18′6″, has 3 compartments and is 2,300′ deep.

is forked by a Cornish pump with 10′ lift, the largest of its size in the Lake district, which handles water very cheaply. The shaft has a wooden combination shaft-rockhouse, 40x50′ on the ground and 96′ high. A direct-motion hoist, good for 5,000′ depth, raises 6-ton skips.

No. 2 conglomerage shaft, 1,200′ south of No. 1, is 7x18'4" over all, and 1,200′ in depth, sunk 3′ under the footwall to secure solidity. Equipment includes a double-drum hoist good for 3,000′ depth, and a steel circular combination shaft-rockhouse, similar to that at No. 2 Centennial, built, 1906, by the Wisconsin Bridge & Iron Co.

In addition to the two conglomerate shafts opened, there is room for two additional shafts, one to the north and one to the south, on the same bed.

The Pewabic lode was tapped, circa 1906, by crosscuts from the conglomerate workings, on the 21st and 23d levels, and considerable drifting was done on the Pewabic bed, giving a rather encouraging showing. The Pewabic gave very poor results when worked formerly, but improved conditions in No. 7, the Mesnard shaft of the Quincy, and the decision of the Quincy management to sink the new Pontiac shaft, only about one mile south of the Franklin Junior, lends hope to the Franklin of better values at depth, and the Pewabic bed, while a very low grade proposition at the Junior mine, can be worked more economically than ten years ago. The Pewabic workings, reopened 1908, after 6 years idleness, were found in bad order. The amygdaloid shafts are numbered from north to south, and are sunk at an angle of 48°30′ on a lode varying from 3′ to 15′, and averaging about 9′ width.

The North amygdaloid shaft, about 900′ south of the Rhode Island line, is about 1,000′ in depth, and probably will be deepened.

No. 1 amygdaloid shaft, 1,100′ south of the north shaft, is 1,600′ deep.

No. 3 shaft, 1,500′ south of No. 2, is about 1,200′ deep.

No. 3 shaft, 1,100′ south of No. 2, was circa 400′ in depth when reopened July, 1908, and has been equipped with a wooden shafthouse and a temporary hoist. Drifting was begun on the 150′ level, August, 1908.

In addition to the Allouez conglomerate and Pewabic amygdaloid beds, the Franklin Junior tract carries the Mesnard epidote, Calumet conglomerate and Osceola and Kearsarge amygdaloids, all supposed to have been opened by a 975′ crosscut driven west on the Pewabic lode, many years ago, this crosscut showing several amygdaloid beds and one conglomerate carrying copper in small quantities. The formation was found considerably disturbed, and a crosscut at much greater depth might give better results. The Kearsarge lode is supposed to have been cut, 1906, by diamond drill borings, and also by a crosscut, but was found valueless where opened. Dr. L. L. Hubbard estimates, on data furnished by Reginald C. Pryor, that the Kearsarge amygdaloid should lie 1,308′ horizontally east of the Allouez conglomerate, which would indicate that the old 975′ crosscut, driven 1894, did not reach the Kearsarge lode. In consequence, the old crosscut was extended eastward, 1906, but the Kearsarge bed, or what is supposed to have been such, was not found to carry workable values, at that point and depth.

Surface equipment includes plants at the old mine and Franklin Junior. The former is adequate, but has not been added to for many years, in view of the ultimate exhaustion of the mine. Surface equipment at the Franklin Junior includes substantial and well equipped machine, carpenter and blacksmith shops, engine-houses, boiler-houses, warehouses, changing-house, office and a considerable number of substantial dwellings. There are air-compressors of 10, 12 and 36 drill capacities.

The mill, of steel, on stone foundations, 177x194′ in size, is reached by the Mineral Range railroad. Equipment includes 5 Allis-Chalmers 2-way heads,

with 20x24" cylinders, each capable of crushing 350 tons of conglomerate or 500 tons of amygdaloid rock daily. Each stamp is fed from a 1,000-ton rock bin, and equipped with hydraulic separators, which remove considerable heavy copper. The washing plant includes, for each head, 20 roughing jigs, 15 finisher jigs, round tables and 1 Overstrom table. The jigs are of the Hodge eccentric type, with center-shield copper discharges, obviating skimming. Foundations have been rebuilt under 2 old heads.

Power for the mill is furnished by a 16x32" Allis-Chalmers engine, with steam supplied by two 500-h. p. Stirling boilers, the boiler-house having a self-supporting brick-lined smokestack of 7' diameter, 165' high, on a 52' brick foundation. Water is furnished by a 15,000,000-gallon Allis-Chalmers vertical compound pump having 12x42" high pressure cylinders and 42x42" low-pressure cylinders, with 47" stroke and plungers of 37½" diameter. Water is drawn through a 36" pipe line, running 200' under the rock to a crib protected by quarter-inch screens. The mill has a 5x12" duplex fire-pump with fire-hose, and is lighted electrically. There is a 267' wharf at the millsite, with 18' of clear water alongside, equipped with coal hoists and sheds. The millsite has about 20 dwellings for employes.

The old mine works about 10 drills and the new mine 25, the old mine producing about 20% of the rock tonnage and 25% of the copper, showing that the rock from the old mine runs 14 to 15 lbs. fine copper per ton, while the conglomerate workings average under 11 lbs. The amount of mass copper secured is very small, averaging only about 1 pound per ton. Mineral is dressed to an average fineness of about 52% only, in order to save fine copper formerly lost in the tailings. Mining and milling costs, 1907, were $1.78 per ton, mining costs being $1.16 and stamping cost only 32.5 cents, notwithstanding the very refractory nature of the rock. These figures compare with similar costs of $1.76 per ton in 1903, notwithstanding increased wages and higher prices for supplies. Costs for 1907, including circa $20,000 for construction, were $740,595.65, being nearly 17 cents per pound, as against 15.4 cents in 1906; 15.8 cents in 1905; 15.4 cents in 1904 and 11.3 cents in 1903. The cost per ton of rock stamped was only 2 cents greater in 1907 than in 1903, while copper costs were nearly 6 cents more, the explanation being found in the steadily declining percentage of copper secured from the conglomerate mine of the Franklin Junior. In 1903 the extraction was 15.25 lbs. per ton from rock stamped, and in 1907 was only 11.48 lbs. fine copper per ton of rock stamped.

Production of fine copper has been as follows: 5,309,030 lbs. in 1903; 4,771,050 lbs. in 1904; 4,206,085 lbs. in 1905; 4,571,570 lbs. in 1906, and 4,401,248 lbs. in 1907. Production for 1908 probably will show a small loss from 1907, owing to transference of mining work from the conglomerate to the amygdaloid mine, at the Franklin Junior.

The matter of selling the old Franklin mine to the Quincy Mining Co. is under consideration, as is a tentative plan for the absorption of the Rhode Island mine and acquisition of 640 acres adjoining. The tentative plans call for an increase of capitalization to $5,000,000, and the issue of 45,000 shares of new Franklin stock, in payment for the Rhode Island property and one square mile of land from St. Mary's Mineral Land Co. Such a merger would give the Franklin company 2 miles of outcrop of the Pewabic and Boston & Albany beds, and nearly 2 miles of the strike of the Kearsarge lode. The management is vigorous, efficient and economical in the highest degree. The Junior mine, as developed, is so low in grade, on both the conglomerate and amygdaloid workings, that the only possibility of rendering it successful lies *in production* on a very large scale, and upon a most economical basis, but

deep workings of the Pewabic bed on the Junior are, without question, re promising than anything ever found in the upper workings.

FRENCH CREEK MINING CO. WYOMIN

Letter returned unclaimed from former mine office, Centennial, Albany C Wyo. G. W. Morris, superintendent. Capitalization $1,000,000, shares $1 p Lands, near Centennial, show a 3′ to 4′ vein, with 12″ footwall paystre carrying high grade auriferous copper ore.

FRESNO COPPER CO., LTD. CALIFORNI

Office: 188 St. Vincent St., Glasgow, Scotland. Mine office: Cle Fresno Co., Cal. Sir John H. N. Graham, Bart., chairman; J. S. MacArth consulting engineer; C. E. Levett, Jr., mine manager. Organized Apr. 2, 19 under laws of Great Britain, with capitalization £400,000, and reorganiz under same title, Feb. 12, 1907, with capitalization £100,000, shares 4s. Lands, 480 acres, freehold and 1,880 acres leasehold, including the Blue F mine, full of water at last accounts, carrying a vein claimed to be 50′ w having 4 shallow shafts showing ore that was claimed to average 10% cop and $2 gold per ton. Honest sampling of the principal ore dumps gave a age assays of 1.04% copper and 13 cents combined gold and silver va per ton. Ore is cupriferous pyrite, apparently too low in grade to be rende payable under any process of extraction now in use.

In 1901 H. B. Vercoe bought, for about $12,000, a ranch in Fresno coun California, having an old 120′ shaft, called a copper mine. This ranch w made the basis of the £30,000 California Copper Syndicate, which, in Apr 1902, sold 80 acres to the Fresno Copper Co., Ltd., for £105,000 in fully p shares, company having £400,000 capitalization in shares of £1 par, which we to a premium of more than 100% on the market, giving a market valuati of nearly £1,000,000 for a property costing originally only about £2,400. the honest report of Fred Siebert, the shares fell from £2 to 2s. per share. T outcome gives a very sinister appearance to the actions of Vercoe, who w the original owner, promoter, vendor and managing director of this compa and who seems to have been an outright swindler. The moral is plain. "Lo the door before and not after the horse is stolen." Apparently property is little or no value.

FRIDAY & LOWDEN. CALIFORNI

Office and mine: Redding, Shasta Co., Cal. Property, on which abo $25,000 has been expended, is opened by tunnels. Idle several years.

SILBER- UND BLEIERZBERGWERK FRIEDRICHSSEGEN A. G. GERMAN

Mine office: Friedrichssegen an den L., Hessen-Nassau, Germany. Ma Rosenthal, president; C. Leuschner, superintendent, at last accounts. Pr *duction, 1903,* was 380 metric tons of argentiferous lead ore, carrying 62.43 *lead and 46.93* grams silver per ton; 5,524 metric tons of zinc ore, averagin

% zinc; 50.25 tons of spathic iron ore, and 8 tons of copper ore averaging
copper and 11.64 grams silver per ton.

CO CONTACT MINING CO. **UTAH.**

ffice: 209 Dooly Blk., Salt Lake City, Utah. Mine office: Frisco, Beaver Utah. D. P. Rohlfing, president and general manager; Patrick Ryan, vice-ident; H. S. Young, secretary and treasurer. Organized circa 1903, under of Wyoming, with capitalization $1,000,000, shares $1 par. One-half of apital stock is supposed to be pooled.

Lands, 18 claims, area circa 340 acres, adjoining the Horn Silver mine on northeast, carrying what is supposed to be the extension of the Horn Silver vein, which has been opened to a depth of 600' by a 2-compartment shaft, having 3 other shafts and several tunnels, with circa one-half mile of ings. Property also shows 4 contact deposits, between limestone and site, one ranging up to 150' in width, carrying values up to 20% copper, lead, 3% zinc, 45 oz. silver and 80 cents gold per ton.

Equipment includes a steam plant, with hoists of 50-h. p. and 80-h. p., a 4-drill air-compressor, with necessary mine buildings. The Horn Silver adjoining, has been a very large producer, and property is considered ining and development well-planned, though apparently as yet no im-ant ore bodies have been developed.

SCO MINING CO. **UTAH.**

Dead. Title changed, circa 1903, to Frisco Contact Mining Co. Formerly risco, Beaver Co., Utah.

ONTENAC COPPER CO. **MICHIGAN.**

Office: 12 Ashburton Place, Boston, Mass. Operating office: Calumet, Mine office: Eagle River, Keweenaw Co., Mich. Quincy A. Shaw, Jr., ident; Rodolphe L. Agassiz, vice-president; James MacNaughton, general ger; Geo. A. Flagg, secretary and treasurer; preceding officers and F. W. ewell, directors. Organized June 26, 1905, under laws of Michigan, with italization $500,000, shares $25 par. Is controlled, through ownership of stock issue, by the Calumet & Hecla Mining Co. At end of fiscal year, 30, 1908, company had cash and bills receivable, $5,894, with indebtedness 6,986.

Lands, 22,268 acres, in Keweenaw county, Michigan, lying mainly south west of the Maniton, with the old Central mine as the nucleus. The Cen-ine, worked 1854-1897, on a fissure vein, was a large producer for many and paid dividends of more than $2,000,000. Property also includes the ump mine, area 800 acres, in Town 59, Range 39, adjoining the Central. have been slightly prospected by diamond drill borings, but nothing of al value found. The tract, however, is very extensive, and, in view of pments elsewhere, it is altogether probable that payable mines will be d, eventually, on the holdings of the Frontenac.

AÑIA MINERA LA FRONTERIZA. **MEXICO.**

ine office: Lampazos de Naranjo, Décimo, Nuevo León, Mex. Property Buena Vista mine, carrying argentiferous chalcopyrite and sphalerite.

. FRONTON. **CHILE**

ned by Société des Mines et Usines de Cuivre de Chañaral.

A-KUMI & CO. **JAPAN.**

ice: 180 Dojima-Kitamachi, Osaka, Japan. Mine office: Kosaka-mura, -gori, Rikuchu, Japan. Denzaburo Fujita, chairman; Heitaro Fujita, airman; R. Tanaka, general manager; S. Saito, mine superintendent; machi, smelter superintendent. Organized 1875, under laws of Japan, pitalization £6,000,000. Profits, 1906, were estimated at circa $3,000,000. ing property includes the Kosaka and Towada mines, located in the

midst of high mountains, difficult of access. The Towada mine, opened A. 1670, has a vein of 30′ to 100′ width, carrying disseminated auriferous ch copyrite and argentite.

The Kosoka mine, located at the extreme northern end of the main isla of Nippon, 10 miles from the government railway, is an old silver mine, on apparently nearly worked out but proven, within the last few years, to con immense underlying masses of copper ore. Country rock is brecciated porphy tuff, ranging from a fine conglomerate to a coarse grit, with intrusions liparite and andesite, ore bodies occurring along the contact zone between th tuff and andesite as impregnations of tuff near a dacite contact, practically blanket veins, lying at an angle of about 45°, with diorite footwall and ha ing of andesitic tuff, the hanging-wall being sharply defined, but the ore sho ing imperceptibly into the footwall. There are 5 of these ore bodies, of i mense size, ranging from 20′ to 270′ in thickness, and proven to length one-half mile, while drill borings have proven the formation to continue to depth of 1,700′, with width, as shown by open-cuts, of 20′ to 140′. There is zone of mixed sulphides immediately under the hanging wall, averaging abo 2% copper, 10% lead, 10% zinc and 0.02 oz. silver, with a trace of gold, t gangue carrying 40 to 45% barium sulphate. Immediately below the mix zone is a zone of cupriferous pyrite, associated with more or less sphaleri carrying 1 to 2% copper only, succeeded by silicious ore of 1 to 1.5% copp tenor.

Ore is produced in 3 grades, the first averaging only about 2.25% copp 2 oz. silver and 65 cents gold per ton, with 12 to 18% zinc and 20 to 3 barite, causing difficult smelting. The second grade of ore is chalcopyrite, w pyritic gangue, comparatively free from zinc, but averaging only about 1.75 2% copper. The third grade is silicious ore, very low in copper tenor, b necessary as a flux, all three varieties of ore being charged as a self-fluxing m ture. Average of all grades of ore smelted is about 2% copper only, w small gold and silver values. The mine has fully $30,000,000 in gross val in sight.

The mine, discovered 1860, and opened 1864 for silver values, has been un the management of the present owners since 1884. Development is by 9 sha of 41′ to 221′ depth, and by 5 tunnels, of 250′, 714′, 1,084′, 1,212′ and 2,0 length.

Power is generated by a turbine water-wheel, only about 200 h. p. be used at the mine, owing to extraction being mainly by tunnel, about 200 h. used for miscellaneous purposes. There are two 8-drill Leyner air-compres Buildings include a foundry, of 1,538 square yards area, carpenter-shop 1,332 square yards, and boiler-shop of 812 square yards, all of wood and ir

The smelter, one mile from the mine, of about 1,000 tons daily capacity, one of the most complete in existence, having the very latest equip throughout. Ore is brought to the works by an aerial tram. Equipment cludes 8 Herreshoff calciners, of which 6 are used on ore, 1 on matte and 1 slags. There are 6 rectangular water-jacket blast-furnaces, of which 2 are u for matting, 2 for casting anodes, 1 for blister copper and 1 for ingot and c copper. Semi-pyritic smelting is employed, with fuel charges of only abo 2% anthracite. Product is a lead-copper matte containing about 20% copp which is crushed, roasted and resmelted in reverberatory furnaces to blis copper. The slag is essentially an iron and barium silicate.

Blister copper from the reverberatories is refined electrolytically, capacity of the refinery having been greatly increased in 1906. Product electrolytic copper of the exceptional purity of 99.95%.

The company owns and operates a private electric railway, of 8 m

length, equipped with 10 locomotives and 400 three-ton ore cars. The company also owns and operates 2 sawmills, and employs about 3,000 hands.

The Kosaka mine was under option, 1906, to an English syndicate, but, fortunately for the owners, the option was not exercised, and the property now is not for sale.

Production, 1906, of the Kosaka mine, was 14,811,152 lbs. fine copper, 2,594,004 grams silver and 290,772 grams gold, and in 1907 was 15,340,218 lbs. fine copper, 9,040,741 momme silver and 79,403 momme gold, copper production showing an increase of almost 50% in 4 years. The Kosaka, notwithstanding the extremely low average tenor of its ores, is the largest copper producer of Japan, and is owned by the strongest financial and commercial interests of the Empire. Not only is it the greatest copper mine of Japan, but it is one of the greatest copper properties of the world, in potential production, owing to the enormous size of its ore bodies.

FUKADA MINE. **JAPAN.**

Mine office: Fukada-mura, Kuma-gori, Higo, Japan. Country rocks are metamorphosed strata of sandstone and clay-slate of Paleozoic age, ore body having strike and dip corresponding to country rocks, and ranging 5′ to 10′ in thickness. Ore is chalcopyrite, associated with iron pyrites, and averages 5 to 6% copper. Production, 1900, was only 18,266 lbs. fine copper. Idle.

FUNATSU MINE. **JAPAN.**

Mine office: Funatsu, Yoshiki-gori, Hida, Japan. Has argentiferous copper ore and made circa 500,000 lbs. fine copper yearly when working. Idle.

FURNACE CREEK CONSOLIDATED COPPER CO. **CALIFORNIA.**

Office: 604-20 Broad St., New York, N. Y. Mine office: Greenwater, Inyo Co., Cal. O. A. Montgomery, president; Jos. A. Chanslon, vice-president; Col. J. S. Lankershim, treasurer; Maj. J. W. A. Off, secretary; preceding officers, A. Burcham and C. T. Silby, directors. Organized 1906, with capitalization $500,000, shares $5 par. Lands, circa 200 acres. Presumably idle.

FURNACE CREEK COPPER CO. **CALIFORNIA.**

Office: 506 Traders National Bank Bldg., Spokane, Wash. Mine office: Greenwater, Inyo Co., Cal. Patrick Clark, president; W. B. Matteson, vice-president; J. J. Stewart, secretary and treasurer; Abe S. August, assistant secretary; A. B. Harvey, general manager and mine superintendent; Jas. Hanley, foreman. Organized under laws of Washington, with capitalization $2,500,000, shares $1 par. Trust Company of America, New York, transfer agent. Guaranty Trust Co., New York, registrar. Shares are listed on the Spokane stock exchange.

Lands, 21 claims, 3 fractional, area 350 acres, 2 miles west of Greenwater, held by location, with no adverses, except in case of the three fractional claims. Mine has about 3,000′ of workings, No. 1, or Copper Blue shaft, being 500′ deep, with crosscuts on the 40′, 250′ and 500′ levels. Work was begun December, 1906, this being the pioneer mine of the Greenwater district, hauling supplies 125 miles from Las Vegas, then the nearest railroad point, and water from Furnace Creek, 25 miles.

Property shows 4 distinct ledges within a cross section of about 600′, with little copper in the country rock between, main ledge being andesite, with strike of circa N. 30° E., and dip of 75° E., outcrop not being especially prominent. Formation shows intrusive granite and porphyry, with cross dykes of later porphyries, nearly covered by a later flow of rhyolite, and faulted by northeast and southwest faults. Main ledge is reported to be about 200′ wide between walls, but apparently has shrank to width of 30′ to 50′ on the 250′ and 500′ levels, and at those depths is *effectually* leached of copper values, except for carrying *paystreaks, up to 3′ width,* and occasional bunches of rich

per ore, these frequently carrying good gold values, ores being melan cuprite, azurite, malachite, chalcocite and chrysocolla, 2 latter ores prod nating. Reports of large ore bodies opened in crosscuts were exagger The wide dyke is claimed to average about 4% copper throughout, but seems a very serious overestimate. Three 50-ton shipments to Salt L smelter returned 16.5 to 17.3% copper, with small gold and silver values. Tonopah Tidewater Railroad is now only 12 miles from Greenwater.

Equipment includes a 40-h. p. gasoline hoist and fan. An available sme site has been selected, but the mine has not shown sufficient ore to warr the building of even a small smelter. Working conditions are somewhat d cult, and development has proven decidedly disappointing. Predictions, Ap 1907, that production would begin immediately, were utterly unwarranted, the property, though by no means devoid of promise, has yet to prove that is a mine. Management considered competent.

FURNACE CREEK EXTENSION COPPER MINING CO. CALIFORNI

Office: care of Hon. John MacGinnis, vice-president, Butte, Mont. M office: Greenwater, Inyo Co., Cal. Geo. W. Irwin, president; R. B. Nucke treasurer; preceding officers, A. J. Campbell, Fayette Harrington, J. D. S mons, John M. Kirk, W. W. Cheeley, Harry Cunningham, E. H. Wilson W. E. Credon, directors; W. H. Teague, superintendent. Organized Sept. 1906, under laws of Montana, with capitalization $5,000,000, shares $5 p Lands, 13 claims, known as the Brady-Kempland group, adjoining the F nace Creek Copper Co., which have shown a little ore assaying up to 9.5 copper. Idle at last accounts.

FURNACE CREEK GOLD & COPPER CO. CALIFORNI

Mine office: Greenwater, Inyo Co., Cal. Organized 1906, by residents San Francisco and Goldfield. Lands, 5 claims, known as the Red Dog gro claimed to show a 20′ vein of copper ore.

FURNACE CREEK OXIDE COPPER CO. CALIFORNI

Office: care of W. J. Guthrie, president and treasurer, Butte, Mont. M office: Greenwater, Inyo Co., Cal. Harry M. Bradhurst, vice-president; Jo E. Corette, secretary; preceding officers, Carl H. Hand and A. J. Huncke, rectors. Organized circa October, 1906, under laws of Arizona, with capitali tion $5,000,000, shares $5 par. Lands, 6 claims, lying east of the Furn Creek Copper Co., showing copper stains and having a shaft of circa 100′.

FURNACE CREEK SOUTH EXTENSION COPPER CO. CALIFORNI

Office: care of L. M. Sullivan Trust Co., Goldfield, Nev. Mine offi Greenwater, Inyo Co., Cal. O. K. Kingsbury, vice-president; Larry M. Sul van, second vice-president; J. L. Lindsay, secretary; J. P. Harvey, consult engineer and director; A. J. Cleary manager. Capitalization $1,500,000, sha $1 par. Lands, 120 acres, including the Anxiety and Copper Shoe groups. the Copper Shoe pinching, the Anxiety became manifest. Has secured selec samples of ore assaying 5 to 30% copper. Promotion, by Shanghai Larry S livan, was marked by peculiar methods, though such methods are by no me peculiar to Sullivan. Is not regarded favorably. Idle and apparently moribu

FURNACE VALLEY COPPER CO. CALIFORNI

Office: Spokane, Wash. Mine office: Greenwater, Inyo Co., Cal. Pat Clark, president; W. C. Meyer, vice-president; J. J. Stewart, secretary treasurer; preceding officers, W. J. C. Meyer, Fred Birney and H. C. Wa field, directors; A. August, assistant secretary; W. J. Casey, superintend

Organized July, 1906, under laws of Washington, with capitaliza $6,250,000, shares $5 par. Trust Company of America, New York, trans *agent*. Shares are listed on the Spokane, Butte and Los Angeles stock

...ages. Company realized $52,525 from stock sales, 1907, and expended ...816, ending the year with 133,750 shares of stock unissued.

Lands, 8 claims, unpatented, circa 2 miles west and south of the Furnace ...ek Copper Co., showing 2 fissure veins, carrying carbonates assaying 4 to ...% copper in a gossan of 200′ claimed width, partly covered by alluvium. ...2 shafts, deepest 209′. Idle.

...UROKURA MINE. **JAPAN.**

Owned by Furukawa Mining Co.

...URUKAWA MINING CO. **JAPAN.**

Office: 1, Yayesucho, Kojimachi-ku, Tokio, Japan. Smelter office: Yama...to-gori, Akita-ken, Shimotsuke, Japan. Work offices: Kamitsuga-gori, ...chigiken, Japan, and Yanagiwaramachi, Honjyoku, Tokio, Japan. Mine ...es of the various properties are as follows: Ashio Mine, Kamitsuga-gori, ...chigi-ken, Shimotsuke, Japan; Ani Mine, Kitaskita-gori, Akita-ken, Ugo, ...pan; Kusakura Mine, Higashikanbara-gori, Niigata-ken, Echigo, Japan; ...kura Mine, Kazuno-gori, Akita-ken, Rikuchu, Japan; Nagamatsu Mine, ...himurayama-gori, Yamagata-ken, Uzen, Japan; Mizusawa Mine, Waka-gori, ...ate-ken, Rikuchu, Japan; Otori Mine, Higashi-Tagawa-gori, Yamagata-ken, ...pan; Kune Mine, Iwata-gori, Shizuoka-ken, Totomi, Japan; Innai Mine, ...chi-gori, Akita-ken, Ugo, Japan.

Junkiche Furukawa, president; R. Kondo, general manager; M. Otagawa, ...istant manager; K. Asano, consulting engineer. Organized 1905, as suc...r of Ichibei Furukawa.

Property includes 8 copper mines, 1 silver mine, a smelter, 2 copper works, ...al collieries and an extensive coking plant. The various mines are de...ibed, in detail, in the following paragraphs:

The Ashio mine, in the province of Shimotsuke, about 100 miles northwest ...Tokio, was discovered A. D. 1610, and developed by the Tokugawa govern...nt, reaching a productive capacity of 2,000,000 to 3,000,000 lbs. fine copper ...ly, during the latter half of the Seventeenth Century, rendering it one of ...largest, if not the largest copper mine, of that era, and as the output was ...cess of domestic demand, the surplus was exported to Holland. The mine ...into the possession of the late Ichibei Furukawa in 1877, in such poor ...dition that its yield was only about 400,000 lbs. of copper yearly, but, by ...d management and thorough development, coupled with the introduction of ...rn methods and machinery, was made the foremost copper mine of Japan.

The Ashio shows country rocks of Paleozoic clay-slate, sandstone and ...blende, with liparite intrusions, carrying literally hundreds of metalliferous ...s that traverse the lipartite, but thin out in the Paleozoic rocks. About ...veins are worked, these averaging 5′ to 6′ in width, with ore chutes of great ...gth, averaging nearly or quite 1,000′. There are 7 main veins, of 6′ to 7′ ...erage width, all with sharp dips, carrying a little melaconite and horn... ...h galena, sphalerite, arsenopyrite and pyrite, having a quartz and alum... ...ge, principal ore values being in the sulphides. Deepest workings ...′, and ores range up to 10% in copper tenor, though giving averages ... returns of only about 4% copper, with small silver values.

The Ashio mine is 9 miles from Nikko, the nearest railroad sta... ...are brought in tram-cars, hauled by bullocks, to the foot of the ... from Nikko, and transported thence to the mine by 2 aerial ... 19,500′ in length, having some very long and high spans ... of the mountains and descending on the other side to ... ...ating the trams is furnished by a plant with Pelton ... There also is a horse-tram connecting the different ... has steam, water and *electric power, there* ...

developing about 2,500-h. p., generated mainly from adjacent streams. T mine equipment is modern throughout, the machinery being mainly of Ame can and German manufacture. The mine has electric underground haulag and ore is broken mainly by power drills.

The reduction works at the Ashio include 3 concentrators, and a mill wi 25 gravity stamps. The bulk of the ore mined is concentrated to an avera tenor of 15% copper, though a little hand-selected ore of high grade go direct to the smelters.

The Ashio smelter, of 750 tons daily capacity, completed 1904, has 3 wate jacket blast-furnaces. The converter department has a 40-ton traveling cra 2 stands, 7 shells and a silica mill. The power plant has blowers for the bla furnaces and air-compressors for the converters.

The Ashio mine alone employs about 12,000 people, including forces at t copper mines, flux quarries, charcoal kilns, smelters, offices, etc. The for includes men, women and children, the females and children being employ at light labor only. Wages, while low according to western standards, a much higher than the average in Japan, miners earning 40 cents to $1 p day, and smelter men about 30 cents per day, while engineers, carpente smiths and other craftsmen are paid 50 cents to $1 per day, and boys and gi in the mills earn 10 to 25 cents per day. There were very serious labor troubl in February, 1907, leading to the burning of buildings, and rioting that w put down by troops. Wages were raised in 1907. Production of the Ashio mi has shown little change for the past 5 years, having been 15,267,210 lbs. fi copper in 1903, 14,622,000 lbs. in 1904; 14,820,192 lbs. in 1906 and 13,972,4 lbs. in 1907.

The Ani mine, Shigeo Kasai, mine manager, is a group of ancient pro erties in the province of Ugo, modernized about the beginning of the centur The Ani carries auriferous and argentiferous copper sulphides, associated wi argentiferous galena, considerable silver being secured as a by-product. Equi ment includes steam, water and electric power, with a very good modern mi ing and reduction plant. The works have a 10-stamp mill and a 150-ton smelte with about 2,500 employes. Production, 1903, was 2,089,279 lbs. fine copp and 1907 was 2,737,011 lbs.

The Kusakura mine, S. Gamoh, manager, in the province of Echigo, opera in the Eighteenth Century, was bought by the predecessor of the present co pany in 1870. The property shows 4 nearly parallel main veins, of less tha 12" average width, though occasionally widening to several feet, traversi porphyry and andesite, the upper workings showing cuprite and bornite, su ceeded by chalcopyrite, associated with pyrite and galena, in the lower level principal values being in the sulphide ores. Equipment includes steam an electric power, and a small smelter, making blister copper of 98.5% averag tenor. About 1,000 hands are employed. Production, 1903, was 1,244,723 lbs and in 1907 was 1,012,043 lbs. fine copper.

The Furokura mine, in the province of Rikuchu, was discovered A. D 1762, and operated 1765-1794, remaining idle until 1868, when reopened. Th property has numerous veins traversing andesite, carrying chalcopyrite, asso ciated with pyrite, hematite and occasional galena and sphalerite, with a cla gouge. Production was 601,199 lbs. in 1903; 746,605 lbs. in 1906, and 656,3 lbs. fine copper in 1907.

The Nagamatsu mine, in the province of Uzen, shows rocks of Tertiar tuff and shale, traversed by andesite dykes, carrying numerous veins, mainly parallel, with nearly north and south strike and steep dip to the east. Th Okubi, which is the main vein, has an average width of 6" to 12" only, wit *maximum of 24"*, carrying chalcopyrite associated with pyrite and occasion

halerite, with quartz gangue. Production, 1907, was 603,514 lbs. fine copper and 101,020 momme silver.

The Mizusawa mine, in the province of Rikuchu, has two 3' veins, at the junction of granite and liparite, carrying chalcopyrite with quartz gangue. Production, 1907, was 490,047 lbs. fine copper.

The Kune mine, in the province of Totomi, opened A. D. 1726, has 3 beds of ore, the upper of 100' thickness, the middle of 12' and the lowest of about 7' average thickness, latter split into two 2' seams at the bottom. Ore is chalcopyrite, associated with pyrite, the richer portions averaging 6 to 7% in copper tenor. Production, 1898, was 137,686 lbs. fine copper, and for 1906 output was given by company as circa 37,000 tons of copper ore.

The Otori mine made, 1904, circa 187,000 lbs. fine copper, and in 1907 produced 261,902 lbs. fine copper and 66,791 momme silver.

The Innai mine, near the southern boundary of the province of Ugo, was discovered A. D. 1696, and about the beginning of the Nineteenth Century became important, silver production rising to about 100,000 momme monthly, circa 1840. The mine fell into the hands of Ichibei Furukawa in 1882. The property shows augite-andesite and propylite, having numerous veins ranging from 2' to 20' width, carrying chalcopyrite, pyrargyrite, argentite and stephanite, with quartz gangue. A second vein, of 1' to 4' width, carries similar ores in connection with galena, sphalerite and pyrite, while a third vein carries chalcopyrite, galena and sphalerite only. Property, while called a silver mine, is an important producer of copper, with considerable gold values, production, 1907, having been 568,480 lbs. fine copper, 1,206,846 momme silver and 20,193 momme gold.

In addition to its metalliferous mines, the company operates extensive coal mines, known as the Western Collieries, at Kaho-gori, Fukuoka-ken, producing about 350,000 tons of coal yearly, and operates coal mines also at Kazuno-gori, Rioshiknsho, Echigo. The Fukagawa coke works, at Minimakatashika-gori, Tokio, are of about 16,000 tons annual capacity.

The Shinonome smelter, at Yamamoto-gori, Akita-ken, has an annual capacity of about 2,000,000 lbs. ingot copper, and 225,000 lbs. pig lead, also turning out small quantities of gold and silver.

The Nikko copper works, at Kamitsuga-gori, Tochigi-ken, is a refinery, making about 8,000,000 lbs. of electrolytic copper yearly.

The Honjyo copper works, at Yanagiwaramachi, Honjyoku, Tokio, has an electrolytic refinery, but is devoted mainly to the manufacture of sheets and wires, having an annual capacity of about 9,000,000 lbs., and turning out about 500,000 lbs. yearly of copper wire, 550,000 lbs. of electrolytic copper, and circa 3,300 lbs. fine silver.

The management of the Furukawa Mining Co. is noted for its progressiveness, and responsible heads of departments are encouraged to travel, at the company's expense, through the principal mining and metallurgical centres of Europe and America, thus keeping the company fully abreast of international progress, in every branch of its business. Production, 1905, was 23,780,573 lbs. fine copper and 1907 was 20,302,378 lbs. fine copper.

FUTURITY MINING & MILLING CO. **COLORADO.**

Dead. Formerly at Newett, Chaffee Co., Colo. Described Vol. VI.

COMPAÑIA GADITANA DE MINAS. **SPAIN.**

Office: Cadiz, Spain. Mine office: Aznalcóllar, Sevilla, Spain. Capitalization, 3,000,000 pesetas, shares 500 pesetas par; debentures, 2,000,000 pesetas authorized. Marquis de Fiel Pérez Calixto, president; Don José Luis Lacave, treasurer; Don Salvador Viniegra, *secretary. Property is* La Caridad group of mines, *carrying large bodies of cupriferous pyrites, with considerable develop-*

ment. Company built and owns a 34-kilometer railroad, from Azualeólla the Guadalquivir river. Management considered good and property promi

GAGNON MINE. MONTA

Owned by Trenton Mining & Development Co.

GALENA BAY MINING CO. ALAS

Office: 402 Railway Exchange Bldg., Chicago, Ills. Mine office: Val Prince William Sound, Alaska. Benj. F. Millard, president; C. A. Hay, v president; L. J. Rusk, treasurer; Albert Barge, secretary; John S. Jury, as ant secretary. Organized under laws of Washington, with capitaliz 500,000, shares $1 par. Lands, on Galena Bay, 3 miles from tidewater about 35 miles from Valdez, include the Vesuvius group of 25 claims, under bond and lease, having a 1,000′ tunnel, the Mullen group of 6 cla and 12 miscellaneous claims in the Kotsina Valley, the Mullen group being Copper Creek, also a 1,300-acre townsite. Company plans a hydro-elec power installation, to transmit energy 2 miles to the Vesuvius mine, and said to have ordered a 1,700′ Leschen aerial tram.

GALENA COPPER MINING CO. WASHINGT

Office: 115 Marion St., Seattle, Wash. Mine office: Index, Snohom Co., Wash. L. E. Rader, president; H. M. Williams, vice-president; John Snook, secretary; Francis X. Waldron, treasurer; Judson C. Hubbart, mana Organized Jan. 2, 1906, under laws of Washington, with capitaliz $1,000,000, shares $1 par.

Lands, 16 claims, in the Silver Creek district, showing mainly chalc rite, in veins of 3′ to 18′ width, said to have given assays of 18.5% cop 2.9 oz. silver and $4 gold per ton. Development is said to be by tunnel, a shipment of ore to the Tacoma smelter is said to have given net retur $30 per ton. Management is said to expect a railroad within one-half of the mine. Presumably idle.

GALENA MINE. BRITISH COLUM

Mine office: Howe Sound, New Westminster district, B. C. J. H. S manager, at last accounts. Lands, sundry claims about 6 miles south of Britannia mine, located one-half mile from tidewater, on Howe Sound, op by a 100′ tunnel on a 5′ vein of copper ore. Idle.

GALENA RIDGE MINING CO. WYOMI

Mine office: Meteetse, Big Horn Co., Wyo. Lands, circa 1,200 a patented, also timber lands and water-rights, showing 5 veins of good w on one of which the 450′ Oregon tunnel shows ores carrying copper, lead, s and gold values, with quartz gangue. Small sample shipments to Denver said to have given good returns. Development is by a 1,400′ crosscut tu planned to be driven about 5,000′. Has a Pelton water-wheel and 10-drill compressor. Idle.

GALICE CONSOLIDATED MINING CO. OREG

Dead. Formerly at Galice, Josephine Co., Ore.

GALIZURSKI WORKS. RUS

Mine office: Galizursk, Elizabethopol, Russia. S. Varavov, owner. L recorded production, 1899, was 1,390,095 lbs. fine copper. Presumably idle.

GALLAHER MINING & MILLING CO. WASHING

Office: 705 First Ave., Seattle, Wash. Mine office: Cle Elum, Kittitas Wash. Edward Peterson, managing agent. Organized under la ington, with capitalization $2,000,000, shares $1 par. Lands, 200 acres, showing copper ledges, also a vein of cinnabar c in mercury. Development is by a 70′ shaft on the Copper *tunnels of* 380′ on the Last Chance, 310′ on the Copper *Navidad and* 120′ on the Dolphin. Company claims a 3′

r, a 4' vein on the Last Chance, and a 3' vein on the Copper King. 0 has been expended on development. Idle.

GARRISON GOLD & COPPER MINING CO. U

Dead. Merged, 1907, in Garrison Monster Mining Co. Formerly at I Tooele Co., Utah.

GARRISON-MONSTER MINING CO. U

Office: Salt Lake City, Utah. Mine office: Ibapah, Tooele Co., Uta P. Gardner, president; J. S. Garrison, vice-president; S. W. Morrison, trea H. B. Windsor, secretary. Organized under laws of Nevada, with talization 1,000,000 shares, presumably $1 par, as a merger of the Ga Gold & Copper Mining Co. and Monster Mining Co. Lands, on Dutch tain, in the Clifton district, circa 40 miles from Wendover, the nearest ra station, have about 3,500′ of workings, said to show considerable bodies ver-lead ore.

GARVANZA MINING & MILLING CO. CALIFO

Mine office: Cima, San Bernardino Co., Cal. J. M. Banfield, superi ent. Lands, on the western side of New York Mountain, near Bryant st on the Salt Lake Railroad, have about a quarter mile of workings, sh considerable auriferous and argentiferous copper and lead ore. Plans ton mill and reduction plant, with four 10-ton tanks to use the hyposu leaching process.

COMPAÑIA DE MINAS i FUNDICIONES DE GATICO. C

Dead. Succeeded, March 10, 1905, by Compañía Minera de Gatico. merly at Gatico, Cobija, Antofagasta, Chile.

COMPAÑIA MINERA DE GATICO. C

Office: Casilla 627, Santiago de Chile. Mine and works office: G Cobija, Antofagasta, Chile. Geo. W. Waters, manager. Organized Mar 1905, under laws of Chile, with capitalization 6,000,000 pesos, shares 100 par. Property includes El Toldo, Michilla and Gatico mines, latter o 1891. La Michilla group, 6 kilometers north of Michilla Cove, at an elev of 3,000 meters above sea-level, has bedded veins with pockets of oxidize carrying 5 to 6% copper, though tenor of ore can be brought up to nearly by selection. El Toldo mine, 4 kilometers northeast of the smelter, nearly vertical fissure vein of about 1 meter width, opened to depth o meters, carrying 7% chalcopyrite with quartz gangue. Production of El 1904, was circa 10,000 metric tons of selected ore averaging 10.5% copper El Toldo mine is connected with the smelter by a Ropeways Syndicate tram, 3,700 meters long, with drop of 200 meters, permitting operatio gravity, and reducing cost of ore transportation to smelter from former of 4.5 pesos to one-half peso per metric ton, effecting a saving of about pesos yearly. Also has a 5½-kilometer Bleichert aerial tram from Mi mines to Michilla Cove, operated by gravity, whence ores are shipp smelter.

Smelter, at the port of Gatico, 30 miles south of Tocopilla, and 83

uth of Antofagasta, has reverberatory furnaces and a 38x144" Allis-Chalmers blast-furnace. Converter department has pneumatic stands and 5 cylindrical shells, with an Allis-Chalmers duplex air-compressor and a 110-h. p. electric motor. Power plant includes two 200-h. p. boilers, Green fuel economizer and dynamo with capacity of 13 arc and 150 incandescent lamps. Water is re-used, works having a reservoir of 50,000 cubic meters capacity. Fuel is imported coke, slags averaging 0.5% copper. Smelter costs at old plant were 21.5 pesos per metric ton, and in the remodeled plant are 12.61 pesos per ton. Company also has an old smelter at Michilla Cove, running intermittently, this having a 36x84" water-jacket blast-furnace, 2 reverberatories and a converter plant. Production, 1903, was 2,565,503 lbs. fine copper, and for 1907 should have been nearly or quite 4,500,000 lbs. fine copper.

GAVILANES MINING & MILLING CO. **MEXICO.**

Office: 819 Chamber of Commerce, Chicago, Ills. Letter returned unclaimed from former mine office, Gavilanes, Durango, Mex. C. A. Wightman, president; John A. Boland, secretary and treasurer; James E. Boland, manager. Organized Sept. 1, 1904, under laws of Arizona, with capitalization $2,000,000, shares $1 par. Lands, 500 acres, 30,000 acres of timber and grazing lands, and water-rights to 10 miles of the Piaxtla and Pilar rivers. Lands include the old Gavilanes silver mine, a property said to have produced, according to official records, 80,000,000 oz. silver, also sundry undeveloped copper veins. Idle.

SUCESIÓN FRANCISCO GEISSE. **CHILE.**

Office and mines: El Espino, Combarbalá, Coquimbo, Chile. Property includes El Espino mine, opened 1896, which made about 100,000 lbs. fine copper yearly when working, and the Fundición El Pupio, a small smelter. Idle.

GEISSE HERMANOS. **CHILE.**

Office and works: Illapel, Coquimbo, Chile. Mine office: Mineral de Bella Vista, Illapel, Coquimbo, Chile. Property includes Los Trabos, Bella Vista and Tongo mines. The Bella Vista mine is about 150 meters deep, with workings for about 150 meters in horizontal length. The Tongo mine, at Mineral de Tongo, Illapel, has a vein of 2 to 3 meters width, opened to depth of 160 meters, and, 1903, employing 90 men, produced 900 metric tons of ore averaging 9% copper and 25 grams gold per ton. The Trabos mine in the same year produced 720 metric tons of ore of 20% copper tenor. Has a smelter with blast and reverberatory furnaces, producing ejes of circa 50% copper tenor and bars of 97% tenor. Production, 1903, was 603,919 lbs. fine copper.

GEM CONSOLIDATED MINES CO. **COLORADO.**

Office: 341 Sixth Ave., Pittsburg, Pa. Mine office: Idaho Springs, Clear Creek Co., Colo. Col. J. M. Guffey, president; John H. Galey, vice-president; W. S. Watson, secretary; Henry B. Clifford, resident director; W. E. Renshaw, general manager; J. Kaughman, mill superintendent. Organized Jan. 1, 1907, under laws of Colorado, with capitalization $3,000,000, shares $1 par. Lands, 10 claims, patented, also a millsite, showing a vein of 20′ to 50′ width, traceable circa 3 miles, carrying sulphide ores assaying up to 37% copper, 10 oz. silver and $18 gold per ton. Mine has about 5 miles of workings, estimated to show 1,000,000 tons of ore, with 300,000 tons blocked out for stoping. Has a 350-h. p. hydro-electric plant, using 350 h. p. at the mine and 200 h. p. at the mill. Has 4 hoists, good for 3,000′ depth, and an 18-drill Ingersoll-Rand air-compressor. Buildings include a 40x50′ machine shop, carpenter shop, smithy, etc., and a 100-ton stamp mill. Production, 1907, estimated by company at circa $150,000 in value.

GEMINI-GODIVA CONSOLIDATED MINING CO. **UTAH.**

Office: Salt Lake City, Utah. *Mine office: Eureka, Juab Co., Utah.* John Q. Packard, *president; Jackson C. McChrystal, general* superintendent. Was a

merger of the Gemini and Godiva mining companies, the Gemini having about $300,000 in dividends. Mine, opened to depth of 1,600', has a ve 15' to 20' width, carrying auriferous and argentiferous lead and copper the silver-lead ores averaging 12% lead and 40 oz. silver per ton, whil bottom level shows argentiferous copper ore of about 3% copper tenor. duction averages circa 1,500 tons of ore monthly, mainly silver-lead ores under a long-term contract to the United States Smelting & Refining Co. steam and water power, employing circa 75 men.

GEMINI MINING CO. U

Dead. Merged, circa 1906, in Gemini-Godiva Consolidated Minin Formerly at Eureka, Juab Co., Utah.

Office: 23 Broad St., New York, N. Y. Letter returned unclaimed former mine office, Helena, Lewis & Clark Co., Mont. Geo. Hyatt Rob president; Walter B. Tipton, vice-president; F. J. Chipman, secretary treasurer; B. Frank Johnston, manager. Lands, in Avalanche Gulch, acro Missouri river from Helena, have a 28' vein, opened by a 500' crosscut t showing auriferous and argentiferous copper sulphides.

GENESEE COPPER CO. CALIFO

Mine office: Genesee, Plumas Co., Cal. Lands, 33 claims. Idle circa April, 1906.

GEORGE A. TREADWELL MINING CO. ARIZ

Office: 27 William St., New York, N. Y. Mine office: Mayer, Ya *Co., Ariz.* F. W. Wood, president and general manager; Miss Myra B. M

secretary; Frank W. Giroux, superintendent. Organized February, 1900, under laws of West Virginia, with capitalization $3,000,000, increased, Jan. 21, 1905, to $3,500,000, shares $10 par. Was organized by "Gen." Walter S. Logan, "Prof." Geo. A. Treadwell and others. First act of company was illegal, being the purchase, from directors, who voted for such purchase, of sundry mining claims. Controls the Brookshire Mining Co., through ownership of 80% of stock. Has upwards of 2,000 shareholders, of whom 1,410, in August, 1907, were holders of 50 shares or less, more than half being women, duped by this gang of thieves. Annual meeting, first Wednesday in February.

Lands, formerly reported as 102 claims, patented, area 1,861 acres, were reported by the company, Apr. 10, 1906, as 60 claims, patented, area 1,200 acres, with 180 acres of mill and smelter sites, in the Jerome, Big Bug, Peck and Agua Fria districts. These lands were reported to include the Brookshire, Hackberry, Boggs, Iron Queen and Cliff mines, and previously included also the Badger, Pastime, Crystal, Wallace and Agua Fria groups. Country rocks are Yavapai schists and slate, with rhyolite intrusions, ore bodies occurring mainly as replacements in slate, following the rhyolitic intrusions. Five ore bodies have been developed, to various extents, these, of about 5' average width, formerly having been claimed by the company to give average assays of 5% copper, 5 oz. silver and $5 to $50 gold per ton, from chalcopyrite, but claimed, 1906, by the company, to give average assays, from bornite and chalcopyrite, of 3% copper, 10% zinc, 5 oz. silver and $2 gold per ton, which ores, by reason of low contents in copper, gold and silver, and excess of zinc, are of small value.

Various mines are developed by shafts of 485', 350', 375' and 100', and by tunnels and drifts of circa 7,700' aggregate length, with numerous shallow shafts and short tunnels.

The Brookshire group, which has the principal development, has upwards of one-half mile of workings, showing considerable concentrating ore of 4 to 5% copper tenor, with fair gold and silver values. Work was abandoned on this property in 1902. The Hackberry mine, opened to 500' depth, has nearly one-half mile of workings, on 2 parallel veins of 7' and 9' claimed width, former claimed to carry ore averaging 10% copper and $10 gold per ton, which is untrue. The Boggs and Iron Queen mines have considerable development, as also has the Cliff, on which work was abandoned in 1902. Mines, as a whole, are estimated by the company to show 80,000 tons of ore, with 40,000 tons blocked out for stoping, which, although a considerable decrease from former claims, is a gross exaggeration. Practically all of the company's statements regarding high ores and large ore bodies are fairy tales. The Boggs mine, which is idle, is held subject to a mortgage of $150,150.40, which never will be paid.

Mine equipment includes a 240-h. p. steam plant, with four 40-h. p. 12x14" boilers and a 2-drill Knowles air-compressor. Buildings include a 40x65' wooden machine shop, 20x30' smithy, boarding-house, bunk-house and dwellings, with a total of about 40 buildings, including an office building put up on lands not owned, and not even leased, which is a fair sample of the business methods of the company.

A 75x100' wooden concentrator has two 24" Dodge crushers, 3 centrifugal crushers and 2 tables, and is rated by company at 200 tons daily capacity, which, like all its other claims, is untrue.

The company controls, or is supposed to control, a private narrow-gauge railway, known as the Hackberry & Iron Queen railroad, of circa 5 miles length, touching the Hackberry, Boggs and Queen mines and connecting with Santa Fé line at Arizona City. Equipment includes 2 locomotives and 9 cars, unless the rolling stock *has been stolen recently* by some of the officers. *A 8-mile pipe-line, of 4" diameter, costing* $32,118.21, was suposed to

bring water from Crystal Springs, under a head of 1,150', but is out o
mission.

The company has three smelters, two worthless and one unnecessary
old Boggs or Commercial smelter, on the narrow-gauge line, having a c
and two 40-ton water-jacket blast-furnaces, hopelessly antiquated in
and equipment, was inherited from former owners. A hydrocarbon sm
designed to burn petroleum and turn out blister copper from ore by a
fusion, was built at Arizona City, on the advice of "Prof." Geo. A. T
well, a doddering old "scientist" who was used as a stalking-horse b
company, and proved a ridiculous failure, though the company sold conside
stock on the strength of its alleged "revolution" of existing processes.
hydrocarbon "smelter" is fully described in Vol. IV.

The third smelter, at Mayer, seems properly planned and constructed
apparently is a failure also, as the company's last ore shipments were
to the Humboldt smelter. This smelter is fully described in Vol. VI.
company claims a capacity, between the concentrator and smelter, of 5
600 tons of ore daily, which, of course, is an exaggeration. The comp
various smelters cost $158,893.12, according to the company's books, bu
accounts were kept so crookedly and by such unmitigated scoundrels th
is impossible to say what is to be believed.

The George A. Treadwell Mining Co. is a deliberate and intentional f
conceived in iniquity and born in sin, promoted by the late "Gen." W
S. Logan, a notorious shyster lawyer of New York, who is said to have
an estate of $500,000, accumulated by all sorts of rascalities. Every
connected with the company in an executive capacity in its palmy da
swindling was either a fool or a rascal. The management has not hesi
at any lie that seemed convenient or likely to prove profitable, and its
cial statements were deliberately false, while the advertisements, put out
the name of Myra Martin, were colossal lies. A complete exposition of th
tenness of the company would require several pages, which can be devot
better use, and the property is dismissed with the statement that the com
is a swindle of the first magnitude, without a single redeeming feature.
and should be wound up, after the principals are imprisoned.

GEORGE THIRD MINING, MILLING & SMELTING CO. COLOR

GERONIMO COPPER MINING CO. NEW MEXICO.

Dead. Former officers were W. A. Sanders, president; Geo. R. Funke, vice-president; W. F. McQuarrie, secretary. Was organized March 22, 1906, under laws of Arizona, with capitalization $1,500,000, shares $1 par. Lands were 5 claims, area 100 acres, 8 miles northwest of Silver City. Was a swindle, put out by the notorious Financial Security & Trust Co., of Denver, which promoted the Spanish Lost Bullion and several other downright swindles. Formerly at Silver City, Grant Co., N. M.

GERTRUDE MINE. ONTARIO.

Owned by Lake Superior Power Co.

GERTRUDE MINING CO. WYOMING.

Dead. Succeeded by Eagle Copper Co. Formerly at Battle, Carbon Co., Wyo.

MINA GERTRUDIS. PERÚ.

Mine office: San Tadeo, Yauli, Junín, Perú. Mine, opened 1897, having lenses in limestone carrying chalcopyrite and tetrahedrite, is opened by adit from the level of Lake Morococha, mining through winzes sunk from short crosscuts in the hanging, ore being hand-cobbed at the adit entrance. Ore produced, to and including 1903, averaged 15.64% copper and 1,206 grams silver per ton, total production to end of 1903 being 2,189,400 kilograms fine copper and 1,689 kilograms fine silver. Production, 1906, estimated at 750,000 lbs. fine copper.

GEYMAN MINING CO. MONTANA.

Mine office: Butte, Silver Bow Co., Mont. Lands are a small tract northeast of the Parrot smelter, having a shallow shaft. In 1906 Butte & Boston Consolidated Mining Co. secured a verdict giving damages of $72,541 for trespass and value of ore extracted. Idle some years.

GIANT CALIFORNIA MINING CO., LTD. BRITISH COLUMBIA.

Mine office: Rossland, Trail district, B. C. Jay P. Graves, president; A. L. White, vice-president; Chas. H. Wolf, secretary; Geo. Wooster, treasurer; Wm. Yolen Williams, general manager. Organized circa 1907, with capitalization $5,000,000, shares $100 par. Lands, apparently one claim, a short distance west of Le Roi. The Giant mine shipped 4,344 tons of ore, before suspending, 1903. Property considered promising and management good.

GIANT CHIEF MINING CO. UTAH.

Dead. Lands sold, circa April, 1906, to Willard F. Snyder, et al. Formerly at Bingham Canyon, Salt Lake Co., Utah.

GIANT LEDGE GOLD & COPPER CO. CALIFORNIA.

Office: 500 Frost Bldg., Los Angeles, Cal. Mine office: Manvel, San Bernardino Co., Cal. L. M. Gregory, president and general manager; H. G. Stoddard, secretary; R. W. Kenny, treasurer; Edward Brough, mine superintendent. Organized July, 1901, under laws of Arizona, with capitalization $1,000,000, shares $1 par.

Lands, 20 claims, a 40-acre millsite and miscellaneous lands, giving total area of upwards of 800 acres, *in the New York district*, showing 4 veins, of which 2 *are under development, one being a fissure* in granite, the other a

contact deposit between limestone and granite, with average width of giving average assays of 5% copper, 5% lead, 10 oz. silver and circa gold per ton, from carbonate and oxide ores near surface and sulphi depth. Has 1 shallow shaft and 2 tunnels, with about 4,000′ of underg workings, developing a considerable amount of ore. Presumably idle.

GIANT MINING CO., LTD. **BRITISH COLU**

Dead. Succeeded, circa 1906, by Giant-California Mining Co., Ltd. merly at Rossland, Trail district, B. C.

GIBB COPPER MINES, LTD. **AUSTR**

Mine office: Boolboonda, Queensland, Australia. Lands, circa 10 northeast of Mt. Perry, show 2 parallel veins, of about 12″ average carrying high grade auriferous and argentiferous copper ore. Propert a small concentrator and was producing, in a small way, early 1908.

COMPAÑIA MINERA LA GIBOSA y ANEXAS. **ME**

Dead. Lands sold to American Smelters Securities Co. Former Jiménez, Chihuahua, Mex.

GIBRALTAR COPPER MINING CO. **WYOM**

Office and mine: Encampment, Carbon Co., Wyo. Wm. L. Sill, presi Chas. E. Winter, secretary. Has a 4′ vein, opened by a 75′ shaft, showi giving assays up to 20% copper, with good gold and silver values. Has power. Idle several years and apparently moribund.

GIBSON COPPER CO. **ARIZ**

Office and mine: Globe, Gila Co., Ariz. S. L. Gibson, president, tre and general manager; Wm. Henderson, vice-president; Delos Copeland, tary. Organized 1906, under laws of Arizona, with capitalization $2,50 shares $25 par; issued, $2,000,000.

Lands, 19 claims, 5 surveyed for patents, area 380 acres, circa 15 from Globe, showing Pinal schist, with occasional trachyte, diorite and q ite, carrying 20 or more veins or lenses, occurring as fissures in schist as contact deposits between schists and porphyritic rocks. The main vein, to 7′ width, has been traced 2 miles. Ores are exclusively sulphide, m massive bornite and chalcopyrite, of extremely high grade, frequently ra 20 to 40% in copper tenor, ore occurring massive and frequently being c with chalcocite. Apparently the two main veins unite, or cross, at depth.

The mine has tunnels of 120′, 578′, 650′, 680′ and 730′, and 3 shaft cluding a 3-compartment vertical shaft, begun 1907, and the main incline s sinking below the sixth level. The fifth level tunnel, 1,000′ long, is to co with the present workings at length of 1,100′, and the sixth level tunn 900′ long.

Equipment includes two 280-h. p. boilers, a 60-h. p. engine, air-compr and 2 hoists, one with double drum, good for 1,000′ depth.

The Gibson mine was opened by its former owners, who remain in co of the company, on a capital of $90 cash and a team of horses, and has its way, and earned good profits, from grass roots, which is what very copper mines have done. Ore is shipped to the Old Dominion smelte 10-horse teams, and about 60 men are employed. Production, 1907, 3,340,777 lbs. fine copper. Mine considered valuable.

GILA COPPER CO. **ARIZ**

Office: 1107-408 South Spring St., Los Angeles, Cal. Mine office: Pinal Co., Ariz. Philip Wiseman, superintendent. Organized 1907, under of Maine, with capitalization $10,000,000. Is a twin of the Ray Consoli Copper Co., and is controlled by men prominent in the Utah Copper Co. *erty has monzonite* ore bodies, somewhat similar to those of the Utah C *Co. Property* considered promising and management good.

COUNTY MINING CO. **ARIZONA.**
ad. Once owned the Emeline mine. Formerly at Globe, Gila Co., Ariz.

MONSTER COPPER CO. **ARIZONA.**
ne office: Kelvin, Pinal Co., Ariz. Lands, known as the Confidence with circa 1,000′ of underground openings, show auriferous and argentif- ornite, chalcocite and sundry oxidized ores. Property considered prom- Idle for several years and apparently moribund.

VALLEY COPPER CO. **ARIZONA.**
fice: 1930-42 Broadway, New York, N. Y. Mine office: Safford, Gra- o., Ariz. Floyd H. Wilson, president; John F. Webber, manager; C. S. , mill superintendent. Organized 1905, as successor of Federal Mining hich succeeded the old Gila Valley Copper Co., and name changed back iginal title, and former officers put in the penitentiary, to remove the h of the Qualey management.

Lands, 24 claims, area 470 acres, also a 5-acre millsite, including the San and Great Eastern groups, in the Lone Star district of the Gila Moun- s, claimed by old management to have 3 ore bodies of about 9′ average h, but present management disclaims this statement. Development is by els of 90′, 100′ and 300′, and by shafts of 130′, 325′ and 425′, with oxidized of about 300′ depth. Mine is said to show a 28′ ore body at depth of 230′. A 50-ton concentrator, built 1906, shipped, 1907, some concentrates to the Dominion smelter, one carload returning 29.95% copper, circa 2 oz. silver 80 cents gold per ton. Production, 1907, was 110,858 lbs. fine copper, 223 silver and 6 oz. gold.

RILAMBONE COPPER MINING CO., LTD. **AUSTRALIA.**
Dead. Succeeded by Girilambone Mining Co., N. L. Formerly at Girilam- e, Canbelego Co., N. S. W., Australia.

RILAMBONE COPPER MINING CO., LTD. **AUSTRALIA.**
Office: Sydney, Australia. Mine office: Girilambone, Canbelego Co., N. W., Australia. G. A. Richards, manager; W. Blakemore, mine manager. ventures, £12,400.

Mine, opened 1880, carries numerous quartz veins and intrusions, ore oc- urring mainly as disseminations and replacements, lacking clearly defined alls, in arenaceous slate and sandstone having occasional hard bands of artzite, ore being mainly sulphide, with quartz gangue, though the mine arries considerable carbonate ore of high grade in the oxidized zone, of about depth. Deepest shaft is 520′. Ores are divided into 3 classes for treat- ment, the first comprising carbonates and cuprite of about 4.6% average cop- per, second class ore being composed of oxides from the transition zone, while sul- phides from the lower workings constitute the third class, each being smelted separately. Average of all grades, 1900, was 3.85% copper.

The smelter has 2 reverberatory furnaces and a refining furnace, turning out blister copper of the remarkable purity of 99.95%. Ores are difficult of reduction, owing to their deficiency in sulphur and iron, and excess of silica. Water is very scarce, the property having a dam and filtering and reservoir for water repeatedly. The reduction plant includes lixiviation works, where tailings and certain low grade oxidized ores are leached.

The property was reopened, 1906, when 6,035 long tons of ore were smelted, yielding 293,440 lbs. fine copper. Employed about 60 men. Mine presumably is idle.

GIRILAMBONE MINING CO., N. L.
Dead. Was succeeded, circa 1907, by Girilambone Copper Mining Co., Formerly at Girilambone, Canbelego Co., N. S. W., Australia.

GIROUX CONSOLIDATED MINES CO. NEVADA AND M

Office: 1606-42 Broadway, New York, N. Y. Mine offices: Ki White Pine Co., Nev., and Carbó, Ures, Sonora, Mex. Jos. L. Giroux dent; Eugene L. Giroux, vice-president; G. E. Giroux, secretary; J. C nedy, treasurer; Jas. Angus Snedaker, consulting engineer; Loren M. counsel; preceding officers, Isidore Hernsheim, Hoffman Richardson, C. Carty, I. W. Bernheim, G. F. Piper and Ralph Lupton, directors; E. W. general manager; Gideon L. Giroux, superintendent Mexican mine; Loui ser, superintendent Nevada mine.

Organized April, 1903, under laws of Delaware, with capitali $5,000,000, shares $5 par, increased, Feb. 25, 1908, to $6,500,000, shares $ issued, $4,639,875. Authorized, March 1, 1908, a 10-year bond iss $1,500,000, in denominations of $100, $500 and $1,000, at 6%, redeema option of company in 5 years, at 105, and convertible into common sto par, March 1, 1910, or at any previous date in the event of sale of pro or dissolution of company. Increase in capitalization was provided for version of bonds. On Jan. 1, 1908, had cash in bank, $32,768.64, with bills able of $320,233.13. Empire Trust Co., New York, registrar.

The Mexican property, of 96 pertenencias, area 237 acres, include Sultana and San José mines, commonly known as the Sultana group, ab mile west of the Copete, in the Sierra de Oro Mountains, circa 25 miles e Carbó and about 35 miles from Hermosillo. Property shows a contact ve 50′ to 100′ width, between limestone and porphyry, opened by 3 shafts. tana No. 1 is circa 200′ deep, Sultana No. 2, the main working shaft, su an incline, is 1,200′ deep, and the San José shaft is circa 500′ deep. Th José mine shows in the bottom level a vein of circa 40′ width, carrying ox ores for shallow depth, succeeded by sulphides. About 15% of the ore h from the San José is of smelting grade, balance, of 6% estimated copper being stocked. The Mexican property as a whole shows ore of 3 to 4% c tenor, with variable gold values, latter ranging from very small to very with a fair proportion of high grade ore. Shipments of Sultana ore to El smelter have returned combined gold and silver values ranging from 92 to $734.36 per ton.

The Sultana mill, apparently of 100 tons daily capacity, planned a first unit of a 200-ton concentrator, has Huntington mills, an amalgam plant and a cyanide plant.

The Nevada property, which is much the more important, is 52 claims ented, area 1,050 acres, also 1,800 acres of miscellaneous lands carrying uable water-rights, and the townsite of Kimberly, shortly west of Copper 7 to 9 miles from Ely. This group is about 2 miles in length, and from to 5,000′ in width, lying immediately west of the Nevada Consolidated.

The ore bodies of the Giroux are of vast extent and of considerable ety. The first series of ore measures, on the contact between plutoni sedimentary rocks, shows enormous areas of replacement in the latte having a gangue of quartz, talc and clay. In places these series have proven to a width of fully 1,000′, though not workable throughout, fa to the width of 100′ or more having been found at points.

The second series of ore measures is in the Giroux shaft, immed above the water level, where there apparently is a bed of 30′ to 40′ thic carrying oxidized ores said to average 7% or upwards, which probably serious overestimate.

A third ore series consists of cupriferous monzonite, which is a h altered acid quartzose andesite, carrying upwards of 60% silica. The ex surface has been leached to a considerable extent, but below a depth of 40′ the monzonite carries melaconite and chalcocite, and, at depth, chalcop

al values being in chalcocite. The porphyry ores are estimated by the
y to average 4% copper, which is much too high. The monzonite ore
f the Giroux was estimated at 1,500′ by 2,400′ in area, with prospects
her extension of the limits of mineralization, in addition to which an-
ody of cupriferous porphyry, estimated by President Giroux as 600′
d 1,400′ long, extends along Old Glory Hill, from the western end of
perty, in a course between the Alpha and Giroux shafts. This has been
only by shallow workings, but may prove profitable at depth.
monzonite ore body shows fissure veins of 3′ to 20′ width, giving
idence of faulting, and supposed to have been mineralized from solu-
rsing along the lines of least resistance. Present developments are
n fissure veins, but the quantity of porphyritic ore is so vast that ap
it forms the chief asset of the company. The porphyritic ore is com
y friable and readily amenable to concentration.
Ely mines have 11 shafts, with upwards of 3 miles of workings, in-
main working shafts having heavy gallows-frames and ore-bins. The
one at surface is followed by a zone of secondary enrichment to a
circa 375′, succeeded by unaltered sulphides. The secondary zone
siderable native copper, in addition to the usual oxidized ores and
sulphides. Porphyry ores have been developed in the Alpha, Brooks,
d Bunker Hill shafts, and Mr. Walter states that the block of milling
l therein is 2,000′ long, 150′ wide and 160′ thick, containing approxi-
000,000 tons of ore averaging circa 2.25% copper and 20 cents gold
while. the Giroux, Taylor and Alpha shafts are estimated to show
,000 tons of ore averaging 6.5% copper. The mine, as a whole, is
ve $30,000,000 worth of ore blocked out, which statement requires
n. The amount of ore actually blocked out is not phenomenally
geological conditions are such that it seems reasonably safe to
0,000 tons of ore in sight, with prospects of a much larger amount.
o doubt about the immense resources of the property in porphyritic
rincipal question being the average percentage of copper contained
w grade ores.
compartment 1,200′ Alpha shaft, to which operations are confined
, is said to have cut 5 veins, and is claimed to have a 50′ ore body
00′ level, but apparently the ores above the 1,000′ level are mainly
A winze from the bottom shows high grade ore, with some native
d the company claims that, by means of diamond drill borings, the
have been found to be continuous below the 1,000′ level, averaging
copper on that level, and increasing in value with depth, which is
onsidered a first-class exaggeration, though, without question, the
ft has ore bodies of considerable size and of high average tenor. A
hipped, 1907, to the Garfield smelter, returned 12.2 to 13.66% copper.
elieved, however, that there is a 50′ vein of this sort of ore, and
he management has been guilty, in the past, of gross exaggeration
the size of its ore bodies, and their values.
cember, 1907, the Alpha shaft caved badly, for reasons not made
but presumably through indifferent timbering. Several miners
the cave, three of whom, A. D. Bailey, Fred McDonald and
re entombed. The story of their rescue is one of the most
ory of mining, so filled with horrible accidents and
e imprisoned miners succeeded in signaling to surface,
e, and the signals were answered. A letter, well
half inch rope, from a windlass, through the
miners, because of a bend in the pipe column
being imprisoned in a small pump station.

emergency, however, and by means of a hook, made from a piece of wire a bit of pipe, fished the letter from the pipe-column. Acting under instruc the miners succeeded in repairing the telephone, after which communic from surface was uninterrupted. Food and water were lowered throug pipe, in trains of 2" nipples, each 6" long, with caps, connected by fl links, and even reading matter was supplied in the same manner. The miners were rescued Jan. 19, 1908, after an imprisonment of 46 days.

The work of reopening and retimbering the Alpha shaft was comp May, 1908, requiring nearly 6 months. Equipment at the Alpha includ electric pumping plant, of 250,000 gallons claimed daily capacity. The su plant includes three 150-h. p. boilers and a first-motion double-drum hoist steel gallows-frame, and a 200-h. p. Corliss engine driving a 150-kw. gen that actuates the electric pumps.

The 2-compartment Giroux shaft, 800′ deep, is said to show, on the level, a large ore body of 7 to 15% average copper tenor, which is consi a serious overestimate.

The Morris shaft, with 2 compartments and circa 275′ in depth, is id

The 2-compartment Brooks shaft, 1,200′ from the Morris, and 455′ also is idle.

The 2-compartment Bunker Hill shaft, east of the Brooks, circa 5 depth, has a hoist operating 3-ton self-dumping skips.

The 2-compartment Taylor shaft, circa 300′ deep, is idle. The 2-com ment Pilot Knob shaft, of about 300′ depth, also is idle.

Surface equipment at the mine includes hoists for the principal shaft compressors, timber framing mill, and necessary shops.

Transportation is provided by a 2-mile 36" gauge railway connectin Bunker Hill, Morris and Brooks shafts with the mill and smelter, grad eraging 1.5%. Equipment includes a Porter engine, of 660 tons tractive p and ore-cars.

The mill, located at the mine, of wood, stone and concrete, with al chinery mounted on concrete foundations, of about 400 tons daily cap was completed September, 1907, at a cost of circa $160,000. The mill is pl to handle ore automatically throughout, and has 600-ton receiving bins, which ore goes to a 10x24" crusher, with belt-conveyor and 40" tro Equipment includes 6 Frue vanners and 42 Wilfley tables. Power is furn by 125-h. p. and 200-h. p. Corliss engines, with three 100-h. p. boilers, an mill is heated by steam and lighted by electricity.

The mill has eight 8,000-gallon storage tanks for water, and 90,000-gallon reservoirs, of cement and concrete, one at the Alpha shaft one directly back of the mill, connected by 2,050′ of 6" steel pipe. It is mated that settling tanks will save about 80% of the wash-water for fu use. The mill requires about 125,000 gallons of water daily, and the ma ment plans securing water therefor from the Alpha shaft, which would a precarious supply, though the flow of the shaft is increasing with depth, was claimed, September, 1908, to be circa 125,000 gallons daily. The s however, did not furnish enough water to run the mill when the latter completed, despite promises to that effect, and an alternative and appar reliable supply is being developed.

Work was begun, circa July, 1908, by digging ditches, for a pipe-line Steptoe Creek, of about 9 miles length. Water must be pumped through pipe-line, of 1,125,000 gallons nominal daily capacity, against an actual of 967′, with static and frictional head of 1,105′. Cost of the pipe-line station-pump is estimated at circa $250,000. Apparently the mill should been built near the water, instead of near the ore.

The company also has rights to a portion of the waters of

GLASDIR COPPER MINES, LTD.

Dead. Voluntarily liquidated, October, 1903.

GLÁSDIR COPPER MINES (1903), LTD.

Offices: 4 Broad Street Place, London, E. C., Eng. Organized 1903, with capitalization £1,000, shares £1 par, apparently as a tentati ganization of the Gladsir Copper Mines, Ltd. Moribund.

GLASGOW COPPER SYNDICATE, LTD. CALIF

Offices: 149 St. Vincent St., Glasgow, Scotland. T. & G. B. M Cook, secretaries. Organized Dec. 14, 1904, with capitalization £8,000 £1 par, to deal with copper claims in Fresno county, California. Pre related to Fresno Copper Co., Ltd.

GLASGOW & WESTERN EXPLORATION CO., LTD. NI

Offices: 33 Renfield St., Glasgow, Scotland, and 317 McCornick Bl Lake City, Utah. Mine office: Golconda, Humboldt Co., Nev. Geo. lane Reid, chairman; Otto Stallman, general manager; D. Macpherso secretary; Jos. Farren, superintendent; George Cuthbert, secretary. O Oct. 28, 1896, with capitalization £30,000, shares £1 par, fully issued ages and is the principal owner of the Adelaide Star Mines, Ltd.

GLASSFORD CREEK COPPER MINING CO., LTD. AUST

Office: William St., Rockhampton, Queensland, Australia. M works office: Glassford Creek, via Miriam Vale, Queensland, Australia Brown, chairman; A. A. Slack, secretary; Thos. Gibb, managing dire L. Bailey, general manager; D. W. Findlay, mine superintendent; p officers, G. C. Willcocks, Jas. Stewart and Robt. Macfarlane, directo creased capitalization, 1906, to £10,000, shares 1s. par, fully paid, with vision for meeting future needs by assessments. Debentures, £12,500 and an issue of similar size planned, at last accounts.

Lands are in the Dawes Range, 60 miles south of Gladstone, adjoi Glassford Creek Copper Mines, Ltd., having a slate footwall and granit ing, with contact veins of 30′ to 75′ width carrying self-fluxing ore giving average returns of 4.1% copper, 1.5 oz. silver and 1.95 dwts. long ton. Mine, discovered 1897, was opened, in the Blue Bag open underhand stoping, but this was discontinued at depth, and developmen by tunnel and shaft, the change of mining system necessitating clos smelter.

The mill has a 300-ton Blake-Marsden crusher, and picking table smelter, near the mine, has a 42x72″ rectangular water-jacket blast-fu about 100 tons daily capacity, installed 1906, and a Connersville blow ing matte of 40 to 45% copper tenor, slags running 0.3% copper. Near road point is Gladstone, 35 miles. Traction engines were used, but did on account of bad roads. Production, 1906, was 913,366 lbs. fine copper oz. silver and 94,314 dwts. gold, secured with an average force of 1 Suspended operation Sept. 7, 1907, on account of low price of copper.

GLEN-JENNINGS COPPER MINING CO. WY

Mine office: Encampment, Carbon Co., Wyo. Idle some years.

GLOBE-AMALGAMATED COPPER CO. AR

Dead. Was organized June 19, 1907, under laws of Arizona, by Pearson, J. R. Barnette and G. C. Gleason, with capitalization $1,000,00 $5 par. Formerly at Globe, Gila Co., Ariz.

GLOBE-ARIZONA COPPER CO. AR

Mine office: Globe, Gila Co., Ariz. Samuel L. Gibson, manager. lying southeast of the Old Dominion and Globe Consolidated, 3 miles Globe, are opened by a 115′ tunnel and 290′ shaft, showing a 5′ vei *averaging 6 to 7%* copper, with small silver values. Began producti *1907, and shipped* about 15 tons of ore daily to Old Dominion smelter,

eral months, employing circa 30 men. Production, 1907, was 57,231 lbs. fine copper and 430 oz. silver. Property considered promising.

GLOBE & ARIZONA DEVELOPMENT CO. **ARIZONA.**

Dead. Lands sold, 1906, to Superior & Boston. Formerly at Globe, Gila Co., Ariz. Described Vol. VI.

GLOBE-BOSTON COPPER MINING CO. **ARIZONA.**

Dead. Lands sold, circa 1906, to Globe Consolidated Copper Co. Formerly at Globe, Gila Co., Ariz.

GLOBE CONSOLIDATED COPPER CO. **ARIZONA.**

Office: 403 Lonsdale Bldg., Duluth, Minn. Mine office: Globe, Gila Co., Ariz. Henry B. Hovland, president; R. B. Whitesides, vice-president; John Uno Sebenius, secretary; preceding officers, Louis Rouchleau and Hoval A. Smith, directors; T. T. Hudson, treasurer; Michael M. McCarthy, manager. Organized June, 1906, under laws of Arizona, with capitalization $1,500,000, shares $10 par; issued, $1,000,000. Cash on hand, Jan. 1, 1908, was $173,085. There is supposed to be a balance of $367,966 due on lands, February, 1910.

Lands, circa 1,100 acres, bought for about $600,000, lying immediately north of the Old Dominion and west of the Arizona Commercial. Property includes the Globe-Boston group of 21 claims, bought for $130,000, the Mallory group, and other extensive holdings.

Principal work has been done on the Gem and Future veins, carrying a little chalcopyrite. The Globe-Boston or Mallory shaft, when worked on the 400' level by former owners, showed a 4' vein carrying mainly leached ore, with some low grade chalcopyrite and occasional bunches of bornite, both with fair silver values, but shows better ore in the deeper workings.

The 3-compartment Gem shaft, 1,225' deep, has extensive crosscuts on the 1,100' and 1,200' levels. No. 3 crosscut, on the 1,100' level, in August, 1908, cut the Future vein, showing 16' of ore of 2 to 3% copper tenor. There also is a 3' vein of 3% ore on the west drift of the 1,200' level, and a 6" vein of 8% ore. In addition to the veins previously named, the property carries the Taylor vein.

Equipment includes good hoists and air-compressors at both the Boston and Gem shafts, latter having a 12-drill compressor. Petroleum is used for fuel, and about 75 men are employed.

Results for the first two years of work were rather discouraging, but in- erations were much improved late in 1908. Property is considered promising, and management good.

LOBE COPPER CO. **NEVADA.**

Letter returned unclaimed from former mine office, Ely, White Pine Co., ev. Lands, 6 claims, bought March, 1907.

OBE COPPER MINING CO. **ARIZONA.**

Dead. Property sold to Old Dominion Mining & Smelting Co. Formerly Globe, Gila Co., Ariz.

OBE COPPER MINING CO. **WYOMING.**

Office: 24 Giddings Blk., Colorado Springs, Colo. Mine office: Hecla, amie Co., Wyo. A. C. Widdicombe, president; J. A. Morrison, vice-president general manager; John H. House, secretary; Stewart Davis, treasurer; f. H. C. Beeler, consulting engineer. Organized 1901, under laws of Colo- o, with capitalization $1,500,000, shares $1 par. Lands, 22 claims, area 438 s, known as the Fairview group, in the Silver Crown district, showing dry fissure veins, of which 3, of 7' average width, are opened by 5 shafts, 00' average depth, and by tunnels of 90' and 160', giving estimated average es of 12% copper, 6 to 10 oz. silver and $5 gold per ton, from sulphide . Has steam power and an *air-compressor*. *Did* a little work, 1906. Pro- ably *idle*.

GLOBE & LOST GULCH SILVER-COPPER MINES CO. ARIZ

Office: 21-1928 Grant Ave., Denver, Colo. Mine office: Black W Gila Co., Ariz. V. G. Hills, president; John A. Myrberg, vice-presiden superintendent; M. E. Brooke, secretary and treasurer. Organized Apr. 1, under laws of Arizona, with capitalization $1,000,000, shares $1 par. L 10 claims, area 200 acres, and a millsite, at the head of Lost Gulch, nort of Globe, showing quartzite, granite and limestone, cut by porphyritic d Mine, but slightly developed, shows auriferous and argentiferous lead copper ores.

GLOBE MINE. MICHI

Office: 82 Devonshire St., Boston, Mass. Mine office: Painesdale, H ton Co., Mich. F. W. Denton, general manager; Capt. John Jolly, su tendent. Property is owned by the estate of John Stanton, and held und option, twice extended, expiring May, 1909, by the Copper Range Consoli Co., latter having the privilege of paying therefor in shares. During expenditures on the property were $191,580.92, with total expenditures, to 1, 1908, of circa $400,000.

Lands, 1,280 acres, being Sections 1 and 2, Town 53 North, Range 35 lying next south of the Champion and immediately north of the Chal mine, carrying about 6,000′ of the strike of the Baltic and parallel am loidal beds.

Work was begun by diamond drill borings, which located the Baltic and gave some cores carrying excellent copper values. The borings disc the existence of a heavy overburden of sand and boulders, hence it was n sary to reach the solid rock by a vertical shaft, which was sunk in the ha wall. This shaft is located about 700′ south of the Champion boundary and was put down under most discouraging circumstances, but by persis and the hardest kind of hard work was bottomed successfully, despite p tions, from many experienced miners, that its sinking was impossible. shaft is telescopic, inside measurements of timbers at the collar 13′ 3″ x 23′ 3″, with a second section below of 9′ x 19′ 6″, and a third se of still smaller size, this plan permitting new inside timbering and wha realignment was necessary when the shaft was bottomed. The drop-shaft started October, 1905, and reached the ledge May 15, 1907, at a depth of after 19 months of extremely difficult and trying work, 3 months addit being required in getting the shaft into the ledge and stopping out the making a total of nearly two years for the work, which was most creditab all concerned, this being the deepest sand-shaft ever sunk. The shaft sunk by weight to 150′ depth, and for the balance of the distance was f down by hydraulic jacks, with the aid of 64 steel shoes, each built w water-jet having an opening of 1 square inch and a pressure of 300 lbs. W of the shoes was 37,000 lbs., and these were punched down by 6 hyd jacks, each exerting a pressure of 100 tons. The shaft was wet, makin gallons of water per minute, and there was much trouble with the quick while the terrific pressure of the hydraulic jacks caused occasional trouble buckling.

Plats have been cut at intervals of 100′ from the first level, which is from surface, leaving a 128′ back of solid rock. The mine is to have permanent pumps on the 1,000′ level, and will use Kimberley skips for ing. The Baltic lode was intercepted at 860′ depth, but was reached previ by crosscuts from a level above. The bed shows a little copper, in drif the 1,000′ level, but, on the whole, is decidedly low in grade. This, how is no criterion of the future, as the Baltic amygdaloid, in common wit other copper-bearing beds of the Lake Superior district, is bunchy, rich g alternating with lean, and only extensive development can give a correct

of the probable average value of the lode on this property. In view of the rich drill-cores secured by borings, and the fine stopes opened in the Champion, a short distance north of the Globe, it would seem reasonable to expect the Globe to make a paying mine, with development. If this should be the case, it is probable that the mine will be opened permanently by incline shafts, driven as upraises, though, in view of the tremendous overburden, vertical shafts may be used throughout, or vertical shafts may be sunk through the bed and deflected, in the footwall, to parallel the dip of the bed.

GLOBE MINING CO. **ARIZONA.**

Office: 506-171 Washington St., Chicago, Ill. Mine office: Globe, Gila Co., Ariz. J. F. Hechtman, president and general manager; M. A. Patterson, vice-president; Geo. L. Beach, treasurer; Walter M. DeKalb, secretary. Organized Feb. 19, 1903, under laws of Arizona, with capitalization $2,500,000, shares $1 par.

Lands, 27 claims, area 540 acres, nearest circa 2½ miles north of Globe. Lands show granite-porphyry, syenite, quartzite and diorite, carrying fissure veins in diorite of 2′ to 100′ width, with gossans giving assays of 2 to 6% copper, 4 to 30 oz. silver and $2 to $28 gold per ton. The Mineral Farm group of 21 claims, 3 fractional, includes the Vacey-Constance mine, worked circa 1886 for silver, and said to have produced upwards of $100,000 worth of ore under former ownership, this group having upwards of 20 old pits and shafts, of 20′ to 165′ depth. The Mineral Farm group shows altered sedimentary and igneous rocks, with iron dykes, and a complex fissure system. The Mineral Farm vein, of about 4′ width, gives assays of 4.8% copper and up to 132 oz. silver and $7.44 gold per ton, and the group also shows a 20′ vein, said to sample 22% copper, 9% zinc, 2 oz. silver and $4.96 gold per ton, which seems excessive. Property also includes the Eagle Pass group. Development is by a 2-compartment 215′ shaft, between two iron outcrops, planned to be sunk to 500′.

Equipment includes a 60-h. p. boiler, 8x10″ hoist and an air-compressor. Property is considered promising.

GLOBE & PINTO MINING CO. **ARIZONA.**

Mine office: Globe, Gila Co., Ariz. T. Trevillian, president; J. M. McPherson, secretary and treasurer. Capitalization $750,000, shares $1 par. Lands, 11 claims, 16 miles from Globe, north of and adjoining the Five Points, having a 90′ shaft in a 4′ vein showing streaks of ore, on footwall and hanging, that have given assays up to 22% copper, 3.4 oz. silver and $8 gold per ton. Mine does not show several thousand tons of ore of 4 to 12% copper value, as has been claimed in the press.

GLOBE STANDARD MINING CO. **ARIZONA.**

Mine office: Globe, Gila Co., Ariz. Chas. Miller, superintendent. Lands, 4 claims, in Powers Gulch, having a 50′ shaft showing a 3′ vein of auriferous silver-lead ore, assaying up to 63% lead, 13 oz. silver and $6 gold per ton; also 15 claims near the Arizona National Mining Co.

GLOBE SULPHIDE COPPER CO. **ARIZONA.**

Letter returned unclaimed from former mine office, Globe, Gila Co., Ariz. Organized Nov. 26, 1906, under laws of Arizona, with capitalization $1,000,000, shares $1 par, by Eugene Barrows and D. G. McDonald.

GLOBE TRACT. **MICHIGAN.**

Office: care of John Stanton Estate, owner, 15 William St., New York, N. Y. Mine office: Atlantic Mine, Houghton Co., Mich. Lands, 1,920 acres, being Sections 3, 4 and 5, Town 53 North, Range 35 West. Property included two other sections, area 1,280 acres, now *under option* to the Copper Range Consolidated Co., *which are described separately under* title of Globe Mine.

GLOBE WESTERN COPPER CO. ARIZ

Mine office: Globe, Gila Co., Ariz. N. C. Cottee, vice-president; D. treasurer; J. Weinberger, secretary; preceding officers and C. Jerome directors. Capitalization $2,000,000, shares $10 par. Lands, 40 claims 800 acres, in 3 groups, known as the Cole & Goodwin, Robertson & West and Clark & Stewart, circa 20 miles southwest of Globe. The Clark & St group has a 250′ shaft, bottomed in sulphide ore assaying 10 to 15% coppe some shipments were made therefrom, 1906, to Old Dominion smelter. The Goodwin group has a 310′ shaft and a 480′ crosscut tunnel. The Robert Westbrook group has tunnels of 100′ and 130′ and a 225′ crosscut tunne ting 2 small streaks of high grade ore. Property, as a whole, has mainl of concentrating grade, and deposits are somewhat bunchy. Has ga power. Property considered promising.

GLOBE-WHEATFIELDS MINING CO. ARIZ

Office and mine: Globe, Gila Co., Ariz. J. Thornton Price, presiden G. Nehms, secretary; preceding officers, Fred C. Boothe and Claude W. foot, directors. Organized Oct. 25, 1906, under laws of Arizona, with italization $1,000,000, increased Jan. 2, 1907, to $1,500,000, shares $ Lands, near the Arizona National and Globe & Calumet, held under $ bond and lease, have shown ores assaying 4.32 to 24.38% copper.

GLORIA COPPER MINES (SPAIN), LTD. S

Office: 75 Coleman St., London, E. C., Eng. Organized Feb. 27, under laws of Great Britain, with capitalization £1,700, shares £ Property is a lease on La Gloria mines, in the province of Huelva, Spain

COMPAÑIA MINERA GLORIA DEL INCA. C

Office: Iquique, Chile. Mine offices: Chañaral, Atacama, Chile, a piapó, Atacama, Chile.

GEWERKSCHAFT VEREIN GLÜCKAUF-NEVIGES. GERM

Mine office: Neviges, Rheinprovinz, Germany. Has lead and coppe developed by 2 shafts, and employed about 100 men, producing circa tons of ore yearly, at last accounts, product being mainly lead.

GEWERKSCHAFT GLÜCKSBRUNN. GERM

Dead. Merged, 1903, in the Eisfelder Kupfergewerkschaft. Forme Glücksbrunn, Saxe-Meiningen, Germany.

GOAT CREEK MINING CO. WASHIN

Mine office: Methow, Okanogan Co., Wash. Ores carry gold, silv copper. Idle.

GODIVA MINING CO. U

Dead. Merged, circa 1906, in Gemini-Godiva Consolidated Mini Formerly at Eureka, Juab Co., Utah.

GOLCONDA CONSOLIDATED CO., LTD. NEV

Office: Suffolk House, London, E. C., Eng. Mine office: Golconda, boldt Co., Nev. W. P. Taylor, chairman; E. T. McCarthy, consulting eng William Smith, secretary; E. L. Labadie, superintendent; Hans Loesch, lurgist. Organized Dec. 27, 1906, under laws of Great Britain, with capi tion £250,000, shares £1 par; issued, £21,967. Lands, in the Kennedy and Mountain districts, show mainly lead ores. Early 1908 planned build 200-ton smelter, in Golconda Cañon, 3 miles from Golconda.

GOLCONDA-NEVADA COPPER CO. NEV

Mine office: Golconda, Humboldt Co., Nev. J. H. Playter, superi ent. Lands, known as the Honolulu group, are opened by a short tunnel *low shaft* and several open-cuts.

GOLD ANCHOR MINING CO. **COLORADO.**

Mine office: Alice, Clear Creek Co., Colo. Thos. I. Slater, manager. Ores carry gold, silver and copper. Has gasoline power. Presumably idle.

GOLD BELT DEVELOPMENT & REDUCTION CO. **ARIZONA.**

Office and mine: Morenci, Graham Co., Ariz. E. U. Beauchamp, manager; Lee Dunn, superintendent. Capitalization, $750,000. Lands, 25 claims, circa 4 miles northwest of Morenci, showing free milling gold ore, mainly in quartzite, and copper ore, largely chrysocolla associated with pyrolusite, with occasional malachite and chalcocite, and some sphalerite. Has 8 shafts, 2 deepest 200' each, and a tunnel, showing a 3' vein of carbonate ore assaying 12% copper. Has 3 gasoline hoists. Shipped some ore, 1907, to Shannon smelter, and has circa 15,000 tons of ore on dumps. Employed 20 men at last accounts.

GOLD BELT MINING CO. **MONTANA.**

Mine office: Empire, Lewis & Clark Co., Mont. Owen Byrnes, superintendent. Property includes the Empire mine, carrying gold, silver, lead and copper ores. Has steam power, 60-stamp mill and cyanide plant. Presumably idle.

GOLD BUG CONSOLIDATED MINING CO. **WASHINGTON.**

Dead. Formerly at Bossburg, Stevens Co., Wash.

GOLD & COPPER COMPANY OF BINGHAM. **UTAH.**

Dead. Succeeded, 1901, by Bingham Consolidated Mining & Smelting Co. Formerly at Bingham Canyon, Salt Lake Co., Utah.

GOLD & COPPER CONSOLIDATED MINING & MILLING CO. **ARIZONA.**

Dead. Succeeded, circa 1907, by Hasayampa Copper Co. Formerly at Groom Creek, Yavapai Co., Ariz. Fully described Vol. VI.

GOLD & COPPER DEEP TUNNEL MINING & MILLING CO. **NEW MEXICO.**

Office: 780 E. Madison Ave., Cleveland, Ohio. Mine office: Elizabethtown, Colfax Co., N. M. A. T. McIntyre, president; John Pearson, vice-president; A. Dorn, secretary and treasurer; W. P. McIntyre, mine superintendent. Organized October, 1900, under laws of New Mexico, with capitalization $500,000, shares $1 par.

Lands, 10 claims, area circa 100 acres, also a 2½-acre millsite, on the western slope of Baldy Mountain, in the Moreno district, carrying fissure and contact veins in and between quartzite and slate. Has 2 shallow shafts and a [illegible] crosscut tunnel, planned to penetrate the mountain, with a length of [illegible], opening 2 bodies of low-grade auriferous copper ore. Has gasoline power and electric drills, with a 20-ton stamp-mill of lumber and logs, size [illegible], equipped with a 5' Huntington mill and gravity stamps. Nearest railroad, 3 miles. Company plans continuing development steadily. Property considered promising.

GOLD & COPPER FIELDS SYNDICATE, LTD. **AUSTRALIA.**

Dead. Voluntarily liquidated, March, 1902. Formerly at Byng, County Thurst, N. S. W., Australia.

GOLD-COPPER MINING CO. **ARIZONA.**

Office and mine: Prescott, Yavapai Co., Ariz. Chas. F. Motz, president; Emil Rautman, secretary, treasurer and general manager. Lands in the Hasayampa district, include the Peacock, Mountain View and Iron Duke claims, opened by a 600' tunnel, cutting a vein carrying auriferous and argentiferous copper ore, yielding assay values up to $30 per ton.

GOLD-COPPER MINING CO. **CALIFORNIA.**

Letter returned unclaimed from former office, Rocklin, Cal. Mine offices: Rocklin, Placer Co., Cal. Capitalization $1,000,000, shares $1 par. Lands, 160 acres, supposedly carrying the extension of the Dairy Farm ore body, slightly developed by shaft. Idle.

GOLD & COPPER MINING CO. NEW

Dead. Formerly at Rociada, San Miguel Co., N. M.

GOLD-COPPER MINING & DEVELOPMENT CO. SOUTH D

Dead. Formerly at Deadwood, Lawrence Co., S. D.

GOLD CROSS MINING & MILLING CO. COL

Mine office: Pitkin, Gunnison Co., Colo. R. L. McKnight, sup ent. Property is the Camp Bird mine, showing gold and copper ores 10-stamp mill.

GOLDEN COVE MINING CO. NEW

Mine office: Hachita, Grant Co., N. M. W. H. Hare, presiden Stewart, vice-president; Fred E. Emery, secretary and treasurer. Ha pits and shafts of 10′ to 85′ depth, showing a vein claimed to give assays of 18% copper and 20% lead, with gold and silver values. Pr idle.

GOLDEN DESERT MINING & MILLING CO. A

Dead. Formerly at Quartzite, Yuma Co., Nev.

GOLDEN EAGLE GOLD MINING CO. CALI

Office: 54 First St., Portland, Ore. Mine office: Copley, Shasta R. J. Jennings, president and general manager; R. A. Martin, vice-p Jas. E. Isaacs, secretary; C. C. Bush, Jr., treasurer; preceding officers, lands and I. Theodore Jennings, directors. Organized under laws of with capitalization $1,000,000, shares $1 par.

Lands, 8 claims, area 160 acres, held under bond and lease expir known as the Keystone group, on the eastern side of the Sacrame circa 10 miles northeast of the Iron Mountain mine. Property, deve tunnel, is said to show 5 gold-bearing quartz veins, of 2′ to 20′ widt ing $5 to $20 gold per ton, and a copper vein, claimed to be 6′ to and traceable 2,200′, carrying ore of 5 to 22% copper tenor, with $7.80 gold per ton.

GOLDEN EDGE MINING CO. WY

Dead. Formerly at Rambler, Carbon Co., Wyo.

GOLDEN GATE GROUP. COL

Mine office: Tarryall, Park Co., Colo. Property, near the foot o Mountain, is said to show a vein of 10′ to 30′ width, giving assays 62% copper, and $10 and upwards gold per ton. Idle.

GOLDEN GATE MINING & DEVELOPMENT CO. WASH

Office: care of Gen. C. E. Buel, Seattle, Wash. Mine office: Kittitas Co., Wash. Lands are 3 claims in Josephine county, Oreg 1,000 acres of coal lands, and 22 claims in vicinity of Cle Elum, show galena of good grade, but mainly low grade ore assaying 1 to 4% co $4 to $7 per ton in combined gold and silver values.

GOLDEN MARGUERITE SILVER & COPPER MINING CO.

Letter returned unclaimed from former mine office, Mullan, Shos Idaho. Organized 1908, with capitalization $1,500,000. Lands, 10 c the Hunter district. Idle.

GOLDEN MINT MINES, LTD. N

Dead. Voluntarily liquidated, October, 1903. Formerly at Lyn Norway.

GOLDEN RULE COPPER MINING & SMELTING CO. A

Dead. Was a swindle. Formerly at Vail, Pima Co., Ariz. scribed Vol. VI.

GOLDEN SHOWER COPPER CO. A

Mine office: Tucson, Pima Co., Ariz. Chas. F. Hoff, president *eral manager.* Capitalization $3,000,000, shares $1 par. Lands, 4 cla

80 acres, 14 miles northwest of Tucson and 6 miles from Rillito Station on the Southern Pacific railway. Has a 20′ shaft. Idle.

GOLDEN STAR MINING CO. **IDAHO.**

Dead. Formerly at Doniphan, Blaine Co., Idaho.

GOLDEN STATES MINES, LTD. **ARIZONA.**

Office: 20 Lawrence Lane, London, E. C., Eng. Mine office: Dragoon, Cochise Co., Ariz. Chas. F. Branton, chairman; George Thompson, secretary. Organized June 25, 1897, as reconstruction of Geldfontein Estates & Gold Mining Co., Ltd., with capitalization £100,000, shares 5s. par; issued, £61,254. Lands, 120 acres, with questionable title, on Copper Creek, in the Dragoon Mountains. Has a small smelter. Idle some years.

GOLDFIELD COPPER-GOLD MINING CO. **NEVADA.**

Dead. Was organized March, 1907, under laws of Arizona, with capitalization $1,000,000, shares $1 par. Officers were W. W. Talbot, president; T. E. Davis, vice-president; E. A. Jenkins, secretary; D. L. Hopkins, treasurer. Lands were 2 claims and a millsite, circa 5 miles from Hawthorne. Formerly at Hawthorne, Esmeralda Co., Nev.

GOLDFIELD COPPEROPOLIS MINING CO. **NEVADA.**

Office: 1130-11 Broadway, New York, N. Y. Letter returned unclaimed from former mine office, P. O. Box 198, Goldfield, Esmeralda Co., Nev. J. P. Marshall, president and treasurer; R. Tidwell, vice-president; Robt. Blei, secretary; preceding officers, G. H. Phillips and G. A. Phillips, directors. Organized under laws of Arizona, with capitalization $1,000,000, shares $1 par.

Lands, 6 claims, known as the Comstock group, at Copperopolis, just north of Lone Mountain, and 3 claims at Phillipsburg, circa 20 miles northwest of Goldfield, showing an outcrop carrying argentiferous copper ore and argentiferous lead ore, opened by a 250′ tunnel.

GOLDFIELD ELY FAIRVIEW WONDER MINING CO. **NEVADA.**

Dead. Was promoted by Arthur Levan, one of the swindlers who put out the Lost Spanish Bullion Mines Co. Was a mere bit of stock-jobbery. Formerly at Ely, White Pine Co., Nev.

GOLD FLINT MINING CO. **MONTANA.**

Dead. Was succeeded, circa 1907, by Lion Gulch Development Co. Formerly at Homestake, Jefferson Co., Mont.

GOLD HILL COPPER CO. **NORTH CAROLINA.**

Office: 82 Broadway, New York, N. Y. Mine office: Gold Hill, Rowan Co., N. C. Leonard D. Baldwin, president; Wm. M. Richardson, secretary and treasurer; J. C. Kemp Van Ee, managing director; preceding officers, C. Strader Hoyt, E. N. Howell and W. E. Murdock, directors; B. B. Miller, receiver. Organized Feb. 21, 1900, under laws of New Jersey, with capitalization $5,000,000, shares $100 par.

Lands, 1,050 acres, in Rowan and Stanley counties, well watered and timbered, including the Gold Hill mine, where gold was discovered in 1799. Gold-bearing quartz veins were discovered in 1831, and circa 1845 this mine was the largest gold producer in the United States. Property is served by the Southern railroad, and the Yadkin river has 7,500-h. p. available, 17 miles distant.

Development is by shafts of 105′, 150′, 615′ and 830′, estimated to show ore reserves of 60,000 tons, carrying 2.75 to 3% copper, and 60 cents to $1.60 per ton. A carload of ore, shipped early 1908 to the Perth Amboy smelter, assayed 1.5% copper and circa $30 gold per ton, with small silver values.

Equipment includes ten 100-h. p. boilers and a 40-stamp mill. About 75 men were employed, February, 1908.

The company has had a decidedly checkered career. Operations were conducted on a *considerable scale, 1901-1903, employing* 250 men, but financial

GOULBURN COPPER DEVELOPMENT CO. AUSTRA

Mine office: Breadalbane, N. S. W., Australia. Development is on an ore body of some promise.

GOULD COPPER MINING CO. ARIZO

Mine office: Tucson, Pima Co., Ariz. S. H. Gould, president and ge manager; C. E. Hutchison, vice-president; W. H. Daily, secretary; Dr. W Whitmore, treasurer. Capitalization $1,000,000, shares $1 par. Lands claims, in the Tucson Mountains, 18 miles from Tucson, nearest railroad p Lands cover nearly 1 mile of the east and west strike of a mineral zone 2,000′ wide and 5 miles long. Country rocks are limestone, granite and quart Has shafts of 50′, 125′ and 365′, with 2 short tunnels, showing chalcop with quartz gangue, averaging about 3 to 4% copper, 3 oz. silver and gold per ton, with sufficient iron to be self-fluxing. Has about 2,000 ton ore on the dump. Equipment includes gasoline hoist and air-compre Property considered promising.

GOULD ISLAND MINE. ALAS

Mine office: Sulzer, Prince of Wales Island, Alaska. H. R. Gould, o and manager. Lands, 1 claim, area 20 acres, showing a lenticular ore b between hornblende-schist and limestone, up to 40′ in width, giving assay about 6% copper, 1 to 20% lead, 3% zinc, 1 oz. silver and $4 gold per from chalcopyrite, galena and sphalerite. Has tunnels of 60′ and 70′.

GOULD MINING CO. WYOMI

Dead. Formerly at Centennial, Albany Co., Wyo. Described Vol. VII.

GOVERNOR GREENWATER COPPER CO. CALIFOR

Mine office: Greenwater, Inyo Co., Cal. Is controlled, through ow ship of entire stock issue, by Greenwater Copper Mines & Smelters Co. sumably idle.

GRAFTER MINE. YUK

Mine office: White Horse, Yukon, Canada. Robt. Lowe, mana Shipped, 1905, circa 450 tons of ore, of 19 to 30% copper tenor, to var British Columbia smelters, and, for several months, 1907, shipped 25 to tons daily to Tyee smelter. Was reached, 1907, by White Pass & Yukon road. Employs circa 20 men. Production, 1907, estimated at 650,000 lbs. copper.

GRAFTON COPPER MINING CO. AUSTRA

Mine office: Grafton, N. S. W., Australia. Samuel Lee, chairman; W Mulligan, mine manager. Net earnings, 1907, were £14,251, and £11,000 dends were paid. Mine, known as the Cangai, has 2 veins, the south lod 3′ to 10′ width carrying up to 6′ of massive copper sulphides containing gold and silver values. Ore reserves, 1908, estimated at 112,177 long of which 17,000 tons were estimated to carry 10% copper; 23,000 ton carry 6% copper, and 70,000 tons to carry 3.5% copper. Smelter has verberatory furnaces, producing matte, and management plans changing duction to blister copper, in the form of anode bars. Trouble is had in s ing fuel, and water supply is precarious. Company plans building a contrator and installing electric power. Production, 1907, was 7,665 long of ore, of which 3,535 tons were smelted to matte, containing 790,840 lbs copper, 2,816 oz. silver and 176 oz. gold. Company apparently lacks fina strength, but property is of considerable promise.

GRAHAM COUNTY MINING CO.

Office: 1509-20 Broad St., New York, N. Y. Mine office *Co., Ariz.* John W. Manning, president; Schuyler S. *treasurer;* "Prof." Geo. A. Treadwell, consulting e *$250,000,* shares $10 par. Lands are gold-copper clai

on which the company claims to have expended upwards of $100,000 in development work. Idle for several years and apparently moribund.

GRAHAM COUNTY MINING & SMELTING CO. **ARIZONA.**

Mine office: Safford, Graham Co., Ariz. H. N. Chlarson, president. Lands, 13 claims, west of the Rex Cobre. Idle.

GRANADEÑA MINING CO. **MEXICO.**

Mine office: Santa Barbara, Hidalgo, Chihuahua, Mex. Lands, 3 miles northeast of Santa Barbara, show argentiferous and auriferous chalcopyrite, galena, sphalerite and pyrite.

GRANBY CONSOLIDATED MINING, SMELTING & POWER CO., LTD. **BRITISH COLUMBIA.**

Office: 733-52 Broadway, New York, N. Y. Mine office: Phœnix, Boundary district, B. C. Works office: Grand Forks, Boundary district, B. C. Employs about 900 men, of whom approximately 500 are at the mine, and 400 at the smelter. Jacob Langeloth, president; Jay P. Graves, vice-president and general manager; Geo. Martin Luther, second vice-president; Geo. Crawford Clark, Jr., third vice-president; preceding officers, Geo. Crawford Clark, Henry Lee Higginson, B. Hochschild, Wm. H. Nichols, W. H. Robinson, Sanford H. Steele, Edwin Thorne, A. L. White, Payne Whitney and Wm. A. Nash, directors; Northrup Fowler, secretary; G. W. Wooster, treasurer; A. B. W. Hodges, local manager; Wm. Yolen Williams, consulting engineer; O. B. Smith, Jr., mine superintendent; W. A. Williams, smelter superintendent; J. C. McDonald, master mechanic; C. M. Campbell, engineer.

Organized March 29, 1901, under special act of the Provincial Parliament of British Columbia, with capitalization $15,000,000, shares $10 par, changed, 1906, to $15,000,000, shares $100 par, 1 share of new stock being issued for 10 of old. Issued, $13,500,000. Stock is listed on the Boston stock exchange. Fiscal year ends June 30. Boston Safe Deposit & Trust Co., registrar; American Loan & Trust Co., Boston, and Title Guaranty & Trust Co., New York, transfer agents. Annual meeting, first Tuesday in October.

Regular dividend rate is 8%, or $2 quarterly. First dividend, 1%, was paid Dec 16, 1903, and dividends have been as follows: $133,630.30 in 1903; none in 1904; $399,991 in 1905; $1,620,000 in 1906, and $1,215,000 in 1907. Dividends were resumed June, 1908, with a declaration of $2.

Lands, 43 claims, area 1,100 acres, crown-granted, also 500 acres of mill and smelter sites, and 500 acres miscellaneous lands, principal properties being in the Osoyoos mining field, Boundary division, Yale district of British Columbia, very near the United States line. Lands include the Old Ironsides, Knob Hill, Victoria, Grey Eagle, Banner, Tip Top, Triangle, Gold Drop, Curlew, Monarch, Tamarack, Monte, No. 13 and other claims and groups, forming a compact tract of about 8,000′ by 9,000′, giving nearly 2 miles of the strike of the mineralized zone. Miscellaneous landed holdings include a 61-acre limestone quarry, for flux, several hundred town lots, at Grand Forks and Phœnix, and 500 acres of land at Carson, British Columbia.

The property shows diabase and tuffs carrying two wide ore bodies in quartz-diorite, which apparently are altered volcanic tuffs, main ore body having an approximately north and south strike, with a surface dip of 60° to the eastward, and somewhat flatter dip at depth. The main ore body is stated by company as of 80′ average width, which is an ultra-conservative estimate, as actual figures of width are 100′ to 400′, with an average of nearly quite 200′. The main ore body has been developed for about 4,000′ in length, and opened to depth of 900′, while its continuity has been proven, by diamond drill borings, to depth of 1,100′. *To May 1, 1908, the company had drilled 29,117′ of holes. Ore is exclusively chalcopyrite, averaging about 1.7% copper only, with an average of 0.4 oz. silver and $1.50* gold per ton. The

carries 35 to 40% silica, 14 to 17% iron, 18 to 20% calcium carbonate, 3 to sulphur and circa 7% alumina and 7% magnesia, constituting an almost i self-fluxing ore.

The mine is opened by shafts of 200′, 400′, 350′, 500′ and 100′, the Victo Ætna and Monarch being the more important, and by tunnels of 1,500′, 3,(3,000′, 2,500′, 900′, 500′ and 800′, with about 11 miles of underground worki Principal extraction, however, is from immense open-pits, or glory-holes, great width of the ore body rendering open-cast extraction advisable. underground openings, 1907, were 9,701′. The largest pit is 400x1,000′ in a and the plans of the company practically call for the mining off of an en mountain. Ores stoped on the various tunnel levels are milled, thro chutes, to lower levels, with electric haulage on the 200′, 300′ and 400′ le which are double-tracked and have 75-h. p. motors drawing 10-ton ore These tunnels are equipped, at their portals, with ore-crushers and bin 2,000 to 3,000 tons capacity each, there being 3 crushers of 150 tons ho capacity each. No. 3 tunnel has a 22x55′ crusher-house, with a 30x42″ Fa Bacon crusher driven by a 100-h. p. electric motor, capable of breaking ma of nearly a cubic yard in size to chunks not larger than 7″ to 8″. The 3 h crushers weigh 113,000 lbs. each, and have frames of semi-steel, with a te strength of 32,000 lbs. to the square inch.

No. 1 shaft is being broken into an open pit, and the shafthouse has b demolished.

No. 2 shaft has a 12x16″ double cylinder hoist.

The 3-compartment Victoria shaft, 400′ deep, is the main working s of the mine. Ore is raised by a 250-h. p. electric hoist, operating 7-ton s in counterbalance, and the shaft has a daily productive capacity of 3,000 t Equipment at the Victoria includes a 250-h. p. Rand double-conical-drum h good for 1,000′ depth, driven by a Westinghouse 3-phase variable speed duction motor, and an air-compressor. The Victoria equipment includ crusher of 150 tons hourly capacity, conveyor and 3,000-ton bins, conne with the Canadian Pacific and Great Northern railways.

The Gold Drop-Curlew group has been developed extensively, sho good ore bodies, and is being equipped very substantially for a large duction.

The Independence group, at the head of Bear Creek, in the Similkam district, held under a $100,000 bond, has a vein in schist and granite, tra 1,000′, carrying mainly low grade ore, with some chutes of ore of higher gr in copper, with fair gold and silver values. The ore of the Independence much similar to that of the main group of the Granby.

Ore reserves of the Granby were estimated, 1904, by the company, 20,000,000 tons, but actually were much larger, and since have been added greatly. Ore is handled automatically, from the time of blasting until blister copper is ready for shipment at the smelter, without being touched human handls.

Electric power is used throughout the mine and works, about 2,000 h being required at the mine, and 3,000 h. p. at the smelter. Commercial rent is taken from the West Kootenay Power & Light Co., which has a hyd electric installation at Kettle Falls, on the Columbia river, in Washington.

Equipment at the mine, from the plan of operations, which provides extraction mainly from open-cast workings and through tunnels, is adequa but by no means comparable to most large copper mines, which are under necessity of hoisting practically all of their ore through shafts. Equipm includes two 200-h. p. and two 250-h. p. hoists, good for 1,000′ depth ea *The compressor* house, 60x121′ in size, has 2 electric air-compressors, the lar *of 60-drills* capacity, both machines being driven electrically, by rope tra

mission, from two 700-h. p. Westinghouse type C induction motors. The principal compressor is a 60-drill Rand tandem-compound engine, with 16x30" high-pressure cylinders and 28x36" low-pressure cylinders, with piston efficiency of 6,000 cubic feet of free air per minute, at 70 lbs. pressure.

Mine buildings include a 40x80' machine shop, 40x50' smithy and a 40x40' carpenter shop, all of wood. The company owns 20 dwellings and 2 hotels at Phœnix, the Granby hotel being a 3-story structure with electric light and steam heat, costing $25,000.

The mine is connected with the smelter, 24 miles distant, by 2 railways, the Canadian Pacific and the Great Northern. By means of extensive ore-bins at the Victoria shaft and various tunnels, a train of 35 thirty-ton cars can be loaded in 25 minutes, or less.

The smelter is much the largest and best in Canada, and among the reduction plants of the world is second only to the great Washoe works of the Anaconda, being of about the same size as the smelters of the Copper Queen and Boston & Montana. The plant is of 5,000 tons daily capacity, and has been enlarged repeatedly, with every prospect that eventually it will reach a capacity of not less than 10,000 tons daily. The smelter works 8-hour shifts.

The works have steel bins with storage capacity for 8,000 tons of coke and 13,000 tons of ore. Charging is by 4 electric locomotives, each drawing two 2-ton cars, constituting a single charge. The ore is practically self-fluxing, and with the addition of a little limestone and necessary fuel is charged as it comes from the mines, without concentration or assortment.

The steel blast-furnace building, rebuilt 1907, had six 44x160" furnaces, of 300 tons daily capacity each, and two 48x208" furnaces, latter added in 1905. The 6 old furnaces were rebuilt first to size of 44x212", and in 1908 were rebuilt again, with an addition of 4' 4" in length, rendering them 44x264" in length, and the 2 larger furnaces were rebuilt to size of 48x264", giving an average daily capacity of 625 tons for each of the 8 furnaces.

The furnace building has a brick dust-flue, 10x11x800', and a steel dust-chamber was added, 1907. This sets 22' above the feed floor, on foundations of steel columns, masonry and concrete, and is 13' wide, 15' high and 313' long, with a floor of 28 hoppers, having a conveyor underneath for flue-dust. Slags, formerly granulated, are now dumped hot, by 8x14" locomotives traversing a 36" slag-line.

The first fusion product is a 40% matte, which is taken, in ladles, by a 30-ton electric traveling crane, to the converter building, of steel, 68x240' in size, which stands 100' from the cupola building. The old converter department had 3 stands, with shells 70x100", which have been replaced by 4 stands, each operated electrically by a 25-h. p. motor, and ten 96x132" shells. There are 3 mould carriers under each stand, and product is a blister copper of 99% metallic tenor, including an average of 40 oz. silver and 7 oz. gold per ton, which is sent to the Laurel Hill works of the Nichols Copper Co. for electrolytic refining and parting of gold and silver values. The lining department, in the converter building, has a crusher and 2 silica mills.

The power house at the smelter, remodeled 1907, has brick walls and a steel roof. Electric power is used throughout, equipment including 9 small blowers and 2 Connersville Jumbo blowers, with capacity of 100,000 cubic feet of free air per minute, driven by two 300-h. p. motors. Converter blast is furnished by an Allis-Chalmers double-cylinder air-compressor, with capacity to reduce 10,000 cubic feet of free air per minute to pressure of 15 lbs. per square inch, driven by a 500-h. p. direct-connected electric motor. Old blast-pipe lines have been replaced by new pipes of much greater capacity.

Miscellaneous buildings at the smelter include a warehouse, roundhouse

and shops, of steel frame. There also is a 100,000-gallon steel storag for water.

One of the principal disadvantages under which the Granby has la almost from the start, has been an inadequate coke supply. To obviat trouble the International Coal & Coke Co. was organized, 1903, with a talization of $3,000,000, by practically the same shareholders as those Granby, though the corporations are distinct. This company has ext deposits of high grade coking coal, at Blairmore, Alberta, assuring the G a fairly regular supply of coke, barring labor troubles and accidents, t fuel shortages continue a disturbing factor in the operation of the smelte

For fiscal years, ending June 30, net profits have been as fol $712,649 in 1905; $1,823,617 in 1906; $1,924,937 in 1907; $606,522 in The expenditures for the fiscal year 1908 included $242,574.50 for con tion and equipment, at the mines and smelters, and $23,742.65 for pur of lands. The company's net surplus, 1908, was $2,455,180.77, incl $421,625.01 cash and copper, and $1,008,012.68 in stocks, bonds and bil ceivable.

Production, for fiscal years ending June 30, has been as fol 14,237,622 lbs. fine copper, 212,180 oz. silver and 42,884 oz. gold in 19,939,004 lbs. copper, 316,947 oz. silver and 50,020 oz. gold in 1906; 16,4 lbs. copper, 257,378 oz. silver and 35,083 oz. gold in 1907; 21,162,926 lbs per, 300,593 oz. silver and 40,139 oz. gold in 1908. The production for year 1908 was secured from 854,432 dry tons of Granby ore, and 24,17 of custom ore smelted. Production for calendar year 1907 was 15,514,00 fine copper, compared with 19,563,949 lbs. fine copper for calendar year Net cost of copper, after deduction of gold and silver values, was 8.35 per pound for fiscal year 1906; 10.14 cents per pound for fiscal year 190 10.24 cents per pound for fiscal year 1908. The Granby has by no reached its productive limit, and while it may take some years to rea output of 50,000,000 lbs. fine copper, this figure would seem reasonably to predict. The property, while very low in grade, has remarkably cheap for mining and smelting, due partly to nature and partly to good manage and the ore reserves are among the greatest in the world. The manag is thoroughly efficient and capable in all departments.

GRAND ARIZONA COPPER CO. ARIZ

Letter returned unclaimed from former mine office, Douglas, Cochis Ariz. Lands, near Douglas, are said to be extensive, and, 1907, were explored for copper.

GRAND CANYON COPPER CO. ARIZ

Dead. Formerly at Grand View, Coconino Co., Ariz. Described Vol

GRAND CENTRAL MINING CO. ARIZ

Office: 43 Exchange Place, New York, N. Y. Mine office: T Pima Co., Ariz. Geo. H. Daily, president; Chas. Peck, secretary; Fre Kopper, Jr., treasurer. Capitalization $1,000,000, shares $1 par. Lan claims, 14 miles northwest of Tucson, in the Tucson Mountains, having shaft, with about 300′ of workings, showing auriferous and argentif copper and lead ores.

GRAND CENTRAL MINING CO. U

Provo, Utah. Mine office: Robinson, Juab Co., Utah. Lafayette brook, president; C. E. Loose, manager; Patrick Donnelly, superinten Organized under laws of Colorado, with capitalization $250,000, shares $1 and paid dividends, to end of 1905, of $986,250. Mine carries mainly s *lead ore*, with appreciable values in copper, and is an old property, extens *developed*, and a considerable producer. Output, 1907, was 284 carloads o

GRAND CONSOLIDATED DEVELOPMENT CO. **ARIZONA.**

Office: care of Col. John T. Fireh, secretary, Oakland, Cal. Mine office: Kingman, Mohave Co., Ariz. Geo. W. Brown, president and treasurer; Dr. John T. Davis, vice-president and manager. Mine has veins of 3' to 60' width, carrying gold, silver and copper ores, with quartz gangue, and has secured assays up to 34% copper, 9 oz. silver and $12 gold per ton. Also has claims near Cerbat, opened by tunnel, giving ore assaying 70% lead, 12 oz. silver and $1 gold per ton.

GRAND DEPOSIT COPPER CO. **NEVADA.**

Mine office: Cherry Creek, White Pine Co., Nev. John Stanton, president; J. S. Page, secretary; Pierre de P. Ricketts, treasurer. Organized 1903. Lands, known as the Grand Deposit group, are said to show considerable ore bodies, giving assays of 7 to 12% copper. Idle.

GRAND GULCH COPPER MINING CO. **ARIZONA.**

Office: care of Messrs. Schirmer, Chapin & Emmons, 79 Milk St., Boston, Mass. Mine office: St. George, Washington Co., Utah. Samuel Newhouse, general manager; Isaac Jennings, superintendent. Property, in Coconino county, in the extreme northern part of Arizona, is more accessible from Utah than from southern or central Arizona. Mine has auriferous and argentiferous copper ores, with a 370' main shaft. Shipment of 1,000 tons of ore to Salt Lake smelters gave average returns of 48% copper, netting $99,970. Ore was carefully selected, and hauled 140 miles by wagon. Equipment includes gasoline power and a small and antiquated smelter.

GRAND GULCH MINING CO. **ARIZONA.**

Dead. Succeeded by Grand Gulch Copper Mining Co. Formerly at St. George, Washington Co., Utah.

GRAND JUNCTION SMELTING CO. **COLORADO.**

Letter returned unclaimed from former office, 79 Milk St., Boston, Mass. Works office: Grand Junction, Mesa Co., Colo. I. N. Patterson, president; J. T. Everard, secretary; Thos. Osborne, superintendent. Property is a 125-ton smelter, incomplete, which it was planned to blow in, 1905. Is closely related to Eastern Slope Copper Mining & Smelting Co. Management apparently inexperienced and reckless. Property mortgaged, and company's affairs apparently hopelessly involved.

GRAND LA SAL MINING CO. **UTAH.**

Office: Provo, Utah. Mine office: Castleton, Grand Co., N. M. Jacob Ivins, president; J. W. Beasley, vice-president; J. F. Van Wagenen, secretary and treasurer. Organized circa December, 1906, with capitalization $50,000. Lands, in the La Sal Mountains, have circa 250' of workings, showing auriferous and argentiferous lead and copper ores.

GRAND MARAIS COPPER MINING CO. **MINNESOTA.**

Dead. Formerly at Grand Marais, Cook Co., Minn.

GRAND MOUNT LYELL COPPER CO., LTD. **TASMANIA.**

Mine office: Mt. Lyell, Montagu Co., Tasmania. Lands, sundry claims, in Sections 68, 789 and 1674, slightly prospected. Idle several years and apparently moribund.

GRAND NATIONAL SMELTING CO. **MEXICO.**

Mine office: San Juan de Allende, Rio Grande, Coahuila, Mex. The property, known as La Reforma, carries auriferous copper ore.

GRAND PRIZE COPPER MINING CO. **ARIZONA.**

Dead. Lost lands, 1902. Formerly at Payson, Gila Co., Ariz.

GRAND RAPIDS COPPER CO. **WYOMING.**

Dead. Sold lands to *Saginaw Valley Copper* Mining Co. Formerly at Saginaw, Carbon Co., Wyo.

GRAND REEF COPPER MINING CO. A

Office: care of Clarence H. Mackay, 253 Broadway, New Yo
Mine office: Aravaipa, Graham Co., Ariz. Large sums were expend
velopment and equipment, latter including a 3-stamp mill and 90-to
Idle for some years.

GRAND REPUBLIC COPPER MINING CO. CO

Office: 52-240 La Salle St., Chicago, Ills. Letter returned unclai
former mine office, Pearl, Larimer Co., Colo. W. A. McGuire, preside
Boisot, secretary and treasurer. Organized 1902, under laws of
with capitalization $1,500,000, shares $1 par. Is controlled by Sta
velopment Co. Lands, 7 claims, area 70 acres, in the Big Horn
miles south of Pearl, showing a 3′ paystreak, carrying some native
a schistose vein, cut at depth of 130′ by a 200′ shaft. Also has
ore body. Idle several years and is not regarded favorably.

GRAND TRAVERSE & ARIZONA MINING CO. A

Office: 129 East Front St., Traverse City, Mich. Letter ret
claimed from former mine office, Cave Creek, Maricopa Co., Ar
Smurthwaite, president; Geo. R. Ray, vice-president; Herbert Mont
retary and treasurer; preceding officers, Wm. Newman and Walter E
directors; Chas. F. Smurthwaite, general manager; A. Scharingron, m
intendent. Organized May 6, 1903, under laws of Arizona, with cap
$2,000,000, shares $2 par; issued, $1,670,000. Annual meeting, secon
in January.

Lands, 33 claims, area circa 660 acres, showing talcose and mi
the northern portion carrying a number of stringers and small veins,
erly portion showing one vein of 12′ to 15′ width, with a number
stringers, in diorite, carrying oxidized ores and sulphides, with so
on the northern part of the property, and native copper in the
mine. Development is by shafts of 70′, 392′ and 167′, with 105′ an
nels, estimated to show 17,000 tons of ore, with 2,000 tons blocke
which the bulk is leached ore, running 1 to 4% copper, with about
estimated by company to average 6 to 30% copper, circa 37.5 oz.
$30 gold per ton. Has a small steam plant, with 2 hoists, and sev
mine buildings. Nearest railroad is 35 miles. Company plans cont
velopment.

GRAND VIEW MINING CO. WASH

Dead. Lands sold, early 1907, to Night Hawk Mining Co. Fo
Loomis, Okanogan Co., Wash.

GRANDVIEW MINING & MILLING CO.

Office: care of L. W. Dutro, Memphis, Tenn. Is said to have
Utah, near the Colorado line, from which ore giving good assay valu
silver and copper has been secured. Idle.

GRANITE CREEK SMELTING & REDUCTION CO.

Dead. Formerly at Golconda, Humboldt Co., Nev.

GRANITE WELLS MINING CO. CAL

Office: 716 Lankershim Bldg., Los Angeles, Cal. Mine office:
San Bernardino Co., Cal. Lands show a stained quartzite capping, o
width, standing about 30′ above surface for 200′, underlaid by what
pany terms a pipe vein, of 2″ to 2′ width, between quartzite and syen
ing very rich ores, mainly cuprite, assaying 17 to 30% copper in
levels, turning to sulphide ore at depth of 250′. Company claims to
tons of very rich ore on the dump. Presumably idle.

***LA GRAN* PROVEEDORA DE COBRE, S. A.**

Is the Mexican incorporation of the Arizona-Mexican Copper C

GRANT CONSOLIDATED COPPER MINING CO. **WASHINGTON.**

Office: care of Geo. A. McLeod, Spokane, Wash. Mine office: Chesaw, Okanogan Co., Wash. A. D. McPhee, superintendent. Organized 1907, under laws of Washington, with capitalization $1,650,000. Is said to have expended about $90,000 on the property. Lands, 14 claims, on Copper Mountain, near Chesaw, opened by tunnel planned to be driven 1,500', cutting 2 strong veins of medium grade chalcopyrite, showing considerable ore. Shipped some ore, 1907, to Granby smelter, running about 6% copper and $4 gold per ton. Property considered promising.

GRANT COPPER MINING CO. **COLORADO.**

Dead. Formerly at Pearl, Larimer Co., Colo. Described Vol. VI.

GRAPHIC MINE. **NEW MEXICO.**

Office: care of Sherwin-Williams Paint Co., owner, Cleveland, Ohio. Mine office: Magdalena, Socorro Co., N. M. Jos. Brown, superintendent. Mine is opened by tunnel, showing a 65' vein with a 12' paystreak claimed to average 13% copper, which obviously is erroneous, ores being mainly smithsonite and galerite, with some cerussite and argentiferous galena, and occasional cuprite and native copper. Ores are mainly low in grade, requiring concentration. Property, worked for zinc, has an ore chute, of about 400' length, on the seventh, eighth and ninth levels, which is fully 100' wide on the ninth level. Shipped, 1907, a considerable tonnage of lead and zinc carbonates, lead ores going to the Luna Lead Co., at Deming, N. M., and zinc to the company's works, at Joplin, Mo.

GRASLITZER KUPFERBERGBAU. **AUSTRIA.**

Mine office: Eilenberg, Bohemia, Austria. Mines, which are very ancient, and were one of the principal sources of European copper supply during the Middle Ages, show a vein of 12' to 15' width, in clay-slate. Mines were reopened on a considerable scale, and a new smelter built, 1901, but have been idle for several years.

GRATIOT MINING CO. **MICHIGAN.**

Office: 12 Ashburton Place, Boston, Mass. Operating office: Calumet, Mich. Mine office: Mohawk, Keweenaw Co., Mich. Quincy A. Shaw, Jr., president; Rudolph Agassiz, vice-president; Geo. A. Flagg, secretary and treasurer; Jas. MacNaughton, general manager; preceding officers, Alexander Agassiz, Francis L. Higginson and Francis W. Hunnewell, directors. Organized Feb. 16, 1906, under laws of Maine, with capitalization $300,000, shares $5 par, fully paid. Is controlled, through ownership of stock, by Calumet & Hecla Mining Co. Ended fiscal year Apr. 30, 1908, with $12,213 cash and accounts receivable, with a debit to profit and loss of $68,654.

Lands, 600 acres, being the NW. ¼ of Section 26, NW. ¼ of Section 27, NW. ¼ of Section 23, and SE. ¼ of Section 22 except the NW. ¼ of the NW. ¼. Property lies south and east of the Seneca, and north and east of the Mohawk. Extensive diamond drill borings were made before shafts were started, and the property was found to carry the northern extension of the Kearsarge amygdaloid.

Development is by two 3-compartment shafts, exact duplicates, 9x22' inside of timbers, with ladderways in the middle, sunk at an angle of 36° on the Kearsarge bed, two shafts being sufficient to develop the entire tract. Levels are opened at 100' intervals.

No. 1 shaft is circa 620' deep, at the fifth level, and has a half-mile or more of drifts.

No. 2 shaft, 1,475' southwest of No. 1 and circa 2,000' north of the Mohawk boundary, is 720' deep, at the sixth level, with a fair showing of copper on the fifth level.

Shafts have duplicate equipment, including duplex-cylinder Lidgerwood

hoists, with 5′ drums, good for one-half mile each, and 15-drill air-compr... Each shaft has a single-compartment shaft-rockhouse, which can be enla... later, and stamp rock broken in development is put through crushers stocked. Buildings include a 30x40′ power-house, smithy, boarding house, Property considered promising, and management excellent.

GRAY COPPER MINING CO., LTD. **IDA...**

Mine office: Osburn, Shoshone Co., Idaho. W. H. Herrick, mana... Lands, on McFarren Gulch, 12 miles south of Osburn, show an ore body u... 12′ in width, carrying mainly argentiferous gray copper, and a 12″ vein c... ing high grade auriferous and argentiferous copper ore. Company plans s... ping ore.

GREAT AUSTRALIAN MINE. **AUSTRA...**

Mine and works office: Cloncurry, Beaconsfield Co., Queensland, Austr... Lands, west of Cloncurry, show a vein up to 15′ width, carrying a 3′ payst... of silicious sulphides ranging in copper tenor from 3 to 15%. Equipmen... cludes a 6-drill Schram air-compressor.

The smelter, built 1907, has 25-ton reverberatory furnace, and a b... furnace, blown in circa July, 1908, has 2 Connersville blowers, product b... matte of about 70% copper tenor. Production, 1907, was circa 100,000 ... fine copper, and for May, 1908, was about 80,000 lbs. fine copper.

GREAT BELCHER OF ARIZONA CO. **ARIZ...**

Office: 519-10 Wall St., New York, N. Y. Mine office: Provide... Yavapai Co., Ariz. Isaac W. Mason, president and treasurer; Henry B. ... ford, vice-president; P. H. Noel, secretary; T. S. Henderson & Co., ... agents; Geo. Rehpeter, superintendent. Organized under laws of Arizona, ... capitalization $5,000,000, shares $1 par, as a merger of the Great Belcher ... & Copper Co., Bullwhacker Mining Co., Empress Mining Co., Sunlight Mi... Dead. An abortive merger of properties later merged as the Great Bel... of Arizona Co. Formerly at Providence, Yavapai Co., Ariz.

GREAT BELCHER GOLD & COPPER CO. **ARIZ...**

Dead. Merged in Great Belcher of Arizona Co. Formerly at Provid... Yavapai Co., Ariz.

GREAT BEN HUR COPPER MINING & DEVELOPMENT CO., N. L. **AUSTRA...**

Mine office: Condobolin, Cunningham Co., N. S. W., Australia. Or... ized circa March, 1908, under laws of New South Wales, with capitaliz... £1,920, shares £15 par. Lands are at Burra Burra, near Condobolin.

GREAT CENTRAL MINE. **AUSTRA...**

Mine office: Mt. Hope, Blaxland Co., N. S. W., Australia. Lands, ... acres, at South Mt. Hope, showing large bodies of low grade ores, which ... oxides and carbonates to about 200′ depth, succeeded by chalcopyrite. ... dized ores have a decomposed porphyry gangue, sulphide ores occurrin... brecciated porphyry. Has steam power and a small smelter, but in oper... was hampered by a precarious water supply. Production, 1898, was 24... lbs. fine copper. Idle since 1903.

GREAT CENTRAL FREEHOLD MINES, LTD. **AUSTRA...**

Dead. Voluntarily liquidated, 1903. Formerly at Mt. Hope, Blaxland, *N. S. W., Australia.*

GREAT COBAR COPPER MINING SYNDICATE. **AUSTRALIA.**

Dead. Property was sold, 1906, to Great Cobar, Ltd. Formerly at Cobar, Robinson Co., N. S. W., Australia. Very fully described Vol. VI.

GREAT COBAR, LTD. **AUSTRALIA.**

Office: 65 New Broad St., London, E. C., Eng. Mine office: Cobar, Robinson Co., N. S. W., Australia. Works office: Lithgow, N. S. W., Australia. Employs 1,300 men. Andrew Haes, chairman; John D. Kendall, consulting engineer; preceding officers, Wm. Rich, R. H. Henning, W. A. Horn, T. M. Joseph Watkin, Gerard B. Elkington, J. P., and G. E. Baker, directors; Alexander Johnston, secretary; Geo. H. Blakemore, general manager; V. Farrier, mine superintendent; O. E. Iaeger, smelter superintendent.

Organized May 22, 1906, under laws of Great Britain, with capitalization £750,000, shares £5 par, fully issued. Debentures authorized, £750,000, first mortgage, at 6%, in denominations of £20, £50 and £100, redeemable by drawings at 5% premium, but repurchasable by means of a sinking fund, created 1908, by setting aside £100,000 annually from profits; issued, £550,000. A 15% dividend, amounting to £112,500, was paid Sept. 16, 1907. Net profits for first year were £238,431.

Property was bought May, 1906, of the Great Cobar Copper Mining Syndicate, but not taken over until September, 1906, for £1,006,000, of which £800,000 cash, was paid for the property, the promoters taking £206,000 in ordinary shares and debentures.

Lands, 577 acres, freehold, including the Great Cobar mine, 208 acres leasehold, including the Cobar Chesney mine, and a 12-acre smelter site, with total holdings of 1,263 acres. Property includes the Great Cobar, Cobar Chesney and Great Peak mines, latter a gold property at Cobar. The company also owns and operates the Rix's Creek colliery, producing good coking coal, and smelting and refining works at Lithgow. There was some trouble, 1906, over a block of 40 acres of ground, in the main tract, said to have been lost through oversight, though formerly part of the Great Cobar property.

The Great Cobar, which is the most important copper mine of New South Wales, was opened 1869, and closed 1892, after failure to reduce sulphides in a reverberatory furnace. Production, 1869-1892, was 26,611 tons fine copper, made from rich oxides, ores averaging 11.07% in copper tenor, and considerable dividends were paid therefrom. Mine was reopened, 1892, by tributors, on a 21-year lease, and at the close of 1902 had produced, under their management, 720,669 tons of ore giving average returns of 3.27% copper. A long-standing dispute between the tributors and the fee-owners was settled, 1903, through the purchase of the property by the former, who sold to the present syndicate.

Country rock, of Silurian clay-slate, shows 3 veins, of nearly vertical dip, known as the East, Middle and West lodes, principal workings being on the latter, which ranges 6" to 100' in width, carrying lenticular ore bodies. One of the principal parallel mineral zones is basic and the other acid, these lying about one-half mile apart. The principal ore bodies are 28', 38' and 52' in extreme width, with lengths of 135', 345' and 485', proven to depth of 1,000'. The oxidized zone extends to an average depth of about 250', below which the ore is mainly chalcopyrite, associated with pyrite and magnetite, with occasional bornite in the Great Cobar mine, ore being highly silicious and somewhat siliceous, of about 3.5% average copper tenor in the Cobar and 2.81% in Chesney, carrying an average of 0.5 oz. silver and 1.5 dwts. gold per ton. The Cobar Chesney, now worked in connection with the Great Cobar, shows a lenticular chute of 36' width and about 105' length, opened to 600', ore being chalcopyrite, with slate and quartz gangue.

Ore is won by *overhand stoping, with 10' pillars* left beside the shafts,

and timbering is by bulkheads filled with waste, this being known locally the "pigstye" system. Ore is first broken in immense masses, then redu to smaller size by block-holes and pop-shots. No. 1 shaft of the Cobar, 15 x 7 in size, is 1,000' deep, and the Barton shaft is of the same depth, these sh being connected by a drift, on the 1,000' level, which shows a strong vein to 5% in copper tenor. The mine has about 3 miles of workings.

The Cobar Chesney was opened as a gold mine, the outcrop carrying copper, but carbonate ore was found at depth of 155', and at 250' there chalcopyrite, coated with what was termed melaconite, but which prob was chalcocite. Main shaft, 697' in depth, shows ore carrying 2 to 8% cop and up to 3 dwts. gold per ton, with an estimated average tenor for the en Cobar Chesney mine of 2.81% copper.

Mr. Kendall estimates reserves of 1,500,000 long tons of ore blocked ou the Cobar, and 500,000 tons in the Cobar Chesney, besides 200,000 tons of near surface in the Great Cobar.

The Peak, or Great Peak, gold mine has a stamp-mill, and as the or silicious and free from iron and sulphur, it would seem a highly suitable for the basic ores of the Cobar and Cobar Chesney mines.

Buildings at the mines include wooden carpenter and machine sh smithies, offices and other necessary mine structures.

The company uses about 3,000 h. p. at the mine and smelter, inclu steam and electric installations, and has a 500-h. p. first-motion hoist, good 2,000' depth, at the "New" shaft, and two 25-drill air-compressors. boiler plant has Green fuel economizers, and, the district being arid, cau much trouble in dry seasons from lack of water, a 100,000,000-gallon dam been built, water costs averaging about 8s. per thousand gallons, and a sec dam, of 80,000,000 gallons capacity, was begun, 1908.

The reduction plant, at the mine, begun 1907, is planned to cost £100,000, and eventually will include a 250-ton sampling mill, for custom

The dressing plant has 2 centrifugal Heclon crushers, each of 120 hourly capacity, delivering ore to electrically driven belt-conveyors, wh take it to a 1,500-ton ore-bin, whence it is loaded into 30-ton cars and dr by electric locomotive to the main storage plant. The Cobar Chesney ha 10-stamp mill and 25-ton concentrator.

The smelter, of 1,000 tons daily capacity, has three 500-ton water-jac blast-furnaces, one being held in reserve, as a spare. Fuel is coke and c The converter department has 2 stands, with 84x126" shells of the Cop Queen type. Blast is supplied by 3 Connersville blowers, and it is plan handling slags with electric locomotives. Product of the smelter is blis copper, sent to the company's refinery at Lithgow.

The Lithgow works have five 100-ton water-jacket blast-furnaces, reverberatory furnaces. An electrolytic refinery, installed 1902, treats, in ad tion to the company's blister copper, material from other properties.

From 1876 to 1906, inclusive, the Great Cobar mine produced 1,592,895 l tons of ore, and made therefrom 61,872 long tons fine copper. Producti 1905, was 9,076,480 lbs. fine copper, and for 1906 was 9,027,200 lbs., and 1 is said to have shown a slight increase. From May 6, 1906, to Dec. 31, 19 production was 13,695,360 lbs. fine copper, 104,292 oz. silver and 17,166 gold, secured at a net profit of £238,431. For month ending Nov. 20, 1907, smelter treated 15,380 tons of ore, producing 365 long tons of copper, ci 5,600 oz. silver and circa 100 oz. gold, showing an average copper extract of 2.37%. The company plans bringing its ultimate production to ab 30,000,000 lbs. yearly. With ore secured under modern methods, and w good mining and smelting equipment, the property should earn substan *profits.*

GREAT COBAR NORTH, LTD. **AUSTRALIA.**

Offices: 26 Victoria St., London, S. W., Eng., and Equitable Bldgs., Sydney, N. S. W., Australia. Mine office: Cobar, Robinson Co., N. S. W., Australia. Maj.-Gen. Sir W. H. R. Green, K. C., chairman; D. A. Sutherland, manager; J. Delohery, mine manager; T. Carter, secretary. Organized Nov. 15, 1906, under laws of Great Britain, with capitalization £350,000, shares £1 par. Lands, 286 acres freehold, and 400 acres leasehold, adjoining the Great Cobar, Ltd., opened to depth of 500′, with crosscutting in progress at last accounts. Took over machinery of Australian Mining Estates, Ltd., also the 60-stamp mill of the Occidental gold mine, 3 miles from Cobar.

GREAT CONDURROW TIN & COPPER MINING CO., LTD. **ENGLAND.**

Dead. Dissolved, Jan. 13, 1905. Formerly at Camborne, Cornwall, Eng.

GREAT DIVIDE GOLD CO. **CALIFORNIA.**

Dead. Formerly at Redding, Shasta Co., Cal.

GREAT DIVIDE MINES CO. **UTAH.**

Office: 14 West First South St., Salt Lake City, Utah. Mine office: Lincoln, Tooele Co., Utah. Henry A. McCornick, president; Walter A. Cooke, vice-president and manager; Joseph H. Hurd, secretary; Rodney T. Badger, treasurer; John B. Taylor, superintendent. Organized Aug. 15, 1903, under laws of Utah, with capitalization $2,000,000, shares $5 par. Lands, 40 claims, about half patented, area 560 acres, also a 10-acre millsite, fairly timbered, showing fissures in and contacts between limestone and Cambrian quartzite, of which the main vein is said to range 12′ to 50′ in width, carrying ores said by company to assay 6 to 20% copper, 2 to 100 oz. silver and from a trace to $50 gold per ton. Development is by a 1,300′ tunnel. Development was begun 1903. Property considered promising.

GREAT FITZROY GOLD & COPPER MINES, LTD. **AUSTRALIA.**

Mine office: Mt. Chalmers, Queensland, Australia. C. H. James, superintendent. Organized 1907, under laws of Queensland, with capitalization £500,000; issued, £375,000. Mine, formerly known as the Mount Chalmers, has two-compartment shafts of 225′ and 240′. Vein on the 150′ level is 120′ wide and 250′ in known length, mine having estimated reserves of 600,000 long tons of ore averaging about 3 to 4% copper and 3 dwts. gold. Has a steam plant with 20-drill and 8-drill air-compressors.

The smelter has a 100-ton water-jacket blast-furnace, making matte, shipped to Mount Morgan for reduction. In May, 1908, the smelter treated 1,710 long tons of ore, yielding 73 long tons of copper and 378 oz. gold, costs being 5s. 11d. per long ton for mining, 9s. 11d. for smelting, and 11d. general expenses, or total costs, exclusive of development, of 31s. 6d. per ton of ore. Mine and works employ about 100 men. Production, 1907, is estimated at 1,650,000 lbs. fine copper. At last accounts company planned reconstruction, to raise additional capital.

GREAT HERMIDALE COPPER CO. **AUSTRALIA.**

Dead. Absorbed, circa January, 1908, by Great Hermidale South Copper Co. Formerly at Hermidale, N. S. W., Australia.

GREAT HERMIDALE SOUTH COPPER CO. **AUSTRALIA.**

Mine office: Hermidale, N. S. W., Australia. Absorbed, circa January, 1908, by the Great Hermidale Copper Co. Has a 370′ main shaft.

GREAT HOPE MINING CO. **CALIFORNIA.**

Office: care of Geo. R. Whitcomb, secretary and manager, Los Angeles, Cal. Letter returned unclaimed from former mine office, Mojave, Kern Co., Cal. Chas. C. Davis, president; J. C. Cribb, vice-president; Z. L. Parmelee, treasurer, preceding officers and E. J. Peabody, *directors*. Is an unincorporated syndicate, *organized circa 1905, with capitalization* $10,000. Is developing by

tunnel, and has secured assays up to 10% copper, 8% lead and 3 oz. silver p ton. Idle.

GREAT LAKES COPPER CO. ONTARI

Office: 51 East 44th St., New York, N. Y. Mine office: Sudbury, A goma, Ont. John McKinley, president; Horace Williston, secretary; Robe Sloane Bickford, treasurer. Organized 1900, under laws of West Virginia, wi capitalization $3,000,000, shares $5 par. Lands, upwards of 4,000 acres, ne Sudbury, carrying nickeliferous chalcopyrite, associated with pyrite. H several shafts, deepest 150′, also an open-cut, with a considerable amount ore in sight. The Graf smelting process was tried, but proved a failure. Pro erty is mortgaged. Charter was forfeited, 1903, because of non-payment corporation tax, and company seems hopelessly involved.

GREAT LAKES MINING & MILLING CO. WYOMIN

Dead. Formerly at Encampment, Carbon Co., Wyo.

GREAT LAKES MINING & SMELTING CO. WYOMIN

Dead. Formerly at Encampment, Carbon Co., Wyo. Described Vol.

GREAT LAXEY, LTD. ENGLAN

Offices: 55 Cross St., Manchester, Eng. Mine office: Laxey, Isle Man, Eng. F. J. Robertshaw, chairman; John Roberts, mine manager; Crossley, secretary. Organized March 3, 1903, as a reconstruction of the Gr Laxey Mining Co., Ltd., with capitalization £30,000, shares 10s. par, in 45,0 cumulative 10% preferred and 15,000 ordinary shares. Lands, 1,103 acr held under 31-year leases, expiring October, 1933, with royalty of one-eighti to October, 1907, and one-fortieth thereafter. Lands carry lead, zinc a copper sulphides. Property had the largest water-wheel in the world, but t survived its usefulness and was displaced by a new power plant.

GREAT MAMMOTH COPPER MINING CO. WASHINGTO

Dead. Formerly held 10 claims, under bond and lease. Promoters s their own stock and pocketed the proceeds, company losing its lands. F merly at Index, Snohomish Co., Wash.

GREAT MOUNT LYELL COPPER CO., LTD. TASMAN

Dead. Reorganized, Jan. 23, 1903, as Ballarat & Lyell Mines, Ltd. F merly at Mt. Lyell, Montagu Co., Tasmania.

GREAT NORTHERN COPPER CO. MINNESO

Office: 204 Globe Bldg., St. Paul, Minn. Mine office: Hinckley, P Co., Minn. J. B. Conger, vice-president and general manager; R. V. Peyt secretary; H. C. Boyeson, treasurer; Wm. Kibbee, superintendent; preced officers, S. O'Dea, Godfrey Dawe, G. O. Riggs, Dr. C. D. Snow and J. A. F enbeck, directors; August Zastrow, mine superintendent. Organized Sept. 1907, under laws of Arizona, with capitalization $1,000,000, shares $1 p issued, circa $700,000.

Lands, 160 acres, freehold, 14 miles east of Hinckley, showing trap fl with 7 amygdaloidal beds carrying native copper, and occasional malach from weathering, property being on the western extension of the Keweena formation of Lake Superior. Two amygdaloids under development, of ab 8′ average width, traceable circa 1,500′, are opened by shafts of 60′, 100′ 60′, giving rock assaying up to 4.8% copper, and estimated by company carry an average of 3% copper and 6 oz. silver per ton.

Has a 90-h. p. steam plant, with an 8x10″ double hoist, good for 1,0 depth, and 6 mine buildings, including a 20x30′ wooden machine-shop. C pany has secured some good-looking copper rock and plans continuing de opment.

GREAT NORTHERN COPPER CO. NEWFOUNDLA

Office: Corey & Braddock Aves., Braddock, Pa. Mine office: Twilling *Newfoundland.* Development is by a short tunnel. Presumably idle.

T NORTHERN COPPER & GOLD MINING COMPANY OF QUEENSLAND. AUSTRALIA.

ad. Reorganized July 31, 1903, as Rosewood Creek Copper & Gold Min-, Ltd. Formerly at Rosewood Creek, Queensland, Australia.

T NORTHERN COPPER MINING CO. UTAH.

ice: care of S. H. Browne, secretary and treasurer, Ogden, Utah. A. Gee, president; Daniel Covery, vice-president. Organized 1904, under Utah, with capitalization $100,000, shares $1 par. Lands are in the Madre district of Box Elder county, Utah. Presumably idle.

T NORTHERN DEVELOPMENT CO. ALASKA.

ice: 111 Broadway, New York, N. Y. Mine office: McCarthy Creek, River district, Alaska. Jas. Phillips, Jr., director. Capitalization, said $1,000,000. Property is sundry copper claims, in the vicinity of the a group, slightly developed. Company is awaiting railroad transporta- fore doing permanent work.

T NORTHERN GOLD & COPPER MINING & MILLING CO. OREGON.

ne office: Lostine, Wallowa Co., Ore. E. T. Sluer, superintendent. 13 claims, south of Lostine, said to show high grade copper-silver ores.

T NORTHERN MINING CO. WASHINGTON.

ad. Formerly at Baring, King Co., Wash.

T PECK MINE CO. ARIZONA.

ice: 519-10 Wall St., New York, N. Y. Mine office: Providence, i Co., Ariz. Hon. J. A. Beidler, president; Hon. James Tawney, secre- nd treasurer; preceding officers, Hon. E. A. Minor, Hon. Herman G. , Hon. James H. Southard, Hon. Wm. E. Brown, Hon. Lucius N. Littauer, . W. Babcock, Wm. E. Bixby and Melville Woodbury, directors; Peter , general manager. Knickerbocker Trust Co., New York, registrar. Or- 1 1902, under laws of Arizona, with capitalization $2,500,000, shares . Lands, 2 claims, area 40 acres, patented. Mine, once a considerable producer, until closed by litigation, has about 5,000′ of workings, carry- d, silver and copper values. The new Clifford shaft is 375′ deep. Past tion is reported as about $3,000,000. Officers are principally representa- n the American Congress.

T REPUBLIC COPPER & GOLD MINING CO. ARIZONA.

ice: New Philadelphia, Ohio. Mine office: Turkey, Yavapai Co., Ariz. l Siebold, president; L. E. Stegner, vice-president; Fred Graff, secre- C. D. Grimes, treasurer; preceding officers, Wm. Rommell and S. S. , directors; Geo. Oakman, general manager. Organized May 1, 1901, laws of Arizona, with capitalization $3,000,000, shares $1 par; issued, 2,300,000. Annual meeting, first Tuesday in September.

nds, 33 claims, area 660 acres, and a 20-acre smelter site, in 3 groups, s from Turkey, in the Black Cañon district. Property shows chloritic and diorite, carrying fissure veins showing occasional native copper alachite, but mainly azurite, chalcopyrite and bornite, estimated by y to average 4% copper, 3.5 oz. silver and from a trace to $6 gold per Development is by shafts of 726′, 200′ and 200′, with various pits of 10′ depth, and tunnels of 87′ and 314′. Has 15-h. p. and 40-h. p. gasoline with 7 mine buildings. Company plans installing a new hoist and air- ssor, and deepening the Sullivan shaft.

T STANDARD COPPER MINING CO. WYOMING.

ice: care of Colonial Security Co., 161 Summer St., Boston, Mass. returned unclaimed from former mine office, Granite Cañon, Laramie yo. Dr. Walter H. Parker, president; John Laughrey, vice-president and l manager; Chas. B. Lamont, *secretary*. Organized Sept. 30, 1902, under

laws of Arizona, with capitalization $1,000,000, shares 50 cents p
17 claims, also miscellaneous lands giving total holdings of 640 a
Silver Crown district, said to show 6 veins of about 8' average wi
by 18 shallow shafts and pits, claimed to give average assays o
copper, from oxides, carbonates, sulphides and chlorides, with occasi
copper. Idle since March, 1904, from lack of funds; has an overdu
and seems not long for this world.

GREAT SULPHIDE COPPER CO.

Mine office: Silver Bell, Pima Co., Ariz.

GREAT VERDE CONSOLIDATED MINE. CA

Office and mine: Sisson, Shasta Co., Cal. Is a copartnership o
capitalized at $20,000. Lands, 12 claims, unpatented, claimed to
Balaklala, but actually adjoining the Shasta King group of the T
per Co., claimed to show an ore body of 80' width, claimed to be o
tunnels, longest 600', claimed to carry chalcopyrite assaying 6% c
silver and $7 gold per ton. Is not known ever to have produce
statements to the contrary notwithstanding. Idle.

GREAT WESTERN COPPER CO.

Office: Clinton, Ia. Mine office: Tombstone, Cochise Co., Ari
Young, Jr., president; Edward Young, secretary. Capitalization
Lands, 23 claims, in the Dragoon Mountains, carrying argentifer
ores. Has steam and gasoline power. Is said to have resumed
April, 1908, after several years' idleness.

GREAT WESTERN COPPER CO.

Letter returned unclaimed from former office and mine, Globe
Ariz. Lands, near the head of Mineral Creek, show copper ore of fai
a little ore was shipped, 1906, to the Old Dominion smelter. Idle.

GREAT WESTERN COPPER CO.

Dead. Was a stock-jobbing enterprise. Formerly at Reno, W
Nev. Described Vol. VI.

GREAT WESTERN GOLD CO. CA

Office: 401 Commercial Bldg., St. Louis, Mo. Mine and w
Ingot, Shasta Co., Cal. T. S. Henderson, president; T. H. Adams,
dent; M. E. Dittmar, managing director; C. J. Balmer, secretary and
S. E. Bretherton, general manager. Organized circa 1901, with ca
$10,000,000, increased, circa 1905, to $12,000,000, shares $1 par. M
takes vigorous exception to criticisms in past issues of the Copper
to the effect that it evades all inquiries as to capitalization and fi
continues to evade these points, while professing the utmost will
furnish information.

Lands, circa 1,600 acres, patented, including the Afterthought
459 acres, and the Liberty, Last Chance, Section 15, Bull and 10 ot
and, at last accounts, a bond and lease was held on the Donkey mi
on the Garcia mine, Arizona, was forfeited. Principal properties are
thought, Copper Hill and Copper Grand. Ten of the Afterthought
patented, and the River group, 3 claims, is patented. Lands are o
side belt, which extends from Ingot to DeLamar, and is entirely dis
the copper belt on the western side of the Sacramento river.

The Afterthought mine, in the Furnaceville district, 20 miles ea
ding, is the principal property. Former developments included a
and 7 tunnels, of about 2,000' aggregate length. Present main tunn
2,500' long. Property shows a considerable body of low grade sul
with occasional occurrences of medium and high grade sulphides,

alcopyrite, associated with sphalerite and pyrite. The main working tunnel ts a 24′ ore body, in the Copper Hill mine, with a back of 500′. The Lib- ty group, near Redding, with title apparently in dispute, carries auriferous pper ore of undetermined value. The company's claims that the ore would erage $30 per ton in value have been disproven by the results of actual elting. In 1905 the ores smelted assayed 2.81% copper, 14.3% zinc, 11.6% on, 20.25% sulphur, 5.3% alumina, 7.4% barium sulphate, 5.4% calcium car- onate and 18% silica. The property has considerable zinc ore assaying 25 40% in tenor.

The smelter, 1 mile north of Cow Creek and 1½ miles north of the mine, onnected therewith by a tram-line of 30″ gauge, was blown in March 24, 905. The works have 40x96″ and 42x150″ blast-furnaces, latter with Brether- on hot-blast furnace and 12 tuyeres on a side, blast being furnished by 2 isdon hot-blast stoves. The larger furnace is rated at 500 tons' daily ca- pacity. The smelter has 2 brick dust-chambers, and matte produced was hipped to Utah for conversion.

Much trouble was had with the first furnace, which worked badly, and it was said that the management planned building a bag-house to recover zinc oxide from the smelter fumes. Under the management of Mr. Bretherton, who took charge later, the blast-furnace was run with a low charge and an exceptionally hot top, on account of the excess of barium sulphate, and is said to have given satisfactory results.

Work was begun, circa August, 1907, on a 14-mile standard-gauge rail- road, to be known as the Redding, Afterthought & Northeastern, to connect with the Southern Pacific at Bella Vista, and the smelter was idle, August, 1908, awaiting the completion of this road, which should greatly reduce oper- ating costs.

The company was promoted by T. S. Henderson & Co., a St. Louis broker- age firm of dubious reputation, and the early financing of the Great Western Gold Co. was not of a nature to recommend the property to conservative in- vestors. The company has evaded making any definite statements regarding its organization or finances, but a semi-official statement has been secured to the effect that to Aug. 1, 1908, the company had produced nearly $1,000,000 in copper, silver and gold. The local management seems good, and Mr. Hen- derson, notwithstanding the criticisms previously made, is entitled to the credit of sticking to the proposition, which is not devoid of merit, though it seems a question whether the Afterthought should be called a copper mine or a zinc mine.

GREAT WESTERN GOLD & COPPER CO. **UTAH.**

Office: Provo, Utah. Mine office: Park City, Summit Co., Utah. Jesse Knight, president; W. Lester Mangum, secretary; Rt. Rev. Robert Brighton, general manager. Lands, at the head of Big Cottonwood Cañon, adjoining the Daly Judge, show a ledge of about 100′ width, giving assays of 3 to 5% cop- per. Development is by tunnel, planned to cut the ledge at about 2,000′ depth.

GREAT WESTERN GOLD & COPPER MINING CO. **MONTANA.**

Office: care of W. J. Willingham, Equitable Bldg., New York, N. Y. Mine office: Butte, Silver Bow Co., Mont. Chas. G. Eckert, president. Organized under laws of South Dakota, with capitalization $500,000, shares $1 par. Lands, 1 claim, area 20 acres, near Butte. Formerly had a bond and lease on a gold claim at Cripple Creek, Colo. Idle and apparently moribund.

GREAT WESTERN GOLD & SILVER CO. **ARIZONA.**

Mine office: Dragoon, Cochise Co., Ariz. Organized circa June, 1908, pos- sibly as successor of Great Western Copper Co. Lands, in the Dragoon Moun- tains, show auriferous and argentiferous lead and copper ores.

GREAT WESTERN MINING, MILLING & SMELTING CO., LTD. **IDAHO.**

Mine office: Pocatello, Bannock Co., Idaho. O. D. Hovey, superintendent. Has copper ores and was developing with a small force at last accounts.

GREAT WESTERN ORE PURCHASING & REDUCTION CO. **CALIFORNIA.**

Works office: Keeler, Inyo Co., Cal. Has a 150-ton smelter, built 1906, and is said to own old mines in the Cerro Gordo district.

GREENBACK COPPER CO. **CALIFORNIA.**

Mine office: Woody, Kern Co., Cal. Lands, 1,520 acres, 18 miles from Southern Pacific railroad. Country rock is grano-diorite, showing an ore chute carrying lenses of 20′ maximum width, with granite walls irregularly impregnated with chalcopyrite. Development is by a 185′ incline shaft, with 3 levels opened. Carbonate ores stoped from the upper levels have averaged 19.4% copper and 5.7 oz. silver per ton. Idle 1900-1905, and presumably again idle.

GREEN COPPER CO. **MONTANA.**

Dead. Was put out of business, 1906, by an injunction, secured by the Amalgamated Copper Co., restraining the Green from mining property claimed by the Amalgamated. Formerly at Butte, Silver Bow Co., Mont.

GREEN DRAGON COPPER CO. **CALIFORNIA.**

Dead. Was organized, early 1907, by Nevada Counties Brokerage Companies, of San Francisco, and merged, circa September, 1907, in Copper Mines & Smelters Corporation of America. Formerly at Greenwater, Inyo Co., Cal.

GREENE CANANEA COPPER CO. **MEXICO.**

Office: 511 Lyceum Bldg., Duluth, Minn. Mine and works office: La Cananea, Arizpe, Sonora, Mex. Thos. F. Cole, president; Chas. A. Duncan, vice-president and treasurer; Chas. D. Fraser and Jos. B. Cotton, vice-presidents; preceding officers, Myron M. Parker, Philip L. Foster, Chester A. Congdon, Chas. d'Autremont, Jr., Capt. Jas. Hoatson and John D. Ryan, directors; Frederic R. Kennedy, secretary; Jos. W. Allen and Daniel R. Smith, assistant secretaries; Wm. G. Hegardt, assistant treasurer; Arcadius L. Agatin, general solicitor; Dr. L. D. Ricketts, general manager; David Cole, assistant general manager; Jas. H. Kirk, mine superintendent; E. C. Cole, assistant smelter superintendent; Frank J. Strachan, mill superintendent; Geo. Young, mercantile superintendent; T. Evans, traffic manager; T. R. Lucas, purchasing agent; J. A. Campbell, public service superintendent.

Organized Dec. 26, 1906, under laws of Minnesota, with capitalization $60,000,000, shares $20 par; issued, $50,000,000. New York Trust Co. and City Trust Co., Boston, transfer agents. Bankers Trust Co., New York, and State Street Trust Co., Boston, registrars. Shares are listed on the Boston stock exchange.

The Greene Cananea Copper Co. is a securities holding corporation solely controlling, through stock ownership, the Greene Consolidated Copper Co. and the Cananea Central Copper Co. The Greene Cananea exchanged its shares for the stock of the two subsidiary corporations on the basis of 1½ shares for each share of Greene Consolidated, and 1⅔ shares for each share of Cananea Central, this exchange calling for $50,000,000 of stock of the Greene Cananea to completely absorb the shares of the Greene Consolidated and Cananea Central. On March 17, 1908, the Greene Cananea owned 925,038 shares of the issued capital stock of 1,000,000 shares of the Greene Consolidated, and 522,272 shares of the issued capital stock of 600,000 shares of the Cananea Central. Exchange of stocks is still in progress, and it is expected that eventually the entire capital stock of both the subsidiary corporations will be acquired.

The Greene Cananea Copper Co. was said to have begun business with *$8,000,000 cash*, part of which was to be used for payment of old debts of the

reene Consolidated, part for the purchase of supplies and about $3,000,000 for new reduction plant and other improvements. Officers of the company were quoted, in the press, as stating that not one cent of promotion profits were taken by men interested in the company, and that the proposed plan provided $7,000,000 additional cash, and that the cash was safely in the hands of the treasurer. It was stated, in the press, as recently as October, 1907, that the company's treasury contained $7,000,000 in cash, and the same authority stated that the treasury contained between $6,000,000 and $7,000,000 at the time of suspension of operations, November, 1907. It was stated, in the press, Aug. 6, 1907, that the annual report, forthcoming in October, would show $8,000,000 cash in the treasury, with fuel, supplies and stocks valued at $3,000,000, with a total of cash and salable assets of $20,000,000. The company's first annual report, of date March 17, 1908, showed a cash balance on hand, Dec. 31, 1907, of $11,328.23, with total receipts of $125,000 borrowed from the Cananea Central Copper Co., and $12 received from sundry sources. It is quite obvious that the books of the Greene Cananea Copper Co. are so kept that the principal items of receipts and expenditures are distributed between the various subsidiary corporations. Inasmuch as the Greene Cananea is a securities holding corporation only, and its sole revenue is from dividends of subsidiary corporations, none of which are on the dividend list at present, it is evident that this system of bookkeeping is unavoidable, though most confusing to shareholders.

In the various articles descriptive of the Cananea Consolidated Copper Co., S. A., Cananea Central Copper Co. and Greene Consolidated Copper Co., the relations of these interlocking corporations are given in as much detail as possible, though much confusion has arisen through the disingenuous reports and statements of the Greene Consolidated Copper Co., which listed, among its assets, all the property of the Cananea Consolidated Copper Co., S. A. While the financial relations of the various corporations are explained in detail in the articles devoted to each, it has been thought best to consolidate the description of the respective properties under one head, as any other method would give merely fragmentary descriptions of what now, to all actual intents and purposes, constitutes a single property, and, inasmuch as the Greene Cananea Copper Co. is the controlling power, and operates all of the properties in question, and its shares are those that are held mainly by investors, only small minority interests remaining outstanding in the other corporations, it has been deemed advisable to give the description of the Cananea mines and works under this title.

The authentic history of the Cananea mines dates from A. D. 1568, but it is thought that the mines may have been opened by the Aztecs previous to the conquest.

There was much litigation over titles, but the lands were redenounced, 1902, and direct title taken from the Mexican government by the Cananea Consolidated Copper Co., S. A.

The mines are in the municipality of Ronquillo, and the principal administrative buildings are in that municipality, near the smelter. The company owns the townsite of La Cananea, on the mesa to the eastward of Ronquillo, and therein are located the best dwellings, hotels and public buildings. Franchises are held for electric light, water, ice, traction and telephone services.

Lands of the Greene Consolidated were 4,214 pertenencias of one hectare each, equivalent to 10,412 acres, the main mining tract having a boundary line of 32½ miles, and including about 40 old mines and prospects, located in the Cananea Mountains, in the free zone of northern Sonora, about 20 miles south of the Arizona border. The Greene Consolidated had mineral concessions for 184 square miles, in Sonora and Chihuahua, *expiring* May 7, 1906, only part

of which were renewed. Including the Cananea Central holdings, the Gr Cananea has about 37,000 acres of mineral lands and circa 350,000 a of surface rights. The Sierra Cananea is about 25 miles in length, and 6 t miles in width, with a northwest and southeast strike, divided into plainly marked and nearly equal sections by Puertecitos Pass, the prope of the Greene Cananea being in the southern half of the mountains on a eral belt apparently having a strike practically parallel with that of the ra

The Cananea Mountains show marked evidence of strong volcanic ac in the remote past. The Cananea mines are found in a succession of appr mately parallel outcrops of altered limestone, alternating with porphy dikes, the ore deposits, often of monstrous size, occurring in shear-zones tween the limestone and porphyry, and as replacements in the latter. The bodies are entirely distinct and vary greatly, affording practically all vari of oxidized and sulphide ore, with considerable native copper. Many of ore bodies are silicious, requiring concentration to eliminate the silica, w occurs as quartz and as aluminum silicate. None of the ore carries zin other refractory elements. There are large gossan outcrops, but appearan sometimes are deceptive, and much of what appears gossan at a dist proves, upon closer inspection, merely weathered conglomerate, showing dish-brown stains closely simulating the iron colors.

The mines of the Cananea Consolidated Copper Co., S. A., are div into 5 zones, known as the Cobre Grande, Veta Grande, Esperanza, Capote Puertecitos, each zone including a number of different mines, principal velopment being on the Capote, Veta Grande and Esperanza zones. Cananea Consolidated has 8 main shafts, with upwards of 40 miles of w ings, development, for 17 months ending 1907, having aggregated abou miles of workings, with 2,332′ of diamond drill borings. Extraction is m by 8 working tunnels, double-tracked and electric-lighted, having ele motors pulling 10-ton cars. The mines consume yearly, for timbering, a 40,000,000′ of pine and fir, mainly from Oregon, though a limited suppl secured from the Sierra Madre Mountains. Considerable ore is mined by slicing system, which is a modification of the caving plan. Some stopes been lost, through poor timbering, but the mine, as a whole, is not in shape, notwithstanding reports to the contrary. Ores are decreasing in co content with depth, but the sulphide ores show increased silver values in lower workings. The ore bodies lie rather deep, as a rule, hence are una able for open-cast workings, except in one instance. The Cananea has siderable reserves of ore of 4% or better in copper tenor, and is said to blocked out upwards of 3,000,000 tons of ore of about 3.5% average grade.

The Cobre Grande, which was the original mine of the Cananea Co dated, was worked in a crude way by the Pesqueira family for several erations, but now is a minor property. This group shows ore of concentr grade only, the mine having upwards of a mile of workings.

The Veta Grande has 2 enormous ore bodies, the Veta Grande p having a pitch of 36°, with an average width of 216′, average length of and known depth of 1,000′, containing about 7,000,000 tons of ore of me tenor, with some high grade ore. The Massey ore body, opened in 1904 been developed for 750′ in width and 1,200′ in length, and is of unk depth, some of the ore assaying up to 7% copper, with combined gold and s values of about $2 per ton. There also is a 150′ ore body on the hanging of 2 to 6% copper tenor, the silicious portions of which are used for conv linings. The Veta Grande ore is mainly soft chalcocite, carrying conside quantities of native copper and occasional massive chalcocite, associated a small amount of pyrite, gangue being talc and occasional quartz. Extra *is mainly* through Veta Grande tunnel No. 9, of 6,236′ length, which s

both the Veta Grande and Oversight mines, connecting also with the Capote tunnel. Owing to soft ground about 200' of this tunnel has been concreted. The Veta Grande is timbered with square sets, and depleted stopes are filled with waste. The ore is mined in 100' sections, leaving 100' slices unmined, and as the worked-out stopes are filled in, it will be possible to mine out the untouched portions. The Veta Grande ore bodies are overlaid by a heavy felsite capping, estimated at 830,000 cubic yards, and the former management gave consideration to the advisability of stripping the surface. Veta Grande shaft No. 5, of 3 compartments, has a 115-h. p. double hoist good for 1,000', operating 2 hoists in balance, and a 7-drill air-compressor, smithy, framing shop, etc.

The Oversight mine, which is practically a continuation of the Veta Grande, and is served by the Veta Grande tunnel No. 9, has a limited amount of ore ranging up to 25% copper, and has developed a new ore body of 2.5 to 3% average tenor.

The Capote zone, including a number of mines, is the principal property of the Cananea Consolidated, and has 4 main shafts, known as No. 2, 4, 6 and 8, and planned another 3-compartment shaft, circa 300' west of No. 2, which replaced No. 10, but the ground proved too soft to stand well. Extraction is mainly by tunnel, the main working level having a double-track tunnel connecting with shafts 2, 4, 5 and 7, at an extreme distance of 2,900'. On the 1,050' level the Capote shows a vein of about 75' width, carrying mainly chalcopyrite, with some chalcocite, assaying 4 to 20% copper. The Capote was on fire, 1907-1908, for about 12 months, but the fire was quenched by drowning, after the mine suspended operations. The main ore body of the Capote consists essentially of pyrite, coated with a thin film of chalcocite, occurring in thin crystalline grains, scattered quite uniformly through immense bodies of talc, the ore being highly silicious. No. 2 shaft has a 110-h. p. hoist and No. 4 has a double hoist good for 3,000' depth. The Capote equipment includes an air-compressor and a 50-kw. direct-connected generator furnishing light and power. No. 10 Capote shaft has a Prescott pump of 1,250,000 gallons daily capacity.

The Elisa mine, 1,500' south of No. 2 Capote, shows a vein of about 20' width, for a distance of 500', on the second level, said to average 4 to 6% copper, with somewhat higher grade ore below, ore being silicious chalcopyrite carrying good gold and silver values. The main shaft of the Elisa is 540' deep.

The Esperanza zone, but slightly developed, is known to carry good ore bodies, and probably will be developed through the Capote workings.

The Puertecitos zone, which is the westernmost, is about 4 miles northwest of the Elisa shaft, and has an ore body of immense size, with an outcrop up to 800' in width. The oxidized zone, which is comparatively shallow, shows considerable malachite, azurite and occasional cuprite and native copper, but the main ore bodies are chalcopyrite, with occasional bornite, in a lime-garnet-alumina gangue. The ore was said, formerly, to average about 3.5% copper and 3.5 oz. silver, but these figures probably are too high. The workings of the Puertecitos zone are known as the Ventura on the east, having a 700' shaft, the Juárez, 1,200', next west, and the Elenita, 900' west of the Juárez. Some rich ore has been exposed in grading for surface structures at the Elenita. The Puertecitos has enormous quantities of low grade ore, but is idle.

The Cananea Central properties, with several miles of workings, apparently have ore of somewhat higher average grade than the Cananea Consolidated, and were claimed, 1907, to have in sight 2,000,000 tons of ore of better than 5% average grade. Lands of the *Cananea Central* are 3,708 acres, com-

prising holdings of various subsidiary companies, including the Duluth anea-Duluth mine, Dos Naciones, American and Bonanza mines.

The Duluth mine has 2 shafts, with extensive openings on the 17 and 370′ levels, for circa 1,000′ length, showing a vein of 20′ to 150′ carrying ore ranging up to 15% copper and 25 oz. silver, with fair gold This mine is said to show, on the third level, ore averaging circa 4.5% 8 to 10 oz. silver and 40 cents to $2 gold per ton.

The American mine has 6 shafts, all shallow, showing some very ri and 2 additional shafts have been planned.

The Bonanza mine is said to have a proven ore body 1,000′ in and upwards of 100′ in width, with first grade ore assaying 15 to 32% and second grade ore said to assay 5 to 7% copper, 5 to 15 oz. silver gold per ton, but it is probable that the average of actual extraction w much below these figures.

The concentrator department includes a crushing plant, samplin 2 concentrators, machine shop, smithy and 2 warehouses. The crushing in a separate building has 8 ore bins of 20,000 tons storage capacity, to ore is delivered from Ingoldsby side-dumping cars. From these bins drawn onto a Robbins picking belt, 36″ wide and 68′ long, from which copper and chalcocite are hand picked. The ore then goes to a Man conveying belt, 30″ wide and 275′ long, of 200 tons hourly capacity, leads to grizzlies, screened fines going to storage bins and ore going 10x20″ crushers, which reduce the ore to 1½″ size, each crusher disch into a set of 16x36″ rolls, which crush to ¾″ size and discharge to be veyor, which takes the crushed ore to the storage bins of the mills.

There are two concentrators, No. 1, the old mill, of wood, having individual sections, covering 29,650 square feet. Concentrator No. 2, of in four 500-ton sections, terraced throughout, covers 33,240 feet, an circa $250,000. Foundations of new mill are concrete on rock base, pendent of wooden floors. A third concentrator seems needed, but the water supply is insufficient for another mill. The mills put about 3 into 1, and save about 75% of the assay values, ores being difficult centration, owing to the gangue being highly silicious and aluminous.

From the 3,000-ton storage bins in each mill ore is drawn by aut feed to 8 trommels having ⅝″ holes. The tailings from the bull j reground in rolls, and elevated to pass through 8 trommels with ⅜″ Tailings from the fine jigs are reground in ten 5′ Bryan mills, and Chilean mills, sized in classifiers and distributed to 43 Wilfley tables overflow from the spitzkasten below the Bryan mills goes to pulp, th and makes feed for 36 Frue vanners, while the bottom discharge fr spitzkasten goes to the classifiers for Wilfley tables. Equipment mills include eight ⅝″ screens, eight ⅜″ screens, eight 3/16″ screens, 2mm. screens, 16 elevators, 16 hydraulic classifiers, 72 jigs, ten 5′ Bryan two 6′ Chilean mills, 108 Wilfley tables, 144 Frue vanners, 16 shaking ta and 10 Cole drag belt conveyors.

Concentrates are conveyed by locomotives to bins, and loaded thenc narrow-gauge cars for the ore bedding plant. Tailings go to the coars tanks, where coarse sand is settled out, overflow going to slime tanks, fine slimes are settled, and the clear water pumped back for furthe There is a big dam for tailings. Owing to scant water supply, water the coarse jigs is sent to the jig floor and used on middlings, and water the middlings is used upon the sands, and thence back to the coars again. From the Wilfleys the water goes to thickeners, and from the t the water is recovered in settling tanks, the amount of water recover

this ingenious combination of economies being 87.5% so every gallon does duty eight times over.

The power plant at the crushers and mills includes a separate boiler-house with six 250-h. p. Stirling boilers, and an engine-house for each mill, the power plant for No. 1 mill including a 400-h. p. 16x36" Murray tandem compound engine and a 325-h. p. 12x24x30" Minneapolis cross-compound engine. Mill No. 2 has a 400-h. p. Allis-Chalmers 16x32x36" cross-compound engine and two 600-kw. electric generating sets.

The ore bedding plant has 3 beds, each 50x450' and of 9,000 tons capacity, where charges are thoroughly mixed by traveling belts, distributing ore, fluxes, etc. Thoroughly fluxed charges are taken from these beds to the feeding-bins of the smelter.

In 1907 the company gave serious consideration to the building of a new smelting plant, but eventually decided to rebuild the old smelter. The sites under consideration were on the Sonora river, some miles below the present works, and to the eastward of La Mesa, several miles east of the old plant. Tentative plans for the new smelter called for a $3,000,000 plant, to have three 54' blast-furnaces. These plans, however, were abandoned, in favor of rebuilding the old smelter.

The cupola building is 33x296' in size, of steel frame with iron sides, with 4,000-ton ore-bins and 3,000-ton coke bins. There are 75-ton steel charging bins in front of each furnace, for feeding mixed charges, and material is handled by gravity. The charging bins have automatic gates, and dump charges direct into the furnaces, one man caring for two furnaces. The old plant had 8 furnaces, of 7 different types, all of which were remodeled or scrapped, and replaced by 8 practically uniform furnaces, of sizes 48x210" and 42x228" at the tuyeres, giving an average capacity of 400 tons for each furnace, with an aggregate capacity of 3,200 tons for the smelter. Seven small settlers formerly used have been replaced by 4 large clay-lined settlers, each serving 2 furnaces. Settlers skim continuously into self-dumping slag-cars, drawn by two 35-h. p. and two 40-h. p. electric locomotives, traversing a rebuilt slag-line. Over each furnace is a 20x20x20' steel dust-chamber, planned to collect flue-dust and return same to the smelting zone by gravity, which were installed by the old management, but failed to work according to theory. Leaving these primary individual dust-chambers, furnace gases go to a 10x13x400' dust-flue leading to a 250x250' brick dust-chamber. Smoke and gases are discharged from the main dust-chamber through a self-supporting steel stack 10' 6" in diameter and 190' feet high. The blast-furnace building has 2 Mc-Dougal calciners.

The converter building, 60x396', of steel frame with iron sides and roof, has 3 electric cranes with double auxiliary hoists of 40' and 50' span, each with a clear hoist of 40' to the main blocks. Three old stands with 24" cylinders, operated hydraulically under a pressure of 200 lbs. per square inch, have been reconstructed, and there are two new stands, operated electrically. There formerly were 22 shells of 132x156" size, which have been replaced by eight 96x138" shells of barrel type, and other shells of the same size will be added. The converters blow off into moveable hoods leading to primary and secondary dust-chambers. A railroad track runs under each stand, and the casting-cars are fitted with six 300-lb. ingot moulds each, there being 24 cars and 250 moulds. Ingots are carried in cars to the bullion floor, where the pigs are chipped, stippled by electric drills, weighed and loaded. The converter-slags are taken in ladles, by crane, to the forehearths, saving resmelting.

The lining department, at the eastern end of the converter building, has 600-ton silica bins, with material handled by gravity, one 10x20" Blake crusher, two 16x36" Argall rolls, one 8' automatic *mixing-pan*, conveyors and elevators,

power being supplied by a 125-h. p. electric motor. Tamping is by pne rammers. Low grade silicious ores are used for linings, instead of silica.

A 350-ton oil-burning reverberatory furnace was built, 1905, with sions of 27x120′ and hearth of 20x100′, being the second largest in the The result was not very satisfactory, and the furnace has been rebuilt 19x100′ and treats flue-dust, waste gases firing an adjoining boiler.

Much of the ore smelted being pulverulent, an excessive quantity dust is produced, which is briquetted before resmelting. The briq plant includes a 225-ton Mould plunger press and a 100-ton White briquettes being sent by belt-conveyors to the charging-floor of the s A considerable number of men were employed formerly on hand-briqu

The central power plant, near the smelter, has a 65x245′ engine-ho steel, with iron sides and roof. The plant includes a 325-h. p. 14x26x36′ Chalmers tandem compound condensing engine, two 300-kw. McIntosh e one 200-kw. Union Iron Works engine and three 100-kw. Union Iron engines, furnishing a 250-volt current for various uses around the also lighting the mine buildings and the towns of La Cananea an quillo. Blast is furnished by one 750-h. p. Rand air-compressor, two 5 Allis-Chalmers air-compressors, one 225-h. p. Nordberg air-compresso 250-h. p. Murray tandem compound blowing engine, two 250-h. p. blowing engines, one 250-h. p. Allis Corliss tandem blowing engine, one 1 Murray blowing engine, one 100-h. p. Allis blowing engine, one 100-h. p. blowing engine, three No. 10 Connersville blowers and three No. 8 C ville blowers, the blowers having an aggregate capacity of 30,000 cub of free air per minute. The 42″ crooked blast-pipes formerly in us been replaced by two 96″ straight blast-pipes.

The boiler-house of the central power plant is 46x216′ in size, o with iron sides and roof, and has 3,500-ton coal bunkers. There boilers, of 3,000-h. p. aggregate capacity, with a 12″ steam main from room to engine-house. Coal is fed by gravity from bins, and pulverizer installed, 1907, but petroleum has been substituted for coal, as fuel f eral purposes, at an estimated saving of about 25%, the Mexican gove having consented, as an aid to the company, to remove the duty on pet Fuel is mainly Texas oil, bought under a contract calling for 1,500,000 in 2 years. There are three 100,000-gallon oil storage tanks, with 6 lines for loading from tank-cars, and oil is drawn from the tanks b lines leading to the boiler-room.

Shops at the mine and works include a steel machine-shop, well eq and having a foundry with a 2-ton casting cupola. The carpenter-sh planing mill have complete equipment for making sashes and doors. smithies are numerous and fairly equipped. There also are large ware for mine, mill and smelter supplies.

Potable water is piped from Sawmill Cañon, and water for the trators, boilers and other uses, is secured from a pumping plant at Agua, on the headwaters of the Sonora river, 9¾ miles from the mine pumps have capacity to force 1,750,000 gallons daily through a 10″ stee line, against a head of 967′, to a reservoir on the hills above Ronquillo, water is delivered to the mine, reduction plant and towns, under a s tial working pressure. The water system of the company has about 2 of mains, ranging in size from 2″ to 10″, and owing to the cost of s water, it is clarified and re-used, wherever possible. The water storage at the smelter have 596,000 gallons capacity, with 9,300′ of mains and of 2½″ fire-hose.

The company's private railroad, of 36″ gauge, laid with 35-lb. and

ails, has about 30 miles of line, including branches, spurs and side- and an extension of 4.14 kilometers has been built from the smelter American and Duluth-Cananea mines. Equipment includes 12 locomo- d a number of 25-ton cars. The line has been double-tracked between centrator spur and the Capote mine. Rail connection with the outside over the Ferrocaril Cananea, Rio Yaqui y Pacifico, with which the has a 25-year freight contract, made circa 1902, assuring favorable ates. The property has about 30 miles of wagon road, with maximum f 7%, and about 35 miles of trails.

company's brick-yard has a daily capacity of 35,000 brick. There wmills, with a combined daily capacity of 14,000', sawing timber cut company's lands.

mercantile branch of the company does a very large business, having rick store, carrying an enormous stock, and a branch store at Chiva- h warehouses having direct rail connection. The retail mercantile amounts to nearly 4,000,000 pesos yearly, when full forces are em-

Banco de Cananea, organized January, 1902, with a capital of 200,000 nacio Macmanus, cashier, is owned and operated by the Greene Con- and does a large and profitable business.

company owns 5 office buildings, 11 dwellings for foremen, boarding ith capacity to care for 900 men, 3 lodging houses of 10 rooms each, rooms and 1 of 42 rooms, all of brick, a restaurant, bakery, meat- nd about 200 cabins for Mexican miners. A well-appointed club- maintained for the American employes.

company maintains a 40x100' two-story brick hospital, having a de- teben and beds for 59 patients, also a 6-ward emergency hospital at , with a full force of physicians, surgeons and nurses.

company maintains a telephone system having about 200 miles of circa 150 'phones, also an independent telephone system used for ig on the narrow-gauge railroad. A scavenger service is maintained unicipality of Ronquillo.

company owns upwards of 400 horses, mules and burros and has a al for their care.

ncession for a power plant on the Yaqui river is held from the government, and the installation of a large hydro-electric plant was sideration by the former management.

al forces are about 5,000 men, including several hundred American orkmen and a few Chinese, but about 85% of the labor is native. of departments and shift-bosses are American, but the miners and are exclusively Mexicans. The suspension of operations, 1907, gave any a chance to eliminate some very undesirable native labor, which d serious rioting in 1906. Only workmen of the better class were d when operations was resumed. Owing to the proximity of the to the border, there is an unduly large proportion of undesirables ions in the district—Mexicans who stay near the line, in order to s in a hurry, if necessary, and Americans who already have crossed for good and sufficient reasons.

new board has ignored the contract of the former management to Consolidated with the American Metal Co., Ltd., and is now selling through the United Metals Selling Co. Had the company to sell its copper under the old contract it would not have had last weeks of 1907, about 12,000,000 lbs. of copper at 12 to 13 for export, which could have been sold, in the first half of 25 cents per pound.

The dissatisfied shareholders of the Greene Consolidated have appoin a protective committee, and there is some possibility of litigation, though is difficult to see what action the shareholders of the Greene Consolidated take against the Greene Cananea, as their only recourse would seem to against the former officials of the Greene Consolidated.

The mine was closed down, circa November, 1907, the letter of Ricketts to Gov. Torres, of Sonora, explaining the suspension, stating that company had been unable to sell any copper for 8 months, and, at that ti owing to the panic, could neither sell nor borrow. If the company was una to sell for 8 months preceding 1907, it was solely because of its affiliati with the Amalgamated Copper Co., as other producers had no difficulty, vious to June or July, 1907, in selling at nearly twice the price that current in November. Operations were resumed on a small scale, early 1908, when repairing and rebuilding was begun, and the smelter was bl in July 11, 1908, with 2 furnaces, 2 additional furnaces being blown in J 23, and the property is gradually getting back to a normal basis of product

Production of the Cananea has shown steadily decreasing average values. Owing to lavish use of the high grade ores, the average extract declined from 5.73% copper in 1903 to 4.45% in 1904, 3.65% in 1905 2.95% in 1906, while the average for 1907 was 2.329%. Production is ab 25% smelting ore and 75% concentrating ore. In 1906 more than half of production came from the Capote and Oversight mines, the Veta Grande be the next largest producer.

For fiscal years ending July 31, production of fine copper has been follows: 64,211,895 lbs. in 1905; 55,943,478 lbs. in 1906, and circa 43,000 lbs. in 1907. For the calendar year 1907 production was circa 34,000,000 For 17 months ending Dec. 31, 1907, production was 1,347,054 wet tons ore, yielding 58,180,856 lbs. fine copper, 766,422 oz. silver and 6,100 oz. g giving a recovery of 46.58 lbs. fine copper per ton, or 2.329%, with gold silver values of 1.213 cents per pound of fine copper, or 56.5 cents per of ore.

Production July, 1908, was circa 1,000,000 lbs. fine copper, and in Sept ber, 1908, production was at the rate of about 3,000,000 lbs. monthly, trea circa 2,200 tons of ore daily. The cost of copper produced under the management steadily increased, and costs, 1907, under the new manageme were abnormally high, owing to a variety of unavoidable factors. The p tical rebuilding of the plant and reconstruction of methods throughout h cut costs greatly, and it was stated, late 1908, that the labor cost was only cents per ton for smelting, the smelter having been increased 50% in capac with a 50% decrease in forces required. Dr. Ricketts hopes to produce cop at a cost of 10 cents per pound, for all charges, as against former costs 13 to 15 cents per pound. It was stated, unofficially, August, 1908, that c were only 7.5 cents per pound, at the mine, or about 9 cents per pound finished copper at the seaboard, but probably these estimates were unduly l as 10 cents is about as cheaply as the Cananea mines can be expected produce the metal. The capacity of the mine and works is about 5,000, lbs. monthly, or 60,000,000 lbs. per year, which should be increased, in comparatively short time, to 75,000,000 lbs., and eventually to 100,000, lbs., or even more, as the property is of vast size and tremendous possibiliti

Col. Wm. C. Greene, who developed the Cananea mines from petty workings to one of the greatest copper producers of the world, was too am tious, and had too many irons in the fire, his operations, in addition to dire ing the Cananea mines, including the management of the Greene Gold-Sil Co., Greene Gold Co., a railroad company, some of the largest ranches *Mexico*, extensive timber tracts and lumber operations, and a variety of oth

work, entirely too much for one man to direct properly, and requiring infinitely more money than Col. Greene could command. Because of his marked loyalty to friends, and many other fine characteristics, there is much sympathy for Col. Greene, but the shareholders of his companies also are deserving of sympathy, for the bog into which they were led. The present company has an exceedingly strong and capable management, those at the head of the corporation, Messrs. Cole and Ryan, being among the best mining executives to be found anywhere, while Dr. Ricketts has no superior as a metallurgist, and the work that he has done at the Cananea mines shows him to be also a manager of exceptional executive ability. Much remains to be done before the Cananea mines can be considered on a thoroughly satisfactory basis, but so much has been accomplished already that there seems no reason to question the ability of the management to perform the balance of the work.

GREENE CONSOLIDATED COPPER CO. **MEXICO.**

Office: 42 Broadway, New York, N. Y. Mine office: La Cananea, Arizpe, Sonora, Mex. W. D. Thornton, president; C. D. Fraser, vice-president; J. W. Allen, secretary and treasurer; preceding officers, P. L. Foster, Alfred Exner, E. C. Rice and S. E. Searle, directors.

Organized Sept. 16, 1899, under the laws of West Virginia, and capitalization increased, 1904 and 1906, to $10,000,000, shares $10 par. Has paid total dividends of $7,450,580 to end of 1908. Annual meeting, second Tuesday in March.

The bi-monthly dividends of 1906 turned out to run only 5 to the year, and even fewer in 1907, dividend No. 21 declared, February, 1907, having been the only one for the year.

The only asset of the Greene Consolidated Copper Co. is the total stock issue of the Cananea Consolidated Copper Co., S. A., and the mines and smelters formerly described under title of the Greene Consolidated are listed, in this volume, under title of the Greene Cananea Copper Co. The Cananea Consolidated Copper Co. is controlled by the Greene Cananea Copper Co., through the ownership, October, 1907, of 923,698 shares. At the annual meeting, October, 1907, there remained 936 individual shareholders in the Greene Consolidated Copper Co. A shareholders' protective committee was organized, circa June, 1908, with Samuel Untermeyer, Louis A. Newkirk and W. A. McDonald as counsel.

The annual meeting that should have been held October, 1907, was postponed until March 10, 1908, at the request of the Greene Cananea Copper Co., the owner of about 93% of the total stock issue. Fiscal year was then changed from former ending of July 31 to the calendar year.

None of the annual reports of the Greene Consolidated to shareholders were fair, as the statements juggled the holdings of the Cananea Consolidated and Greene Consolidated companies in a most bewildering manner. Until October, 1907, the preceding annual reports of the Greene Consolidated had included accounts of both the Greene Consolidated and the Cananea Consolidated, without any explanation of the differences. All inquiries by shareholders were headed off, at the annual meeting, Oct. 12, 1907, as every question of importance at the meeting was ruled to belong properly to the Cananea Consolidated Copper Co., which owns all of the real property of the Greene Consolidated, or else to the Greene Cananea Copper Co., which owns upwards of 93% of the stock of the Greene Consolidated Copper Co., and neither of these corporations being present, the shareholders who wanted to know were left inquiring.

The Greene Consolidated Copper Co. was supposed to own a 51% stock interest in the Sierra Madre Land & Lumber Co., but it transpired that this was a myth, as the *stock always was owned by* the Cananea Consolidated

Copper Co., S. A.—or at least that is what the shareholders are told
On June 17, 1907, the company was said to have secured control, some
previously, of 51% of the Sierra Madre stock, for $1,250,000, and to hav
posed of the same, previous to that date, to Col. Wm. C. Greene and
ciates, for a consideration not then stated, but afterwards said to have
about $2,000,000, part in cash, with the remainder to be paid at inte
Apparently practically the entire payment was in the form of notes, an
Greene Consolidated apparently was obliged to pay 3 notes, aggreg
$450,000, in order to protect its interests, these notes having been giv
Col. Greene for advances made by the Greene Consolidated, when he w
the head of the latter company, in addition to a cash payment, said to
been $200,000. The Sierra Madre defaulted the interest on its bonds,
1, 1907, and is practically bankrupt. Apparently the notes given in pa
for the 51% of Sierra Madre stock sold for $2,000,000, which notes a
default, are secured by 75% of the lumber company's stock, which appa
is owned again by the Greene Consolidated, owing to default in payment
the relations of the Cananea Consolidated, Greene Consolidated and G
Cananea are so intricate and obscure that nobody but the principals ca
exactly who is who, what is what, or which is which.

The Greene Consolidated issued a circular, July 17, 1906, stating
stockholders of the Cananea Central Copper Co. would take over, an
for, in cash, to the treasury of the Greene Consolidated Copper Co
200,000 shares of Cananea Central stock held by the Greene Consolidated
per Co., but it transpired later that this circular was untrue, though
officially, as the Greene Consolidated never owned the 200,000 shares of
anea Central, this stock, which was fully paid and non-assessable, belo
to the Cananea Consolidated Copper Co., S. A. This is a sample o
"square deal" given its shareholders by the old management of the G
Consolidated.

The company's annual report, for year ending 1907, gave iten
$2,000,000 received from the sale of 200,000 shares of Cananea Centra
$1,350,000 received from the sale of 76,500 shares of Sierra Madre La
Lumber Co. stock. It was asserted, in the press, February, 1907, that on
15, 1907, the sum of $4,000,000 was transferred to the treasury of the G
Consolidated Copper Co., in payment at par for 200,000 shares of the Ca
Central.

The statement given at the company's annual meeting, October, 19
of date July 31 preceding, reported a surplus of $18,678,119, was altog
misleading, as the actual surplus, by the company's own figures, could n
figured as more than $1,575,222, even by including an indefinite amou
metal on hand, and practically there was no surplus whatever, as the
pany never, from its birth until its practical reorganization, had en
money to operate to advantage, and was chronically hard up, even when
ing dividends.

On July 31, 1907, according to the statement of Treasurer Fraser
Greene Consolidated had quick assets of about $7,000,000, but Mr. Fraser
dently forgot himself, as these assets belonged to the Cananea Consolid
This was another sample of the "square deal" given its shareholders b
old management of the Greene Consolidated Copper Co.

Apparently the actual "profits" of the Greene Consolidated fo
months, ending Dec. 31, 1907, were $3,220,247, including income, from va
stock and land sales, of $3,352,500, showing, by an honest accounting, an a
loss of $132,253, made in 17 months, during the most prosperous period
the copper market has known for many years. These figures show wh
Greene Consolidated was reorganized.

On Dec. 31, 1907, the company reported a balance of assets over liabilities of $5,961,059. It all lies in the bookkeeping, and a clever accountant can "prove" anything desired, by going over the figures of the Greene Consolidated Copper Co. As a matter of fact, the company's accounts were so badly kept, apparently partly through ignorance, and partly through intent to deceive, that all figures given out were highly misleading. The company never produced copper so cheaply as claimed, and it is doubtful whether the old management ever knew just what the copper was costing, or just where the company was drifting.

The Greene Consolidated Copper Co. was practically wiped out, Dec. 23, 1906, by the organization of the Greene Cananea Copper Co. The company was in such shape financially, at the height of a remarkable boom in the metal market, that is was about to collapse. Messrs. Thos. F. Cole and John D. Ryan, strong men in the copper industry, were called in to save the company from bankruptcy. They drove a hard bargain with the Greene Consolidated, as was their right, of course, and in forming the Greene Cananea Copper Co., put in their own holdings, which are of much less value than those of the Greene Consolidated, at a very high price. The reason for this was found in the desperate financial condition of the Greene Consolidated, which was practically bankrupt, although the owner of a magnificent property, while the Cole and Ryan property in the merger, though of much less value physically, was backed by strong interests, able to pull the property through. The shareholders of the Greene Consolidated have good reason for bitter feelings, but their grievances lie against the old management, rather than against Messrs. Cole and Ryan, who were called in as medical experts, when the patient was at his last gasp, and saved his life, but charged a tremendous fee for so doing. That the fee was very large cannot be controverted, but the shareholders of the Greene Consolidated are better off, after paying the fee, not directly in cash, but through dilution of their holdings, than they could have been had the property been allowed to go by the board, when the salvage would have been trifling, and very possibly nil.

The property formerly controlled by the Greene Consolidated Copper Co. was fully described in Vol. VII, and is described, in connection with adjoining property, under title of Greene Cananea Copper Co., in this volume. The present status of the Greene Consolidated is merely that of a footbridge between the Cananea Consolidated, which holds direct title to all the property, and the Greene Cananea Copper Co., which controls the property through ownership of shares. The shareholders who insist on occupying the bridge are apt to be jostled. They had better walk ashore. They have been defrauded, but the people guilty of defrauding them can make no restitution, and those who are financially capable of making restitution are not responsible, legally or morally, for the loss.

GREENE GOLD-SILVER CO. **MEXICO.**

Office: 1210-24 Broad St., New York, N. Y. Mine office: Concheño, Bayón, Chihuahua, Mex. Col. Wm. C. Greene, president; Mark L. Sperry, vice president; Richard A. Jones, secretary; E. J. Gates, treasurer; Clarence C. Chase, general manager; W. E. Pomeroy, superintendent.

Organized Nov. 10, 1902, under laws of West Virginia, with capitalization $15,000,000, increased March, 1906, to $25,000,000, shares $10 par, in $3,000,000 preferred cumulative 8% stock and $22,000,000 common shares. Trust Company of America, New York, transfer agent. New York Trust Co., registrar.

Dividends on the preferred 8% stock were supposed to be payable annually, but the first dividend, of 40 cents per share, declared September, 1906, was not paid until February, 1907, while the third semi-annual dividend, due September, 1907, was *passed. The company offered* 100,000 shares of new

stock February, 1907, which issue was underwritten and placed, a
offered 100,000 shares April, 1907, of which only about 10,000 sh
taken. Col. Greene gave stock of the par value of nearly $8,000,000,
1907, to relieve the company's treasury, but there being no marke
stock, the gift was of little or no value. The company's balance
July 31, 1907, showed current assets of $2,858,641, and current liab
$3,035,338, but, as a matter of fact, the assets were practically all
tious, there being about $82 cash on hand, with an enormous flo
debtedness.

The company secured an extensive concession, Apr. 6, 1907, fo
velopment of water power, telephone lines, milling plants, etc., in the
of Bravos, Guerrero, Rayón and Galeana, in the state of Chihuahu
concessions would be valuable, if the company were in a position to
vantage of them. The company previously secured concessions for
the water power of the Aros and Yaqui rivers, and for various public

In 1906 the company claimed to own, in fee, 340,000 acres of
cluding a large number of mines, with a government concession
mines in an area of upwards of 4,000 square miles, in the states of C
and Sonora, Mexico. The company claimed, 1907, to own 114 mines
parently really owned only 4, out of the entire number, balance b
under option and bond. These 114 properties were claimed to have
upwards of $120,000,000 in ore values, and had 12 different reduction
as many different properties.

The most important mine of the company, and, in fact, the o
that really can be called such, is the Concheño, area 398 hectares
circa 1907, for $1,250,000, of Corrigan, McKinney & Co. Unfortuna
property was bought on a margin, like most of the others, and th
owed the vendors, said to be nearly $1,000,000, probably will bring
loss of the property. The plant at Concheño includes a 60-stamp mi
tons daily capacity, and a 500-ton slime plant was begun, late 1907.
tion of the Concheño, September, 1907, was said to have been v
$52,000. Holdings in the Jesús Maria district, Ocampo, Chihuahua,
the Santa Juliana, Balvanera, Guadalupe, Rincón and Ronquillo grou
Santa Juliana is claimed to have produced, according to government
upwards of $100,000,000, from a vein up to 15′ in width, opened to 9
This mine was reopened by a double track drainage tunnel, but a
did not prove a success.

The Balvanera group, area 61 hectares, adjoining the Santa Jul
a 40-ton mill and concentrator, and is claimed to have produced up
$3,000,000 worth of ore, and to have numerous buildings and variou
improvements. This group was said to include 44,000 acres of pine
timber lands.

The Guaynopita group, area 113 hectares, in Guaynopita Cai
huahua, near the Sonora line, includes properties said to have been w
the Aztecs before the conquest of Mexico, the mines showing ores
well in gold, silver and copper. It was planned, at one time, to
500-ton smelter on this property.

The Mulatos group at Mulatos, Sahuaripa, Sonora, Mexico, is o
El Rey del Oro Mining Co., which is controlled, through stock owne
the Greene Gold-Silver Co. This group includes 6,400 acres of mine
and miscellaneous holdings giving a total of 24,700 acres. The mine
to have produced upwards of $18,000,000, mainly in gold, from aras
an old 60-ton mill on the property. The veins are claimed to ran
500′ in width, which seems doubtful, and the company planned the ins
of a 2,500-ton mill, which was a chimerical project.

The Matulera group, at Ocampo, Chihuahua, is said to have a 15′ vein, ying values mainly in gold, and the company was said to have begun a ton cyanide plant.

Miscellaneous properties are many in number, all apparently held on ons, or otherwise than by outright ownership, these including the following ps: Santa Brigida, in Chihuahua, area 95 hectares; Cerro Boluda group, hihuahua, area 152 hectares; Pinos Altos group, in Chihuahua, area 58 ares; El Trigo group, in Sonora, area 16 hectares; La Trinidad group, in ra, area 130 hectares; El Colón mine, 32 hectares; San Ramón group, in uahua, area 23 hectares; Mina Grande group, in Sonora, area 25 hectares; a Santa mine, area 46 hectares; La Lamosa group, area 44 hectares; n group, in Chihuahua, area 70 hectares; El Refugio group, in Chihuahua, 87 hectares; Santa Eduviges group, in Chihuahua, area 55 hectares.

The lands of the company, or rather the lands once supposed to be held the company, were estimated, by Col. Greene, to carry 3,500,000,000′ of ding timber, valued at $10 per thousand. The company also claimed to coal properties at Pilares, and iron mines at Cedros. The coal mines estimated to carry 200,000,000 tons of coal, and the iron mines were sup- d to be comparable to the Mesaba iron range of Minnesota.

The Guaymas smelter, supposed to be owned by the Greene Gold-Silver actually is owned by the Mexican-American Smelting Co.

The Federal smelter, at El Paso, located on a 40-acre tract, is said to have n bought by the Greene Gold-Silver Co. for $54,500, subject to a vendor's of $42,000, having been bought "on a shoestring," like all the other perties of the company.

In July, 1907, the company employed about 1,600 men at its various mines d works, and in August, 1907, reached a daily productive capacity of nearly tons, but late in that month suspended operations, having reached the end its resources. President Díaz, of Mexico, who has been a consistent friend Col. Greene, is said to have loaned $250,000, personally, to help the com- ny along, but this was merely a drop in the bucket, and complete collapse s inevitable, by reason of the utterly fallacious plan of operations fol- wed. It is difficult to understand how Col. Greene, a man of undoubted bility in many fields, should have allowed his mania for buying mines to ve mastered him so completely as to have conducted the company's affairs ong such insane lines as were followed. Nothing was bought outright, if could be secured on a part payment, and, in consequence, the company, at e first financial pinch, fell to pieces like a house of cards. In fact, it is oubtful if anyone living, except Col. Greene himself, and possibly not even he, nows exactly what the company owns. It is safe to infer, however, that the mpany holds direct title to very little.

Shortly before the collapse, a stockholder's committee, including 2 direc- rs, endeavored to raise $25,000, through voluntary assessments, to make an amination of the company's property and business, but secured only $10,000, hich was refunded. The directors are making enough noise at present, but e time for them to have spoken was before the smash. Had they taken me real part in managing the company's affairs, instead of permitting Col. reene to be the entire direction, the company might not have found itself s present lamentable situation.

The Greene Gold-Silver Co. holds title to its properties through a Mexican corporation, and supposedly controls a number of subsidiary corporations as well. Stock in the Mexican company is said to have been hypothecated, hich, if true, leaves the American company without other assets than its fice furniture. The property is said to be in danger of being sold at auc- ion, piecemeal, to satisfy loans to Mexican bankers. Gov. Enrique Creel, of

Chihuahua, a thoroughly capable and trustworthy man, is acting a servator. The Greene Gold-Silver Co. was a one-man enterprise, and t man broke down. The company bought entirely too many properties wasted its funds on further purchases, instead of securing those alread under partial payments. Col. Greene has not profited personally, and to have broken down completely, apparently from nervous prostratio the responsibility for the complete collapse of the company rests solely him. The only possible chance for salvage lies in the reorganization company, in which case the old shareholders will be nearly or quite out, but small as may be the salvage, there will be none without a reorganization, if capital can be induced to go into the enterprise terms.

GREEN HOPE MINING & MILLING CO. WYO

Dead. Formerly at Guernsey, Laramie Co., Wyo. Described Vol. V

GREENHORN COPPER MINING CO. COLO

Mine office: Cañon City, Frémont Co., Colo. Mrs. Wm. E. J administratrix, Metropole Hotel, Denver, Colo., principal shareholder, an tically manager. Lands, 12 miles from Cañon City, show low-grade ores, slightly developed. Idle and apparently moribund.

GREENLEAF MINE. MON

Owned by Boston & Montana Consolidated Copper & Silver Mining

GREEN MONSTER MINE. NE

Office: care of Mrs. Phœbe Hearst, owner, San Francisco, Cal. returned unclaimed from former mine office, Sandy, Lincoln Co., Nev. is opened by a 325′ two-compartment vertical shaft, showing carbona sulphide ores, latter including argentiferous galena and chalcopyrite. has been claimed to show about 5,000 tons of $40 ore. Idle some years.

GREEN MOUNTAIN COPPER CO. CALIFO

Mine office: Raymond, Madera Co., Cal. John V. Bohn, superint Is controlled, through stock ownership, by American Smelters Securiti Has steam power. Presumably idle.

GREEN MOUNTAIN COPPER CO. NEW ME

Dead. Formerly at Rinconada, Rio Arriba Co., N. M. Fully de Vol. VII.

GREEN MOUNTAIN COPPER MINING CO. WYO

Dead. Property sold, circa 1904, to Saginaw Valley Copper Mini Formerly at Encampment, Carbon Co., Wyo.

GREEN MOUNTAIN MINE. MON

Owned by Anaconda Copper Mining Co.

GREEN MOUNTAIN MINING & MILLING CO. COLO

Office: 519 Frick Bldg., Pittsburg, Pa. Mine office: Silverton, Sa Co., Colo. Wm. P. De Armit, president and receiver; S. J. Crawford, tary; E. W. Walter, general manager. Organized under laws of Co with capitalization $3,000,000. Lands, 19 claims, area circa 200 a Cunningham Gulch, 7 miles from Silverton, opened by tunnels of 60 800′, with about 4,000′ of workings. Ores are auriferous and argent iron-copper-lead sulphides, with quartz gangue, averaging about $12 p in value. Has steam power and 12-drill Rand air-compressor. Has a concentrator, connected with the mine by a 4,000′ aerial tram. We receiver's hands November, 1907.

GREENWATER ARCTURUS COPPER MINING CO. CALIFO

Office: care of Hon. T. L. Oddie, Tonopah, Nev. Mine office: water, Inyo Co., Cal. C. M. Oddie, vice-president; H. H. Cookston, se *and treasurer;* preceding officers, F. A. Keith and W. D. Blackmore, di

ed, 1906, with capitalization $3,000,000. Lands, 12 claims, 3 frac- in the Willow Creek section south of the Greenwater district. Idle.

WATER BIMETALLIC COPPER MINING CO. CALIFORNIA.

e: care of E. C. Hughes, president, San Francisco, Cal. Mine office: ter, Inyo Co., Cal. Sig. Weil, vice-president; A. K. Durbro, secretary; g, treasurer; preceding officers, Marius Duvall, W. D. Tobey and W. al, directors. Organized, 1906, under laws of Arizona, with capitaliza- 000,000. Lands, 6 claims, adjoining the Furnace Creek Copper Co., a gossan up to 40′ wide, giving assays of 3.6 to 37.9% copper. Idle.

WATER BLACK JACK COPPER MINING CO. CALIFORNIA.

e: care of Dr. T. E. Enloe, secretary, Goldfield, Nev. Mine office: ter, Inyo Co., Cal. H. T. Bragdon, president; N. H. Truett, vice- t; J. R. Dortch, treasurer; preceding officers and H. F. Bartine, direc- nds, 4 claims, near the Greenwater-Death Valley Mining & Smelting to show argentiferous lead ore and copper ore assaying up to 20% oz. silver and $3.25 gold per ton. Idle.

WATER BLACK OXIDE COPPER MINING CO. CALIFORNIA.

e: 75 Sutter St., San Francisco, Cal. Mine office: Greenwater, , Cal. Jas. Gleason, president; J. C. McBride, secretary; preceding T. C. Risch and H. P. Mason, directors; Geo. Jones, superintendent. claims, near the Furnace Creek Copper Co. Idle.

WATER & BOSTON COPPER CO. CALIFORNIA.

office: Greenwater, Inyo Co., Cal. Apparently merely a stock-job- rprise. Idle.

WATER CALIFORNIA COPPER CO. CALIFORNIA.

e: care of Harry W. Woods, Colorado Springs, Colo. Mine office: er, Inyo Co., Cal. F. M. Woods, president; L. R. Myers, vice-presi- S. Buck, secretary and treasurer. Idle.

WATER-CALUMET COPPER CO. CALIFORNIA.

e: 8 Butler Bldg., Tonopah, Nev. Mine office: Greenwater, Inyo Co., L. Smith, president; R. Chester Turner, vice-president; H. W. Clarke, ; R. C. Moore, treasurer; preceding officers, Jas. N. Mayhew, Zeb. and W. Brown, directors. Organized Aug. 27, 1906, under laws of with capitalization $1,500,000, shares $1 par. Lands, 21 claims, area acres, near the Furnace Creek Extension Copper Co., showing a to 200′ in claimed width, giving surface ores assaying up to 16.7% lightly developed by tunnel. Idle, but plans driving a 500′ crosscut 1909.

WATER CENTRAL COPPER CO. CALIFORNIA.

, 905 Calvert Bldg., Baltimore, Md. Mine office: Greenwater, Inyo Oscar A. Turner, president; Hon. Buchanan Schley, vice-president; E. Milliken, secretary; Henry B. Gilpin, treasurer; Henry G. Merry, manager. Lands, on Sheep Creek, show a ledge nearly 100′ wide, a little carbonate copper ore.

WATER CONSOLIDATED MINING CO. CALIFORNIA.

e: 131 East 53d St., Los Angeles, Cal. Mine office: Greenwater, Cal. Way C. West, president and treasurer; D. D. Bickford, vice- ; B. X. Dawson, secretary. Organized, 1906, under laws of Arizona, italization $3,000,000, shares $1 par. Lands, 10 claims, area 200 pposedly located somewhere in the Greenwater district, on which no ent has been secured, also 4 claims at Brightwood, San Bernardino alifornia, presumably undeveloped also. Formerly held 12 claims at n Bernardino county, which were transferred to the Arcalvada Min- lling Co. Does flamboyant advertising, but apparently no work. Is with suspicion.

GREENWATER COPPER CO. CALIF

Office: care of L. G. Newby, secretary and treasurer, Pasadena, Cal office: Greenwater, Inyo Co., Cal. Z. H. Lowman, president; J. Q. vice-president and superintendent; L. G. Newby, secretary and tr Organized circa November, 1906, under laws of Arizona, with capita $1,000,000. Lands, 41 claims, in 7 groups, principal group, known as th Bird, showing ores giving assays of 3 to 12% copper. Idle.

GREENWATER COPPER HELMET CO. CALIF

Mine office: Greenwater, Inyo Co., Cal. Idle.

GREENWATER COPPER MINES & SMELTER CO. CALIF

Organized ...1906, under laws or Arizona, with capitalization $1,500,000, shares $1 ...ds, 21 claims, 6 fractional, area 375 acres, in the eastern part of the ...er district, reported by company to show fissure veins in limestone ...ict veins between limestone, ore bodies obviously being remarkable ...o size, shape and occurrence. Company claims 20 ore bodies on its ...th average width of 200' and average length of 3,500', which would ...mpany's entire holding with solid copper veins, with exception of ...0' strips of barren limestone between the 20 veins. Ores are reported ...mpany as melaconite, azurite, chalcocite and occasional chrysocolla, ... 18 to 36% copper tenor. Taking the lowest percentage of ore re-... the company, and the company's own figures as to size of its ore ...e first 100' in *depth on this wonderful property* would carry upwards

of 20,000,000 tons of refined copper, worth, at 13 cents per pound, the comparatively trifling sum of $5,200,000,000. Company was promoted by the McGarvin-Brown Co., which advertised, October, 1906, that the firm would get into a mining proposition where a losing was possible. The fact that major is manager, and a United States senator is vice-president, will prove a great consolation to the shareholders. It is indeed lamentable to note that this magnificent mine, which carries, according to the company's own statements, more copper than all the developed copper mines of the world, is idle and present office address a mystery.

GREENWATER IBEX COPPER & GOLD MINING CO. CALIFORNIA

Mine office: Greenwater, Inyo Co., Cal. Organized November, 1906, under laws of Arizona, with capitalization $1,000,000, by W. W. Jones and F. Ainsworth.

UERRERO COPPER CO. **MEXICO.**

Office: care of Nathan Bickford, president, Washington, D. C. Herbert rne, superintendent. Lands are 5 antiguas, circa 8 miles south of the Mexi- n Central Railroad bridge crossing the Balsas river, in the state of Guerrero, xico, showing ore assaying 13% copper and 40 grams gold per metric ton.

UERRERO DEVELOPMENT CO. **MEXICO.**

Dead. Formerly at Chilpancingo, Bravos, Guerrero, Mex. Described Vol. VI.

UGGENHEIM EXPLORATION CO. **U. S. A. & MEXICO.**

Office: 621-71 Broadway, New York, N. Y. General mine office: Tiburcio , Mexico, D. F. Daniel Guggenheim, president; Morris Guggenheim, vice- ident; Isaac Guggenheim, treasurer; John Hays Hammond, general man- r; preceding officers, S. R. Guggenheim, M. Robert Guggenheim, H. P. Whit- y and Geo. S. Field, directors; Chas. K. Lipman, secretary; W. C. Potter, eral superintendent.

Organized June, 1899, under laws of New Jersey, with capitalization 000,000, increased, July, 1906, to $22,000,000, shares $100 par. Issued, 335,100. Regular dividend rate is 2½% quarterly. The American Smelters urities Co. supposedly was organized to succeed the Guggenheim Explora- Co., but did not. It is said that about 80% of the stock is owned by the genheim brothers. To all practical intents and purposes the company is rolled by the American Smelting & Refining Co., and it is difficult to differ- ate between the holdings of the Guggenheim Exploration Co. and the Amer- Smelters Securities Co. The Guggenheim Exploration Co. holds $13,860,000 A stock, $1,800,000 class C stock and a large amount of common stock in American Smelters Securities Co.

Assets of the company include $912,808 *stock in* the Cumberland-Ely per Co.; $1,671,589 *stock in the Nevada Consolidated* Copper Co.; $1,650,000

bonds of Nevada Northern Railroad Co., and $4,632,283 stock in the Ut
per Co. Company also controlled the Yukon Gold Co., which, in 19
foisted on a credulous public, with the assistance of Thos. W. Lawson,
nership which has greatly injured the standing of the Guggenheims
estimation of the investing public. The company also is supposed to
40% interest in the Kennicott Mines Co., and to control the Dairy Far
in California, the Minas Tepezalanes y Anexas at Tepezalá, Aguasca
Mex., and the Minas Gibosa y Anexas, at Jiménez, Chihuahua, Mex., tho
latter are described under title of American Smelters Securities Co.

Company's balance sheet, as of date Dec. 31, 1907, showed as
$39,879,726, including $541,390 cash and $4,449,976 bills and accounts
able, with $4,153,510 bills and accounts payable, and a surplus of $13,7
The company is said to have expended about $27,000,000 in the purch
properties within the past few years.

GUGGENHEIM-GREENWATER COPPER CO. CALIFORNIA & NE

miles southeast of Greenwater, Inyo Co., Cal. Advertising is flamboya
apparently company is merely a stock-jobbing enterprise.

GULF CREEK, LTD. AUSTR

Dead. Voluntarily liquidated, November, 1904. Formerly at B
N. S. W., Australia.

GULF CREEK MINE. AUSTR

Mine office: Barraba, N. S. W., Australia. Jefferson Bros., op
Lands, 250 acres, in the Gulf Creek district of the Barraba division, 35
north of Sydney and 72 miles from a railroad. Ore bodies include a 9'
7% sulphide ore, also a 5% lense of sulphide ore 25' wide and 350' lon
is very heating, being rich in sulphur. Country rocks are indurated clay
of Carboniferous age, with dikes of serpentine. Has steam power and a
smelter. Production, 1901, was 560 long tons fine copper, from 9,400
ore smelted, and in 1906 was circa 70 long tons fine copper, made fro
long tons ore smelted. Employs 10 men, and is being managed prude
practical men, with fair results.

GUM TREE CONSOLIDATED MINING & MILLING CO. COLO

Mine office: Idaho Springs, Clear Creek Co., Colo. John Owen, s
tendent. Has auriferous and argentiferous copper and lead ores, with
power, employing about 20 men at last accounts.

GUM TREE GOLD MINING & MILLING CO. COLO

Dead. Succeeded by Gum Tree Consolidated Mining & Milling Co.
merly at Idaho Springs, Clear Creek Co., Colo.

GUNN'S PEAK COPPER MINING CO. WASHIN

Office: 217 Columbia St., Seattle, Wash. Mine office: Index, Sno
Co., Wash. Is said to be controlled by the Index-Bornite Copper Mini
Lands, 4 claims, showing 3 veins, widest said to be 25', carrying chalc
and bornite, said to give average assays of 11% copper and circa 2 oz.
per ton. Has tunnels of 125' and 800'.

GWIN MINE DEVELOPMENT CO. CALIFO

Office: 1208 Claus Spreckels Bldg., San Francisco, Cal. Mine
Gwin Mine, Calaveras Co., Cal. F. F. Thomas, general manager; Dav
Clure, superintendent. Organized March 26, 1904, under laws of Cali
with capitalization $1,000,000, shares $10 par. Is said to have paid div
of $456,500 to Jan. 1, 1906, and levied a $20,000 assessment, 1907. P

a gold mine, having steam and water power and a 100-stamp mill, but lands ry a large, undeveloped body of low grade copper ore.

WYNANT COPPER MINES CO., LTD.

Dead. Dissolved, January, 1905. Apparently held no lands.

YMPIE COPPER MINES, LTD. AUSTRALIA.

Dead. Liquidated voluntarily, May, 1904. Formerly at Gallangowan, tzroy Co., Queensland, Australia.

YPSY BLAIR MINING CO. UTAH.

Dead. Lands sold, 1905, to Kennebec Mining Co. Formerly at Brighton, lt Lake Co., Utah.

IACHITA COPPER DEVELOPMENT CO. NEW MEXICO.

Office: P. O. Box 933, El Paso, Texas. Mine office: Hachita, Grant Co., M. W. R. Thurston, president. Organized circa 1907, under laws of New Mexico, with capitalization $200,000, shares $1 par. Lands, 29 claims, 7 fractional, area 550 acres, in the Apache district, 7 miles south of Hachita, carrying 4,000' of the McKinley fault, developed by several shallow shafts, deepest 40', showing copper sulphides of concentrating grade.

HACKBERRY MINING, MILLING & DEVELOPING CO. ARIZONA.

Letter returned unclaimed from former office, 112 Clark St., Chicago, Ills. Mine office: Dewey, Yavapai Co., Ariz. Capt. Geo. H. McGee, general manager. Lands, 7 claims, in the Ash Creek district, circa 12 miles east of Dewey, showing ore carrying mainly gold values.

HADLEY CONSOLIDATED COPPER CO. ALASKA.

Office: 1257-25 Broad St., New York, N. Y. Operating office: 609 Mutual Life Bldg., Seattle, Wash. Mine office: Ketchikan, Alaska. Samuel I. Silverman, president; B. E. Barinds, vice-president and treasurer; Nelson W. Parker, secretary; preceding officers, G. S. Grinsfelder, Alex. Reith and Geo. Brown, directors; G. E. Green, superintendent; Robt. Pollock, mine superintendent. Organized circa 1904, as successor of Wales Copper Mining Co., with capitalization $5,000,000, shares $1 par, in $1,500,000 preferred and $3,500,000 common shares. Is controlled, through stock ownership, by Alaska Mines Securities Co. Paid 1% dividends, Dec. 10, 1905, and January, 1906, and a 4% dividend Oct. 9, 1906. Was placed in the hands of a receiver circa September, 1907.

Lands, 12 claims, partly patented, area circa 200 acres, on Mount Andrew. The principal property, known as the Stevenson mine, has a very large ore body, claimed to be 250' wide and 600' long, developed by 535' of tunnels and glory-holes, and is said to have 58,500 tons of ore blocked out for breaking. Smelter shipments, 1905, gave returns of 3.7% copper, 20 cents silver and $1 gold per ton. Ore carries 32% iron and is practically self-fluxing. Mine is connected with the smelter of the Alaska Smelting & Refining Co., at Hadley, circa 2 miles distant, by railway and aerial tram. Production 1905, was 9,470 tons of ore, yielding 698,486 lbs fine copper, and for 1906 was circa 35,000 tons of ore yielding circa 2,000,000 lbs. fine copper.

HADLEY SMELTER. ALASKA.

Owned by Alaska Smelting & Refining Co.

HAGGARTY COPPER MINING CO. WYOMING.

Mine office: Rudefeha, Carbon Co., Wyo. E. M. Cobb, president. Is controlled, through ownership of entire stock issue except founder's shares, by Penn-Wyoming Copper Co.

HAGGARTY COPPER MINING CO. WYOMING.

Office: 731 Monadnock Bldg., Chicago, Ills. Mine office: Rudefeha, Carbon Co., Wyo. Is controlled, through ownership of practically entire stock issue, by Penn-Wyoming Copper Co.

HAGGARTY-JORDAN COPPER MINING CO. WYOMIN

Office: Watertown, N. Y. Mine office: Battle, Carbon Co., Wyo. C. I Dunbar, president; Delos S. Dunbar, secretary and treasurer. Organized 190 under laws of Delaware, with capitalization $150,000, shares 10c. par. Land 11 claims, area 220 acres, in the Battle Lake district, showing 4 fissure vein of which 2, very slightly developed, are claimed, untruthfully, by the manag ment, to carry carbonate and sulphide ores with average values of 35% co per, a trace of silver and $5 gold per ton. Company suffered a mysterio "burglary," by which all its books and papers were stolen. Is devoid of cas and bankrupt in reputation.

HAGUE & HULBERT EXPLORATION. MICHIGAN

Office: 18 Wall St., New York. Mine office: Laurium, Houghton Co Mich. Lands, 240 acres, in Sections 25 and 26, Town 50 North, Range 33 West bought, 1905. Idle.

HAHN'S PEAK GOLD MINING CO. COLORADO

Works office: Hahn's Peak, Routt Co., Colo. Is said to have a smelte under construction, to treat gold, silver and copper ores of adjacent mines i Routt county, Colorado, and Carbon county, Wyoming.

HALE MINING & MILLING CO. ARIZONA

Mine office: Constellation, Yavapai Co., Ariz. Oscar Jennings, superin tendent, at last accounts. Has gold and copper ores, with gasoline power.

HALIFAX COPPER CO. VIRGINIA

Office and mine: Virgilina, Halifax Co., Va. Property is the Wall mine which shipped a little ore, 1900, but since idle.

HALLIWELL COPPER CO. MICHIGAN

Office: Society for Savings Bldg., Cleveland, Ohio. Mine office: On tonagon, Ontonagon Co., Mich. A. H. Weed, president; John Becker, vice president; Chas. W. Voth, secretary; C. F. Uhl, treasurer. Organized January 1895, under laws of West Virginia, and reorganized, 1901, under laws of Sout Dakota, with capitalization $3,000,000, shares $1 par; bonds, $6,500 issue Lands, 880 acres, owned in fee, in Carp Lake township, carrying sundry co per-bearing amygdaloids, with shafts of 130′ and 190′, and tunnels of 19 and 200′. Has a 60-h. p. steam plant, with hoist and 3-drill air compresso Buildings include a machine shop, shafthouse, rockhouse, smithy and sawmil Idle since 1901.

HALL MINING & SMELTING CO., LTD. BRITISH COLUMBIA

Office: 1 Leadenhall St., London, E. C., Eng. Mine office: Nelson Kootenay district, B. C. Lord Ernest W. Hamilton, chairman; C. Harvey consulting engineer; A. E. Ashley, secretary; J. J. Campbell, general man ager; M. S. Davis, mine superintendent. Organized June 6, 1900, under laws of Great Britain, as a reconstruction of Hall Mines, Ltd., with capitalization £325,000, shares £1 par; issued, £275,000. Debentures, £50,000 authorized; issued, £24,560, first mortgage 6% bonds, redeemable at 105, on 6 months' notice, at option of company.

Lands, 18 claims, area 506 acres, also a 40-acre smelter-site, on Toad Mountain, including the Silver King, Hall and Highland mines, also a quarter interest in the Emma mine, near Summit. Mines produce auriferous and cupriferous silver-lead ores, the Silver King carrying bornite above and argen tiferous tetrahedrite below, the lower levels not looking so well as the upper workings. Values are mainly in silver-lead ores.

The reduction plant, near the mine, includes a sampling mill, laboratory and smelter, latter having one large and one small furnace, originally built *for copper*, but used mainly for lead matting. The smelter has hand and *mechanical* roasters, and adopted, 1906, the Huntington-Heberlein process for

sulphurizing galena. The reduction works, which were not successful as a custom smelter, are somewhat antiquated, and need remodeling.

Production, for fiscal year ending June 30, 1905, was 26,505 tons of ore, of which 17,257 tons were smelted in the company's own furnace, and balance sent to other smelters. In 1906 production was 39,898 short tons of ore. Last reported figures of copper production were 318,124 lbs. for fiscal year 1904.

Company lost money on operations, both 1906 and 1907, and a receiver was appointed Feb. 7, 1908, when property was taken possession of by debenture-holders.

CLEMENTE HAM. **MEXICO.**

Office, mine and works: Promontorios, Alamos, Sonora, Mex. Is a producer of copper ores, which are smelted to matte near the mine. Production, 1902, was 191,200 kgs. matte. Presumably idle.

HAMILTON COPPER MINING CO., LTD. **MONTANA.**

Office: Wallace, Idaho. Mine office, Hamilton, Ravalli Co., Mont. Norman Ebbley, manager. Development is by a shallow shaft.

HAMILTON MINING CO. **MICHIGAN.**

Dead. Lands sold to Copper Crown Mining Co. of Michigan. Formerly at Matchwood, Ontonagon Co., Mich. Described Vol. II.

HAMILTON MINING CO. **WYOMING.**

Office: care A. B. Hamilton, treasurer, Laramie, Wyo. Lands are in Carbon county, Wyoming.

HAMILTON MINING, MILLING & TRANSPORTATION CO. **COLORADO.**

Mine office: Winfield, Chaffee Co., Colo. Mine is opened by shafts and tunnels, showing argentiferous and auriferous copper ores. Presumably idle.

HAMLEY MINING CO. **AUSTRALIA.**

Office: Grenfell St., Adelaide, South Australia. Mine office: Moonta, Daly Co., South Australia. John S. Scott, secretary; Wm. Holland, manager. Lands are in the hundreds of Wallaroo and Taparra. Mine, opened 1861, under name of Karkarilla, has 6 parallel veins, of circa 3' average width, carrying mainly chalcopyrite, with some bornite and occasional chalcocite, with quartz gangue, ore averaging about 3.8% copper, opened by 3 shafts, deepest 720'. Equipment includes a steam plant, 2 hoists, and an air compressor.

The mill has a crusher, 1 set of Cornish rolls, 1 jig and 3 buddles. Property closed down March, 1906, after 25 years' work, and was reopened March, 1907. Production, 1903, was circa 1,060 tons of 17% concentrates, equal to circa 400,000 lbs. fine copper, and for first half of 1905 was 3,169 long tons of ore, yielding 582 long tons of concentrates.

HAMMOND COPPER CO. **MONTANA.**

Dead. Supposedly infested some part of Montana, circa 1902.

HAMPDEN CLONCURRY COPPER MINES, LTD. **AUSTRALIA.**

Offices: 375 Collins St., Melbourne, Australia and Palmerston House, London, E. C., Eng. Mine office: Cloncurry, Beaconsfield Co., Queensland, Australia. Employs circa 50 men. Wm. Knox, M. P., chairman; Hon. Wm. Laurence Baillieu, vice-chairman; preceding officers, D. W. H. Paterson, Herbert J. Daly, Herman H. Schlapp, Hon. Wm. Orr and H. C. F. Keats, directors; T. Fyke, J. Dowling and W. Douglas Reid, London directors; C. Lonsdale Smith, mine manager; Edw. Herbert Shackell, secretary; Edwin Habben, London secretary; S. W. Donner, agent. Organized March 2, 1906, under laws of Victoria, as successor of Hampden Copper Mines, N. L., with capitalization £200,000, increased, February, 1907, to £300,000, shares £1 par; issued, £200,000. Statement of May, 1907, gave cash on hand, £88,050, with liabilities of £22,304, including bank overdrafts of £17,665, these heavy overdrafts seeming strange, in view of the large cash *assets claimed.*

Lands, *260 acres, carrying some timber, 47 miles* south of Cloncurry. The

district is arid, though having occasional heavy rainfalls. Country rocks are Silurian slate and quartzite, with occasional diorite and trap, ore occurring as bunches and stockworks in a belt of kaolinized slate and schist, having a nearly vertical dip, with strike of 15° West of North. Rich ores are very erratic in occurrence. Trenches show copper carbonates disseminated through kaolinized slate for widths of 2′ to 80′, estimated to average about 4% copper. Ore has been proven, at intervals, for a distance of about one-half mile.

Ore was discovered 1884, and mining begun 1898. Development is by a number of trenches, 3 open-cuts and 12 shafts, several of the shafts being mere pits of 8′ to 15′ depth. No. 1 pit is circa 60x80′ in size, and about 18′ deep. No. 2 pit shows large bunches of chalcocite and oxidized ores. Four new shafts have been sunk to depths of 164′ to 240′. No. 2, the main shaft, is 200′ deep, with drifts north and south, showing what is called melaconite, but what probably is chalcocite. No. 2 has levels opened at 45′ and 72′ depth, which is excellently poor practice. Shaft No. 12 shows sulphides on the 80′ level, and the deeper workings show considerable ore of 8 to 9% copper tenor, carrying up to 9 dwts. gold per long ton, with an estimated average of 2 dwts. 10 grains. Under former ownership the property was tributed, and gouged. Company estimated May, 1908, that it had ore reserves of the value of £107,003.

The Duchess mine, area 40 acres, bought of the Cloncurry Railway & Development Co., Ltd., for £15,000 cash and £15,000 shares, has 3 shafts, one, sunk 45′ on a 6′ vein, showing high grade carbonates and chalcocite.

Development has been slow, on account of trouble in landing machinery, mine being difficult of access. The company is said to have joined with the Mount Elliott in guaranteeing half of the cost of a £200,000 railway extension, to be built by the Queensland government, from Cloncurry to Mount Elliott, the share of the Hampden Cloncurry being £60,000. The company has a smelter site, with iron ore and limestone available. Production, under former ownership, to August, 1905, was 9,163 long tons of ore, averaging 12.7% copper, which yielded 1,165 long tons fine copper. Property is considered promising.

HANAWA MINE. JAPAN

Owned by Mitsu Bishi Goshi Kwaisha.

HANCOCK CONSOLIDATED MINING CO. MICHIGAN

Mine office: Hancock, Houghton Co., Mich. John D. Cuddihy, president; Capt. Thos. Hoatson, vice-president; preceding officers, Capt. Jas. Hoatson, Capt. Samuel B. Harris and Allen F. Rees, directors; John H. Hicok, secretary and treasurer; John L. Harris, superintendent; John O. Peterson, mining captain; Daniel Fisher, clerk; C. W. McDougall, engineer.

Organized June 11, 1906, under laws of Michigan, with capitalization $5,000,000, shares $25 par; issued, $2,500,000. Paid in, $13. In 1908 levied $3 assessment, payable in $1 installments, on June 25 and Nov. 25, 1908, and May 20, 1909. Company began business with $1,000,000, and paid $552,623 for its property. Disbursements, 1907, were $264,538.98, of which $227,681.23 was for construction and development. Receipts, 1907, were $7,616.77, all from interest. Surplus, Jan. 1, 1908, was $134,332.25.

Lands, 936 acres, all in Town 55 North, Range 34 West, including the original Hancock mine, area 136 acres, set aside, 1859, by the Quincy Mining Co., which reserved the mineral rights to the Pewabic lode. The Pewabic lode, on lands other than the original Hancock tract of 136 acres, is owned by the Hancock Consolidated. Lands lie adjoining the Quincy, to the southwest, and carry the Pewabic, Quincy West and Hancock or Sumner copper-bearing beds. While the Quincy Mining Co. claims the right to mine the Pewabic bed on the lands of the old Hancock Mining Co., the Hancock Consolidated claims that the Quincy has done unauthorized mining on its lands

there is a prospect of litigation over mining rights. Perhaps the best of the Quincy mine is tributary to No. 7 shaft, which is immediately h of the Hancock boundary.

The old Hancock mine, opened 1861 and closed June 1, 1885, on account the low price of the metal, produced 5,709,384 lbs. fine copper. The Han- k or Sumner amygdaloid, which was worked by the old Hancock company, raged about 12′ in width, below the fifth level, to a depth of 1,052′, where old mine was bottomed, and returned 21 to 22 lbs. fine copper per ton, er selection, making about 50 tons of mineral monthly, secured from an erage daily production of 210 tons of rock, in the latter years of its opera- n. Modern milling methods should save 2 to 4 lbs. of fine copper per ton rmerly lost. The old mine found occasional masses up to 5 tons in weight.

The old Hancock mine had an air-shaft, and an 8x16′ working shaft, now own as No. 1, sunk at an angle of 54°, having 2 small skipways, which being deepened below the old workings with size 8x21′, giving room for compartments, and the shaft will be cut down, before beginning production, full 3-compartment size, from top to bottom. Levels were opened at 100′ ervals in the old mine to the tenth level and below are opened at 125′ in- rvals to the depth of circa 1,400′, in November, 1908. The old mine was und in bad shape, after many years' idleness. Rapid sinking is impossible, ing to the hanging-wall giving much trouble, and requiring very close tim- ring. The best ground was found entirely stoped out in the upper levels the Hancock bed, the old workings, about 800′ in length, having been stoped om the second to the tenth levels inclusive, on the Hancock vein, and the est vein was found stoped from the sixth to the ninth levels, inclusive, on e southern drifts. Though No. 1 shaft is sinking on the Hancock bed, drift- g is mainly on the West lode, which lies about 70′ west of the Hancock mygdaloid, and is 10′ to 12′ wide, with a maximum of 16′, on the thirteenth vel, showing some rich stopes, and very fair average ground throughout. No. 1 has a remodeled wooden shaft-rockhouse, with a Lake Shore hoist good r 2,000′ depth.

No. 2 shaft, 2,200′ northwest of No. 1, is 9x30′ in size over all, having 4 isting compartments, each 7x5′ 2″ in the clear, with a 4x7′ compartment for adderway and pipes. This is one of the largest shafts in the Lake Superior istrict, and is planned for heavy production. The collar is concreted for a epth of 30′, into the rock ledge, with a thickness of 24″ at the top and 30″ at the bottom. This shaft was 1,300′ deep in November, 1908, sunk for the rst 700′ or thereabouts through conglomerate. This vertical shaft should ntersect the Hancock lode at a depth of circa 2,500′, the West lode at circa ,800′, and the Pewabic lode at circa 3,600′, proving considerable territory west of the Pewabic lode, hitherto practically unexplored in the Portage Lake district.

No. 2 shaft has a first-motion Sullivan hoist with 24x48″ cylinders and 2 drums, 8′ in diameter with 9′ face, driven by band-friction clutches, alculated to operate 2 pairs of Kimberly skips in balance, at a speed of ,500′ per minute, hoisting with 1¼″ steel rope. The engine has an automatic top.

There are 2 air-compressors with aggregate capacity of 3,100 cubic feet of free air per minute, connected by pipe-line. The compressor at No. 1 shaft is a 10-drill Sullivan 2-stage machine, and at No. 2 is a 15-drill air-compressor.

The machinery plant and buildings, mainly at No. 2 shaft, include a 16x44′ engine-house, boiler-house and 30x80′ combined machine-shop and smithy, of wood, covered with corrugated iron, on concrete foundation. There also is an office, changing-house, and a *number of dwellings, bought* on property secured

for a railroad right-of-way, which have been remodeled for mine u possible, otherwise serving as dwellings for employes.

About 150 men are employed. It was at first planned to begin p within a year, but the management decided to devote its time and to extensive opening work, before beginning production, and is to mended for this wise decision. The management is experienced and f strong, and is going about the working out of ambitious plans i systematic and efficient manner.

HANCOCK COPPER MINES CO. OF IDAHO, LTD.

Office: 1032 Old South Bldg., Boston, Mass. Mine office: Washington Co., Idaho. Col. C. F. Drake, president and general man M. Palmer, vice-president; John Sennett, secretary and treasurer; officers, M. C. Drake and Dr. J. E. Stevens, directors. Organized 1 capitalization $1,000,000. Lands, 10 claims, on Camp Creek, 2 mi Landore, opened by a tunnel said to show considerable bodies of a copper ore.

HANCOCK COPPER MINING CO. MI

Dead. Organized, circa 1880, as successor of Hancock Mining succeeded, 1906, by Hancock Consolidated Mining Co. Formerly at Houghton Co., Mich. Described Vol. II.

HANCOCK MINES CO. NEW

Dead. Formerly at Organ, Dona Ana Co., N. M. Described Vol.

HANCOCK MINING CO. MI

Dead. Organized 1859, and succeeded, 1880, by Hancock Coppe Co. Formerly at Hancock, Houghton Co., Mich.

HANE COPPER MINING CO. MO

Dead. Formerly at Butte, Silver Bow Co., Mont.

HANNA MINING & MILLING CO. CO

Mine office: Capitol City, Hinsdale Co., Colo. G. H. Martin, sup ent. Has auriferous and argentiferous copper and lead ores, with s electric power and a 100-ton concentrator, employing circa 50 men.

HANOVER COPPER CO. NEW

Office: 905-17 Battery Place, New York, N. Y. Mine office: Grant Co., N. M. Chas. W. White, president and treasurer; R. K. secretary. Organized under laws of South Dakota, with capi $1,000,000, shares $100 par. Company expended circa $75,000 on mini near Hanover, but work was done poorly and property, held on bond lowed to revert to the owner. New claims were secured, but appa work was done on these. Idle some years.

HANOVER MINING CO. MI

Dead. Lands sold, 1906, to Keweenaw Copper Co. Formerly in K county, Michigan.

HANOVER MINING & MILLING CO. NEW

Dead. Formerly at Hanover, Grant Co., N. M.

HAPPY JACK COPPER MINING & DEVELOPMENT CO. A

Office: 904 Tacoma Bldg., Chicago, Ills. Mine office: Valde William Sound district, Alaska. Julius Singer, president and gen ager; H. E. Walrath, secretary; preceding officers, R. H. Dickinson, H Maur, R. A. Weir, Guy H. Powell and Nelson C. Davidson, directors ized January, 1907, under laws of Arizona, with capitalization $ shares $1 par. Lands, on Knights Island, include 6 claims on Mur opened by a 140′ tunnel, and a property on Hoyer Bay, at the nort *of the island*, opened by tunnel and said to show ore averaging 8 to *per, which* seems rather high. Mouth of tunnel is 300′ from what

er. Has several mine buildings and is well spoken of locally. Employed
n 40 men, 1907, and planned making early ore shipments.

PPY JACK MINING CO. **ARIZONA**

Office: care of G. & H. Barnett Co., Philadelphia, Pa. Mine office: Pata
ia, Santa Cruz Co., Ariz. H. W. Barnett, superintendent. Mine is opene
a shallow shaft and a 950′ tunnel, showing auriferous and argentiferou
d and copper ores. Property has shipped considerable ore, of good averag
er, and is considered promising.

APPY JOHN MINE. **BRITISH COLUMBIA**

Mine office: Alberni, Vancouver Island, B. C. A. J. Envik and Frankli
ea, owners. Lands, 4 claims, area 125 acres, west of the Monitor mine, o
e western side of the Alberni canal, near its mouth, having a 175′ tunn
owing a vein with paystreak of 30″ extreme width assaying circa 12
pper, 1.7 oz. silver and $1.20 gold per ton.

ARCÚVAR COPPER CO. **ARIZON**

Office: 1201 Pennsylvania Bldg., Philadelphia, Pa. Mine office: Wend
le, Yuma Co., Ariz. Hon. John J. Hawkins, president; Dennis A. Burl
ce-president; N. A. Lund, secretary and treasurer; preceding officers, An
Andrews and L. B. Woolston, directors; R. R. MacDonald, mine superinte
nt; H. C. Shotwell, engineer. Organized May, 1907, under laws of Arizo
with capitalization $2,000,000, shares $1 par. Annual meeting, first Mond
in May.

Lands, 9 claims, area 180 acres, patents applied for, and a water rig
joining the Oro Cobre, in the Cunningham Pass district, 12 miles west
Yumendale, showing several contact deposits between gneiss and diorite,
which one, of 40′ to 60′ estimated width, traceable for some distance, sh
oxidized ores at surface with chalcopyrite at depth, opened by several p
ting shafts and trenches, and by a 269′ tunnel, giving ore assaying u
5% copper and $20 gold per ton. Has gasoline power and 3 small bu
ings. Company plans reaching the vein by crosscut tunnel at length of 4
and continuing development.

ARDSCRABBLE MINING CO. **NEW MEX**

Office and mine: Magdalena, Socorro Co., N. M. W. A. Brown, lesse
and accounts. Property shows 9 veins, occuring as fissures in granite an
acts between granite and limestone, these being claimed to average a
width, and to carry chalcopyrite, sphalerite and cerussite averaging a
copper, 30% lead, 44% zinc, 12 oz. silver and $1 gold per ton. Mines
200′ shaft and several tunnels, longest 200′ and 300′. Property includ
mill, smelter.

ARLEY GOLD MOUNTAIN MINING & SMELTING CO. **WASHING**

Office: 704 New York Blk., Seattle, Wash. Mine office: Darrin
Skamish Co., Wash. Charles Burns, president and treasurer; Harle
Burns, vice-president; Henry S. Noon, secretary; K. O. Neste, general
ger. Organized Dec. 15, 1900, under laws of Washington, with capitaliza
$500,000. Lands, 16 claims, area 300 acres, in the White Horse dis
showing 12 ore bodies, occurring as fissures in porphyry and as cont
tween granite and porphyry. Four veins under development
erage 6′ width, and to carry 14.5% copper, 8 oz. silver and
which claim is excessive. Development is by tunnel, with
Presumably idle.

O HARNECKER.

Office and mine: Las Gredas, La Ligua, Aconcagua,
Ligua, Aconcagua, Chile. El Carmen mine shows
t 1 meter average width, with dip of 31°, occurring
ween limestone *and porphyry, ores being sulphide*

about 20 meters depth. Mine has a 90-meter tunnel with a 60-meter and about 140 meters of horizontal workings. Shipped, 1903, circa 1,100 n tons of ore averaging 5.2% copper, secured with 22 men, and had ore re of about 16,000 metric tons. Is considered a promising property.

Los Marquis mine shows 8 parallel veins, traceable about 5 kilom occurring in porphyry, with strike of North 18° East and dip of 43°, widths of 5′ to 9′, carrying chalcopyrite with granitic gangue, ore being cially suitable for fluxing the silicate ores so common in the district. duction, 1903, was circa 2,000 metric tons of 4.5% ore, secured with 26

Smelter, known as the Fundicion Peña Blanca, 5 kilometers from the tion of Injenio, has a cylindrical water-jacket blast-furnace of about 30 daily capacity, using Westphalian coke and producing ejes of about average copper tenor, giving very clean slags, which assay only 0.15 to 0. copper, from ore of 4.68% average tenor. Production, 1903, was 310,848 fine copper. Mines and smelters are well managed and successful, despite average tenor of ore treated.

HARRINGTON MINING CO. ARIZO

Mine office: Crown King, Yavapai Co., Ariz. Geo. P. Harrington, eral manager. Property is the Tiger mine, carrying ores of gold, silver copper. Has steam power. Idle several years.

HARRIS COPPER CO. MEX

Mine office: Moctezuma, Sonora, Mex. Organized circa 1908. Land miles east of the Pilares mines of the Moctezuma Copper Co., include Caridad group, supposed to have been bought for $40,000, which is sai have 6,000 tons of ore blocked out averaging 4 to 6% in copper tenor. T also are 25 hectares of other lands, in the Pilares district.

H. C. HARRISON. MEX

Office: Apartado 74, Monterey, N. L., Mex. Mine office: Cerralvo, Cu Nuevo León, Mex. Property includes the Buenos Amigos and Esper mines, carrying argentiferous copper and lead ores. Has steam power small smelter, employing circa 100 men at last accounts.

HARTFORD CONSOLIDATED COPPER CO. CALIFOR

Mine office: Redding, Shasta Co., Cal. Wm. Geary, president; J. Giffen, secretary. Lands, 10 claims, 3 miles north of the mouth of Pr Creek, showing an 8′ vein carrying oxidized ores at and near surface, with grade sulphides at a little depth, opened by circa 400′ of tunnels. Idle several years.

HARTFORD COPPER & GOLD MINING CO. ALASKA & IDA

Office: 7 Exchange Pl., Boston, Mass. Henry J. Wilkins, president; C M. Thayer, secretary. Capitalization $2,000,000. West Virginia charter feited 1902. Claims to have copper lands on Prince of Wales Island, Ala Had an option on a mine at Challis, Custer county, Idaho, but lost it. M agement bad, property problematical, stock worthless.

HARTFORD MINING CO. IDA

Mine office: Wardner, Shoshone Co., Idaho. Wm. F. Goddard, presid Jas. Fumerton, vice-president; W. J. Fumerton, secretary and treasurer; ceding officers, Vido Marich, and William Shaefer, directors; Robt. Sterl consulting engineer. Organized circa 1901. Lands, 5 claims, having a tunnel on a fissure vein said to show an 18′ ore chute carrying auriferous argentiferous copper and lead carbonates.

HARTWIG MINING CO. IDA

Office: Tipton, Ia. Mine office: Pollock, Idaho Co., Idaho. Dr. R Nash, president; W. G. N. Geiger, secretary; J. W. Moore, treasurer; pre *ing officers, Fred* Goldsmith, Wm. Hartwig and Ernest Conrad, directors; *Hartwig, mine* superintendent. Organized 1905, under laws of Iowa,

capitalization $72,000. Lands, 6 claims, patented, area 80 acres, and a 5-acre millsite, in the Rapid River district, showing a contact deposit between limestone and diorite, of 40′ estimated average width, traceable circa 700′, opened by a 75′ shaft and 3 tunnels of 1,000′ aggregate length, showing malachite and chalcopyrite, estimated by company to average 12% copper, 3 oz. silver and $4 gold per ton. The 875′ lower tunnel has cut the ore zone, which shows but little ore. Has 3 mine buildings. Idle on account of lack of transportation facilities, but plans resumption when railroad comes nearer.

HASKINS MINING CO. **ARIZONA.**

Mine office: Tucson, Pima Co., Ariz. Lands are in the Tucson Mountains. Idle.

HASSAYAMPA COPPER CO. **ARIZONA.**

Office: 281 John St., Portland, Me. Mine office: Groom Creek, Yavapai Co., Ariz. C. H. Altmiller, president; Chas. Sumner Smith, treasurer; R. A. Sweet, general manager; preceding officers, E. P. Ricker and Harold N. Willis, directors; Millard W. Baldwin, clerk. Organized Dec. 24, 1906, under laws of Maine, with capitalization $2,000,000, shares $5 par; issued, $1,355,480. Property consisted, February, 1907, of about 60% of the stock issue of the Gold & Copper Consolidated Mining & Milling Co., and the Hassayampa Copper Co. is supposed to be negotiating for balance of stock issue of the subsidiary corporation.

Lands, 34 claims, 15 patented, area circa 650 acres, fairly watered and timbered, in 4 groups, known as the Little Kid, which is the most important, Rockefeller, Chicago and President, 12 miles southeast of Prescott in the Hassayampa and Big Bug districts. Lands show numerous fissure veins carrying auriferous and argentiferous oxidized and sulphide ores, claimed by old management of Gold & Copper Consolidated Mining & Milling Co. to average 7% copper, 46 oz. silver and $38 gold per ton, which figures are gross exaggerations. Development is by 34 pits and shafts, of 10′ to 815′ depth, and by 21 tunnels, of 20′ to 800′ length, with about 2 miles of workings. The old company claimed to have 150,000 tons of ore blocked out for stoping, which was untrue, and the new company is said to have opened 3 new veins, carrying copper, silver and gold ores assaying $25 to $200 per ton in value.

have opened 3 new veins, carrying copper, silver and gold ores assaying $25 to $200 per ton in value.

Equipment includes steam power and a 50-h. p. hoist, with several shops. The Chicago group has a 10-stamp mill and a 50-ton cyanide plant, and was claimed by old management to have a 50-ton concentrator.

The directorate of the Hassayampa Copper Co. includes several men of excellent standing, and also includes R. A. Sweet, the general manager, who was the former president and treasurer of the Gold & Copper Consolidated Mining & Milling Co., which corporation peddled stock as long as possible, and claimed to be running the mill day and night, which was untrue. It was claimed, March, 1907, in behalf of the new company, that the Hassayampa would become an important producer, with quick dividends from gold alone, but these claims were not made good. Apparently the company expended about $12,000 on development work, in 1907. Notwithstanding the fact that some of the officers of the Hassayampa Copper Co. are good men, the company is not regarded favorably.

HASSAYAMPA GOLD & COPPER MINING CO. **ARIZONA.**

Dead. Formerly had an office at 202 North Ninth St., St. Louis, Mo. Formerly in Yavapai county, Arizona.

HASTINGS (BRITISH COLUMBIA) EXPLORATION SYNDICATE. **BRITISH COLUMBIA.**

Dead. *Property was the Arlington mine,* which, in 1906, shipped 1,312

tons of ore to the Hall smelter that gave net returns of $53,315.80, an a
of $40.64 per ton. Formerly at Greenwood, Boundary district, B. C.

HATASA MINE. JA

Mine office: Hatasa-mura, Gujo-gori, Mino, Japan. Mine was
previous to A. D. 1600, and once was highly productive, but declined
in output, until latterly. Property has 4 principal veins, of 2" to 2'
carrying argentiferous chalcopyrite, galena, sphalerite and pyrite. Prod
was 38,651 lbs. fine copper and 165,416 momme silver in 1900, and 82,1
fine copper and 189,838 momme silver in 1907, showing a fair growth.

HATHAWAY MINE. ME

Owned by Chihuahua Copper Mining Co.

HATTIE BELL COPPER, GOLD & NICKEL MINING CO. ONT

Dead. Lands sold to Consolidated Copper Co., of Parry Sound. Fo
at Parry Sound, Parry Sound district, Ont.

HATTIE GOLD AND COPPER MINING CO. ID

Dead. Formerly at Doniphan, Blaine Co., Idaho.

UNION MINIÈRE DU HAUT-KATANGA. CONGO FREE S

Office: 7 Montagne du Parc, Brussels, Belgium. Mine office: L
du Congo, Katanga, Congo Free State. Baron Baeyens, chairman; Robt
iams, vice-chairman and general manager; H. Buttgenbach, managing di
Geo. Velge, secretary; A. Bertholet, resident director; Allan Gibb, con
engineer.

Organized Oct. 28, 1906, under laws of Congo Free State, with capi
tion £200,000, shares £4 par, divided into £100,000 dividend shares and £
capital shares, 40% paid in. The Tanganyika Concessions, Ltd., and
Générale de Belgique each own £100,000 in shares. Annual meeting, firs
day in December.

Lands are very extensive, being a concession comprising a copp
about 200 miles in length, containing over 100 exposures of copper, and
belt of nearly 100 miles length, north of the Kafue and Zambesi rivers,
Katanga district, in a rolling country with a fairly healthy climate, th
cipal copper properties showing sandstone carrying malachite impreg
estimated by company to average 14% in tenor.

In addition to copper properties the company owns promising tin
these including the Busango mine, which has apparently payable str
deposits in alluvium of 3' to 10' thickness, and the Kasonso and Chienzi
having lode-tin deposits.

The company also owns the Ruwe gold mine, which has an ore b
9' to 14' width, opened for a quarter-mile by several shallow shafts, d
circa 100' only, vein being a sandstone reef carrying gold up to 9 oz. 7
per long ton, and claimed to average 5 dwts. gold and 9 dwts. platinum
occasional palladium, gold being quite coarse. The platinum figures s
lack substantiation. The Ruwe mine also has a placer deposit, estima
contain 20 oz. gold per long ton, from which considerable production ha
secured, at an average cost of only circa 12s. per ton.

In addition to ores of copper, tin, gold, platinum and palladium, th
pany has an iron ore deposit, apparently of promise, near Shamerenga,
Lualaba River.

The company reports a force of 1,000 men employed, and smeltin
said to be in progress, early 1908, but it is probable that the smelter
small capacity, and planned mainly for experimental purposes.

SOCIÉTÉ DES CUIVRES ET PLOMBS ARGENTIFÈRES DU HAUT-RHONE. FR

Offices: Lausanne, Switzerland, and 28 Blvd. St.-Denis, Paris, F

Jan. 17, 1905, with capitalization 1,600,000 francs, shares 100 francs

E COPPER MINING CO. **WYOMING.**
Formerly at Encampment, Carbon Co., Wyo. Described Vol. VII.

E MINE. **OREGON.**
and mine: Comer, Grant Co., Ore. Byron Sherbindy, owner. Prop-
es auriferous and argentiferous copper ores, and is said to have a
ter. Idle.

ORTH COPPER CO. **ARIZONA.**
Formerly at Agua Caliente, Maricopa Co., Ariz.

D MINES, LTD. **ENGLAND.**
Voluntarily liquidated, February, 1905. Formerly at St. Ives,
Eng.

MINING & TUNNEL CO. **COLORADO.**
office: Tarryall, Park Co., Colo. Lands, sundry claims, said to show
opper ores. Idle and apparently moribund.

COPPER CO. **ARIZONA.**
1112 Union Trust Bldg., Los Angeles, Cal. Mine office: Jerome,
o., Ariz. Clarence L. Bleakley, president; H. Judson Haynes, vice-
J. R. Kinney, secretary and treasurer; preceding officers, Edwin E.
. Ferguson, and Dr. G. H. Merkley, directors; T. E. Campbell, super-
Organized October, 1907, under laws of Arizona, with capitaliza-
0,000, shares $1 par, as successor of Jerome Mines Development Co.
8 claims, patented, area 160 acres, known as the Harryhousen
joining the United Verde on the north. Property shows lenticular
occurring as replacements in schist, the two under development, of
width, traceable circa 2,000′, carrying a great variety of ores, esti-
company to average 6.2% copper, 3 oz. silver and $1.60 gold per ton.
has been explored by about 2,000′ of diamond drill borings, and is
a 248′ tunnel and by shafts of 350′, 520′, 45′ and 40′, main shaft
compartments. Mine is proving quite wet.
ine has a 150-h. p. steam plant, 12x16″ double-drum hoist, 10-drill
and air-compressor and 12 buildings. Company plans continuing
velopment by deepening the shaft to 700′, and driving 2 crosscuts
body.

INING CO. **MONTANA.**
returned unclaimed from former office and mine, Butte, Silver Bow
. T. J. Nerny, Peter Sanger and Jerry Sullivan, directors. Organ-
26, 1906, under laws of Montana, with capitalization $1,500,000,
par. Apparently no work was done.

HT COPPER MINING CO. **WYOMING.**
Formerly at Encampment, Carbon Co., Wyo. Described Vol. II.

HT GOLD & COPPER MINING CO. **CALIFORNIA.**
2115 South Union Ave., Los Angeles, Cal. Mine office: Needles,
rdino Co., Cal. C. R. Wischart, secretary. Organized circa Decem-
under laws of Arizona, with capitalization $1,000,000. Lands, about
est of Needles, are being opened by a shaft, which has proven wet.

HT GOLD MINING & MILLING CO. **COLORADO.**
office: Spencer, Gunnison Co., Colo. L. C. Ehbeding, superintend-
t accounts. Ores carry gold, silver and copper. Presumably idle.

GOLD & COPPER CO. **COLORADO.**
Central City, Gilpin Co., Colo. Henry W. Kane, manager. Organ-
under laws of Colorado, with capitalization $500,000. Property is a
d and lease on the Anchor mine, in Willis Gulch, idle for some years
ned by the Newhouse tunnel, showing considerable bodies of low

grade copper and lead ores, and medium grade silver ores. Apparently copp values are small. Plans an electric installation.

HEART OF ARIZONA GOLD & COPPER CO. ARIZON

Dead. Lands sold, 1906. Formerly at Prescott, Yavapai Co., Ariz.

HEATH MINING CO. IDAH

Dead. Formerly at Heath, Washington Co., Idaho.

HECKLEY GOLD & COPPER MINING CO. ARIZONA

Office: care of Arnold Nydegger, secretary and treasurer, Colorado Spring Colo. Mine office: Wickenburg, Maricopa Co., Ariz. F. J. Webber, pres dent; L. J. Markert, vice-president. Organized under laws of Arizona, wit capitalization $1,500,000, shares $1 par. Lands, 13 claims, in 3 groups, Copper Hill, in the Black Rock district, circa 6 miles east and northeast Wickenburg, having a 268′ tunnel cutting veins of 6′, 10′ and 25′ claim average width, showing ore assaying up to 28% copper.

HECLA & ARIZONA DEVELOPMENT CO. ARIZONA

Dead. Title changed, 1903, to Red Jacket & Bisbee Development Co. Fo merly at Bisbee, Cochise Co., Ariz.

HECLA & ARIZONA GOLD & COPPER MINING CO. ARIZONA

Office: Weatherford, Texas. Letter returned unclaimed from form mine office, Bisbee, Cochise Co., Ariz. J. M. Carroll, manager. Organize 1902, to take over claims near Bisbee. Idle and apparently moribund.

HECLA CONSOLIDATED MINE. MONTAN

Office and mine: Butte, Beaverhead Co., Mont. Henry Knippenber owner. Property is the Atlantis, Cleves and other mines, formerly owned t the Hecla Consolidated Mining Co., which for 20 years were large produce of silver and lead, with considerable gold and copper, latter reaching 100,0 lbs. fine copper yearly. Property paid dividends of $2,250,000 on an origin investment of $40,000, but was bought, 1906, at sheriff's sale, for $28,000.

HECLA CONSOLIDATED MINING CO. MONTAN

Dead. Was a large producer, for many years, of silver, lead, gold a copper, latter as a by-product, amounting to about 100,000 lbs. yearly, a paid dividends of $2,250,000, without assessments, on an original investme of $40,000. Property sold, 1906, for $28,000, to Henry Knippenberg. Forme at Dillon, Beaverhead Co., Mont.

HECLA COPPER & GOLD MINING, MILLING & SMELTING CO. WYOMIN

Dead. Reorganized, October, 1904, as Hecla Mining Co. Formerly Hecla, Laramie Co., Wyo.

HECLA COPPER MINING CO. WYOMIN

Dead. Formerly at Encampment, Carbon Co., Wyo. Described Vol. II.

HECLA MINING CO. WYOMIN

Office: 1624 Curtis St., Denver, Colo. Mine office: Hecla, Laramie C Wyo. Henry Schwartz, president and general manager; Geo. C. Norris, vi president; Louis Williams, secretary; Geo. L. Bettcher, treasurer. Organi October, 1904, under laws of Wyoming, as a reconstruction of the Hecla C per & Gold Mining, Milling & Smelting Co., with capitalization $1,000,0 shares $1 par.

Lands apparently include the Copper Crown group of 8 claims, the A gamated group of 11 claims, the Hecla group of 14 claims, 2 patented, a acre millsite and the townsite of Hecla, 5 miles from a railroad, in the Si Crown district. Property is claimed to show 16 fissure veins, of 8′ ave width, in schist and granite, of which 3, of 7′ average claimed width, claimed to be under development, carrying oxidized and sulphide ores, cla to give average assays of 5% copper, 3 oz. silver and $10 gold per ton, *addition* to which they are claimed to carry estimated average values of

$12 per ton in nickel, platinum and uranium, which values apparently are something more than doubtful. Development is by a 40′ tunnel, and 14 pits and shafts of 10′ to 140′ depth.

The mill, 80x100′ in size, has 15 stamps, a 50-ton concentrating plant and a leaching plant. The Ohly process was installed, in an attempt to save the rare metals, but was not a success. Ore, which is mainly low in grade, is only in part adapted to concentration, and the mill requires overhauling and adaptation to the ore.

The management peddled "guaranteed" stock, claiming that 5% interest was guaranteed, for 3 years, on the stock investment, by United States government bonds, but nobody seems to have seen the bonds. The company apparently is out of cash and hopelessly involved, and its officers should be prosecuted for peddling worthless "guaranteed" stock.

GEWERKSCHAFT HEDWIGSGLÜCK. **GERMANY.**

Dead. Lands sold, 1907, to Rheinbach Copper Mines, Ltd. Formerly at Rheinbach, Rheinprovinz, Germany. Described Vol. VII.

F. H. HEFFRON. **MEXICO.**

Office and mine: Miñaca, Guerrero, Chihuahua, Mex. Mine, known as Dos de Abril, carries auriferous and argentiferous copper and lead ores, and has a 30-ton mill, employing circa 50 men.

HELENA-BUTTE MINING CO. **MONTANA.**

Mine office: Clancey, Jefferson Co., Mont. Frederic E. J. Lloyd, president; Chas. J. Burgess, secretary. Organized under laws of Montana. Property, known as the Silver Crest mine, opened circa 1890, in Warm Spring Gulch, 6 miles from Clancey, has a 3-compartment 200′ shaft, showing mainly silver-lead ore, with fair copper and gold values, and with prospects of increasing copper at depth. Property has a fair power equipment and several small mine buildings.

HELENA COPPER MINING CO. **MONTANA.**

Letter returned unclaimed from former office and mine, Helena, Lewis & Clark Co., Mont. F. J. Mason, president; Peter Rattray, vice-president; I. H. Adams, secretary; A. E. Adams, treasurer. Organized January, 1906, under laws of Montana, with capitalization $80,000, shares 10 cents par. Lands, 5 claims, unpatented, area 80 acres, on Mount Ascension, one mile from Helena, having sundry pits, and shafts of 45′, 50′ and 220′. Idle and apparently moribund.

HELEN MINING CO. **NEW MEXICO.**

Mine office: Graham, Socorro Co., N. M. Thos. Graham, president. Property is the Confidence group, ores of which carry gold, silver and copper. Has a 20-stamp mill, with steam, water and electric power. Presumably idle.

HELGA GOLD & COPPER CO. **BRITISH COLUMBIA.**

Office: Sullivan Bldg., Seattle, Wash. Mine office: Clayoquot, Vancouver Island, B. C. B. F. McCurdy, superintendent. Lands, 5 claims, area circa 250 acres, known as the Good Hope group, on Trout river, developed by a tunnel, said to give a fair showing of ore.

HELLEN MINING SYNDICATE. **WASHINGTON.**

Mine office: Cle Elum, Kittitas Co., Wash. Lands carry copper ore and free milling gold. Development is mainly on the gold ores, a small stamp mill having been built, 1908.

HELSINGBORG'S KOPPARVERK AKTIEBOLAG. **SWEDEN.**

Office and works: Helsingborg, Malmöhus län, Sweden. Hon. N. Persson, manager. Property is a smelting and reduction plant, including a small leaching plant, treating mainly the unrefined copper of the Sulitelma Aktiebolag.

HELVETIA COPPER CO. **ARIZONA.**

Office: 905 Metropolitan Life Bldg., Minneapolis, Minn. Mine office:

Helvetia, Pima Co., Ariz. Employs circa 75 men. C. C. Prindle, presi
Chas. W. Sexton, vice-president and secretary; Wm. A. Paine, treasurer;
ceding officers, Russell M. Bennett, Geo. A. McDougall, Jas. H. Seager
Fred. L. Smith, directors; W. C. Steubing, general manager. Organized M
3, 1899, under laws of New Jersey, and reorganized Oct. 4, 1905, under law
Arizona, with capitalization $5,000,000, shares $25 par; issued, $2,250
Paid in, $13.50. Last assessment was 50 cents, payable July 20, 1908.
on hand, Sept. 1, 1908, was circa $80,000. Annual meeting, in October.

Lands, 48 claims, patented, area 825 acres, and 960 acres miscellan
lands, giving total holdings of 1,785 acres, on the western slope of the S
Rita Mountains, 30 miles southeast of Tucson. Formation resembles tha
Bisbee, the Carboniferous limestone strata being of the same geological
zon, with similar porphyritic intrusions, but showing much stronger outc
and gossans.

The mine made an exceptionally fine showing from a depth of 35',
ores turned base on the third level, with average tenor under 5% copper.
property has about 25 old pits and shafts, with about a mile of trenches
open-cuts, and several miles of tunnels and drifts, showing considerable
serves of self-fluxing ore of 2.5 to 8% copper tenor. There are 5 principal
bodies, known as the Isle Royale, Old Dick, Exchange, Pilot and Heavy We
with principal new development on the Copper World mine, which show
vein of 15' estimated width, traceable 3,000', proven to depth of 400', carry
carbonate and sulphide ore, mainly the latter, estimated by company to a
age 5% copper, 0.5 oz. silver and 50 cents gold per ton.

The Isle Royale mine has an 800' shaft, and shows lenses of ore in li
stone near a porphyritic contact, of 3' to 5' average width, with maxim
of 15', carrying ore averaging about 3% copper and $1 per ton in comb
gold and silver values. The lower levels show sulphide ore, and this s
furnishes sufficient water for mine and smelter use.

The Old Dick mine has an open-cut showing an ore body carrying 3 to
copper, with small gold and silver values, and a 127' shaft, with one le
is said to show about 7,000 tons of 7% sulphide ore. There also is a tu
leading to an open pit, showing a vein of about 7' width, claimed to ave
better than 5% in copper tenor.

The Heavy Weight vein, of about 7' width, circa 400' from and ne
parallel with the Old Dick vein, carries sulphide ore at shallow depth of
5% copper tenor. This vein shows a considerable amount of low grade
centrating ore.

The Copper World mine, opened circa 1907, has a 350' incline shaft
sulphide ore estimated to average about 5% copper, with some 10% ore sh
on the 300' level. It is planned to connect this shaft with the Isle Re
mine.

The Leader mine shows considerable sulphide ore of 3.5 to 4% estima
average copper tenor.

The mine has a 250-h. p. steam plant with steam hoists of 25-h. p.
50-h. p., and one gasoline hoist, also a 9-drill Ingersoll-Sergeant air-compre
and an electric light plant. There are about 30 buildings, a 40x75' carpen
shop and dwellings.

The Helvetia railroad, owned by the company, is 2¾ miles in length
30" gauge, equipped with one 10-ton Porter saddleback locomotive, one 15-
Shay locomotive and 5 cars. A railway line has been surveyed from Helv
to Vail, to connect at latter point with the Southern Pacific.

The first smelter, 1½ miles from the mine, built 1899, and burned
1900, was rebuilt and blown in, 1901, and property was closed down
1902, owing to the exhaustion of the rich oxidized ores. During the

riod of operations, about 27,000 tons of ore were smelted, largest production ving been circa 1,000,000 lbs. fine copper in 1901. Property was reopened, 04, and the smelter was again blown in, early 1906, but was wrecked, circa ay, 1906, by the collapse of the ore-bins, which had been built on a poor undation. The smelter was again rebuilt, and has a 100-ton water-jacket last-furnace. In 1908 the company experimented with a 30-ton Medbery otary oil burning furnace, which treated 2-ton charges, at frequent intervals, ut this did not prove successful.

The matter of building a 500-ton concentrator has been considered. Considerable trouble has been experienced in the past from lack of fluxing ores, but these seem to have been developed on the property. Daily shipments of 100 tons to custom smelters were begun Nov. 1, 1908.

Production, 1906, was 379,823 lbs. fine copper, 3,888 oz. silver and 28 oz. gold, valued at $76,446, and for 1907 was 191,666 lbs. fine copper, 1,394 oz. silver and 6 oz. gold, valued at $39,387.54. The mine has considerable ore of fair tenor developed, and is considered promising, though present transportation facilities are inadequate.

WM. HENDERSON & CO., LTD. **SCOTLAND.**

Works office: Irvine, Ayrshire, Scotland. Property is a plant for the leaching of copper values from cinders remaining from the burning of cupriferous pyrites.

HENSON CREEK LEAD MINES CO. **COLORADO.**

Dead. Lands sold by sheriff, circa 1906. Formerly at Lake City, Hinsdale Co., Colo.

HERCULES & ARIZONA MINING CO. **ARIZONA.**

Mine office: Ray, Pinal Co., Ariz. Was developing with a small force, at last accounts.

HERCULES BOSHOF SYNDICATE. **TRANSVAAL.**

Mine office: Pietersburg, Zoutpansberg, Transvaal. Lands are part of the Farm Tweedale No. 1300, showing a ledge of about 150′ width, traceable 2 miles, carrying carbonate stains and small quantities of cuprite, azurite and malachite, with quartzite gangue.

HERCULES CONSOLIDATED MINING CO. **COLORADO.**

Office: Boston, Mass. Mine office: Silverton, San Juan Co., Colo. Edward P. Bicker, president; Chas. S. Smith, treasurer; Thos. H. Kane, managing director. Capitalization $1,000,000, shares $10 par. Has authorized an issue of $300,000 bonds at 6%, convertible into stock at par; outstanding, $253,000. Lands, 25 claims, area circa 300 acres, known as the Little Dora group, having tunnels of 1,500′ and 2,500′, showing auriferous and argentiferous lead and copper ores, with values mainly in gold and silver. Has steam and water power and a modern 30-stamp mill, employing circa 75 men at last accounts.

HERCULES COPPER CO. **ARIZONA.**

Mine office: Ray, Pinal Co., Ariz.

HERCULES GOLD & COPPER CO. **NORTH CAROLINA.**

Office: 81 Fulton St., New York, N. Y. Mine office: Cid, Davidson Co., N. C. Wm. A. Anderson, president; H. L. Prentice, vice-president; Robert E. Nuese, secretary; Saml. G. W. Brown, treasurer and general manager; Walter Cockrell, superintendent. Organized May, 1901, under laws of South Dakota, with capitalization $1,000,000, shares $1 par. Lands, circa 1,000 acres, freehold, and 1,300 acres held under contract, including the Emmons mine, opened before the American Civil War. Lands show 3 fissure veins, ranging 18″ to 12′ wide, said to give average assays of 7% copper, 2 to 17 oz. silver and $1.50 to $15 gold per ton, from melaconite, bornite and chalcopyrite, mainly latter. Is opened by shafts of 90′, 140′, 450′ and 600′, and by tunnels of 100′, 100′, 1,500′ and 2,500′, estimated to show about 65,000 tons of ore blocked out for

Development has been continuous, since begun in 1903. The mine has a 260' tunnel and 3 shafts, No. 1 being 300' deep, No. 2 being 24' deep and No. 3 being 445' in depth, with total of 2,624' of workings, June, 1908, estimated by company to show 800,000 tons of ore with 400,000 tons blocked out for stoping, which estimate seems high. No. 3 shaft, 445' deep, 7x15' in inside measurement, with 3 compartments, has 4 levels opened. No. 4 shaft is to be sunk on the Duluth claim, circa 1,000' from No. 3. The ground stands well, requiring little timbering.

Equipment includes a 200-h. p. steam plant, with 50-h. p. and 100-h. p. Allis-Chalmers hoists, good for 1,000' each, and a 10-drill Ingersoll-Rand air-compressor.

There are 21 buildings, including a 20x40' frame machine-shop, a frame carpenter-shop, an 18x32' smithy, boiler-house, engine-house, office and dwellings. The Hermina railroad, 5 miles long, of standard gauge, equipped with one locomotive and 10 cars, connecting the mine with the Canadian Pacific railway, is owned by the company.

The smelter, at Thessalon, Algoma, Ontario, is owned by a subsidiary corporation, the Algoma Custom Smelting & Refining Co., and is described under that title. Production was begun circa Nov. 1, 1908, when there were about 8,000 tons of ore on the dump. The company estimates earnings of $371,000 yearly, on a production of 115 tons of ore daily, which figures are not likely to work out in practice. The property has considerable good ore, though not in the best of shape for extraction, being somewhat bunchy.

HERMIONE COPPER MINES, LTD. **GREECE.**

Letter returned unclaimed from former office, 2 City Road, London, E. C., Eng. Edw. Riley & Co., managers; Wm. Taylor, secretary. Organized Apr. 6, 1905, under laws of Great Britain, with capitalization £140,000, shares £1 par; issued, £7. Succeeded Greek Minerals, Ltd., to acquire the Hermione mine, consisting of the Thermissy and Careas concessions, in the districts of Hermione and Spetzia, Greece. Idle and moribund.

HERMIT GOLD & COPPER MINING & SMELTING CO. **ARIZONA.**

Dead. Formerly owned the Hermit group in Coconino county, Arizona.

HERMIT LAKE COPPER CO. **COLORADO.**

Office: 31 Milk St., Boston, Mass. Mine office: Silver Cliff, Custer Co., Colo. John H. Norton, president; Oliver J. Kimball, secretary; W. S. Klemendorf, superintendent. Organized 1899, under laws of Maine, with capitalization $2,000,000, shares $20 par. Ores carry gold and copper. Has water power and a 20-stamp mill. Idle and apparently moribund.

HERMOSA COPPER CO. **NEW MEXICO.**

Office: 42 Broadway, New York, N. Y. Mine office: Hanover, Grant Co., N. M. Anson W. Burchard, president; M. F. Westover, secretary; D. M. Kinnan, treasurer and general manager; Henry K. Darling, assistant treasurer; L. B. Judson, assistant secretary. Organized July 20, 1905, under laws of New Jersey, with capitalization $500,000, shares $100 par. Corporation Trust Co., New York, registrar. Annual meeting, first Monday in June.

The mines were discovered circa 1800, and opened 1880, but were worked intermittently, owing to various Indian troubles and lack of funds, until taken over, 1904, by the present owner, which practically is the General Electric Co., one of the strongest corporations of the United States.

Lands, 114 claims, area circa 2,200 acres, held partly in fee and partly under option, all in the Central or Hanover district. Lands include the Ivanhoe and Humboldt mines, which are the most important, also the Copper Queen, Treasure Vault, Wild Cat, Kinney, Tourmaline, and other mines and attempts at mines. Country rocks are porphyry, granite, quartzite and lime-

stone, showing various contact deposits between granite and limestone, porphyry intrusions, ores occurring as lenticular bodies, in veins with a erally northeasterly and southwesterly strike, and an average dip of circa Four different ore bodies are being developed, these ranging 15′ to 2 width, with a known depth of 410′ and known length of 2,000′. Develop is by shafts, as follows: Ivanhoe, 350′; Ninety, 410′; Treasure Vault, Wild Cat, 410′; Humboldt, 300′; Copper Queen, 200′; Tourmaline, 300′; M 200′. All shafts show ore, and the various mines have about 3 miles of w ings, estimated to show 100,000 tons of ore, with 25,000 tons blocked out stoping. The property shows large bodies of low grade concentrating carrying average values of 3% copper, 3 oz. silver and slightly under $1 per ton, with small quantities of lead near the surface, and occasional tr of zinc, but not in sufficient quantities to materially hamper reduction.

Equipment includes a 700-h. p. steam plant, with 7 hoists, good for to 1,000′ each, and 4 Sullivan air-compressors, of 26 drills aggregate capa Buildings include a 20x40′ machine-shop and smithy, a 40x100′ carpenter-s and framing-mill, warehouse, sawmill, etc., with a total of 20 buildings, al wood. The 40x90′ concentrator, of 100 tons rated daily capacity, built b former management, was altered and used for experimental purposes. Eq ment includes a No. 14 Blake crusher, 2 sets of rolls, 1 Hartz jig, 5 Overst tables, 2 Wilfley tables, 7 screw sizers, 1 hydraulic sizer and 1 Huntington

Considerable systematic development was done, based upon estimate tonnage by eminent engineers, but results did not come up to expectati Though some very good ore bodies were found, they were not of sufficient to make the property profitable. Further work may be done at a later date.

MINA LAS HERREBIAS. SPA

Held by Bede Metal & Chemical Co., Ltd.

HERSTELLE-ELY COPPER CO. NEVA

Office: 20 Broad St., New York, N. Y. Mine office: Ely, White Pine Nev. Seward H. Fields, secretary. Organized circa February, 1907, u laws of Maine, with capitalization $1,000,000, shares $1 par.

HESPERUS GOLD & COPPER MINES CO. BRITISH COLUMB

Office: care of Samuel P. Brannan, secretary, 709-145 La Salle St., cago, Ills. Mine office: Grand Forks, Boundary district, B. C. Chas. J. Ma president; T. H. Rae, managing director. Organized February, 1903, with italization $1,000,000, shares $1 par. Property includes the Betts, Hesp Lancaster and Chicago claims, on Hardy Mountain, circa 4 miles from G Forks, developed by several hundred feet of crosscuts and shafts, show good bodies of cupriferous pyrrhotite, opened by an 825′ tunnel. Has about 3,000′ of diamond drilling.

HETTA MOUNTAIN GROUP. ALAS

Mine office: Coppermount, Prince of Wales Island, Alaska. Land claims, near Copper Harbor, said to show a vein 2′ to 20′ wide and 3,000′ l averaging 10% copper, 3 oz. silver and $2 gold per ton, which is an exagg tion. Idle.

HETTIE GREEN MINE. BRITISH COLUMB

Office and mine: care of James Thompson, owner, Alberni, Vancou Island, B. C. Lands, on Tranquil Creek, Bear River district, Clayoquot d sion, give a fair showing of chalcopyrite, with occasional bornite. Ship 1905, circa 200 tons of ore to the Tyee smelter.

HIAWATHA GOLD & COPPER MINING CO.

Office: Coronado Bldg., Denver, Colo. Location of lands, if any, unkno Apparently a stock-jobbing outfit.

***HIBBE* GOLD & COPPER MINING CO.** CALIFORN

Office: Sheridan, Cal. N. H. Kaiehner, president; Geo. Grutman, se

ary and treasurer. Organized 1903, with capitalization $75,000, to operate in California. Idle and apparently moribund.

HIBERNIAN COPPER SYNDICATE, LTD. **IRELAND.**

Dead. Organized May 7, 1907, with capitalization £2,000, shares £1 par; liquidated Oct. 25, 1907. Formerly in Ireland.

HIBIRA MINE. **JAPAN.**

Mine office: Kitakata-mura, Higashi-Usuki-gori, Hyuga, Japan. Property is located on the eastern bank of the Tsunansegawa, a branch of the Gokasegawa river, giving deep water transportation. The property is an old mine, which was a considerable producer at the close of the Seventeenth Century.

Property carries mainly cupriferous pyrite, with some chalcopyrite, averaging 5 to 6% in copper tenor, in lenses with maximum thickness of 20', occurring in clay-slate and sandstone. Production was 1,769,498 lbs. fine copper in 1900, 2,166,102 lbs. in 1906, and 1,880,839 lbs. in 1907.

HICKEY COPPER, LTD. **TRANSVAAL.**

Office: Exploration Bldgs., Johannesburg, Transvaal. Louis L. Playford, Hon. W. A. Martin, A. Keeling and M. C. Inglis, directors; Ball & Stuart, secretaries. Organized August, 1908, under laws of Transvaal, with capitalization £3,000. Lands are 288 base metal claims, on the Motale and Lumbuvi rivers, in the Zoutpansberg district, showing a vein carrying chalcocite assaying up to 40% copper, said to be traceable 4 miles, opened by several prospecting shafts.

J. F. HICKS & CO. **TENNESSEE.**

Mine office: Bristol, Sullivan Co., Tenn. Lands are slightly developed, showing copper. Idle some years.

HIDACHI MINE. **JAPAN.**

Mine office: Hidachi-mura, Taga-gori Hitachi, Japan. Production was 377,560 lbs. fine copper in 1906, and 1,775,417 lbs. fine copper in 1907. Is a new property of considerable promise.

HIDALGO COPPER MINING & SMELTING CO. **MEXICO.**

Mine and works office: Zimapán, Hidalgo, Mex. Capitalization $2,000,000, shares $10 par, in half preferred and half common shares. Lands, 13 hectares, including 9 leased mines. The Concordia and Purisima mines produce mainly silver-lead ores, but property also has argentiferous copper ores. Smelter has a 25-ton lead stack and 30-ton copper stack.

HIDALGO MINING CO. **MEXICO.**

Mine office: Moctezuma, Sonora, Mex. Wm. Adamson, president; Capt. John Birmingham, general manager; E. L. Mahoney, superintendent. Organized under laws of Arizona, with capitalization $3,500,000, shares $1 par. Lands, 80 pertenencias, area 198 acres, in 3 groups, known as the Hidalgo group of 11 hectares, Pilares group of 9 hectares and Bataimole group of 71 hectares, lying 4 miles from the Nacozari railroad and circa 6 miles west of Moctezuma Copper Co. Property shows an ore body of 40' to 200' estimated width, occurring as a contact deposit between granite and limestone, with a 12' paystreak carrying mainly chalcopyrite and bornite, with occasional cuprite and melaconite, assaying 15 to 30% copper and up to 500 oz. silver per ton, with some lead. Mine has a 135' tunnel and 300' shaft, with about 3,000' of workings. A spring on the property carries water assaying up to 6.5 grains copper per gallon. Property considered promising and management good. Presumably idle.

HIDDEN TREASURE MINES CO. **NEVADA.**

Mine office: Ely, White Pine Co., Nev. Organized circa February, 1907. Presumably idle.

HIDDEN TREASURE *MINING CO.* **MONTANA.**

Office and mine: Higgins Blk., Missoula, Missoula Co., Mont. John P.

Graves, agent. Organized circa May, 1908. Lands, 6 claims, patented, in ... Wallace district, carrying 3 contact veins between slate and porphyry, ... vein being said to show 40' of concentrating ore, and a 30" paystreak of ... phide ore giving smelter returns of 13% copper, 28 oz. silver and $5.50 g... per ton, average value of ore being estimated, by former owner, as 6% copp... 12 oz. silver and $3.75 gold per ton, which probably is too high. Mine ... opened by shafts of 68' and 149', and by tunnels of 558' and 1,300', with ... 3,000' of workings. Made small shipments, 1905-1906, under former ownersh... to the East Helena and Tacoma smelters.

HIDDEN TREASURE MINING & MILLING CO. WASHINGTO...

Office: 428 Pacific Blk., Seattle, Wash. Mine office: Methow, Okanog... Co., Wash. Jas. West, treasurer and general manager. Organized 1896. H... a fissure vein of 2' to 4' average width, with occasional chutes of 8' to 1... width, traversing gneiss and carrying auriferous and argentiferous galen... sphalerite and chalcopyrite, with quartz and calcite gangue. Smelter shipm... of 90 tons gave returns of $67 per ton. Presumably idle.

HIDDEN TREASURE MINING & TUNNELSITE CO. WYOMIN...

Office: 1106 O St., Lincoln, Neb. Letter returned unclaimed from form... mine office, Encampment, Carbon Co., Wyo. John T. Dorgan, secretary; H. ... Rice, manager. Lands, 9 claims, patented, having about 950' of tunnels, s... to give a promising showing of auriferous and argentiferous copper ores. Id...

HIGASHIYAMA MINE. JAPA...

Mine office: Higashiyama-mura, Oe-gori, Awa, Japan. Ore is chalcopyri... associated with iron pyrites, occurring in lenses lying in quartz schist, a... averaging 2 to 2.5% copper. Latest recorded production, 1898, was 104,4... lbs. fine copper. Idle.

HIGGINS DEVELOPMENT CO. ARIZON...

Dead. Formerly at Bisbee, Cochise Co., Ariz. Very fully described Vo... IV and V.

HIGGINS MINE. ARIZON...

Office: care of Thos. Higgins, owner, Los Angeles, Cal. Mine office: B... bee, Cochise Co., Ariz. Fully described, under title Higgins Development C... Vols. IV and V.

HIGHLAND BOY CONSOLIDATED MINING CO. UTA...

Dead. Wound up, 1906. Formerly at Bingham Canyon, Salt Lake C... Utah. Described Vol. VI.

HIGHLAND BOY GOLD & COPPER MINING CO. UTA...

Mine office: Bingham Canyon, Salt Lake Co., Utah. Is controlled, throu... stock ownership, by Utah Consolidated Mining Co., and property is descri... under title of latter.

HIGH ORE GOLD & COPPER MINING CO. MONTAN...

Office: care of Mrs. Ella Knowles Haskell, secretary, Butte, Mont. L... ter returned unclaimed from former mine office, Basin, Jefferson Co., Mo... Organized under laws of Montana, with capitalization $150,000, shares $1 p... Lands are several patented claims and 2 water rights, 5 miles from Ba... Mine has a 1,900' tunnel, showing ore of fair grade. Idle several years.

HIGH ORE MINE. MONTAN...

Owned by Anaconda Copper Mining Co.

HIGH TOP COPPER MINING CO. VIRGIN...

Office: 1552-150 Nassau St., New York, N. Y. Mine office: Elk... Rockingham Co., Va. Morris D. Brown, president; Prentice W. Brown, sec... tary and treasurer; S. D. Brown, general manager. Lands, circa 1,000 acres, ... Greene county, Virginia, 7 miles from the Norfolk & Western railroad, s... *to show* 3 wide fissure veins, carrying carbonate and sulphide ores, la... *claimed* to contain average values of 6% copper, 10 oz. silver and $15 gold ...

ton, which is entirely too high. Apparently development consists of a 140' shaft and some open-cuts. Has steam power. Idle and apparently moribund.

HIGLEY MINE. **VERMONT.**

Mine office: Corinth, Orange Co., Vt. Suspended, circa November, 1907, on account of low price of copper.

MINA LA HIGUERA. **CHILE.**

Mine office: Higuera, La Serena, Coquimbo, Chile. Was a small producer at last accounts.

HIKO NEVADA MINING CO. **NEVADA.**

Mine office: Hiko, Lincoln Co., Nev. Is said to have a 3' vein, traceable some distance, giving average assays of 4.1% copper, 6.3% lead and 46 oz. silver per ton. Presumably idle.

MINA HILDA. **CHILE.**

Mine office: Higuera, La Serena, Coquimbo, Chile. Richard H. Everitt and Juan Bode, owners and managers. Lands, 2 pertenencias, area 10 hectares, 12 miles north of Higuera, carrying 3 parallel veins in diorite and granite. Main vein, circa 30' wide, at surface, shows chrysocolla and carbonate ores of good tenor, opened by shafts of 20' and 50' Ore, as produced, averages about 13% copper, after selection, and is sold to the Sociedad Minera San Juan. Completion of a projected railroad will permit shipment of low grade ores, of which the mine apparently possesses large quantities.

HILETA GOLD & SILVER MINING CO. **MEXICO.**

Mine office: Velardeña, Cuencamé, Durango, Mex. Carter Barker, general manager. Lands, 79 acres, also 63 acres miscellaneous lands, including the Hileta or Yleta, San Mateo and Santa Rita mines, latter being the principal property, adjoining the Velardeña mines. Country rocks are limestone and porphyry, showing 5 veins, of which one, of 12" to 3' width, opened by a 1,600' tunnel, with about 4,000' of workings, carries ore said to average 2% copper, 7% lead, 5% zinc, 60 oz. silver and $4.50 gold per ton. Equipment includes a steam plant, with two hoists, good for 1,000' each, and a 4-drill air-compressor.

HILLMAN COPPER CO., LTD. **ONTARIO.**

Office and mine: Sault Ste. Marie, Algoma, Ont. T. W. Trotter, president; Edw. Ewing, vice-president; Hugh McKinnon, secretary and treasurer. Organized 1907, under laws of Ontario, with capitalization $60,000, shares $10 par, as a holding and promotion company, with the plan of floating a larger company later. Lands, 640 acres, in the township of Aweres, near the Root River mine, on the main line of the Algoma Central railway, showing ore assaying up to 10% copper and 8 oz. silver per ton.

HILLSBORO CONSOLIDATED MINES CO. **NEW MEXICO.**

Dead. Was a swindle. J. N. A. Connor was president and general manager. Succeeded the Philadelphia Mining & Milling Co. Formerly at Hillsboro, Sierra Co., N. M.

P. C. HILLS & CO. **SPAIN.**

Operators of Compañía del Ferrocaril y Minas del Buitron.

HILLSIDE COPPER MINING CO. **NEVADA.**

Dead. Merged, June 4, 1906, in Bristol Consolidated Mines & Smelting Co. Formerly at Pioche, Lincoln Co., Nev. Described Vol. VI.

HIMMELFAHRT FUNDGRUBE. **GERMANY.**

Office: care of Kgl. Sächs. Staatsfiskus, Dresden, Germany. Mine office: Freiberg, Saxony, Germany. K. Stephan, manager. Is owned and operated by the Saxon Crown, employing circa 1,000 men, and is a producer of silver-lead ores, with small incidental production of copper.

HINDS CONSOLIDATED MINING CO. **MEXICO.**

Office: 1 Wall St., New York, N. Y. *Mine office:* Santa Bárbara, Hidalgo, Chihuahua, *Mex. Howell Hinds, president* and general manager; R. W.

Cavanaugh, vice-president and secretary; Wm. W. Elmer, mine superintendent. Organized circa 1907, with capitalization $5,000,000, shares $1 par. Lands include the Santa Gertrudis, La Reforma, Los Medios and Clarinas mines, circ 3 miles west of Santa Bárbara, showing 3 parallel fissure veins of 4' to 3 width, outcropping for about one mile, carrying sulphide ores. La Reform mine gives ore assaying up to 20% lead and 2% copper, with silver value Other mines carry gold ores. Idle at last accounts.

HINSDALE TUNNEL & REDUCTION CO. COLORADO

Mine office: Lake City, Hinsdale Co., Colo. H. S. Bushnell, superintendent. Succeeded, circa 1907, the Henson Creek Lead Mines Co. Lands, known as the Bonanza group, carry auriferous and argentiferous lead and copper ores. Has water and electric power and a 50-ton concentrator.

HIRAKANE MINE. JAPAN

Mine office: Nibukawa, Rikuchu, Japan. T. Yokoyama, owner; S. Tsubouchi, superintendent. Has argentiferous copper ores, 1906 production being 960,351 lbs. fine copper and 988,519 grams silver. Largest recorded production in 1903, was 1,169,637 lbs. fine copper. Property has steam and electric power.

HISAMUNE MINE. JAPAN

Mine office: Kawada-mura, Oe-gori, Awa, Japan. Is a comparatively new property. Ore, which is chalcopyrite, slightly argentiferous, and averaging 4% copper, occurs imbedded in clay-amphibolite, beds ranging 2' to 5' in thickness. Production, 1899, was 112,196 lbs. fine copper. Idle.

HISANICHI MINE. JAPAN

Mine office: Nakagawa-mura, Senhoku-gori, Ugo, Japan. Main vein has a strike of North 60° East, with steep dip to North of Northwest, and is 1' to 4' in width, carrying chalcopyrite associated with galena, sphalerite and pyrite, all slightly argentiferous, principal values being in copper and silver. Production, 1900, was 566,268 lbs. fine copper and 134,074 momme silver, increased 1906, to 1,444,464 lbs. fine copper and 1,012,012 grams silver, and again increased, 1907, to 1,574,499 lbs. fine copper and 229,680 momme fine silver. Management is progressive.

H. J. & F. H. COPPER MINING CO. NEW MEXICO

Letter returned unclaimed from former mine office, La Luz, Otero Co., N. M. F. W. Hunt, general manager; M. J. Cox, superintendent. Lands, in the Highrolls district, include the old Courtney mine, 8 miles east of La Luz, carrying argentiferous lead and copper sulphides. Made considerable shipments, 1907, to El Paso smelter.

HOFMAN CLAIMS. CALIFORNIA

Office and mine: Ukiah, Lake Co., Cal. Lands, 4 claims, showing carbonate and sulphide ores assaying 6% copper, 2 oz. silver and $5 gold per ton. Idle several years.

HOGASHO MINE. JAPAN

Mine office: Hatayama-mura, Aki-gori, Tosa, Japan. Ore is chalcopyrite, associated with pyrite, averaging about 7% copper, and occurs in lenses in country rocks of shale and sandstone, with intercalated red and green schalstein. Latest recorded production, 1900, was 138,032 lbs. fine copper. Presumably idle.

GEWERKSCHAFT HOHENSTAUFEN. GERMANY

Mine office: Essen, Rheinprovinz, Germany. W. Brandenburg, president. Produces yearly about 3,000 metric tons of zinc and copper ores, zinc ores predominating.

HOKOISHI MINE. JAPAN

Mine office: Kamo-mura, Nii-gori, Iyo, Japan. Ore is chalcopyrite, associated with pyrite, averaging 3.5 to 4% in copper tenor, occurring in n

average width, traversing chlorite-amphibolite. Production, 1900, lbs. fine copper. Presumably idle.

HORN SILVER MINING CO.

Office: 17 Battery Place, New York, N. Y. [illegible] Co., Utah. Allan C. Washington, president; [illegible] Ambrose I. Harrison, secretary and treasurer; [illegible] Organized 1879, under laws of Utah, with [illegible] U. $25 par.

The company has paid dividends of $[illegible] has for 1907 being $60,000, though the quarter[illegible] 3, passed. The

Mine is extensively developed, and [illegible] ving silver and gold, securing a little copper [illegible] rnace having been 129 tons copper ore, of [illegible] and mine carries good values at a [illegible] Moro- Stewall, with a little copper ore [illegible] 20-stamp mill.

Production, 1906, was valued at $[illegible] LIVIA. $110,181. Production, 1907, was [illegible], Potosí, fine, 206,537 oz. silver and [illegible] hairman consulting

was 717,353 lbs., in 1902. Mining was suspended, circa 1907, for first time in 20 years, because of temporary inability to market ore.

HORSESHOE COPPER CO. IDAHO

Mine office: Mackay, Custer Co., Idaho. D. E. McCallum, manager. Lands, 17 claims, adjoining the White Knob mine of the Empire Copper Co. on the north. Presumably idle.

HORSE SHOE COPPER MINING CO. ARIZONA

Dead. Was a brazen swindle for which directors were jailed. Formerly at Safford, Graham Co., Ariz. Described Vol. V.

HORSESHOE GOLD MINING CO. COLORADO

Mine office: Central City, Gilpin Co., Colo. Property is the Barnes mine carrying gold, silver and copper ores. Presumably idle.

HORSE SHOE MINING CO. WASHINGTON

Office: 231 Epler Blk., Seattle, Wash. Letter returned unclaimed from former mine office, North Bend, King Co., Wash. Swan Hansen, president and general manager; E. G. Moe, vice-president; S. P. Battleson, secretary and treasurer; preceding officers, Thos. Jones, O. E. Olson and O. Battleson, directors. Capitalization $1,000,000, shares $1 par. Lands, 11 claims, with 2 mill sites and several water rights, well watered and timbered, 12 miles east of North Bend, carrying a vein up to 25′ in width, opened by 2 tunnels showing chalcopyrite assaying 8 to 32% copper, with gold and silver values. Idle and presumably moribund.

HORSFAL MINING CO. COLORADO

Dead. Formerly at Gold Hill, Boulder Co., Colo.

HOUGHTON ALASKA EXPLORATION CO. ALASKA

Office: Houghton, Mich. Mine office: McCarthy Creek, Copper River district, Alaska. Ocha Potter, manager; Prof. Arthur E. Seaman, consulting engineer. Organized circa 1905, under laws of Michigan, with capitalization $500,000.

Lands, 26 claims, area 380 acres, of which 12 claims, area 180 acres, are in process of patenting, with balance of claims held by location, also a 5-acre millsite and 160 acres placer lands, held for townsite and general purposes. Lands adjoin the Bonanza group of the Kennicott Mines Co., on the northeast, and are on the McCarthy Creek slope of the divide, the Bonanza group being on the Kennicott slope. About 1,000 h. p. is available from McCarthy Creek for a hydro-electric installation.

The Bonanza fault, traceable circa 7,000′, consists of 6″ to 12′ width of brecciated limestone, with variable mineralization, latter occasionally up to 100′ in width, on the fault and along the stratification planes of intersecting veins. The Bonanza fault has a series of fissures cutting the main fault, with mineralization along both, at and near the points of intersection, but where other fissures intersect the cross-fissures, only the Bonanza fault is mineralized. Ore is exclusively chalcocite, except at surface, where sometimes broken down to carbonates, and the ore is pockety. Development consists of only 122′ of tunnels, as all work is exceedingly expensive and there is no particular object in developing extensively until transportation facilities are secured. It is hoped to have mixed rail and water shipping facilities, early 1909, by a steamer on the Chitina River, 24 miles to a railroad under construction. Management is good, and property is second only to the Bonanza mine in promise among all the copper properties of the Copper River district.

HOUGHTON CONCENTRATING CO. MICHIGAN

Office and works: Houghton, Houghton Co., Mich. Livingston Whitney, president; Geo. F. Chauncey, vice-president and treasurer; Alfred Schwartz, *agent*. Organized under laws of New York, practically as successor of Copper *Concentrating* Co., described Vol. VII. Property is the entire stock issue of

Manufacturing Co., which owns a lease of the Quincy sands, and described under title of latter-named corporation.

Apparf business.

A CONSOLIDATED DEVELOPMENT CO. **ARIZONA.**
Formerly at Palmerlee, Cochise Co., Ariz. Described Vol. VII.

MINERA HUACHUMACHAY. **PERU.**
ffice: Morococha, Junín, Perú. Organized 1900. Lands, 10 per- known as the Santo Domingo mine, opened by tunnel. The Crucero o veins, with practically vertical dip, cross diagonally, giving a on the Veta Crucero, which increased to width of about 20', carryraging about 15% copper and 2 kilograms silver per metric ton, ne gangue, the Veta Octavio being barren elsewhere. Production, 33,102 lbs. fine copper, secured with a force of 71 men.

MINERA HUACRACOCHA. **PERÚ.**
care of Dr. O. Valentine, general manager, Lima, Perú. Works rococha, Junín, Perú. Property is the Fundición Huacracocha, concentrator and smelter. The mill has 2 stamps, 2 Blake crushers, 2 Evans jigs, 1 classifier, 2 Frue vanners and 2 Wilfley tables. The mines from Morococha, on the shore of Lake Huacracocha, three miles, is of 75 tons daily capacity, with 1 reverberatory and 1 blast-furnaces, largest 30 tons. Has a 7' Pelton wheel and electric plant. Works run irregularly on custom ores. Idle.

A HUANCHACA DE BOLIVIA.
29 Rue de Londres, Paris, France. Mine office: Huanchaca de la Compañía, president; Marquis J. de Ballet, general manager, Huanchaca, Bolivia.

engineer; Segundo R. Nava, general secretary; Jorge Lewis, agent. Organized 1873, and reorganized 1891, under laws of Bolivia, with capitalization increased, 1877, and 1891, to 12,800,000 bolivars, shares 40 bolivars par, fully paid. In 1906 company earned a profit of 1,143,263 bolivars, and has paid considerable dividends.

Property is silver and copper mines, principal production being silver, though a little copper is produced from argentiferous tetrahedrite, at the company's smelter, and some copper is shipped. Company operates the Antofagasta & Bolivia railway, under lease, and has 600 miles of private telephone line.

The company has smelters at Pulacayo and Playa Blanca, latter, formerly leased by the American Smelting & Refining Co., apparently now idle. In 1907 the company shipped, to the Tacoma smelter, 1,600 tons of ore averaging 5% copper, 5% zinc and 50 oz. silver per ton, containing 160,000 lbs. fine copper.

SOCIEDAD DE MINAS i FUNDICIONES DE HUANILLOS. CHILE

Office: Santiago de Chile. Works office: Tocopilla, Antofagasta, Chile. Organized Nov. 28, 1905, under laws of Chile, with capitalization £200,000, shares £1 par. Has a smelter with blast and reverberatory furnaces, making ejes of about 47% average copper tenor. Production, 1903, was 245,085 lbs. fine copper.

HUBBARD-ELLIOTT COPPER MINES DEVELOPMENT CO. OF ALASKA. ALASKA

Office: 1115 Stock Exchange, Chicago, Ills. Western office: 411 New York Blk., Seattle, Wash. Mine office: Valdez, Prince William Sound district, Alaska. H. Curtis Elliott, president; H. P. Elliott, first vice-president and general manager; A. J. Elliott, secretary; John T. Evans, treasurer. Organized Jan. 6, 1904, under laws of Washington, with capitalization $1,500,000, shares $1 par. Controls, through ownership of 505,484 shares, the Knights Island Consolidated Copper Co.

Lands, 123 claims, area circa 2,500 acres, on Elliott Creek, an affluent of Copper River, interior Alaska, with 39 claims patented, and balance in process of patenting. Lands carry about 300 acres of timber, with an available water fall, rated as capable of developing 5,000 h. p. Country rock at the Elliott Creek mine, which is near the Bonanza mine, is greenstone, the contact carrying bunches of oxidized ores and chalcocite, with extreme horizontal length of 25', limited to a few yards in depth, and apparently no clearly defined veins have been found in place in this belt of slightly crushed greenstone. Company claims that this property shows 26 fissure veins averaging 20' to 60' width, 300' to 1,000' length and 1,100' depth. Depth claimed must be based on diamond drill borings, which were made circa 1905. Development is by the 190' Ely shaft and 3 tunnels. The Elizabeth tunnel is claimed to show 31' of 20% ore. The Ely tunnel is about 160' long and the mine has about 500' of underground workings, a pitifully small amount of work to show the 600,000 tons of ore claimed by the company to be blocked out for mining, which is claimed to average 28% copper, an excessive estimate. Company claims that ores have been shown to continue unaltered for depth of 200'. Line has been surveyed for a 17-mile tramway, of 1,000 tons daily capacity, to connect mines with the Copper River & Northwestern railway. Buildings include a smithy, carpenter-shop and 4 log cabins.

Apparently the company has devoted its recent efforts mainly to the development of the Knights Island Consolidated Copper Co. Claims of the company for its Elliott Creek property not only are excessive, but are under suspicion of being deliberately untruthful. Is not regarded favorably.

NING INVESTMENT CO. **ARIZONA.**
office: Benson, Cochise Co., Ariz. Property is the Valenzuela group, ncon Mountains, circa 25 miles northwest of Benson.

NIE DES MINES DE CUIVRE DE HUELVA. **SPAIN.**

: Wallace, Idaho. Mine office: Saltese, Missoula Co., Mont. Her- idemann, superintendent. Organized 1907, with capitalization , shares $1 par. Lands, 3 claims, lying immediately east of Saltese, 2 veins, which should be cut by tunnel at length of circa 850′ and pectively. Has a 200′ tunnel with a 50′ winze, showing ore carrying copper and $7 gold per ton.

D MINERA HUILLCA. **PERÚ.**
office: Morococha, Junín, Perú. Organized 1892. Lands, 3 per- , known as La Huillca and La Vieja mines. Production, 1904, was of 18% ore, yielding 166,491 lbs. fine copper. Employs circa 50 men.

COPPER MINES, LTD. **PERÚ.**
101 Leadenhall St., London, E. C., Eng. Mine office: Huaraz,

Ancachs, Perú. Col. D. Pedro Juárez, chairman; A. Ferguson, mana rector; Wm. Warren, mine manager. Organized May 9, 1904, under Great Britain, with capitalization £400,000, shares £1 par. Debentures, Lands, 256 hectares, circa 30 miles from Puerto Culebra, including t taña de La Plata mines, carrying argentiferous copper ores. Also has cite coal lands 15 miles from copper property. Has been building a for several years, and expected, at last accounts, to put same in bl ing 1908.

COMPAÑIA MINERA DE HUIRIÁCHIC. M

Mine office: Chalchihuites, Sombrerete, Zacatecas, Mex. John president; C. A. Phelps, treasurer and general manager, at last account are argentiferous and auriferous chalcopyrite and galena, developed b and tunnel. Presumably idle.

HULBERT MINING CO. MIC

Office: 199 Washington St., Boston, Mass. Mine office: Leopol Houghton, Houghton Co., Mich. Albert S. Bigelow, president; W Chrimes, secretary; Wm. J. Ladd, treasurer; Norman W. Haire, gener ager. Fred W. Nichols, agent. Lands, 1,598 acres, in Town 57 North 37 West; Town 56 North, Range 33 West, and Town 55 North, Range 3 Houghton county, Michigan. Lands are mainly undeveloped properti a considerable part of the surface rights has been sold, mineral rights been reserved by the company. Idle many years.

HULL COPPER CO. AR

Office: 1505 Real Estate Trust Bldg., Philadelphia, Pa. Min Jerome, Yavapai Co., Ariz. Hon. Geo. W. Hull, president and general m O. B. Stanton, vice-president; W. B. Hazeltine, treasurer; W. B. Wil retary; Capt. Wm. McDermott, general superintendent; J. W. Hubba superintendent. Organized 1906, under laws of Arizona, with capit $10,000,000, shares $1 par. Is said to have clear titles and no incum Apparently has no treasury stock, but it is understood that Mr. Hull 50% of profits of sales of stock to treasury, up to amount of $150,00 arrangement cannot be regarded as giving an adequate financial basis development of a mine. The O. B. Stanton outfit, as fiscal agents, circa 1907, to newspapers that would carry their advertisements, a 5 mission on all stock sales, showing that commissions were excessive.

Lands, 21 patented claims, area 249 acres, adoining on northw south the United Verde. Development is by the 1888 shaft, of 475', within 200' of the United Verde smelter, which has produced amount of ore. Principal development is by the Dillon tunnel, of abo length, which would connect with shaft at depth of about 3,850' fro providing the tunnel is continued and shaft sunk to the point of inte The Dillon tunnel is quoted as showing ore of 19 to 20% copper ten small gold and silver values, but has no body of commercial ore de despite the extremely optimistic claims made in advertisements, tho tunnel shows small bunches of ore at various points. Property has a about 7,000' of workings, and it is claimed that considerable good been proven by diamond drill cores, taken from the Hull lands by th Verde, but this statement does not seem fully verified.

Property is considered promising, being perhaps the most prom the developing mines in the United Verde district, and Mr. Hull h regarded personally; but the Stanton crew is viewed with deep susp utterly lost to all sense of truth, and company's advertisements claim *too much* on the strength of the United Verde, and hold out roseate p *to investors* that lack substantial foundation.

MBER CONSOLIDATED MINING & MANUFACTURING CO. NEWFOUNDLAND.

Office: 27 William St., New York, N. Y. Moribund. Formerly at York arbour, Newfoundland. Fully described Vol. V.

UMBOLDT-ARIZONA COPPER CO. ARIZONA.

Mine office: Humboldt, Yavapai Co., Ariz. Lands, 5 claims, near Humldt, having an 80' shaft.

UMBOLDT COPPER CO. MICHIGAN.

Office: 64-50 State St., Boston, Mass. Mine office: Copper Falls, Keweenaw Co., Mich. C. Howard Weston, president; John Brooks, secretary and treasurer; J. Wesley Clark, superintendent; preceding officers, W. C. Fisk and Wesley Watson, directors. Organized 1863, under laws of Michigan, and capitalization increased, later, to $1,000,000, shares $25 par. Amount paid in is ,000 in real estate and $240,986.76 in cash. Annual meeting, fourth Tuesday in March.

Lands are Sections 16 and 21, former fractional, Town 58 North, Range 31 West, all on the mineral belt, about midway between the Arnold and Phoenix mines, lying north of the greenstone, with the Eagle River and Natick mines to the south. The mine was opened 1853, but never was a producer. There is a single shaft, circa 300' deep, on the ashbed, which shows the same characteristics as at the Arnold, carrying occasional bunches of rich ground. Equipment includes an engine-house, compressor building, smithy, warehouse and 4 dwellings.

UMBOLDT COPPER CO. NEVADA.

Office: 618 Kohl Bldg., San Francisco, Cal. E. J. Miloy, president; C. C. Keating, Jr., vice-president; M. P. Danly, secretary; preceding officers, E. B. Grace and Dr. Geo. E. Ebright, directors. Organized under laws of Arizona, with capitalization $1,000,000, shares $1 par. Company asserts that it has 8 claims, on Jackson Mountain, Humboldt county, Nevada, connected by a good wagon road, with a railroad 60 miles distant. Property is claimed to have circa 1,000' of workings, showing a vein of 12' width at surface, widening to 74' in the lower tunnel, carrying ores that have assayed 15 to 16% copper, 3 to 5 oz. silver and $1.65 gold per ton. Company's business methods are devious.

UMBOLDT ORE CO. ARIZONA.

Mine office: Humboldt, Yavapai Co., Ariz. Capitalization presumably ,000. Is controlled, through ownership of practically entire stock issue, by Consolidated Arizona Smelting Co.

UMBOLDT SMELTER. ARIZONA.

Owned by Arizona Smelting Co.

UMBOLDT SMELTING & REDUCTION CO. NEVADA.

Dead. Was reorganized May 5, 1904, under laws of District of Columbia, with capitalization $500,000, shares $1 par. Property was sold, 1906, to Nevada Mining Co., Ltd. Officers were E. L. Labadie, president; G. A. Brevoort, secretary; preceding officers, Geo. Haldorn, C. E. Fish, A. S. Donald, R. W. McCormick, E. L. Freeman and P. T. Kretschmann, directors. Former office was 520 Tenth St., N. W., Washington, D. C. Formerly at Golconda, Humboldt Co., Nev.

BUG MINING CO. UTAH.

Mine office: Eureka, Juab Co., Utah. Ores carry gold, silver and copper. Idle and apparently moribund.

PHREY-ARIZONA GOLD-COPPER MINES CO. ARIZONA.

Letter returned unclaimed *from former mine office*, Wickenburg, Maricopa Co., Ariz. *Lands, near the Rio Tonto Copper Co.*, east of Wickenburg, *in the Picacho district, were being developed, 1907*, on a small scale. Idle.

HUNGARIAN COPPER CO. MIC

Dead. Wound up circa 1898 and lands sold to Oneco Copper Mi Formerly at Hancock, Houghton Co., Mich.

HUNT COPPER CO. NEW M

Office: Alamagordo, N. M. Mine office: Mountain Park, Ot N. M. Organized 1907. Lands, in the Highrolls district, 3 miles from tain Park, are said to show considerable sulphide copper ore.

HUNTERS CREEK MINING & MILLING CO. WASHI

Office: 1515 Masonic Temple, Chicago, Ills. Geo. W. Smith, pr M. L. Brain, secretary; Manson Rexford, treasurer. Lands, 20 cla Stevens county, Washington, claimed to show a vein of 18" to 40" assaying 17 to 20% copper. Company claims to have a 755' tunnel. Se Brain writes that a great injustice was done by the statement in Vol. the company was alleged by shareholders to be a fraud. The annual of the company is a curiosity, including the most remarkable financia ment ever seen by the Copper Handbook. Is in litigation, and is view suspicion.

HUNT MINING & MILLING CO. I

Office: 8 India St., Boston, Mass. Letter returned unclaimed from mine office, Weiser, Washington Co., Idaho. Idle some years and m

HURON GOLD CO. AR

Office and mine: Jerome, Yavapai Co., Ariz. Geo. W. Hull, pr treasurer and general manager; H. E. Wilcox, secretary. Organized laws of Arizona, with capitalization $1,000,000, shares $1 par. Lands, 5 area 80 acres, known as the Swindler mine, in the Big Bug district, h 125' shaft and 680' tunnel, with upwards of 1,000' of workings, showing up to 18' width, carrying ore giving assays of 2.5 to 11% copper and $ gold per ton. Is said to have 800 tons of ore on dump. Idle several ye

HURON MINING CO. WASHI

Office: Everett, Wash. Mine office: Darrington, Snohomish Co., Ores carry copper and gold values. Has water power. Idle several ye

HUSTON MINE. ON

Office: care of John J. Case, Morococha, Junín, Perú. Mine office: salon, Algoma, Ont. Lands, 1,400 acres, 15 miles north of Thessalon, a 60' vein, standing circa 40' high, traceable circa 3,000', with an streak carrying sulphide ore with quartz gangue, up to 8% in copper te but slightly developed. Idle since circa 1902.

HYATT-VERDE COPPER CO. COLO

Office and mine: Steamboat Springs, Routt Co., Colo. B. C. Hazel manager. Was developing, 1907, on a small scale.

HYDAH COPPER CO. AL

Office: care of Fred J. Eitel, president, Seattle, Wash. Mine offic permount, Prince of Wales Island, Alaska. J. A. Jackson, vice-pre Victor Vigelius, general manager; F. W. Crary, secretary; J. Albert J treasurer; C. H. Waters, superintendent. Organized 1906, under l Washington, with capitalization $60,000. Lands, known as the Ma group, are on the north side of Karta Bay, circa 2,000' from tidewat veloped by a 40x40' pit showing an ore body of 40' width, low in copp and carrying up to $2 gold per ton. Has a tunnel connecting with bins, which in turn has a 2,100' tramline running to ore bunkers on the at tidewater. Shipped some ore, 1907. Property considered promising.

HYPOCKA MINING CO. MON

Dead. Lands sold, 1906, to Butte Coalition Mining Co. Form *Butte, Silver* Bow Co., Mont.

THEEK MINING & MILLING CO. **IDAHO.**
ice: Wallace, Idaho. Mine office: Kingston, Shoshone Co., Idaho. Guay, president; Walter J. Bracking, vice-president; Norman Ebbley, manager; Abraham Wyman, secretary; B. S. Knudson, treasurer; pre- officers, Frank Guay, C. W. Wingate and A. H. Conner, directors. nds show 3 veins, two of 10′ to 20′ estimated width, and one, known Great Western, under development, which is opened by a 180′ blind from the breast of a 700′ tunnel, showing a vein of 8′ to 25′ width, with to 18″ paystreak carrying native copper and cuprite, said to average in tenor, and chalcopyrite assaying up to 16% copper, balance of vein ug low grade ore estimated at 2% copper, with small gold and silver . Property also shows galena, apparently undeveloped. Equipment in- a 65-h. p. boiler, 10-h. p. hoist, 5-drill air-compressor and a sawmill.

EDAD COLECTIVA IBARRA HERMANOS. **SPAIN.**
fice: Sevilla, Spain. Mine office: Cortegena, Huelva, Spain. José Luis , manager. Property is the San Telmo group of 29 old mining claims, 22 hectares, carrying cupriferous iron pyrites.

PLOMOSA MINING CO. **ARIZONA.**
ffice: Yuma, Ariz. Mine office: Bouse, Yuma Co., Ariz. Thos. L. in president; H. H. McPhaul, vice-president; Wm. C. DeSpain, secretary reasurer; preceding officers, J. L. DeSpain and J. D. Marrs, directors. ized 1907. Lands, circa 30 claims, and 28 claims said to have been , early 1908, in the Plomosa Mountains, 12 miles south of Bouse, show- idized ores of high copper tenor, carrying up to $4.50 gold per ton.

OCLAST CONSOLIDATED MINES CO. **WASHINGTON.**
ffice: 412 Berlin Bldg., Tacoma, Wash. Mine office: Keller, Ferry Co., J. R. Turner, president; C. E. Peterson, secretary; Alexander Mc- rs, superintendent. Organized 1902, under laws of Washington, with lization $2,500,000, shares $1 par, as a merger of Alliance Copper Mining d Iconoclast Gold & Copper Mining Co.
ands, 7 claims, area 115 acres, circa 2 miles north of Keller, showing 3 t deposits, one claimed by company to be 150′ wide and to carry chal- te assaying 5% copper, 2 oz. silver and $5 gold per ton, which is a s overestimate all around, property apparently having an ore body up in width, giving average assays of 3.6% copper and 2 oz. silver per ith some gold. Development is by a 325′ main shaft, and 3 tunnels with d aggregate length of 514′, longest tunnel apparently being 120′ only. asoline power. Resumed work, early 1907, after a period of idleness. ntly idle again.

CLAST GOLD & COPPER MINING CO. **WASHINGTON.**
ad. Absorbed, 1902, by Iconoclast Consolidated Mines Co. Formerly er, Ferry Co., Wash.

CONSOLIDATED COPPER CO. **IDAHO.**
ice: Newcastle, Pa. Mine office: Grangeville, Idaho Co., Idaho. J. Cunningham, president; Irvin E. Rockwell, manager. Lands, on the River, have a 700′ tunnel, showing ore assaying up to 15% copper, ilver and $2 gold per ton. Equipment includes an 800-h. p. hydro-elec- tallation and a 200-ton mill, in 2 units, one dry and one wet, the dry having Sutton & Steele dry tables, while the wet section is equipped Tilfley tables, Callow screens and tanks.

CONSOLIDATED COPPER MINES CO. **IDAHO.**
ad. Was a bit of stock-jobbery. Formerly at Decorah, Washington ho.

CONTINENTAL MINE. **IDAHO.**
ne office: Priest River, Bonner Co., Idaho. Lands, north of the Priest

Lake Mining Co., are opened by tunnel, showing ores carrying values main in silver-lead, with some copper.

IDAHO COPPER CO. IDAH

Office: care of John H. Nordquist, Wallace, Idaho. Mine office: Coe d'Alene, Kootenai Co., Idaho. Lands adjoin the Reindeer mine, extension vein of which is being sought by tunnel.

IDAHO COPPER MINES CORPORATION, LTD. IDAH

Office: 1906-74 Broadway, New York, N. Y. Thos. Greenwood, manage N. S. Edwards, consulting engineer. Location of lands in Idaho, if any, u known.

IDAHO COPPER MINING CO., LTD. IDAH

Mine office: Wallace, Shoshone Co., Idaho.

IDAHO COPPER MINING & SMELTING CO. IDAH

Dead. Formerly in Idaho county, Idaho. Described Vol. VII.

IDAHO MILLING CO. IDAH

Dead. Formerly at Doniphan, Blaine Co., Idaho.

IDAHO REDUCTION CO., LTD. IDAH

Office: Corcoran Bldg., Washington, D. C. Letter returned unclaim from former mine office, Weiser, Washington Co., Idaho. Works office: Clark ton, Asotin Co., Wash. Geo. A. Rahm, president; C. F. Drake, vice-presiden F. S. Bright, secretary; John Sennett, treasurer; preceding officers and Fairfield, directors. Organized 1903, with capitalization $1,000,000, shares par. Said to plan removal of smelter, on account of high price of fuel. Pr sumably idle.

IDAHO SMELTING & REFINING CO. IDAH

Office: Rookery Bldg., Spokane, Wash. Mine office: Sand Point, Bo ner Co., Idaho. J. Herbert Anderson, president; C. C. Titus, general ma ager. Organized circa 1907, with capitalization $2,000,000, as a reconstru tion of the Panhandle Smelting Co. Has authorized a $500,000 issue of 6 bonds. Indebtedness of old company, amounting to circa $217,000, was sumed by the new corporation.

Lands include the Venezuela group of claims, slightly developed, on t southeastern shore of Lake Pend d'Oreille, carrying silver-lead ores.

The 200-ton reduction plant, known as the Panhandle or Ponderay smelt on Lake Pend d'Oreille, is primarily a lead plant, though capable of handli copper ores also. Equipment includes four 60-ton roasters. There is a wha and the company owns a small steamboat.

The smelter was blown in circa June, 1907, and blown out shortly ther after, ostensibly owing to lack of sulphide ores for fluxing. The smelter w again blown in Oct. 20, 1908, with a force of circa 75 men, and is planne to do a general custom smelting business, more especially on silver-lead ore and is being managed under the advice of the Montana Mineowners' Associa tion, which furnishes moral support and has promised to furnish ore. The has been talk of increasing the capacity of the plant, but this is prematur as the works should first demonstrate their ability to operate profitably.

IDAHO & SPRING GULCH MINING & MILLING CO., LTD. MONTANA

Office and mine: Mullan, Shoshone Co., Idaho. F. Carson, president a general manager; Andrew Swanson, vice-president; R. A. M. Vitty, secre tary; Wm. Coumerlh, treasurer. Organized Oct. 30, 1906, under laws of Idah with capitalization $1,000,000, shares $1 par; issued, circa $850,000.

Lands, 7 claims, 1 fractional, area circa 110 acres, well timbered, b tween the Little Pittsburg and King and Queen mines, in an unorganize district near Carter, Missoula Co., Mont. Property shows porphyry, slat *limestone*, carrying 2 ore bodies, of which one, under development of 6' *mated average* width, traceable 2,000', is estimated to average 6% copper a

oz. silver per ton, mainly from gray copper ore. There also is a parallel vein, carrying silver-lead ore. Development on the copper vein is by shafts of 50′ and 300′, and tunnels of 60′ and 700′, longer being planned to be driven 1,700′, to cut both copper and lead veins. The upper tunnel shows malachite and azurite, assaying circa 7% copper, 1.4 oz. silver and 1 to 6 oz. gold per ton. Mine has 3 small buildings and is circa 3 miles from the Montana and Northern Pacific railroads.

IDA MONTANA DEVELOPMENT CO. **MONTANA.**

Dead. Was organized June 6, 1906, under laws of Arizona, with capitalization $800,000, shares $10 par, and reorganized circa August, 1907, as Ida Montana Mining Co. Formerly at Butte, Silver Bow Co., Mont.

IDA MONTANA MINING CO. **MONTANA.**

Office: Calumet, Mich. Mine office: Butte, Silver Bow Co., Mont. P. D. MacNaughton, president; Capt. Jas. W. Milligan, vice-president and mining director; Wm. J. McDonald, secretary; Jos. W. Selden, treasurer; M. J. McEvans, superintendent; preceding officers, Wm. H. Thielman, F. P. Rugee, Victor Nordberg, Edward Ulseth, Angus McDonald and Jeremiah E. O'Neil, directors. Organized 1907, under laws of Arizona, with capitalization $1,000,000, as a reconstruction of the Ida Montana Development Co.

Lands, 3 claims, known as the Ida, A and B, near the Amazon-Butte, across the valley and about 1½ miles southeast of Butte, just south of Columbia Gardens, said to have been bought for $175,000, and to be fully paid for.

The property had 2 old shafts, of 115′ and 118′, one of which, known as No. 3, has been cut down to 3-compartment size, and sunk to 480′ depth, and is planned to be sunk 1,000′. This shaft shows, on the 250′ level, copper sulphides carrying silver and gold values of commercial grade, and a little ore was shipped, 1908, by leasers.

Equipment includes a hoist good for 1,500′, from the Baltic mine, and a 20-drill air-compressor, with several small mine buildings. Property employed circa 50 men, late 1907, but was attached December, 1907, in 3 actions, for supplies furnished. Apparently the indebtedness has been liquidated, and, late 1908, company planned early resumption. Management includes some strong and experienced mining men, but property lies outside the proven ore zone of Butte.

IDEAL MINING CO. **UTAH.**

Office: care of Newton A. Dunyon, president, Salt Lake City, Utah. Mine office: Milford, Beaver Co., Utah. Wm. M. Bradley, vice-president; W. T. Atkin, secretary and treasurer; preceding officers, C. M. Strevell and J. H. Paterson, directors. Property adjoins the Burning Moscow mine. Presumably idle.

IDEAL MINING & DEVELOPMENT CO. **ARIZONA.**

Office: 38 Wall St., New York, N. Y. Mine office: McCabe, Yavapai Co., Ariz. Cecil G. Fennell, general manager; M. J. Enright, superintendent Gladstone mine; Jas. O'Brien, superintendent Model mine.

The Gladstone mine has a 1,000′ shaft, with auriferous and argentiferous copper and lead ores, values being mainly in gold. Equipment includes an electric pump, on the 800′ level, handling 20,000 gallons daily, a 120-h. p. Sandrie & Bolthoff hoist, capable of raising 3-ton loads from 1,500′, and a 10-drill Ingersoll-Sergeant air-compressor, all electrically operated by a Crocker-Wheeler motor. The Gladstone ships high grade ore, and runs concentrating ore through the McCabe mill.

The Model mine, 6 claims, formerly known as the McCabe, bought, circa 1906, for $81,521, has a 750′ incline shaft, with about 12,000′ of workings, showing several ore bodies carrying 8″ to 10″ of smelting ore, and 12″ to 24″ of milling ore, former with combined gold, silver and copper values of $35

to $85 per ton, and latter carrying about 2% copper, with small gold and ver values. Country rock is granite, with numerous intrusive porphyry dik granite being much shattered. Oxidized zone is only about 40' deep, follow by auriferous and argentiferous copper, lead and zinc sulphides.

The McCabe, or Model mill, has 10 stamps, a 50-ton Elspass mill, 1 W fley and 3 Standard tables. Production, 1906, was 518,895 lbs. fine copp 139,766 oz. silver and 14,696 oz. gold, of the total value of $497,152. Produ tion, 1907, was 361,257 lbs. fine copper, 117,582 oz. silver and 12,004 oz. go

IKONOMOFF CESSION. BULGARI

Office: care of M. Dimitri Ikonomoff, owner, Hotel Boulevard, Sofia, B garia. Mine office: Kara-Baïr, Bourgos, Bulgaria. Lands, slightly develope are held as a cession from the principality. Idle.

IKUNO MINE. JAPA

Owned by Mitsu Bishi Goshi-Kwaisha.

ILION MINING CO. UTA

Mine office: Bingham Canyon, Salt Lake Co., Utah. Lands, 2 claim known as Grand Cross and Rough & Ready. Idle some years.

ILLINOIS COPPER MINING CO. WYOMIN

Office: 862 Monadnock Blk., Chicago, Ills. Mine office: Encampme Carbon Co., Wyo. Geo. H. Miller, president and general manager; N. V. Mallory, secretary and treasurer; A. H. Oldman, superintendent. Organiz 1899, under laws of Wyoming, with capitalization $1,000,000, shares $1 p Lands, 9 claims, area 185 acres, in the Upper Platte district, near the Colora line, showing 3 contact veins, principal said to be 18' wide, 50' deep and 4,5 long, carrying chalcocite, with quartz gangue, assaying 14 to 27% copper, oz. silver and $4 gold per ton, which is excessive. Has 3 shafts, deepest Was working a small force early in 1907.

ILLINOIS COPPER MINING & MILLING CO. WASHINGTO

Letter returned unclaimed from former mine office, Republic, Ferry C Wash. Is said to have 40' vein, opened by a tunnel showing copper ore commercial grade.

ILLINOIS GOLD & COPPER MINING CO. MEXIC

Dead. Formerly at Pánuco de Monclova, Coahuila, Mex.

ILLINOIS-JALISCO MINING CO. MEXIC

Office: 213 South Sixth St., Springfield, Ills. Mine office: Ayutla, Autla Jalisco, Mex. E. A. Perry, president; Homer Vandevender, vice-president; Th Montgomery, secretary; J. T. Ash, treasurer; preceding officers and Geo. Gibbons, directors; John Breckenridge, general manager. Capitalizat $1,000,000, shares $1 par; issued, $750,000.

Lands, 45 hectares, including El Crudo and El Bajio mines, latter a antigua. Property is said to show 15 veins, with 6 under development, ma vein being 8' to 17' in width, traceable 2 miles. El Crudo shaft, of 225' depth shows ore of 5 to 20% copper tenor, estimated to average 5% copper, 15 silver and $5 gold per ton. Mine has about 3,000' of workings, estimated show circa 50,000 tons of ore.

Company plans a 500-h. p. hydro-electric installation, mining equipme and building a concentrator. Employs circa 75 men.

ILLINOIS & JEROME COPPER CO. ARIZONA

Mine office: Jerome, Yavapai Co., Ariz. A. D. Zallanack, president; Fre H. Gorham, vice-president; Annie E. Zallanack, secretary and treasurer; pr ceding officers are the directors. Organized circa August, 1908, with cap talization $1,000,000, shares $1 par. Lands are near the Copper Chief.

ILLINOIS MEXICAN COPPER CO. MEXIC

Office: 15 Broad St., New York, N. Y. Mine office: Ayutla, Autl

lisco, Mex. L. C. Frey, manager. Organized 1906, with capitalization 00,000. Presumably idle.

INA ILUSION. **CHILE.**

Mine office: Talcuna, La Serena, Coquimbo, Chile. Victor Illanes, owner nd manager. Property, 16 kilometers from Marquesa railway station, shows vein of about 12′ average width, and, in 1903, with a force of 16 men, roduced about 400 metric tons of ore of about 9% average copper tenor.

MA CONSOLIDATED MINING & MILLING CO. **IDAHO.**

Dead. Formerly at Patterson, Lemhi Co., Idaho. Described Vol. VI.

MLAY COPPER MINING CO. **NEVADA.**

Office: Salt Lake City, Utah. Mine office: Humboldt House, Humboldt ., Nev. Geo. W. Morgan, president; R. E. Siddoway, secretary; preceding fficers, Jos. Lippman, Sidney M. Bamberger, F. M. Smith and O. W. Powers, irectors; J. R. Turner, superintendent. Changed name, early 1907, from Iorrison Mining Co. to present title, and increased capitalization to $5,000,000.

Lands, 26 claims, unpatented, 2 millsites and a townsite, circa 5 miles rom Humboldt House. Mine has 250′ incline shaft, with circa 1,500′ of work-ngs, showing ore assaying up to 8.8% copper, 7.6% lead and 0.18 to 66.5 oz. old per ton. Equipment includes two 60-h. p. boilers, a hoist and several mall buildings. A concentrator is planned. Begun shipments circa April, 08, to the Selby smelter, shipping one carload weekly, of ore running $50 to 00 per ton in values. A mill is planned. Property considered promising.

MPERIAL COPPER CO. **ARIZONA.**

Dead. Formerly at Wickenburg, Maricopa Co., Ariz. Described Vol. III.

MPERIAL COPPER CO. **ARIZONA.**

Office: 1408-11 Pine St., New York, N. Y. Operating office: Tombstone, riz. Mine office: Silver Bell, Pima Co., Ariz. E. B. Gage, president; W. F. tanton, vice-president and general manager; A. N. Gage, secretary and reasurer; preceding officers, Selwyn Eddy, V. L. Mason and H. M. Robinson, irectors; David Morgan, mine superintendent; C. C. Klingerman, railroad uperintendent; S. F. Shaw, engineer; J. C. Woodworth, mine foreman.

Organized May 15, 1903, under laws of Arizona, with capitalization 0,000,000, shares $10 par. Bonds, $2,000,000 authorized, at 6%. Is con-olled, through ownership of practically entire stock issue, by Development o. of America. Apparently controls, through ownership of practically entire ock issue, the Southern Arizona Smelting Co., though latter-named corpora-n may be controlled by the Development Co. of America. Paid 2% divi-nds, April, 1906, and January and April, 1907, but suspended dividends on ccount of the depression in the copper market. Net earnings, for fiscal year nding March 31, 1908, were $220,129. Fiscal year has been changed to end eptember 30. Annual meeting, second Tuesday in November.

Lands, 60 claims, mostly patented, area circa 1,000 acres, also a 640-acre illsite at Red Rock, with total holdings of about 3,000 acres, in the Silver ell Mountains, a small independent range having a granitic base, with uestone and quartzite capping, latter much eroded and entirely gone at ny points. There has been much faulting and shearing, ore bodies occur-g as irregular contact lenses, having a northwesterly strike, with axes rallel to fault and fissure planes. The granite-porphyry in the vicinity of lenses is strongly mineralized with copper sulphides. The eruptive dioritic es are highly altered, and the ore bodies carry strong gossans. The oxidized e is comparatively shallow, being not deeper than 150′ in the principal rkings, with a sharp change from the oxidized to the base zone. The dized ores are mainly cuprite, malachite and azurite, with furnished the t of past production, while the sulphide ore is mainly chalcopyrite, with asional bornite. The mines also show some cupriferous silver-lead ore,

much of which is an intimate mixture of galena, sphalerite and chalcopyrite decidedly difficult of satisfactory reduction. Ores mined, 1905, were reported to average 9.08% copper, 1.2 oz. silver and 12 cents gold per ton.

Property includes the Old Boot mine, now known as the Mammoth, opened circa 1865, which was a small producer, at irregular intervals, of high grade copper and silver-lead ores, under former ownership. This mine is opened by the 2,000′ Page crosscut tunnel, and by the Mammoth and Union shafts, to depth of circa 800′, with upwards of 6 miles of workings. The old Mammoth incline shaft, of 400′ depth, was replaced by a new 2-compartment vertical shaft, the old shaft now being used solely for ventilation and pump-columns.

Equipment includes a power plant with six 70-h. p. boilers, burning petroleum, with oil storage tanks, and 5 hoists, of 12-h. p. to 200-h. p. each, largest having 14x18″ cylinders, being good for 2,000′ depth. There are 10-drill and 15-drill 2-stage Norwalk straight-line air-compressors, and a Nordberg cross-compound condensing air-compressor, with piston efficiency of 3,000 cu. ft. free air per minute.

Buildings include 20x30′ and 30x80′ machine shops, of wood, sheathed with corrugated iron, a 36x40′ carpenter shop, a framing-mill, an 18x50′ smithy, bunk-houses, boarding-houses, changing-houses and about 20 dwellings, with a 3-story mine store, carrying a large stock. There also is an electric light plant.

The 300-ton concentrator, completed September, 1908, is said to have cost circa $165,000. There also is a 20x40′ experimental mill, of 10 tons daily capacity.

The Arizona Southern railway, 21 miles long, from Silver Bell to Red Rock, where connection is made with the Southern Pacific, is of standard gauge, and was built by the company. Equipment includes 2 locomotives and 5 cars.

The smelter, at Sasco, 8 miles south of Red Rock, is described separately under title of its owner, the Southern Arizona Smelting Co.

About 300 men are employed, mainly Mexicans, at average wages of $2 per day.

Production has been as follows: 3,030,630 lbs. fine copper in 1904; 5,687,152 lbs. in 1905; 4,385,246 lbs. in 1906; 5,267,401 lbs. fine copper and 63,170 oz. silver in 1907. For fiscal year ending March 31, 1907, production was 38,072 tons of ore, yielding 4,275,090 lbs. fine copper and 48,252 oz. silver; and for fiscal year 1908 output was 49,205 tons of ore, yielding 5,740,975 lbs. fine copper and 67,701 oz. silver. For first half of 1908 copper is said to have been produced for 10.68 cents per pound. Until Feb. 1, 1908, when the Sasco smelter was blown in, all ore was shipped to outside smelters. Copper is sold by the American Metal Co., Ltd., under a 3-year contract. Production, 1908, should show a very large increase, owing to increased productive capacity of the mill and smelter, and the company plans making 12,000,000 to 15,000,000 lbs. fine copper yearly. The property is well managed and is considered exceptionally promising.

IMPERIAL COPPER CO. ONTARIO.

Dead. Formerly at Parry Sound, Parry Sound district, Ont.

IMPERIAL COPPER & GOLD MINING CO. WYOMING.

Office: 219 Germania Bldg., Milwaukee, Wis. Letter returned unclaimed from former mine office, Encampment, Carbon Co., Wyo. Lands, 160 acres, near the Portland mine, on Upper Cow Creek, 12 miles west of Encampment, claimed to show 2 veins, 1 with width of 26′ to 32′ being a schist dike, has about 400′ of workings, showing ore assaying 6 to 14% copper. Idle several *years,* except for selling stock.

ERIAL COPPER MINING CO. **CALIFORNIA.**
Dead. Formerly at Pollasky, Fresno Co., Cal. Described Vol. VI.

'ERIAL COPPER MINING CO. **UTAH.**
Dead. Formerly at Frisco, Beaver Co., Utah.

'ERIAL CORONA GOLD MINING CO. **IDAHO.**
Office: 67 Wall St., New York, N. Y. Lost lands, 1908. Stock of El greso Copper Mining Co. was exchanged, December, 1905, for stock in this cern. Apparently merely a bit of stock-jobbery. Formerly at Elk City, ho Co., Idaho.

'ERIAL GOLD & COPPER MINING CO. **UTAH.**
Dead. Lands sold June 10, 1907, to Nevada-Utah Mines & Smelters Cor- ration. Formerly at Frisco, Beaver Co., Utah.

'ERIAL MINING CO. **IDAHO.**
Mine office: Burke, Shoshone Co., Idaho. Henry Billberg, president; mer G. Brown, secretary; John H. Nordquist, general manager. Organized 0, with capitalization $1,000,000, shares $1 par. Lands, near the Copper ng, have about a quarter-mile of tunnels. Plans a new 3,000′ tunnel.

MPERIAL MINING CO. **WASHINGTON.**
Office· Marysville, Wash. Mine office: Silverton, Snohomish Co., Wash. n E. Dupree, president. Lands, 11 claims, showing a contact vein between nite and conglomerate, carrying gold, silver, copper and lead ores. Idle veral years.

MPERIAL MONTANA COPPER MINING, SMELTING & WATER POWER CO. **MONTANA.**
Dead. Reorganized, 1904, as Bornite Copper Co. Formerly at Blackfoot, ton Co., Mont. Described Vol. V.

MPERIAL PAINT & COPPER CO. **CALIFORNIA.**
Mine office: Spenceville, Nevada Co., Cal. Mine is developed open-cast, d has steam power. Idle.

MPERIAL STATE MINING & MILLING CO. **NEVADA.**
Office: care of A. C. Rector, secretary, Los Angeles, Cal. Letter returned laimed from former mine office, Searchlight, Lincoln Co., Nev. U. S. G. ld, president. Organized under laws of Arizona, with capitalization 0,000, shares $1 par. Lands, 6 claims, also a 5-acre millsite and a water ht, having tunnels of 35′ and 265′ showing ore said to give average assays above 10% copper and about $90 gold per ton, which figures seem excessive. and apparently moribund.

MPERIO COPPER CO. **MEXICO.**
Office: Tucson, Ariz. Lands were said to be near Imperio, Sonora, xico, which is not a postoffice, and seems non-existent.

MPAÑIA MINERA INCA DE ORO i COBRE DE COPIAPÓ. **CHILE.**
Office: Iquique, Chile. Mine office: Copiapó, Atacama, Chile. Organized . 14, 1906, under laws of Chile, with capitalization £30,000, shares £1 par.

CA MINING & MILLING CO. **IDAHO.**
Office: Colfax, Idaho. Mine office: Cuprum, Washington Co., Idaho. perty is the Mineral World mine, carrying auriferous and cupriferous sil- lead ores. Idle.

DEPENDENCE COPPER & GOLD MINING CO. **UTAH.**
Office: care of E. O. Leatherwood, secretary-treasurer, Salt Lake City, h. Mine office: Alta, Salt Lake Co., Utah. Chas. Park, president; E. Morgan, general manager. Organized 1904, with capitalization $50,000, es 10 cents par. Lands, 7 claims, in the Little Cottonwood district. Idle ral years.

INDEPENDENCE COPPER MINING & SMELTING CO. ID

Dead. Merged, November, 1905, in Bonanza Mining Co. Former Montpelier, Bear Lake Co., Idaho.

INDEPENDENCE DEVELOPMENT CO. ARIZ

Office: 1525 Western Ave., Los Angeles, Cal. Letter returned uncla from former mine office, Globe, Gila Co., Ariz. Col. Thos. E. Farrish, dent; Chas. J. Hall, secretary and treasurer; Chas. Kumke, superinten Wm. Sultan, receiver. Organized Oct. 22, 1906, under laws of Arizona, capitalization $1,500,000, shares $10 par.

Lands, on Lyons Fork of Mineral Creek, 4 miles from the Gibson show Pinal schist, with fissure veins of copper ore, mainly sulphide, carr considerable silver and gold values. Lands show 3 practically parallel fiss and considerable ore of 5 to 25% copper tenor has been blocked out. Has s power. Shipped circa 400 tons, February, 1908, to the Old Dominion sme securing good average returns in copper, gold and silver. Property consid promising, but finances in a bad way.

INDEPENDENCE GOLD, COPPER & IRON MINING CO. CALIFOR

Dead. Formerly at Lavic, San Bernardino Co., Cal.

INDEPENDENCE MINE. MONTA

Mine office: Kalispell, Flathead Co., Mont. Property, on the Tob plain, is claimed to show a 25′ vein giving average assays of 8% copper $4 to $10 gold per ton, which is obviously a serious overestimate. Idle several years.

INDEPENDENCE MINING CO. COLORA

Mine office: Turret, Chaffee Co., Colo. Has auriferous copper ores, steam power. Presumably idle.

INDEPENDENCE MINING CO. IDA

Mine office: Mullan, Shoshone Co., Idaho. Lands adjoin the Co King mine, on the east, and give a promising surface showing. Idle, ground is being developed by a tunnel driven by the Missoula Copper Co.

INDEPENDENCE MINING CO. WYOMI

Office: 55 High St., Oshkosh, Wis. Mine office: Dillon, Carbon Wyo. Employs 16 men. E. E. Meilins, president; Henry L. Larsen, president; H. O. Granberg, secretary, treasurer and general manager; E. Sanders, superintendent. Organized June 28, 1904, under laws of Wyom with capitalization $1,000,000, shares $1 par, as successor of Leighton-Ge Mining Co.

Lands, 6 claims, patented, area 120 acres, in the Battle Lake dist showing eruptive metamorphic country rocks, carrying an 11′ contact between quartzite and diorite, opened by a 200′ shaft and 250′ tunnel, s ing occasional stringers of 3″ to 12″ width, carrying a little chalcopyrite as ing 12% copper, with small quantities of nickel and cobalt and traces of ver and gold. Has steam power, hoist and several small mine buildings. pany reports having a smelter with a 60-ton MacDonald blast-furnace.

INDEPENDENCE MINING & SMELTING CO. MEXI

Letter returned unclaimed from former office, St. Paul, Minn. Mine o Guachinango, Mascota, Jalisco, Mex. Chris. D. O'Brien, Jr., manager. has a 300′ shaft and a 370′ tunnel, showing argentiferous copper ore. H 50-ton smelter.

INDEPENDENT COPPER MINING & MILLING CO. IDA

Office: Wallace, Idaho. Mine office: Mullan, Shoshone Co., Idaho. Bean, president; John H. Nordquist, vice-president and manager; C. D. M treasurer; preceding officers, Henry Billberg, D. F. Clark, R. R. McCorm *August Matt*, and H. Leithead, directors. Capitalization increased, 190

0. Lands, near the Snow Storm, have a 786′ tunnel, showing seams r carbonates and impregnations of chalcopyrite.

ENDENT MINING CO. **WASHINGTON.**

ce: 705 First Ave., Seattle, Wash. Mine office: Baring, King Co., Edward Peterson, agent. Lands, sundry claims, on the north fork of Creek, Kittitas county, Washington, claimed by company to show s of galena, 2 gold veins, 1 cobalt vein, and an asbestos deposit, one in being asserted to be 30′ to 70′ wide. The company claims too much performed too little. Apparently moribund.

EDUCTION CO. **MEXICO.**

rks office: Indé, Durango, Mex. Is said to have a smelter, known as a. Presumably idle.

-BORNITE COPPER MINING CO. **WASHINGTON.**

ice: 36 Dexter Horton Bldg., Seattle, Wash. Mine office: Index, ish Co., Wash. A. M. Watt, secretary, treasurer and general manager. 2 claims, area 40 acres, 3 miles east of Index, having a 50′ shaft and of 70′ and 300′, lower tunnel showing a 2′ to 4′ vein with paystreak g argentiferous bornite assaying 16 to 50% copper and 6 to 8 oz. silver a. Was developing at last accounts.

INDEPENDENT MINING CO. **WASHINGTON.**

ad. Lost lands, Jan. 1, 1905. Formerly at Index, Snohomish Co., Wash.

MINING CO. **WASHINGTON.**

fice: Snohomish, Wash. Mine office: Index, Snohomish Co., Wash. ilbur, president and general manager. Lands, 5 claims, known as the group, opened by tunnels of 300′ and 800′, showing chalcocite, bornite alcopyrite, in a 12′ vein of concentrating ore carrying a 2′ paystreak lting ore, on the footwall. Idle.

NA-ARIZONA MINING CO. **ARIZONA.**

ad. Succeeded circa 1906, by Indiana-Arizona Development Co. For- at Silver Bell, Pima Co., Ariz.

NA COPPER CO. **MICHIGAN.**

ice: Houghton, Mich. Mine office: Rockland, Ontonagon Co., Mich. Edwards, R. C. Pryor, J. H. Rice, Dean Robinson and Frank McM. Stan- rectors. Organized 1862, under laws of Michigan, with capitalization 0, shares $25 par. Control was bought, circa 1907, from John R. Stan- l others, by present management. Lands, 1,280 acres, in Sections 21, 28, Town 50 North, Range 37 West. Assessments paid, $178,708. Mill rned, 1864, and property since idle. Lands presumably carry the ex- of the amygdaloid bed now being opened by the Lake Copper Co., and y will be explored therefor.

NA COPPER CO. **WYOMING.**

ne office: Holmes, Almany Co., Wyo. Lands, 6 claims, near the Ram- ne. Idle some years and apparently moribund.

NA-DARRINGTON MINING CO. **WASHINGTON.**

ce: care of Jas. G. Givens & Co., 405 Bailey Bldg., Seattle, Wash. ffice: Darrington, Snohomish Co., Wash. G. A. Rochester, president; . Crawford, secretary. Capitalization $1,000,000, shares $1 par. Pre- idle.

NA DEVELOPMENT CO. **ARIZONA.**

d. Reorganized, circa 1906, as Indiana-Arizona Development Co. For- t Silver Bell, Pima Co., Ariz.

NA MINING CO. **OREGON.**

ce: 25 Beeker Bldg., Anderson., Ind. Operating office: Baker City, ine office: Medical Springs, Baker Co., Ore. John W. Messner, presi- l general manager; *J. W. McAlpine, vice-president*; Dr. W. H. Staplish,

treasurer; Dr. A. A. Cleaver, auditor; W. L. Myers, superintendent; preced officers, E. E. Cleaver, G. F. Aldrich, Henry Schies and Wm. Godejohann, rectors; W. G. Drowley, secretary. Organized June 18, 1903, under laws Oregon, with capitalization $1,500,000, shares $1 par.

Lands, 14 claims, also a 280-acre townsite, on Big Creek, circa 25 mi east of Baker City, in the foothills of Powder Mountains. Property sho strong outcrops, and has a contact deposit between porphyry and greenst carrying auriferous and argentiferous copper sulphides with quartz gang averaging 2 to 3% copper, with occasional ore of higher grade. Developme is by a tunnel, which has not reached the ledge, and a 2-compartment 3 shaft, with 3 levels opened, and about 2,000′ of workings, said to show 2 bodies, one of 55′ and one of 10′ width, carrying 3.5 to 5% copper, and cir $3 gold per ton.

Equipment includes a Leyner hoist, good for 1,000′ depth, a 4-drill Ley air-compressor, 8 power drills and a small electric light plant. There about 10 buildings, including a 40x70′ shafthouse, 40′ high, a 16x30′ of and a boarding-house. A precipitation plant has 7 tanks, each 4x4x3′. M was said, September, 1907, to have circa 20,000 tons of ore on the du mainly broken in development, which probably is an excessive estimate. Pr erty is considered promising. Idle.

INDIANAPOLIS COPPER MINING CO. WYOMIN

Dead. Formerly at Riverside, Carbon Co., Wyo.

INDIANA-SONORA COPPER & MINING CO. MEXIC

Office: 99 John St., New York, N. Y. Mine office: La Cananea, Ariz Sonora, Mex. Prof. Jas. Douglas, president; Geo. Notman, secretary a treasurer; preceding officers, Cleveland H. Dodge, Arthur C. James, S. Esterbrook, N. J. McGowan and Dr. Henry Jameson, directors; Walter Do las, general manager; G. W. McBride, superintendent; T. H. Wiggins, gineer.

Organized November, 1900, under laws of West Virginia, with capitali tion $5,000,000, shares $10 par; issued, $3,700,000. For 1906 expenditures wer $40,901 and receipts from ore sales were $102,610.

Lands, 164 pertenencias, area 405 acres, in the heart of the Canane Mountains, surrounded by holdings of the Cananea Consolidated. Prope shows rhyolite, quartzite and limestone, carrying at least 4 large ore bodie of very irregular outline, with nearly horizontal dip, main ore body showi a width of 300′, with proven length of 600′, carrying chalcocite and chalcop rite of 3 to 4% average copper tenor. Shipments of May, 1907, averaged 3. copper and 2 oz. silver per ton, with a trace of gold. Development is by th 1,800′ Llave tunnel, developing the main ore body, on ground adjoining th Capote mine of the Greene Cananea, the 1,200′ Eureka tunnel, and a third a lower tunnel, known as the Limestone, and by shafts of 400′, 300′, 300′, 20 100′ and 100′. The mine has about 3 miles of workings, and has been est mated to show 400,000 tons of concentrating ore.

Machinery equipment includes 7 hoists, of 25-h. p. to 150-h. p. each, t air-compressor and power drills.

There are about 25 buildings, including a 20x20′ carpenter shop, 25x3 machine shop, 20x40′ smithy, laboratory, general store and dwellings.

The mine has shipping bins at the mouth of the Llave tunnel, and a sho narrow-gauge railway, connecting with the line of the Cananea Consolidated. Some ore has been shipped to the Douglas smelter, and the property employ circa 75 men, before closing down, March, 1907. While the ore is low in ave age grade, the ore bodies are large, and the management is excellent.

INDIAN CHIEF MINING CO. **BRITISH COLUMBIA.**

Dead. Was succeeded by Spitzee Gold Mines, Ltd. Formerly at Phœnix, Boundary district, B. C.

INDIAN FALLS DEVELOPMENT CO. **CALIFORNIA.**

Office: 1111 C St., Tacoma, Wash. Mine office: Quincy, Plumas Co., Cal. C. A. Darmer, president; J. H. Spencer, vice-president; Horace W. Tyler, secretary; O. B. Roeder, treasurer; preceding officers, Anton Huth, Fred H. Murray and John Arthur, directors; G. H. Goodhue, general manager; Capt. C. Henry Thompson, consulting engineer. Organized May, 1908, under laws of Washington, with capitalization $2,000,000, shares $1 par; issued, $1,600,000.

Lands, 21 claims, area circa 420 acres, also the townsite of Indian Falls, in the Shoefly district, showing talcose schists and slate, with 8 lenticular ore bodies, said to be traceable 12,000', opened by tunnels of 80', 84', 220' and 40', showing chalcopyrite assaying 2% copper, 1.4 oz. silver and $1.10 gold per ton. Has 2 small mine buildings. Company plans development by tunnels, installing a 300-h. p. hydro-electric plant and building a concentrator.

INDIAN GROUP COPPER CO.

Dead. Formerly had an office at 1016-25 Broad St., New York, N. Y.

INDIAN QUEEN CONSOLIDATETD MINING CO. **UTAH.**

Office: Provo, Utah. Mine office: Newhouse, Beaver Co., Wash. Jesse Knight, president; L. N. Morrison, vice-president; R. E. Allen, secretary and treasurer; David Evans, manager; Jas. Quinn, superintendent. Organized 1907, under laws of Utah, with capitalization $150,000. July 1, 1908, had a cash balance of $6,619.95.

Lands, circa 60 claims, principal properties being about 2 miles east of Newhouse, taken over from the Indian Queen and Leland companies. Has a 600' tunnel, planned to be driven circa 2,500', giving a 1,600' back. Has electric power and an air-compressor. Property considered promising and management good.

INDIAN QUEEN MINING CO. **UTAH.**

Dead. Merged, 1907, in Indian Queen Consolidated Mining Co. Formerly at Newhouse, Beaver Co., Utah.

INDIAN SPRINGS COPPER MINING CO. **NEVADA.**

Office: care of T. R. L. Harris, secretary and treasurer, Spokane, Wash. Letter returned unclaimed from former mine office, Goldfield, Esmeralda Co., Nev. E. F. Burns, president; Millard T. Harsten, vice-president; Ross S. Braddock, superintendent. Organized, late 1906, under laws of Washington, with capitalization $1,500,000, shares $1 par. Lands are between Goldfield and Greenwater. Idle and presumably moribund.

INDUSTRIAL COPPER MINING CO. **ARIZONA.**

Dead. Lands were about 2 miles from the Valenzuela mine of the Hub Mining & Investment Co. Formerly at Benson, Cochise Co., Ariz.

INDUSTRIAL MINING CO. **MEXICO.**

Office: Apartado 2, Hermosillo, Sonora, Mex. Letter returned unclaimed from former mine office, Carbó, Ures, Sonora, Mex. W. D. Schellinger, agent. Lands, 20 hectares, known as the Mina Mixto, circa 30 miles west of Carbó.

INDUSTRIAL MINING CO. **MONTANA.**

Office and mine: 114 East Main St., Bozeman, Gallatin Co., Mont. J. W. Wilcox, president; S. J. V. B. Henderson, vice-president, treasurer and general manager; J. M. Morris, secretary. Organized Oct. 2, 1902, under laws of Montana, with capitalization $600,000, shares $100 par. Lands, 12 claims, area 240 acres, well timbered, in an unorganized mining district near Bozeman, showing gneiss, quartzite and shale, said to carry fissure and contact veins, opened by tunnels of 380', 450', 180' and 1,481', showing sulphide ores, reported by company *to average 16 to 40% copper* and 6 oz. silver per ton.

COMPAGNIE d'INGUARÁN. **MEXICO**

Office: 56 Rue de Provence, Paris, France. Mine office: Inguarán, Ari Michoacán, Mex. Ch. Laforgue, general manager; J. L. Philips, superintend ent. Organized Jan. 15, 1898, under laws of France, with capitalizatio 12,000,000 francs, shares 500 francs par. Supposedly is controlled by th French house of Rothschild, and a considerable portion of the company's stock is owned by the Compagnie du Boleo. Property was bought for 1,500,00 pesos, and company is said to have expended about $8,000,000 thereon, whic undoubtedly is an overestimate.

Lands, 185 hectares, also mineral concessions covering 5,000 additiona hectares, in the Tacambara district, lying on the plateau of the volcan Jorullo, circa 1,500′ above the plains. The mountains form a succession o rugged, almost inaccessible peaks, with ore outcrops near their crests, thes of 90′ to 200′ width, having a generally east and west trend. Country rock granite, in several stages of alteration, capped by a silicious limestone 200′ to 300′ thickness. Ore bodies, of immense size, carry almost exclusive copper sulphides, mainly disseminated chalcocite and chalcopyrite, with little bornite, having a granite-porphyry gangue, assays giving 1.5 to 6 copper, 2 to 100 oz. silver and from a trace to 1 oz. gold per ton. As a ru the silver values are considerable, with slight gold values. Proven depth the ore is about 300 meters, at which depth it apparently cuts off. Develo ment is by a 2,500′ tunnel and 2 main shafts, deepest circa 350′, with lev opened at 80′ intervals. Both ore and country rock are exceedingly firm, lit timbering being required. Estimates of size and value of the ore bodies va greatly, but the best authorities estimate an average of circa 3.25% copp with 2,000,000 to 3,000,000 metric tons of ore blocked out. The ore is w adapted to concentration, and apparently could be put about 8 or 10 to into one, before smelting.

Steam and electric power are used, latter secured from a 200-h. p. hydr electric installation at Mata de Plantano, 7 miles from the mine, where the is a stream flowing about 80 litres per second, with an available head of 93 fed by springs that burst forth from the foot of Mt. Jurullo, about 150 year ago, after the last eruption of that volcano.

In 1905 a survey was made for a railway from Patzcuaro, the presen shipping point, to Inguarán, a distance of 32 leagues. A complete survey ha been made, and plans drawn for a railway from the mines to Zihuatenejo south of Acapulco, on the Pacific, the route of the proposed line traversing a rugged country, and requiring several years for construction.

Owing to the fact that this property is controlled by the Rothschilds, and is but rarely visited by mining men, many exaggerated and misleading stories have been printed regarding it. The mine has a large body of low grade ore, but the ore is not equal, in quantity or quality, so that of several other Mexican copper mines. Production, 1904, was only 598,439 lbs. of ore, valued at 21,870 pesos, this doubtless having been shipped for test purposes. Property is idle, and is not likely to become a producer until rail connections are secured, and apparently the company is in no hurry about building a railway, as 10 years have been required to get the property to its present very modest stage of development.

INLAND MINING CO. **MONTANA**

Mine office: Saltese, Missoula Co., Mont. Bonney Swanson, president. Lands, 10 claims, on Dominion Creek, circa 5 miles from Saltese, having tunnels of 100′, 250′ and 550′, upper tunnel showing a 5′ vein carrying ore up to 25% in copper tenor, claimed to average circa 5.5% copper, 11 oz. silver and $6 gold per ton. Property considered promising.

INNAI MINE. **JAPAN.**

Owned by Furukawa Mining Co.

INSIZWA NICKEL & COPPER DEVELOPING CO., LTD. **CAPE COLONY.**

Office: Mount Ayliff, Cape Colony. Mine office: Kokstad, Griqualand East, Cape Colony. Wilfred Vernon Parsons, secretary. Organized circa March, 1908, under laws of Cape Colony, with capitalization £200,000, shares £1 par. Lands are 2 mining areas, formerly held by South Namaqua Syndicate, showing ore disseminated through norite, occasionally occurring as lenticular masses of considerable size in norite, with shale contact. Average assays give 2.05 to 3.37% copper and 3.29 to 4.75% nickel.

INSPIRATION MINING CO. **ARIZONA.**

Office: Kansas City, Mo. Mine office: Globe, Gila Co., Ariz. E. A. Hosier, president; W. A. Neiswanger, vice-president; E. P. Wilder, secretary and treasurer; John D. Coplen, general manager. Has authorized a $200,000 bond issue. Property was under option to General Development Co., but was not sold. Lands, 12 claims, area 240 acres, circa 9 miles west of Globe, near the Live Oak mine. Company also said to have bought, 1906, lands of the Rookwood Copper Co. Mine, having about 1 mile of workings, is opened by the Mercer, Woodson and 2 shorter tunnels. Upper workings show oxidized ores of 4 to 7% copper tenor, succeeded by chalcocite and disseminated chalcopyrite in a ledge of very great width, not all of which is workable, carrying much ore that is below commercial grade at present, though possibly adapted to leaching, and which, in any case, may become valuable in time. Has a 60-ton mill, planned to be doubled in capacity and size to 36x200', terraced in 3 floors. Shipped some ore, 1906. Property considered promising.

INTERCOLONIAL COPPER CO. **NEW BRUNSWICK.**

Office: 702 Banigan Bldg., Providence, R. I. Mine office: Dorchester, Westmoreland Co., N. B. Darius L. Goff, president; T. J. Edwards, secretary. Organized 1899, under laws of Arizona, and capitalization decreased, 1906, to $2,000,000, shares $5 par, in preferred and common shares, latter with restricted voting privileges. Lands, 250 acres freehold and 1,100 acres leasehold from the crown, showing a blanket vein carrying carbonate and sulphide ores, said to give returns of 3 to 4% copper. Has shafts of 40', 75' and 150', also a 1,500' drainage tunnel, with about 8,000' of underground workings.

Works include a 200-ton concentrator, leaching plant and electrolytic refinery, having 2 boilers, 4 engines, crusher, rolls, 15 tubular roasting furnaces, six 300-ton leaching vats and two 50-kw. dynamos. The electrolytic plant has 350 lead cathodes, and 550 lead anodes, 22x33" each, giving a plating surface of 5,000 square feet, for the deposition of electrolytic copper. Plant also includes tanks for precipitation of metal on scrap iron. The reduction plant did not prove satisfactory, machinery going wrong after making about 50 tons blister copper. Idle since 1904 and apparently moribund.

INTERIOR MINING & TRUST CO. **ARIZONA.**

Mine office: Wickenburg, Maricopa Co., Ariz. Frank L. Baldwin, president; D. L. Murray, vice-president; R. W. Baxter, second vice-president; W. J. Casey, manager. Organized December, 1902, under laws of Arizona, with capitalization $3,000,000, shares $1 par. Lands, in the Black Rock district, circa 6 miles northwest of Wickenburg, show ores carrying values mainly in gold. It is said to have a 40-stamp mill. Production, 1907, was 1,616 oz. gold.

INTERMOUNTAIN EXPLORATION CO. **UTAH.**

Office: 26 Mesaba Bldg., Duluth, Minn. Operating office: 208 Atlas Bldg., Salt Lake City, Utah. Mine office: Stockton, Tooele Co., Utah. H. J. Smith, president; Peter Porter, vice-president; Theophilus F. Smith, treasurer; W. H. Brownrigg, secretary; R. D. Raddatz, manager. Organized Sept. 1906, under *laws of Utah, with capitalization* $500,000, in half preferred and

half common shares, of $10 par. Is developing the property of the Dulu
Utah Development Co., at Stockton, and also holds auriferous and argen
erous copper claims in the Silver Rock district of San Bernardino county, C
fornia, and has small holdings of silver claims in Cobalt, Ontario.

INTERMOUNTAIN GOLD & COPPER MINING CO. IDA

Mine office: Pocatello, Bannock Co., Idaho. G. B. Rogers, preside
Frank Ball, treasurer; G. A. Clark, secretary. Lands are the Lost Ho
group, on the Ft. Hall Indian reservation, opened by a 50′ shaft, said to
bottomed in good ore. Idle several years.

INTERMOUNTAIN MINING & INDUSTRIAL ASSOCIATION. UTA

Dead. Lands sold August, 1906. Formerly at Bingham Canyon, Salt La
Co., Utah. Fully described Vol. VI.

SOCIEDAD INTERNACIONAL MINERA i BENEFICIADORA DE HUANTAJAYA. CHIL

Office: Iquique, Chile. Mine office: Huantajaya, Tarapacá, Chile.
ganized June 27, 1900, under laws of Chile, with capitalization 300,000 pe
shares 50 pesos par.

INTERNATIONAL CONSOLIDATED SMELTING & MINING CO. MEXIC

Office: 12 West 38th St., New York, N. Y. Mine office: Guaynopa, Gu
rero, Chihauhua, Mex. Dr. J. M. Bishop, president; Wm. L. Saunders, sec
tary. Organized Jan. 1, 1904, as a merger of Guaynopa Smelting & Reducti
Co. and Mexican Lead Co. The Guaynopa lands, variously reported as 2
hectares and as 133 acres, in Guaynopa Cañon, are claimed to show ores car
ing 5 to 8% copper, with good silver values. Company was promoted
Daugherty & Albers, with the assistance of C. B. James, hence is regarded u
favorably. Idle and moribund.

INTERNATIONAL COPPER CO. ARIZONA

Dead. West Virginia charter forfeited, 1902.

INTERNATIONAL COPPER CO. COLOMBI

Dead. Was a swindle. Formerly at Natagaima, Tolima, Colombia. D
scribed Vol. VI.

INTERNATIONAL COPPER CO. MONTANA

Dead. Was organized June 13, 1906, under laws of Maine, and tit
changed, July 19, 1906, to Montana Consolidated Copper Co. Formerly a
Basin, Jefferson Co., Mont.

INTERNATIONAL COPPER CO. UTAH

Dead. Merged, 1903, in Dirigo-La Sal Gold & Copper Mining Co. Formed
at Castleton, Grand Co., Utah.

INTERNATIONAL COPPER CO., LTD. ARGENTINA

Office: 56 Cannon St., London, E. C., Eng. Capt. W. B. McTaggart
D. L., J. P., chairman; A. Dangerfield, secretary. Organized July 7, 190
under laws of Great Britain, with capitalization £100,000, shares £1 par; issued
£75,000. Was formed to finance the Famatina Development Corporation, Ltd.
having bought £20,000 debentures and £20,000 income bonds of that company
and having agreed to advance £60,000 additional, at 6%, for the erection of
a smelter, if required, securing in return the right to act as exclusive agent
for sale of Famatina company's copper at 2% commission.

INTERNATIONAL COPPER CORPORATION, LTD. NEW CALEDONIA

Dead. Lands sold, 1900, to Caledonian Mining Corporation. Formerly a
Noumea, Diohot, New Caledonia.

INTERNATIONAL COPPER & GOLD CO. COLORADO, MONTANA & MEX

Office: 1122-135 Adams St., Chicago, Ills. A. P. Ballou, secretary-*treasurer;* W. C. Hermbuecher, general manager. Organized 1899, under

ona, with capitalization $3,000,000, shares $1 par. Apparently is a company only, controlling, through stock ownership, the Montana & Gold Mining Co. and the Santa Fé Gold & Copper Mining Co. Sup- controlled by Sonora Central Mines Co. Apparently all properties l company not regarded favorably.

NATIONAL COPPER MINING CO. **ARIZONA.**

ce: P. O. Box 530, Hancock, Mich. Letter returned unclaimed from mine office, Bisbee, Cochise Co., Ariz. Fred. J. Bawden, president; R. Beattie, secretary; Geo. H. Nichols, treasurer; Carl Clausen, general . Organized May 18, 1903, under laws of Arizona, with capitalization 0, shares $10 par. Lands, 14 claims, patented, near Solomon Springs, southeast of Bisbee. Idle since birth and apparently moribund.

NATIONAL COPPER MINING CO. **MEXICO.**

er returned unclaimed from former mine office, Carbó, Ures, Sonora, roperty, in the Carnero Mountains, circa 30 miles west of Carbó, is said 4 veins.

NATIONAL COPPER MINING CO. **UTAH.**

l. Merged, circa 1906, in Boston & Utah Copper Co. Formerly at , Grand Co., Utah.

NATIONAL COPPER MINING CO. OF **MICHIGAN.**
E SUPERIOR.

l. Was wound up, 1901, and lands sold to Wetterhorn Land Co. For- Matchwood, Ontonagon Co., Mich.

NATIONAL COPPER MINING & MILLING CO. **WYOMING.**

e: care of F. M. Dunn, Minneapolis, Minn. Letter returned un- from former mine office, Encampment, Carbon Co., Wyo. Capitaliza- ,000, shares $1 par. Lands, one claim, the Arlington, patented. Has ft. Idle since 1905 and out of cash, with poor prospects.

NATIONAL EXPLORATION & INVESTMENT CO. **ARIZONA.**

l. Succeeded, circa 1902, by Lady Helen Copper Mining Co. Formerly Graham Co., Ariz.

NATIONAL GOLD & COPPER CO., LTD. **ONTARIO.**

e: Mooney-Brisbane Bldg., Buffalo, N. Y. M. M. Wall, president; anley, treasurer; E. F. Goff, secretary; R. E. Erdmann, superintendent. d under laws of Arizona, with capitalization $3,000,000, shares $1 ds, in the Hastings district of Frontenac county, Ontario, have a 100' de and apparently moribund.

NATIONAL GOLD & COPPER MINING CO.

e: 62 Commercial Blk., Salt Lake City, Utah. Somebody gets the at that address. Location of lands, if any, unknown.

NATIONAL GOLD-COPPER MINING CO. **BRITISH COLUMBIA.**

l. Lost lands, circa 1899. Formerly at Rossland, Trail district, B. C.

NATIONAL INDUSTRIAL CO. **ALASKA & WASHINGTON.**

e: Bellingham, Wash. O. B. Brown, president; J. W. Romaine, vice- ; C. T. Canfield, secretary; W. S. Bacon, treasurer. Capitalization 0. Property includes coal mines on Lake Whatcom, near Bellingham, ich coal has been shipped. Has gold claims in the Nome district of nd in Okanogan county, Washington, and copper claims near Valdez, latter apparently idle.

NATIONAL MINE & INVESTMENT CO. **MEXICO.**

e: care of E. F. Fisher, secretary, Douglas, Ariz. Dr. W. E. Lind- dent; J. M. French, treasurer; S. C. Morrison, superintendent. Lands, mencias, adjoining lands of the Santa Rosa Development Co., about outh of Douglas, and 4 miles from the Nacozari railroad, in the Arizpe f Sonora, *Mexico, showing a 2' to 6' quartz* vein carrying oxide and

carbonate ores assaying 3 to 30% copper, and up to 6 oz. silver, wit
of gold, opened by shafts of 20′ to 50′. Also owns sundry mineral la
Mulatos, Sahuaripa, Sonora, Mex. Idle several years.

INTERNATIONAL MINING CO. **AI**

Letter returned unclaimed from former office, Los Angeles, Cal
office: Chloride, Mohave Co., Ariz. John Lopizich, president. I
known as the Elkhart mine, is a silver-lead mine, with strong copper
tions on the 500′ level, at the bottom of the mine, where there is a w
of low-grade silver-lead ore, carrying small copper and gold values. H
50,000 tons of low-grade silver-lead ore on the dump, and has a 100-t
Idle.

INTERNATIONAL MINING CO. **COL**

Dead. Formerly at Black Hawk, Gilpin Co., Colo.

INTERNATIONAL MINING CO., LTD. **ON**

Office: Sault Ste. Marie, Mich. Mine office: Dean Lake, Algon
C. S. Beadle, general manager; V. E. Metzger, secretary and treasurer.
1,400 acres, known as the Brady location, lying in Patton and Thompso
ships, east of the Mississagua river, 5 miles from Dean Lake and circa
east of Sault Ste. Marie, opened by 12 test pits, deepest 24′, showing a
carrying chalcopyrite assaying 5 to 28% copper, with small gold an
values. Idle for several years.

INTERNATIONAL MINING & REFINING CO.

Mine office: Chañaral, Atacama, Chile. Property is an old group o
near Chañaral, also sundry claims in the Huantajaya district of T
Chile. Idle.

INTERNATIONAL SMELTING CO. **M**

Office: 502 Hall Bldg., Kansas City, Mo. Mine office: Suaqui de
Ures, Sonora, Mex. J. V. Hammer, president; H. W. Tracey, secretary
Finley, treasurer. Organized 1905, with capitalization $1,000,000, sh
par. Planned building a smelter, but did not do so. Promised divide
apparently found the hostilities of the Yaqui Indians a convenient pre
failing to carry out its promises. Is regarded with much suspicion.

INTERSTATE EXPLORATION CO. ARIZONA, ILLINOIS & WISC

Office: Endicott Bldg., St. Paul, Minn. Maj. E. L. DeLestry,
manager. Claims to have copper claims at Globe, Gila Co., Ariz., a
and lead claims at Benton and Platteville, Wis., and at Galena, Ills.

INTER STATE MINING CO. **MON**

Office and mine: Helena, Lewis & Clark Co., Mont. Organize
Lands, 19 claims, in the Amazon district, circa 30 miles from Helena,
a 4′ vein, and silver, lead and argentiferous copper ore, in a vein of 4
width, traceable nearly one mile. Company formerly operated near
ville, Montana, but abandoned the original properties and secured, 19
Amazon group, from A. L. Palmer.

INTERSTATE MINING & MILLING CO. **I**

Mine office: Mullan, Shoshone Co., Idaho. M. J. Rodermill, pre
C. M. Crago, vice-president; R. M. Fox, secretary; O. D. Wallace, m
preceding officers, C. L. Stacy, W. P. Russell and M. H. McCall, di
Lands, 24 claims, well timbered, adjoining the Hercules mine on th
and the Callahan on the east, said to show an 18″ vein of massive or
aging 10% copper and 20% lead, with good silver values. Development
a tunnel, planned to be driven 2,800′, cutting 3 veins to give backs o
800′ and 1,000′.

INVESTORS MINING & PROSPECTING CO. **WYO**

Office: P. O. Box 132, Encampment, Wyo. Mine office: Rambler, 4
Co., Wyo. Aaron Slothower, president and general manager; C. E. W

ent; C. B. Bergquist, secretary and treasurer. Organized July 19, r laws of Wyoming, with capitalization $1,000,000. Lands, 8 claims, nted, area 84 acres, in the Battle Lake district, showing a contact en schist and quartzite, up to 22′ in width, with a gossan showing zed ores, changing to chalcopyrite at slight depth. Has a 110′ shaft. l years.

PPER CO. **CALIFORNIA.**

office: Darwin, Inyo Co., Cal. Chas. Wing, manager. Presumably idle.

PPER MINES & SMELTERS CO. **CALIFORNIA.**

: 353 Kearny St., San Francisco, Cal. Mine office: Keeler, Inyo Co., loys 10 men. R. G. Paddock, president and general manager. T. J. ns, vice-president; Philip S. Montague, secretary; H. L. Wrinkle, Organized July 3, 1905, under laws of Arizona, with capitalization , shares $1 par.

, 21 claims, area 415 acres, showing limestone, granite and grano- untry rocks, with porphyrytic intrusions, carrying 8 contact veins, imestone and porphyry or grano-diorite, showing a little native cop- chite, azurite, chalcopyrite and chrysocolla, in veins of 2′ to 40′ id to give average assays of 12% copper, 6 oz. silver and $7.50 gold Development is by several shallow shafts, one planned to be sunk to by several tunnels.

)UNTY CONSOLIDATED COPPER CO. **CALIFORNIA.**

· 254 Wilcox Bldg., Los Angeles, Cal. Mine office: Citrus, Inyo Formerly held 5 gold claims and 12 copper claims; sold 5 copper New York & Inyo Copper Co. Idle and apparently moribund.

NEW MEXICO MINING CO. **NEW MEXICO.**

. Formerly at Carrizozo, Lincoln Co., N. M.

:N HERMANOS y CA. **MEXICO.**

office: Huetamo, Michoacán, Mex. Production, 1902, was 107,804 copper. Presumably idle.

OPPER MINES, LTD. **IRELAND.**

e: Great Winchester St., London, E. C., Eng. Lt.-Col. E. B. Burnaby, ; R. L. Spicer, secretary. Organized July 10, 1906, under laws of itain, with capitalization £60,000, in 50,000 ordinary shares, par £1, 00 deferred shares, par 2s.; issued, £10,512. Was organized to acquire k copper mines near Waterford, Ireland. Cannot be learned that has been secured.

IAG MINE. **ARIZONA.**

ed by Calumet & Arizona Mining Co.

IINES. **ARIZONA.**

e office: Clifton, Graham Co., Ariz. B. A. Boyles, president; N. L. ice-president; Otto Rosenthal, secretary; C. P. Dunn, treasurer. Lands, , said to show a vein of 10′ to 15′ width, carrying oxides and altered ores, with values up to 15% copper, opened by a 100′ tunnel. Idle ars.

MINES PROPRIETARY CO., LTD. **IRELAND.**

ce: 4 Dawson St., Dublin, Ire. Mine office: Bonmahon, Co. Water- e. Organized Aug. 2, 1906, under laws of Ireland, with capitali- 20,000, in 10,000 ordinary shares, £1 par, and 100,000 deferred shares, Idle.

)AP MINE. **ARIZONA.**

ned by National Mining Exploration Co.

)AP MINING CO. **ARIZONA.**

ce: Globe, Ariz. Mine office: Florence, Pinal Co., Ariz. Original near Globe, *were sold to National Mining* Exploration Co. Present

property, 5 claims, held under bond and lease, is in the Picacho d miles south of Florence. Presumably idle.

IRONCLAD COPPER MINING CO. WASH

Office: Portland, Ore. Mine office: Spirit Lake, Skamania Dr. P. L. McKenzie, manager; W. H. Warren, secretary. Lands, 10 the St. Helens district, show 2 veins, slightly developed, giving ave values of about $25 per ton, in copper, silver and gold. Idle several

IRON CROWN MINING & MILLING CO.

Dead. Succeeded Jan. 6, 1908, by Copper Crown Mining Co. P Mullan, Shoshone Co., Idaho.

IRON DYKE COPPER CO.

Office: care of Erie Trust Co., Erie, Pa. Mine office: Homest Co., Ore. C. N. Conrad, president; H. G. Fink, vice-president; A. secretary; F. F. Curtze, treasurer; preceding officers, Geo. R. M Davenport Galbraith, directors. Frank E. Pearce, superintendent. under laws of Pennsylvania, with capitalization $500,000, shares Property shows considerable ore, on the dumps and blocked out f having several thousand feet of workings. Erie Trust Co. holds tit deed and bond. Presumably idle.

IRON FALLS GOLD & COPPER MINING CO. WASH

Dead. Formerly had an office at 713 New York Blk., Seattle, W

IRON HAT COPPER-GOLD MINING CO. CO

Dead. Formerly at Silverton, San Juan Co., Colo.

IRON HAT MINING CO.

Mine office: Eureka, Juab Co., Utah. Wm. Hoffman, supe Lands are in the East Tintic district. Presumably idle.

IRON HORSE MINING & MILLING CO.

Mine office: Globe, Gila Co., Ariz. Organized 1904, with ca $500,000. Idle.

IRON KING EXTENSION MINING CO.

Dead. Was a Douglas, Lacey & Co. swindle. Formerly at Yavapai Co., Ariz.

IRON KING MINE.

The Iron King mine at Humboldt, Yavapai county, Arizona, is the American Gold & Copper Consolidated Mining Co.

IRON KING MINE.

The Iron King mine at Jerome, Yavapai county, Arizona, is ow Equator Mining & Smelting Co.

IRON MASK GOLD MINING CO. BRITISH CO

Dead. Formerly owned the Iron Mask mine, which was sold closure, circa 1901, to B. C. Corbin, who sold to the Consolidated Smelting Co. of Canada, Ltd. Office of company was at Spokane, W merly at Rossland, Trail district, B. C.

IRON MASK MINE. BRITISH CO

Owned by Kamloops Mines, Ltd.

IRON MOUNTAIN COPPER CO.

Mine office: Lund, Iron Co., Utah. Has argentiferous lead ore ferous copper ore. Idle since circa 1903.

IRON MOUNTAIN MINE. CAL

Owned by Mountain Copper Co., Ltd.

IRON SILVER MINING CO. CO

Offices: 1408-27 William St., New York, N. Y., and 615 Stevens troit, Mich. Mine office: Leadville, Lake Co., Colo. DeForest Pa *dent; W. R.* Cobb, vice-president; Homer A. Hoit, secretary; Frémont *treasurer;* preceding officers, Hon. Thos. W. Palmer, Gen. Anson G

John Greenough, Winfield Scott, Henry G. Stevens and Samuel R. Reinhardt, directors; Waldemar Arens, general manager; Wm. Carson, superintendent; Geo. O. Argall, engineer. Organized March, 1880, under laws of New York, with capitalization $10,000,000, shares $20 par. Dividends, 1906, were $400,000, and 1907 were $300,000, with total dividends, to end of 1907, of $4,100,000. Net earnings have been as follows: $267,035.64 in 1904; $515,127 in 1906; $65,366.14 in 1907. Company begun 1908 with a surplus of $189,259.60. Farmers Loan & Trust Co., New York, registrar. Annual meeting, second Wednesday in March.

In addition to other properties, company controls, through stock ownership, the Nisi Prius Consolidated Mining Co., mine being leased to 3 different parties. Operating mines of the Iron Silver are the Moyer, Tucson and Dome, the Moyer being much the most important, having circa 2 miles of workings. The Tucson shaft is 925′ deep. Ores are mainly sulphide, the Dome mine furnishing zinc and lead carbonates, the Tucson mine supplying argentiferous zinc and lead ores, and the Moyer mine yielding argentiferous and auriferous zinc, lead and copper ores, and iron ore. Production has been as follows: 47,865,699 lbs. zinc, 3,608,351 lbs. lead, 948,902 lbs. copper, 950,067 oz. silver and 3,049 oz. gold in 1904; 61,738,134 lbs. zinc, 4,542,938 lbs. lead, 69,477 lbs. copper, 425,050 oz. silver and 2,043 oz. gold in 1906; 34,239,954 lbs. zinc, 489,047 lbs. lead, 21,321 lbs. copper, 298,598 oz. silver and 1,360 oz. gold in 1907. Property is well equipped and well managed, but inclined to show decreased production.

IRON SPAR COPPER MINING CO. **MONTANA.**

Letter returned unclaimed from former mine office, Mullan, Shoshone Co., Idaho. John J. Curran, manager. Lands, on the Montana side of the divide, in Leslie Gulch, are opened by a 375′ tunnel, showing chalcopyrite and galena assaying up to 22.5% copper, 52% lead, 8 oz. silver and $2.80 gold per ton.

IRONWOOD & ARIZONA DEVELOPMENT CO. **ARIZONA.**

Office: Ironwood, Mich. Letter returned unclaimed from former mine office, Salome, Yuma Co., Ariz. Lands, 28 claims, in the Harcúvar Mountains, 7 miles northwest of Salome, opened by a shaft of circa 150′, said to show high grade sulphide ore. Idle and likely to be liquidated.

IROQUOIS COPPER CO. **MICHIGAN.**

Dead. Was liquidated, circa 1899, and lands sold to Osceola Consolidated Mining Co. Formerly at Kearsarge, Houghton Co., Mich.

IRVINEBANK MINING CO. **QUEENSLAND.**

Office: Irvinebank, Queensland, Australia. Mine office: Klondyke, via Mungana, Queensland, Australia. Geo. C. Young, secretary; Dan Mackey, mine manager. Company employs circa 700 men, and incidentally is engaged in copper mining, on a small scale. Property includes the Linedale West Chillagoe and the Lamington mines, latter having a 160′ shaft showing a 12″ vein averaging circa 20% copper and 5 to 6 dwts. gold per long ton.

Smelter has a water-jacket blast-furnace, planned for treatment of both copper and silver-lead ores, and also for the accumulation of tin slag, which seems a rather ambitious program for one small furnace. Produced, 1906, from the Lamington mine, circa 400 tons of 17% ore, carrying circa 150,000 lbs. fine copper, which was sold to the Chillagoe.

IRVINGTON SMELTING & REFINING CO. **NEW JERSEY.**

Works office: Irvington, Essex Co., N. J. Property is a small electrolytic refinery.

ISABEL COPPER MINING CO. **WYOMING.**

Dead. Lands sold, October, 1902, to Rambler Mining & Smelting Co. formerly at *Riverside, Carbon Co., Wyo.*

ISABELLA MINING CO. NEW MEXIC

Mine office: Tres Piedras, Taos Co., N. M. Property is the Whale min said to show ore of good copper tenor.

ISLAND CITY COPPER MINING CO. WYOMIN

Office: Eaton Rapids, Mich. Letter returned unclaimed from form mine office, Saratoga, Carbon Co., Wyo. Has a copper ore body occurring a contact between a norite dike and schist. Idle since circa 1904.

ISLAND MINING CO. MICHIGAN

Office: 1000-32 Broadway, New York, N. Y. W. R. Todd, president; W A. O. Paul, secretary and treasurer. Organized under laws of Michigan, wit capitalization $1,000,000, shares $25 par; $13.75 paid in. Michigan charte expired 1904, but company has been unable to secure sufficient representation of stock to obtain an extension of its corporate existence. Last meeting of stockholders, held June 5, 1900, authorized a dividend of 80 cents per share Property is circa 4,000 acres of mineral land on Isle Royale, Michigan.

ISLAND MOUNTAIN CONSOLIDATED COPPER CO. CALIFORNIA.

Dead. Formerly in Trinity county, California.

ISLANDS COPPER CO. BRITISH COLUMBIA.

Office: 234 Eppler Blk., Seattle, Wash. Lands include the True Blue group, on Valdez and Gowlland Islands, in the Nanaimo district of British Columbia, having a 50′ shaft on a vein in diorite. Trial shipment, 22 tons, to the Tyee smelter, assayed 2.84% on low grade ore and 6.2% on high grade ore, with small gold and silver contents.

ISLE ROYALE CONSOLIDATED MINING CO. MICHIGAN.

Dead. Succeeded, March, 1899, by Isle Royale Copper Co. Formerly at Houghton, Houghton Co., Mich.

ISLE ROYALE COPPER CO. MICHIGAN.

Office: 303-199 Washington St., Boston, Mass. Mine office: Houghton, Houghton Co., Mich. Employs circa 400 men. Albert S. Bigelow, president; Hon. Norman W. Haire, vice-president and general manager; Wm. J. Ladd, secretary and treasurer: preceding officers, Clarence H. Bissell and Chas. N. King, directors; Wm. J. Uren, general superintendent; James E. Richards, mine superintendent; James G. Glanville, mill superintendent; Chas. D. Hohl, chief engineer; John T. Reeder, chief clerk and purchasing agent; Harry E. Lukey, clerk; Edward Colenso, chief mining captain.

Organized March, 1899, under laws of New Jersey, with capitalization $3,750,000, shares $25 par, as a merger of the Isle Royale Consolidated Mining Co. and Miners' Copper Co. Owns $50,000 stock in the Lake Superior Smelting Co. Annual meeting, first Wednesday in April, at Jersey City.

Lands, 3,520 acres and an 80-acre millsite. Mining lands include the old Isle Royale, Grand Portage and Huron mines, the Dodge and Frue prospects and sundry undeveloped lands. The Hussey-Howe tract of 280 acres, lying northeast of the Superior and carrying the extension of the Baltic bed, was bought, 1907, for $220,000. An option on the mineral rights of the Montezuma tract, of circa 240 acres, lying next west, has expired. Lands include all of Sections 1, 2 and 11, and parts of Sections 3, 9, 10 and 15, T. 54 N., R. 34 W., also 160 acres in Section 6, T. 54 N., R. 33 W., 40 acres in Section 31, T. 55 N., R. 33 W., and 160 acres in Section 36, T. 55 N., R. 34 W., giving a compact tract carrying about 2½ miles of the strike of the system of copper-bearing beds.

The three old mines included in the present Isle Royale tract, made 48,452,590 lbs. fine copper, of which the Huron furnished 35,766,225 lbs., the Isle Royale 9,204,071 lbs., and the Grand Portage 3,482,294 lbs. These products were secured under primitive conditions, at a net aggregate loss of above *$2,500,000.* The old Isle Royale and Grand Portage mines were opened

d the Huron in 1855. The history of all three is given in detail in

Isle Royale has 3 parallel amygdaloidal beds, with strike of N. 32° E. rage dip of 56°, of which two have been extensively opened, these be- Isle Royale and Portage, the latter lying approximately 200′ west of mer. The shafts are on the Isle Royale lode, but the Portage bed is on many levels by crosscuts. East of the amygdaloids is the "Mabbs lying near the Eastern Sandstone, 4′ to 7′ wide and rich in mass and opper, but deficient in stamp rock. It was opened to a depth of about John and Austin Mabbs, circa 1875, and has been tested, to some by the present owner. There also are unidentified and unexplored cop- ring amygdaloids, lying west of the Portage bed, and occasional narrow veins, carrying arsenical copper ores. Considerable diamond drilling n done, and new openings were 8,251′ in 1906 and 8,728′ in 1907. The orks 27 power drills, which number is to be considerably increased.
addition to the new shafts, there are 28 old shafts in the three old and masonry dams have been built underground, at various points, to ck the water in the old openings. There are about 5 miles of old s in the Huron, and 3 miles in the old Isle Royale and Grand Portage

1 shaft, near the northern boundary, was completely gutted by fire, er, 1903. This shaft had 3 compartments, and was 1,335′ deep, opened sle Royale bed, with crosscuts driven on the eleventh to fifteenth levels, e, to the Portage bed, lying 150′ to 220′ westward, with about 2 miles s opened thereon, stoping having been about equally divided between beds, which were found markedly similar in characteristics and copper The surface plant at No. 1 was dismantled, 1908, machinery being ainly to No. 4 shaft. Concrete dams have been built across the south f No. 1 at the thirteenth and fourteenth levels, holding back the mine Surface water is collected on the eighth level, and sent to No. 2 shaft ing out.
2 shaft, with 3 compartments, 2,400′ deep, is located 2,280′ southwest 1, and in 1908 supplied two-thirds of the rock tonnage of the mine, its ion running about 13 lbs. fine copper only, as against circa 17 lbs. fine per ton from the rock of the 3 new shafts. Stoping is in progress e thirteenth to the twenty-second levels, inclusive. Less mass copper g produced than formerly, and the north drifts are not looking espe- ell.
3 is merely a site for a shaft, to reopen the old Huron mine, which rkings nearly 1,900′ in depth. In 1908 the nineteenth level south drift 2 was sent under the old Huron workings, which remain filled with

e new shafts, Nos. 4, 5 and 6, all on the Isle Royale bed, at the southern the property, have about 2 miles of workings. These shafts show con- le heavy copper, the amount of mass copper raised May, 1908, having early 50 tons. The new shafts have been connected with the railroad d given permanent equipments.
4 shaft, circa 3,100′ south of No. 2, was 425′ deep October, 1908, de- g good stamp-rock. Equipment includes a 32x72″ Nordberg duplex- hoist, good for one mile depth, and a 35-drill air-compressor, both from No. 1 shaft. There is a cylindrical steel shaft-rockhouse, built by isconsin Bridge & Iron Co., having cylindrical rock-bins 42′ in diameter 2′ high. The power plant has a 140′ steel brick-lined self-supporting

5 shaft, *circa 5,100′ south of No. 2, on Section* 2, was begun October,

1906, and was circa 425′ deep October, 1908. The shaft is sunk in the wall, and will be given a new shaft-rockhouse similar to that at No. 4, in

No. 6 shaft, formerly known as the Section 11 exploratory shaft, is 7,300′ southwest of No. 2, near the centre of Section 11, and was cut d 1908, to 3-compartment size. The shaft was 550′ deep October, 1908, dev ing very good average ground, the bed showing much epidote. Levels opened at 120′ intervals. The permanent equipment, added 1908, includ brick engine-house, steel boiler-house with a 140′ brick-lined self-suppo steel stack, and a circular steel shaft-rockhouse, similar to that at No. 4.

A shaft was started, 1904, on Section 10, but was discontinued becau the heavy overburden, and a diamond drill substituted, the drill cores sho an amygdaloidal bed, of which about 5′ in width carried stamp-coppe fine grains.

The Section 12 shaft was begun October, 1905, and was discontin January, 1908, at depth of 812′, after drifts and crosscuts had been d four ways to locate the Baltic bed. The shaft was sunk in a badly distu bed, practically barren of copper, and was abandoned because later dev ments showed the Baltic bed to be located elsewhere on Isle Royale lands.

The new Baltic shaft, on the Hussey-Howe tract, was circa 35′ deep ber, 1908, with temporary equipment, and a promising showing of copper found therein, on the Baltic bed, Nov. 1, 1908.

Shafts Nos. 1 and 2 formerly had duplicate equipments. No. 2 has a combination shaft-rockhouse, 44x60′ in size and 90′ high, with 18 and 13x20″ Portage Lake crushers. The engine-house is 50x90′, of ste stone foundations, with a hoist having 18′ 6″ drums with lathe-turned gr for 6,000′ of 1½″ cable, capable of raising 6-ton skips from a depth of 6 The compressor-house has a 35-drill Nordberg 2-stage air-compressor. boiler-house is 44x72′, with a 16x72′ coal-storage addition, and a 3,00 coal trestle, with three 150-h. p. 84″ Burt Horizontal boilers, taking from a dam 300x500x6′. The machine shop is 40x60′, of steel, on stone fou tions. There are about 100 dwellings on the company's lands.

The Isle Royale railroad, owned by the company, connects the mine mill with about 5 miles of main line, having easy grades, and was reball and bridges and trestles strengthened, 1908, for heavier rolling stock. E ment includes 35-ton, 55-ton and 60-ton locomotives, and 40 forty-ton steel cars equipped with air-brakes.

The millsite, at the mouth of Pilgrim River, has nearly one mile of fron on Portage Lake. The mill, 134x210′, of steel frame, on stone foundations three 2,000-ton rock-bins and 3 Nordberg stamps having circular mortars ⅜″ screen openings. As built, each stamp had 32-ton mortars, restin anvil-blocks bedded on 20x20′ platform 3′ thick, of 14x24″x20′ oak tim Underneath each platform is a caisson, reaching to bedrock, made of boiler steel, 74′ long and 12′ in diameter, until near the top, where the a bell-shaped flare, 20′ in diameter, to support the oak platforms under the anvil-blocks. The caisson and spaces between are filled with con The first head was rebuilt, 1908, and given solid concrete foundations to rock. The first head was changed over, March, 1905, to the steeple-comp system, and a second was altered similarly, during the latter half of 190 third remaining a simple head, of circa 500 tons daily capacity, whil compound heads are of about 750 tons daily capacity each. The dre floor has 72 rough jigs and 30 finishing jigs, of the Parnall-Krause type, lar slime tables, and Bartlett and Wilfley tables to treat slimes from the tables. There are rolls with fixed bearings to regrind coarse gravel fro mortars.

The mill has a complete machine-shop, on the second floor, and pow

furnished by a 750-h. p. engine, taking steam from four 250-h. p. boilers in a 46x72' boiler-house at the rear of the mill.

There is a 32x600' wharf, with deep water alongside, at the millsite, with appliances for unloading coal and general freight, and for the dispatch of mineral, in scows, to the smelter at Dollay Bay, 2 miles across Portage Lake.

Water is furnished the mill by a 16,000,000-gallon Nordberg Corliss pump, especially designed to handle muddy water, having a triple discharge into a 30" riveted steel water-main running 2,200' from pump-house to mill, the pump being located some distance from the mill to obviate stamp-sand clogging the intake. Three 100-h. p. boilers furnish power for the pumps, fuel being taken from a large coal-trestle at the rear of the pump-house boiler-rooms. A dam near the mill furnishes feed-water for boilers.

Production of fine copper has been as follows: 3,569,748 lbs. in 1902; 3,134,601 lbs. in 1903; 2,442,905 lbs. in 1904; 2,973,761 lbs. in 1905; 2,937,098 lbs. in 1906; 2,354,198 lbs. in 1907. Yield of fine copper, per ton of rock stamped, has been remarkably uniform, showing less variation than almost any other mine in the Lake Superior district, returns for 5 years, 1903 to 1907, inclusive, ranging from a minimum of 15.2 lbs. per ton in 1905 and 1907 to a maximum of 15.8 lbs. in 1904. Production, September, 1908, was about 18,000 tons of rock stamped, yielding circa 175 tons of mineral, or about 265,000 lbs. fine copper. The new shafts should be capable of more than doubling the former production, and 1909 should show a considerable increase in output.

Costs per ton of rock stamped have been as follows: $1.86 in 1903; $1.86 in 1904; $1.71 in 1905; $2.25 in 1906; $2.92 in 1907. Costs per pound of fine copper have been as follows: 11.83 cents in 1903; 13.3 cents in 1904; 12.76 cents in 1905; 12.22 cents in 1906; 17.09 cents in 1907. In addition to the preceding figures, costs per pound, for exploration, railway extensions, etc., brought the total cost of copper, in 1906, to 14.69 cents per pound, and in 1907 to 20.26 cents per pound.

The company began 1907 with a balance of assets of $772,592.99, and ended with a balance of $501,157.64. Based on figures of shrinkage of assets alone, 1907 was the worst year that the company has experienced, but, taking into consideration the progress made in opening three new shafts on the Isle Royale bed, the year was one of the most satisfactory in the company's history, but an even better mining showing was made in 1908, with continued developments of a satisfactory nature in the new Isle Royale shafts, and the location of the northern extension of the Baltic bed, on the Hussey-Howe tract. The company has ample resources, including a very large cash surplus and magnificent equipment, and has a courageous management, which is entitled to great credit for its persistent search for mineral values, and the prospects of the company seem brighter than at any time in the past.

ISLE ROYALE LAND CORPORATION, LTD. **MICHIGAN.**

Office: 24 North John St., Liverpool, Eng. Local office: care of Fred W. Nichols, agent, Houghton, Houghton Co., Mich. W. J. Thompson, J. P., chairman; John Tibbs, secretary. Organized June 21, 1890, as Wendigo Copper Co., Ltd., and name changed to present title July, 1901. Capitalization £25,000, shares £5 par, in 2,000 first preference, 1,089 second preference and 1,911 ordinary shares. Preference shares, all issued and fully paid; 34,504 ordinary shares issued, £4 paid in. Last published accounts, of date Dec. 31, 1905, showed a debit balance of £7,348. Lands, 83,720 acres, mainly copper-bearing, upon the northern fold of the Keweenawan syncline, on Isle Royale, Lake Superior, Michigan, comprising the major portion of the area of this, the largest fresh-water island of the globe. Considerable mining, of a rather prospectory nature, has been done upon these lands, at various periods in the past, and some *copper secured. Idle since 1892.*

SOCIETÀ METALLURGICA ITALIANA. ITAL

Works office: Leghorn, Tuscany, Italy. Organized 1887, and capitaliz tion since increased to 10,000,000 lire. Net profits, 1904, were 641,067 lire, an a dividend of 7.5% was paid for that year. Property includes 3 plants, t largest, at Leghorn, occupying about 25 acres, with a smaller plant at Limes

Smelter, in connection with the works, has 4 blast-furnaces, of about tons aggregate daily capacity, and 4 reverberatory furnaces casting refin copper as anodes, plates, ingots, etc. The smelter treats about 20,000 tons ore yearly, partly native but largely imported from Spain, America and el where. In connection with the smelter there is an electrolytic refinery, bu 1900, which turns out copper of very great purity.

The power plant of the works has 16 engines, with about 1,800 aggrega h. p., and a very complete electric plant, furnishing power, light and ener for the electrolytic refinery. The shops are extensive, including rolling mil tube mills, wire-drawing shops, wire-rope shops and miscellaneous shops f the manufacture of copper into a great variety of forms. There is a spec alloy foundry having 28 crucible furnaces, for fusion of the principal copp alloys, the products of these works enjoying an excellent reputation. The also is an extensive acid plant for the manufacture of sulphuric acid. T company turns out nearly 10,000 metric tons of manufactured copper yearl in almost an infinite variety of forms, and employs about 1,300 men.

ITMAY MINE. WYOMIN

Office: care of I. C. Miller, Rawlins, Wyo. Mine office: Rambler, Carbo Co., Wyo. Albert Bryle, superintendent. Is not an incorporated company Lands, circa 4 miles south of Rambler, have a drainage tunnel and a 35 shaft, showing a vein up to 8′ in width, carrying occasional native copper an sulphide ore, formerly claimed to average 30% copper and 4 to 5% lead, bu actually averaging about 8% copper only. Lands are said also to have a 2 vein carrying a 3′ paystreak of high grade ore. It was claimed, June, 1906, that a 200-ton reduction plant had been bought, and was to be installed, bu this apparently was a pipe-dream.

IT MINING CO. ALASKA

Mine office: Ketchikan, Alaska. Lands, on Kasaan Bay, showing auriferou copper ore, are opened by a crosscut tunnel. Plans a one-mile tram, with a 1,200′ gravity section leading to a 1,200′ wharf, on tidewater.

ITSUKI MINE. JAPAN

Mine office: Itsuki-mura, Kuma-gori, Higo, Japan. Ore is chalcopyrite, associated with iron pyrites, averaging 5 to 6% copper, in veins interbedde in clay-slates. Production, 1900, was 1,080,163 lbs., falling to 441,407 lbs. i 1906 and to 330,262 lbs. in 1907.

IVANHOE MINING CO. ARIZONA

Mine office: Patagonia, Santa Cruz Co., Ariz. A. P. Abell, president Jas. Johnson, vice-president and general manager. Capitalization $750,00 shares $50 par. Lands, 12 claims, 4 miles southwest of Patagonia, opened b tunnel, with about 500′ of workings, showing highly argentiferous lead an copper ores. Presumably idle.

IVANHOE MINING CO. UTAH

Letter returned unclaimed from former mine office, Bingham Canyon, Sal Lake Co., Utah. Is in litigation with the United States Smelting & Refinin Co., but otherwise idle.

IVANPAH CONSOLIDATED SMELTING CO. CALIFORNI

Dead. Property passed to Cocopah Copper Co. Formerly at Manvel, Sa Bernardino Co., Cal.

IVANPAH MAMMOTH GOLD & COPPER MINING CO. CALIFORNI

Office: San Diego, Cal. Letter returned unclaimed from former mi

office, Ivanpah, San Bernardino Co., Cal. Capitalization $2,000,000, shares $1 par. Lands, 22 claims, 11 freehold and 10 held under option, area 435 acres, 12 miles west of Ivanpah, formerly claimed to show a ledge 300′ wide and 6,000′ long, which, at last accounts, had shrunk, most unaccountably, to 8′ width, of which 6′ is said to carry argentiferous and auriferous copper and lead sulphides, formerly claimed to give surface assays of $9 to $105 per ton. Idle and apparently moribund.

JACK POT MINING & MILLING CO. **WYOMING.**

Office: 365 Tenth St., Oshkosh, Wis. Mine office: Coppertown, Carbon Co., Wyo. Employs 4 men. Ole Granberg, president and general manager; H. Thorsgaard, vice-president; H. O. Granberg, secretary and treasurer; J. M. Riggs, superintendent. Organized Dec. 23, 1903, under laws of Wyoming, with capitalization $1,000,000, shares $1 par. Lands, 9 patented claims, area 180 acres, in the Battle Lake district, showing fissure veins in diorite and chloritic schist, and 2 contact veins, between diorite and porphyry, carrying carbonate and sulphide ores. Two veins under development are said to average 14′ and 40′ width. The smaller vein has given average assays of 8% copper and $3 to $12 gold per ton, the larger vein showing very low grade copper ore, apparently not of commercial tenor. Development is by a 75′ tunnel, 100′ shaft and 8 pits of 20′ to 36′ depth, with 411′ of workings. Idle.

JACK TAR COPPER CO. **ARIZONA.**

Dead. Was a swindle, perpetrated by the Wm. F. Wernse gang, of St. Louis. Formerly at Pima, Graham Co., Ariz.

JACQUA COPPER MINING CO., N. L. **AUSTRALIA.**

Office: 113 Pitt St., Sidney, N. S. W., Australia. Mine office: Jacqua Creek, Argyle Co., N. S. W., Australia. Organized, early 1907, under laws of New South Wales, with capitalization £2,000, shares £1 par. Presumably idle.

JALISCO COPPER MINING CO. **ARIZONA.**

Dead. Was a stock-jobbing enterprise. Formerly at Oro Blanco, Pima Co., Ariz. Described Vol. III.

JALISCO COPPER MINING & SMELTING CO. **MEXICO.**

Dead. Delaware charter repealed, 1903. Formerly in state of Jalisco, Mexico.

JALISCO MINING & DEVELOPMENT CO. **MEXICO.**

Office: care of Dennis Ryan, St. Paul, Minn. Mine office: Ahualulco, Jalisco, Mex. Organized, circa 1906, to take over property of Altamira Mining Co. Idle.

JALISCO (MEXICAN) MINING SYNDICATE, LTD. **MEXICO.**

Office: 54 New Broad St., London, E. C., Eng. A. Firth, Chairman; M. P. Gosset, agent in Mexico; G. V. Mitchell, mine superintendent; Alfred Hays, secretary. Organized Jan. 18, 1906, under laws of Great Britain, with capitalization £25,000, shares £1 par; issued, £16,000. Company claims to possess 80 denencias, area 198 acres, carrying ores of gold, silver and copper, at Malpillas, Jalisco, Mexico, but there is no postoffice by the name of Malpillas, Malpillas or Milpillas in Jalisco, or elsewhere in Mexico. Regarded with suspicion.

JAMAICA CONSOLIDATED COPPER CO. **JAMAICA.**

Office: 262 Washington St., Boston, Mass. Mine office: May Pen, Clarendon, Jamaica. T. I. Hogan, president; E. F. Gowell, Clerk; R. W. Goss, treasurer; W. S. Baker, general manager; Cyril Abraham, superintendent. Organized circa September, 1907, under laws of Maine, with capitalization $6,000,000, shares $1 par.

Lands, 2,276 acres, held on 99-year lease, 15 miles from the coast, in the Clarendon Hills. Property includes the Congo Hill mine, having a 455′ tunnel showing a small vein *carrying chalcopyrite and* bornite; the Copper Wood

mine, having a 270' tunnel, showing a small stringer of bornite; mine, having a 75' tunnel showing bornite and chalcocite, said to copper; the Elma mine, having a 240' tunnel, and the Iva mine, ha tunnel. Wages for labor are 18d. per day.

Small shipments of ore were made from this property, 1854-1857, pany estimates that it can place copper in New York for 6.5 cents and that it will be mining 200 tons of ore daily by middle of 19 of which estimates seem warranted. Is regarded with suspicion.

JAMAICA COPPER CO. J

Dead. A stock-jobbing enterprise. Formerly in Jamaica. Describ

JANIE MINING CO.

Dead. Lands sold, 1907, to Mexican Mines Corporation. Fo Baca, Hidalgo, Chihuahua, Mex.

JANOS MINING CO.

Dead. A swindle. Formerly at Casas Grandes, Galeana, Chihua Described Vol. VI.

JAPAN-FLORA MINES & TUNNEL CO. CO

Office: 310 Colorado Bldg., Denver, Colo. Mine office: Tell Miguel Co., Colo. J. J. Fisher, president; Col. A. G. Brownlee, vic and general manager; J. H. Cunningham, treasurer; Wm. E. Humph tary. Organized Aug. 22, 1903, under laws of Colorado, with cap $2,000,000, shares $1 par.

Lands, 35 patented claims, area 317 acres, in the upper San M trict, showing 8 fissure veins, in brecciated andesite, carrying auri argentiferous galena and iron pyrites, with quartz gangue, averag 0.5% copper, 10% lead, 8% zinc, 23.5 oz. silver and $10 gold per t by a 685' shaft and 8 crosscut tunnels, two longest 1,600' and and 2 19,665' of underground openings, estimated to give 150,000 tons of o out for stoping. Has steam and electric power, with a 45-h. p. hoist air-compressors, power drills and shops. Property has produced co ore. Closed down, October, 1905, but shipped a little ore, 1907. P idle.

JARILLA COPPER CO. NEW

Dead. Reorganized, 1903, as Three Bears Copper Co. Formerly Otero Co., N. M.

JARILLA MINING & SMELTING CO. NEW

Mine office: Jarilla, Otero Co., N. M. Lands, 20 claims, held un bond and lease, expiring 1909. Idle and apparently moribund.

JASPER COPPER CO. (

Office: 716 Torrey Bldg., Duluth, Minn. Letter returned uncla former mine office, Port Arthur, Thunder Bay district, Ont. Geo. W president; E. K. Corbett, vice-president; Edwin C. Jordan, secretary urer; preceding officers, S. Enborg, David Dickie, Robt. Ferguson, Ge St. John Schulte, directors. Organized under laws of Arizona, with tion $5,000,000, shares $5 par. Lands, circa 400 acres, about 40 of Port Arthur, on the Black Bay peninsula, having lake frontage. is said by company to show a jasper-conglomerate, carrying values silver and gold, and an amygdaloid of 900' to 1,000' width carrying of 2.5% copper and $3.50 per ton in combined silver and gold val is absolutely untrue, and shows the company to be managed either who do not know the truth, or who will not tell it. Property is sa a 40' shaft and a 75' tunnel. Company formerly was promoted fro Blk., Buffalo, N. Y., from which address letters were returned unc *regarded with suspicion.*

JASPER MOUNTAIN COPPER CO. **WYOMING.**

Mine office: Douglas, Converse Co., Wyo. Idle since circa 1904.

J. BENNETT SMITH MINING CO. **MINNESOTA.**

Office: 280 Chestnut St., Kingston, Pa. J. Bennett Smith, president; Herbert Conyngham, secretary; Edw. Hilles, treasurer; Henry Hoefler, general manager. Lands, on the Lower Snake River, in Pine County, Minnesota, carry the extension of the Keweenawan copper beds of Lake Superior. Mine has pits and shafts of 20′, 40′, 110′, 150′ and 560′, on amygdaloidal and conglomerate strata carrying native copper. Company reports having expended about $50,000 on development, since 1879.

J. D. VORIS COPPER MINING CO. **COLORADO.**

Mine office: Hillside, Frémont Co., Colo. Idle several years and apparently moribund.

JEDWAY COPPER CO. **BRITISH COLUMBIA.**

Mine office: Heriot Bay, Queen Charlotte Island, B. C. Property, sundry claims held under $125,000 bond and lease, produced some ore of fair grade in 1907. Presumably idle.

JEFFERSON-CALHOUN MINING CO. **COLORADO.**

Office: Chicago, Ills. Mine office: Russell Gulch, Gilpin Co., Colo. Louis D. McCall, president; Alfred M. Stearns, vice-president; W. S. Calder, secretary. Organized under laws of Colorado, with capitalization, $3,000,000, shares $1 par, apparently as a reorganization of the Wabash Consolidated company. Lands, 7 patented claims, reached by the Newhouse tunnel. Plans sinking a 1,000′ shaft.

JEFFERSON COPPER CO.

Dead. Was a swindle, promoted by the notorious Wm. F. Wernse gang, of St. Louis. Had a name, but never enjoyed a local habitation, property being purely imaginary.

JEFFERSON COPPER-GOLD MINING CO. **COLORADO.**

Office: 1419 Schofield Bldg., Cleveland, Ohio. R. A. Gurley, president and general manager; S. Bender, vice-president; F. E. Carr, secretary; E. A. Hermen, treasurer; preceding officers, Francis L. Judd, W. E. Hayes, C. S. Carr, A. Grove and E. E. Carr, directors. Organized under laws of Colorado, with capitalization $1,000,000, shares $1 par. Lands, 180 acres, in the Bear Creek district of Jefferson County, Colorado, showing 6 veins, reported as fissures in diorite, of 21′ average width, carrying chalcopyrite with 1.5 oz. silver and $10 to $14 gold per ton, opened by a 78′ shaft. Company states that veins carry about 2% copper down to the 125′ level, followed by average values of about 7% to the 350′ level, there reaching the base zone, carrying 3 to 4% copper.

JEFFERSON COPPER MINING CO. **COLORADO.**

Dead. Was a swindle, perpetrated 1900, by the notorious W. C. Calhoun, of Denver. Merged into the Zanesville company, circa 1901, latter merged, circa 1902, in the Wabash Consolidated. Formerly at Golden, Jefferson Co., Colo.

JEFFERSON COUNTY MINING CO. **MONTANA.**

Letter returned unclaimed from former mine office, Basin, Jefferson Co., Mont. Was organized for the purpose of leasing the mine of the Basin & Bay State Mining Co. Seems complicated, somehow, with La France Copper Co. Idle and apparently moribund.

JEFFERSON-MONTANA COPPER MINES CO. **MONTANA.**

Office: care of Clarence K. McCornick, vice-president and general manager, Salt Lake City, Utah. Letter returned unclaimed from former mine office, Corbin, Jefferson Co., Mont. Arthur H. S. Bird, president and superintendent; C. H. Post, *secretary and treasurer*; preceding officers, H. A. Mc-

Cornick and B. T. King, directors. Organized, 1904, under laws of Utah. a twin of the Corbin-Montana Mines Co. Lands, circa 20 claims, showin veins and having a 310′ shaft. Did some diamond drilling, 1905. Comp said to have given a 3-year bond and lease, circa June, 1908, to Chas. Hug Alfred Cribben and L. C. Cribben, of Denver.

JEFFS LAND CO. MICHIGA

Office and mine: Rockland, Ontonagon Co., Mich. Lands, 800 acres, no and west of Rockland, on which some exploring was done, 1899-1900. Fu described Vol. I.

JELDNESS COPPER CO. NEVAD

Dead. Organized circa 1906, with capitalization $1,000,000, shares $5 p Formerly at Ely, White Pine Co., Nev.

JELM TOWNSITE & MINING CO. WYOMIN

Dead. Formerly at Jelm, Albany Co., Wyo. Described Vol. VII.

SOCIEDAD MINERA JENERAL LAS HERAS DE CABEZA DE VACA. CHIL

Office: Santiago de Chile. Mine office: Copiapó, Copiapó, Chile. O ganized Jan. 14, 1907, under laws of Chile, with capitalization 240,000 pes shares 100 pesos par.

JENNIE DELL MINING CO. MONTAN

Dead. Succeeded, 1905, by Columbus-Butte Mining Co. Formerly Butte, Silver Bow Co., Mont.

JEROME-ARIZONA COPPER CO. ARIZON

Office: care of Hon. Reese M. Ling, Prescott, Ariz. Mine office: Jerom Yavapai Co., Ariz. Organized June, 1907, under laws of Arizona, with capita zation $5,000,000, shares $5 par. Lands are 4 miles northeast of Jerome.

JEROME CAÑON COPPER CO. ARIZON

Office: 106½ South Broadway, Los Angeles, Cal. Mine office: Jerom Yavapai Co., Ariz. J. W. Tibot, president; G. B. Tibot, secretary; Jos. Smith, superintendent. Organized 1901, under laws of Arizona, with capita zation $1,000,000, shares $1 par. Lands, 16 claims, including the Copp Glance group, 14 miles northwest of Jerome, showing a vein ranging fro 2′ to 7′ width, with circa 1,500′ of openings, with ore assaying up to 25 copper, 60 oz. silver and $110 gold per ton. Had steam power, air-compress power drills, hoist and pumps. Information refused and company apparen moribund.

JEROME COPPER CO. ARIZON

Dead. Succeeded, 1902, by Cleopatra Copper Co. Formerly at Jerom Yavapai Co., Ariz.

JEROME MINES DEVELOPMENT CO. ARIZON

Dead. Succeeded the Verde Chief Copper Co., and was succeeded, 19 by Haynes Copper Co. Formerly at Jerome, Yavapai Co., Ariz. Describ Vol. VI.

JEROME SILVER-COPPER MINES CORPORATION. ARIZON

Dead. Formerly at Jerome, Yavapai Co., Ariz.

JEROME VERDE COPPER CO. ARIZON

Office: 804 Flatiron Bldg., New York, N. Y. Mine office: Jerome, Ya pai Co., Ariz. Wm. Welles Bosworth, president; Thos. E. Campbell, vice-pr dent; Leland S. Stillman, secretary; I. Mabbet Sutton, treasurer; preced officers and Thos. E. Campbell, directors; Dr. Ernest A. Haggott, consulti engineer; Eli Barrett, superintendent. Organized circa January, 1907, un laws of Arizona, with capitalization $5,000,000, shares $1 par, as successor the Verde Queen Copper Co., giving old shareholders of the Verde Qu *$2,501,000* escrowed stock of the new company, this amount being a cont

Lands, 28 claims, patented, area 486 acres, said to be encumbered by

mortgage, lying northeast of the United Verde and adjoining the United
Extension, showing an iron gossan with outcrops of copper ore on the
and Columbia claims. The Columbia has a 475′ two-compartment shaft,
about 2,000′ of workings, showing mainly copper carbonates, with small
ities of oxide and silicate ores, average assays from which are reported
% copper, but a mine, if found, will be at greater depth. Has a number
uildings and a 35-ton smelter, out of commission since 1904, which pro-
d 3 carloads of matte, when operated by the Verde Queen. Property was
for several years, until taken over by present company. Company was
oted by the General Securities Co., Los Angeles, Cal., and Wm. V. Holley
., New York, former offering the stock as absolutely guaranteed, which
ssarily causes it to be looked upon with suspicion. Company has been
ised severely in Jerome because of the extravagant nature of its adver-
g. Company claimed, July, 1907, to have about $35,000 in its treasury, in
and securities. The questions naturally arise as to what proportion may
been in cash, and the value of the securities. Company is not regarded
rably.

SIE BELLE MINING, MILLING & SMELTING CO. **CALIFORNIA.**

Office: 302 Lankershim Bldg., Los Angeles, Cal. Mine office: Daulton,
era Co., Cal. W. H. Sallada, president; W. T. Carter, secretary; D. J.
enter, lessee. Organized 1902, under laws of Arizona, with capitalization
0,000, shares $1 par. Lands, 3 patented claims, area 40 acres, with a
main shaft showing 4 fissure veins, carrying oxide, carbonate and sulphide
, assaying 15 to 20% copper, 6 oz. to 10 oz. silver and $8 to $15 gold per
Has steam power, air-compressor and a 30-ton concentrator. Has shipped
entrates of about $40 per ton average gross value.

SIE COPPER MINING CO. **UTAH.**

Office: care of Clark L. Whitney, secretary, Salt Lake City, Utah. Mine
: Dixie, Washington Co., Utah. Wm. Scowcroft, president; Andrew
nsen, vice-president; John Q. Critchlow, treasurer; preceding officers,
t. G. McQuarrie, J. H. Garrett and Albert Scowcroft, directors. Organized
, under laws of Utah, with capitalization $60,000, shares 10 cents par.
s, 5 claims, in the Tutsagubet district, having a few feet of openings
ing ore up to 68% in copper tenor.

SSIE MINES CO. **ARIZONA.**

Mine office: Poland, Yavapai Co., Ariz. John S. Jones, president and
eral manager; Harry Brisley, vice-president; Allan Hill, secretary; E. J.
lerne, treasurer; preceding officers, Jesse T. Jones, J. J. Shaw, L. W. Smith,
ley Caldwell and Nelson Dresbach, directors. Organized under laws of
ona, with capitalization $2,500,000, shares $1 par. Mine has a 667′ shaft,
is claimed to have produced upwards of $750,000 in gold, under former
nership. Receiver was appointed October, 1905, and discharged June, 1906.
pany claimed to have 150,000 tons of ore blocked out for mining, worth
conservative estimate, $2,000,000, which, of course, was untrue, and paid
tterly dividends of 3% while peddling shares. President Jones and F. D.
er, agent for the company, were indicted for using the mails to defraud,
cases were nolle prossed, and the management considers this a vindication.
nagement is said to plan building a 50-ton reduction plant. Is viewed
deep suspicion as a mere bit of stock-jobbery, notwithstanding the suc-
of its promoters in escaping jail.

SSIE WEIMER MINING CO. UTAH.

Mine office: Callao, Juab Co., Utah. Presumably idle.

NA JESÚS MARIA DE BAQUERÁCHIC. MEXICO.

Mine office: Lluvia de Oro, Batopilas, Chihuahua, Mex. Is an old prop-

once important, having copper sulphides carrying circa 5 oz. silver and $2 g
per ton. Presumably idle.

JICARILLA MINING & REDUCTION CO. NEW MEXI

Letter returned unclaimed from former office, 108 La Salle St., Chica
Ills. Mine office: Jicarilla, Lincoln Co., N. M. Geo. E. Emery, preside
H. G. W. Reinhardt, secretary; Wm. A. Franklin, manager; J. L. Walsh, m
superintendent. Lands are developed by a shaft showing gold-silver-cop
ores. Has steam power and a 15-stamp mill. Idle and apparently moribu

J. I. C. MINING CO. UTA

Office: Salt Lake City, Utah. Mine office: Park City, Summit Co., Ut
G. D. B. Turner, general manager; N. A. McLean, superintendent. Is co
trolled, through stock ownership, by the West Quincy Mining Co. Lands, ne
Daly-West and Daly-Judge, have a 625′ shaft.

JIMULCO MINING CO. MEXIC

Office: care of City Brewery, San Antonio, Tex. Mine office: Ot
Viesca, Coahuila, Mex. Otto Wahrmund, president; O. S. Newell, vice-pre
dent; S. G. Newton, secretary; John J. Stevens, treasurer; S. D. Bridge, ge
eral manager; Arthur L. Tuttle, general superintendent; John B. Moor
superintendent; Sidney P. Tyler, mine superintendent.

Organized 1901, under laws of Texas, with capitalization $500,000, shar
$50 par, increased March, 1906, and reduced, 1908, to $1,000,000. Is said
have declared 6 dividends, aggregating 27% on capitalization, in 1906, and
said to have paid 6 dividends in 1907.

Lands, 111 hectares, including the Guadalupe, Casita, Reforma and Alfar
mines, opened by a 300′ shaft and 5 tunnels of circa one mile aggregate length
mine having an extreme depth of 500′, with about 6 miles of workings. Ores
mainly oxidized, are shipped to the Aguascalientes smelter for reduction, an
are said to give average returns of 15% copper, 9 oz. silver and $2 gold per ton
which figures seem unduly high.

Mine has gasoline power, and is connected, by a 5-mile narrow gauge
railway, costing $40,000, with the Mexican Central railway, at Jimulco. Pro
duction was 1,693,957 lbs. fine copper in 1904, and 3,413,735 lbs. fine copper
in 1905. Was mining circa 75 tons daily, of high grade copper ore, until
closed down October, 1907, but resumed June 1, 1908, with a force of about 15
men, again shipping ores to the Aguascalientes smelter. Property considered
valuable.

JOAQUINA GOLD MINING CO. MEXICO

Office: 327 Douglas Bldg., Los Angeles, Cal. Mine office: Real del Ca
tillo, Norte, Baja California, Mex. L. H. Mitchell, superintendent. Has auri
erous copper ores and steam plant, employing circa 25 men at last accounts.

JOHN D. COPPER MINING CO. WASHINGTON

Dead. Merged, 1902, in Ethel Consolidated Mines Co. Formerly at Inde
Snohomish Co., Wash.

JOHN DIAS MINE. CALIFORNIA

Owned by Owl Copper Mining Co.

JOHNNIE BULL COPPER MINING CO. NEW MEXICO

Dead. West Virginia charter forfeited 1902. Formerly at Steins, Gra
Co., N. M.

JOHNNIE COPPER CO. NEVADA

Mine office: Johnnie, Nye Co., Nev. Presumably idle.

JOHNNIE-GREENWATER CONSOLIDATED COPPER CO. CALIFORNIA & NEV

Mine offices: Greenwater, Inyo Co., Cal., and Johnnie, Nye Co., Nev. P
T. Hickman, president and general manager; M. H. Smith, vice-president; H
H. Cook, secretary; E. H. Meuschke, treasurer. Organized under laws of Ar

apitalization $3,000,000, shares $1 par. Lands, 23 claims, area 460 groups. The Greenwater group, 4 claims, is undeveloped. The 4 claims, circa 3 miles south of Manhattan, Nye County, Nevada, rface trenching, said to show ore giving good assays. The Black-, 8 claims, near Johnnie, has 60′ of openings, claimed to show ore ll in copper and gold. Is not favorably regarded.

N MINING & MILLING CO. **COLORADO.**

ffice: Idaho Springs, Clear Creek Co., Colo. Has auriferous and s silver-lead ores, with steam power.

COPPER DEVELOPMENT CO. **ARIZONA.**

First company of this name was promoted, 1906, by the Wallace Co., of Chicago, with capitalization $3,000,000, shares $3 par. Johnson, Cochise Co., Ariz.

COPPER DEVELOPMENT CO. **ARIZONA.**

ffice: Johnson, Cochise Co., Ariz. Organized circa December, apitalization $2,000,000, by Ralph R. Wilson and E. K. Elliott, as company of same name promoted by the Wallace H. Hopkins Co., to grief. Lands, 5 claims, known as the Climax group, held under se, on which it is planned sinking a shaft.

MINES. **WASHINGTON.**

ffice: Cle Elum, Kittitas Co., Wash. Property, in the Teanaway pped a little high grade gold-copper ore, 1903, to Puget Sound resumably idle.

N MINE. **MONTANA.**

by Butte Coalition Mining Co.

N MINING CO. **MONTANA.**

Property sold, 1906, to Butte Coalition Mining Co. Formerly at r Bow Co., Mont.

E COPPER MINING CO. **MONTANA.**

eturned unclaimed from former office and mine, Saltese, Missoula Robt. H. Fraser, president; John R Lattimer, vice-president; Chas. retary and treasurer; Richard Daxton, manager. Organized 1907, of Montana, with capitalization $1,000,000, shares $1 par. Lands, nted claims, circa 14 miles from Houston railway station, having haft showing ore said to give average assays of 21% copper, 3 oz. 2 gold per ton.

E COPPER MINING & SMELTING CO. **MONTANA.**

ffice: Chouteau, Teton Co., Mont. Organized 1903, to develop e Blackfoot ceded strip. Idle and apparently moribund.

E GOLD & COPPER MINING CO. **ARIZONA & UTAH.**

203 Mining Exchange, Denver, Colo. Mine office: Basin, Grand O. B. Price, president; Herbert S. Shaw, secretary. Capitalization res 1 cent par, and company has an indebtedness of $17,000, ex-apitalization. Lands, 7 claims, area 140 acres, on Contact Moun-Le Sal district, claimed to show surface croppings carrying 4 to and $6 and upwards in gold per ton, with very slight develop-lands in Yavapai county, Arizona, described in Vol. V, but ap-s abandoned same. Was prolific of stock-selling literature but esults. Moribund.

D & COPPER MINING CO. **WASHINGTON.**

Formerly at Houghton, King Co., Wash. Described Vol. VI.

OYA. **SPAIN.**

ure of D. Manuel Vázquez López, owner, Huelva, Spain. Mine erra, Huelva, Spain. Lands, 53 hectares, showing large quantities

of cupriferous pyrite, averaging 48% sulphur. Has a 10-kilometre tram, was developing and producing on a small scale in 1906. Presumably idle.

JUANITA MINING & MILLING CO. ARIZO

Office: care of Joseph Swan, secretary, Phœnix, Ariz. Dana A. Sea president; Curtis Miller, vice-president; Rufus W. Seaman, treasurer; C Warren, superintendent. Organized March 29, 1905, under laws of Ari with capitalization $1,500,000, shares $1 par. Lands, 11 claims, in the C Cañon district, circa 17 miles south of Prescott, opened by a 100′ shaft, to show a 14′ vein of ore averaging 6% copper and $4 gold per ton. Pre ably idle.

JUKES PROPRIETARY MINES. TASMA

Mine office: Mt. Jukes, Montagu Co., Tasmania. H. S. Muir, mine m ager. Sent block samples, 1906, to the Mt. Lyell smelter. Presumably idl

JULIA DEANE MINING CO. UT

Mine office: Bingham Canyon, Salt Lake Co., Utah. David Clay, m ager, at last accounts. Has a tunnel showing gold-copper ores. Has st power. Idle some years.

COMPAÑIA MINERA JULIA DE COLLAHUASI. CHI

Office: Iquique, Chile. Mine office: Collahuasi, Tarapacá, Chile. Or ized Feb. 14, 1907, under laws of Chile, with capitalization 400,000 pesos, sh 100 pesos par.

JOSÉ BRUNO GONZALEZ JULIO. CHI

Mine office: Cajon de Maipó, Santiago, Chile. Property is La Pode group, carrying a vein paralleling veins of the Compañía Minera de Ma situated a short distance therefrom, and of the same general character. Co ores carry cobalt in connection, and are refractory, production being sm at last accounts.

JULIUS CAESAR COPPER MINING CO. MEXI

Mine office: Santa Catarina, Norte, Baja California, Mex. W. Wri manager. Has electric power and employed circa 30 men early in 1907.

JUMBO GOLD MINING CO. BRITISH COLUMI

Mine office: Rossland, Trail district, B. C. Mine shows a vein ran up to 30′ or more in width, developed both underground and open-cast, v ores carrying from $7 to $20 per ton in gross values. Has steam and elec power, air-compressor, etc. Shipped circa 12,000 tons of ore to the Gra smelter, 1904, but since idle.

JUNCTION DEVELOPMENT CO. ARIZO

Dead. Succeeded, October, 1905, by Junction Mining Co. Formerly Bisbee, Cochise Co., Ariz.

JUNCTION MINE. ARIZO

Owned by Superior & Pittsburg Mining Co.

JUNCTION MINING CO. ARIZO

Dead. Merged, circa 1907, in Superior & Pittsburg Mining Co. Form at Bisbee, Cochise Co., Ariz. Very fully described Vol. VI.

JUNIATA GOLD & COPPER CO. ARIZO

Office: 225 Laughlin Bldg., Los Angeles, Cal. Mine office: Quartz H Yuma Co., Ariz. Employs 5 men. P. W. Powers, president; E. S. Field, v president; Dalton S. Patterson, secretary; T. W. Phelps, treasurer; H. B. man, superintendent. Organized Oct. 29, 1907, under laws of Arizona, v capitalization $1,000,000, shares $1 par; issued, $679,000. Lands, 10 cla area 200 acres, in the Seneca district, opened by shafts of 20′, 50′ and showing ore said to give average assays of 14.47% copper and 26.84 oz. si per ton. Company plans deepening main shaft to 300′.

***JUPITER* MINING CO.** WYOMI

Office: Tomah, Wis. Mine office: Holmes, Albany Co., Wyo. Dr

esident; J. A. McKay, vice-president; J. W. Hancock, secretary r. Lands, sundry claims, adjoining the New Rambler, on the Idle.

MINES, LTD. **BRITISH COLUMBIA.**

8 Leadenhall St., London, E. C., Eng. Mine office: Kamloops, B. C. F. V. Marment, chairman; W. J. Webb, secretary; Jos. al manager. Organized Feb. 22, 1905, as successor of British loration, Ltd., with capitalization £135,000, shares £1 par. De-000 at 6%; debenture interest in arrears. Lands, 7 claims, in district, and 5 claims in the Frederick Arms district. Property ask mine, having a 600′ main shaft, with circa 1 mile of workings, siderable body of chalcopyrite, associated with magnetite, main-trating grade, carrying fair values in copper, silver and gold. cludes a 250-h. p. tandem-compound condensing engine. plant includes a 160-ton mill and a smelter, mill receiving ore by Ore is screened on grizzlies, and coarse stuff passed through a es-Farrel crusher, *going thence to ore-bins*, whence crushed ore se rolls by 2 *automatic feeders, going* thence through interme-

diate rolls and being elevated to 2 series of trommels. Sized material fr... the trommels is concentrated on Hartz jigs. Tailings from finer sizes are r... to waste, while tailings from coarse jigs and oversize from trommels are ... crushed by fine rolls and returned to the elevators. Fines from trommels p... through 3 magnetic separators, for removal of the magnetite gangue. Sands ... concentrated on 3 Buss tables, and middlings from these go to Overstr... tables. Slimes run to a series of settling tanks, products of which are co... centrated on 6 Luhrig vanners, arranged in pairs. The 50-ton smelter w... planned as first unit of a large plant. Employs circa 75 men.

KANE COPPER CO. CALIFORNI...

Mine office: Needles, San Bernardino Co., Cal. F. P. Pingree, manage... Organized, 1907, under laws of Arizona, with capitalization $1,000,000. Lan... 6 miles west of Needles, are said to show good ore.

KANGAROO HILLS MINING & SMELTING CO. AUSTRALIA.

Dead. Lands forfeited, 1907. Formerly at Kangaroo Hills, Queensland Australia.

KAN-HSIEN MINE. CHINA.

Mine office: Kan-Hsien, Kiang-Hsi, China. Tuan Fang, viceroy of the Liang-Kiang provinces, general manager. Was under development, 1907-1908, a fund of 400,000 taels having been furnished for the purpose in equal amounts by the provinces of Kiang-Hsi and Kiang-Su.

KANSAS-BURROUGHS CONSOLIDATED MINING CO. COLORADO.

Dead. Became bankrupt 1904. Formerly at Central City, Gilpin Co., Colo.

KANSAS-CANANEA COPPER CO. MEXICO.

Office: Chicago, Ills. Mine office: La Cananea, Arizpe, Sonora, Mex. David Miller, president; A. B. Wadleigh, general manager. Organized circ... August, 1908, with capitalization $1,000,000, as a merger of the Ortega Mining Co., Southwestern Mining Co., Red Cloud Copper Co., Consolidated Gold-Copper Co. and Miller Mining Co.

The Southwestern lands were 342 hectares, known as the Huerfano group, 6 miles southeast of La Cananea, said to carry an 800′ ore zone, opened by a 150′ shaft showing ores giving good assay values in copper, lead and silver.

Lands taken from the Consolidated Gold & Copper Co. were 1,729 acres, including the Chapultepec mine, area 879 acres, and the Corregidor, area 74... acres, adjoining properties, circa 6 miles southwest of Cananea, said to show a formation similar to the Capote mines of the Greene-Cananea.

KANSAS CITY COPPER MINING & SMELTING CO. COLORADO.

Office: Eighth St. & Broadway, Kansas City, Mo. Mine office: Oneco, Routt Co., Colo. Oliver W. Kroll, superintendent. Has steam and electric power, and is said to have a 40-ton smelter. Presumably idle.

KANSAS CITY DEVELOPMENT CO. MEXICO.

Office and mine: care of Geo. Woodward, secretary, Moctezuma, Sonora, Mex. Tobias Crane, general manager. Lands, 20 pertenencias, known as the Credo Liberal, having an 80′ shaft showing ore assaying up to 20% lead, 2% copper, 200 oz. silver and $7 gold. Presumably idle.

KANSAS CITY FIREMEN'S COPPER MINING & SMELTING CO.

Office: 310 Kemper Bldg., Kansas City, Mo. Location of lands, if any, unknown. Presumably moribund.

KANSAS CITY GOLD & COPPER MINING & MILLING CO. COLORADO.

Dead. Formerly at Crestone, Saguache Co., Colo.

KANSAS CITY & SONORA MINING & MILLING CO. MEXICO.

Dead. Property sold, 1903, to Ures Consolidated Mining Co. Formerly at Ures, Sonora, Mex.

KAP-SAN MINE. KOREA.

Mine office: Ko-chin-don, Kap-San, Hamgyeng, Koren. Mine was di...

covered and opened more than 1,000 years ago, by a Chinaman, ownership passing eventually to the Korean throne. Formerly was of great importance, and is said to have employed several thousand workmen, as recently as 1883. Ore occurs as large irregular masses of sulphides, mainly chalcopyrite, with a mixture of arsenopyrite and pyrrhotite, but without other gangue or contact minerals, in limestone. The district shows alternations of limestone and marl, with interbedded clay-slate and sandstone, frequently metamorphosed by intrusive granite, and overlaid by basalt flows or intruded by basaltic dykes. Deposit now worked is the third that has been found, having an extreme thickness of 20′ and known length of about 80′, with fairly defined walls. Ore as mined is assorted into two grades, rich ore averaging about 20% copper and poor ore being of 5 to 6% copper tenor, the average of both classes being 12.07% copper, 45.44% iron, 37.40% sulphur and only 0.66% silica. Production, 1906, is estimated at 625,000 lbs. fine copper.

KAPUNDA COPPER MINE, LTD. **AUSTRALIA.**

Dead. Was abortive. Formerly at Kapunda, Light Co., South Australia.

KAPUNDA COPPER MINES, N. L. **SOUTH AUSTRALIA.**

Office: Melbourne, Australia. Mine office: Kapunda, Light Co., South Australia. Troubles over title to mine apparently have been straightened out. Mine, 50 miles north of Adelaide, opened 1842, and worked circa 1879-1901, by tributors, has 8 shafts, 2 deepest being about 450′ each. Both country rock and vein matter are very soft, requiring heavy timbering, and the oxidized zone is only about 50′ in depth. Ores are oxides, carbonates and occasional native copper in the shallow oxidized zone, succeeded by high-grade sulphides. Selected ore has returned 12 to 25% copper, and second grade ore 8 to 12% copper, but some shipments, 1906, ranged above 40% in copper tenor. Mine is said to have produced upwards of $1,000,000 in the past. Suspended operations late 1907.

KARANKULSKI MINE. **TURKESTAN.**

Office, mine and works: Tashkent, Turkestan. Is a small property, worked on very primitive lines, and was a small producer at last accounts.

KARGALINSKI WORKS. **RUSSIA.**

Office and works: Orenburg, Russia. B. A. Pashkoff, owner; E. O. Terner, manager. Mine, 24 miles from Orenburg, is a very ancient property, having been worked in prehistoric times, and ores now produced are said to average circa 3% only in copper tenor. Latest reported production, 1899, was 90,474 lbs. fine copper. Smelter closed down, 1906, and mine and works practically idle.

KARTA BAY MINING CO. **ALASKA.**

Office: care of Hon. H. W. Mellen, Coppermount, Alaska. Organized, 1907, under laws of Washington, with capitalization $12,000.

KOMPAGNIE DU KATANGA. **CONGO FREE STATE.**

Office: 13 Rue Broderode, Brussels, Belgium. Edouard Despret, chairman; Odl. A. Thys, managing director; Major A. Cambier, manager; Victor Van Aelter, secretary. Organized Apr. 15, 1901, under laws of Belgium, as a subsidiary corporation of the Belgium Congo Company, with capitalization of 2,000,000 francs. Lands, 50,000,000 acres, freehold, with sundry preferential mining and railway rights. Mining property is 3 groups, known as the Kipushi, Kasomba and Pala, located on the left bank of the upper Lualaba river, showing auriferous copper ores. Development, in charge of Grey and Bullard, African managers of the Tanganyika Concessions, Ltd., has not yet passed beyond an exploratory stage, but the showing is said to be promising.

KATARSKI MINE. **RUSSIA.**

Office and mines: *care of H. Lorenz, Elizabethopol*, Russia. Produces

1899, was officially reported by the Russian Government as approxima 4,765,000 lbs. fine copper.

KATHARINE ELIZABETH CONSOLIDATED MINING CO. ARIZO

Mine office: Jerome, Yavapai Co., Ariz. Geo. O. Ford, president general manager; L. O. Ford, secretary and treasurer. Organized 1904, u laws of Arizona, with capitalization $1,000,000, shares $1 par. Lands, 4 cla in 2 groups, near Jerome Junction, in the Mineral Point district, opened b 175′ tunnel and several shafts of 25′ to 125′ depth. Out of funds and several years.

KAWADAYAMA MINE. JAP

Mine office: Sanyama-mura, Oe-gori, Awa, Japan. Ore is chalcopy associated with pyrite, averaging 4% copper, in a 2′ to 4′ vein in amphib Production, 1900, was only 14,834 lbs. fine copper. Presumably idle.

KAY MINE SMELTING CO. VIRGIN

Letter returned refused from former office, 1102-79 Fifth Ave., New Y N. Y. Mine office: Omega, Halifax Co., Va. Z. L. Kay, president and g eral manager. J. R. Wilbourne, vice-president; W. R. Wilbourne, secretary treasurer. Organized Aug. 8, 1905, under laws of South Dakota, with ca talization $1,000,000. Lands, 261 acres, freehold, 9 miles from South Bost Virginia. Company's prospectus states that mine is in a slate formati similar to Butte, which will be news in Butte, as the people there imagi the formation to be granite. Company reports 7 veins, up to 42′ in wid with aggregate width of 82′, veins being reported as 3 quarts and 4 copp glance. Any mine with 3 quarts in its overalls seems in line for a glance fr the copper. Company claims an average of 8% copper in its prospectus, a claims 6% in a direct report to the Copper Handbook, and claims to ha secured assays up to 50% copper. Has 2 shallow shafts, depth not report and, by figuring value of ore to depth of 2,500′, the management grave estimates values "in sight" at $20,403,575, which either is sheer ignorance intentional deception, presumably a little of each. Is not regarded favorabl

KEARNS CONSOLIDATED COPPER MINES CO. WYOMIN

Dead. Succeeded Apr. 18, 1904, by Keystone Mining & Development C Formerly at Downington, Carbon Co., Wyo. Described Vol. V.

KEARSARGE MINING CO. MICHIGA

Dead. Absorbed, 1897, by Osceola Consolidated Mining Co. Former at Kearsarge, Houghton Co., Mich.

BERG- UND HÜTTENWERKE KEDABEG. RUSSI

Office: care of Gebrüder Siemens, owners, Berlin, Germany. Mine offic Kedabeg, Elizabethopol, Russia. Works office: Kalakent, Elizabethop Russia.

Property is an old mine, reopened 1864, by present owners, and is variou termed the Kedabeg, Kiadebek and Kedabenski mine. Lands are on the fla of Miodagh or Copper Mountain, 26 miles from and 450′ above Dallar, t nearest railway station on the Baku line. Ore bodies are lenticular, flanked diorite on the east and diabase on the west, latter occurring as dykes cuttin quartz and diabase porphyrite, with considerable tufa. There are 16 know ore bodies, ranging in size from 6′ to 165′ in width, and from 33′ to 820′ length. Lenses do not outcrop, apexing at depths of 120′ to 400′ below su face. The lenses shade gradually into the walls, with very indistinct partin richest ore favoring the hanging-wall, as a rule. The ore is mainly chalcop rite, associated with covellite, sphalerite, pyrite and pyrrhotite, with occasion galena, chalcocite and magnetite, slightly auriferous and argentiferous, w gangue of quartz-porphyry, carrying considerable barium sulphate. The o ranges 3 to 5% in average copper tenor.

Development is almost exclusively by tunnels, and the caving system employed to some extent. The ore, broken by Siemans & Halske electric dri

is assorted on surface into 3 grades, first being smelting ore of 7% tenor, all ores of 5% or upwards being smelted; second grade ore, of 2 to 5% copper tenor, is leached, and third grade ore, carrying less than 2% copper, is sold to the petroleum refineries at Baku, for making sulphuric acid, which is used extensively in the refining of illuminating oils. Wages are low, ranging from 36 to 62 cents daily for miners, and only 26 to 32 per diem for trammers.

There are two smelters, the larger being at the mines and the smaller at Kalakent, 8 miles from Kedabeg and circa 40 miles from Elizabethopol. The works have no roofs, which seems a doubtful economy, as there are occasional explosions in times of rain. Ore reaches the works about 40% in lumps and 60% in fines. Lumps are kiln-roasted, and raggings, of ¼" to ½" size, are roasted in reverberatory furnaces, while ores under ¼" size are roasted in Gerstenhöfer kilns. Smelting is done exclusively in reverberatory furnaces, of which there are 6, circular in form, instead of oval, as formerly, 3 metres in diameter, with a depth of charge of 1 to 1.2 metres. Hearths are laid of quartz, in layers, or crushed quartz worked into a paste with water. The first-fusion product is a matte of 25 to 30% copper tenor, an average matte carrying 28.6% copper, 36.7% iron, 19.7% sulphur, 4.06% zinc, 0.85% nickel and cobalt combined, 0.10% lead, 0.05% arsenic, 0.025% silver and 0.0014% gold, with small quantities of silica, aluminum sesquioxide and barium sulphate. The first-fusion matte is broken into lumps, roasted, and blown up to blister copper of low grade, averaging 88 to 90% copper, 25 oz. silver and 1.2 oz. gold per ton, which is refined at Kalakent, product being a homogeneous copper, largely used for sheets, but less desirable for brass.

Fuel is mainly petroleum, of which circa 20,000 tons are burned annually. This is piped 29 miles, from Dalliar, on the Trans-Caucasian railway, to Kalakent and Kedabeg. Petroleum is used for general steaming purposes, for burning bricks, and for roasting, smelting and refining copper, 2,700 lbs. of crude oil being required to produce 3,600 lbs. fine copper from ore, while weight for weight of petroleum is required to refine precipitate to blister copper. The oil burned has a specific gravity of 0.882, and contains 87.4% carbon, 12.5% hydrogen and 0.1% oxygen, with a heating value of 11,700 calories. In practice it is assumed that 54 parts of petroleum, by weight, are equivalent in heating value to 100 parts of bituminous coal, or 250 parts of wood. Petroleum is sprayed into the reverberatories under high pressure.

The electrolytic refinery, at the Kalakent works, is of about 3,000 lbs. daily capacity, having two 24-kw. generators and 102 tanks, with multiple arrangement of electrodes.

The mine has not held its own as a producer during the new century, old ore bodies having been exhausted more rapidly than new lenses were opened. Production, 1900, was circa 4,500,000 lbs. fine copper, and for 1904 was only 3,966,720 lbs., while the 1907 output is estimated at 2,750,000 lbs.

KUPFERKIESBERGBAU KELCHALPE. **AUSTRIA.**

Mine office: Kelchalpe, Tyrol, Austria. Was a very small producer at last accounts. Presumably idle.

KELLER & INDIANA CONSOLIDATED SMELTING CO. **WASHINGTON.**

Office: Greensburg, Ind. Mine and works office: Keller, Ferry Co., Wash. Robt. L. Boyle, president and general manager; J. S. Badger, vice-president; Wm. J. Hollensbe, secretary and treasurer; M. C. Smith, superintendent; W. J. Himendorf, consulting engineer.

Organized Aug. 7, 1903, under laws of Washington, with capitalization $1,500,000, shares $5 par; issued, $1,100,000. Is closely allied, through stock ownership, with the Silver Creek Mining & Milling Co. Annual meeting, first Saturday of February.

Lands *include the Manila mine, 4 claims, 26 miles from a railroad, appar-*

ently held under a $60,000 bond and lease, on a $500 payment; also a 20-a reservoir and millsite, all well timbered, with a 20,000′ sawmill at the re voir. Lands are in the San Poil district, 7 miles above the Columbia Ri and 23 miles from Wilbur, the nearest railroad station, but surveys have b made for 2 railroads, through Keller. The Manila mine is said to have a of 70′ to 100′ width, traceable circa 1,000′, opened by 2 crosscut tunnels sh ing ore averaging about 4.5% copper and 4 oz. silver per ton.

Power is furnished by a dydro-electric installation, claimed to be capa of developing 1,480 h. p., having a 150-kw. Bullock generator.

The smelter, 5 miles from the mine and connected therewith by wag road, was built by R. L. Boyle & Co., under contract, Mr. Boyle being h the president of the company and the head of the firm contracting therewit which seems a peculiar arrangement. The reduction plant has a small sa pling mill and two 100-ton Allis-Chalmers blast-furnaces, one for lead and o for copper. Various dates for blowing in were given, followed by postpon ments, last date given for blowing in being Nov. 1, 1908, for which purp ore was being accumulated in October.

The company's prospectus states that Mr. Boyle's estimate, "which see to be ultra-conservative, provides for $270,000 yearly profit on the pres smelter," and that provision has been made for another 350-ton furnace, treble the present capacity. These figures indicate that the company is clined to be reckless in its estimates, bu the property is considered not devo of merit.

KELLY SMELTING & REFINING CO. MONTANA & NEW MEXIC

Mine offices: Corbin, Jefferson Co., Mont., and Kelly, Socorro Co., N. M Samuel W. Traylor, president; Louis O. Hedden, vice-president; Edgar W liams, secretary; John W. Dundee, treasurer; preceding officers, Warren C tis, Sr., Marcus L. Hewett and Samuel T. Houser, directors. Organized 19 under laws of Arizona, with capitalization $5,000,000, shares $5 par. La include the Kelly group in Socorro county, New Mexico, and the Alta gro 8 claims, near Corbin, latter carrying ore with fair copper values. Compa is said to plan two 1,000′ shafts, old workings being comparatively shall and is said to plan a 400-ton concentrator for the Alta group.

KELVIN-ARIZONA COPPER CO. ARIZONA

Office and mine: Kelvin, Pinal Co., Ariz. Organized circa 1907, by R. Dickinson, et al.

KELVIN-CALUMET COPPER MINING CO. ARIZONA

Office: 985 Drexel Bldg., Philadelphia, Pa. Mine office: Ray, Pinal C Ariz. W. E. Sharpe, president and general manager; Edwin L. Taylor, vi president; Chas. W. Gouert, secretary and treasurer; O. A. Turner, gen manager; Wm. B. Twitchell, superintendent. Organized circa July, 19 under laws of Delaware, as a merger of the Calumet Copper Mining Co. a Big Lead Mining Co., and also absorbed the Kelvin-Reduction Co.

Lands include a group near the Christmas, and holdings near the R mine, on Mineral Creek, 6 miles from Kelvin, showing limestone and porph contacts with conglomerate capping, carrying carbonates at surface and s phides at depth, former apparently amenable to leaching. The mine h shafts of 80′ and 300′, latter, the Madeline, showing high grade ores and nati copper, oxidized ores being said to average circa 3.5% copper, with s gold and silver values. Shaft is bottomed in sulphide ore.

A 4-stamp mill, on the Big Lead property, is idle. There is a 60-ton c centrator, planned to be increased to 125 tons capacity, which includes 35-ton leaching plant, built and operated on a secret process invented *H. P. McIntosh.* It was claimed that this process would do in minutes w *other processes* require hours to accomplish, but the process seems to ha

aken years to do what mills planned on regular lines do daily. Only car-onate ores have been treated, but sulphides are said to be amenable to the McIntosh process, after roasting. The mill is terraced, all material being handled by gravity, and equipment includes a 125-h. p. engine and air-com-pressor.

Production by the new process was begun September, 1906, and recovery October, 1907, from 1,118 tons of ore treated, was 41,521 lbs. fine copper, or 37.14 lbs. per ton, from ore assaying 68.6 lbs. per ton, which does not speak highly for the McIntosh process. The company claimed to have made copper for less than 7 cents per pound, which is considered poor figuring. Notwith-standing the great claims of the company for the new process, production, 1907, was only 178,516 lbs. fine copper.

KELVIN COPPER MINING CO. **ARIZONA.**

Office: 43-89 State St., Boston, Mass. Mine office: Kelvin, Pinal Co., Ariz. Idle and apparently moribund.

KELVIN REDUCTION CO. **ARIZONA.**

Dead. Lease was sold, circa 1907, to Ray Consolidated Copper Co., and mill sold, 1907, to Kelvin-Calumet Copper Mining Co. Formerly at Kelvin, Pinal Co., Ariz. Fully described Vol. VII.

KELYNACK TIN MINE, LTD. **ENGLAND.**

Office: 7 Great Winchester St., London, E. C., Eng. Mine office: Redruth, Cornwall, Eng. E. W. Gundry, chairman; A. J. Kingston, secretary. Organized Dec. 21, 1906, under laws of Great Britain, with capitalization £50,000, shares £1 par, as Western Tin & Copper Syndicate, Ltd.; name changed July, 1907, to present title. Lands include 7 setts of tin and copper lands, area 923 acres, near Redruth, and the Kelynack tin mine near St. Just, Cornwall. Copper property considered promising.

KEMP-KOMAR COPPER MINING CO. **WASHINGTON.**

Mine office: Loon Lake, Stevens Co., Wash. A. W. Kemp, manager. Has a 200' shaft, showing oxidized ores above and sulphides in lower work-ings, carrying small gold and silver values, in a 12' vein with paystreak of 4 to 5'. Carload shipments have returned 16 to 20% copper. Idle several years.

KEMPLAND COPPER CO. **CALIFORNIA.**

Office: care of H. L. Percy, secretary, Los Angeles, Cal. Mine office Keeler-water, Inyo Co., Cal. J. P. Harvey, general manager. Organized under laws of Arizona, with capitalization $1,250,000, shares $5 par. Lands [illegible], area 440 acres, including 13 claims known as the Brady-Kemp-land group, about 1 mile west of the Furnace Valley Copper Co. Lands show eminent gossan, one of the best in the district, and have a tunnel of [illegible] length. Presumably idle.

KEMPTON MINE. **UTAH.**

Office: care of Col. Enos A. Wall, owner, Salt Lake City, Utah. Mine at Bingham Canyon, Salt Lake Co., Utah. Fred Bemis, superintendent. Lode, in the West Mountain district, carry argentiferous and auriferous copper sulphides, values being mainly in lead. Has a 125-horsepower [illegible], which is antique, inasmuch as practically all the machinery is owned by the owner. The equipment includes a set of Wall corrugated steel mills for middlings, also invented by Col. Wall, 3 sets Wall [illegible] tables for concentration, and 2 Wilfley tables.

KENDRICK & GELDER SMELTING CO. **COLORADO.**

Dead. Succeeded, 1903, by San Juan Smelting & Refining Co. Silverton, San Juan Co., Colo.

KENNEBEC MINING CO. **UTAH.**

Office: care of W. J. Craig, Salt Lake City, Utah.

Salt Lake Co., Utah. S. M. Levy, general manager. Lands, circa 400 ac in the Big Cottonwood district, slightly developed by tunnel, and conside well located. Presumably idle.

KENNETT MINING CO. MONTA

Mine office: Virginia City, Madison Co., Mont. Ores carry gold copper. Has steam power and a 60-ton stampmill. Idle.

KENNICOTT MINES CO. ALASK

Office: 146-45 Broadway, New York, N. Y. Mine office: Valdez, Alas Norman Schultz, president; Stephen Birch, general manager; Geo. E. Baldw superintendent. Organized circa 1907, apparently as successor of Alas Copper & Coal Co., or as a holding company. It is understood that this co pany was formed in order to give the Guggenheim interests a 40% holdi in the property of the Alaska Copper & Coal Co., on account of the constru tion of a railroad. Property is described under title of Alaska Copper Coal Co.

KENTUCKY-ARIZONA CONSOLIDATED MINING, SMELTING & DEVELOPMENT CO. ARIZONA

Dead. Reorganized, 1906, as Kentucky-Arizona Copper Co. Formerly Cave Creek, Maricopa Co., Ariz. Fully described Vol. VI.

KENTUCKY-ARIZONA COPPER CO. ARIZONA

Office: 504 Kentucky Title Bldg., Louisville, Ky. Mine office: Cav Creek, Maricopa Co., Ariz. Wm. Vottler, vice-president; Shirley M. Crawfor secretary; Coleman R. Robinson, treasurer; Jas. D. Marlar, managing director Wm. A. Burr, superintendent. Organized Feb. 28, 1905, under laws of Arizon with capitalization $2,500,000, shares $1 par, as successor of Kentucky-Arizon Consolidated Mining, Smelting & Development Co. Lands, circa 1,200 acre include the Copper Top mine, opened by several shafts and tunnels, with abou 1,000′ of workings, showing numerous small veins of ore of rather low grad Has shipped some ore averaging 17% copper and $3 combined gold and silve values per ton, latter values being mainly in gold.

KENTUCKY GULCH MINING CO. COLORADO

Mine office: Tin Cup, Gunnison Co., Colo. Ores carry gold, silver an copper. Has steam power. Idle.

KEREMOS COPPER MINES, LTD. BRITISH COLUMBIA

Dead. Reorganized, August, 1903, as Keremos-Pontiac Mines, Ltd. Fo merly at Olalla, East Yale district, B. C. Described Vol. IV.

KEREMOS-PONTIAC MINES, LTD. BRITISH COLUMBIA

Office: 32 Broadway, New York, N. Y. Mine office: Olalla, East Ya district, B. C. Dr. A. C. Sinclair, president; G. H. Wheeler, vice-president W. H. Danby, secretary; R. W. Northey, treasurer and superintendent; pr ceding officers and Phil. Allen, Jr., directors. Organized August, 1903, und laws of British Columbia, with capitalization $2,500,000, shares $1 par. Land 16 claims, area 800 acres, in 2 groups, 1 having a ledge of 300′ claimed wid which probably is an overestimate. Another authority states that propert has a 6′ vein with an 18″ paystreak of mispickel carrying 5 to 13% copp Has a 185′ shaft and several short tunnels, with about 1,000′ of working giving ore assaying 2 to 4% copper, 2 to 4 oz. silver and $2 to $5 gold p ton. Was promoted by Wheeler & Co., of New York, who have foisted on t public a number of unsuccessful and dubious promotions. Property consider promising, but company not regarded favorably.

KEREMOS SMELTING & REFINING CO. BRITISH COLUMBI

Dead. Formerly at Olalla, East Yale district, B. C.

KESWICK SMELTER. CALIFORNI

Owned by Mountain Copper Co., Ltd.

AN CONSOLIDATED MINES CO. **ALASKA.**
ind mine: Ketchikan, Alaska. Jas. A. Davis, president. Organ- under laws of Maine, with capitalization $5,000,000. Lands, 36 Revillagigedo Island.

N COPPER CO. **ALASKA.**
Formerly at Ketchikan, Alaska. Described Vol. VII.

W ASSOCIATION. **MICHIGAN.**
33-87 Milk St., Boston, Mass. Local office: Marquette, Mich. gyear, agent. Is a land corporation, owning large tracts of lands, er Peninsula of Michigan, that are partly on the Keweenawan

W COPPER CO. **MICHIGAN.**
Had no connection with present day Keweenaw Copper Co. Organized d charter to expire 1893; wound up, 1899, and lands sold to W. K. nsing, Mich., and by him transferred, 1905, to present Keweenaw Old company owned Section 13 and East ½ Section 24, Town 58 e 28 West. Raised and expended circa $100,000. Formerly at ine, Keweenaw Co., Mich.

W COPPER CO. **MICHIGAN.**
42 Broadway, New York, N. Y. Operating office: Hancock, Mich. Mandan, Keweenaw Co., Mich. Chas. A. Wright, president and pencer R. Hill, vice-president; Capt. Thos. Hoatson, second vice- d mining director; preceding officers, Thos. F. Cole and Capt. , directors; Chas. A. Wright, Jr., secretary; Arthur H. Sawyer, tendent; Howard G. Wright, mill superintendent; John C. Shields, erintendent; Jas. T. Bryant, mining captain; W. W. Stockley,

d March 13, 1906, under laws of Michigan, with capitalization shares $25 par; issued, $5,000,000, paid in, $13. Controls, through hip, the Keweenaw Central R. R. Co., Phœnix Consolidated Cop- Washington Copper Mining Co. Adams Trust Co., Boston, regis- rust Co., Boston, transfer agent. Has circa 2,300 shareholders. ing, second Tuesday in February.

r's capitalization was purposely made much larger than immediate ments, to provide for future growth, the plans of the corporation r the absorption of large tracts of mineral lands, railroad con- ction of mills and smelters, and other work. A very considerable urchase price of lands acquired was paid in shares. In 1907 the chased a majority of the outstanding stock of the Washington g Co., and is supposed to have an option, from Dr. Léon Estivant, mine, which is separately described. Company ended 1907 with and $20,671 accounts receivable, with accounts payable of $10,87 iginally were 12,855 acres, including 11,550 acres of mining lo- rious other tracts have been added, 1,021 acres having 1907, giving total holdings, at end of 1908, of circa 17,000 al lands, carrying considerable timber. The tracts are lo- ring the strike of the Keweenawan mineral belt for ng practically all of the amygdaloidal and conglomerate the district, as well as numerous copper-bearing Town 58 North of Ranges 27, 28 and 29 West, ly named by the Mass, Copper Harbor, Eagle aw, Mandan, Mohawk, Pennsylvania & Boston es, in addition to lands controlled through operations. In addition to strictly mineral ranty deeds of mine carrying extensive

available harbors, and undeveloped water-powers of great prospective value.

The company's lands include nearly 2 miles of water frontage on either side of the Montreal river, including Fish Cove, one mile east of the river's mouth, which might be made a fair harbor at comparatively small expense. This frontage will be available for mills, and as the site of a power plant and railroad terminal. Lands also include 5 miles of the course of the river, on both banks, and, with other holdings, give the company the entire water-frontage of Mosquito Lake, which the company has rechristened Lake Medora. It would be possible to use Mosquito Lake for a storage reservoir, by throwing a dam across its outlet, and developing a great water power, with a power installation at the mouth of the river.

The company also owns the Lac La Belle, or Mendota, ship canal, one mile in length, connecting Lac La Belle with Lake Superior. This canal has a 14′ channel, which should be deepened by the federal government, as it leads to a splendid haven, which should be made a harbor of refuge.

The company owns a diamond drill outfit, and has made extensive borings, including about 20 drill-holes giving a cross section of the Resolute, Mandan, Medora and Empire tracts.

Most of the old properties secured by the company were prospects only, but the Ætna has a recorded production of 140,881 lbs. fine copper, secured 1863-1873, and the Resolute mine has a 379′ shaft, with circa 2,000′ of workings.

The Medora mine, opened about 1860, has 3 old shafts, about 100′ apart, deepest 140′, and has been reopened on an extensive scale. The Medora bed traverses the Keweenaw lands for about 4 miles, outcropping several hundred feet north of the Montreal River lode. The Medora bed, averaging about 12′ in width, is a soft chocolate-colored amygdaloid, carrying considerable prehnite, calcite and quartz, in connection with fine stamp-copper and occasional heavy copper, a 30″ streak along the footwall carrying some barrel work. The lode, as a whole, is bunchy.

No. 1 shaft is 7x18′, inside measurement, with 2 hoisting compartments, each 7x6′4″, and a 7x2′8″ compartment for ladderway and pipes. The shaft is sunk partly in the bed, and partly in the trap footwall, at an angle of 23°, and the skipway is laid with 40-lb rails. Levels are opened at 150′ intervals, with sub-levels, these being required to facilitate the moving of rock, owing to the flat pitch. The shaft was 1,160′ deep, September, 1908, with 13 levels, and about 2 miles of workings. It is planned to sink the shaft 1,000′ deeper.

A site for No. 2 Medora shaft was selected, 1907, at a point 1,900′ west of No. 1, which location was changed to a point circa 1,200′ west of No. 1, when No. 2 shaft was started, July, 1908.

In addition to the Medora amygdaloid the property carries other cupriferous beds, among these being the Medora fissure vein, which outcrops circa 225′ east of No. 1 shaft, but makes into the shaft with depth. About 100′ south of the Medora is another amygdaloidal bed, carrying copper in small quantities, and to the northward is the Wolverine amygdaloid and Allouez conglomerate. The latter was reached, 1908, by a 230′ north crosscut from No. 1 shaft, the conglomerate lying about 280′ north of the Medora, with drifting in progress, September, 1908, on an amygdaloid, presumably the Wolverine bed, of about 15′ width, from which it is expected to make a mill-test.

Equipment at No. 1 shaft includes a shaft-rockhouse with Blake crusher and Lake Shore engine. There is a 24x30′ engine-house, with a 14x18″ Lidgerwood reversible link-motion hoist, good for 1,000′ depth, also 10-drill and 18-drill Ingersoll-Sergeant straight-line compound air-compressors, and a 24x48′ boiler-house.

Buildings at the Medora include a 22x28′ machine-shop, 20x30′ smithy, *24x30′ office*, 26x42′ changing-house and about 20 dwellings. Water is supplied

a 4" pipe-line, leading from Mosquito Lake to a tank at the mine. ne and location have a telephone system.

Empire mine also carries the Medora bed, circa 3 miles east of No. , and some trenching and test-pitting, done 1906-1907, on the Empire owed a bed of about 15' width, carrying some copper at surface. The also carries the Montreal River lode, on which the Manitou has done able work.

Keweenaw Copper Co. secured control of the old Lac La Belle & railroad, which was reorganized as the Keweenaw Central R. R. Co. ire stock issue of the Keweenaw Central, $350,000, is owned by the w Copper Co. The old Lac La Belle line, only 8 miles in length, ilt, and the road was extended southwest to Calumet. The line has miles of spurs and branches, and cost about $800,000. The line ends h of Centennial, a suburb of Calumet, where connection is had with er Range railroad. Equipment includes 4 locomotives, 7 passenger 82 freight cars, rock-cars being of 25 tons capacity each. Railroad 1907, was $31,806, with net earnings of $3,326.

is stamped at the mill of the Phœnix Consolidated Copper Co., separatly described, under the title of the owner. A branch of the w Central has been built to the mill.

uction was begun July 28, 1908, on the basis of 225 tons daily, about he rock being sent from the stockpile, and half from the underground , apparently little or no selection being attempted. The company no official statement as to returns secured, and estimates vary from 16 lbs. of mineral per ton. Apparently a fair estimate of returns 11 lbs. fine copper per ton, as the mineral is dressed to an unusually allic percentage. In September, 1908, production was cut to about daily, working the mill on day shift only. The Medora operates 12 ills, and the company employs about 100 men.

rently the Keweenaw Copper Co. has not yet obtained an assured the Medora, though the prospects of the property seem fair, given levelopment. The management is strong and experienced, and the owns an immense acreage of mineral lands, on which it scarcely can oned that paying mines will be developed, in time.

Y COPPER CO. **BRITISH COLUMBIA.**

: care of Capt. Andrew Wasson, president and general manager, to, Cal. Mine office: Mt. Sicker, Vancouver Island, B. C. F. W. superintendent. Property adjoins the Tyee and Lenora, and is tunnel. Has steam power. Idle.

NE COPPER CO. **ARIZONA.**

: Bank of Commerce Bldg., St. Louis, Mo. Mine office: Globe, Ariz. G. S. Maddox, president; A. A. Aal, vice-president; Geo. A. ecretary; J. R. Finletter, general manager; preceding officers, L. B. , J. N. Porter, J. J. Keehan, F. S. Sullenberger, L. L. Henry, H. P. , H. H. Harvey and S. A. Arkills, directors.

, 12 claims, 8 miles west of Globe, lying next east of the Live Oak the Inspiration and Miami mines. Property shows granite and phyry, with occasional schists. East of the main workings there are posits of chrysocolla, said to assay 3 to 7% copper, and a conglome- f 4' to 12' thickness, said to be impregnated with copper to the ex to 6%, from which values apparently could be recovered by leaching eveloped, is mainly chrysocolla, with disseminated carbonates and sulphides, latter including chalcocite of 40 to 60% copper con- *ore body is a 12" vein carrying a 17" paystreak said to average*

22% copper and 2 to 5 oz. silver per ton, balance of vein carrying ore a to 5% copper tenor, which has been left standing, for extraction later.

Development is by 3 tunnels, with about one-half mile of workings, a it is planned to sink a 3-compartment 500′ shaft, for large production. No. tunnel, of 570′ length, shows chrysocolla and carbonate ores of 4 to 24% tea and No. 3 tunnel, circa 600′ long, also shows good ore.

A 25-ton experimental plant was built in 1905. The system used is modification of the Hoepfner sulphide process, and is designed for leachi chrysocolla, as well as carbonate ores, and can include sulphide ores aft roasting. Ore is reduced to fines, pulped, and leached for three hours in slowly revolving chlorination barrel. The leaching solution is cupric chlorid which is changed to cuprous chloride by the absorption of one atom of copp The enriched solution goes to precipitation tanks, where the extra molecu of copper is precipitated upon large copper sheets, and the solution, thus r generated to cupric chloride, is returned to the storage tank, for further us

Some grading was done, 1906, for a 100-ton roasting furnace, to enab the mine to treat sulphide ore, but the furnace was not built.

The Keystone has been a shipper for 10 years, and production, 1899-190 was 1,067 tons of ore, netting $37,276.98. Ores smelted gave returns of 22 27% copper, in addition to lower grade silicious ores of 3 to 5% copper tena sent to the Old Dominion smelter for converter linings.

The company came to grief in 1907, and control of the property has be shifted several times. The Old Dominion Mining & Smelting Co. plann taking over the property, 1908, under foreclosure proceedings based on $65,000 mortgage, but the stockholders voted, May, 1908, to accept the off of Nathan L. Amster to pay the $65,000 mortgage and expend $50,000 on d velopment and afterwards reorganize the company. Although this agre ment was ratified it was not carried out, and the Amster option was tra ferred, apparently without Amster's sanction, to J. B. Newman, who paid t $65,000 judgment and agreed to expend $4,000 monthly on development, wi the proviso that he may acquire title by paying $400,000 to the company.

Production, 1907, was 208,801 lbs. fine copper. Property is considered cidedly promising.

KEYSTONE COPPER & GOLD MINING CO. **ARIZON**

Office: 502 Park Bldg., Pittsburg, Pa. Letter returned unclaimed fr former mine office, Wickenburg, Maricopa Co., Ariz. C. B. McLean, pr dent; W. J. Strassburger, secretary and general manager; W. W. Wils treasurer. Organized 1900, under laws of Arizona, with capitalizat $1,250,000, shares $10 par. Lands, 24 claims, in the Blue Tank and Black Bo districts, showing sulphide ore bodies. Idle for several years and apparen moribund.

KEYSTONE COPPER MINING CO. **NEW MEXI**

Office: Bloomsburg, Pa. Mine office: Tres Piedras, Taos Co., N. Lands, 18 claims, known as the Payroll mine, in the Bromide district, ope to depth of about 250′ and showing a vein of sulphide ore said to be 20′ w and to assay 6 to 12% copper, with fair gold values. Has steam power a 50-ton concentrator. Idle several years and apparently moribund.

KEYSTONE COPPER SMELTER CO. **MEXI**

Office: 330 Drexel Bldg., Philadelphia, Pa. General Mexican off Apartado 22, Guadalajara, Mexico. Mine office: Tapalpa, Sayula, Jali Mex. Robert P. Molten, president; Edward E. Cattel, vice-president chairman of executive committee; Aubrey F. Lee, secretary; Daniel Lam *Jr., treasurer;* Theo. Breidenbach, general manager. Organized under *of New Jersey,* with capitalization $300,000, increased, July 6, 1905, to $50

shares $1 par. Has authorized an issue of $100,000 certificates of indebtedness, at 6% interest, redeemable Dec. 10, 1908.

Lands, circa 100 hectares, in 5 groups including the Mexicana, America and Palma groups, also timber rights to circa 50,000 acres of adjoining lands. Principal development is on La Mexicana group, area 82 hectares, 15 miles west of Tapalpa, mine being developed by a 200-metre crosscut tunnel, cutting 4 veins, with about one mile of workings. Veins are fissures in porphyry, averaging 5' width, and carrying auriferous and argentiferous chalcopyrite, sphalerite and pyrite.

Equipment includes steam and electric power. There is a 30-ton mill, having 2 crushers, 2 rolls and 3 concentrating tables. A small smelter, built circa 1902, had a 75-ton reverberatory furnace, making matte of 30 to 48% copper tenor, when operated, which was for a short time only, and the smelter was abandoned several years ago. It was planned to add a cyanide plant for treatment of gold ores, but apparently this was not done. Early 1908 company bought the Etzatlán smelter, of 30 tons daily capacity, and is said to plan removing same to Talpalpa. The reduction plant was remodeled and put in operation early 1908. The company is said to employ about 100 men.

KEYSTONE-MERRITT COPPER CO. **ARIZONA.**

Letter returned unclaimed from former mine office, Clifton, Graham Co., Ariz. Was to have been absorbed, 1907, by Copper Co. of Arizona, since succeeded by Coppermines Co. of Arizona. Idle and apparently moribund.

KEYSTONE MINING & DEVELOPMENT CO. **COLORADO & WYOMING.**

Office: 839 Equitable Bldg., Denver, Colo. Mine offices: Downington, Carbon Co., Wyo., and Boulder, Boulder Co., Colo. Dr. E. T. Ettinger, president and general manager; Wm. R. Klein, secretary; G. C. Aschbach, treasurer. Organized Apr. 18, 1904, under laws of Wyoming, with capitalization $2,000,000, shares $1 par, as successor of Kearns Consolidated Copper Mines Co. Has lands in Colorado and Wyoming. Former, carrying gold only, include the Smoky Hill mine, area 20 acres; Dirigo mine, area 60 acres, patented, and the Norumbega mine, area 40 acres, all in Boulder county. Principal development seems to be on the Colorado gold properties. The Wyoming lands, area 206 acres, are on Beaver Creek, circa 12 miles south of Encampment, including the Kearns mine, opened by a 600' tunnel, and the 160-acre Downington townsite. Idle.

KEY TO SUCCESS COPPER MINING, SMELTING & EXPLORATION CO., LTD. **UTAH.**

Office: 213 Providence Bldg., Duluth, Minn. Letter returned unclaimed from former mine office, Frisco, Beaver Co., Utah. A. R. Merritt, president; C. E. Mylen, vice-president; Geo. F. Davis, secretary; J. S. Lane, treasurer; traveling officers, H. Brown and John L. McGilvery, directors. Organized 1902, under laws of South Dakota, with capitalization $1,500,000, shares $1 par. Lands, 12 claims, area 240 acres, also a 40-acre millsite, in the Beaver Lake district, opened by shafts of 25', 75' and 105', showing ore carrying 3 to 5% copper, with gold and silver values. Idle, and August, 1908, planned reorganization.

KEY WEST MINING CO. **NEVADA.**

Mine office: Bunkerville, Lincoln Co., Nev. Ores said to carry copper, nickel and platinum. Idle.

KHAYYAM COPPER CO. **ALASKA.**

Dead. Merged, circa 1904, in Omar Mining Co. Formerly at Kiam, Alaska.

KIADEBEK MINE. **RUSSIA.**

Owned by Berg- und Hüttenwerke Kedabeg.

KILLINGDAL KOBBERVAERK. NOR

Owned by Bede Metal & Chemical Co.

KIMBALL CREEK MINING CO. WASHING

Dead. Formerly at Berlin, King Co., Wash.

KIMBERLEY SYNDICATE. WESTERN AUSTRA

Office: Adelaide, South Australia. Mine office: Derby, Western tralia. Lands adjoin the Derby Copper Syndicate, of which the Kimberle a twin. Has surface ore of high grade with country rocks of slate and sc Made a small shipment of 20% ore to smelter at Moonta, South Austra late 1906.

KIN-E-CHY MINING & MILLING CO. ARIZON

Office: 1112 Majestic Bldg., Detroit, Mich. Mine office: Willcox, Cochi Co., Ariz. J. Geo. Zink, president; Dr. W. E. Burtless, vice-president; Fred Obenauer, secretary and treasurer; Gust. Becker, manager; preceding office and Herman Knorr, directors. Organized 1903, under laws of Arizona, wi capitalization $1,000,000, shares $1 par.

Lands, 33 claims, area 660 acres, in 5 groups, in the Aravaipa distri showing several fair sized veins carrying variable values in copper, lead, s ver and gold. The copper group, of 14 claims, has a 72′ shaft and a 15 tunnel. The gold group, of 6 claims, is said to show a considerable body low grade gold ore. Equipment includes steam power and a small stamp-mi built 1903. Idle, unable to pay its bills and apparently moribund.

KING COPPER MINING CO. OF NEVADA. NEVAD

Office: 431-53 State St., Boston, Mass. Letter returned unclaimed from f mer mine office, Lovelock, Humboldt Co., Nev. Property was the Anderson min carrying auriferous and argentiferous copper ores, slightly developed. La idle and apparently moribund.

KING DAVID MINING CO. UTA

Office: Salt Lake City, Utah. Mine office: Frisco, Beaver Co., Ut David Evans, manager. Organized circa August, 1908, and said to have beg business with $50,000 in the treasury. Lands are circa 70 claims, near t Horn Silver mine. Company plans a 2-compartment 1,000′ shaft, on the s posed extension of the Horn Silver vein, and is said to have ordered a ho good for 1,500′ depth. Has a 5-mile pipe-line for water, and begun wo vigorously, with a force of about 60 men.

KING DEVELOPMENT CO. ARIZON

Dead. Merged, circa 1904, in Consolidated King Development & Colu bia Copper Mining Co. Formerly at Jerome, Yavapai Co., Ariz.

KING EDWARD MINES, LTD. BRITISH COLUMBI

Office and mine: Fairview, Boundary district, B. C. R. H. Parkins president; H. Jones, vice-president; D. Braithwaite, secretary and treasur preceding officers, D. A. Carmichael and W. A. Hainig, directors. Organiz January, 1904, under laws of British Columbia, with capitalization $500,0 shares $1 par. Lands, 10 claims, area 500 acres, in the Similkameen divis of the Osoyoos district, opened by 350′ of workings, show a sulphide ore b of 6′ to 10′ width, estimated to average 5% copper and about $1.50 per ton combined gold and silver values.

KING EDWARD MINING CO. ONTAR

Dead. Lost lands. Formerly at Thessalon, Algoma Ont. Fully descri Vol. VII.

KING GOLD & COPPER MINING CO. WASHINGTO

Office: Davenport, Wash. Mine office: Springdale, Stevens Co., *J. B. Tuttle*, Sr., president and general manager; J. T. McAviney, vic *dent; J. B.* Tuttle, Jr., secretary and treasurer; preceding officers, A. M.

bell and G. B. M. Seager, directors. Organized June, 1900, under laws of Washington, with capitalization $2,000,000, shares $1 par.

Lands, 9 miles west of Springdale, known as the Edna-Gladiator group, carry a contact vein between diorite and quartz, opened by a 370' shaft, showing low-grade melaconite and chalcocite, with silicious gangue. Equipment includes a 350-h. p. boiler, 10x11" friction hoist, 8-drill air-compressor, power drills, steam pumps, electric light plant and various engine-houses, shaft-houses, bunk-houses and ore-bins.

Suit brought by dissatisfied shareholders, alleging mismanagement, was dismissed September, 1905, the court holding that allegations were not proven. Not regarded favorably. Presumably idle.

Dead. Was a twin of the Isabel Copper Mining Co. Lands were sold, 1902, to Rambler Mining & Smelting Co. Formerly at Riverside, Carbon Co., Wyo. Described Vol. VI.

KING MINING CO., LTD. BRITISH COLUMBIA.

Dead. Reorganized, circa 1903, as Denoro Mines, Ltd. Formerly at Slocan, Slocan district, B. C.

KING PHILIP COPPER CO. MICHIGAN.

Office: 701-199 Washington St., Boston, Mass. Operating office [illegible], Mich. Mine office: Winona, Houghton Co., Mich. Chas. J. [illegible], president; Geo. P. Gardner, vice-president; preceding officers, Walter [illegible], Rufus R. Goodell, Nathaniel H. Stone and Nathaniel Thayer [illegible]; Edward B. O'Connor, secretary and treasurer; Dr. L. L. Hulbert [illegible]; Alex R. Seeber, superintendent; Frank G. Lukey, clerk.

Organized Nov. 13, 1905, under laws of Michigan, with [illegible] $2,500,000, fully issued; $7 paid in. Is controlled, through [illegible] shares, by St. Mary's Mineral Land Co. City Trust Co. [illegible]. A $1 assessment was levied circa August, 1908. Company has $20,167 cash and accounts receivable, and $16,545 accounts [illegible].

Lands, 1,040 acres, in Houghton and Ontonagon counties, Mich., in tract lying about one mile south of the Winona mine [illegible] parcels of 5 acres with the Winona Copper Co. to [illegible] permitting each to work to better advantage in shafts [illegible]. The lands have been quite thoroughly probed by diamond drills [illegible].

The Winona lode averages about 20' in width [illegible] lands, and shafts are sunk in the footwall, which [illegible] mine is to be connected, eventually, with the [illegible] on the same planes. Ten power drills are working [illegible] ground. Frames for drifts are built of heavy [illegible] covered with light lagging, after which waste [illegible] and above the lagging, leaving drifts with [illegible].

The first shaft was started 1,500' from [illegible] but struck quicksand at 32' depth, hence [illegible]. A new shaft started 75' distant, latter being [illegible] started vertically, of *size 14x25', and* [illegible] *30', after which the shaft is deflected* [illegible].

[illegible]AY.

De-

[illegible]USTRIA.

[illegible] idle.

[illegible]NSVAAL.

[illegible]. Simpson, [illegible]. under laws [illegible]ued, £45,157, for £500 cash [illegible].

the dip of the bed, though about 85′ in the footwall. No. 1 was bott August, 1908, at the tenth level, and crosscuts have been driven to the Wi bed on the fifth to ninth levels, inclusive, showing fair ground.

No. 2 shaft, circa 2,800′ southwest of No. 1, is on the south side of S ing River, and was 360′ deep August, 1908, with a crosscut on the fourth to the Winona bed, which gave about the same showing as in No. 1.

Equipment includes a 12x20″ hoist with 5′ drum, good for 1,200′ de and a powerful electric hoist. The King Philip will take electric power f the Winona, and in return will furnish compressed air. The 28x40′ po house contains a battery of two 200-h. p. Parker tubular boilers, 6-drill 15-drill air-compressors and a powerful Nordberg triple expansion 3-stage compressor. Coal is drawn to the boiler-house through a concrete tun under a coal-trestle surmounted by a railroad track.

Buildings include a 34x40′ power-house, 15x24′ smithy, 26x36′ warehou 24x62′ bunk-house, 20x50′ cook-house, 16x30′ change-house, 24x36′ office a about a dozen other structures.

Little attention has been paid to the character of copper-bearing b efforts being centered on sinking and equipping the shafts, hence little can said as to the company's prospects, but it is to be presumed that the co pany, which has an excellent and experienced management, possesses accura data upon which to predicate its extensive development.

KING & QUEEN COPPER CO. **NEW MEXIC**

Mine office: Steins, Grant Co., N. M. Lands, sundry claims near t King Kendall and Johnny Bull mines. At last accounts contemplated devel ment.

KING & QUEEN MINING CO. **MONTAN**

Office: 1007 Bessemer Bldg., Pittsburg, Pa. Mine office: Superior, M soula Co., Mont. Nelson Weddle, Jr., president; Chas. J. Rieger, vice-pr dent; J. F. Hinckley, secretary; H. A. Spangler, treasurer; preceding offic B. H. Howard, J. L. Armstrong, R. W. Judkins and Dr. G. T. McCullo directors; T. E. Wood, superintendent. Organized Feb. 22, 1905, under l of Montana, with capitalization $1,000,000, shares $1 par, practically as a construction of the Montana Mining & Development Co.

Lands, 15 claims, partly patented, area 188 acres, and a 20-acre mill well timbered, 3½ miles from the Northern Pacific railway, in the Spr Gulch district, showing limestone, quartzite and shale, with 5 contact depo between quartzite and limestone, of which one, under development, of 8′ mated average width, formerly was reported as giving average assays of 6. copper, 16% lead, and 16 oz. silver per ton, from malachite, chalcocite chalcopyrite, and is now said to average about 4.5% copper and 12 oz. si per ton, with gold values ranging up to 8 oz. per ton. Development is b 1,200′ tunnel and a 600′ shaft, mine having about 3,000′ of workings, show considerable ore.

Equipment includes an 80-h. p. boiler, 25-h. p. hoist, 6-drill duplex compressor, a sawmill of 6,000 feet daily capacity, and several small b ings. Property was a small producer, for about 10 years, before bought present owners. Was idle September, 1908, but planned early resumption.

KING SOLOMON MINES. **BRITISH COLUMB**

Office: care of J. S. H. Matson, Victoria, B. C. Mine office: Cowic Vancouver Island, B. C. Wm. Lewis, superintendent. Organized 190 capitalization $15,000, shares $1,500 par. Lands, 4 miles from the Esquim & Nanaimo Railroad, on Copper Mountain, in the Helmken district, inc *the King Solomon* and Queen of Sheba claims. Has made several 40 and 50 *shipments to Tyee* smelter that returned 8 to 9% copper.

KING SOLOMON MINING CO. **BRITISH COLUMBIA.**

Office: care of D. C. Corbin, owner, Spokane, Wash. Letter returned unclaimed from former mine office, Greenwood, Boundary district, B. C. Lands, near the Montreal & Boston claims of the Dominion Copper Co., Ltd., produced, 1902, circa 700 tons of ore. Idle some years.

KING SOLOMON'S COPPER MINES. **TRANSVAAL.**

Mine office: Zeerust, Transvaal.

KING SOLOMON TUNNEL & DEVELOPMENT CO. **COLORADO.**

Office: care of Samuel H. Alexander, secretary, Madison, Wis. Mine office: Frisco, Summit Co., Colo. F. C. Dinsmore, president; W. W. Theobald, treasurer. Jas. H. Myers, superintendent. Organized under laws of South Dakota, with capitalization $2,500,000, shares $1 par, as successor of King Solomon Tunnel Mining Co. Lands, 50 lode claims and sundry placer claims. Has an air-compressor.

KING SOLOMON TUNNEL MINING CO. **COLORADO.**

Dead. Reorganized as King Solomon Tunnel & Development Co. Formerly at Frisco, Summit Co., Colo.

KINGSTON GOLD & COPPER MINING CO. **BRITISH COLUMBIA.**

Mine office: Hedley, Boundary district, B. C. Lands, 4 claims, 1 fractional, showing slightly auriferous and argentiferous chalcopyrite and galena, partially developed by open-cuts and several short tunnels.

KING WILLIAM MINING CO. **UTAH.**

Office: Salt Lake City, Utah. Mine office: Eureka, Juab Co., Utah. Jas. H. Blanchard, president; J. H. Rouse, vice-president; A. C. Ellis, Jr., secretary; L. H. Farnsworth, treasurer. Organized under laws of Nevada, with capitalization $1,250,000, shares $1.25 par. Lands are near the Eagle & Bell, and it is planned developing the King William from the workings on that property.

KIRK LEASING CO. **UTAH.**

Mine office: Bingham Canyon, Salt Lake Co., Utah. Morris P. Kirk, general manager. Organized circa October, 1908, to operate property leased from Boston Consolidated Mining Co.

KISHORN MINE. **SCOTLAND.**

Office and mine: care Mrs. M. M. H. Stewart, Kishorn, Loch Carron, Ross-shire, Scotland. Mine was worked about the close of the Eighteenth or beginning of the Nineteenth Century, but since idle, except for development in 1901, with circa 80 men, for a short time in 1904.

KITTANNING COPPER MINING CO. **WASHINGTON.**

Dead. Formerly at Index, Snohomish Co., Wash.

KITTICOOLA GOLD-COPPER MINE, LTD. **SOUTH AUSTRALIA.**

Dead. Lands sold, 1906, to Port Lincoln Copper Co., Ltd. Formerly at Fly Creek, Robe Co., South Australia. Described Vol. VI.

KLOVERWALTUNG KLAUSEN. **AUSTRIA.**

Mine office: Klausen Pfunderberg, Tyrol, Austria. Presumably idle.

KLEIN LETABA COPPER MINES, LTD. **TRANSVAAL.**

Office: 70 Queen Victoria St., London, E. C., Eng. Robt. [illegible] man; Victor Thomasset, secretary. Organized March 4, 1907, [illegible] Great Britain, with capitalization £60,000, shares £1 par; [illegible] 444 copper claims, in the Klein Letaba district, bought for [illegible] £40,000 in shares.

GEWERKSCHAFT KLINGENTHAL-GRASLITZER KUPFERBERGBAU. GERM

Mine office: Klingenthal, Saxony, Germany. Erhart August Sc manager. Has a 100-metre main shaft, developing chalcopyrite, empl about 100 men.

KLIPKOP (NAMAQUALAND) COPPER SYNDICATE, LTD. CAPE COLO

Dead. Voluntarily liquidated, 1904. Formerly at O'okiep, Little Na qualand, Cape Colony.

KNAPP MINING CO. COLORA

Mine office: Pearl, Larimer Co., Colo. Is controlled, through st ownership, by National Mining & Milling Co. Lands, 9 claims, area 80 ac known as the Big Horn group, carrying 2 fissure veins in gneiss and dior opened by shafts of 65′ and 85′, showing chalcopyrite and occasional bor Has a 25-h. p. steam hoist. Idle.

KNICKERBOCKER DEVELOPMENT CO. MONTAN

Dead. Formerly at Helena, Lewis & Clark Co., Mont. Described Vol. V

KNICKERBOCKER MINING CO. MONTAN

Mine office: Butte, Silver Bow Co., Mont. Organized 1906, with capit zation $5,000,000, shares $5 par, to take over the Jennie Dell and adjoin claims.

KNIGHT COPPER CO. ARIZO

Mine office: Humboldt, Yavapai Co., Ariz. W. H. Knight, president general manager; W. F. Whitney, vice-president; J. E. Russell, secretary; F Moore, treasurer. Organized 1907, under laws of Arizona, with capitaliza $1,500,000. Lands, 5 claims, area 100 acres, about a mile south of the H boldt smelter, having a 25′ shaft and a 175′ tunnel, said to show 2 ledges, 15′ to 75′ width, carrying ore average about 4% copper, with high grade p streaks.

KNIGHT INVESTMENT CO. UT

Office: Knight Blk., Provo, Utah. Jesse Knight, president; Amanda Knight, vice-president; R. Eugene Allen, secretary and treasurer; preced officers, Raymond Knight, W. Lester Mangum, J. William Knight and I Knight, directors. This company controls a large number of properties, considerable promise, in the Tintic district of Juab county, Utah.

KNIGHT'S ISLAND-ALASKA COPPER CO. ALAS

Office: 902 Lowman St., Seattle, Wash. Mine office: Valdez, Prince liam Sound, Alaska. Jas. J. Godfrey, secretary; William Egan, superintend Lands, 17 claims, on Dryer Bay, Knight's Island, in the Prince William So district, having a 280′ tunnel showing a vein up to 25′ in width.

KNIGHT'S ISLAND CONSOLIDATED COPPER CO. ALAS

Office: 1115 Stock Exchange, Chicago, Ills. Mine office: Valdez, Ala H. Curtis Elliott, president; H. P. Elliott, first vice-president; Chas. G. H bard, second vice-president and general manager; A. J. Elliott, secretary E. Slocum, treasurer. Organized Sept. 12, 1906, under laws of Washing with capitalization $1,000,000, shares $1 par. Is controlled, through ow ship of $505,480 in stock, by Hubbard-Elliott Copper Mines Development Lands, 60 claims, area 1,200 acres, in 5 groups, having a 128′ tunnel sho chalcopyrite, associated with pyrite and pyrrhotite, giving assays of 6 to copper. Has electric power, wharf, ore-bunkers and a sawmill with capacity of 20,000′, board measure. Mine and wharf are connected by a 3 Riblet aerial tram, of 600 tons daily capacity.

***KNIGHT'S ISLAND* COPPER CO.** ALA

Mine office: Valdez, Alaska. J. C. Dieringer, secretary; Wm. Page,

st. Capitalization, presumably $1,500,000. Lands, on Dryer Bay, 's Island, near tidewater, show a promising gossan carrying copper Mine has 3 tunnels, showing ore estimated to average 21.32% copper, too high. Made a trial shipment, July, 1907, but a tram-line is neces- regular production.

'S ISLAND MINING & DEVELOPMENT CO. **ALASKA.**

e: 1267 Lexington Ave., New York, N. Y. Mine office: Valdez, W. C. Rothkranz, president and general manager; Jesse Miller, vice and secretary; Robert Kutschinski, superintendent. Lands, 28 claims, Bay, said to show several veins of 12′ average width, carrying 12% ite, which probably is an overestimate. Has a small power plant and

Dead. Formerly at Dumont, Clear Creek Co., Colo. Fully described

LA COBRIZA MINING CO. M

Mine office: Noria, Altar, Sonora, Mex. Employs 50 men. Emery, president and general manager; W. T. Stewart, vice-presiden Sharpe, secretary and treasurer; preceding officers and Geo. Miller, d C. W. Tonkin, superintendent. Organized June 5, 1905, under laws of with capitalization $250,000, shares $1 par, and is protocolized in Me

Lands, 51 pertenencias, reported as of 230 acres area, with misc holdings in the Altar and Magdalena districts, showing contact dep tween limestone, quartzite and granite, of nearly vertical dip, one under development, reported as 80′ wide and traceable 1,500′, carry bonates to depth of about 100′, succeeded by chalcopyrite estimated age 6 to 8% copper, 4 to 6 oz. silver and $1.50 to $3 gold per ton. opened by shafts of 150′ to 500′, with circa 2,500′ of workings. Has a steam plant, with an 8x10″ hoist and 6-drill Sullivan air-compressor. eral small mine buildings, store, office and about 15 dwellings.

One carload of ore, shipped to El Paso smelter, returned 13% cop silver and $1.50 gold per ton. Company plans installing a 100-ton M sulphide smelting furnace.

LA CORONA COPPER MINING CO., LTD.

Office: Clock House, Arundel St., Strand, London, W. C., En office: Fuencaliente, Cuidad Real, Spain. Edw. E. Fernandez, c Harold Cossins, secretary; John W. Richmond Lee, consulting engine E. Marshall Hall, engineer; G. T. Vivian, mine manager. Organized 1905, under laws of Great Britain, with capitalization £20,000, share in 4,000 ordinary and 16,000 deferred shares; issued, £16,500. L hectares, including 3 mines, known as Corona I, Corona II and Lo Presumably idle.

LADD METALS CO.

Office: Canterbury Bldg., Portland, Ore. Mine offices: Minera ington Co., Idaho, and Landore, Washington Co., Idaho. Chas. E. La dent; Samuel Peacock, vice-president and general manager; John Sno tary and treasurer; Geo. D. Rich, general superintendent.

Lands, 2 groups, both in the Seven Devils district. First group, at Mineral, bought of Consolidated Copper Co., has shipped some ore ing 5% copper and up to 350 oz. silver per ton. The property at La shipped a little ore averaging 35% copper, and ore of much lower g been smelted on the ground.

Company has smelters at both Mineral and Landore. The Minera has a small water-jacket blast-furnace, burning coke. The smelter at of 60 tons daily capacity, has a 50-ton combination reverberatory an jacket blast-furnace, former burning wood and latter burning co anomalous furnace was devised on a novel and absolutely unsuccess combining in a double stack blast and reverberatory furnaces, with ward blast and a moist updraft, charging being in both furnaces, and the two. Fuel was to have been furnished by a gas-producer consu *rotten white fir wood.* The theory and practice did not correlate, h *plant* was remodeled along more common lines.

re closed down November, 1905, on account of poor trans-ies, rendering it difficult to secure flux and fuel. Property, ated as to facilities for transport, is considered promising.

A MINING CO. **MEXICO.**
East 4th St., Cincinnati, Ohio. Mine office: La Cananea, Mex. Organized 1905, under laws of Arizona, with capitaliza-res $10 par. Apparently is related to the Democrata Cananea o.

LA FORTUNA MINING CO. MEXIC

Office: 416-27 William St., New York, N. Y. Mine office: Ahualu Jalisco, Mex. W. B. Stewart, president; Frank E. Lloyd, manager. La 40 pertenencias, 5 miles northwest of Ahualuleo, showing a 5′ to 20′ v carrying auriferous and argentiferous copper and lead ores, with quartz gang Mine is opened by tunnels, with about one-half mile of workings, showi circa 10,000 tons of ore. Has a small mill. Presumably idle.

LA FORTUNA MINING CO., S. A. MEXIC

Is the Mexican incorporation of the Fortuna Mining Co.

LA FRANCE COPPER CO. MONTAN

Office: 42 Broadway, New York, N. Y. Mine office: Butte, Silver B Co., Mont. Works office: Basin, Jefferson Co., Mont. Robt. S. Walker, pr dent; preceding officer, F. Augustus Heinze, Frederick Eckstein, Russell H kins and Stanley Gifford, directors; Wm. A. Kidney, general manager. ganized April, 1905, under laws of New York, with capitalization $7,000,0 shares $25 par, in $1,000,000 preferred 6% stock and $6,000,000 common sha Authorized, Nov. 2, 1906, an issue of $2,000,000 first-mortgage 25-year convertible bonds, to be issued in exchange for a like amount of debentu outstanding. Defaulted interest on coupon bonds due January and July, 19 Is controlled, through stock ownership and otherwise, by United Copper or some of its subsidiary corporations, and $2,000,000 worth of common sto is said to be owned by Copper Securities Co. Reported net earnings of $ $491,000, for year ending June 1, 1907, with a small loss on operations for y ending June 1, 1908.

Lands, 8 fractional claims, area 32 acres, known as the Lexington mi held from the French owners under a $250,000 bond and lease, running in name of Louis Girard, assigned to La France Copper Co. Dispute over la with Butte & Boston was settled during 1907. Mine is at Walkerville, in *northern part* of the Butte camp.

The Lexington mine has a 3-compartment, 1,450′ main shaft, connec

' level with the Alice mine, and has several miles of workings. The worked many years ago, for gold and silver, but below the 1,400' a 30' vein, with granitic gangue, carrying stringers of sulphide ore to 4% copper, and is claimed also to have a vein of 14' average ying chalcopyrite associated with considerable sphalerite and a little ring average returns of 2.75% copper, 6 to 7 oz. silver and $5 gold hich figures are considered exaggerated. It is also claimed that the isappeared on the 800' level, but neither statement is credited. The unwatered, 1907, to depth of about 1,000'.

nent includes a 15x30" Ottumwa hoist raising a single-deck cage, nine pumps and a 50-drill air-compressor.

ine has an old mill, idle since circa 1903, with about 100,000 tons us zinc tailings, which perhaps could be cyanided at a profit.

-ton mill was built, 1907, near the mine, between Walkerville and . This mill uses the magnetic separation process of Sutton, Steele and to May 1, 1908, was claimed, by the company, to have cost In actual operation the mill, which uses no water, apparently treated tons of ore daily, and made such an insufferable quantity of dust s closed down by the courts, an injunction having been sued out by Walkerville. No great efforts were made by the company to pre- suance of this injunction, and it is probable that it came at a con- ie, as it is doubtful if the plant was profitable.

duction plant, at Basin, is the old Basin & Bay State concentrator, held under a $600,000 bond and lease. The plant is rated at 1,500 al daily capacity, equipment including 2 crushers, 8 sets of rolls, 4 mills, 90 Hartz jigs, 60 Wilfley tables and 80 Callow slime settling

tion, for year ending June 1, 1907, was 34,336 tons of ore, giving ld of $14.18 per ton, and costing $6.35 per ton to mine. Maximum in 1907 was circa 150 tons daily. The company is understood to be oll the reduction plant. Company collected poll taxes from its em- the city of Butte, but at last accounts had not turned the taxes city authorities. Property was sold for taxes, amounting to about a August, 1908, but is redeemable within one year, under a lump $500, plus 1% monthly on the amount delinquent.

LA MINING CO. **MEXICO.**

TY MINING & SMELTING CO. **COLORADO.**

nd works office: Lake City, Hinsdale Co., Colo. Mine is developed . Plant is a 50-ton smelter.

PPER CO. **MICHIGAN.**

Houghton, Mich. Mine office: Belt, Ontonagon Co., Mich. Reg- Pryor, president; Wm. D. Calverley, secretary; preceding officers, ice, Richard M. Edwards, Benj. F. Chynoweth, Linus Stannard and ees, directors; Wm. Wearne, superintendent.

ized Nov. 28, 1905, under laws of Michigan, with capitalization shares $25 par; issued, $2,000,000. Shares are listed on the Boston ange. Federal Trust Co., Boston, registrar; State Street Trust Co., nsfer agent.

ny began business with $45,000 cash, of which corporation fees, ses and other expenditures preliminary to actual work took $7,000, 8,000, of which $14,000 was spent for drilling and $5,000 for pre- rface work. For $14,000 that was expended on actual mining, to 908, the company sunk a 300' shaft on the Knowlton bed, did 600' , *with 3 months' stoping at various points*, to determine the average

the case of the Lake, the flexure is more marked than at any other noted in the district.

orth drift of the Lake is cut off, at a short distance from the shaft, ndary line of St. Mary's Mineral Land Co., which owns a tract carry- 15 acres of the underlay of the Lake bed, jutting into the southeast- of the Lake tract, but the Lake has the entire underlay, and a con- f the outcrop for about one-fourth mile northeast of the boundary al lands, in addition to an extensive tract to the westward, which ched from the present shaft, or by additional shafts sunk to the

nent includes a 12x15" duplex hoist, good for 500' depth, which will l by a hoist good for one-half mile depth, bought of the Champion air-compressors of 6-drill and 15-drill capacities, taken from the of the old Belt mine. Buildings include a number of old structures location, and at the new shaft there is a 3-acre clearing having a fthouse and combined engine and boiler house, with machinery in- concrete foundations.

roperty is served by the main line of the Copper Range railway, es through the old Belt location, and the new shaft is reached by spur.

pper showing of the Lake has excited more interest in the district nining development since the discovery of the great Baltic lode, in h led to the opening of the Baltic, Trimountain, Champion and Su- s, with other properties developing on the same bed. The showing e is materially the best ever made on any amygdaloidal bed in On- unty, for a similar amount of work, and in view of the great width , and its remarkable mineralization, so far as opened, it is reason- to predict the making, in time, of one of the great amygdaloidal the district. The management is excellent, both technically and

PPER MINING CO., LTD. **NOVA SCOTIA.**

Eastern Harbour, N. S. Mine office: Polson's Brook, Antigonishe H. G. Dunbar, secretary and treasurer; A. G. Baillie, general agent. circa January, 1908, with capitalization $2,500,000, shares $1 par. a 6,400 acres, on Polson Lake, showing auriferous and argentif- r ore, opened by a 103' shaft, with about 550' of workings.

PPER PROPRIETARY CO., LTD. **SWEDEN.**

40 Queen Victoria St., London, E. C., Eng. Col. A. H. C. Lynch, M. Schreiter, mine manager; C. Maurice Champness, secretary. Or- arch 10, 1906, under laws of Great Britain, with capitalization 298,000 ordinary shares of £1 par, and 40,000 deferred shares of olds lands through Lake Copper Syndicate Aktiebolag, organized of Sweden. Lands, on Lakes Animmen and Arr, circa 90 miles othenberg, Sweden, include the Stora Strand and Vingnäs mines, w outcrops traceable circa 10 miles. These mines have 13 shafts, low, deepest circa 800', showing ores giving assays of slightly better opper, with small gold and silver values. Ore reserves of Stora e estimated, Jan. 1, 1908, at 100,000 tons. Is said to plan erecting

ORGE MINE. **AUSTRALIA.**

ffice: Bungendore, Murray Co., N. S. W., Australia. W. J. Chan- Plun, owners. Lands, 172 acres, freehold, at Captain's Flat, Lake e mine, circa 600' deep, was opened 1882, on a main vein of 22' to having a *meridional strike and vertical* dip, in Silurian slates, ore *replacements along fault-lines, as a* compact, fine-grained mixture

of chalcopyrite, sphalerite, galena and pyrite, with aluminous quartzose gangue carrying an average of only about 1.5% copper, with small gold and silver values. Ore, from its nature, is very refractory in smelting, and average returns, 1898, were only 1.45% copper.

The smelter has four 60-ton water-jacket blast-furnaces, and the ore requires heavy fluxing and fuel charges. Pyritic smelting was tried, but proved unsuccessful.

Maximum production of the mine was circa 500 tons fine copper yearly sold as matte carrying 30 to 35% copper, 65 oz. silver and 1 oz. 12 dwts. gold per ton. Several successive companies have been wrecked in attempting to operate the mine. Production, 1907, was only 40 tons of ore, which remained untreated.

LAKE JUKES COPPER CO., N. L. TASMANIA

Offices: 103 Gresham House, London, E. C., Eng., and Prells Bldgs., Melbourne, Australia. Mine office: Crotty, Tasmania. J. P. Madden, chairman; H. S. Muir, mine manager; N. Madden, Melbourne secretary; W. W. Futcher, London secretary. Organized Oct. 8, 1900, under laws of Victoria, with capitalization £150,000, shares £1 par. Lands, 2 leases, area 120 acres, on Mount Jukes, on the west coast of Tasmania. Has a 5-stamp mill.

LAKE MILLING, SMELTING & REFINING CO. MICHIGAN

Office: 60 State St., Boston, Mass. Works office: Point Mills, Houghton Co., Mich. H. F. Fay, president. Organized under laws of Michigan, with capitalization $400,000. Receipts, 1907, were $100,000 raised by assessment and $126,383 received from stamping 414,760 tons of rock. Stamping cost, 1907, were 20.839 cents per ton. Balance on hand, Jan. 1, 1908, was $61,619.

The millsite, 406 acres, carrying more than 1¼ miles frontage on Portage Lake, adjoins the Franklin millsite. The mill was built by the Arcadian, and was bought, circa 1904, by the Centennial, and was transferred to the present corporation, stock of which is owned jointly by the Centennial and Allouez.

The mill is 132x104', of steel frame, having 3 Nordberg stamps, with foundations built for 3 additional heads. Foundations under the old heads were in bad shape, hence a new 12' concrete foundation was built under one head which was compounded, giving it a daily capacity of about 700 tons, and a second simple head has been overhauled. The mill has crushing rolls, to treat oversize material.

The mill has a 15,000,000-gallon Nordberg pump, and a wharf running 67' into deep water, fitted with a modern coal-hoist and coal-shed. Miscellaneous buildings include a machine-shop, smithy, cooper-shop and a number of dwellings for employes.

LAKE SHORE MINING CO. MICHIGAN

Office: 990 West Kensington Road, Los Angeles, Cal. Mine office: Greenland, Ontonagon Co., Mich. W. H. Garlick, president. Organized under laws of Michigan, with capitalization $500,000, shares $25 par. Lands, 773 acres, [illegible] ented, on the shore of Lake Superior, in Town 51 North, Range 44 West, re*ported to* carry bedded deposits, between slate walls, of 5' and 12' width, show*ing copper* oxides and chalcocite giving average assays of 1.5% copper, 95 oz.

silver and 40 to 80 cents gold per ton. Has been but slightly prospected, and is idle.

LAKESIDE COPPER CO. **UTAH.**

Office: care of Howard S. Stowe, vice-president, Salt Lake City, Utah. Mine office: Promontory, Box Elder Co., Utah. H. E. Baker, president. Lands, 27 claims, near the Lucin cut-off, showing what apparently is a blanket vein of 15' to 50' width, traceable circa 300', proven by shallow trenches showing ore assaying up to 40% copper.

LAKESIDE GOLD-COPPER MINING CO. **WASHINGTON.**

LAKE SUPERIOR & ARIZONA MINING CO. **ARIZONA.**

Dead. Title changed, 1904, to Lake Superior & Arizona Mining & Smelting Co. Formerly at Florence, Pinal Co., Ariz.

LAKE SUPERIOR & ARIZONA MINING & SMELTING CO. **ARIZONA.**

Office: Calumet, Mich. Mine office: Superior, Pinal Co., Ariz. Employs circa 60 men. John D. Cuddihy, president; Dr. W. A. Holt, vice-president; A. Petermann, secretary; Wm. B. Anderson, treasurer; preceding officers, J. T. Wheeler, Wm. Thielman, Angus W. Kerr, Edward Ulseth, Henry L. Baer and Capt. Thos. Maslin, directors; Fred W. Hoar, superintendent; Geo. N. Bell, mine superintendent; Dugald Stewart, clerk.

Organized Sept. 30, 1902, under laws of Arizona, as the Lake Superior & Arizona Mining Co., with capitalization $200,000, shares $1 par, and reorganized, 1904, under present title, with capitalization $2,500,000, shares $20 par; $19 paid in, to end of 1908. Levied $1 assessments, payable in installments, in 1906, 1907 and 1908. Under old territorial laws of Arizona the corporation was unable to sell stock delinquent on the 1907 assessment, but a change in the laws made is possible to do this, to the great relief of the company, which was greatly hampered by neglect of many of the shareholders to pay the 1907 assessment, until compulsion was employed.

Lands, 11 claims, area 110 acres, freehold, in the Pioneer district, 3 miles south of the Silver King mine, 30 miles west of Globe and 28 miles east of Florence. Litigation over 2 claims, instituted by F. Pheby, was decided in the company's favor, in all courts. The property, formerly known as the Gold Eagle mine, was worked for gold, by the Gem Gold Mining Co., which went out of business, 1895, after paying considerable dividends. The old workings include many shallow shafts and short tunnels, opened at random, from which the former owners extracted rich surface ores.

The property shows limestone, quartzite and diabase, with 3 ore bodies, of which 2, under development, occur as contact deposits between quartzite and limestone, and in limestone, these having a quartzite footwall and limestone hanging, with average width of circa 6' The main ore body, of 6' to 7' width, has a north and south strike, with dip of 26° 30', and shows a prominent outcrop. Ores are silicious oxides and carbonates, associated with iron and manganese, and should be valuable for fluxing the base ores likely to be opened at greater depth. Shipments of 13 carloads, 1905, from the Anderson tunnel, gave average returns of 31.6% copper, 2.2 oz. silver and $2.67 gold per ton, netting $24,649.81.

Development is by 2 shafts and 4 tunnels. The ground is not especially heavy, and little timber is required, except for openings in occasional soft places. The mine has circa 7,000' of workings, not including the old openings made by former owners.

The 375' Vivian shaft is sunk vertically, in low ground, to depth of 279', and cut diagonally through about 30' of ore.

The Holt tunnel, of circa 500' length, *cuts a 16' ore body, at approximately right angles, with a back of 216'.*

The Holt shaft is a 2-compartment blind shaft, starting from the brea of the Holt tunnel, at 216′ depth from surface, and was sunk, 1908, to depth o 850′ from surface, and is planned to be sunk to 1,000′. This shaft has a hois good for 1,000′, and is said to show, on the 850′ level crosscut, ore assayin up to 50% copper and $28 gold per ton, with a quartz footwall carrying up to $28 gold per ton, but the gold figures are considered excessive.

The Carlton tunnel, circa 100′ below the Holt tunnel, is connected wit the latter by a 165′ winze on the dip of the ore body, and is driven, in th ore, for circa 3,000′ length, showing ore assaying up to 30% copper.

Equipment includes a steam plant with a 175-h. p. water-tube boiler, an a 16-drill Rand 2-stage air-compressor. Petroleum is used for fuel, and there are 5 storage tanks at the mine and 2 at Florence, each holding 2 carloads of oil.

Buildings include a power house, smithy and bunk-house at the mine, an an office and dwelling at Florence, 28 miles distant.

The Arizona Midland R. R. Co. has been organized, by shareholders of th Lake Superior & Arizona Mining & Smelting Co., with capitalization $500,00 shares $1 par, for the purpose of building a railroad from the mine to Florence to connect with the Gila Valley, Globe & Northern railway. This line would traverse 19 miles of easy rolling country, and 9 miles of hills, and would cost from $300,000 to $500,000 for construction and equipment.

Operations were suspended circa November, 1907, and resumed July, 190 with a force of about 60 men. Production, 1907, was 92,120 lbs. fine copper 1,040 oz. silver and 188 oz. gold. The property is considered promising, and th management has shown persistence in its work, but the mine cannot be place on a profitable productive basis until rail connections are secured.

LAKE SUPERIOR & BISBEE DEVELOPMENT CO. ARIZONA

Dead. Formerly at Bisbee, Cochise Co., Ariz.

LAKE SUPERIOR CONCENTRATING CO. MICHIGAN

Dead. Liquidated 1905, and practically succeeded by Copper Concentrating Co. Formerly at Hancock, Houghton Co., Mich.

LAKE SUPERIOR COPPER CO. MICHIGAN

Mine office: Rockland, Ontonagon Co., Mich. Organized July, 1853, under laws of Michigan, with capitalization $500,000, shares $25 par. Was set up by Minesota Mining Co. Lands, 640 acres, in Sections 13 and 14, Town 50 N., Range 39 W., carrying the northeasterly extension of the parallel cupriferous beds of the Evergreen Belt, opened in the Mass and Adventure mines. Expended about $40,000 in assessments and made 14,821 lbs. fine copper. Idle since 1874.

LAKE SUPERIOR COPPER CO. ONTARIO

Office: care of Lewis Brittan, president, 45 Milk St., Boston, Mass. Mine office: Port Arthur, Thunder Bay, Ont. Gustave E. Wolters, vice-president; Jas. A. Tirrell, secretary and treasurer; Capt. Walpole Roland, consulting engineer. Organized January, 1907, under laws of Maine, with capitalization $3,000,000, shares $25 par, and is registered under laws of Ontario. Lands 480 acres, known as the Cloud Lake mines, in the township of Crooks, 3 miles from mouth of Cloud River, opposite Isle Royale, and 25 miles south of Port Arthur. Property shows amygdaloidal and conglomerate strata carrying native copper, principal bed being an amygdaloid of about 20′ average width.

LAKE SUPERIOR COPPER & ZINC CO. ONTARIO

Dead. Charter forfeited, 1902. Formerly at Wolf River, Thunder Bay district, Ontario.

LAKE SUPERIOR COSO DEVELOPMENT CO. CALIFORNIA

Office: care of John Kiiskila, president, Hancock, Mich. Mine office: *Darwin, Inyo Co.,* Cal. Nels Majhannu, vice-president; Jacob Jarvis, secre

MINA LA LAPILLA.

Mine office: Alosno, Huelva, Spain. Wm. Guthrie Bowie, mana group of government concessions, adjoining the Tharsis mine, showi wide lense of cupriferous pyrite assaying 2.5 to 8% copper and 47 to phur. Was operated formerly by pillar-and-stall, leaving large qua ore in floors and pillars. Has about 1,200,000 tons of ore availab ground, and much more if worked open-cast. Has poor ventilation. shows enormous quantities of scoria, left from smelting operatio Romans. Is well equipped with machinery. Presumably idle.

LA MANGIARDE, LTD.

Office: 5 Clements Inn, Strand, London, W. C., Eng. Letter unclaimed from former mine office, La Tour-sur-Tinée, Alpes Maritime T. Cowperthwaite, chairman. Organized Oct. 30, 1903, with capi £4,000, shares £1 par; issued, £3,000. Lands, sundry coal mines and oped mineral lands carrying indications of copper, in the neighborhood Idle and apparently moribund.

SUCESIÓN C. J. LAMBERT.

Office, mine and works: La Compañia, La Serena, Coquimbo, Chi erty includes El Brillador and San Antonio mines, area 93 hectares, 1903, with a force of 38 men, produced 4,500 metric tons of 8% ore. rock is porphyry, carrying veins of about 90′ extreme width, with di sulphides appearing at depth of circa 100 meters. The Fortuna and mines employ circa 150 men. Los Bronces mine, formerly owned, has to Sociedad Minera de Los Bronces.

Reduction plant, 16 miles from Coquimbo, with rail connection, a 100-ton concentrator and a smelter that was the first modern plant using the Welsh system. Smelter has four 21′ reverberatory furnac calciners. Machinery equipment includes two 100-h. p. boilers, two engines and a small hydraulic turbine, fuel being Australian coke, c pesos per ton, laid down. Production formerly was copper sulphate, mainly by smelting plants using the Kröhnke process, but latterly this has been lost, and smelter now produces Chile bars of about 95% copp with slags averaging 0.7% copper, employing an average force of 10 wages of 1.3 pesos daily. Production, 1903, was 8,600 tons of ore, average copper tenor, with fuel consumption of about 6,000 metri coke, making 1,481,491 lbs. fine copper.

CHAS. LAMBERT & CO.

Works office: Swansea, Glamorganshire, Wales. Property is copper reduction works, including smelters and an electrolytic plant

LA MINA COBRE CO.

Office and mine: Tucson, Pima Co., Ariz. M. T. Brown, preside Kane, secretary and treasurer. Capitalization $2,000,000, shares $1 par 12 claims, circa 35 miles southwest of Tucson and 8 miles from Sasc about 300′ of workings. Has a gasoline hoist.

ERZBERGWERK LAMPERTUS.

Mine office: Hohenstein-Ernsthal, Saxony, Germany. Friederich Feltzner, president. Property carries auriferous and argentiferous ores of copper. Presumably idle.

LA NATIVIDAD MINING CO.

Dead. Was a swindle. Formerly at Coapa, Morelia Michoac Described Vol. V.

JOSÉ LARRAGUIBEL. CHIL

Mine office: Algarrobito, La Serena, Coquimbo, Chile. Property is t Pajalones mine, having a vein of one meter average width, opened to depth 130 meters, with horizontal workings for 400 meters length. Production, 19 was 400 metric tons of ore averaging 14% copper tenor, equal to 123,457 fine copper.

LAS ADARGAS MINING CO. MEXIC

Office: 15 John St., New York, N. Y. Mine office: Jiménez, Chihuah Mex. E. G. Seiler, president; Geo. E. Crawford, secretary; W. A. Seam general manager, El Paso, Texas. Claims to be organized under laws of N York, with capitalization $1,000,000, shares $10 par. Declared a dividend 25 cents per share, April, 1902. Property said to be held under a bond $300,000, on which $15,000 was paid. Claimed to have a 300′ shaft. Regarde with much suspicion, and apparently moribund.

LA SAL COPPER MINING CO. COLORAD

Dead. Succeeded, 1904, by Consolidated La Sal Mining & Smelting C Formerly at La Sal, Grand Co., Colo.

LA SAL COPPER-SILVER MINING CO. COLORAD

Office: 1317-25 Broad St., New York, N. Y. Mine office: Cashin, Mon rose Co., Colo. J. Ensign Fuller, president; Arthur C. Danielson, vice-pre dent; Frank R. Allen, treasurer; John B. Overton, secretary. Apparently a reorganization of Consolidated La Sal Mining & Smelting Co., which wa reorganization of La Sal Copper Mining Co. Lands, 7 patented claims and millsites, area 150 acres, known as the Cashin mine, having a 1,540′ tunn showing ore assaying up to 35% copper and 18 oz. silver per ton.

LA SALLE COPPER CO. MICHIGA

Office: 12 Ashburton Place, Boston, Mass. Mine office: Calumet, Hou ton Co., Mich. Quincy A. Shaw, Jr., president; Rodolphe L. Agassiz, vice-pre dent; Geo. A. Flagg, secretary and treasurer; Jas. MacNaughton, general ma ager; preceding officers, Col. Thos. L. Livermore, Courtney C. Douglass a Francis W. Hunnewell, directors; Wm. Skewes and Josiah Bartell, mining ca tains.

Organized, circa December, 1906, under laws of Michigan, with capit ization $10,000,000, shares $25 par. Absorbed the Caldwell Copper Co., a controls, through ownership of practically entire stock issue, the Tecums Copper Co., holding, at last accounts, 54,249 shares, out of a total issue 54,959 shares. Is controlled, through stock ownership, by the Calumet & Hec Mining Co. Tecumseh shareholders received 1½ shares of La Salle for 1 Tecumseh.

Of the capitalization of 400,000 shares, 302,977 were issued for var purposes, leaving 97,023 shares in the treasury. The Calumet & Hecla Min Co. contributed $1,000,000 cash to the treasury, taking pay in shares, and h agreed to loan $750,000 cash, in addition, as needed. Annual report, as of da April 30, 1907, showed total cash resources of $942,272, with liabilities $21,699, and a financial statement, as of date Aug. 19, 1908, gave $870,975 ca and accounts receivable, with accounts payable of $4,496.

Lands, 2,360 acres, also the Gregory millsite on Torch Lake, nearly opp site the Calumet & Hecla mills. The Tecumseh and Caldwell contributed 9 acres each, and 1,240 acres were furnished by the Calumet & Hecla, St. Mary Mineral Land Co., Shelden & Douglass estate and other interests. These lan were put into the new company on a novel basis of valuation, figured upo zones of 2,500′, on the dip of the Kearsarge lode, allowance being made f decreased land values on tracts carrying the underlay at depth. The proper has 4 shafts, 2 on the Tecumseh and 2 on the Caldwell, with room for 2 add

al shafts, giving 7 shafts at intervals of about 1,700'. The property carthe strike of the mineral formation for circa 2½ miles.

Considerable diamond drilling has been done on the tract, and develop- is exclusively on the Kearsarge amygdaloidal bed. In July, 1908, six power ils were running in the Tecumseh branch, and two in the Caldwell branch.

The Tecumseh property is a very irregular tract, lying next south of the eola mine proper, carrying circa 400 acres of the underlay of the Kearsarge . The first work on the Tecumseh was done on the Calumet conglomerate, ere a shaft was sunk circa 1,000', but found no payable copper. During second era of activity, 1899-1902, a shaft was sunk 2,300' on the Osceola gdaloid, but this bed was found practically barren of copper, and work s abandoned, November, 1902. The old Osceola shaft may be reopened, wever, for the reason that the southern drifts from No. 6 shaft of the sola, below the 4,000' level, are among the best in the mine, and these are ar the Tecumseh boundary.

Tecumseh shaft No. 1, sunk on the Kearsarge bed, is 6x18', with 3 comrtments, 1,400' deep, with drifts on the twelfth, thirteenth and fourteenth vels, showing considerable good ground. The workings of No. 1 show typical earsarge amygdaloid, of about 15' average width, with variable mineralizaon, though decidedly promising. The stockpile at No. 1 shaft contains circa ,000 tons of stamp-rock, including some rock of very good grade, carrying nsiderable heavy copper.

No. 2 Tecumseh is about 1,000' south of No. 1, old No. 2 shaft, which was k close to No. 1, having been abandoned. No. 2 is planned as a duplicate of o. 1, in size and equipment.

The Caldwell has 2 shafts, known as Nos. 1 and 2, which also are called e La Salle shafts. These probably will be renumbered eventually. No. 1 aldwell shaft, sunk one mile south of Tecumseh No. 1, has a shaft-rockhouse, nd was 500' deep, October, 1908. No. 2 Caldwell is circa 1,500' southwest of o. 1, and is of the same depth, shafts being duplicate, with hoists good for ne-half mile each. The Caldwell shafts can be sunk to 9,000' depth before eaching the boundary line. The Kearsarge bed, on the Caldwell tract, has en found considerably disturbed to the depth reached, and the showing is oor, but the shafts are not deep enough to give permanent results.

Equipment includes steam plants and compressors at each mine, the Caldell having a 15-drill air-compressor at No. 1 shaft, with a 30x70' boarding- use, barn and several dwellings.

Results at the La Salle have been somewhat disappointing, though a fair owing has been secured in Tecumseh No. 1, but it is obvious that the real lue of the property can be determined only by further extensive develop- ent. This will be secured, as the company is exceedingly strong financially, ith an excellent management.

LA SALLE COPPER MINING & MILLING CO. **NEW MEXICO.**

Mine office: Carrizozo, Lincoln Co., N. M. Geo. C. Hopkins, vice-presi- ent. Organized under laws of Arizona, with capitalization $1,000,000, shares $10 par. Lands, 3 claims, area 60 acres, 6 miles from Carrizozo, said to show a 12' to 15' vein of low-grade copper ore. Company is said to plan building a 0-ton concentrator.

LAS ANIMAS COPPER MINING & SMELTING CO., LTD. **CHILE.**

Office: 2 Rumford Place, Liverpool, Eng. Mine office: Chañaral, Ata- ma, Chile. Edwin Woodgate, chairman; Pedro Nicholas Schiffberg, manag- g director in Chile; F. E. Owens, secretary; Guillermo Sheriff, mine man- er. Organized Jan. 3, 1902, under laws of Great Britain, with capitalization 1,000, shares £1 par, as successor of Copper Corporation of Chile, Ltd. bentures, £54,500, at 6%. Lands, circa 125 acres, including La Fortunata

mine, 430′ deep, opened 1855, and La Alena and El Progreso mines Animas, in the Sierra Aspera.

Smelter, rebuilt 1895, has two 54″ circular blast-furnaces, with C ville and Bocker blowers, employing circa 100 men, at average daily w 3 pesos. Fuel is coke and Australian coal, coke costing 32 pesos per t livered, 1 ton of coke smelting 8 tons of ore, giving slags averaging 0.7 per. Production, 1903, was 3,701,976 lbs. fine copper.

COMPAÑIA MINERA DE COBRE "LAS MORAS," S. A. MI

Is the Mexican incorporation of Las Moras Copper Mining Co.

LAS MORAS COPPER CO. MI

Dead. Succeeded by Las Moras Copper Mining Co. Formerly at Jalisco, Mex. Described Vol. VI.

LAS MORAS COPPER MINING CO. MI

Office: 2030 Land Title Bldg., Philadelphia, Pa. Mine office: Jalisco, Mex. Employs circa 50 men. Paul W. Meyers, president; Al Paul, vice-president; A. S. Robert, secretary; L. H. Taylor, Jr., tr Geo. E. McCormick, comisario; preceding officers constitute the board rectors; Jas. P. Harvey, general manager; Jas. M. Campbell, superint

Organized July 7, 1902, under laws of Mexico, with capitalizatio pesos, and capitalization increased, July 17, 1906, to 10,000 pesos, sha pesos par. Property is operated, under lease, by the American corp which is reported as having less than a half dozen shareholders, whi urally, would include the five directors only. Annual meeting, third in July.

Lands, 187 pertenencias, area 462 acres, circa 6 miles southwest of on the Hacienda San Miguel.

The Magistral mine, 8 miles from the Mexican Central railway, has body of 20′ to 30′ width, developed for circa 500′ in length by tunne about 1,500′ of drifts and crosscuts, and a 112′ shaft. Ore is slightl crous and argentiferous chalcopyrite. The Magistral was worked man ago, for production of bluestone, used by neighboring mines in the patio of treating silver-lead ores.

La Fé, or Las Moras, mine, a newly opened property, has an ore b*sisting of* a breccia of altered limestone, with fragments cemented by ch

leopyrite, in a crushed and mineralized contact zone of about 300' width, for circa 2,000', ore averaging 2 to 2.5% copper, with small silver and ues. Development is by a 140' shaft and circa 1,500' of tunnels. ere is a steam plant with a 500' hoist at the Magistral shaft, with a of buildings, and roads have been built. nagement plans deepening both shafts. The property is held, under nd lease, dated July 25, 1907, by Patrick Clark, H. L. Percy and Jos. P. y.

ABLAS COPPER CO. **MEXICO.**

ice: 84 Adams St., Chicago, Ills. Mine offices: Aguacaliente de Baca, , Sinaloa, Mex., and Alamos, Sonora, Mex. Harry Austin Clapp, man- Daniel H. Livingston, superintendent. Property at Aguacaliente de Baca riferous and argentiferous copper ores.

CHANCE COPPER MINING CO. **MONTANA.**

ice: 202 North Main St., Butte, Mont. Mine office: Saltese, Missoula ent. W. H. Nichols, president; Geo. Champagne, vice-president; Dr. T. therspoon, treasurer; S. M. Burns, secretary. Capitalization $1,250,000, $1 par. Lands, 2 claims, known as the Last Chance group, 4 miles of Saltese, said to show a 30' vein, slightly developed by shafts and s showing auriferous and argentiferous copper ore assaying up to 42% r, 450 oz. silver and $8 gold, with a claimed average of 17% copper, 60 ver and $4 gold per ton, which unquestionably is an overestimate. Mine med to have produced about $150,000 worth of ore.

LATOUCHE CONSOLIDATED COPPER CO. ALASK

Office: Seattle, Wash. Mine office: Latouche, Latouche Island, Pr William Sound, Alaska. Organized 1907, under laws of Washington, w capitalization $1,000,000, shares $1 par, by Jas. Denny, W. B. Madison a others. Lands, 5 claims, on the southern end of Latouche Island, adjoini the Reynolds-Alaska, said to show a vein traceable 1½ miles, with a sha shaft about one-half mile from tidewater.

LATOUCHE EXTENSION MINING CO. ALASK

Mine office: Latouche, Latouche Island, Alaska.

LATOUCHE ISLAND COPPER MINING CO., LTD. ALASK

Office: 49 Sullivan Bldg., Seattle, Wash. Mine office: Latouche, L touche Island, Alaska. Jas. A. Murphy, president; Tenning Carlson, first vi president; Winfield S. Jamison, second vice-president; C. E. Bogardus, tre urer; Gordon Everett, secretary; preceding officers, Dudley A. Tyng and R Fay, directors; Philip C. Stoess, consulting engineer. Organized under laws Washington, with capitalization $5,000,000, shares $5 par. Lands, 29 clai well timbered, and a millsite carrying approximately 4 miles of tidewa frontage, on the northeastern shore of Latouche Island, Prince William Sou Alaska, circa 60 miles south of Valdez. Property shows 3 practically par veins, of 8′ to 20′ width, proven by trenches at intervals for 3 miles. Ha shallow shaft and tunnels of 74′, 103′, 160′ and 180′, and claims to have sight approximately 200,000 tons of ore of 5% average copper tenor. H steam power. Company claims 3 first shipments, 1907, returned 4 to 6 copper, from surface ores without assortment. Is said to have expended abo $60,000 on development. Property considered promising.

LATOUCHE MINING CO. ALASK

Letter returned unclaimed from former office, 10 Wall St., New York, Y. Mine office: Latouche, Latouche Island, Alaska. Andrew K. Beatson, g eral manager, in whose name all operations are conducted. Organized 19 under laws of New Jersey, with capitalization $100,000. Is operated as a cl corporation.

Lands, 17 claims, patented, area 340 acres, known as the Bonanza mi on the eastern side and circa 3 miles from the northern end of Latou Island, within one-half mile of tidewater, where there is a good natural harb Country rock is slate, carrying chalcopyrite ranging in tenor up to 30% copp and which averages about 10% copper, 2 oz. silver and 20 cents gold per t Ore occurs in the brecciated portions of the country rock, in irregular ve and occasionally as impregnations or replacements of the country rock, alo a shear zone, considerably brecciated.

The mine is developed by a big quarry, and by tunnels of 320′ and cl 900′, with about 1,800′ of underground workings. There are 5 upraises to s face, of 33′ to 43′ height, fitted with ore bins having steel gates, through wh ore is milled down, giving cheap mining costs. Without power equipment t mine has extracted and loaded ore at a cost of only $2.25 per ton.

The property has a 300′ wharf, on a natural harbor, connected with t mine by a half-mile tramline of 24″ gauge, laid with 12-lb. steel rails. T freight rate to Tacoma, by water, is $2.75 per ton, and ore, being desirable f flux, is smelted at an average cost of $1.65 per ton. The company has a g eral store and employs about 30 men. Production, 1907, was 1,020,000 lbs. f copper and 9,000 oz. silver. The property is one of unusual promise, and developed and managed on sound lines.

office: Poland, Yavapai Co., Ariz. Lands, 8 claims, in the Big Bug district, bought Jan. 1, 1908, of Alto Mines Co., having a shaft, planned to be sunk 600', showing ores assaying up to 4.9% copper and $200 gold per ton.

LEOPOLD-TYRONE COPPER CO. NEW MEXICO

Office: Kreider Bldg., San Francisco, Cal. Mine office: Tyrone, Grant Co., N. M. Frank L. Kreider, general manager; G. A. Eastman, superintendent. Organized 1907. Lands were 6 claims, near the Copper Gulch, having a 2-compartment shaft showing sulphide ore of fair copper tenor. Is said to have sold its lands to the Copper Gulch, and presumably is out of business.

LEPANTO MINING CO., INC. PHILIPPINES

Office: Calle Carnero Núm. 20, Manila, Philippines. Mine office: P. O. Box 964, Mancayan, Lepanto, Luzon, Philippines.

LERIDA COPPER MINES, LTD. SPAIN

Dead. Voluntarily liquidated, September, 1902. Formerly in Lérida, Spain.

SOCIEDAD ANONIMA MINERA BELGA DE LOS COBRES DE LERIDA y GRANADA. SPAIN

Dead. Voluntarily liquidated, September, 1902. Formerly in Lérida, Spain.

COMPAGNIE CUIVRES DE LÉRIDE-GRÉNADE. SPAIN

Dead. Voluntarily liquidated, September, 1902. Formerly in Lérida, Spain.

LE ROI MINING CO., LTD. BRITISH COLUMBIA

Office: 541 Salisbury House, London, E. C., Eng. Mine office: Rossland, Trail district, B. C. Employs 250 men. T. D. Grimke-Drayton, J. P., chairman; Anthony J. McMillan, managing director; preceding officers, G. W. Wesson and Chas. Dunderdale, directors; Andrew Larson, superintendent; Thos. Kiddie, smelter superintendent; Harold A. Wesson, secretary; W. A. Carlyle, consulting engineer. Organized June 7, 1898, under laws of Great Britain, with capitalization £1,000,000, shares £5 par, fully issued and fully paid. Has paid dividends as follows: 5s., Nov. 7, 1899; 1s. 6d., March 3, 1906; 2s., September, 1906. For fiscal year ending June 30, 1907, profit was £3,582 4s. 3d., with surplus of liquid assets of £74,259 19s. 4d. Controls, through stock ownership, the Northport Smelting & Refining Co., Ltd. Fiscal year changed, 1907, to end Sept. 30, instead of June 30.

Lands, 71.45 acres, freehold, and the I. X. L. mine, held under lease, also a limestone quarry for fluxing, and the Spitzee and Townsite claims are held under option. In 1907 did 3,740' of diamond drilling, and made nearly one mile of new mine openings, expending $164,468.99 on exploratory and development work. The ore body is narrow at the top and wider at the bottom, but carries decreased values at depth, the bottom of the mine showing 3' to 5' of good smelting ore, with a continuance of the vein to considerably greater depth proven by diamond drill borings made from the bottom of the shaft. Ore averages about 1.2% copper, 0.5 oz. silver and 0.4 to 0.5 oz. gold per ton.

The 5-compartment main shaft is 1,650' deep, and, in 1907, produced ore from levels down to and including the 1,350'.

Equipment includes a good mining plant, with hoists, air-compressors, a steam shovel, and the property is supplied with necessary shops and mine structures.

The reduction plant, at Northport, Washington, 17 miles from the mine, is held through the Northport Smelting & Refining Co., Ltd. The works, 1,200 tons daily capacity, are modern in design and equipment. Limestone fluxing is secured from the company's quarry, 4 miles distant, and water supplied from Deep Creek, through a 4x5' flume of 3 miles length, to two 125,000-gallon storage tanks, whence water is brought to the works in pipes, under a head of 145', with an effective pressure of 60 lbs. per *inch, actuating* 18" and 24" Pelton water-wheels.

Trail district, B. C. Employs circa 100 men. Lord Ernest Hamilton, chairman; preceding officer, A. B. Deltry, F. C. D. Haggart and W. T. Morrison, directors; Paul E. Couldrey, mine manager; R. R. Cormack, assistant manager; F. A. Labouchere, secretary; Alex. Hill & Stewart, consulting engineers.

Organized June 1, 1900, under laws of Great Britain, with capitalization £600,000, shares £5 par, fully issued and fully paid. Has paid dividends as follows: 5s. in 1901; 5s. in 1902; 2s. in 1904; 3s. in 1905; 8s. in 1906; 3s. in 1907; 4s. to August, 1908. For year ending Sept. 30, 1907, net profit was £13,806 5s. 1d., after writing off £11,944 12s. 8d. for depreciation. From organization to Sept. 1, 1908, company paid dividends of £180,000. The company holds a share interest in the Cloncurry Syndicate, Ltd.

Lands, 72 acres, including the Josie No. 1 and Annie mines, also 8 claims near the old mine, 2 claims near the Velvet mine and 5 claims in the Ym district. Upwards of one mile of diamond drill borings were made in 190 and 3,286' of new mine openings were made in the same year. Ores carr values in gold, copper and silver, in the order named, and are graded into tw classes, for smelting and concentrating, latter grade ranging 0.4 to 0.5% copper tenor, with only about 20% of the copper saved, extraction of ass values in gold being 56 to 60%.

Development is by a 900' main shaft, on the Josie, and by 2 tunnels on the Josie and one on the Poorman claim. The mine has ore reserves estimat at 300,000 tons, which seems high, and has some ore chutes of considerab better than the average grade of the Rossland camp.

The mill, of 50 tons rated daily capacity, has Blake and Gates crushers, Chilean mills, 3 Jenckes sizers and 6 Wilfley tables. An Elmore oil conc trator, fully described Vol. IV, was installed 1903, proving a technical but a commercial success, and was superseded by Wilfley tables. Concentrat carry circa 1.8% copper, 1.5 oz. silver and 1.75 oz. gold per ton.

Production has been as follows: 980,000 lbs. copper, 27,968 oz. silver a 11,050 oz. gold in 1904; 885,992 lbs. copper, 28,369 oz. silver and 14,493 oz. g in 1905; 803,409 lbs. copper, 22,054 oz. silver and 19,615 oz. gold in 1906. 1907 production was 22,198 tons of ore shipped, and 12,963 tons of ore conc trated. Largest copper production was 3,001,027 lbs., for fiscal year 190 Smelting ore, 1905, returned 3.62% copper, 2.32 oz. silver and 1,184 oz. g per ton. Management is good and property is valuable.

LE ROY MINING CO. MEXI

Mine office: Pilares de Teras, Moctezuma, Sonora, Mex. Has auriferou and argentiferous copper ores. Idle.

LESLIE COPPER MINING CO. IDA

Office: Wallace, Idaho. Mine office: Mullan, Shoshone Co., Idaho. W ley Everett, manager. Organized February, 1899, under laws of Idaho, w capitalization 100,000, shares 10 cents par. Lands, 11 claims, area 220 ac also a millsite and 2 water rights, lying east of Mullan, showing 4 ve traversing porphyry, main vein averaging circa 12' width at surface, op by tunnel, with about one mile of workings, carrying silver-lead ore of c centrating grade, with a narrow copper paystreak. Has water power, a 5-dr air-compressor and several mine buildings.

L'ETETE GOLD & COPPER MINING CO. NEW BRUNSWICK & NOVA SCOTI

Mine office: L'Etete, Charlotte Co., N. B. Property is the old J mine, opened circa 1860, reopened 1902, having two short tunnels and main shaft, showing ore of good assay value. Has a steam plant, and facilities at tidewater. Company also owns mineral lands in Nova *Idle several years.*

SOCIETÀ ANONIMA PER L'ESERCIZIO DELLA MINIERE DI LIBIOLA. ITA

Mine office: Sestri Levante, Liguria, Italy. Property is leased to Lib Copper Mining Co., Ltd.

LIBIOLA COPPER MINING CO., LTD. ITA

Office: 138 Leadenhall St., London, E. C., Eng. Mine office: Se Levante, Liguria, Italy. Kenneth Haweis James, chairman; preceding offi Thomas V. Anthony and Albert Straube, directors; W. S. Bartlett, secreta Robert H. Craven, mine manager. Organized January, 1867, under laws Great Britain, and reconstructed, 1888, with capitalization £250,000, shares par. Paid dividends of 2s. 6d. in 1903; 3s. 6d. in 1904, and 3s. 6d. in 1905, total dividends, to end of 1905, of £4 10s. Net earnings, 1907, were £7, with dividends of £7,560. Company has a heavy share interest in the Cruc silver-lead mine, Sardinia, now idle.

Lands, 2 claims, area circa 700 hectares, freehold, including the Lib copper mines, in Liguria, northern Italy. Ores are chalcopyrite and pyrites, occurring as veins in serpentine and diabase, ore bodies being of size. The property was discovered and worked by the Romans, and was opened, 1867, by predecessor of present company. Ores produced ave 5.76% copper in the cupriferous ore and 46.75% sulphur in the pyrites.

Equipment includes a 60-h. p. steam plant, 30-h. p. water plant and 50 electric plant.

The crushing mill, covering 550 square meters, built of reinforced conc and stone, has a daily capacity of 180 tons. Production, 1905, was 28,388 of copper and iron pyrites, of which about 20% was copper ore. Compan well managed, and, by careful handling, the property is made to return s factory profits.

SOCIÉTÉ DES MINES DE LA LIENNE. ITA

Mine office: Alagna, Circondario di Varallo, Novarra, Italy. Also property at Riva, near Alagna. Ore is disseminated chalcopyrite of low medium copper tenor, and mines were worked on a small scale only, at last counts.

SOCIETÀ LIGURE RAMIFERA. ITA

Mine office: Casarza, Liguria, Italy. Property includes the Fontana Rio Albareta, Rio Monticello and Rio dei Fichi mines, carrying chalcopy in a quartzose gangue. Was a small producer, at last accounts.

LILBURN MINING CO. UT

Dead. Lands sold, 1908, to Alta-Hecla Mining Co. Formerly at Alta, S Lake Co., Utah.

LILLY MINING & MILLING CO. COLORA

Mine office: Idaho Springs, Clear Creek Co., Colo. Ores carry gold, sil lead and copper. Has steam power. Presumably idle.

LILYAMA MINE. CALIFORN

Office: care of Robt. Crocker & Co., Placerville, Cal. Mine office: burn, El Dorado Co., Cal. Lands, 240 acres, unpatented, 11 miles from Aub Ores, mainly sulphides, occur as lenses in limestone and between granite quartz-porphyry. Has 4 tunnels and a prospecting shaft. Idle some years

LIMA COPPER MINING SYNDICATE, LTD. PE

Dead. Voluntarily wound up, February, 1903. Formerly in Perú.

LIME CREEK CONSOLIDATED GOLD & COPPER CO. ARIZO

Dead. Property sold to Kentucky-Arizona Consolidated Mining, Smel & Development Co. Formerly at Cave Creek, Maricopa Co., Ariz.

***LIME* MOUNTAIN COPPER CO.** ARIZO

Mine office: Johnson, Cochise Co., Ariz. Organized 1906, under law

ons, with capitalization $1,000,000, by Davis S. McGahan and I. N. Katbroth. Lands, 21 claims, known as the George Washington group, near Empire mine, in the Dragoon Mountains, developing by tunnel.

IMEN COPPER SYNDICATE, LTD.

Office: 2 Broad Street Place, London, E. C., Eng. R. A. Paris, secretary. nized Apr. 29, 1907, under laws of Great Britain, with capitalization 0, shares £1 par; issued, 711 shares, fully paid. Location of lands, if any, own.

ON MINING CO. **MEXICO.**

Mine office: Alamos, Sonora, Mex. Geo. W. Avery, superintendent. Has rous and argentiferous copper ore, with 10-stamp mill.

ARES MINING SYNDICATE, LTD. **SPAIN.**

Mine office: Linares, Jaen, Spain. S. Moos, manager. Organized 1903, to it lead, copper, zinc, iron and coal properties in vicinity of Linares, and nstruct a warehouse and shipping pier at Almería, Spain. Idle.

OLN CONSOLIDATED COPPER CO. **NEW MEXICO.**

Office: care of Daniel D. Hunt, St. Joseph, Mo. Mine office: Jarilla, Co., N. M. M. E. Riggs, president; T. D. Hosmer, vice-president; Geo. , secretary and treasurer; Wm. Wade, general manager; preceding officers, F. Standley, Thos. Winn, Chas. P. Faul and Reinhold Meiershoffer, ors. Organized Apr. 13, 1906, under laws of New Mexico, with capitaln $50,000. Lands, 2 claims, said to be held under bond and lease from west Smelting & Refining Co., showing a 5′ vein carrying ore of 4 to 6% tenor, with fair silver values, opened by a shallow 2-compartment shaft. d ore, 1907, to El Paso smelter, first shipment returning circa 11% copper oz. silver per ton. Shipments, 1907, were said to have been sufficient for development work.

OLN CONSOLIDATED MINING CO. **ARIZONA.**

fice: 1563 Sherman Ave., Evanston, Ills. Mine office: Tucson, Pima riz. Employs 30 men. Chas. A. Wightman, president; Hon. Fred W. t, vice-president and general manager; Geo. E. Fernald, secretary and er; D. B. Bisbee, superintendent. Organized June, 1904, under laws of a, with capitalization $2,000,000, shares $1 par. Lands, 35 claims, area res, including the Garcia group of 31 claims, also a 100-acre millsite, otal holdings of circa 1,000 acres, in the Papago district, 12 miles from Buttes railroad, showing country rocks of limestone, granite-porphyry orite, carrying various ore bodies, of which 5, slightly developed, range 3′ in width, being opened by 6 shafts, of 50′ to 120′ depth, and by a nnel. Smelter shipments are said to have given average returns of circa pper, with fair gold and silver values, and property is claimed to have d about $80,000 worth of ore. Equipment includes two 15-h. p. gasoline good for 400′ depth, and a 15-drill Rand air-compressor. There are 5 gs, including an 18x20′ machine-shop, 14x60′ smithy, store and several gs. Idle.

OLN COPPER CO. **ARIZONA.**

ad. Succeeded, circa 1904, by Lincoln Consolidated Mining Co. Forat Tucson, Pima Co., Ariz.

OLN COPPER DEVELOPMENT CO. **CALIFORNIA.**

ad. Was promoted by "Baron" W. E. von Johannsen, a notorious swindler who formerly had an office at 326 Post St., San Francisco, Cal.

OLN COPPER MINING CO. **ARIZONA.**

ad. Formerly at Tucson, Pima Co., Ariz. Described Vol. III.

OLN COPPER MINING CO. **MONTANA.**

ice: care of Jas. A. Talbot, Butte, Mont. Mine office: Helena, Lewis Co., Mont. *Organized July, 1903, under* laws of Montana, with cap-

italization $1,500,000, shares $1 par. Among the incorporators given was Th H. Carter, but Senator Carter states that his name was used without his know edge or consent. Lands are said to be 10 claims, in the Little Boulder distri about 30 miles from Helena. Idle and apparently moribund.

LINCOLN GOLD & COPPER MINING CO. GEORGI

Office: 33-42 New St., New York, N. Y. Mine office: Metasville, Wilk Co., Ga. Edgar L. Pierson, president; G. S. Macdonald, vice-president; Lou Enricht, secretary; Wm. M. Orr, treasurer; preceding officers and Wilson Mendall, directors; A. B. Hopkins, general manager; Carl Henrich, engine Organized June 11, 1906, under laws of Oklahoma, with capitalizati $2,000,000, shares $1 par; issued, $1,700,000. Paid one dividend, of one-half 1%. Was practically the successor of the Seminole Mining Co., which was bad failure. Annual meeting, first Tuesday in August.

Lands, 901 acres, freehold, known as the Magruder or Seminole mine, ju over the Wilkes county line, 12 miles from the Georgia Central railroad, a circa 70 miles from Ducktown, Tennessee, though advertised by the compa to be in the same mineral zone. Property shows Huronian or Laurenti schists, intruded by eruptive dykes of two different ages, carrying 4 approx mately parallel ore bodies, in schists and between schists and eruptive rock these having an average strike of N. 30° E. to N. 40° E. and dip of 50° vertical, veins averaging 3′ to 14′ in width, and traceable circa 1,200′, showi mainly chalcopyrite, with some bornite, cuprite and melaconite, estimated company to average 4.5% copper, 3% lead, 1.5% zinc, 4 to 5 oz. silver a $6 to $14 gold per ton, which figures are considered unduly high.

The mine, opened 1852, and closed 1862, on account of the American Ci War, was reopened 1878, 1899 and 1905. Development is by a 225′ main shaf a 150′ air-shaft and shafts of 40′, 45′ and 80′, with about 1,800′ of working estimated to show 15,000 tons of ore, with 2,500 tons blocked out for stoping.

Equipment includes a 175-h. p. boiler, 12-h. p. and 15-h. p. hoists and 4-drill Rand air-compressor. There are 10 buildings, including a machine-shop smithy, assay-office and boarding-house.

The mill, 30x70′, of wood, on stone foundations, has a Gates crusher, centrifugal crusher, set of rolls, Twentieth Century jig, 2 Bartlett tables, elevator and revolving screens.

The smelter, immediately adjoining the concentrator and very close to the mine, has a 16-ton rectangular water-jacket blast-furnace, and a 10-ton reverberatory furnace, making, when in operation, a matte of 15 to 20% copper tenor, carrying circa 20 oz. silver and 1.5 to 3 oz. gold per ton, shipped to the Maurer works of the American Smelting & Refining Co. for reduction, first class ore and concentrates also being shipped to Maurer.

The advertisements of J. M. Percy & Co., fiscal agents of the company were most misleading. Dividends were promised for 1907, and a small dividend was paid, May 1, 1907, but it is extremely doubtful if it was earned. Company reports difficulty in securing satisfactory labor, and plans colonizing white labor. Property considered promising.

LINCOLN MINING CO. AUSTRALIA

Mine office: Lincoln, Canbelego Co., N. S. W., Australia. Organized 190 under laws of New South Wales, with capitalization £4,500, shares £10 par.

LINCOLN MINING & MILLING CO. COLORADO

Mine office: Idaho Springs, Clear Creek Co., Colo. Ores carry gold, silver copper and lead. Has steam power and a 15-stamp mill. Presumably idle.

LINCOLN-NEVADA MINING & MILLING CO. NEVADA

Letter returned unclaimed from former mine office, Ely, White Pine Co. Nev. W. M. MacSherry, president and general manager. Capitalizatio *$1,000,000*, shares $1 par. Idle and apparently moribund.

NDSEY CANANEA COPPER CO. **MEXICO.**

Office: care of C. O. Barrow, clerk, Portland, Me. Letter returned un-imed from former mine office, La Cananea, Arizpe, Sonora, Mex. Organized 7, under laws of Maine, with capitalization $5,000,000. Supposedly out of iness.

NEDALE WEST CHILLAGOE, LTD. **AUSTRALIA.**

Dead. Lands sold to Irvinebank Mining Co. Formerly at Arbouin, Chil-e, Queensland, Australia.

NGANORE COPPER CO. **MARYLAND.**

Office and mine: Frederick, Frederick Co., Md. T. A. Dunshee, president general manager; W. F. Wilson, secretary; C. C. Ausherman, treasurer. anized under laws of Arizona, with capitalization $1,000,000, shares $1 par. ds, 306 acres, including the New London and Dolly Hyde mines.

The New London mine, area 64 acres, with 14 acres of timber land, was rked, 1835-1855, apparently at a profit, but was idle since 1881, excepting for vatering and retimbering the shaft, 1903-1904, when no ore was extracted, ll reopened by present company. Mine has a 210′ shaft and 4 short tunnels, gest 104′, with circa 500′ of workings, and the new management has opened 50′ tunnel. Ores are bornite and chalcocite, in a vein of 3′ to 4′ width, in omite and phyllite, ores assaying 3.5 to 7% copper.

The Dolly Hyde was the principal copper mine of the state, though never arge producer, and, in early days, shipped, without selection, considerable of good average tenor. The mine has contact deposits in limestone, carry-malachite, bornite and chalcopyrite, and was idle for many years. Property sidered promising and management good.

NWOOD GOLD & COPPER CO.

Dead. Was promoted by Henry T. Rodman & Co. "Big Mitt" Bill Henig, altogether unknown to the metropolitan police, was secretary. Apparently pany had no lands, and was a swindle, pure and simple. Formerly had an e at 303-334 Fifth Ave., New York, N. Y.

N COPPER CO. **WASHINGTON.**

Dead. Was organized 1906, with capitalization $1,000,000, shares $1 par. ds were in the Hoodoo district. Office was at Wallace, Idaho. Formerly Palouse, Whitman Co., Wash.

N COPPER MINING CO. **ARIZONA.**

Office: 313 West Second St., Los Angeles, Cal. Mine office: Stoddard, apai Co., Ariz. Chas. Matthews, president; O. A. Cox, secretary and treas-; Henry Reifsnyder, general manager. Organized February, 1903, under s of Arizona, with capitalization $2,500,000, shares $1 par, succeeding Ram-Copper Mining Co. Lands, 13 claims, area 260 acres, in the Agua Fria rict, 6 miles from a railroad. Country rocks are limestone, quartzite and phyry, showing numerous veins carrying oxide, carbonate and sulphide ores, med to give average assays of 24% copper, opened by shafts of 50′, 100′ 300′, with 515′ of underground workings. Has gasoline power. Idle and arently moribund.

N GULCH DEVELOPMENT CO. **MONTANA.**

Office: 807 Lonsdale Bldg., Duluth, Minn. Mine office: Homestake, Jef-son Co., Mont. Chester A. Congdon, manager; John Hewett, superintendent. ds, 5 claims, 3 miles north of Homestake and only a few miles south Butte. Property, formerly held by Gold Flint Mining Co., produced con-erable gold and silver in the past, but shows increasing copper values at th. New development is by a 3-compartment shaft, planned to be sunk '. Equipment includes a double-drum hoist and an Ingersoll air-compressor. ploys circa 25 men. *Property considered promising.*

LISBON VALLEY COPPER CO. UTAH.

Office and mine: care of H. E. Blake, manager, Moab, Grand Co., Utah. Was said, 1907, to plan a 100-ton concentrator, but mill apparently not built.

LITHGOW SMELTER. AUSTRALIA.

Owned by Great Cobar, Ltd.

LITTLE BEAVER MINING & REDUCTION CO. UTAH.

Office: Salt Lake City, Utah. Mine office: Milford, Beaver Co., Utah. W. W. Little, president; Samuel A. Tarbet, vice-president; Victor B. Wells, secretary and treasurer. Organized 1908, with capitalization $250,000, shares $1 par. Lands, known as the Kittie Clough group, are in the northern part of the Star district.

LITTLE BILLY OPERATING CO. BRITISH COLUMBIA.

Mine office: Van Anda, Texada Island, B. C. Property is the Little Billy mine. Idle.

LITTLE BOPPY COPPER MINING CO., LTD. AUSTRALIA.

Mine office: Cobar, Robinson Co., N. S. W., Australia. Organized 1907. Property is a lease of copper lands about 20 miles from Cobar, on the railroad to Nyngan.

LITTLE BULLY HILL MINING & SMELTING CO. CALIFORNIA.

Letter returned unclaimed from former office, San Francisco, Cal. Mine office: Winthrop, Shasta Co., Cal. Capitalization $1,000,000, shares $1 par. Lands, 5 claims, said to adjoin the Bully Hill mine, said to be opened by a 130′ tunnel and several trenches, said to show sulphide ore. Prospectus was filled with bunco-talk, and apparently company is moribund.

LITTLE CHIEF MINING CO. UTAH.

Office: care of John R. Van Evera, president, Marquette, Mich. Mine office: Eureka, Juab Co., Utah. F. D. Kimball, vice-president; Jas. P. Driscoll, secretary and treasurer; preceding officers and H. T. Moritz, directors; John Driscoll, superintendent. Has a 1,400′ shaft. Hoisting plant, valued at $15,000, was burned September, 1908. Reorganization planned. Property considered promising.

LITTLE EDDIE GOLD & COPPER MINING CO. UTAH.

Office: Bingham Canyon, Salt Lake Co., Utah. Edw. McCarrick, general manager. Development is by tunnel, said to show a fair ore body.

LITTLE GIANT MINING, MILLING & SMELTING CO. WASHINGTON.

Dead. Formerly at Marcus, Stevens Co., Wash.

LITTLE MATTIE MINING, MILLING & POWER CO. COLORADO.

Mine office: Idaho Springs, Clear Creek Co., Colo. F. V. S. Leebrick, superintendent. Has auriferous and argentiferous lead and copper ores. Equipment includes steam and water power and a 20-stamp mill.

LITTLE MINAH MINE. MONTANA.

Owned by Parrot Silver & Copper Co.

LITTLE NORTH FORK COPPER MINING & MILLING CO., LTD. IDAHO.

Office and mine: Wardner, Shoshone Co., Idaho. F. P. Matchette, president; J. W. Slayter, vice-president; W. J. Locke, secretary; T. R. Mason, treasurer and general manager. Organized September, 1903, under laws of Idaho, with capitalization $1,500,000, shares $1 par. Development is by tunnel. Employs 3 men.

LITTLE YERINGTON COPPER-GOLD MINES CO. NEVADA.

Office: P. O. Box 633, Goldfield, Nev. Mine office: Yerington, Lyon Co., Nev. Lands, 4 claims, area 80 acres, on the Walker Lake Indian reservation. At last accounts company was peddling stock on the weekly installment plan. Is not regarded favorably.

LIVE OAK COPPER MINING & SMELTING CO. ARIZONA.

Office: 438 Broome St., New York, N. Y. Mine office: Globe, Gila Co., *Ariz. Forest* J. Kaldenberg, Sr., president; Forest J. Kaldenberg, Jr., secre-

ry. Organized under laws of Arizona, with capitalization $1,250,000, shares par.

Lands, 16 claims, area 320 acres, 8 miles from a railroad, showing schists ad quartz-porphyry carrying 8 lenticular contact deposits, of which 3, under evelopment, average circa 10′ width by 700′ proven length and 300′ estimated verage depth. Ores are chalcocite, chalcopyrite, chrysocolla and dioptase, aid to give average returns of 10% copper. Mine, opened 1897, has shafts f 85′ and 250′, and tunnels of 900′, 125′, 175′, 185′, 725′ and 60′, with a total f about one mile of workings, estimated by former manager to show 120,000 ons of ore, with 65,000 tons blocked out for stoping, which latter figure is considered excessive. Ore shipped was graded into first class, carrying circa 2% copper, and second class, averaging about 12% copper.

Equipment includes a 200-h. p. hoist, good for 1,500′ depth, and an 8-drill Sullivan air-compressor. Fuel is crude petroleum. The mine has ore-bins and 12 buildings.

There was a serious dispute, with extensive litigation, 1906, between the company and Jos. C. Erman, then the company's agent and superintendent. On Aug. 10, 1905, the company accepted Mr. Erman's offer to ship enough ore to erect a leaching plant, without calling on the company for funds. The company states that Mr. Erman made contracts for the shipment of about 30,000 tons of ore to the El Paso smelter, without the knowledge of the company, and to the company's detriment, and at the end of 30 days began to make leases without the knowledge of other officers, despite the fact that Mr. Erman was not authorized to make any leases, and specifically instructed to make no debts. The company charges that Mr. Erman did not send correct copies of leases to the New York office. Boone & Strang, the principal lessees, are said to have taken out about $100,000 worth of ore, after which the workings caved in, necessitating the sinking of a new shaft. The father of Mr. Erman is said to have found a purchaser for the property, whereupon the lessees demanded $150,000 for the cancellation of their leases, and the company claims that Mr. Erman and his father were to have received a portion of the $150,000. The company charges that fraudulent leases were made, by Mr. Erman, to his friends, his wife, and others, in which leases he himself was interested, and Mrs. Erman, who was the bookkeeper of her husband, is said to have destroyed the books. Mr. Erman is also charged with having given a lease shortly before his discharge, predating same 4 months.

Production has been as follows: 587,961 lbs. fine copper in 1905; 1,714,074 lbs. in 1906; 588,347 lbs. in 1907. Property considered valuable.

LIVERMORE GOLD & COPPER MINING CO. **WYOMING.**

Dead. Formerly at Laramie, Albany Co., Wyo.

LIVERPOOL SILVER & COPPER CO., LTD. **ENGLAND.**

Works office: Widnes, Lancashire, Eng. Property is a reduction plant with an electrolytic refinery.

LIVINGSTONE MINING CO. **MEXICO.**

Office: 1a, Independencia 22, Mexico, D. F. Mine office: Temascaltepec, Mexico, Mex. Has auriferous and argentiferous copper and lead ores.

LLANO COPPER CO. **MEXICO.**

Office: 407 American Bank Bldg., Kansas City, Mo. Mine office: Llano, Magdalena, Sonora, Mex. Employs 40 men. Dr. C. L. V. Hedrick, president and general manager; Dr. F. A. Patterson, vice-president; M. Y. Loaiza, first vice-president; preceding officers, W. R. Braden, R. L. Davidson and W. W. McEntire, directors; Harry Haldeman, secretary and treasurer; I. E. Bowers, mine superintendent. Organized Apr. 11, 1905, under laws of Arizona, with capitalization $1,500,000, *shares $1 par; issued*, $1,400,000. Was registered

and protocolized, May 30, 1908, under laws of Mexico. Annual meeting, first Monday in June.

Lands, 10 groups, area 526 hectares, also 5,000 hectares miscellaneous ranch and timber lands, including mineral lands an Curacahui Mountain, circa 10 miles southeast of Llano. Lands show porphyry and limestone, carrying ore bodies, one, of 3′ to 50′ estimated width, traceable circa 3 miles, opened by sundry pits and prospect shafts of 8′ to 50′ depth and by shafts of 105′, 150′ and 500′, and tunnels of 50′, 200′ and 577′, estimated to show circa 100,000 tons of ore, including chalcocite, bornite and chalcopyrite assaying 5 to 11% copper, 6 to 10 oz. silver and $2 to $5 gold per ton.

Equipment includes a 105-h. p. steam plant, with 7x8″ and 8x10″ hoists. There are 24 mine buildings, including a store and dwellings, also a sawmill. Property is served by Sonora branch of the Southern Pacific railway, 4 miles distant.

Company plans continuous development and blocking out ore for stoping. Test shipments from upper levels indicate the possibility of making substantial shipments of ore of good average tenor, after reasonable selection. Property considered promising.

MINAS LLANOS BLANCOS y LOS PATOS. CHILE.

Mine office: Tamaya, Ovalle, Coquimbo, Chile. Mine, opened 1893, has a 250′ shaft. Idle several years.

"LLOYD" COPPER CO., LTD. AUSTRALIA.

Offices: 107 Pitt St., Sydney, N. S. W., Australia, and 195A Winchester House, London, E. C., Eng. Mine office: Burraga, Bathurst Co., N. S. W., Australia. Alex. Creighton Arthur, chairman; W. Soutar, colonial director; W. H. Corbould, general manager; H. A. McMahon, secretary; J. Sarran, colonial secretary.

Organized May 9, 1899, with capitalization £250,000, increased November, 1906, to £300,000, shares £1 par; issued, £280,000. Capitalization was increased £50,000 to extinguish an equal amount of 10% debentures. Company had a share interest in the Murrin Copper Co., Ltd., which proved a failure. Profits, 1907, were £32,419, from which a dividend of 1s., amounting to £14,000, was paid, March 2, 1907.

Lands, 380 acres freehold, and 385 acres leasehold, one mile from Burraga, in the Bathurst district, which is arid, and operations are suspended at uncomfortably frequent intervals, from lack of water, though the mine has an 85,000,000-gallon storage tank, holding 9 months' water supply.

The mine, opened 1877, is bottomed in badly disturbed ground. Ore is slightly argentiferous chalcopyrite, with quartz gangue, occurring in fissures traversing acid diorite. The main vein has an ore chute of about 700′ length, worked to depth of circa 750′. The vein ranges 3′ to 8′ width, with an average of about 5′. The ore is highly silicious, and gave average returns, 1907, of 2.36% copper. To the eastward is a fault, cutting off the eastern extension of the vein from the first to the fourteenth levels, but protracted search has shown a continuation of the vein, to the eastward of the fault, which has given a 300′ horizontal downthrow, the discovery of the eastern extension of the vein greatly improving the prospects of the property.

Equipment includes steam and electric power, with hoisting machinery and shops. Fuel is hardwood, about 75 choppers being worked when the property is in operation, as fuel requirements are about 60,000 cords yearly. Much trouble is experienced from shortage of fuel, and a 9-mile tram-line has been surveyed, for a wood line, but has not been built. Apparently the lack of this line, which would cost about £20,000, is responsible for a considerable part of the company's troubles.

The reduction plant, built 1901, at a cost of £32,000, was overhauled and

harged, 1906, and includes a concentrator and smelter. The works formerly ad 2 blast-furnaces, one of which was sold to the Murrin Copper Co., Ltd., hich was wound up at a heavy loss, so the furnace was practically lost, and he other blast-furnace was sold to the Great Cobar mine. Present equipment ncludes a 40-ton calcining furnace, 19x48' over all, treating 40-ton charges of natte, and a reverberatory furnace, 23x65' over all, hearth having inside width f 20', with grate area of 6x8', and 5 charging hoppers. The smelter is said o have a converter plant.

From the beginning of mining, 1880, to the end of 1906, the company smelted 323,071 long tons of ore, making therefrom 14,122 long tons of fine copper, largest production being 4,088,000 lbs., in 1902. Production, 1905, was 2,058,560 lbs., and in 1906 was 2,739,520 lbs. fine copper. About 500 men are employed normally.

LLUVIA DE COBRE MINING CO. **MEXICO.**

Office: 711 Kansas City Life Bldg., Kansas City, Mo. Mine office: Carbó, Ures, Sonora, Mex. A. H. Glasner, president; Edgar Hubbard, first vice president; W. M. Rynerson, second vice-president; Bruce Dodson, secretary; Wm. E. Jones, assistant secretary; E. J. White, treasurer; J. C. Worthington, general manager; Frank Smith, superintendent. Organized November, 1904, under laws of Arizona, with capitalization $3,000,000, shares $1 par, increased, 1907, to $5,000,000. Lands, 283 acres, on San Juan Mountain, in the Papago district, circa 30 miles west of Carbó, opened by the 410' Josephine shaft, showing auriferous and argentiferous copper sulphides assaying up to 33% copper, 560 oz. silver and $7 gold per ton. Has a 10-drill air-compressor and is said to plan building a small matting furnace. Advertising is decidedly lurid and the company is not regarded favorably.

LOBBS HOLE CENTRAL COPPER MINE. **AUSTRALIA.**

Mine office: Kiandra, N. S. W., Australia. Property shows 3 veins, of 3" to 14" width, opened by shaft to depth of circa 100', giving ore assaying about 30% in copper tenor.

LOBBS HOLE COPPER MINE, N. L. **AUSTRALIA.**

Office: care of Alexander Jobson, manager, Equitable Bldgs., Sydney, N. S. W., Australia. Mine office: Kiandra, N. S. W., Australia. P. W. Horton, chairman. Capitalization £60,000, shares £1 par. Lands, 120 acres, 45 miles from Tumut. Mine, to end of 1906, had produced about 2,000 tons of ore averaging 28% copper, with 2,000 tons of second-grade ore stocked at the mine, part of which since has been washed away by floods. Planned reopening mine and building a small smelter, during 1908.

LODI GOLD & COPPER CO. **NEVADA.**

Letter returned unclaimed from former mine office, Rhyolite, Nye Co., Nev. Lands are near Skull Valley, in the River Basin district, and a shaft was being sunk thereon, July, 1907. Idle and apparently moribund.

LOGAN & CO., LTD. **ENGLAND.**

Office and works: Birkenhead, Cheshire, Eng. Property is a copper smelter and refinery.

LOGAN COPPER CO. **ARIZONA.**

Mine office: Jerome, Yavapai Co., Ariz. W. J. Casey, superintendent. Lands, 11 claims, in the Copper Basin district, having a 157' two-compartment shaft, showing ore carrying about 3% copper and $1 gold per ton.

LOG CABIN GOLD & COPPER CO., LTD. **UTAH & ONTARIO.**

Dead. Formerly at Marysvale, Piute Co., Utah, and Mine Centre, Rainy River district, Ont. Merged, 1906, in Utah Gold Mountain Mining Co. Very fully described Vol. VI.

LOGOS MINES CO. **ARIZONA.**

Mine office: Mayer, Yavapai Co., Ariz. W. R. Ferguson, general man-

ager. Lands, in the Big Bug district, have a 60′ shaft, equipped with a 40-h hoist and 5-drill air-compressor.

NEGOCIACIÓN MINERA LOMA DEL TORO. MEXI

Mine office: Zimapán, Hidalgo, Mex. Property includes La Luz and Lo del Toro mines, carrying silver-lead and copper ores. Employed circa 75 m at last accounts.

LOMAGUNDA DEVELOPMENT CO., LTD. RHODESI

Office: 404 Salisbury House, London, E. C., Eng. John Secar, chairma H. Ewer Jones, consulting engineer; Geo. T. Frost, secretary; Rhodesia Exp ration & Development Co., Ltd., agent in Rhodesia. Organized June 18, 18 capitalization increased December, 1901, to £250,000, shares £1 par; issu £227,850. Paid a 10% dividend, January, 1906. Lands, 316 claims, in t Lomagunda district of Mashonaland, including the United Kingdom claim, which development, now under way, has shown a promising body of aurifero copper ore. Company also has extensive shareholdings in the Consolidat African Copper Trust, Ltd., Ayrshire Gold Mine & Lomagunda Railway C Ltd., and Rhodesian Banket Co., Ltd.

LOMA VERDE COPPER CO. ARIZON

Dead. Was a stock-jobbing swindle. Formerly at Tucson, Pima C Ariz. Fully described Vol. V.

LOMBARD COPPER CO. OREGO

Dead. Formerly at Baker City, Baker Co., Ore.

LOMBARD GOLD & COPPER MINING CO.

Dead. Formerly had an office at 316 McCornick Bldg., Salt Lake Cit Utah.

LONDON-ARIZONA COPPER CO. ARIZON

Office: 526 Security Bldg., Los Angeles, Cal. Mine office: Winkelma Pinal Co., Ariz. Chas. E. Finney, president; Frank L. Wright, vice-presiden John Mason Ross, secretary; E. W. Brooks, treasurer; preceding officers, Ch S. Gleed, B. L. Winchell and Hon. R. E. Sloan, directors; Edw. W. Brook consulting engineer.

Organized Apr. 12, 1907, under laws of Arizona, with capitalizati $10,000,000, shares $10 par. Debentures, $152,000, at 6%. Commercial Tru Co., Los Angeles, registrar and transfer agent Annual meeting, third Monda in January.

Lands, 1,257 acres, known as the Dripping Springs or O'Carroll group, London Mountain, in the Banner district, 7 miles north of Winkelman, th nearest railroad station, about 10 miles from Kelvin and 20 miles from Glob

Property shows limestone of the upper Carboniferous series, superimpose on quartzite, with frequent intrusions of porphyritic dykes, the limeston series having the same petrographical members as the Bisbee district, wit deposits occurring similarly as replacements in limestone. The basal quartzit caps a great monzonite laccolith, which presumably is the primary source the ore, and is said to carry copper values of about 2.5%, in disseminate chalcopyrite and chalcocite. The limestone shows an ore-bearing ledge abo 30′ wide, traceable circa 4,000′, to be developed by tunnel, carrying mainl carbonate ore, estimated to average circa 5% in copper tenor. The propert has about 2,000′ of workings, showing considerable carbonate ore of excellen grade, but estimates, in the press, of 3,000,000 tons of ore in sight, are con sidered excessive.

The company plans a 1,000-ton smelter, as the first unit of 3,000 to works, at a site on the Gila River, 2 miles north of Winkelman and about *miles from* the mine. The company advertised extensively, using many pag *advertisements* in the newspapers, but these were singularly free from exa

ns and false statements, it being the usual rule that the larger the sement, the further it is from the truth. Property considered promising.

ON-COLORADO PROPERTIES, LTD. **COLORADO.**

ne office: Central City, Gilpin Co., Colo. Property was a bond and n the Pierce mine, said to give a good showing of copper ore. Pre- y idle.

ON & GILA COPPER CO. **ARIZONA.**

ne office: Kelvin, Pinal Co., Ariz. Louis Melczer, vice-president; W. tchell, superintendent. Organized circa May, 1908, with capitalization 000. Lands, adjoining the London & Arizona, show low grade ores, ap- y in considerable quantities. Company is said to plan a concentrator.

ON & MEXICAN SMELTER & MINING CO. **MEXICO.**

ne office: Pánuco de Monclova, Coahuila, Mex. Company planned, erecting a modern smelter at Adjuntas station, about 15 miles from va.

ON MOUNTAIN COPPER CO. **ARIZONA.**

ice: Phoenix, Ariz. Mine office: Winkelman, Pinal Co., Ariz. Louis r, vice-president. Organized May, 1908, with capitalization $3,000,000. are near the London-Arizona Copper Co.

ON RANGE COPPER CO. **ARIZONA.**

ice: 526 Security Bldg., Los Angeles, Cal. Mine office: Winkelman, ., Ariz. Chas. E. Finney, president; Paul Burks, vice-president; E. J. ll, secretary; Edw. W. Brooks, treasurer; preceding officers and John ss, directors. Organized Dec. 28, 1907, under laws of Arizona, with ization $6,000,000, shares $10 par; issued, $2,000,000. Is controlled, h ownership of $1,940,250 of issued stock, by London Arizona Copper onds, $68,500 issued.

ON & RICHELIEU MINING & **BRITISH COLUMBIA.**
EVELOPMENT CO.

ne office: Rossland, Trail district, B. C. Capitalization, $1,200,000. ay advertised stock for sale, circa 1905, on the strength of its location e Granby, but apparently has no property in that neighborhood. Idle.

PINE COPPER MINING & REDUCTION CO. **COLORADO.**

ne office: Gray Rocks, Laramie Co., Wyo. Organized circa 1902, under f Colorado, with capitalization $1,300,000. Is said to have 250' shaft; ably idle.

PINE MINING CO. **ARIZONA.**

ad. Was a swindle. Was absorbed by Pan-American Mining & Smelting . Formerly at Prescott, Yavapai Co., Ariz.

STAR CONSOLIDATED COPPER CO. **ARIZONA.**

ice: Rogers Bldg., Boston, Mass. Mine office: Safford, Graham Co., Hon. Wm. H. Powers, president; Duncan McVichie, vice-president; H. Folsom, secretary; A. G. Smith, treasurer; S. S. Campbell, manager; C. B. Spalding, superintendent. Organized Aug. 6, 1906, under laws of Maine, with capitalization $5,000,000, shares $10 par, practically all of Maravilla Copper Co.

mpany controls the Mineral Mountain Copper Co., through ownership of o-thirds share interest, and controls, through majority ownership of stock, ase Creek Copper Co.

ds, 32 claims, including the Lone Star mine, in the Galiuro Mountains, miles north of Solomonville. The Lone Star mine is developed by a shaft owing a 5' vein of auriferous and argentiferous quartz, which is reported to be of 8 to 10% copper tenor, with fair gold values. The shaft also shows stringers of ore

LONE STAR COPPER CO. TEXA

Dead. Formerly at Henrietta, Clay Co., Texas. Described Vol. III.

LONE STAR MINING CO. ARIZON

Dead. Was succeeded by Maravilla Copper Co., also dead, which w succeeded by Lone Star Consolidated Copper Co. Formerly at Safford, Grah Co., Ariz.

LONG BEACH & ARIZONA MINING CO. ARIZON

Dead. Was succeeded, 1907, by Swastika Copper Co. Formerly at Jerom Yavapai Co., Ariz. Described Vol. VI.

LOOKOUT COPPER CO. ARIZONA

Mine office: Poland, Yavapai Co., Ariz. Lands are in the Slate Cre district. Has steam power. Presumably idle.

LOOKOUT MINING CO. ALASKA

Office: Cleveland, Ohio. Mine office: Niblack, Prince of Wales Islan Alaska. Arthur A. Wakefield, general manager. Property shows a mediu sized body of auriferous copper ore, and is equipped with steam power, em ploying 12 to 15 men.

LOON CREEK MINING & INVESTMENT CO. IDAHO

Office: Blackfoot, Idaho. Mine office: Ivers, Custer Co., Idaho. E. H Watson, president; J. M. Stevens, secretary. Lands, about 2 miles from th Lost Packer, have a tunnel showing auriferous copper ore.

LORDSBURG MINING & REDUCTION CO. NEW MEXICO

Mine office: Lordsburg, Grant Co., N. M. Thomas A. Lister, manage Organized April, 1906, with capitalization $600,000. Idle.

COMPAÑIA MINERA LORETA y PROVIDENCIA. MEXICO

Mine office: Jesus Maria, Ocampo, Rayón, Chihuahua, Mex. Owne by Jesus Poyval, Rascon Bros. and E. R. Bones, latter manager. Ores carr silver, copper and lead. Has a 500′ main shaft and a 900′ tunnel, with wate power, 5-stamp mill with 12 tons daily capacity and a one-ton smelter em ploying circa 75 men.

LORNITA MINING CO. MEXICO

Mine office: La Cananea, Arizpe, Sonora, Mex. Property is near th Puertecitos mines of the Greene-Cananea. Made a small ore shipment, Septem ber, 1908, to El Paso smelter.

LORRAINE COPPER MINING CO. WASHINGTON

Office: Hoquiam, Wash. Mine office: Keller, Ferry Co., Wash. Owe Jones, president; A. G. Rockwell, secretary; Fred J. Chamberlain, genera manager. Organized Apr. 13, 1900, under laws of Washington, with capitali zation $1,500,000, shares $1 par.

Lands, 22 claims, area 422 acres, in 2 groups, and a 20-acre millsite, Ferry and Pierce counties, Washington.

The Wilmot group, in the Sans Poil district, Ferry county, shows contac deposits between porphyry and schist, of 4′ to 6′ width, said to give averag assays of 6.5% copper, 40 oz. silver and $4 gold per ton, from malachite an azurite near surface, and from chalcocite, bornite and chalcopyrite at depth These figures are considered overestimates.

The Lorraine group, in the Carbon River district, shows 7 fissure veins i granite, giving assays up to 20% copper, 5 oz. silver and $1 gold per ton from bornite and chalcopyrite. The Lorraine group is opened by 4 shafts deepest 100′, and by 8 tunnels, 3 longest being 221′, 472′ and 630′. Properties as a whole have 2,016′ of workings. Idle several years, and apparently mor bund.

LOS ALAMOS MINING & MILLING CO. MEXICO

Office: 823 H. W. Hellman Bldg., Los Angeles, Cal. Letter returne *unclaimed from* former mine office, Alamos, Sonora, Mex. Dr. Finis E. Yo

and a $1,000 fine, while Arthur Levan, apparently at the head of the gan fined $100 and costs. Apparently it is very cheap to promote deli swindles through the United States mails. Formerly at Silver City, Co., N. M.

LOST GARNET GOLD & COPPER MINING & MILLING CO. WASHING

Dead. Formerly had offices at Seattle and Everett, Wash.

LOST GULCH COPPER CO. ARIZ

Letter returned unclaimed from former office, Los Angeles, Cal. office: Globe, Gila Co., Ariz. E. F. Kellner, manager. Has auriferous ores and a 10-stamp mill. Presumably idle.

LOST PACKER EXTENSION MINING CO. ID

Office: care of Col. O. P. Chisholm, secretary and treasurer, Boz Mont. Mine office: Ivers, Custer Co., Idaho. W. W. Chisholm, president.

LOST PACKER MINING CO. ID

Mine and works office: Ivers, Custer Co., Idaho. Jas. Ivers, pres J. T. Finlen, vice-president; Henry Welsh, secretary and treasurer; pre officers, J. Czizek and E. G. Rowe, directors; Patrick Sheehan, manager; Charles, superintendent. Capitalization is 150,000 shares.

Lands, 9 claims, in the Loon Creek district, circa 120 miles we Mackay. Mine is developed mainly by tunnel, No. 1 having a back of and No. 7 a back of 700′, while No. 9, now driving, will have a back of 2,000′. Tunnels are run on a vein of 2′ to 7′ average width, with max width of 12′ to 15′, carrying ore averaging 2 to 3% copper and $5 to $7 per ton, with a paystreak of 6″ to 5′ width, proven to average about 2′ distance of 500′ and depth of 400′, which carries sulphide ore returning 25% copper, 10 to 12 oz. silver and $40 to $75 gold per ton. Prope handicapped by inadequate transportation facilities, being 120 miles fr railroad, and deep snows preclude winter work.

The smelter has a 100-ton water-jacket blast-furnace, making matte aging 52% copper, 36 oz. silver and 13 oz. gold per ton, with slags ru only 0.2% copper. A converter is planned.

About 50 men are employed, when working, but the smelter is ope only a few months yearly. Production, 1907, secured from smelting oper July 26 to Oct. 31, is estimated at 425,000 lbs. fine copper, with large and silver values, and presumably was greater in 1908. The property i of exceptional promise.

LOST RIVER COPPER CO. ID

Letter returned unclaimed from former office, Anaconda, Mont. Pro in Lemhi county, Idaho, is said to show a 7′ vein of sulphide copper or tween quartzite and limestone. Idle and apparently moribund.

NUEVA SOCIEDAD COMPAÑIA DE LOTA i CORONEL. CH

Office: Valparaiso, Chile. Mine office: Carrizalillo, Chañaral, Ata Chile. Works offices: Lota, Concepción, Atacama, Chile, and Los Condes, tiago, Chile. Santiago Collins, manager. Organized under laws of Chile, capitalization 18,000,000 pesos.

Lands include the Mina Descubridora, at Carrizalillo, opened 1850, is about 650′ in depth; the Lota mine, opened 1856, and the Maitenes opened 1844, these carrying large bodies of ore, low in average copper and high in silica, which renders them difficult of reduction. Company owns coal mines, principal copper and coal mines having railroad connec with steam and electric power.

The Maitenes smelter, at Los Condes, is 45 kilometers from Santiag *nearest railroad* point, with a freight rate of 7 pesos per metric ton in *6 pesos out.* Works include a crusher plant and 3 reverberatory fur

of $60,000, at 6%, apparently not issued. Has been in financial strait about 2 years, and levied a 5-cent assessment September, 1907. Lan claims, patented, with extensive development, showing large bodies of grade ore, decreasing in values in lower workings. Main shaft, 1,20 planned to be deepened to 2,000'. Ores treated, 1902, average 3% co 52 oz. silver and 18 cents gold per ton. Production, 1907, was 235 car of ore. Suspended operations March, 1907.

LOYAL LEASE CO., LTD. BRITISH COLUM

Mine office: Van Anda, Texada Island, B. C. C. H. Jacobs, man Lands, 7 claims, area circa 350 acres, held under bond and lease from H Treat, owner, near Blubber Bay, 3 miles from Van Anda, showing out similar to those of the Marble Bay mine. Development is by a 300' s showing chalcopyrite and occasional bornite, of good average tenor. steam power and a 2-drill air-compressor.

GUSTAVO LOZANO. SALVAI

Mine office: Chalatenango, Salvador. Mines carry auriferous and ar tiferous copper ore, and have steam power. Employed circa 100 men, at accounts.

LUCERO COPPER MINING CO. NEW MEX

Dead. Formerly at Mora, Mora Co., N. M.

LUCILE DREYFUS MINING CO. WASHINGT

Mine office: Danville, Ferry Co., Wash. Theodore Petterson, superint ent. Mine has 3 tunnels, showing a ledge of 100' estimated width, with streak of circa 25', carrying argentiferous and cupriferous pyrite. Comp fell into financial straits, circa 1903, through fraudulent stock issued Eugene Cressley, the former secretary, who served a penitentiary term th for. Resumed work, 1907, after several years' idleness.

LUCILE GOLD & COPPER MINING CO. CALIFOR

Office: 226 San Bernardino Bldg., Los Angeles, Cal. Mine office: K San Bernardino Co., Cal. Geo. R. Barker, president; F. R. Pitney, vice-p dent; F. H. Gleason, secretary and treasurer; preceding officers, F. S. Ra and Dr. E. L. Pillsbury, directors. Organized Nov. 21, 1906, under law Arizona, with capitalization $1,000,000, shares $1 par. Lands, 3 claims, 60 acres. Development is by tunnels of 150' and 350'.

LUCIN COPPER MINES CO. UT

Mine office: Tecoma, Elko Co., Nev. Organized 1907, with capitaliza $1,500,000, shares $1 par. Lands, 28 claims, area 500 acres, 7 miles eas Tecoma, in the Lucin district of Box Elder county, Utah.

LUCKY BUTTE MINING CO. MONTA

Office and mine: care of S. W. Billings, Butte, Silver Bow Co., Mont. ganized 1907, under laws of Montana, with capitalization, $100,000.

LUCKY CALUMET COPPER MINING CO. IDA

Office: care of John H. Nordquist, vice-president and general mana Wallace, Idaho. Mine office: Mullan, Shoshone Co., Idaho. A. A. Bo president; H. P. Knight, secretary; Chas. Solberg, treasurer; preceding offic J. H. Hewand and O. O. Larsen, directors. Organized October, 1906, u laws of Idaho, with capitalization $1,500,000, shares $1 par.

Lands, 10 claims, patented, on Snow Storm Hill, between the Indepen and Snow Storm mines and about 1,500' from latter, supposedly carrying extension of the Snow Storm vein. Property shows 2 fissure veins, of 10 50' width, in quartzite, opened by ten 10' pits and by 3 tunnels, longest 1,100', latter cutting a vein of 30' to 40' width at a distance of 1,055' f portal, with back of 575', showing a vein of 30' to 40' width, carrying cup *malachite*, chalcopyrite and tetrahedrite, giving assays of 2.5 to 5% cop *with slight silver* values. Plans driving a new crosscut tunnel, from hea

entle Ann Gulch, to cut vein at circa 2,000'. Has electric power, air-compressor and 4 mine buildings.

LUCKY DAY MINING CO. **WASHINGTON.**

Dead. Formerly at Silverton, Snohomish Co., Wash.

LUCKY DUTCHMAN MINING & DEVELOPMENT CO. **NEVADA.**

Office: Salt Lake City, Utah. Mine office: Crescent, Lincoln Co., Nev. W. J. Snyder, president; John R. Royer, vice-president; preceding officers, B. O. Atkins, C. L. Anderson and R. S. Weimer, directors; H. B. Cole, secretary and treasurer. Organized 1905, with capitalization $125,000, shares 25 cents par. Lands, 4 claims. Idle.

LUCKY FRIDAY GOLD & COPPER MINING CO. **NEVADA.**

Office: care of J. T. Davis, secretary-treasurer, Carson, Nev. O. H. Gallup, president; S. L. Lee, vice-president. Organized Sept. 26, 1906, under laws of Nevada, with capitalization $1,000,000, shares $1 par. Lands, 5 claims, on Copper Mountain, in the Walker River district, Esmeralda county, Nevada. Has a 90' shaft, claimed to show ore averaging 28% copper.

LUCKY FRIDAY MINING CO. **IDAHO.**

Letter returned unclaimed from former mine office, Mullan, Shoshone Co., Idaho. Lands, 4 claims, adjoining the Hunter mine on the south, having a 625' crosscut tunnel cutting a 10' vein with a 4' paystreak giving assays up to 3.5% copper, 29% lead and 89 oz. silver per ton.

LUCKY GOLD & COPPER MINING CO. **ARIZONA.**

Office: 201-253 South Broadway, Los Angeles, Cal. Letter returned unclaimed from former mine office, Kelvin, Pinal Co., Ariz. J. D. Ferree, president. Lands, 16 claims, in the Riverside district, undeveloped but showing surface ores giving small assay values in copper, and about $7 gold per ton.

LUCKY STRIKE COPPER MINING CO. **WYOMING.**

Dead. Was succeeded by Lucky Strike Mining & Milling Co. Formerly at Lusk, Laramie Co., Wyo.

LUCKY STRIKE MINING & MILLING CO. **WYOMING.**

Office: Rawlins, Carbon Co., Wyo. Mine office: Lusk, Laramie Co., Wyo. Said to have been organized 1904, but company never filed articles of incorporation with the secretary of state of Wyoming. Is controlled, through stock ownership, by Copper Belt Mines Co. Lands, 6 claims, in the unorganized Buffalo Forks mining district, having a 251' crosscut tunnel, said to be in ore, with a surface showing of auriferous and argentiferous copper ore.

LUCKY VERDE COPPER CO. **ARIZONA.**

Dead. Lost lands, 1904. Formerly at Jerome, Yavapai Co., Ariz. Described Vol. III.

LUCY L. MINING & MILLING CO.

Office: 208-69 East Third South St., Salt Lake City, Utah. Mine at Callao, Juab Co., Utah. Frank L. Wilson, secretary and treasurer. Property in the Deep Creek district, shows ores carrying gold, silver, copper, lead, nickel and bismuth, and company claims to have developed ore carrying $160 gold per ton.

LUDWIG COPPER MINING CO.

Dead. Lands sold, 1907, to Nevada-Douglas Copper Co. Mine at Yerington, Lyon Co., Nev. Described Vol. VI.

KUPFERBERGWERK LUDWIGSDORF.

Mine office: Ludwigsdorf, Schlesien, Germany. Prussia.

LUKE CREEK GOLD-COPPER MINING CO.

Office: 435 Temple Court, Minneapolis, Minn. Letter returned unclaimed from former mine office, Marysville, Fort Steele division, B. C. S. D. Pumpelly, *president and general manager*.

Organized under laws of South Dakota with capitalization $1,000,000 $1 par. Lands, 2 claims. Idle several years and apparently moribund

BALDOMERO LUNA.

Office and mine: Chañaral, Atacama, Chile. M. Rojas, superin Property is the Mina Filomena, having steam power and employing men, at last accounts.

LUNA LEAD CO. NEW M

Office: 63 Centre St., New York, N. Y. Works office: Deming, L N. M. Robt. E. Powell, president and general manager. Has a smelter, treating mainly argentiferous lead ores, but also purchases and gold ores.

LUNING CONSOLIDATED COPPER MINING CO. NE

Dead. Formerly at Luning, Esmeralda Co., Nev.

LUNING COPPER CO. NE

Letter returned unclaimed from former mine office, Luning, Es Co., Nev. Lands, 9 claims, said to carry a large body of low grade o ing 10 to 20% in copper tenor, which seems a self-evident contradictio carry mainly copper, with considerable lead, both more or less aurifer argentiferous. Idle and apparently moribund.

LUNING COPPER MINING CO. NE

Dead. Property was near the Nevada Champion and Luning Co Formerly at Luning, Esmeralda Co., Nevada.

LUNING GOLD MINES SYNDICATE. NE

Letter returned unclaimed from former mine office, Luning, Es Co., Nev. A. L. Moore, superintendent. Lands, 5 claims one fraction 6 miles from Luning. Idle.

LUSTRE MINING CO. M

Dead. Succeeded January, 1906, by Lustre Mining & Smelting C merly at Santa Maria del Oro, El Oro, Durango, Mex.

LUSTRE MINING & SMELTING CO. M

Office: 1514 Park Bldg., Pittsburg, Pa. Mine office: Santa M Oro, El Oro, Durango, Mex. H. D. Gamble, president; J. H. Muell president; C H. Tebbetts, secretary; Wm. A. Pomeroy, general m Simon Lambert, mine superintendent; Frank B. Hine, smelter superin Organized January, 1906, under laws of Arizona, with capitalization $5 as successor of Lustre Mining Co.

Lands, 400 hectares, with 372 hectares in mill and smelter sit 19,300 hectares miscellaneous lands, including 6,000 acres of leasehe land. Property is the Magistral mine, opened by 3 tunnels and 9 shaft ing a large body of auriferous, argentiferous and slightly cupriferous with quartz and limestone gangue, carrying 0.5 to 5% copper, with an probably under 1% copper, circa 1 oz. silver and 15 to 20 grams g metric ton.

Equipment is very complete, including a central power plant w 360-h. p. Koerting gas engines and one 190-h. p. gas engine, with a 2,300-volt 3-phase generator, electric hoists, pumps and blowers. Th one 200-h. p. and three 400-h. p. gas producers. Mining machinery 10 hoists, of 100-h. p. to 300-h. p., and two 6-drill Ingersoll-Rand air-c sors.

The company owns 110 buildings, including a considerable nu dwellings, with a 60x110′ adobe carpenter shop and a 30x60′ smithy.

The stamp mill, which is idle, is 70x100′ in size, of wood, cover *galvanized iron*, and has 40 Colorado Iron Works gravity stamps.

The concentrator, also idle, is 60x100′ in size, of wood, covered w

nized iron. Equipment includes 2 Huntington mills, chlorination works and cyanide plant.

The smelter, operating on the semi-pyritic system, has 6 blast furnaces, including two 150-ton McDonald hot-blast furnaces and three 200-ton blast-furnaces, 42x126" at the tuyeres. Air for blast is heated by waste gases in a specially designed McDonald hot-blast heater. Fuel is West Virginia coke. The smelter is said to be putting about 15 tons of ore into one ton of matte, which is sold to the Aguascalientes smelter.

This company and its predecessors have operated for about 25 years, and through former poor management and trouble with refractory ores, accumulated an enormous debt. Experiments with chlorination and cyanide plants failed, but better results are being secured from semi-pyritic smelting. The company has displayed great persistence, and apparently has good prospects of reaching an assured footing.

LUTZ MINES CO. **ARIZONA.**

Office: care of Anton Lutz, Pittsburg, Pa. Mine office: Ft. Huachuca, Cochise Co., Ariz. C. R. Brinton, consulting engineer; A. L. Schultz, superintendent. Organized June 15, 1907, under laws of Arizona, with capitalization $100,000, shares $100 par. Lands, 7 claims, known as the Independence group, on the north fork of Ash Cañon, in the Hartford district of the Huachuca Mountains. Development is by tunnel, planned to be driven 1,200'. Has a 17-h. p. gasoline engine and 6-drill Ingersoll air-compressor.

LYELL BLOCKS CONSOLS MINING CO., N. L. **TASMANIA.**

Dead. Formerly at Mt. Lyell, Montagu Co., Tasmania.

LYELL-COMSTOCK CONSOLIDATED COPPER CO., LTD. **TASMANIA.**

Dead. Succeeded June 1, 1907, by Mount Lyell Comstock Copper Co., Ltd. Formerly at Mount Lyell, Montagu Co., Tasmania.

LYELL PIONEER CONSOLIDATED MINING CO., N. L. **TASMANIA.**

Office: 30 Queen St., Melbourne, Australia. Mine office: Mount Lyell, Montagu Co., Tasmania. C. E. Packer, manager. Capitalization £72,000, shares £1 par. Lands, 56 acres, leasehold, slightly prospected. Idle.

LYELL THARSIS MINING CO., N. L. **TASMANIA.**

Dead. Wound up circa 1906, and lease sold to Mt. Lyell Mining & Railway Co., Ltd. Formerly at Mt. Lyell, Montagu Co., Tasmania. Described Vol. V.

LYMNI COPPER MINING SYNDICATE, LTD. **CYPRUS.**

Office: 32 Great St. Helens, London, E. C., Eng. Mine office: Limassol, Cyprus. J. E. Lomas, chairman; A. C. Gibbons, secretary; Chas. Christian, mine manager; J. M. Ashworth, works manager. Organized March 12, 1897, under laws of Great Britain, with capitalization £23,500, shares £1 par, in 20,000 ordinary and 3,500 preferred shares; issued, £17,342.

Lands, 30 square miles, in the Bellathousa district of Colis, Chrysokhow, Cyprus. Ore occurs as lenses, largest claimed to be 400' wide and 1,400' long, which is something more than doubtful, claimed to carry bornite and chalcopyrite averaging 9 to 10% copper and 3 dwts. silver per long ton, which figures are ridiculous exaggerations. Ore formation apparently is continuous for 3 miles. Development is by 7 shafts, of 150' to 300' depth, and by a 2,100' tunnel. At last accounts mine was not permanently equipped, and development work was in progress, on a small scale.

LYNDHURST (SOUTH AUSTRALIA) COPPER CO., LTD. **SOUTH AUSTRALIA.**

Offices. 8 Broad Street Ave., London, E. C., Eng., and 75 King William St., Adelaide, South Australia. Mine office: Umberatana, Lyndhurst, South Australia. G. B. Elkington, *J. P., chairman; Arthur Hebden, secretary.* Organized Jan. 22, *1907, with capitalization £200,000, shares* £1 par; issued, £180,000.

Is controlled, through stock ownership, by Union Consolidated Copper Mines N. L. Lands, 180 acres, known as the Daly mine, at Umbratana, circa 7½ miles from Lyndhurst, the nearest railway point.

LYNDON MINES CO. NEVADA

Office: Los Angeles, Cal. Mine office: Pioche, Lincoln Co., Nev. E. F. Freudenthal, manager; C. M. Sampson, superintendent. Lands, 9 claims, in the Comet district, 9 miles west of Pioche, showing ore assaying up to 8% copper, 15% lead, 70 oz. silver and $5 to $50 gold per ton, with occasional sphalerite running up to 200 oz. silver and 1 oz. gold per ton.

LYNGENFJORD KOBBERVAERK. NORWAY

Owned by Norwegian-American Copper Mining & Smelting Co.

LYNN CREEK COPPER-GOLD CO., LTD. BRITISH COLUMBIA

Office: 419 Hastings St., Vancouver, B. C. Mine office: Lynn Creek, Vancouver Island, B. C. G. L. Allan, president and treasurer; W. H. Pegram, secretary; W. Thos. Newman, general manager. Organized 1901, under laws of British Columbia, with capitalization $300,000, shares $5 par.

Lands, 6 claims, area 200 acres, 8 miles from Vancouver, in the New Westminster district, showing 6 veins, of which 3, said to range from 5′ to 40′ in width, give assays up to 8.9% copper, 3 oz. silver and $1 gold per ton. Also has a 4′ to 6′ vein of zinc ore, opened by 2 tunnels, giving a back of 800′ to 1,000′. Mine is claimed to have a large amount of ore in sight, and could ship ore by water to various smelters. Idle some years.

LYONS KYLE GOLD MINING & MILLING CO. COLORADO

Mine office: Central City, Gilpin Co., Colo. Property is the Tucker mine, having auriferous and argentiferous lead and copper ores. Has steam power, 5-stamp mill and a 50-ton concentrator.

MAADEN-KENI MINES. TURKEY IN ASIA

Mine office: Baibourt, Trebizond, Turkey in Asia. Were operated, in a small way, by a Greek syndicate, circa 1904. Presumably idle.

MACBETH LEASING CO. IDAHO

Dead. Property, a lease on the White Knob mine, was sold, 1907, to the Empire Copper Co. Formerly at Mackay, Custer Co., Idaho.

MACGREGOR CLONCURRY COPPER MINES, LTD. AUSTRALIA

Offices: Palmerston House, London, E. C., Eng., and 395 Collins St., Melbourne, Australia. Mine office: Cloncurry, Beaconsfield Co., Queensland, Australia. Harvey Patterson, chairman; F. G. Hughes, Melbourne, secretary; E. Hebden, London secretary. Organized Dec. 19, 1906, under laws of Victoria, with capitalization £150,000, shares 10s. par; issued, £137,500. Lands include the Wee Macgregor group, area 55 acres, bought of the Leichhardt Cloncurry Co., Ltd., and the Wallaroo mine, having shafts, 240′ apart, said to show 28′ vein assaying 9% copper in No. 1 shaft, and a 40′ vein assaying 15% copper in No. 2 shaft.

MACK COPPER MINING CO. WYOMING

Mine office: Thermopolis, Frémont Co., Wyo. Organized 1908, with capitalization $1,000,000. Lands are at the head of Mud Creek, 18 miles from Thermopolis. A smelter shipment of one carload of gold and silver ores, made 1908, was said to have returned $43 per ton.

MACKEY-BURROUGHS MINING CO. COLORADO

Mine office: Central City, Gilpin Co., Colo. Has auriferous and argentiferous copper ore. Has steam power. Presumably idle.

MACKINAW COPPER CO. IDAHO

Mine office: care of E. Daft, manager, Hailey, Custer Co., Idaho. Lands, 3 claims, well timbered and watered, 25 miles east of Hailey and connected *herewith by a good* wagon-road, at the head of Lost River, in the Lost River *Mountains.* Mine has a 100′ shaft in a 3′ to 5′ vein between limestone and

showing chalcopyrite with quartz gangue assaying up to 15% cop-

AW MINING & MILLING CO. **WASHINGTON.**
office: Monte Cristo, Snohomish Co., Wash. Has ore giving fair
es in copper and nickel. Idle several years.

R SYNDICATE, LTD. **AUSTRALIA.**
: 8 Regent St., London, S. W., Eng. Mine office: Moonmera,
, Australia. T. D. C. Parker and R. W. McKay, permanent direc-
nized Jan. 13, 1906, under laws of Great Britain, with capitalization
res £1 par, to take over the Mount Morgan copper mines, area 200
esumably abortive.

-MEXICO MINING CO. **MEXICO.**
Madera, Cal. Mine office: Hostotipaquillo, Ahualulco, Jalisco,
H. Hunt, general manager. Organized circa 1904. Lands, 16 per-
showing auriferous copper ore.

MINING CO. **ARIZONA.**
612 Grant Bldg., Los Angeles, Cal. Mine office: Tucson, Pima
J. Hoffman, president; A. Erickson, vice-president; H. E. Brandt,
nd treasurer; preceding officers, W. P. Ascott, F. Gillelen, L. Lem-
T. E. Magee, directors. Organized November, 1907, under laws of
ith capitalization $1,000,000, shares $1 par.
, 16 claims, area circa 200 acres, south of Tucson, near Old Baldy
e Santa Rita Mountains, showing a 5' vein carrying auriferous and
s bornite and chalcopyrite, developed by a 100' tunnel.

HERMANOS. **MEXICO.**
Parras, Coahuila, Mex. Mine office: Santo Domingo, Iturbide,
, Mex. Own the Francisco Diaz mine, adjoining the Hathaway.
s Brothers are the principal owners and managers of the Compañia
a de Torreón, and are noted as among the most enterprising, capable
ally solid mine and smelter operators of the Republic.

IAN MINE. **MONTANA.**
care of Estate of Levi Z. Leiter, owner, Chicago, Ills. Mine office:
ilson Co., Mont. E. J. Trerise, superintendent. Ores carry gold,
copper. Has steam power, concentrator and 60-ton cyanide plant.
y idle.

D EXPLOTADORA DE MINAS DE MAGALLANES. **CHILE.**
and mine: Punta Arenas, Magallanes, Chile. Organized Oct. 20,
r laws of Chile, with capitalization £15,000, shares £1 par.

E MINING CO. **ARIZONA.**
office: Johnson, Cochise Co., Ariz. Has 2 shafts and shipped, 1907,
of carloads of 8% copper ore.

AGDALENA. **GERMANY.**
office: Mondorf, Rheinpreussen, Germany. Has sulphide lead and
and at last accounts was a trivial producer.

NA COPPER CO. **NEW MEXICO.**
31 First National Bank Blk., Colorado Springs, Colo. Mine office:
, Socorro Co., N. M. Jos. C. Colligan, president; Edwin Arkell,
; F. H. Dunnington, secretary and treasurer; E. E. Thomson,
; P. E. Johnson, mine superintendent. Organized March 7,
r laws of Arizona, with capitalization $2,500,000; shares $5 par.
claims, area 240 acres, showing granite, porphyry and limestone,
a 6' fissure vein, opened by 4 shafts, of circa 30' average depth,
ples are running 2 to 20% copper, 5 oz. silver and $2 gold per ton,
gangue. Also has zinc and lead sulphides.

MAGDALENA SMELTING & MINING CO. MEXI

Office: 208 Fifth Ave., New York, N. Y. Mine office: Magdalena, Tux pec, Oaxaca, Mex. Henry W. Catlin, president; Lloyd R. Hamer, vice-pre dent and manager; Marion DeKalb Smith, treasurer; Jas. L. Leeds, secretar John H. Williams, general manager. Organized August, 1907, under laws New York, with capitalization $5,000,000. Lands, 160 hectares, showing mai ly silver-lead carbonates. Reduction plant, known as the Magdalena, was t first modern smelter in the state of Oaxaca, blown in July, 1906, with dai capacity of 50 tons, which company planned increasing to 150 tons. In han of a receiver, August, 1908.

MAGDALENE MINE. NATA

Mine office: Undweni, Zululand, Natal. Lands, near the Vryheid borde show carbonate, silicate and sulphide ores, latter zinciferous, of high averag copper tenor, occurring irregularly, mainly as impregnations. Was under d velopment at last accounts.

MAGENTA GOLD MINING CO. COLORAD

Mine office: Granite, Chaffee Co., Colo. Has gold, silver and copper ore and steam power. Presumably idle.

MAGGIE MURPHY COPPER CO. WYOMIN

Office: 16 State St., Boston, Mass. Mine office: Douglas, Converse C Wyo. Hon. Chas. S. Ashley, president; John O'Neil, vice-president; A. Lee, secretary; Dr. F. M. Kennedy, treasurer; preceding officers, Geo. Hedge and Capt. Robt. A. Hammond, directors. Organized August, 1904, und laws of Wyoming, with capitalization $1,000,000, shares $1 par.

Lands, 12 claims, area 180 acres, also a 60-acre millsite, all fairly ti bered, on the northwestern side of Horseshoe Cañon, in the Laramie Pe district, showing country rock of granite, fissured with diorite, gneiss a schists, carrying 7 contact veins between gneiss and mica-schist, of which o under development, with a 114′ shaft, ranges 30′ to 60′ in width, carry covellite, bornite and chalcopyrite, associated with pyrrhotite, assaying 1 6% copper, 2 to 9 oz. silver and 40 cents to $4.50 gold per ton.

COMPAÑIA MINERA DEL MAGISTRAL. MEXI

Dead. Formerly at Santa Bárbara, Hidalgo, Chihuahua, Mex. Fully scribed Vol. VII.

NEGOCIACION MINERA DEL MAGISTRAL, S. A. MEXI

Office and mine: Apartado 22, Zacatecas, Mex. Dudley H. Norris, pr dent; Chas. O. Gilbert, manager. Mine has a small branch line, connect with Magistral Siding, on the Mexican Central Railway, near the city Zacatecas. Mine formerly turned out copper in the form of bluestone, magistral, for use in reducing the silver ores of Zacatecas. Has steam pow Smelter site is at Magistral Siding, and a concession was secured there 1907. Plant is planned to be of about 250 tons daily capacity, to treat cus ores, as well as ores from the Mina Magistral. Development and equipm are said to have been paid for out of earnings of the mine, which, 19 shipped about 100 tons of copper ore weekly. Employs circa 150 men. P duction, 1907, estimated at 500,000 lbs. fine copper.

MINAS MAGISTRAL y ANEXAS. MEXI

Owned by Las Moras Copper Mining Co.

MAGISTRAL COPPER MINES CO. MEXI

Dead. Formerly at Magistral, Chihuahua, Mex.

MAGISTRAL MINING CO. MEXI

Dead. Formerly at Ameca, Jalisco, Mex.

MAGISTRAL MINING SYNDICATE. MEXI

Dead. Was succeeded, 1907, by Los Angeles & Jalisco Mines Co. F merly at Etzatlan, Ahualulco, Jalisco, Mex.

MAGISTRAL SMELTING CO. MEXICO.

Mine and works office: Santa Barbara, Hidalgo, Chihuahua, Mex. John Shepherd, general manager; H. L. Snyder, smelter superintendent. Lands ...e leased from the Compañia Minera del Magistral, controlled by Governor ...rique C. Creel. Mine, 15 miles from Chihuahua y Pacifico railroad, having ...00' shaft, carries extensive contact deposits between limestone and porphyry ... low grade copper ore. Has steam and gasoline power. Is said to have a ...50-ton smelter. Mine must be worked on a large scale to be profitable, as ...e is low in tenor, though existing in large quantities.

MAGNETAWAN MINING CO. ONTARIO.

Dead. Formerly at Burks Falls, Parry Sound district, Ont.

MAGNOLIA GOLD & COPPER MINING CO.

Dead. Formerly had an office at Seattle, Wash.

MAGPIE GOLD & COPPER CO. WYOMING.

Office and mine: Encampment, Carbon Co., Wyo. *J. F. Merry, president;* ...E. Ferree, secretary; Chas. D. Terwilliger, treasurer. *Organized Oct. 6,* ...902, under laws of Wyoming, with capitalization $1,000,000, shares $1 par; ...ued, $650,850. Lands, 3 claims, *patented, area 60 acres, on the south* ...ork of the Encampment river, 5 miles from Encampment, *opened by a 200'* ...nnel showing medium grade chalcopyrite.

MAGUS MINING CO. WASHINGTON.

Office: 712-1241 G St., N. W., Washington, D. C. *Letter received as* ...dressed from former mine office, Silverton, Snohomish Co., Wash. *Algernon* ...Berg, president; Henry M. Kingsley, secretary. *Organized under laws of* ...Illinois, with capitalization $1,000,000, shares $1 par. *Lands, about 24 claims,* ...formerly owned by Forty-Five Consolidated Mining Co., in the Bolingbroke district, showing auriferous and argentiferous copper ores, with values mainly ...in the precious metals. Has a hydro-electric power plant and air compressor. ...Title for 3 years, until taken over June 1, 1905, by present company. *Output* ...only like since 1907.

MAHARAHARA COPPER CO. NEW ZEALAND.

Mine office: Waiuville, N. Z. Has a large ore body, under development, ...and sold small shipments, 1907, to Melbourne, for smelting.

MAINE & MONTANA COPPER CO. MONTANA.

Office: P. Haverhill, Me. Mine office: Butte, Silverbow Co., Mont. Mr. ...

COMPAÑIA MINERA DE MAIPO. CHILE.

Mine office: Cajon de Maipo, Victoria, Santiago, Chile. Works: Mina ...El Toro, Victoria, Santiago, Chile. $9 per metric ton to the railroad, burns imported coke, costing 47 pe ton, with a little local wood. Equipment includes four 54" circular jacket blast-furnaces and two 36x72" quadrangular blast-furnaces, blowers. The converter department has 6 stands and a Vulcan air-com shells being 1.68x1.82 meters in size. Product is Chile bars, averaging in copper tenor. In 1903 the smelter employed 150 men, at average w 2 pesos daily.

Production, 1903, when this was the second largest copper prod Chile, was 17,997 metric tons of ore, averaging circa 7.9% copper, and 2,822,990 lbs. fine copper. Mining and smelting costs are low, and copper is said to cost only £30 per long ton, laid down in London, whic seems unduly low. The company employs circa 600 men, and is enter and vigorously managed.

JOAQUIN MAIZ y CA. M

Office and mine: Villa Aldama, Décimo, Nuevo León, Mex. C. manager. Property is the Blanca y Anexas mines, developed by tunn ducing copper ore with a force of about 50 men, at last accounts.

SOCIÉTÉ ANONYME DES MINES DE CUIVRE DE MAJDANPEK. S

Office: Brussels, Belgium. Mine office: Majdanpek, Servia. E 500 men. Emile Thorez, chairman; Emile Fromont, manager; Chas. B secretary; Leo Zenzes, manager; Alfred Müller, smelter superintendent Hermann, engineer. Organized 1903, under laws of Belgium and Servi capitalization 5,000,000 francs, shares 500 francs par.

Lands include mineral concessions covering 18,800 hectares, 1(from the Danube and circa 75 miles southeast of Belgrade, showing t and limestone carrying native copper, malachite, azurite and chalc commercial ores being almost exclusively sulphide, and mainly chalc with some chalcocite, bornite and covelite, associated with pyrite an sional magnetite, in a quartzose gangue, ores averaging about 3% cop oz. silver and 75 cents gold per ton. The property was worked on a scale, under former ownership, and was estimated, 1906, by the comp show 600,000 tons of ore, with 250,000 tons blocked out for stoping, figures seem high.

Transportation is furnished by a 10-mile Bleichert aerial tram fr mine to the Danube, and there is a half-mile Bleichert aerial tram t the mine and smelter.

The smelter formerly had three 40-ton Hereshoff water-jacket bl naces, and a 200-ton blast furnace was installed, 1907, to employ the E pyritic process of smelting. Product is blister copper, averaging cir copper, 14 oz. silver and 1.5 oz. gold per ton. The company is said to 250-ton leaching plant, for treating of low grade pyritic ores.

MAJESTIC COPPER CO.

Office: 1102-79 Milk St., Boston, Mass. Mine office: Milford, Bea Utah. E. E. Abercrombie, president. Organized June 18, 1904, under Maine, with capitalization $450,000, shares $10 par. In November, 190 talization was reduced to $400,000, shares $1 par, and increased to $ shares $1 par. Bonds, $1,000,000 authorized, $514,000 outstanding. C was organized as successor of Majestic Copper Mining & Smelting (the old corporation continues in existence, and the Majestic Copper C tically has been succeeded by the Majestic Mines Co. Fully described

MAJESTIC COPPER MINING & SMELTING CO.

Office: 1102-79 Milk St., Boston, Mass. Mine office: Milford, *Co., Utah.* To all practical intents and purposes was succeeded, 1 *Majestic* Copper Co., which was succeeded, 1908, by Majestic Mines

the Majestic Copper Mining & Smelting Co. remains in existence. The company became bankrupt, circa 1904, but eventually paid 100 cents on the dollar. Very fully described Vol. IV.

MAJESTIC MINES CO. **UTAH.**

Office: 1102-79 Milk St., Boston, Mass. Mine office: Milford, Beaver Co., Utah. W. D. Elwell, president; John M. Dick, vice-president; D. J. Flanders, secretary and treasurer; Alex J. Moffatt, manager. Organized May, 1908, with capitalization $5,000,000, shares $5 par, practically as successor of Majestic Copper Co. and Majestic Copper Mining & Smelting Co. On Oct. 1, 1908, owned circa 80% of the outstanding bond issue, $514,000, of the Majestic Copper Co. Stock of the new company was exchanged for bonds of the old company, on the basis of 900 shares of stock for each $1,000 bond, and holders of stock in the old company were given new stock, pari passu, on payment of an assessment of 15 cents per share. The floating indebtedness of the old company is said to have been paid off, and, by retiring the bonds, the present company is placed in better shape, financially, than any of its predecessors, which suffered from heavy loads of debt.

Lands, 120 claims, area 2,450 acres, also an 80-acre smelter site and 1,100 acres miscellaneous lands, in 8 groups, located in 5 districts of Beaver county, showing about 100 ore bodies, carrying copper, gold, silver, platinum, lead, cobalt, bismuth, vanadium and uranium. Copper ores include all of the principal oxides, carbonates and sulphides, also occasional native copper, and many of the rarer copper minerals, ores ranging from 2 to 85% in copper tenor, with estimated average values of 12% copper, 12 oz. silver and $3 gold per ton, with large percentages of lead, but these figures, made by the former management, are much too high. There are 18 shafts, of 100′ to 400′ depth, also many tunnels and innumerable test pits, with circa 6 miles of workings. Former management estimated 1,000,000 tons of ore in sight, with 500,000 tons blocked out for stoping, but these estimates were greatly exaggerated, and must have been known to be such when put forth, while stock was being fed to the public. Some of the properties were worked formerly for silver, but the silver-copper ores at and near surface gave way to copper-silver ores at depth, all ores being more or less auriferous.

The company has platted the townsite of Lewisville, where the smelter is located. The mines and smelter are served by the Oregon Short Line railroad.

The O. K. mine, 7 claims, is the principal property of the company, and is opened by a 3-compartment 400′ shaft, in a vein up to 20′ in width, with considerable development on the 300′ and 400′ levels. A smelter shipment, in 1, of 258 tons of ore, returned 40% copper, 7.5 oz. silver and $3.80 gold per ton. This mine has more or less ore blocked out, apparently in a stockwerk of a 250′ width, carrying stringers of high grade ore.

The Harrington-Hickory group, 25 claims, partly fractional, has two 400′ shafts, the main shaft having 3 compartments, with circa 40 pits and shallow cuts showing ore. The property shows numerous fissure veins, intersected by cross-veins, both approximately vertical, and in addition has a series of bedded veins, dipping at 30° to 35°, giving three separate intersecting systems of ore bodies. Values are mainly in lead, ores assaying 2 to 3% copper, 40 to 50% lead, up to 50 oz. silver and circa $1 gold per ton.

The Old Hickory group, 9 claims, has a gossan of 250′ estimated width, on a vein of 40′ to 200′ width, opened by circa 50 pits and shafts, deepest showing ores assaying 4 to 5% copper, with combined gold and silver values of $2 to $4 per ton.

The Vicksburg group, 4 claims, formerly worked for gold, has 3 practically vertical fissures, *of 2′ to 20′ width, with* mineralized cross-veins, opened

by numerous shallow pits and shafts, and a 2-compartment working shaft.

The Hoosier Boy group, 10 claims, has a 250′ vertical shaft in limestone carrying auriferous and argentiferous copper and lead ores.

The Larkspur group, 8 claims, has a 60′ contact deposit between granite and limestone, carrying irregular bunches of high-grade ore.

The Copperfield group, 17 claims, lies between the O. K. and Old Hickory mines, and is undeveloped.

The Apex group, 4 claims, adjoins the Old Hickory mine, and is practically without development.

The Ben Harrison group is undeveloped.

Equipment includes steam, gasoline and electric power, with a 34-h. p. Fairbanks & Morse hoist, Ingersoll-Sergeant air-compressor and Rand drills. There is an undeveloped water power on Beaver River, 35 miles distant, said to be capable of generating circa 2,000 h. p. and transmitting same electrically to the mine and smelter, at a cost of circa $100,000 for a hydro-electric installation and transmission line.

The reduction works, at Lewisville, 3 to 8 miles from the various mines, include a sampling mill and smelter. The smelter building, of steel frame, on stone foundations, has room for four 250-ton blast-furnaces, with necessary machinery, and has a 250-ton blast-furnace for copper and a 100-ton lead stack, with Nesmith hot-blast stoves, heating the air to 800° F. before entering the tuyeres. The smelter is small and already antiquated, though scarcely warmed, having run only 40 days, giving half the claimed duty, and smelting only about 5,000 tons of ore.

On a test-run, 1903, returns were 5.1% copper, 3.8 oz. silver and $1.20 gold per ton. Apparently the copper ore as a whole averages only about 2% in tenor, and is silicious. There are numerous bodies of high grade ore, but the property, as a whole, suffers from diffusion of wealth, there being numerous points at which small quantities of high grade ore are available, with a considerable tonnage of low grade ore partially developed. The company has been reconstructed repeatedly, and the mine has redeemed none of the exaggerated promises made for it. The present company, however, seems built more solidly than its predecessors, all of which were saddled with debts beyond their power to carry.

MAJOR EVANS CONSOLIDATED MINING & MILLING CO. UTAH.

Office and mine: American Fork, Utah Co., Utah. John J. Jones, president; Jos. J. Jackson, vice-president; F. A. Jackson, secretary and treasurer; preceding officers, F. J. Adams and Jas. H. Clark, directors. Organized circa January, 1908. Lands are in American Fork Cañon.

MAKU (NORTH CHARTERLAND) COPPER SYNDICATE, LTD. RHODESIA.

Office: 2 London Wall Bldgs., London, E. C., Eng. North Charterland Exploration Co., managers. Organized Jan. 13, 1906, with capitalization £5,000, shares £1 par, to acquire copper properties from the North Charterland Exploration Co., Ltd. Apparently moribund.

MALACHITE COPPER CO. ARIZONA.

Dead. Formerly at Williams, Coconino Co., Ariz.

MALACHITE COPPER CO. NEVADA.

Office: care of Willard F. Snyder, Salt Lake City, Utah. Mine office: Yerington, Lyon Co., Nev. Has a shaft, said to show a considerable body of sulphide ore of fair copper tenor.

MALACHITE COPPER-GOLD CO. CALIFORNIA.

Dead. Formerly at Daggett, San Bernardino Co., Cal. Described Vol. VII.

***MALDEN* MINING, MILLING & MANUFACTURING CO.** WASHINGTON.

TH COPPER MINING CO. **WYOMING.**

. Formerly at Saratoga, Carbon Co., Wyo.

TH COPPER MINING CO. OF MAINE. **CALIFORNIA.**

: 50 Congress St., Boston, Mass. Mine and works office: Kennett, ., Cal. Employs 1,000 men. Wm. C. Sharp, president; F. W. Bachel- tary and treasurer; A. S. Haskell, manager; Robt. E. Hanley, mine ndent; Jas. H. Kerwin, smelter superintendent; A. P. Anderson, en- Organized Aug. 2, 1904, under laws of Maine, and is controlled, through of entire stock issue, by the United States Smelting, Refining & o.

s, 14 claims, area 280 acres, also an 80-acre smelter-site, and miscel- nds giving total holdings of 1,400 acres, 3½ miles from Kennett, on ckbone Creek, in the Big Backbone district. Lands are well tim- th numerous mountain streams available for water supply, and the y is very rugged, mines being opened near the tops of the moun- nds *have been probed extensively* by diamond drill borings. A

$90,000 bond on the Friday-Lowden group was relinquished, 1907. The Ra snake mine is supposed to be held under bond. Property includes a bond lease on the Wood & Shelden claims, at Rainbow, on the headwaters of the ramento River, where development by tunnel is under way. Lands inclu considerable limestone deposit, used for fluxing.

The Quartz Hill mine, in the Old Diggings district, is held under a 5- bond and lease, dated 1906, with privilege of extension for 5 years furt subject to minimum extraction of 15,000 tons of ore yearly. Product of Quartz Hill is silicious fluxing ore exclusively, said to carry $6 to $8 gold ton, which probably is a considerable overestimate.

The Mammoth group is on the western side of the Sacramento Ri Country rock is mainly rhyolite, somewhat altered in places, with some sl and considerable porphyry, carrying long flat-lying lenses of ore that is mai slightly zinciferous chalcopyrite, disseminated in pyrite, both being aurifer and argentiferous, with an average of circa 3% copper, 2 oz. silver and cents gold per ton, with about 40% iron and up to 40% sulphur. Mine w said, August, 1908, to be yielding about 75 lbs. fine copper per ton. There a several ore bodies, the largest being 228′ wide and circa 500′ long, and the m has upwards of 2,000,000 tons of ore in sight, being opened considerably ahe of immediate requirements. Development is exclusively by tunnels, of wh there are 4, having ore bins at the portals. In August, 1907, the fourth tun was started, this being 18′ wide, with double tracks, having electric haula

Equipment includes a 40-drill air-compressor and two 15-drill Rand a compressors, with a 5-drill compressor at the Quartz Hill mines.

Buildings at the mine include a smithy, boarding-house and a hospi with accommodations for 20 patients. Water is piped to the mine and smel from the Mayflower claim.

Both mine and smelter are operated by electric power, secured from t Northern California Power Co., at a very reasonable rate, delivered to t power-house at a voltage of 2,000, the company requiring about 3,000 h. p. the operation of its mine and works.

An aerial tram of 13,200′ length, between the mines and smelter, is in t sections, the upper having a grade of 22% from the mine to the midway s tion, the upper section being operated by gravity, in counterbalance, a power generated by a retarding engine, which actuates an air-compres The lower section has sufficient grade for the loaded buckets to bring b empties. The tram line has a nominal capacity of 1,600 tons in 24 ho carrying 1,100-lb. buckets at intervals of 150′, with wooden supporting tow at intervals of 100′. In actual practice, the aerial tram proved to have ab 800 tons daily capacity only.

Owing to the inadequacy of the aerial tram, a 3,500-ton combinat ground-tram has been built, on somewhat novel lines, to meet peculiar l requirements. The ground tram includes 3 miles of standard-gauge railw from the smelter to the foot of the gravity road, the latter, 3,000′ long, c necting at the upper end with a 2-mile electric line leading to the mine. Th also is a 3-mile narrow-gauge railroad to the Quartz Hill mine, with 2 l motives.

The smelter, one-half mile from Kennett, 2½ miles southeast of the m and 2,200′ lower, occupies a site of 80 acres, and is the largest in Califor being of 1,800 tons daily capacity. The works, as built originally, at a c of $500,000, were of 1,000 tons capacity, but were greatly enlarged, 1907. buildings are of steel, all material is handled by gravity, and the plan operated on three 8-hour shifts. The works include a sampling mill.

The bin-house, of steel frame, for storage of ore, coke and limestone, *214′ long,* with capacity for 2,500 tons of custom ore and 100 tons of flux

copper tenor, this carrying considerable iron, which was valuable for fluxing purposes, but production is now blister copper, sent to the Atlantic seaboard for refining. The first furnace was blown in Oct. 6, 1905, and production, October, 1908, was circa 1,100 tons of smelting ore daily, which will be increased eventually to at least 1,500 tons daily. The property is valuable, and the equipment is adequate and efficient, while the management is thoroughly competent and is securing excellent results.

MAMMOTH COPPER & SMELTING CO. **ARIZONA.**

Dead. Lands taken over by Imperial Copper Co. Formerly at Red Rock, Pinal Co., Ariz. Described Vol. IV.

MAMMOTH GOLD MINING CO. **COLORADO.**

Office: 1104 Marquette Bldg., Chicago, Ills. Mine office: Central City, Gilpin Co., Colo. Ores carry gold, silver and copper. Has steam power. Presumably idle.

MAMMOTH LODES MINING CO. **BRITISH COLUMBIA.**

Office: care of H. O. Proebstel, Portland, Ore. Organized under laws of Oregon. Lands, known as the Colorado group, in the Cascade Mountains, Yale district, British Columbia, are claimed to show veins of 40′ to 250′ width, traceable for more than two miles, and it is claimed that smelting tests have given 15 to 20% copper and $12 gold per ton, these figures being, in themselves, ample evidence of their own untruthfulness, or of the unfair nature of the "test." Idle and apparently moribund.

MAMMOTH MINE. **ARIZONA.**

Owned by Calumet & Arizona Mining Co.

MAMMOTH MINING CO. **UTAH.**

Office: 41 Hooper Blk., Salt Lake City, Utah. Mine office: Mammoth, Juab Co., Utah. Samuel McIntire, president and general manager; Samuel McIntire, Jr., vice-president and superintendent; R. M. Wilkinson, secretary. Organized under laws of Utah, with capitalization $400,000, shares $1 par. Regular monthly dividend rate is 5 cents per share, or $20,000. Annual meeting, first Tuesday in February.

The mine, opened circa 1870, is extensively developed and has a 2,300′ main shaft, with good copper ore on the 2,200′ level. Mine carries auriferous and argentiferous lead and copper ores, principal values being in silver and lead.

The mill has 60 stamps. Production, 1907, was 477 carloads of ore. Litigation with Grand Central Mining Co. resulted in an adverse verdict for $149,812. Property is valuable and seems prudently managed.

MAMMOTH MINING & POWER CO. **MONTANA.**

Mine office: Mammoth, Madison Co., Mont. Allan C. Sanders, superintendent. Has auriferous copper ores. Equipment includes a 50-ton concentrator. Employed circa 20 men, at last accounts.

MAMMOTH TUNNEL & MINING CO. **COLORADO.**

Office: 403-331 Fourth Ave., Pittsburg, Pa. Mine office: Silverton, San Juan Co., Colo. A tunnel scheme, regarded with suspicion.

MANNASSAS-GAP COPPER-MINE, INC. **VIRGINIA.**

Dead. Succeeded, circa 1907, by Moqui Copper Co. Formerly at Reager, Rappahannock Co., Va. Fully described Vol. VII.

MANCAYAN COPPER SYNDICATE, LTD. **PHILIPPINES.**

Dead. Voluntarily wound up, August, 1902. Formerly in the Mancayan district, Island of Luzon, Philippines.

MANCHEGAN MINES, LTD. **SPAIN.**

Office: Clock House, Arundel St., Strand, London, W. C., Eng. Mine office *Fuencaliente*, Cuidad Real, Spain. H. Cossins, secretary. Organized Nov. 15

1905, under laws of Great Britain, with capitalization £5,000, shares £1 par; issued, £4,480. Property is the San Bartolomé III mine and sundry share interests.

MANCHESTER ZINC & COPPER CO., LTD.

Dead. Voluntarily liquidated, April 15, 1901.

"MAN" GROUP. **ARIZONA.**

Office and mine: care of Otto W. H. Schley, owner, Vail, Pima Co., Ariz. Lands, 4 claims, area 80 acres, in the Helvetia district, 9 miles southeast of Vail, formerly held by Bradford Development Co., showing Carboniferous limestone, intruded by porphyry dikes, latter considerably altered, with extensive outcrops of oxide and carbonate ores, succeeded at shallow depth by sulphides. Property shows several veins of 6" to 5' width, and has a 2-compartment shaft of 105', in porphyry, showing stringers of quartz carrying copper sulphides. Shipments of 100 tons, to El Paso smelter, gave returns of 9.5 to 17% copper, 8 to 16 oz. silver and $8.50 gold per ton. The ore carries an excess of iron, and smelts readily. Idle several years.

MANHATTAN CONSOLIDATED MINING & SMELTING CO. **WYOMING.**

Office: La Crosse, Wis. Letter returned unclaimed from former mine office, Encampment, Carbon Co., Wyo. Wm. Doerflinger, president; Chas. H. Freeman, vice-president; P. J. Bott, secretary; Herman Tillman, treasurer; F. L. Smith, superintendent. Organized Feb. 3, 1902, under laws of Wyoming, with capitalization $800,000, shares 10 cents par. Property has sundry pits and trenches, showing a vein of 4' to 12' width, giving ore assaying 3 to 30% copper.

MANHATTAN COPPER MINING CO. **ARIZONA.**

Dead. Merged, 1902, in Troy-Manhattan Copper Co. Formerly at Troy, Pinal Co., Ariz.

MANHATTAN COPPER MINING & MILLING CO. **NEVADA.**

Office: care of Hon. A. B. Lewis, president, 100 Broadway, New York, N. Y. Mine office: Pioche, Lincoln Co., Nev. E. F. Freudenthal, manager. Is controlled, through stock ownership, by the Nevada-Utah Mines & Smelters Corporation, and apparently succeeded the Manhattan Gold & Copper Mining Co. Lands, 2 groups, one east of Pioche and one in the Stampede Gap section. The Pioche group includes the Revenue, Telephone and Alps mines, with 100' and 140' shafts, showing ore assaying well in gold and silver. Stampede Gap property has auriferous and argentiferous copper and lead sulphides, opened by a shallow shaft and 2 tunnels, with circa 2,000' of underground workings.

MANHATTAN DEVELOPMENT CO. **ARIZONA.**

Office: Postoffice Blk., Houghton, Mich. Mine office: Paradise, Cochise Co., Ariz. J. H. Rice, president; W. G. Rice, secretary and treasurer; preceding officers, Thomas F. Cole, Nathan M. Kaufman, Samuel R. Kaufman, Allen F. Rees and Norman W. Haire, directors; Fred. W. Hoar, superintendent. Organized March, 1905, under laws of Arizona, with capitalization $200,000, shares $10 par; $5.50 paid in.

Lands, 37 claims, area 600 acres, fully paid for, in the California district, carrying upwards of 2 miles of the outcrop of a mineralized zone lying west and north of the holdings of the Chiracahua Development Co. Development is by several shallow shafts, deepest 80', and a 450' crosscut tunnel, latter showing leached ore and a little high-grade ore, with indications of permanent values at greater depth. Management is good, and property is considered promising. Idle, but resumption planned for 1909.

MANHATTAN ELY COPPER CO. **NEVADA.**

Office: 25 Broad St., New York, N. Y. Mine office: Ely, White Pine Co., Nev. Col. Luther Martin, president; Jos. H. Everett, vice-president; Willard B. Moore, secretary and treasurer; preceding officers, Jos. P. McQuaide,

Mortimer C. Mack, F. S. Pheby and J. Arthur Keagy, directors. Organi
1907, under laws of Arizona, with capitalization $5,000,000, shares $5 p
Lands, 10 claims, area 200 acres, in the western portion of the camp, not
from claims of the Giroux Consolidated.

MANHATTAN GOLD & COPPER MINING CO. NEVA

Dead. Lands sold, June 10, 1907, to Nevada-Utah Mines & Smelters C
poration. Formerly at Pioche, Lincoln Co., Nev.

MANHATTAN MINE. MAI

Letters returned unclaimed from former office, care of J. S. Moore &
owners, Portland, Me., and from former mine office, West Brookville, Hanc
Co., Me. Property included the Manhattan and Tapley mines, showing
assaying about 5% copper, which were reopened, 1907, after many years
idleness.

MANHATTAN MINING CO. IDA

Letter returned unclaimed from former office, Oakesdale, Wash. M
office: Saltese, Missoula Co., Mont. J. E. Bailey, president; O. H. Linn, su
intendent. Lands, 10 claims, shortly northwest of the Monitor mine, on
Idaho side of the divide of the Bitter Root Mountains, opened by a 350' t
nel, showing a 7' vein assaying up to 12% copper and $8 gold per ton.

MANICA COPPER DEVELOPMENT CO., LTD. PORTUGUESE EAST AFRI

Office: Finsbury Pavement House, London, E. C., Eng. Mine offi
Sierra Isataca, Macequece, Mozambique, Portuguese East Africa. W. E. La
secretary; W. M. Cairncross, mine manager. Organized May 26, 1902, un
laws of Great Britain, with capitalization £150,000, shares £1 par; issu
£115,110. Debentures, £10,000, at 6%.

Lands, 411 claims, area circa 900 acres, in the Sierra Isataca, midway
tween Macequece and Umtali, Rhodesia, lying 8 miles northeast of Umt
near the Edmundian mine, but in Portuguese territory. Three copper outcr
have been located, one of which is a vein of about 4' width, opened by a sh
which, on the 300' level, shows 3 distinct veins of copper ore with cal
gangue. Ore reserves are estimated at 12,000 long tons, of 7% average cop
tenor. Lower levels also carry galena and gold ore, there being a narrow p
streak of latter assaying up to 391 oz. gold per long ton. Planned, early 19
installing a complete machinery plant, including a 20-ton mill and a hyd
electric power installation on the Zambesi River, 3 miles from mine.

MANICA COPPER EXTENSION, LTD. PORTUGUESE EAST AFRI

Dead. Registered, 1903, with capitalization £1,000. Formerly at Sie
Isataca, Macequece, Mozambique, Portuguese East Africa.

Offices: 615 Salisbury House, London, E. C., Eng. C. Hartridge, ch
man; J. W. Youd, secretary. Organized Jan. 23, 1896, as reconstruction
Western Explorers, Ltd., and reorganized Dec. 3, 1904, under laws of Guern
with capitalization £100,000, shares £1 par; issued, £55,893. Lands include
copper claims, 770 gold claims, 16 acres of townsite lands and circa 25,
acres of miscellaneous lands, said to be rubber-bearing. Idle.

MANILLA MINING CO. ARIZO

Office: care of N. L. Houston, manager, Peoria, Ills. Mine office:
Huachuca, Cochise Co., Ariz. Lands are sundry claims in the Huachuca Mo
tains, opened by a 220' shaft, showing argentiferous copper and lead sulphi
Has a steam plant, with hoist, pump and air-compressor. Idle.

MANITOU MINING CO. MICHIG

Office: 12 Ashburton Place, Boston, Mass. Operating office: Calu
Mich. Mine office: Delaware Mine, Keweenaw Co., Mich. Quincy A. Sh
Jr., president; Rodolphe Agassiz, vice-president; preceding officers, Alexa

Agassiz and Francis L. Higginson, directors; Jas. MacNaughton, general manager; Geo. A. Flagg, secretary and treasurer. Organized June 26, 1905, under laws of Michigan, with capitalization $500,000, shares $25 par. Fiscal year ending April 30, 1908, showed a debit balance of $194,971.

Lands, 38,693 acres, including the Delaware, Eagle River, Eagle Harbor, Montreal and New Jersey mines, all early-day mines of Keweenaw county.

The old Delaware mine, now known as the Manitou, and formerly known as the Conglomerate and Lac La Belle, has circa 3,700 acres of mineral lands and upwards of 17,000 acres of miscellaneous lands, with a water frontage of 10 miles on Lake Superior, and the entire frontage on Lac La Belle. This property sunk, under various ownerships, circa $3,700,000, before passing to the present company, and the old mine is exhaustively described in Vol. II. The old Delaware mine, opened on the Allouez conglomerate, has 4 shafts, of 300′ to 900′ depth, the Allouez bed underlying the greenstone, and dipping northward at an angle of 25° 30′. The old Delaware workings were unwatered, and found to give a fair showing of copper, and copper was found in the Meadow amygdaloid, underlying the conglomerate.

The Delaware tract was tested by diamond drill borings, and on an amygdaloidal bed, identified as the Kearsarge lode, 3 pits, deepest 65′, were sunk, giving a fair showing of copper. The Kearsarge bed is 7,800′ southward from the base of the greenstone.

Principal development of the Manitou is on an amygdaloidal bed, known as the Montreal River lode, lying 770′ south of the base of the greenstone bluff. The Montreal River bed dips at about 28° and is 12′ to 14′ in width, showing considerable copper, but work was suspended, 1907, as results were not satisfactory.

MANITOU MINING & MILLING CO. **COLORADO.**

Dead. Formerly at Bonanza, Saguache Co., Colo.

MANSFELD'SCHE KUPFERSCHIEFERBAUENDE GEWERKSCHAFT. **GERMANY.**

Mine office: Eisleben, Prussian Saxony, Germany. Dr. Ferdinand Zirkel, Dr. Dittrich and Dr. Paul Wachler, executive committee; Bergrat Dr. Vogelsang, chief mine and smelter manager; Herman Schrader, smelter superintendent. Organized 1852, as a consolidation of numerous independent operators, and reorganized, April 10, 1876, with 69,120 shares. Employs circa 23,000 men, of whom 10% are at the smelter and 90% at the mines.

The Mansfeld mine was opened A. D. 1199, and under the Counts of Mansfeld attained a high state of development, and was immensely profitable, during the Fourteenth and Fifteenth Centuries, but the industry nearly suffered extinction during the Thirty Years' War. Activity was resumed in 1671, when the right of working the mines was declared free, this resulting in the building up of a great number of small independent operators. The present company was first formed, in 1852, as a consolidation of the various small mine operators and smelters, and the merging of many small interests has resulted in a nearly tenfold increase of production, from 2,660 metric tons in 1867.

The principal ore is slightly argentiferous chalcopyrite, associated with limited quantities of nickel and cobalt ores, occurring as speiss, disseminated in very fine grains through the kupferschiefer, a fine-grained bituminous shale. The kupferschiefer lies nearly horizontally, with a dip of 5° only, and is from 1′ to 3′ only in thickness, but covers nearly 200 square miles. Lying just below the kupferschiefer is an arenaceous shale, carrying chalcopyrite, and a limited quantity of copper carbonates. Owing to the thinness of the bed, and the great age and extent of the workings, it is necessary for miners to work on their sides, bellies or backs, as in coal mines, wearing boards upon their trunks and thighs, in order protect themselves from the rock floors. Owing to the

great age and extent of the workings, the headings usually are 2 to 4 kilo
ters from the shafts, hence the actual mining is done under considerable
advantages. The workings are of vast extent, and there are scores of old
abandoned shafts. Present mining operations are through 9 hoisting sha
with a large number of shafts for water and ventilation. Among the
shafts are the Johannes, at Hohenthal, and the Hermann, at Helbra.

Equipment is very complete, including hoists and general mining mac
ery, and 6 duplex Weisse & Monski pumps. The company maintains i
pendent machine shops, capable of repairing or building any mining or pu
ing machinery in use.

The Mansfeld has numerous reduction works, including 4 smelters for
ores, 2 roasting smelters with acid plants, 2 matte smelting works, 2 refi
furnaces, and one electrolytic refinery with desilverizing plant. The var
works have a total of 20 reverberatory furnaces. The principal smelters
the Krughütte, at Eisleben, with 4 furnaces; the Kochhütte, at Helbra,
4 furnaces; the Eckardthütte, at Leimbach, with 4 furnaces, and the Ku
kammerhütte, at Hettstedt, with 3 furnaces. All of these furnaces are of
cular shaft type, with forehearths, and use cold blasts, except the Kupferh
merhütte, where hot blast is employed to some extent. The Saigerhütte
refining plant, and the Gottesbelohnunghütte has 10 reverberatory furn
The Eckhardthütte has one lead stack, producing a silver-lead matte, and
ing a little nickel speiss from resmelted flue-dust. The Eckhardthütte ha
kilns and 5 lead acid chambers, and the Kupferkammerhütte has 82 kilns
6 lead acid chambers, these works making 2,212 metric tons of 50° Bea
sulphuric acid, in 1903, from the fumes of the ore and matte treated.

The method of reduction is by heap-roasting and calcining in shaft-
naces. Roast-heaps are built about 60 meters long, 5.5 meters broad at
bottom and 3 meters broad at the top, and only about 1.50 to 1.75 meters h
The only fuel used is a little brushwood, at the edges and bottoms of he
and each heap is roasted 4 to 6 weeks. If the ore, as produced, carries
fines, these are screened, briquetted and added to the roast-heaps. The ro
ing reduces the ore 8 to 20% in weight, and the roasting is more for the e
ination of carbon dioxide and bituminous matter than to throw off sulp
the latter running only 2 to 5% in the raw ore, while the bituminous ma
ranges 10 to 17%, and carbon dioxide 7 to 13%. There are 4 roast-stalls
the shafts, and at the furnaces the first-fusion product is a matte carrying
40% copper and 0.25% silver. This matte is broken up and roasted in 2
cining kilns, and the roasted matte, with the addition of 5 to 10% raw m
is smelted, in reverberatory furnaces, to white metal carrying 74 to 75% co
and 0.45 to 0.50% silver. The slags from the white metal carry 9 to
copper, and are returned to the shaft-furnaces. Slag is utilized extensively
the manufacture of slag-brick and paving blocks.

The Krughütte, near the mine, is equipped with Steinbeck circular
tiple-hearth automatic pyritic calciners, which use no carbonaceous fuel,
cept for preliminary charges. The Krughütte utilizes waste gases from
copper furnaces, for direct consumption in gas engines, the volume of
amounting to about 21,000 cubic meters per hour, giving an available maxi
efficiency of circa 4,400 h. p., with a mean of 2,700 h. p. The furnaces
connected with two gas mains, of 40" and 62" diameter, and gas is freed
dust by passing through counter-current washers, having spiral blades rota
at a peripheral velocity of about 165' per second, gas being brought into
mate contact with the water, which is separated by the action of the bl
and turned in the opposite direction to the flow of gas. After washing,
gas contains only 0.003 grams of dust per cubic meter, against 17 grams i
original condition, and is led to a gasometer storing 18,000 cubic feet, wh

it passes to the engines, of which there are two, of 1,300 h. p. each, with a third of similar capacity under erection.

The desilverizing plant, at the Saigerhütte, operates on the Ziervogel method, roasting the matte and retaining the silver as a sulphate, which is dissolved in water and the solution run over metallic copper, which precipitates the silver, the cement silver so secured being pressed and resmelted to metal .999 fine. The final furnace product, after the extraction of the silver, is a blister copper of 99.7 to 99.8% copper tenor. In 1903 the Mansfeld smelters treated 686,354 metric tons of ore, making therefrom 49,179 tons of low-grade matte, the average tenor of the ore being 28.19 kgs. copper and 0.156 kgs. silver per ton.

The electrolytic refinery has about 5 metric tons daily capacity, with electrodes arranged on the multiple plan.

In addition to its mines and smelters, the Mansfeld company has extensive industrial undertakings of a collateral and subsidiary nature, the more important being extensive coal mines and coke works at Hamm, Westphalia, also alkali deposits and works.

Production, which was only 5,865,898 lbs. in 1867, increased to 15,230,287 lbs. in 1877, 29,176,000 lbs. in 1887, and 40,230,400 lbs. in 1897. Production for the past few years has been as follows: 42,500,278 lbs. in 1903, 41,629,349 lbs. in 1904, 43,824,141 lbs. in 1905, 40,108,000 lbs. in 1906, and 38,822,000 lbs. in 1907. The property is handled with great technical skill, and its ore bodies, by reason of their vast area, are among the largest known to man.

MANSFIELD MINING & SMELTING CO. **ARIZONA.**

Office: 812 Grand Ave., Kansas City, Mo. Mine office: Patagonia, Santa Cruz Co., Ariz. Employs 15 men. Roland E. Bruner, president; Hon. M. A. Fyke, vice-president; Arthur C. Sweet, secretary and treasurer; A. B. Richmond, general manager; preceding officers and Prof. Jean Robert Moechel, directors. Organized May 29, 1906, under laws of Arizona, with capitalization $8,000,000, shares $1 par; issued, $4,578,110, on Aug. 16, 1908. On same date company had, cash on hand, $1,800, with $44,000 due on deferred stock payments, and was without accrued liabilities. Annual meeting, second Monday in January. Company is said to have authorized a $100,000 bond issue, at 6%, with circa $20,000 issued, but reported, Aug. 15, 1908, no bonds outstanding.

Lands, 17 claims, unpatented, area 340 acres, also a 10-acre millsite, in the Wrightson district, 8 miles from the Sonora branch of the Southern Pacific railway, showing syenite, porphyry, dacite and rhyolite, carrying veins of 4′ to 30′ claimed width, said to be increasing in width and richness with depth. Ore is auriferous and argentiferous copper sulphides, and company claims that the average of numerous samples is 15% copper and 40 oz. silver, which would indicate that the property either lacks considerable ore bodies developed, or that the samples were taken more with a view to good assays than to exact averages.

Development is by the Fraction tunnel, on a vein claimed by the company to be 200′ wide, and by the Sweet shaft, 360′ deep, said to have ore opened on 2 levels, and the Black Cap shaft, showing some high-grade gold and copper ore, which apparently is limited in quantity. The mine was reported, May, 1907, to have 1,340′ of workings, and was claimed, October, 1908, to have nearly one mile of workings.

Equipment includes various mine buildings and a store, with hoists at the two shafts.

The smelter, planned to have blown in June 15, 1908, was completed circa September, 1908, and is said to have cost $21,900. The smelter has a 30-ton matting furnace, and is *considered thoroughly* impracticable, by reason of its small *size, and is a rather ridiculous installation* to be made by a company wi

$8,000,000 capitalization. A little ore was shipped, 1907, to El Paso sme and is said to have given good returns. The Black Cap shaft is claime have enough ore to feed the present smelter, which would not be hard. day's tonnage at the Anaconda works would run the Mansfield smelter more than a year.

The company's advertisements and prospectus were very misleading. T prospectus states that 50% of those engaged in the copper industry succee which is absolutely untrue. Maps and drawings in page advertisements c the company showed shafts and ore that were purely imaginary, when the com pany had nothing but prospect holes, and the company promised dividends i its advertisements, which promise was absolutely indefensible. The press, c that portion of it that is available, has been filled with trivial news items r garding the company and its property. The management complains that forme officials unloaded stock, to the detriment of the company. Mr. Richmond a parently has wasted no money in development, and is considered personall honest and competent, but the capitalization is excessive, development inad quate, and the company is regarded most unfavorably.

MINO MANTO VERDE. CHIL

Mine office: Tierra Amarilla, Copiapó, Atacama, Chile.

MAORILAND COPPER CO., LTD. NEW ZEALAN

Office: Christchurch, New Zealand. Mine office: Nelson, New Zealan W. J. McMurtrie, manager; Edwin Bray, mine manager; Harley E. Coope smelter superintendent. Lands, 2,000 acres, including several different mine carrying considerable native copper and rich secondary ores, connecting b good wagon road with the port of Nelson. Principal properties are the Unite Champion, which has 2 separate mines, carrying mainly chalcopyrite, opene by a 250′ shaft and various tunnels, showing a vein up to 14′ in width, car 1908 having 14,603′ of workings. The Monster mine, developed open-cu shows auriferous chalcopyrite, giving average assays of 17% copper and dwts. 17 grains gold per long ton. The Mount Claude mine, opened by tunnel shows a vein of about 4′ width, carrying oxidized ores with a gossan up to 25 width, said to give average assays of 5% copper and 3.8 dwts. gold per lon ton. The Doctor mine shows considerable chalcocite, and some native copper in a vein up to 11′ in width. Sample ore shipments, 1907, to Australia, fro the United Champion mine, gave returns of 13% copper. A smelter, built 1908 is connected with the mines by a tramway.

MINA DE MARACÁS. BRAZIL

Office and mine: care of Col. Pedro Gonçalves, owner, Maracás, Bahia, Brazil

TOMÁS MARAMBIO. CHILE

Office: Peña Blanca, Freirina, Atacama, Chile. Works office: Labra Freirina, Atacama, Chile. Property includes a number of mines and a reduc tion plant. The Santa Rosa mine, at Fragüita, 8 leagues from Peña Blanca, h 220 meters deep, with a vertical extension of 500 meters, opening a vein of 6 to 7′ average width, having north and south strike, with dip of 45°, and pro duced, 1903, circa 400 metric tons of 20% copper ore. The Mina Verde, nea the Santa Rosa, opened to depth of 130 meters, in 1903 produced 150 metri tons of 18% copper ore. The Mina Pequeña, 4 leagues from Peña Blanca, h opened to depth of 50 meters, with an oxidized zone of 30 meters, and in 190 produced 200 metric tons of ore of 20% copper tenor. La Mina Serena, opene to depth of 70 meters, with horizontal length of 160 meters, in 1903 produce 200 metric tons of 20% copper ore. El Manto mine, opened to depth of 12 meters, with an outcrop traceable 500 meters, in 1903 produced 20 metric ton of 20% ore. La Mina Maria Luisa, 140 meters deep, in 1903 produced 12 metric tons of 20% ore.

A smelter, 4 leagues from Peña Blanca and 18 kilometers from a railroa

everberatory furnaces turning out Chile bars of 50% average copper tenor. is Australian coal, costing 30 pesos per metric ton, delivered. One ton of is required to smelt 1½ tons of ore, slags running 0.7 to 0.8% copper. er employs circa 60 men, at average wages of 2 pesos daily. Production, was 4,450 metric tons of ore smelted, averaging 14.6% copper, making 26 lbs. fine copper.

VILLA COPPER CO. **ARIZONA.**
ad. Formerly at Safford, Graham Co., Ariz. Described Vol. VI.

LE BAY MINING CO. **BRITISH COLUMBIA.**
ad. Mine sold to the Tacoma Co. Formerly at Van Anda, Texada B. C.

ONELLE y HANZA. **PERÚ.**
ice and mine: Morococha, Junín, Perú. Lands, 2 pertenencias, on mining was begun 1902. Production, 1904, with average force of 25 as 97,355 lbs. fine copper, from ore averaging 12% copper tenor.

JS D. COPPER MINING CO.
ad. West Virginia charter forfeited, 1902.

ÑIA MINERA MARIA DE COLLAHUASI. **CHILE.**
ce: Iquique, Chile. Mine office: Collahuasi, Tarapacá, Chile. Organ- arch 29, 1905, under laws of Chile, with capitalization 120,000 pesos, 100 pesos par.

ÑIA MINERA LAS MARIAS DE COLLAHUASI. **CHILE.**
ce: Iquique, Chile. Mine office: Collahuasi, Tarapacá, Chile. Organ- arch 26, 1906, under laws of Chile, with capitalization £150,000, shares

OPA COPPER CO. **ARIZONA.**
d. Formerly had an office at 219 North Fourth St., St. Louis, Mo.

OPA COPPER MINES CO. **ARIZONA.**
d. Formerly at Wickenburg, Maricopa Co., Ariz.

MINING CO. **IDAHO.**
ter returned unclaimed from former office, care of R. B. Howard, presi- Wallace, Idaho. Mine office: Osburn, Shoshone Co., Idaho. Walter uperintendent. Lands, in McFarren Gulch, about one mile south of adjoining the Gray, show 2 veins, one carrying outcrops of high-grade erous galena, the other showing outcrops of argentiferous copper ore. oping by tunnel, and September, 1907, planned driving a lower tunnel, 100', starting same on property of the Black Traveler Mining Co.

TTA GOLD MINING CO. **IDAHO & WASHINGTON.**
ce: care of Lawson Investment Co., 60 State St., Boston, Mass. Mine Mullan, Shoshone Co., Idaho. M. E. Lawson, president and general r; H. C. Lawson, secretary. Organized under laws of Washington, with cation $1,000,000, shares $1 par. Lands include gold claims in Ferry Washington, and the Atlas group of 5 claims, area 100 acres, in the Peak district of the Cœur d'Alenes, Idaho. Development is by a 250' claimed to show a 20' ore body, averaging $50 per ton in copper, gold er values, which is a self-evident falsification of facts. Promised, 1903, ls "within two years," which of course did not materialize. Appar- erely a bit of stock-jobbery, and moribund.

OVITCH y LINGUARDO. **PERÚ.**
ce and mine: Morococha, Junín, Perú. Lands, one pertenencia, known Manuelita mine, which produced, 1904, with 10 men, ore of 17% average aking 118,956 lbs. fine copper.

N MINING & MILLING CO. **COLORADO.**
e office: Beulah, Pueblo Co., Colo. Lands, on Marion Creek, circa 12

miles southwest of Beulah, show a vein of 22′ reported width, carrying co zinc and lead ores. Has a concentrator, said to have cost $75,000, and Oct 1907, was said to employ 45 men.

MARITIME COPPER & REDUCTION CO. NEW BRUNSW

Mine office: Goose Creek, St. John Co., N. B. Property is an old showing a considerable body of low-grade copper ore. Idle since 1902.

MARKEEN COPPER CO. ARIZ

Dead. Lost charter, 1902, and lands, 1903. Formerly at Clifton, Gr Co., Ariz. Described Vol. IV.

MARKHAM GULCH MINING CO. UT

Letter returned unclaimed from former office, 53 Tremont St., Bo Mass. Mine office: Bingham Canyon, Salt Lake Co., Utah. Walter J. C general manager. Organized Sept. 29, 1906, under laws of Maine. Is trolled, through ownership of one-half of stock issue, by New Red Wing Mi Co., and is under same general management as the Utah-Apex and Utah velopment companies.

Property is a 200-ton concentrator, on the site of the old Red Wing which was running on ore from the New Red Wing mine, at last accounts.

MARQUETTE & ARIZONA MINING CO. ARIZ

Office: Marquette, Mich. Mine office: Bisbee, Cochise Co., Ariz. Marks, president and general manager; Jos. J. Wirtz, secretary. Orga Dec. 6, 1902, under laws of Arizona, with capitalization $500,000, share par. Lands, 37 claims, area 740 acres, having a heavy conglomerate cap similar to that of the Copper Glance, next west. Has a 560′ two-compart shaft, substantially timbered, passing through limestone showing conside iron, much of it assaying about $2 gold per ton. The shaft has short north south drifts, on the 400′ level, and one short drift on the 145′ level. H 35-h. p. hoist. Idle since 1903.

MARQUETTE COPPER MINING CO. MICHIGAN & WYOM

Office: care of Ney Mikkels, secretary, Niles, Mich. R. M. Kenney, president. Organized March, 1905, under laws of Oklahoma, with capita tion $500,000, shares $1 par. Lands, 120 acres, freehold, in Delta county, 20 acres, leasehold, in Marquette county, Michigan, and 160 acres, govern claims, in Uintah county, Wyoming.

ANGEL MARQUIEQUI. BOLI

Mine office: Coro Coro, La Paz, Bolivia. Mines, known as the San Mi and Toldo, carry native copper in conglomerate strata. Has steam power has been a small producer of barillas de cobre for some years.

MARSEILLES MINING CO. MEX

Office: 210 Bacon Bldg., Oakland, Cal. Mine office: Ejutla, Oaxaca, Roy Mauvais, president; W. H. MacMeekin, managing director. Lands, su claims near Los Ocotes mine, undergoing development.

MARSHALL & RUSSELL GOLD MINING, MILLING & TUNNEL CO. COLORA

Mine office: Empire, Clear Creek Co., Colo. W. C. Marshall, mana Organized 1901, under laws of Colorado, with capitalization $5,000,000, sh $1 par. Lands, 62 claims, developed by a 1,100′ tunnel showing auriferous argentiferous copper ores. Has water power.

GRUBE MARTINI. GERMA

Mine office: care of W. Von Vloten, Hoerde in W., Rheinprovinz, many. Has spathic iron and chalcopyrite, output being mainly iron ore which the production averages about 7,000 tons yearly. Has steam power employs about 50 men.

***MARYLAND* COPPER CO.** MONTA

Letter returned unclaimed from former office and mine, Mullan, Shos

Co., Idaho. Organized 1907, under laws of Idaho, with capitalization $1,000,000, shares $1 par. Lands are in the Burns district of Missoula county, Montana. Idle.

MARY MINING CO. **MEXICO.**

Office: care of John E. Carnahan, Canton, Ohio. Mine office: Jesús María, Rayón, Chihuahua, Mex. Wm. M. Blicker, first vice-president; Mrs. Elizabeth Seaman, second vice-president; J. Worth Carnahan, secretary; W. O. Evans, general manager; Dr. Leandro Routh, superintendent. Lands, 2 groups, presumably 9 hectares, opened by tunnel, showing auriferous and argentiferous copper and lead ores, said to give average assays of circa 9.5% copper, with small lead, silver and gold values. Has planned a smelter with 50-ton and 75-ton blast-furnaces, and a 100-ton concentrator, but apparently has built neither mill nor smelter.

MARY SCHULTZ COPPER KING MINING & SMELTING CO. **COLORADO.**

Office: care of Dr. Carl I. Schultz, president, Cripple Creek, Colo. Mine office: Salida, Chaffee Co., Colo. E. J. Vanatta, secretary; D. Mary Schultz, treasurer. Organized under laws of Colorado, with capitalization $1,000,000, shares $1 par. Lands, 13 claims, on Red Mountain, Frémont county, Colorado, 11 miles northeast of Salida, opened by a 150 shaft and a 180′ tunnel, showing considerable low-grade ore, with assays of 9 to 28% copper.

NEGOCIACIÓN MINERA MASCOTA, S. A. **MEXICO.**

Office: Ap. 840, Mexico, D. F. Mine office: Tequisistlán, Tehuantepec, Oaxaca, Mex. Emilio Maevers, president; Max von Duering, vice-president; Francisco Ponce de León, secretary and treasurer; R. W. Batelt, general manager. Organized Nov. 5, 1906, under laws of Mexico, with capitalization 200,000 pesos, shares 50 pesos par, divided into 2,000 free and 4,000 assessable shares. Assessments levied, $40,000. Lands, 262 pertenencias, in the mineral district of San Carlos Yautepec, including antiguas showing chalcopyrite and tetrahedrite giving average assays of 9.5% copper, 30 oz. silver and $5 gold per ton. Has steam power, with a 4-drill air-compressor. Fuel is wood. Nearest railroad, the National Tehuantepec, is 50 kilometers from the mine.

MASCOTA COPPER CO. **MEXICO.**

Office: 513 Germania Life Bldg., St. Paul, Minn. Mine office: Ameca, Jalisco, Mex. Employs 32 men. Chris. D. O'Brien, Sr., president; J. M. Bowler, vice-president; B. J. Mosier, secretary and treasurer; Chris D. O'Brien, Jr., general manager; preceding officers and Patrick Conley, directors; D. E. Baldwin, superintendent. Organized June, 1908, under laws of Arizona, with capitalization $1,500,000, shares $1 par; issued, circa $100,000.

Lands, 46 hectares, in the Guachinango division of the Mascota district, 4 miles from Mexican Central railway, showing an 8′ fissure vein in porphyry, traceable circa 2,000′ and proven to depth of 486′, giving average assays of circa 5% copper, 7 oz. silver and 6 grams gold per ton from oxide, carbonate and sulphide ores. Mine has a 300′ shaft and a 375′ tunnel, with 4,825′ of workings, estimated to show 40,000 tons of ore, with 28,000 tons blocked out for stoping.

Equipment includes a 50-h. p. steam plant, with 3-drill Sullivan air-compressor, and there are 17 mine buildings, including a store.

A wooden stamp mill, of 25 tons daily capacity, has 10 Allis-Chalmers gravity stamps.

A small concentrator is equipped with 2 Overstrom tables, vanner, 4 slime tables and sizer.

The company plans continuing the tunnel to length of 2,000′, and sinking 2 shafts, and possibly may build a small smelter.

MASCOTA MINING CO. **MEXICO.**

Office: *Chicago, Ills. Mine office:* Talpa de Allende, Mascota, Jalisco,

Mex. Harry S. Church, vice-president and general manager. Lands, 32 tenencias, known as the Ocotlán mine, 9 miles west of Talpa, in the cañ the Ocotlán River, heavily timbered, furnishing fuel for ordinary mine o tions. Mine shows a vein of 20′ to 60′ width, with a paystreak of 4′ t carrying auriferous and argentiferous copper and zinc sulphides. Dev ment is by tunnels and shafts, showing a considerable quantity of ore. erty has been worked previously, by German and Mexican companies.

Power is furnished from the Ocotlán river. An experimental lea plant was built in 1905. Smelter has roasting furnaces and a water-j blast-furnace. Heretofore the zinc values have been lost, but an effo planned to save them. Property is considered promising. Presumably idle

MASCOT COPPER CO. ARIZ

Offices: American Trust Bldg., Chicago, Ills., and Atlas Blk., Salt City, Utah. Mine office: Dos Cabezos, Cochise Co., Ariz. Hon. H. H. E president; David S. Stevenson, vice-president; J. C. Knapp, secretary; L. Ramsey, treasurer; L. G. Hardy, superintendent; E. A. Ely, assistant s intendent; Capt. B. W. Tibby, consulting engineer. Organized circa 1907, under laws of Arizona, with capitalization $10,000,000, shares $10 p $1,000,000 preferred and $9,000,000 common shares. Company has no co tion with the Mascot Mining Co., operating in the same county.

Lands, circa 43 claims, including property formerly held by Dos Ca Consolidated Mines Co., said to be held under bonds aggregating circa $50 Lands show 5 parallel fissures, of about 70′ aggregate width, in additi which the Skylight vein is claimed to be 200′ wide. Development is b Consolidated tunnel, showing ore assaying 3 to 14% copper, with fair and silver values.

MASCOT MINING CO. ARIZ

Office: 1009 Majestic Bldg., Detroit, Mich. Mine office: Willcox, Co Co., Ariz. Christian Kern, president; Geo. F. Scheffer, vice-president; Rohns, secretary; J. A. Zahn, treasurer; Delos D. Jayne, general manage W. Courtney, superintendent. Organized March, 1905, under laws of Ari with capitalization $1,000,000, shares $1 par; issued, circa $800,000. Com has no connection with the Mascot Copper Co., operating in the same co

Lands, 35 claims, unpatented, area circa 700 acres, lying about 40 northeast of Willcox, in the Clark and Montezuma districts, on the we slope of the Graham Mountains, in the western part of Graham county. P pal holdings are partially owned outright, and balance paid for, exce $19,000 final payment on bond, payable by royalties from ore, and 5 tional claims are held under bond and lease, subject to a cash paymen $3,750. Lands, in 4 groups, within 4 miles of each other, show mainly gra with some Carboniferous limestone, with frequent intrusive dykes of porp and rhyolite, carrying veins of 6″ to 20′ width, with copper and lead occasionally with high silver and gold values, principal ores being malac azurite, chalcocite, chalcopyrite and galena, usually with gangue of quartz, occasionally of decomposed limonite or hematite.

The Gold Cord group, 11 claims, shows a vein of 6″ to 22′ width, t able 2,000′, opened to depth of 107′, with circa 1,300′ of workings. Ores highly auriferous copper sulphides, assaying 1 to 3% copper only, with values up to circa $90 per ton, former shipments of circa 250 tons ha given average returns of $58 per ton. Equipment at the Gold Cord inc a 30-h. p. boiler, pumps and a hoist.

The Iron Bell group, 9 claims, 3½ miles from the Gold Cord, carries vein, opened by a 100′ shaft, showing ore assaying 1 to 15% copper and *1 oz. gold* per ton.

The President group, 3 claims, about 1½ miles from the Gold Cord, s

long tons. The property is carefully managed, and has a long an record as a producer.

MASON MANUFACTURING CO.

Works office: Houghton, Houghton Co., Mich. Livingsto president; Geo. F. Chauncey, vice-president and treasurer; Alfr manager. Organized circa August, 1907. Property is a 10-year Quincy sands, transferred August, 1907, from the Copper Conce to the Mason Manufacturing Co. Is controlled, through ownersh stock issue, by the Houghton Concentrating Co., successor of the centrating Co.

The mill is 72x122', with a wing of 38x58' containing the p and stands upon sands wasted from the Quincy mill. Sands fo are taken from the lake by a 16x28' scow carrying a 12x24' pumph a centrifugal sucker pump, connected by a 10" spiral pipe with t pipe having swing joints and being carried on bents. At the mill discharged into a launder, connecting with the boots of 6 endless- elevators, in 3 frames, each frame having 2 elevators, with 20 buckets. Formerly the discharge from the elevating belts led to jigs, each with 5x15' sieves, which rejected about 80 to 85% of t leaving 15 to 20% for concentration. The sand retained was coarse, fines and slimes, coarse sands being sent to crushing Chilean mill, thence joining the fines and going to the finishing were settling tanks for the slimes, the flow of diluted pulp throug being very slow, settlers discharging through siphon tubes at the slimes again going over oscillating tables. The company is using ventions of the manager, who installed one section of 20 ta Schwarz corrugated tops, and Schwarz classifiers. The Schwar said to have been technically successful, but the general opinion mill men is not especially favorable.

Power is furnished by a 250-h. p. gas engine, using produce from pea-coal. Equipment includes a 50-kw. generator for li operating the sand-pump. Machinery is belt-driven throughout.

These works were designed for the largest tailings plant in being of 2,000 tons nominal daily capacity, and Mr. Schwarz est there are available 12,000,000 tons of tailings, assaying 0.42% which 70% is recoverable. There has been trouble with the g which has proven unreliable, and steam power may be substituted. prise must be considered an experiment.

MASON VALLEY COPPER CO.

Dead. Was succeeded, January, 1907, by Mason Valley Min merly at Yerington, Lyon Co., Nev.

MASON VALLEY MINES CO.

Office: care of Geo. E. Gunn, general manager, Salt Lake City, office: Yerington, Lyon Co., Nev. W. Mont Ferry, president; J man, vice-president; Frank Judge, secretary; Llewellyn Humphr ing engineer; O. E. Cole, superintendent. Organized circa Dec under laws of Maine, with capitalization $1,000,000, shares $1 cessor of Mason Valley Copper Co. Lands, 8 claims, 1 fraction acres, including the Spragg mine, lying south of the Bluestone strong gossan, apparently opened on a contact deposit between p limestone, said to be of 70' average width, carrying a good showi carbonates from surface, changing to sulphide ore, with excess depth of about 100'. Has secured assays up to 55% in copper ten *cipal values* are in chalcopyrite apparently averaging about 4% *$1 per ton* in combined gold and silver values. Development is

tunnel. Has electric power and adequate mining equipment, employing circa 40 men. Property considered promising.

MASSASOIT GOLD & COPPER CO.

Office: 7 Water St., Boston, Mass. Location of lands, if any, unknown.

MASSASOIT MINING CO. **UTAH.**

Office: care of E. V. McGarrick, president, Salt Lake City, Utah. Mine office: Bingham Canyon, Salt Lake Co., Utah. Name changed, 1905, from Red Wing Extension Mining Co., to present title. Lands, 120 acres, adjoining the Red Wing, showing a 4' vein, giving average assays of circa 0.5% copper, 7% lead and 8.5 oz. silver per ton. Mine is said to show about 60,000 tons of ore. Life several years.

MASS CONSOLIDATED MINING CO. **MICHIGAN.**

Office: 1105 No. 6 Beacon St., Boston, Mass. Mine office: Mass, Ontonagon Co., Mich. Mill office: Keweenaw Bay, Houghton Co., Mich. Employs circa 250 men. G. A. W. Dodge, vice-president; Wilfred A. Bancroft, secretary and treasurer; Jas. M. Wilcox, superintendent; preceding officers, Thos. O. Nicholas, John W. Linnell, Jr., Fred W. Huntoo and Jerome P. Smith, directors; Jas. Satterley, mill superintendent; W. A. Brown, clerk; E. Fenner Dayton, engineer; Thos. Hall, mining captain; Samuel V. Rawlins, master mechanic at mine; Jas. Richards, master mechanic at mill.

Organized 1899, under laws of Michigan, with capitalization $2,500,000, shares $25 par; issued, $2,435,925. Paid in, $19. American Loan & Trust Co., Boston, registrar; Old Colony Trust Co., Boston, transfer agent. Annual meeting second Thursday in March. On Jan. 1, 1908, company had cash, accounts receivable and copper on hand, amounting to $128,454.56, with liabilities of $34,580.36, and on Oct. 1, 1908, had circa $80,000 cash on hand. In 1906 company lost, on operations, $103,696, and in 1907 loss was $56,272.

Present holdings of the Mass Consolidated include lands formerly held by various owners as five different mines. Considerable of the real estate stock is in the name of the Ridge Mining Co., which, at last accounts, had not been wound up, though the Mass Consolidated is supposed to own practically all of the outstanding stock, and plans winding up the Ridge and transferring its property to the Mass Consolidated. The lands were acquired largely through exchange, the principal property being the old Ridge mine, but the Mass was taken in preference to Ridge, from one of the same parties because the title to the Mass was clear, by purchase. The old Ogima Mining Co. was not wound up until after the Mass was organized, and the Ogima lands were sold originally by tax title, but a better title was secured. About 1897, the Ogima Mining Co. transferred to the Evergreen Mining Co. all right and title to the Evergreen lot under the option Ogima purchased in exchange for which the Evergreen deeded to the Ogima 40 acres of land from the northeast corner, adjoining the Ridge mine, to enable the Ogima to sink its shafts and work the conglomerate beds lying under part of the Evergreen lots. The existence of this old agreement between the Evergreen and Ogima, was unknown to the present management of the Mass at the time of taking charge last autumn, but notice was given by the Evergreen, a few days prior to the Evergreen lease must be discontinued, when negotiations were opened with the Evergreen and Butler Bros., the management keeping the matter quiet, in the hope of coming to an agreement with the Evergreen people, but, as they could not, last week, an agreement was not reached, and the lease will terminate on Monday, Nov. 30th.

Mineral lands were circa 2,400 acres, and in a very compact tract in Sections 31, 32 and 33 T. 51 N., R. 33 W., and Sections 5, 6 and 7 T. 50 N., R. 33 W., bounded on the north by the Ontonagon River, on the east by the Adventure, Trimble and Evergreen lots, on the south by the Ogima and Butler lots, and on the west by the Ridge and Mass lots.

the Flint Steel and the Knowlton mine of the Adventure, and on t
the Flint Steel, Adventure and St. Mary's Mineral Land Co. La
three old mines, the Ridge, Mass and Ogima, also two old prospects,
mac and Hazard, joint production of which, under previous m
was 11,131,023 lbs. fine copper. The Ridge mine, operated 1850-
5,134,449 lbs. copper, and paid dividends of $100,000. The old
opened 1856 and worked intermittently until 1886, secured a tota
5,014,266 lbs. copper, and the Ogima, opened 1860 and closed
982,308 lbs. copper. The Merrimac and Hazard were early-day c
without recorded production. These five properties are described
in Vol. II.

The Mass tract carries six of the seven cupriferous amygdal
Evergreen belt, these varying greatly from point to point, but
about 10′ width, with a sharp bend in their strike, this varying from
on the north, to N. 37° E. at the southern boundary. The dip o
varies from 38° at the Ridge to 47° at the old Mass mine. The cop
beds of the Evergreen belt on the lands of the Mass Consolidated
lows, from north to south:

1. Knowlton. Carries heavy copper and stamp rock.

2. Mass. Lies 140′ south of the Knowlton and carries a l
copper and stamp rock.

3. North Butler. Lies about 75′ south of the Mass bed, a
and fairly mineralized in places.

4. Butler. Lies about 200′ south of the North Butler, is 12′
and very bunchy, carrying mainly stamp copper, with occasional n

5. Ogima. Lies about 100′ south of the Butler. Is mainl
lode, with some barrel-work and occasional masses. Is 10′ to 2
shows little good ground.

6. Evergreen or Ridge. Lies about 250′ south of the Ogima
best lode of the property, ranging 4′ to 40′ in width, and usually b
where widest. Is very bunchy, but shows some excellent stop
heavy copper and stamp rock.

The Mass has openings on all of its copper-bearing beds,
hoisted through the nearest shaft, lodes being connected by c
various levels. The Mass carries the outcrop of the lodes of the
belt for about 1½ miles. Shafts A and B are connected, on the
down to and including the eighth level. The mine, as a whole,
rich in mass copper, and carries considerable silver values, but
is exceedingly bunchy, and ranges from very rich to absolutely n
siderable rock selection is made underground, and culls are used

Mining and tramming are done on company account, but, by
tive system, introduced by Capt. Wilcox, exceedingly good results
Daily, weekly and monthly reports of drilling and tramming are
laid before the workmen. As a result, the trammers are now a
tons daily, per man, as against 9 tons in 1906, while the drill-runne
practically double the work of two years ago, the lead in drilling
by Wm. Hocking, aged 63, with an average of 50′ to 60′ of hole
which is a phenomenal record, in such hard rock. The mine ha
tionally good crew of men, and, in January, 1908, produced, wit
including surface employes, 109 tons of stamp-rock per man, or a
the average production of the district as a whole.

A shaft, 1,757′ deep, formerly known as the Ridge, has 3 co
sunk on the Evergreen bed and connected with the Butler lode
on several levels. The Evergreen bed in this shaft runs 8′ to 1
showing considerable rock of good grade. The old shafthouse

whether the company can or cannot work the beds found by the Adve drill borings, on 320 acres of the Mass lands.

The Mass mill is at Keweenaw Bay, on an arm of Lake Superior, a junction on the Mineral Range and Duluth, South Shore & Atlantic rail 16 miles south of Houghton and 34 miles northeast of the mine, with a sand-room, deep water and immunity from heavy seas. The 90x232' built by the Wisconsin Bridge & Iron Co., is of steel frame on stone fou tions. Equipment includes 2 Nordberg stamps, having vertical mortar-g supplied with automatic hydraulic cleaning devices. Each head has a nor stamping capacity of about 525 tons daily, with actual daily average dut 480 to 500 tons. A Parnall-Krause atmospheric stamp of small size rec oversize material from the stamp-mortars. The Mass did stamping for Michigan, with one head, until Sept. 1, 1906.

The 30x60' boiler-house, at the mill, is of wood, with iron sheathing truss roof, housing two 225-h. p. Stirling boilers. Ashes and cinders washed into the lake, through a launder.

The 40x70' pump-house has a 16,000,000-gallon Nordberg vertical p fed from a 12x30' well, with bottom 6' 6" below mean water-level, conn with a tunnel running 300' under the bed of the bay to the intake.

A 1,000' wharf, also serving as a breakwater, has 18' of clear wat its end, equipped with three towers and derricks, capable of unloading vessels at the rate of 900 tons daily. Coal is taken from the wharf, in cars, by a 14x20" hoist, to a 1,500' trestle of 20,000 tons storage capacity

The mill also has a 30x40' warehouse, with office in front, a sm machine shop and about a dozen dwellings, on a townsite platted by the pany, this also having several business buildings.

Production has been as follows: 2,576,447 lbs. in 1903; 2,182,931 lb 1904; 2,007,950 lbs. in 1905; 2,106,739 lbs. in 1906; 2,078,677 lbs. in During the latter half of 1908 the mine was making circa 110 tons of mi monthly, which will give a decreased output for the year. For 1906, hoisted was 240,550 tons, of which 185,789 tons were stamped, yie 3,055,175 lbs. of mineral, returning 2,106,739 lbs. fine copper. For 1907 hoisted was 231,018 tons, of which 204,599 tons were stamped, yielding 57 lbs. of mass copper and 2,334,820 lbs. of mineral, with a net productio 2,078,677 lbs. fine copper, the proportion of mass copper per ton stamped 0.14%, percentage of mineral per ton of rock stamped, 0.57%, and perce of fine copper secured, per ton of rock stamped, being 0.508, or 10.16 lbs copper per ton. The Evergreen bed formerly was producing 75 to 80 to mineral monthly, but this has been reduced to about 25 tons per mont reason of loss of the lode on the Ogima lands.

Costs of the Mass are very high on copper, owing to the low gra rock stamped, but probably are the lowest in the Lake Superior distri the basis of rock tonnage. For January, 1908, costs were 83 cents pe for mining, 17 cents for rail transportation and 35 cents per ton for mill total of $1.35 per ton. If the rock averaged three-fourths of 1% fine c the mine could be made to pay handsomely, but, unfortunately, outside Evergreen lode, only about one-third of the rock opened averages as h 0.75% copper, balance of openings being in shafts, crosscuts and barren The local management of the Mass is exceptionally efficient, but it is c that the future hope of the property rests either in securing the ri mine the Evergreen lode, where now cut off, or in developing new beds ing payable copper at the southern end of the property, in line with portant and highly promising discoveries of the Lake and Adventure

MASSEY STATION MINING CO., LTD. ON

Office: 2501-43 Exchange Place, New York, N. Y. Mine office:

, Algoma, Ont. John W. Thompson, president; Robt. McKay, secre-
os. Errington, general manager. Organized 1900, under laws of On-
ith capitalization $1,000,000, shares $100 par. Is closely connected
e Orford Copper Co., which is controlled by the International Nickel

Lands, 640 acres, also 160 acres miscellaneous lands, in Salter town-
owing 3 ore bodies, of which 2 developed average 10′ width. One vein
traced for 4,000′, and opened to a depth of circa 600′, by a shaft
levels, opened 80′ apart, with considerable drifting on each level.
ft develops a vein 9′ wide at surface, and 12′ at the bottom of shaft,
ore of 3 to 5% copper tenor, with traces of gold and silver, and
l ore of much higher grade. Vein dips at 85°, and the mine is said
pwards of 50,000 tons of ore blocked out for stoping.
ore is a finely disseminated, silicious chalcocite above, succeeded by
nd in turn by chalcopyrite with similar gangue, not adapted to wet
tion, owing to excessive sliming, hence a 50-ton experimental oil
tor, using the Elmore process, was installed. Mining plant includes
nd 10x12″ Lidgerwood hoists, and a 6-drill Ingersoll-Sergeant air-
r. Property considered promising and management good. Presum-

ON GOLD & COPPER CO.

Had an office in Spokane, Wash., circa 1899.

SCHAFT KUPFERBERGWERK MAXIMILIAN. GERMANY.

office: Nieder-Ludgwigsdorf, Schlesien, Germany. Has 2 shafts,
a of 75 metres, and the August of 25 metres. Employs 40 to 50 men
s about 175,000 lbs. fine copper yearly.

Y MINING CO. UTAH.

Succeeded by May Day Mining & Milling Co. Formerly at Eureka,
Utah.

Y MINING & MILLING CO. UTAH.

office: Eureka, Juab Co., Utah. John Dern, president; preceding
S. McCornick, Jas. Chipman, M. P. Braffet and N. S. Neilson, di-
C. C. Griggs, superintendent. Capitalization was increased, June,
$800,000, shares $1 par. Is controlled, through ownership of one-half
issue, by Uncle Sam Consolidated Mining Co. Former dividend ratio
monthly, and dividend July, 1908, was 1½ cents per share, amount-
12,000. Paid $64,000 in dividends in year ending Apr. 1, 1908, leav-
lance of $9,084.11, which is an extremely small working balance for
nd-paying mine.

mine is operated in connection with the Uncle Sam, and ore is ex-
through the Uncle Sam shaft. The property is said to have a 15′ ore
tween the 100′ and 200′ levels. Principal values are in gold and sil-
carrying a little copper, secured as a by-product.

mill, rated at 50 tons daily capacity, was treating about 80 tons
ly, 1908, on two 8-hour shifts. A tram-line has been built from the
the old dumps, which are to be concentrated.

duction, 1907, was 153 carloads of ore and 15 carloads of concentrates,
at $151,337.33. Property is considered valuable and well managed.

LOWER MINING CO. MICHIGAN.

ce: 825-60 State St., Boston, Mass. Mine office: Calumet, Houghton
ch. H. F. Fay, president; Geo. C. Endicott, secretary and treasurer;
g officers, John C. Watson, Manning Emery and Stephen R. Dow,
. Organized 1899, under laws of Michigan, with capitalization
00, shares $25 par, $8 *paid in*. *Annual meeting*, third Wednesday in

Lands, 840 acres, in Sections 7 and 8, T. 56 N., R. 32 W., also a millsite on Torch Lake. The Kearsarge mine lies to the north, Old Colony to the south and the South Kearsarge and Wolverine mines to the west. Exploratory work was begun in 1899 and ended March, 1906. No. 1, or Faull shaft, 400′ deep, has considerable drifting on the first and second levels, and a crosscut opens two parallel cupriferous amygdaloids, showing occasional patches of copper, but nothing of promise. No. 2, or Isle Royale shaft, 160′ deep, has several hundred feet of drifting and shows a bunchy amygdaloid, 10′ to 12′ wide, carrying more or less copper in a 2′ streak next to the hanging wall. No. 3, or Sandstone shaft, is 60′ deep, in a soft and badly broken amygdaloid, all of the strata near the Eastern Sandstone being much disturbed. No. 4 shaft, 580′ deep, starts from surface on an unnamed amygdaloid lying approximately 2,000′ east of the Kearsarge bed, and at a depth of 425′ runs into a parallel amygdaloid lying 90′ to the eastward of the first bed. The copper showing is poor. A fairly complete geological cross-section has been obtained by drill-borings.

Surface improvements include a hoist good for 600′, boilers and air-compressor, with necessary buildings.

Cash balance, Jan. 1, 1908, was $43,650.85, company having received, during 1907, $35,000 from sale of land, with total expenses for year of $1,492.86. Idle.

MAY MINING CO. **ARIZONA.**

Office: care of M. L. Heffelman, manager, Sidney, Ohio. Mine office: Mayer, Yavapai Co., Ariz. Lands, 4 claims, 3 miles south of Mayer, in the Big Bug district, adjoining the Arizona Exploration Co. Has a 237′ shaft, with hoist good for 600′.

MAYO MINING CO. **MEXICO.**

Office: care of John E. Carnahan, Canton, Ohio. Mine office: Jesús Maria, Rayón, Chihuahua, Mex. Carlos Smythe, manager. Capitalization $1,000,000. Is a twin of the Mary Mining Co. Lands, said to be 3 mines, presumably 3 pertenencias, carrying argentiferous and auriferous copper ore. Presumably idle.

MAZAPIL COPPER CO., LTD. **MEXICO.**

Office: 47 Peter St., Manchester, Eng. Mine office: Concepción del Oro, Mazapil, Zacatecas, Mex. Works office: Apartado 17, Saltillo, Coahuila, Mex. Employs circa 3,000 men. Wm. Purcell, managing director; P. E. O. Carr, general manager; John Cooper, general mine superintendent; T. S. Abbott, engineer. Organized February, 1891, under laws of Great Britain; reorganized Apr. 21, 1896, and capitalization increased, 1903, to £300,000, shares £10 par; issued, £240,000.

Lands, 530 hectares, in 8 groups, comprising about half copper and half silver-lead claims. Principal properties are the Aranzazu and Cabrestante, producing copper ores, the San Elijio, Naranja, Cajon, San Francisco and Protrero, which are silver-lead mines, and the Promontorio group, producing fluxing ores. Copper ores occur in irregular masses, in limestone, near granite-porphyry contacts. In 1907 a 1,500-meter tunnel was started, from Concepción del Oro, to tap the Aranzazu mines at 500 meters depth, 200 meters below the present workings. It is expected that this tunnel, in addition to developing large ore bodies, will give sufficient water for the concentrator. The various mines of the company have 83 different shafts and tunnels.

The concentrator, at the mine, is of 150 tons rated daily capacity, but the district is arid, and operations are hampered frequently by shortage of water.

The property has 3 Roe aerial tram-lines, one, of 7 kilometers length,

built by Ropeways, Ltd., of London, having 23 tons hourly capacity, connecting the Aranzazu mine with the smelter at Concepción del Oro.

The company has two reduction plants, one at Concepción del Oro and one at Saltillo, former being somewhat antiquated. The Concepción del Oro works include a 150-ton concentrator and a 500-ton smelter having 3 copper furnaces. It was stated, August, 1907, that the company planned remodeling and enlarging this plant to 1,000 tons daily capacity, at a cost of circa $250,000.

The Saltillo smelter, completed 1906, does a general custom business, in addition to treating ores of the company. Equipment includes electric power, with alternating current generators direct-connected to 2 Harrison-Fleming Corliss tandem-compound condensing air-compressors. The Saltillo plant has 4 blast furnaces and one reverberatory, and a converter department with 4 stands.

The company maintains 3 hospitals, with a staff of physicians, and owns extensive general stores for supplying the needs of its workmen.

The company controls the Ferrocaril Coahuila y Zacatecas, with 78 miles of main line, running from Concepción del Oro to Saltillo, and the company said to plan building an aerial tram, to connect the mines with a railroad at San Pedro Ocampo.

Production has been as follows: 6,108,123 lbs. fine copper in 1903; 96,000 lbs. in 1905, and circa 7,250,000 lbs. fine copper, 7,000 tons pig lead, 100,000 oz. silver and 3,000 oz. gold in 1906, secured from 132,000 metric tons ore, averaging circa 3.5% copper, 13 oz. silver and 0.02 oz. gold per ton.

MAZATZAL COPPER CO. **ARIZONA.**

Office: Jerome, Ariz. Mine office: Payson, Gila Co., Ariz. Jos. J. Shaw, president and general manager; J. N. Boardman, vice-president; E. A. Macpherson, secretary and treasurer; preceding officers, H. Cram, A. J. Murietta, H. H. Hooker, John Henry, D. W. Scott and A. H. W. Eckstein, directors; A. Bergman, superintendent.

Organized Jan. 6, 1907, under laws of Arizona, with capitalization $500,000, shares $5 par; issued, circa $1,065,000. Annual meeting, in January.

Lands, 33 claims, in process of patenting, area circa 650 acres, also a acre millsite and sundry other lands, giving total holdings of 700 acres, circa 9 miles from Payson, in the Tonto basin, Mazatzal district, very difficult access, about midway between Jerome and Roosevelt, and circa 80 miles northwest of Globe, from which point the property is best reached, at present.

Property shows various ore bodies, of which one, under development, apparently is a series of lenses, of about 35′ average width, traceable circa 600′ and proven to depth of 180′, with slate hanging and porphyry foot, carrying cuprite, azurite, malachite and copper sulphides, estimated to average 5.5% copper, 3% lead, 2 oz. silver and 40 cents gold per ton. Development is by a 40′ shaft and by tunnels of 470′, 435′ and 400′.

Equipment includes a 50-h. p. steam plant, with double-drum hoist and a drill Ingersoll air-compressor, with 5 buildings.

Company plans sinking the shaft 200′, and extending No. 3 tunnel, known as the Bull Frog, and driving a tunnel to a second ore body. Property considered promising and management good.

MAZE MINE. **JAPAN.**

Mine office: Terado-muri, Nishi-Kambara-gori, Echigo, Japan. Mine, opened A. D. 1688, has several small veins, averaging 12″ width, carrying chalcopyrite and pyrite, frequently associated with sphalerite and galena, occurring mainly in propylite. Ore yields 17 to 20% copper, after careful selection. Production, which decreased for some years, was 110,582 lbs. fine copper in 1900. No later *returns of output and mine* probably idle.

MAZEPPA CONSOLIDATED MINING CO. **MEXICO.**

Dead. Was succeeded by Aguila Amalgamated Mining Co. Formerly at Hostotipaquillo, Ahualulco, Jalisco, Mex.

McALLISTER-ROWLAND COPPER MINING CO. **WASHINGTON.**

Dead. Property was an option on property of Ethel Consolidated Mines Co. Formerly at Index, Snohomish Co., Wash.

McCABE EXTENSION MINING & MILLING CO. **ARIZONA.**

Office: Prescott, Ariz. Mine office: McCabe, Yavapai Co., Ariz. Reese M. Ling, president; E. R. McDowell, secretary. Organized July 14, 1900, under laws of Arizona, with capitalization $1,500,000, shares $1 par. Lands, adjoining the McCabe mine, have a 300′ shaft. Company suffered internal dissensions, during which the original promoters stepped from under. Idle some years and apparently moribund.

McCONNELL COPPER MINING CO. **NEVADA.**

Mine office: Yerington, Lyon Co., Nev. Lands, 10 claims, from which a little ore ranging as high as 50% copper has been produced in the past. Presumably idle.

McDONALD-ELY COPPER CO. **NEVADA.**

Office: Salt Lake City, Utah. Mine office: Ely, White Pine Co., Nev. David Keith, president; Col. Enos A. Wall, vice-president; Frank Knox, treasurer; Geo. W. Parks, secretary; preceding officers, Hon. Thos. Kearns, Frank K. Wescott and W. G. Lamb, directors; D. C. McDonald, manager. Organized November, 1906, with capitalization $5,000,000. Lands, 27 claims, area 423 acres, in the eastern part of the Ely district, 7 owned outright and 19 held under bond and lease, showing a prominent blowout. Mine is opened by tunnel and several shafts, including the Mill shaft of 40′ and the Golden Gate shaft of 225′, showing auriferous copper ore. Has steam power and a 6-drill air-compressor, with a 100-ton mill and cyanide plant remaining from former mining operations for gold. Management is composed of experienced and successful mining men.

McGREGOR COPPER CO. **AUSTRALIA.**

Office: Queen St., Brisbane, Queensland, Australia. Organized under laws of Queensland with capitalization £150,000, shares 10s. par. Idle.

McGREW & SCHWARTZ LEAD & COPPER CO. **ARIZONA.**

Mine office: Florence, Pinal Co., Ariz. Has shafts of 80′ and 100′, showing good ore, and was developing at last accounts.

McKECHNIE BROS. **ENGLAND.**

Works office: Widnes, Lancashire, Eng. Works include an electrolytic refinery, of about 10 short tons daily capacity, having three 75-kw. generators and 234 tanks, with multiple arrangement of electrodes.

McKINLEY CONSOLIDATED MINES CO. **NEVADA.**

Dead. Succeeded the McKinley Mining & Smelting Co., of unfortunate memory, and was succeeded by the Willard-Ely Copper Co. Formerly at Ely, White Pine Co., Nev.

McKINLEY MINES, LTD. **BRITISH COLUMBIA.**

Office: care of A. M. McKenzie, secretary, Rossland, B. C. Mine office: Franklin, Boundary district, B. C. B. Lequime, president; H. W. Warrington, vice-president; C. L. Hammond, managing director; A. D. McPhee, superintendent. Lands, 4 claims, on the north fork of Kettle River, about 40 miles above Grand Forks, having an 80′ tunnel, said to show a vein of 112′ extreme width, carrying low to medium grade auriferous and argentiferous copper ore. Property considered promising. Idle.

McKINLEY MINING & DEVELOPMENT CO. **ARIZONA.**

Office: Prescott, Ariz. Mine office: Iron Springs, Yavapai Co., Ariz. *Chas. E.* McKinley, president and general manager; Geo. P. Ireland, vice-

president; Dr. H. T. Southworth, secretary; W. H. MacKay, treasurer; preceding officers and LeRoy Anderson, directors. Organized 1906, under laws of Arizona, with capitalization $1,000,000, shares $1 par.

Lands, 38 claims, area 760 acres, including the Dixie group, 6 claims, showing veins of 5′ to 15′ width, carrying auriferous and argentiferous copper ore, and the Peacock group, 11 miles south of Prescott, in the Copper River district, carrying a vein of 60′ estimated width, said to give average assays from surface ore, of 3.7% copper, with good gold values, and assays up to 15% copper, 5 oz. silver and $6 gold per ton, from sulphide ores in a 200′ shaft.

Company reports that it has steam, electric, water, gasoline and air power, with 2 hoists and a $60,000 order placed for a complete mining equipment, including air-compressors. Has 12 buildings. Management plans installing a 20-stamp mill and continuing development work on a considerable scale. Employs about 20 men, and plans increasing forces materially.

McKINLEY MINING & SMELTING CO. **NEVADA.**

Dead. Succeeded, circa 1906, by McKinley Consolidated Mines Co., also dead. Formerly at Ely, White Pine Co., Nev. Described Vol. VI.

McMILLEN-STONEWALL MINING CO. **ARIZONA.**

Office and mine: Globe, Gila Co., Ariz. V. Y. Smith, president and general manager; H. L. Coombs, treasurer. Organized March 27, 1907, under laws of Arizona, with capitalization $1,000,000, shares $1 par.

Lands, 32 claims, circa 20 miles east of Globe, carrying 3 miles of the strike of the Stonewall Jackson vein, of 40′ to 100′ width. The Stonewall Jackson mine, worked prior to 1883, is said to have produced about $500,000 worth of ore, carrying mainly silver values. Development is by the 3-compartment 200′ McMillen shaft, and the old 600′ Stonewall Jackson shaft, latter showing no stoping done below 230′. Equipment includes a 5-stamp mill and cyanide plant.

MEADOW MINING CO. **MICHIGAN.**

Office: 50 State St., Boston, Mass. Mine office: Copper Falls, Keweenaw Co., Mich. Wm. F. Fitzgerald, president; John Brooks, secretary and treasurer; Wesley Clark, agent. Organized 1898, under laws of Michigan, with capitalization $1,500,000, shares $25 par, as a reorganization of corporation of same name organized 1863, under special Michigan charter. Lands, 364 acres, adjoining the Humboldt and Phœnix mines, carrying the Ashbed lode, which was first opened 1851, with a little mining previous to 1860. The Ashbed is crossed by several transverse fissures, showing pits of prehistoric miners, and a little copper has been obtained therefrom. Fully described Vol. II.

MEADOW MOUNTAIN MINING CO. **COLORADO.**

Offices: Aspen, Colo., and Bangor, Me. Mine office: Crystal, Gunnison Co., Colo. F. O. Beal, president; J. T. Stewart, vice-president and general manager; Victor Brett, secretary; J. T. Bowler, treasurer; W. Porter Nelson, assistant secretary and treasurer; preceding officers and C. W. Coffin, directors; John Peters, mine superintendent. Organized under laws of Colorado, with capitalization $100,000, shares $1 par.

Lands, 8 claims, area 70 acres, also a 5-acre millsite, in the Rock Creek district, carrying 5 fissure and contact veins, latter between limestone and shale, of which 2, under development, average 5′ width and carry chalcopyrite giving average assays of 3.5% copper, 4% lead, 23% zinc, 6 oz. silver and $1 gold per ton. Has shafts of 100′ and 300′, and an 800′ tunnel, with about 2,750′ of underground openings, estimated to show 1,000 tons of ore blocked out for stoping. Has gasoline power.

MEDICINE BOW'S MINES CO. **WYOMING.**

Office and mine: Centennial, *Albany Co.*, Wyo. Employs 3 men. Jas. Christensen, *president; G. S. Simmons, vice-president* and superintendent;

Wm. Benton, secretary, treasurer and general manager; preceding offi
Corlett Downey and Ralph W. Morse, directors. Organized Sept. 19,
under laws of Wyoming, with capitalization $100,000, shares $10 par.

Lands, 10 claims, unpatented, area 200 acres, also a 5-acre millsit
the Holmes district, showing syenite, granite, diorite and limestone, ore b
occurring as fissures in syenite and granite, and as contact deposits bet
limestone and serpentine. There are 3 ore bodies, of which one, known a
Cuprite vein, under development, is of 15′ average width, traceable circ
mile, carrying chalcocite, bornite and chalcopyrite, with some oxidized
estimated by company to average 5% copper, 3 oz. silver and $4 gold pe
Test shipments have returned 7 to 15% copper, 2 to 12 oz. silver and $3 t
gold per ton. Development is by 10 pits and shafts of 10′ to 80′ depth,
960′ tunnel. The company estimates 40,000 tons of ore in sight, with
tons blocked out for stoping. Property was idle, 1905-1907, but was reop
1908, on a small scale.

MEDINA COPPER CO. ONTA

Office: 520 University Blk., Syracuse, N. Y. Mine office: El Do
Hastings Co., Ont. Organized under laws of Washington, with capitaliz
$750,000, shares $1 par, practically as successor of the Medina Gold M
Co., which went out of business suddenly, after paying several dividends,
sumably unearned. Apparently has disposed somehow of its lands
Dorado, to the Ontario Copper Co., which is practically under the same
agement. Is not regarded favorably.

MEDINA GOLD MINING CO. ONTA

Dead. Succeeded, circa 1907, by Medina Copper Co. Formerly
Dorado, Hastings Co., Ont. Described Vol. VI.

MEDORA MINE. MICHI

Owned by Keweenaw Copper Co.

MEGORRIS COPPER CO. ARIZ

Mine office: Silver Bell, Pima Co., Ariz. Mervin Rice, president; W
Coe, secretary. Capitalization, $600,000. Lands, sundry claims, in the
Hat district, said to show good ore. Not favorably regarded, idle some
and apparently moribund.

MEGUNTICOOK GOLD & COPPER MINING CO. COLOR

Office and mine: Lake City, Hinsdale Co., Colo. P. G. Dawson,
director, at last accounts. Capitalization $400,000, shares $5 par. Idle
apparently hopelessly insolvent.

GRUBE MEHLBACH. GERM

Letter returned unclaimed from former office, Weilmünster, He
Nassau, Germany. Has auriferous and argentiferous lead, copper and
sulphides, with steam and electric power.

MELBA MINING CO. ARIZ

Dead. Formerly at Patagonia, Santa Cruz Co., Ariz.

MELCZER MINING CO. MEX

Office: 1104-27 William St., New York, N. Y. Mine office: Pesq
Ures, Sonora, Mex. Company holds direct title to property formerly cl
by the Copete Mining Co., and transferred later thereby to Copete Co
dated Copper Co. For further light on a complicated and rascally situ
see Copete Mining Co.

MELKEDALEN COPPER MINES, LTD. NORW

Dead. Reorganized, 1904, as Melkedalen, Ltd. Formerly at Ev
Ofoten Fjord, Tromsö, Norway.

MELKEDALEN, LTD. NORW

Office: 23 Leadenhall St., London, E. C., Eng. Mine office: Ev
Ofoten Fjord, Tromsö, Norway. Geo. Book Mee, chairman; W. A. St

secretary; J. D. Holman, consulting engineer. Organized Apr. 26, 1904, under laws of Great Britain, as a reconstruction of the Melkedalen Copper Mines, Ltd., with capitalization £125,000, shares 10s. par; issued, £78,103. Lands, 440 acres, freehold. An electric railroad, connecting mines with the sea, was under construction, 1908. Mill, near Rosevanden, rated at 150 tons daily capacity, was begun June, 1907. Company plans operations on the basis of a yearly production of 60,000 tons of iron pyrites and cupriferous pyrites, to be exported.

MELROSE COPPER MINE. **AUSTRALIA.**

Office: 10-114 Pitt St., Sydney, Australia. Mine office: Condoblin, Cunningham Co., N. S. W., Australia. H. Ernest A. Miller, managing director and secretary; Geo. Eason, treasurer; preceding officers and Samuel Solomons, directors; Malcolm Darrach, mine superintendent. Organized Dec. 1, 1903, under laws of New South Wales, with capitalization £12,000, shares £5 par.

Lands, 2 claims, area 120 acres, held under 21-year lease from the crown, at 5s. royalty per acre yearly, with option of renewal, also a 10-acre water-right, in the Melrose and Condoblin districts. Property is well timbered, but water is scarce, nearest permanent water being the Lachlan River, 26 miles south. The government railway is 29 miles distant. Mine was first known as the Boone West, and later as the Anaconda.

Property shows uptilted Silurian slates, merging into schistose slate, carrying fissure veins with chutes, of which 4 are proven, these ranging 6′ to 20′ in width, 30′ to 50′ in length, and depth, proven on the Southern chute, of 280′. Development is by shafts of 95′, 280′, 65′ and 100′, and by a tunnel. No. 1 chute carries 3′ of chalcocite and 3′ of mixed ore. No. 2 chute has a paystreak carrying cuprite and chalcocite, balance of vein carrying chalcopyrite, of circa 4% tenor, with combined gold and silver values of circa 16s. per long ton, with gangue of altered iron sulphides. No. 3 chute shows 6′ of lead and copper ores. Values are erratic, ranging from 2.5 up to 30% copper, with a general average, for pay ore, of 6 to 8% copper, circa 3 oz. silver and 2 dwts. gold per ton. Management estimates about 15,000 long tons of ore in sight, with circa 8,000 tons blocked out for stoping.

The mine has no machinery equipment, using horsepower and windlass. Property considered promising.

MEMPHIS COPPER CO. **NEW MEXICO.**

Office: 601 Postal Bldg., Kansas City, Mo. Mine office: Organ, Donna Ana Co., N. M. J. I. McCullough, president and general manager; J. R. Bowersox, vice-president; Hill P. Wilson, secretary; F. M. Johnson, treasurer; preceding officers, C. B. Gill, G. F. Sanford, J. T. Wallace and A. M. Peck, directors Organized June, 1905, under laws of New Mexico, with capitalization $1,000,000, shares $1 par. Has 2 shafts, of circa 175′ each, and shipped from same, 1905, ore worth $7,965, averaging 17.5% copper and 7 oz. silver per ton. Presumably idle.

MEMPHREMAGOG MINING CO. **QUEBEC.**

Mine office: Bolton Centre, Brome Co., Quebec. Property is the Smith mine. Idle some years.

LORENZO MENA. **CHILE.**

Office: Cabildo, La Ligua, Aconcagua, Chile. Mine office: Nipa, La Ligua, Aconcagua, Chile. Lands include La Mina Cata, at El Quemado, 9 kilometers from Cabildo, showing a vein of 6′ to 7′ average width, in granite, with strike N. 20° W., and dip of 78°, carrying cupriferous pyrite with calcite gangue, averaging only 4 to 5% copper tenor, and available mainly as a fluxing ore. Production, 1903, was circa 1,800 metric tons of 4% ore, secured by 35 men. La Mina Santa Rosa y Anexas has a vein of 2′ to 3′ width, opened to depth of 140′ and length of 200 meters, producing, 1903,

circa 30 tons of 30% ore, after hand selection. Production, 1903, esti
at 125,000 lbs. fine copper.

MENDOCINO COPPER KING MINING CO. CALIFO

Mine office: Yorkville, Mendocino Co., Cal. Has slight developme
tunnel. Idle since circa 1903.

MENDOZA CONSOLIDATED COPPER CO. ME

Office: 709-104 North Spring St., Los Angeles, Cal. Mine office: La
Sur, Baja California, Mex. Juan H. Mendoza, president; Jesse J. MacD
general manager. Has auriferous and argentiferous lead and copper
carrying values mainly in the precious metals. Has a mill with cru
10-stamps and a Huntington mill. Was said to employ circa 150 men, a
time, which probably was an ovestimate. Idle at last accounts.

MENLO PARK COPPER MINING CO., LTD. NEW JE

Dead. Formerly at Menlo Park, Middlesex Co., N. J.

SOCIEDAD ANOMINA COBRES DE MENORCA. SP

Offices: Gran Via, 32, Bilbao, Spain. Mine office: Mercadal, M
Menorca, Spain. Cirilo de Gana, president; Fernando Olascoaga, vice-
dent; Manuel de Ozamir, secretary; Esteban Puego, managing director; I
de Prisbuer, purchasing agent; Santiago de Arechago, consulting engineer.
ganized October, 1901, under laws of Spain, with capitalization 2,000,00
setas, shares 250 pesetas par, 35% paid up.

Lands, 411 hectares, including the Rubia, Partida, Emilia and other
per mines, at the base of Mt. Toro. Presumably idle.

JOSÉ DEL C. MENSES. CH

Mine office: El Cobre, La Ligua, Aconcagua, Chile. Property i
Nueva and La Esperanza mines, showing a vein of 2 meters average
with northeasterly-southwesterly strike, carrying sulphide ores. In 1903
duced circa 600 tons of 5% copper ore with 14 men.

AKTIESELSKABET MERAKER GRUBER. NOR

Office and mine: Meraker, Trondhjem, Norway. P. C. Soelberg,
man; Edmund Harbitz, vice-chairman; Fr. Krohg, secretary; R. Sive
treasurer; Joh. C. Andresen, managing director; M. Rasmussen, superin
ent; Harold Dahl, mill superintendent. Organized 1906, under laws of
way, with capitalization 1,200,000 kroner, shares 500 kroner par. Ore c
1.5 to 6% copper, and 45 to 47% sulphur. Company plans an ultimate y
productive capacity of 50,000 metric tons of ore.

MERCEDES COPPER CO. ME

Office: care of I. K. Franklin, Nogales, Ariz. Mine office: Santa
Magdalena, Sonora, Mex. Under development with a small force since
1905.

MERCER-SAN RAFAEL MINING CO. ME

Mine office: Tapalpa, Sayula, Jalisco, Mex. Lands are on the ea
slope of the Sierra Cacoma, circa 21 miles west of Ayutla. Topograp
rugged, and claims are well located for development by tunnel. Pro
shows a wide belt of quartzite and diorite. Mine is an antigua, ores car
gold, silver and copper values, with a little lead and zinc. Equipmen
cludes a water-power installation, 5-stamp mill, cyanide plant and patio
a concentrator is planned.

MERCER SYNDICATE. ARIZ

Mine office: care of W. H. Mercer, P. O. Box 56, Globe, Gila Co.,
Lands, sundry claims, in vicinity of the Five Points property, on wh
shaft was sunk in 1906. Presumably idle.

MERISSKI WORKS. RU

Office: care of R. A. Richner, Batum, Russia. Mines office: Kutais,
sia. Production, 1899, was 164,092 lbs fine copper. Presumably idle.

MERRILLA COPPER MINING CO. AUSTRALIA.

Mine office: Goulburn, N. S. W., Australia. Has a 124′ shaft, with cross cut at 112′, expected to cut ore.

MERRIMAC COPPER CO. COLORADO.

Dead. Formerly claimed to be located at Taylor, Colorado, which is not a postoffice.

MERRY ENGLAND SYNDICATE. NEW GUINEA.

Mine office: Port Moresby, New Guinea. Property, adjoining the Astrolabe, was under development, on a small scale, early 1908.

MESA MINING & REDUCTION CO. ARIZONA.

Dead. Formerly at Mesa, Maricopa Co., Ariz.

MESCALERO MINING & MILLING CO. NEW MEXICO.

Mine office: Roswell, N. M. Mine office: Parsons, Lincoln Co., N. M. J. A. Ryan, president; J. A. Cottingham, secretary; John S. Lenox, general manager; James E. Hunt, superintendent; John Kinnie, mill superintendent. Mine, developed by a 400′ tunnel, carries auriferous and argentiferous copper ores. Has steam and electric power, 20-stamp mill, concentrator, 100-ton cyanide plant and 50-ton smelter. Presumably idle.

MESCAL MINING CO. ARIZONA.

Office: Southern Trust Bldg., Little Rock, Ark. Mine office: Jerome, Yavapai Co., Ariz. Employs 10 men. Capt. Samuel B. Adams, president; Wm. M. Kavanaugh, treasurer; preceding officers, C. Traves Drennen, J. E. Keeper and Walter C. Miller, directors; J. Prather, secretary; Jas. F. Mowing, superintendent. Organized under laws of Arizona, with capitalization $1,500,000, shares $1 par.

Lands, 7 claims, 3 patented, in Mescal Gulch, near Mingus Mountain, showing fissure veins in slate and contact deposits between slate and diorite. Main ore body, of circa 3′ width, traceable circa 1,600′, opened to depth of 145′ by an 85′ shaft and tunnels of 220′ and 900′, with circa 1,200′ of workings, shows chalcopyrite assaying 1 to 2% copper, with a trace of gold.

Property has 5 buildings. Company plans continuing development by tunnel, and eventually sinking a shaft.

MESCAL MINING & MILLING CO. ARIZONA.

Dead. Formerly at Providence, Yavapai Co., Ariz.

MESSINA COPPER EXTENSIONS, LTD. TRANSVAAL.

Office: P. O. Box 1955, Johannesburg, Transvaal. Organized under laws of Transvaal, with capitalization £3,000, shares £1 par; fully issued. Owns 100 base metal claims, on the government farm Mondfarian No. 3, on the Limpopo River, in the Zoutpansberg district, Transvaal. Name changed, cash and reorganization proposed, at last accounts.

MESSINA (TRANSVAAL) DEVELOPMENT CO., LTD. TRANSVAAL.

Offices: 6 Princes St., London, E. C., Eng. Mine office: Messina, Zoutpansberg, Transvaal. Arthur M. Grenfell, chairman; Sir Lewis Michell, J. S. P. Samborne, J. P. Grenfell and R. J. Frecheville, directors; Wm. Challis, secretary; Chas. Stuart, chairman local board; C. [illegible], secretary local board; J. M. Calderwood, consulting engineer; [illegible], manager.

Organized Jan. 30, 1905, under laws of Great Britain, with capital £110,000, increased, Jan. 27, 1908, to £200,000, shares £1 par. Of £50,000 authorized, £43,500 issued, at 6%, and company has power to issue of £210,000 convertible debentures, at 6%, for redeeming debentures, acquisition of additional lands and [illegible].

Lands are 1,200 claims, on the farm Berkenrode, [illegible] lease from the Transvaal government, also 3 freehold farms, of circa 14,000 acres, to which the farm Vogelzang [illegible].

rode, and carrying the extension of the Messina ore bodies, was added, 1908. Lands formerly were in dispute with the Oceana Consolidated Co., Ltd., but satisfactory titles have been secured. Lands are near the Limpopo River, and water is available at fairly shallow depth. The property carries some timber fit for mining and building purposes, with good timber circa 50 miles distant.

The property shows extensive remains of ancient workings, with scoria from old smelting operations. Formation is mainly granite, carrying a mineralized zone of circa 1,300′ width, having 5 parallel veins, traceable several miles. There are two main ore bodies, of which the north main lode has been proven for 1,700′ length and the south main lode for 2,400′. Ore is largely chalcocite, with considerable bornite and chalcopyrite, and the property shows very high grade ore in quantity.

The mine is opened by 7 shafts, mainly shallow, No. 3 shaft being 315′ deep, with 3 levels opened, the bottom level, at 300′, showing a 42″ vein of chalcocite, giving average assays of 25.25% copper. Workings, July 1, 1908, aggregated 11,774′ in length, and for year ending June 30, 1907, development was 220′ of sinking and 3,328′ of drifting and crosscutting. Ore reserves, Jan. 1, 1908, were estimated at 15,423 long tons, averaging 24.04% copper, with 4,236 tons of second grade ore, assaying 11.06% copper, on surface. On July 1, 1908, the mine had upwards of 7,000 tons of high grade ore blocked out, for stoping. The figures of ore reserves are conservative, and, despite the exceedingly high average assay tenor, the estimates of values are reliable.

Equipment includes a double hoist and 3-drill air-compressor. Property has a number of good buildings, including shops, engine houses and dwellings for officials. Wood and coal are scarce, but it is thought that coal exists on the Rhodesian side of the Limpopo River.

The 50-ton mill, designed by Mr. Calderwood, begun work May 1, 1908. Equipment includes a Blake crusher, delivering ore to a 70-ton bin, whence it is fed automatically to coarse crushing rolls, and delivered therefrom to a bucket elevator, which leaves crushed ore at the top of the mill, whence it is delivered through spout to the first of a series of 4 revolving trommels having water sprays. Mill equipment includes Hartz jigs, 2 Wilfley tables and classifiers. The mill has a monthly productive capacity of about 250 long tons of concentrates, averaging 64.05% copper, with rich middlings and slimes accumulated for future treatment. The mill has reservoirs for water supply, obtained from the mine and a well, and fuel is gas, obtained from a Tangye suction gas producer plant, retorting charcoal.

Transportation facilities are poor, consisting mainly of donkey wagons from the mine to Pietersburg, via Brak River, a distance of 180 miles, with a freight rate of £6 per ton. A new government wagon-road will aid greatly, and a railroad to the district is projected by the Transvaal government.

There is a shortage of native labor, which has hampered operations materially.

The management plans building a small smelter, to have a reverberatory furnace, and such a smelter should pay for itself within a short time, owing to high freight rates, though the scarcity of fuel might render smelting difficult and costly.

Considerable production has been secured, under disadvantageous circumstances, ore being hand-cobbed and brought up to high tenor on picking-tables and hand jigs. Production, for two years ending Dec. 31, 1907, was 2,616,000 lbs. fine copper. For fiscal year ending June 30, 1907, production was 2,967 long tons of ore, averaging 23.9% copper, by assay, of which 768 tons, 10 cwts., assaying 60.66% copper, were shipped to London, yielding 1,044,219 lbs. fine copper, realizing £24,626 and returning a net profit of £14,832. For fiscal year

ending June 30, 1908, ore shipped averaged 58.03% copper, and yielded gross returns of £33,102.

The Messina is a property of exceptional promise, and has been excellently handled. It is the principal and only important copper producer of the Transvaal, and bids fair to develop into a large and profitable mine.

METALS MILLING CO. **ARIZONA.**

Mine office: Walker, Yavapai Co., Ariz. Geo. C. Marrs, superintendent. Property is the Shelton group, carrying auriferous and argentiferous copper ores. Has steam and electric power and 10-stamp mill.

COMPAÑIA METALURGICA. **CHILE.**

Office: Santiago de Chile. Mine office: Chuquicamata, Calama, Antofagasta, Chile. Organized March 9, 1905, under laws of Chile, with capitalization 2,500,000 pesos, shares 100 pesos par.

COMPAÑIA METALURGICA NACIONAL. **MEXICO.**

Is the Mexican incorporation of the National Metallurgical Co.

METATES MINING CO. **MEXICO.**

Letter returned unclaimed from former office, Columbus, Ohio. Mine office: Guadalupe de los Reyes, Cosalá, Sinaloa, Mex. Organized December, 1902, with capitalization $1,000,000, shares $1 par. Is controlled, through stock ownership by Sinaloa Exploration Co. Lands are circa 80 miles north of Mazatlán. Apparently moribund.

METHOW GOLD & COPPER MINING CO. **WASHINGTON.**

Office: 77 Jamieson Blk., Spokane, Wash. Mine office: Winthrop, Okanogan Co., Wash. W. D. Scott, president; J. N. Tewinkel, secretary and treasurer. Organized, 1889, under laws of Washington, with capitalization $50,000, shares 5 cents par. Lands, 8 claims, area 150 acres, showing fissure veins in metamorphosed conglomerates of Huronian age, carrying sulphide ores assaying 9% copper, 2 oz. silver and $5.50 gold per ton, developed by a 200' shaft and three tunnels, longest 564'. Has available water power and timber. Idle several years, except for annual assessment work.

METROPOLITAN MINING CO. **WASHINGTON.**

Mine office: Berlin, King Co., Wash. Ores carry gold, silver and copper. Has water power. Idle several years.

COMPAÑIA METALURGICA MEXICANA. **MEXICO.**

Office: 82 Beaver St., New York, N. Y. Mine offices, Sierra Mojada, Mouclova, Coahuila, Mex., and Concepción del Oro, Mazapil, Zacatecas, Mex. Works office: San Luis Potosí, S. L. P., Mex. Employs circa 1,300 men. Robert S. Towne, president and treasurer; Geo. Foster Peabody, first vice-president; A. Foster Higgins, second vice-president; Chas. J. Nourse, Jr., secretary and assistant treasurer; Donald C. Brown, general manager; Geo. T. Carnahan, general mine superintendent; J. L. Saint-Dizier, assistant superintendent; C. M. Van Cleve, smelter superintendent; Frank W. Carnahan, engineer; T. L. Carnahan, local superintendent at Concepción del Oro; J. M. Williams, Jr., local superintendent at Sierra Mojada; W. K. Woodard, local superintendent at San Luis Potosí.

Organized 1890, under laws of New Jersey, with capitalization $4,000,000, shares $100 par, in $1,500,000 cumulative 8% preferred, $1,750,000 cumulative 6% second preferred, and $1,750,000 common stock. Bonds $2,000,000 at 6%, sinking fund, 2% per annum of outstanding bond issue. Mercantile Trust Co., New York, registrar. Annual meeting, first Monday in June.

Property interests are extensive, including control of numerous mining, transportation and land companies, among the more important of which are the Sombrerete Mining Co. and the Mexican Lead Co., at Sombrerete, Zacatecas, Mex., and the Montezuma Lead Co., Alvarez Lead & Zinc

can Mineral Railway Co. and Potosí & Rio Verde Railway Co. The company owns extensive tracts of timber lands, and has steam and electric power.

The Veta Rica mine, at Sierra Mojada, produces silver-lead and copper ores, latter averaging circa 3% copper, 5% zinc and 20 oz. silver per ton. Development is by a 600' main shaft, and values are mainly in lead and silver.

The Cerro Prieto and adjoining mines, at Concepción del Oro, are developed by tunnels, producing auriferous copper ores.

The San Pedro and San Pablo mines are important producers.

The smelter, of circa 750 tons daily capacity, has a modern equipment throughout, including 12 furnaces for reduction of gold, silver and lead ores, and a special copper department of 100 tons daily capacity. The works have steam and electric power, and employ circa 1,000 men. The company is a large producer of lead and silver, with considerable outputs of copper and gold, secured mainly as by-products.

MEXICAN-AMERICAN SMELTING CO. **MEXICO.**

Letter returned unclaimed from former office, 24 Broad St., New York, N. Y. Works office: Guaymas, Sonora, Mex. Supposedly is controlled by Greene Gold-Silver Co. Property is a smelting plant, nominally rated at 250 tons daily capacity, apparently incomplete, and never blown in.

MEXICAN-ARIZONA MINING CO. **ARIZONA.**

Dead. Absorbed, 1903, by New England & Clifton Copper Mines of Arizona. Formerly at Clifton, Graham Co., Ariz.

MEXICAN COPPER CO. **ARIZONA.**

Dead. Formerly at Martinez, Yavapai Co., Ariz.

MEXICAN COPPER CO. **MEXICO.**

Mine office: Salinas del Peñon Blanco, Salinas, San Luis Potosí, Mex. Has steam and gasoline power and a small smelter. Idle.

MEXICAN COPPER REDUCTION CO. **MEXICO.**

Office: care of J. A. Haralson, vice-president and general manager, Mexico, D. F. Works office: San Luis de la Paz, Guanajuato, Mex. R. Marsans, president; J. E. Hartman, secretary; preceding officers, E. Benoit and O. C. Omer, directors. Property apparently consists of a patented process of reduction, by which the company expects to reduce ores without fluxes.

MEXICAN COPPER SYNDICATE, LTD. **MEXICO.**

Dead. Formerly had an office at St. George's House, Eastcheap, London, E. C., Eng.

MEXICAN DEVELOPMENT CO. **MEXICO.**

Office: 69 Wall St., New York, N. Y. Mine office: Coapa, Morelia, Michoacán, Mex. Geo. Buckman, president; G. E. Fauquier, vice-president; C. D. Knapp, Jr., secretary and treasurer. Organized 1906, under laws of Maine, with capitalization $2,000,000. Is a holding company only, controlling, through stock ownership, the Santa Emilia Copper Co.

MEXICAN EXPLORATION & MINING CO. **MEXICO.**

Office: 42 Broadway, New York, N. Y. Mine office: Sauqui de Batuc, Ures, Sonora, Mex. Organized 1908, to take over all rights and concessions of the Yaqui Development Co. Has authorized a $1,500,000 bond issue. Is said to control, through ownership of 51% of issued stock, the Douglas Copper Co., and apparently was organized to finance the Douglas Copper Co. and its allied and subsidiary corporations. Lands are reported to be mineral rights to 2,165 square miles, including a number of antiguas.

MEXICAN INVESTMENT & DEVELOPMENT CO. **MEXICO.**

Office: 82 Wall St., New York, N. Y. Operating office: Guanajuato, Gto., Mex. Mine office: Autlán, Jalisco, Mex. Employs 150 men. Dwight Furness, *president and general manager*; B. Morgan Esler, vice-president; Wm. Eaton, *secretary and treasurer*; S. N. Craig, superintendent; H. P. Wherry, mill super

tendent. Organized under laws of Arizona, with capitalization $300,000, hares $5 par.

Lands, 158 acres, also miscellaneous lands of 2,100 acres, former including he Agua Blanca mine, area 40 hectares, 30 miles northeast of Autlán and bout 75 miles from a railroad. The Agua Blanca, opened circa 1860, by John nd Edward Blake, and the leading copper mine of Mexico for two decades, hows diorite and andesite, carrying fissure veins with a brecciated zone of 30' o 50' width, traceable 2,000', carrying mainly chalcopyrite of 4 to 5% copper enor, the Agua Blanca being unique among the copper mines of the district n carrying neither gold nor silver values.

Development is by a 150' shaft and a 1,000' tunnel, showing about 30,000 netric tons of ore.

Equipment includes a 75-h. p. steam plant at the mine, 25-h. p. hoist and 2 mine buildings, including a 20x40' stone machine-shop.

The 100-ton concentrator, 50x150', of wood, has an 80-h. p. steam plant, 2 Hurtevant crushers of 200 tons daily capacity, 3 rolls, four 3-compartment igs, 2 Wilfley tables and one slime table, putting about 8 into 1, and producing irca 300 tons of concentrates monthly, which are shipped, by mule, to Ameca, hence by rail to Aguascalientes smelter.

A hydro-electric power installation has been given tentative consideration. Company plans continuing development, and hopes to produce about 1,000,000 bs. fine copper in 1909. Property considered valuable and management good.

MEXICAN MINERALS CO., LTD. **MEXICO.**

Office: 28 Budge Row, London, E. C., Eng. Letter returned unclaimed from former mine office, Zimapán, Hidalgo, Mex. S. Crowder, managing direc-or. Organized under laws of Great Britain, with capitalization £36,000; issued, £31,507. Debentures, £10,000. Lands, 300 hectares, including the Montezuma mine, carrying auriferous and argentiferous ores of copper, developed open-cast, with a hydro-electric power installation. Idle several years and mori-bund.

MEXICAN MINES CORPORATION. **MEXICO.**

Office: 25 Broad St., New York, N. Y. Mine office: Baca, Hidalgo, Chi-huahua, Mex. C. L. Graves, general manager; W. D. Pearce, resident manager; E. J. Ernest, mine superintendent. Organized under laws of Maine, with cap-italization $3,500,000, and is protocolized in Mexico. Lands are 4 groups, includ-ing the Ventura mine, about one-half mile from the Mina Cigarrero, having a 230' three-compartment shaft, showing fissure veins carrying streaks of aurif-erous and argentiferous copper below commercial grade. Is said to have de-veloped a little ore of commercial tenor.

MEXICAN MINES SYNDICATE, LTD. **MEXICO.**

Letter returned unclaimed from former mine office, Cusihuriáchic, Iturbide, Chihuahua, Mex. Chas. Moffat, manager. Property is La Reina mine, carry-ing argentiferous and auriferous lead and copper ores, latter secured in small quantities, as a by-product. Has gasoline power and 3 Huntington mills.

MEXICAN MINING & DEVELOPMENT CO. **MEXICO.**

Office: 511 Baker Blk., Springfield, Mo. Mine office: Ocotlán, Oaxa-, Mex. S. W. Grant, president; J. A. Taylor, vice-president; C. E. Davis, secre-tary; H. Parmenter, treasurer; C. C. Goldsworthy, mine superintendent. Cap-italization $1,250,000

MEXICAN MINING, REFINING & EXPLORATION CO. **MEXICO.**

Office: 501 I. W. Hellman Bldg., Los Angeles, Cal. Mine office: Ha-illo, Sonora, Mex. Employs 25 men. Wm. T. Calderwood, president and gen-eral manager; F. H. Vahrenkamp, vice-president; F. C. Lamb, secretary and treasurer; preceding officers, Chas. S. Montgomery, F. L. Wil-Lovis, directors; F. Smith, superintendent; H. H. Light, engineer.

Apr. 20, 1904, under laws of Arizona, with capitalization $5,000,000, shares $1 par.

Lands, 104 hectares, in 2 groups, first being the Creston de Cobre, circa 25 miles west of Hermosillo, said to be an antigua dating from the eighteenth century. This group shows 5 ore bodies, of which 3, under development, are reported by the company as of 30′ to 40′ width, carrying oxidized and sulphide ores of copper and lead assaying 7% copper, 50% lead, 80 oz. silver and $3 gold per ton. Development is by 5 shafts, of circa 1,000′ aggregate depth, and by a 300′ tunnel, estimated to show 100,000 tons of ore, which seems entirely too high. Property has a 30-h. p. steam plant, with 2 hoists.

Lands also include La Cobriza group, at Soyopa, area 4 hectares, said to show a 16′ vein with a 7′ paystreak carrying ore of 10 to 25% copper tenor, with silver values.

MEXICAN MINING SYNDICATE. **MEXICO.**

Dead. Formerly at Acuitzio, Morelia, Michoacán, Mex. Described Vol. VII.

MEXICAN SMELTER CO. **MEXICO.**

Office: Chicago, Ills. Works office: Pedriceña, Cuencamé, Durango, Mex. Property is a 50-ton furnace, built on the patents of Jas. E. Anderson, using petroleum for fuel.

MEXICAN SMELTING CORPORATION. **MEXICO.**

Office: 678 Salisbury House, London, E. C., Eng. Works office: Monclova, Coahuila, Mex. Maj.-Gen. G. de la Poer Beresford, chairman; A. F. Roberts, secretary Organized Aug. 29, 1908, under laws of Great Britain, with capitalization £150,000, in 100,000 ordinary shares of £1 par and 1,000,000 shares of 1s. par. Debentures, £200,000 first-mortgage profit-sharing debentures at 6½% authorized; £15,600 issued. Lands, circa 3,000 acres. Company is said to plan a $1,000,000 smelter, to compete with the American Smelting & Refining Co.

MEXICAN SMELTING & REFINING CO. **MEXICO.**

Works office: Taxco, Alarcón, Guerrero, Mex. Lawrence Tatum, president and general manager; Fredk. M. Perkins, superintendent. Lands, 200 hectares, including several antiguas, principal being the San José mines, carrying auriferous copper ores, with values mainly in silver. Has gas power, and a 60-ton smelter with water-jacket blast-furnace and a small refining furnace.

MEXICAN UNION MINING CO. **MEXICO.**

Office: 753 Monadnock Bldg., Chicago, Ills. Mine office: Unión de Tula, Autlán, Jalisco, Mex. Newton B. Storer, president; Chas. G. Thompson, secretary; Wm. H. Lees, general manager; B. W. Sweet, mill superintendent and engineer. Organized April, 1902, under laws of Arizona, with capitalization $1,000,000, shares $1 par.

Lands, 100 pertenencias, area 247 acres, in the Ayutla district, including the Soquite Prieto mine, having a 30′ fissure vein, with laterals, in limestone, opened by a 275′ shaft, showing carbonate ores, chalcocite and chalcopyrite giving assays of 7% copper, 10 to 50 oz. silver and from a trace to $10 gold per ton. Has a 75-h. p. steam plant and is said to have contracted for the development of a water power. The 35-ton concentrator has a 7x9″ Dodge crusher, one train of rolls, one 5′ Huntington mill and 3 Overstrom tables.

MEXICAN WESTERN DEVELOPMENT CO. **MEXICO.**

Office: 71 Broadway, New York, N. Y. Mine office: Chamela, Jalisco, Mex. John Hays Hammond, president; Maj. Frederick R. Burnham, general manager. Lands include the Rosario, La Luz and other mines, in the Bramador district.

MEXICOLA GOLD-COPPER MINING CO. **COLORADO.**

Dead. Formerly at Howard, Frémont Co., Colo., and Cripple Creek, Teller Co., Colo. Described Vol. VII.

MEYER-CLARK-ROWE MINES CO. **ARIZONA.**

Mine office: care of A. N. Forbes, agent, Tucson, Pima Co., Ariz. Lands, 7 claims, area 140 acres, known as the San Xavier group, 20 miles south of Tucson, showing argentiferous lead, zinc and copper ores. Is claimed to have 10,000' of openings. Presumably idle.

MIAMI COPPER CO. **ARIZONA.**

Dead. The first company by this name, having Samuel L. Gibson as president, was organized 1905, with capitalization $500,000, shares $1 par, and was succeeded, Nov. 30, 1907, by present company of same name. Formerly at Globe, Gila Co., Ariz.

MIAMI COPPER CO. **ARIZONA.**

Office: 42 Broadway, New York, N. Y. Mine office: Globe, Gila Co., Ariz. Employs circa 150 men. Adolph Lewisohn, president; J. Parke Channing, vice-president; Julius H. Susmann, treasurer; preceding officers, Wm. H. Nichols, Jacob Langeloth, Walter T. Rosen and Ralph C. Lupton, directors; Herman Cook, secretary; Louis A. Wright, general manager; F. C. Alsdorf, assistant general manager; N. O. Lawton, mine superintendent; H. Kenyon Burch, mill superintendent; Edw. C. Taylor, clerk.

Organized Nov. 30, 1907, under laws of Delaware, with capitalization $3,000,000, shares $5 par, fully issued and fully paid. Is controlled, through ownership of one-half of stock, by General Development Co. National Copper Bank, New York, registrar; Bankers Trust Co., New York, transfer agent. Shares are listed on the Boston stock exchange. Annual meeting, third Wednesday in April.

Lands, 22 claims, partly fractional, area 200 acres, in process of patenting, also 100 acres in mill and smelter sites, giving total holdings of circa 300 acres, in the Red Springs district, 6 to 8 miles west of Globe. Property includes water rights on Pinal Creek, carrying abundant water for a large mill.

The property shows an area of highly silicified Pinal schist, at or near the point of contact with Schultze granite. The schistose area shows strong evidences of shearing, and mineral occurs as veinlets and coatings of chalcocite on the brecciated material, with some chalcopyrite showing on the 470' level. The ore body is leached above a depth of 220', and is somewhat similar to the Ely and Bingham porphyry deposits, but is higher in average tenor, the mean of numerous assays being 2.9% copper.

Development is by two 3-compartment shafts, known as the Red Rock and Red Springs, a third shaft of 220' depth, and a new 4-compartment main working shaft. The mine had 7,677' of workings Oct. 15, 1908.

Principal developments are on the Red Rock shaft, which cut commercial ore at 220', and was 720' deep Nov. 1, 1908, with levels opened at 270', 370' and 470', and with plats cut for levels at 570' and 670'. The 270' level of this shaft shows about one acre of ore of commercial tenor, while the 370' level, only 100' lower, shows a very much larger ore body, and the 470' level shows a still greater increase. The exact dimensions of the payable area of ore have not been determined on either the 370' or 470' levels, but the entire development is under about 20 acres of ground, with the certainty of further payable ore beyond the limits yet proven, and a strong likelihood that workable ore will be found to extend to the Red Springs shaft, to the northward. The schist, at a depth of 570', apparently averages about 1.5% copper only, and it is likely that the limits of payable ore in large quantities will be reached at approximately 500', though it is not unreasonable to expect a considerable tonnage of commercial ore at various points below this depth. On Nov. 1, 1908, the workings in this shaft had blocked out, on 3 levels, circa 4,000,000 tons of ore, with about 2,500,000 tons additional practically blocked out, and with about 10,000,000 tons fairly in sight.

The Red Springs shaft, 2,150′ northwest of the Red Rock shaft, was sunk 348′ deep Oct. 15, 1908, and shows ore of about the same grade as the Red Rock shaft, with good prospects of developing a large ore tonnage, and a reasonable chance of proving a continuous ore body between the two shafts.

Extraction is to be through a 14x18′ main working shaft, with 4 compartments, sunk outside of the proven mineral zone, in order to render it immune from drawing. This shaft will operate two 8-ton skips, and will have a 2,000 tons daily productive capacity.

Equipment includes a 250-h. p. hoist and air-compressor, pumps, etc., and a heavy equipment will be given the 4-compartment shaft. Buildings include a general store, for the convenience of employes.

Survey has been made for the extension of the Gila Valley, Globe & Northern railway to the mine, and this is to be built in 1909.

Careful study is being given to the matter of reduction, and an experimental mill has been built, with one Nissen stamp, 2 Johnson vanners and Wilfley tables. A careful study is being made of the porphyry mills of Utah and Nevada, and it is not likely that the company's concentrator will be in operation before 1910. The mill will be built at the mine, and water pumped in from Pinal Creek, which is the correct method. The company's first plan called for a first-unit mill of 1,000 tons daily capacity, but ore has been developed so rapidly, and in such enormous quantities, that two units may be built, as soon as the metallurgical processes are fully decided upon. The ore concentrates readily 10 into 1, and possibly may concentrate 12 or even 15 into 1, though necessarily with higher tailings losses, and the ratio of concentration will be determined by the mean between the point of highest concentration and that of lowest losses. The company's estimates, which are conservative throughout, having been prepared by Mr. J. Parke Channing, are based on a final copper extraction of 2% only, from ore of 2.9% average copper tenor, but it is probable that, in actual practice, extraction will average better than 40 lbs. per ton, and possibly as high as 45 lbs. per ton, or 2.25%.

An initial milling unit of 1,000 tons daily capacity would give the property a productive capacity of 12,000,000 to 15,000,000 lbs. fine copper yearly, while a 2,000-ton mill would make it possible to produce 25,000,000 to 30,000,000 lbs. fine copper per annum. Mr. Channing estimates that copper can be laid down in New York for 9 cents per pound, and his figures are entitled to exceptional weight, for the reason that similar predictions by the same authority, made in the earlier stages of development, have been fully verified in the cases of the Tennessee and Nevada Consolidated, where Mr. Channing laid bare to the public figures, and deductions therefrom, that usually are withheld, thereby proving the courage of his convictions, and reaping the reward of confidence due the man whose forecasts come true.

The Miami was unique among American copper mines in the method of its flotation. The company advertised extensively, in the daily press, its advertisements being strong, but conservatively worded. As a rule, advertised stocks in the United States are put out by utterly irresponsible parties, though the British method of promotion calls for extensive advertising. The company secured $1,000,000 additional by selling its treasury stock, September 1908, and is in a strong position financially. The Miami is a property of altogether exceptional promise, and is practically certain to make a very large and profitable mine, while the management is thoroughly experienced and capable, with the prestige of success in other fields.

MICHIGAN-ARIZONA COPPER CO. **ARIZONA**

Office: 2 Ingersoll Block, Lansing, Mich. Mine office: Bonita, Graham Co., Ariz. Emory W. Olds, president; John Holbrook, vice-president; Dr. F. *F. Allen, secretary*; Jacob Stahl, treasurer; preceding officers and M. H. Jew

s. Organized June 17, 1907, under laws of Arizona, with capitalization 00, shares $1 par. Lands, 80 acres, in the Sulphur Springs Valley, at t of Graham Mountain, showing two 8″ parallel veins of ore assaying 9% copper, with traces of gold and silver, opened by a 42′ shaft.

AN & ARIZONA DEVELOPMENT CO. **ARIZONA.**

ce: 905 Metropolitan Life Bldg., Minneapolis, Minn. Mine office: , Pima Co., Ariz. C. C. Prindle, president; R. M. Bennett, vice-presi- has. W. Sexton, secretary and treasurer. This company reorganized etia Copper Co., under a plan of reconstruction explained in Vol. V. is a considerable share interest in the Helvetia, and about 40 unde- claims adjoining the Helvetia.

AN-ARIZONA MINING CO. **ARIZONA.**

e: 17 First St., Muskegon, Mich. Mine office: Mammoth, Pinal Co., H. Hamilton, president and general manager; James Hamilton, vice- ; Theo. P. Swift, secretary, treasurer and engineer. Organized Aug. under laws of Arizona, with capitalization $5,000,000, shares $1 par. ls, 7 claims, area 140 acres, in the Bunker Hill district, 22 miles from a showing fissure veins, and impregnations in the granite, and, at times, ated masses of country rock, with porphyritic intrusions. Has a 50′ l tunnels of 93′ and 150′, showing cuprite, melaconite, malachite, chal- d occasional chrysocolla, giving average assays of 29.2% copper, 5 oz. d $1.20 gold per ton. Company planned a small concentrator. Pre- idle.

AN BOY MINING & MILLING CO. **WYOMING.**

. Formerly at Encampment, Carbon Co., Wyo.

AN & COLORADO MINING & MILLING CO. **COLORADO.**

: Colon, Mich. Mine office: Florissant, El Paso Co., Colo. W. H. president; J. W. Bryant, vice-president; Dr. A. J. Kiser, secretary; mebaugh, treasurer; John M. Kellogg, general manager. Organized 1902, under laws of Michigan, with capitalization $500,000, shares $25 ual meeting, first Tuesday in December.

s, 14 claims, area 280 acres, also a 5-acre millsite and sundry water neceeded to properties of Colorado Springs Copper Mining & Tunnel Blue Mountain Copper Mining Co., circa January, 1906. Development el. Presumably idle.

N COPPER & GOLD MINING CO. **UTAH.**

: 404 West Third South St., Salt Lake City, Utah. Mine office: aver Co., Utah. Michael H. Osborne, president; L. C. Johnson, sec- Organized December, 1902, under laws of Utah, with capitalization shares $1 par. Lands, 4 claims, area 80 acres, known as the New p, in the San Francisco district, near the Horn Silver mine, opened haft. Idle several years, except for assessments levied.

N COPPER MINING CO. **MICHIGAN**

: 15 William St., New York, N. Y. Mine office: Rockland, Ontonagon Mich. Employs 360 men. Jos. E. Gay, president; C. R. Corning, J. Wheeler Hardley, secretary; John R. Michigan lands include the old Minnesota, Rockland and Su
The Superior made 567,331 lbs. fine copper, 1856-1869 and 1876-187
land, lying next east of the Minnesota, was operated 1853-1
6,210,309 lbs. fine copper, from the Minnesota contact vein, wh
about 2′ width and carried considerable silver, in that mine. Th
sota mine, opened 1847, closed 1870, made 34,704,668 lbs. fine cop
dividends of $1,820,000.

The Minnesota, or Minesota mine, as it was then spelled, w
by a line of prehistoric pits, in one of which was a 6-ton mass of c
on skids, on top of which grew a hemlock tree having nearly 400
nual growth. Immense masses of virgin copper were taken from th
the largest, found 1856, measuring 12′ 6″x18′ 6″x46′, weighing 52
and requiring the work of 20 men for 15 months in cutting it into
enough for hoisting. The Minnesota was opened on a contact ve
gangue of quartz, epidote and calcite, with an amygdaloidal hang
glomerate footwall, both impregnated with copper near the cont
called the Minnesota a conglomerate mine, because more copper
the footwall than in the denser amygdaloidal hanging-wall. The ri
occurred near the "counter vein," a transverse fissure. The M
10 shafts, deepest circa 1,100′. Four central shafts were sunk
on the North Minnesota fissure, which joined the contact vein
depth. The Minnesota had a 40-ton mill, with gravity stamps,
duction was mainly from masses, and the smaller pieces of native
barrel-work. In 1870 the old Minnesota company met, sumulta
prices for copper, a pinching of the vein, and the necessity for m
hoists, and gave up the struggle. The openings above the adit lev
from water, were worked by tributors, for years afterwards, and
dreds of tons of mass and barrel copper, affording evidence that a
of heavy copper must remain in the lower stopes, then inaccessible
because filled with water, and these also should yield considerable
left unmined in the days when nothing under 3% rock paid for m

The Michigan mine is a combination of two entirely new mi
opened old mine, its shafts being sunk on the Calico amygdaloid
cropping 140′ north of the Minnesota contact vein, and a few f
the North Minnesota fissure. In addition to the Calico lode, Minne
North contact and Branch vein, all more or less developed by the p
ings, the Michigan tract carries the Knowlton, Mass, Ogima and
daloid beds, also an unnamed amygdaloid farther south, these latt
to the Evergreen belt, worked a few miles to the northeastward
and Adventure mines. The Knowlton, or northernmost of the Eve
of parallel lodes, lies circa 1,000′ south of the old Minnesota sha
amygdaloid, supposed to be the Butler, opened to some extent
Bluff, 2,000′ south of B shaft, shows heavy copper and stamp rock
3 old shafts on the Butler lode, also an adit cutting several pa
crous beds. There also are copper-bearing amygdaloid outcrops
Calico bed, on which no work has been done.

The Calico amygdaloidal bed parallels the contact vein of the
sota mine, which has been reopened to some extent by crosscuts.
rock is a melaphyr trap, and the Calico bed ranges from almos
nearly a conglomerate, carrying considerable felsite, with occasion

large patches of prehnite, epidote and calcite. The strike of the Calico is approximately N. 68° E., with a dip of about 47° to 50° at the bottom ie mine. The Calico bed is 5′ to 25′ in width, with an average of about the upper workings, but, on the 2,000′ level is only 4′ to 6′ wide, though in copper. Most of the copper in the upper workings occurs in a 2′ to 3′ reak near the footwall, though occasionally patches of good ground occur ie center, and on the hanging-wall. The Calico copper carries a little , and is mostly in nodules, called shot-copper, with occasional barrel- and some small masses, the heavy copper occurring mainly near the sections of numerous cross-fissures that are filled with clay gouge. The s strong, standing well without timber, and is sinuous, both as to strike lip, with very irregular walls, the amygdaloid bed merging into the trap all by almost imperceptible degrees. There also is a marked tendency e part of the Calico to split, the "footwall vein" being rich in such but leaving the main bed very lean in copper. There also is a "hang- all vein," and branch veins, in addition to which are the Minnesota t and North Minnesota fissure veins, within 140′ distance of the Calico. he "Branch Vein" lies between the Calico amygdaloid and the Minne- ontact vein, closely underlying the former on the fifth level, but steadily ng therefrom until it touches the contact vein just above the thirteenth rolling away therefrom again at greater depth. The "Branch Vein" row, being 3′ to 5′ in width, but very rich, and is now the largest pro- of heavy masses of native metal in the Lake Superior district, a 20-ton found 1905, having been the largest mass of native copper secured from ake Superior mine for some years. The eastern drifts of the "Branch " makes the best showing, as a rule. The "Branch Vein" is thought identical with the "North Vein" formerly worked in the Rockland now a part of the Michigan, tributary to C shaft. The "Branch Vein" about 30 lbs. fine copper per ton and furnishes about one-third of the ge and one-half of the copper production of the mine, product being ximately one-third heavy copper and two-thirds stamp copper. The nch Vein" dips at approximately 58° and carries largely mass and copper with considerable stamp rock. The "Branch Vein" has been for about 2 miles and has considerable reserve openings. The heavy from the "Branch Vein" is in pieces weighing from a few hundred p to 20 tons each, and 2 men using pneumatic chisels are employed ily, cutting these masses into pieces sizable for hoisting.

he mine has about 10 miles of workings and is opened by 3 shafts, all on the Calico bed, reaching the other copper-bearing beds and veins by uts. The mine works 45 drills. With the exception of the ninth level vels down to the twelfth have reached the northern boundary of o bed.

shaft, the westernmost, lies about 1,000′, on the strike of the the boundary line of the National mine. This shaft is 7x16′ in rs, with 3 compartments and is 2,030′ in depth. The Calico in places, in some of the upper levels, and shows some excellent ascent on the 14th level, sent to the contact vein of the old the latter to average about 4′ in width, and to be rich in ce of about 150′ only.

shaft, 985′ east of A, with 2 compartments, is 1,781′ deep en deepened for several years. The Calico bed runs in the upper workings, and the lower levels show haft has a Burnham sinking pump, with capacity of nute from a quarter-mile depth. The old Minnesota , from B shaft, by diamond drill holes, bored

level. The old workings were found in very bad shape, after three decades of neglect. The contact vein is reached also by crosscuts on the 11th and 13th levels, below the bottom of the old workings, showing a vein of 20′ width with 6′ to 7′ on the hanging-wall carrying copper in fair quantities.

C shaft, 1,353′ northeast of B, is 1,650′ in depth, and rock production was begun therefrom circa February, 1908. The formation is somewhat more settled than to the westward. Adjoining C shaft is an old shaft of the Minnesota, of circa 675′ depth, with collar 90′ below the collar of C shaft.

There is room on the main tract of the Michigan for an additional shaft west of A, and the great extent of the landed holdings provides ample room for opening mines on any other available cupriferous bed that may be developed on any part of the company's lands.

The shaft-rockhouses at A and B are duplicates, each having 800-ton storage bins, and were partially remodeled, 1908, and given double dumps, the lower for poor rock. Equipment of each includes a 50-h. p. Nordberg engine, two 18x24″ crushers, one 13x20″ crusher and a steam-hammer for mass and barrel work.

The engine-house, 50x115′, stands midway between shafts A and B. The A section has a 24x60″ Webster, Camp & Lane double-cone straight-face hoist, with a 7′ drum having a 15′ face, carrying 4,000′ of cable and capable of raising 4-ton skips in counterbalance at 3,500′ per minute from a depth of 3,500′. The hoisting cable passes around solidly anchored sheaves, giving a straight pull at each shaft. The B hoist, installed 1905-1906, is a 24x60″ Allis-Chalmers duplex-cylinder straight-face hoist, operating 2 drums in balance, or separately, also good for 3,500′ depth. The hoist at C shaft, formerly at B, is 13x15″, with 6′ drums. The boiler-house, between the two sections of the engine-house, has four 165-h. p. Burt locomotive firebox boilers, with room for a fifth, also a 1,000-h. p. Cochrane feed-water-heater and purifier. The power-plant includes a 40-drill Ingersoll-Sergeant two-stage air-compressor. A 12-drill Norwalk air-compressor and a 10-drill Ingersoll-Sergeant air-compressor, displaced by the new compressor, have been installed in the basement of the engine-house, as auxiliaries.

The machine shop is 30x60′, and other mine buildings include a stone smithy, carpenter shop, warehouse, office building, and a 22x50′ changing house. Water is secured from the old Minnesota dam, the mine and location having mains and hydrants, with a Knowles pump in the basement of the power-house capable of raising a 5″ stream against a 460′ head, and an auxiliary Deane pump, 200′ distant, capable of raising a 5″ stream against a head of 425′. There are acetylene gas plants in the power-house and in each rock-house, and a 250′ coal-trestle, with inclined tunnel and tramway underneath, leading to the boiler-house. All buildings are connected by a private telephone system, and the mine is served by the Mineral Range railroad.

In view of the very promising developments of the Lake Copper Co., and the rich drill cores secured by the Adventure, diamond drilling was begun July, 1908, in search of the extensions of these beds in the southwest quarter of Section 14. The Michigan lands carry about 3 miles of the hypothetical extension of the veins opened by the Lake and cut by the diamond drill of the Adventure, and the prospects of finding payable ore bodies in this territory are excellent, as the field is practically unexplored. The diamond drill, late 1908, cut 3 fine-grained metamorphosed conglomerates, somewhat resembling the Calumet conglomerate, each carrying copper in somewhat encouraging quantities. The drill also cut a 12′ amygdaloid, from which the sludge assayed 1.29% copper, and cores from several other beds carried copper in promising quantities, though none were notably rich.

The Superior mine, about one mile east of the present workings, is a property of some promise.

Production was begun Nov. 12, 1903, with a leased head, at the Mass mill. This was surrendered Sept. 1, 1906, since which date rock has been stamped at the Atlantic mill.

Work was begun April, 1906, on a new mill, to cost circa $200,000, about one mile north of the Mass mill, on Keweenaw Bay, with ample water frontage for the wasting of sands. Construction was suspended, late 1907, on account of unsettled financial conditions, but was resumed in 1908. The mill, of steel, under construction by the Wisconsin Bridge & Iron Co., is 97x177′ in size, and is to have a 750-ton Nordberg steeple-compound stamp, with Woodbury jigs. The rock-bins are of exceptionally large size, and the equipment will include a 5-stamp gravity battery and 10 Overstrom tables, installed by the Michigan company in the Mass mill.

The mill is to have a central power plant, with a separate boiler building, of concrete, equipment including an engine, 3 Atlas boilers and a Sturtevant economizer.

The power plant will have a coal trestle, from which coal will be dumped in two piles, flanked by two tunnels, through which coal will be trammed in cars to the boiler-house. At the top of the trestle there will be a hoist, to take cars from the railroad to the bins.

Water will be secured from Keweenaw Bay, through a 1,200′ tunnel, nearly completed, connecting with a 76′ shaft at the millsite. Instead of having a separate boiler-house for the pumps, there will be a motor-driven pump, taking energy from the generator in the mill. It is estimated that the new mill will save about one cent per pound on the cost of finished copper. The copper of the Michigan has the highest electrical conductivity of any Lake Superior brand, showing, on test, conductivity up to 103.

Production, in pounds of fine copper, has been as follows: 275,708 lbs. in 1903; 2,746,127 lbs. in 1904; 2,891,796 lbs. in 1905; 2,875,341 lbs. in 1906; 1,865,404 lbs. in 1907. Production, October, 1908, was 193 tons of mineral, from 600 to 700 tons of rock stamped daily, and production for 1908 should be approximately 3,000,000 lbs., the largest yet secured. Rock stamped was 140,225 tons in 1906, and 150,407 tons in 1907, returns being 20.5 lbs. fine copper in 1906 and 17.72 lbs. in 1907. Total expenses in 1907 were $645,056, including $183,671 for new construction. Costs, less construction, per ton of rock treated, were $2.84 in 1904; $2.63 in 1905; $2.79 in 1906 and $3.06 in 1907. Costs per pound of fine copper, exclusive of construction, were 21.5 cents in 1904; 18.9 cents in 1905; 20.5 cents in 1906 and 17.72 cents in 1907. With the aid of the new mill the property should be able to make a considerably improved showing, and the prospects of finding payable copper beds in the southern portion of the Michigan territory are excellent. The management of the property is of the best, throughout.

MICHIGAN & MONTANA COPPER MINING & SMELTING CO. MONTANA.

Office: Kalispell, Mont. Mine office: Altyn, Teton Co., Mont. J. M. Harris, manager, at last accounts. Lands, some distance from rail transportation, carry auriferous and argentiferous copper ores, giving fair assays. Is said to have a 100-ton concentrator. Idle.

MICHIGAN & MONTANA DEVELOPMENT CO. MONTANA.

Office: care of E. J. Rompf, secretary and treasurer, Houghton, Mich. Letter returned unclaimed from former mine office, Butte, Silver Bow Co., Mont. Capt. Richard Edwards, president; Thos. F. Burgan, vice-president; preceding officers, Jas. T. Healy, W. A. Burritt and Thos. O. Bennetts, directors. Organized March, 1907, *with capitalization* $500,000, shares $10 par. Lands,

4 claims, held under bond and lease, in the Park Cañon district of Butte, said to show a 75′ lode. Idle and presumably moribund.

MICHIGAN & MONTANA MINING & DEVELOPMENT CO. **MONTANA.**

Office: Escanaba, Mich. Mine office: Wickes, Jefferson Co., Mont. Clark Kirkpatrick, president; J. F. Carey, secretary; Jas. A. McKillican, superintendent. Organized 1905, with capitalization $20,000, and reorganized with capitalization $100,000.

Lands, 5 claims, including the Blue Bird mine, formerly operated for silver, showing a vein of 4′ to 6′ width, opened by a 1,200′ tunnel, giving assays of 5 to 7% copper, 5% lead, 23 oz. silver and $2.80 gold per ton. Property has electric power and employs circa 20 men.

MICHIGAN & NEW MEXICAN MINING CO. **NEW MEXICO.**

Office: Ishpeming, Mich. Mine office: Nogal, Lincoln Co., N. M. W. A. McIver, deceased, was president. Lands are known as the Mildon group. Idle and apparently moribund.

MICHIGAN-NEW MEXICO COPPER CO. **NEW MEXICO.**

Office: Grand Rapids, Mich. Letter returned unclaimed from former mine office, Lordsburg, Grant Co., N. M. J. L. Hamilton, president; C. R. Luton, secretary and general manager. Lands, 4 claims, area 80 acres, known as the Dakota-Pearl mine, in the Burro Mountains, carrying ore assaying up to 8.5% copper, 5 oz. silver and $4 gold per ton. Has a 280′ shaft, and planned installing a 50-ton leaching plant and smelter, but failed to do so. Idle several years and apparently moribund.

MICHIGAN SMELTING CO. **MICHIGAN.**

Office: 82 Devonshire St., Boston, Mass. Works office: Houghton, Houghton Co., Mich. Wm. A. Paine, president; Chas. H. Paine, vice-president; Frederic Stanwood, secretary and treasurer; Frederick I. Cairns, general manager; preceding officers and John R. Stanton, directors; Frank Klepetko, consulting engineer; John Mugford, superintendent.

Organized 1903, under laws of Michigan, with capitalization $500,000, shares $25 par. Is controlled through ownership of entire stock issue, by 6 mining companies, the Copper Range group holding 12,000 shares and the Stanton companies 8,000 shares, holdings in shares being as follows: Champion, 4,400 shares; Trimountain, 4,400; Baltic, 3,200; Mohawk, 3,200; Wolverine, 3,200; Atlantic, 1,600. No dividends have been paid, profits being turned back into improvements.

Property is a reduction plant, 3 miles west of Houghton, near the old Atlantic stamp-mill, with frontage on Portage Lake. It was designed by Frank Klepetko and is the largest and most modern smelter in the Lake Superior district, with capacity of 90,000,000 lbs. fine copper yearly.

The plant is terraced throughout, permitting economical and largely automatic handling of material. The terraces for the different structures are sand-graded, with stone retaining walls. Mineral is delivered to the works in 40-ton bottom-dumping steel cars, by the Copper Range railroad, which also hauls away the refined copper, for shipment from the Copper Range wharves, in Houghton.

The 3,000-ton mineral storage bins, holding ten days' supply for the works, are located on the upper terrace. Mineral is dehydrated in rotary dryers, by waste gases from the furnaces, taken to the furnaces in tram-cars and dumped into hoppers on the charging floor. Coal-trestles, on an upper plateau, hold 15,000 tons of hard and soft coal, with separate storage compartments for charcoal, sand and limestone. Tunnels under the coal-trestle lead to the boiler-rooms and furnaces, fuel being delivered in tram-cars, loaded cars descending by gravity.

The 160x205′ reverberatory furnace building, of steel and brick, with

truss roof, and two 5-ton traveling cranes, has 6 furnaces, 2 being 16x36′ each, two 14x23′ each, one 15x18′, and one 16x40′, of 100 tons daily capacity. The two 16x36′ furnaces were built 18x50′, over all, but gave so much trouble that they were cut down to 40′ length.

Alternating with the larger reverberatories are one 300-h. p. and two 500-h. p. Stirling water-tube boilers, heated by waste gases from the furnaces. After leaving the boilers the waste gases are drawn through a 6x8′ subterranean flue, with arched roof, up the hill to a 150′ smokestack with base 100′ above the furnace building.

From the reverberatories molten copper goes to 2 blast furnaces, on a lower level to the north, where blister copper is cast mechanically, in moulds, upon a circular table, cooled in water and carried by a link-elevator to the loading platform. The cupola building is 40x70′, of steel and brick, with two floors. Slags are carried mechanically to the sampling mill, and reduced in a 30-ton crusher of 1,000 tons daily capacity, for resmelting. The waste slags from the final fusion are granulated by jets of water, and discharged through launders, to low ground northward, for grading.

The combination machine-shop and power-house, of steel and brick, has a complete equipment of shop tools, driven by an independent engine, and a 500-h. p. Nordberg horizontal tandem-compound engine driving a 200-kw. generator actuates the rotary blowers for the blast-furnaces. Electric power is used extensively, for operating the drying plant, cranes, casting machinery and lighting, and actuates 3 specially designed Jeffrey electric locomotives, of 100-ton draw-bar pull, taking current from overhead trolleys and hauling 8 pressed steel Sheffield mineral and coal cars, tracks reaching practically every part of the plant.

Miscellaneous buildings include a combination two-story and basement office and laboratory, of brick, heated by exhaust steam, also a 40x60′ iron-sheathed frame warehouse, barn, etc. The plant has two 50′ track-scales, of 150 tons capacity each, one for mineral and one for coal and flux, with smaller scales at other points. Water is obtained from the old Atlantic dam, on Cole's creek, through a 4,300′ flume, with capacity of 5,000 gallons per minute, leading to a 50,000-gallon water-storage tank, located 100′ above the works, giving good pressure at all points.

The works are treating the mineral of six mines, each of which is smelted separately, and are turning out circa 5,500,000 lbs. of refined copper monthly. The sixth reverberatory will give a monthly capacity of 10,000,000 lbs. fine copper, providing for growth of the mines for some years to come. In August, 1907, these works broke a world's record for casting from a single furnace, by turning out a charge containing 375,000 lbs. fine copper. This work was done by a crew of ten men, of whom 5 attended the furnace, and one operated the casting machine, while 4 men were required to inspect, sort and load the ingots in cars.

The Michigan smelter is well planned and well handled, the results secured being creditable alike to the designer and the management.

MICHIZONA DEVELOPMENT CO. **ARIZONA.**

Dead. Option surrendered and company wound up, 1905. Formerly at Pearce, Cochise Co., Ariz. Described Vol. V.

COMPAÑIA METALURGICA DE MICHOACÁN. **MEXICO.**

Works office: Ocampo, Zitácuaro, Michoacán, Mex. O. F. Westlund, manager; C. W. Carpenter and F. M. Flynn, superintendents. Property is a 10-year lease on the reduction plant of the Michoacán Mining & Railway Co., Ltd. Smelter, known as Los Trojes, rated at 250 tons daily capacity, has a 44x163″ water-jacket blast *furnace and 8 Baker* blowers, burning coke and *charcoal in equal quantities, charcoal being* made from the company's own

timber. Power plant includes two 4′ Pelton water wheels, operated under a head of 450′, and a small electric plant, with a 150-h. p. auxiliary steam plant. Idle, with indifferent prospects of resumption.

MICHOACÁN RAILWAY & MINING CO., LTD. MEXICO.

Office: 2 Suffolk Lane, Cannon St., London, E. C., Eng. Mine office: Angangueo, Michoacán, Mex. Henry W. Foster, M. P., chairman; G. A. Mitchell, secretary; Jas. W. Malcolmson, consulting engineer. Organized Jan. 29, 1889, under laws of Great Britain, with capitalization £105,364, shares $1 par, in £21,015 A cumulative 7% preference shares, £12,190 B non-cumulative 7% preference shares, £70,745 ordinary shares and £1,414 founders' shares; issued, £99,370. Debentures, £27,090, in a 4% prior lien, and £103,000 in 4% mortgage bonds. Railway rights originally held have been disposed of, remaining property being sundry mines and mineral lands, leased, 1906, to Compañía Metalurgica de Angangueo for 10 years.

MICHOACÁN SAN FRANCISCO COPPER MINES SYNDICATE, LTD. MEXICO.

Dead. Voluntarily liquidated, March, 1902. Formerly in Michoacán, Mexico.

MICULICICH i VALENTINE. PERÚ.

Mine office: San Tadeo, Yauli, Junin, Perú. Lands, 2 pertenencias, known as the Mina Gertrudis, opened 1897, having a vein with strike of N. 51° E. and nearly vertical dip, of about 2 meters width, with paystreak of 60 centimeters to 1 meter, carrying ore averaging 14% copper and 1,000 grams silver per metric ton, balance of vein carrying circa 5% copper and 300 grams silver per metric ton. Production, 1904, was 2,455 metric tons of ore averaging 14% in tenor, yielding 757,950 lbs. fine copper. Employs circa 50 men.

MIDDLEMARCH COPPER CO. ARIZONA.

Office: 212 Henne Bldg., Los Angeles, Cal. Mine office: Middlemarch, Cochise Co., Ariz. H. Bert Ellis, president; M. M. O'Gorman, vice-president and general manager; Wm. Le Moyne Wills, secretary; preceding officers, Richard Gird, Wm. King Gird and F. S. Austin, directors; Broadway Bank & Trust Co., Los Angeles, treasurer; Edw. K. Kelly, mine superintendent.

Organized Apr. 26, 1907, under laws of California, with capitalization $1,000,000, shares $1 par; increased, March 28, 1906, to $3,000,000, shares $100 par. Annual meeting, first Monday in April.

Lands, 68 claims, area 1,360 acres, in the Dragoon Mountains, showing 6 practically parallel contact deposits, between limestone and granite-porphyry, having a generally northwesterly strike, with dip of 42° to 54°. Two ore bodies under development, of 30′ to 80′ width, show oxidized ores, succeeded by sulphides, mainly chalcopyrite, with some chalcocite.

Development is by shafts of 210′, 248′, 100′, 165′, 65′, 50′, 120′, 90′ and 40′, and by tunnels of 625′, 150′, 367′, 450′, 390′ and 170′, giving about 2 miles of workings, estimated by company to show 200,000 tons of ore, with 100,000 tons blocked out for stoping in the Missouri mine, with ore in other properties, but not extensively developed. The ores of the Missouri are base at depth, and deficient in iron and lime, while not sufficiently pyritic to concentrate well.

Equipment includes a 300-h. p. steam plant, 50-h. p. hoist and 4-drill Laidlaw air-compressor. There are 12 buildings, including a 30x38′ engine-house, 32x38′ boiler-house, 30x38′ machine shop and 20x30′ smithy.

The reduction plant includes a concentrator and smelter under one roof, 40x100′ in size. The concentrator has an 8x12″ Blake crusher, 2 Huntington mills, 2 rolls, 2 Bartlett tables, 1 slime table and 3 sizers. The concentrator, of 40 to 60 tons rated daily capacity, receives ore by tram from the mouth

the Missouri tunnel, 300' distant. When operated the smelter made matte eraging 55 to 70% copper, 20 to 100 oz. silver and 0.25 to 2 oz. gold per ton. The company plans development of sulphide ores in the lower levels, and ection of a larger smelter. Property considered promising.

IDDLE RANGE MINING CO. **MICHIGAN.**

Office and mine: care of Thos. L. Chadbourne, president, Houghton, Hough- n Co., Mich. Capitalization $500,000, shares $25 par. Idle since circa 1895.

IDDLE SWANSEA MINING CO. **UTAH.**

Mine office: Eureka, Juab Co., Utah. Richard B. Shepard, president; E. Shepard, secretary and treasurer; preceding officers, Dana T. Smith, Harri- n O. Shepard and John M. Condon, directors. Lands adjoin the Eureka- ransea Extension. Presumably idle.

IDLAND GOLD & COPPER MINING & REDUCTION CO. **UTAH.**

Office and mine: Hot Springs, Box Elder Co., Utah. Geo. B. Dean, presi- nt; F. J. Hirt, vice-president; Albert Swingewood, secretary and treasurer; aniel Convery, manager. Organized 1904, with capitalization $1,000,000, ares $1 par. Lands, 14 claims, 2 miles from Hot Springs, in the Sierra adre district. Idle several years.

ID MOONTA COPPER MINES, LTD. **AUSTRALIA.**

Dead. Reconstructed, Oct. 29, 1901, as Moonta Central Copper Co., Ltd. rmerly at Moonta, Daly Co., South Australia.

IEDNOROUDIANSK MINE. **RUSSIA.**

Described under title Rudianski mines.

IEDZIANKA MINE. **AUSTRIA.**

Office: Kielce-Checiny, Galicia, Austria. Laszczynski Brothers, owners. he property is an old mine, circa 55 miles north of Cracow, abandoned for early a century, until taken over by the present owners. The mine shows a elt of cupriferous limestone, of about 150' width, traceable for 1¼ miles, eported to carry copper ore in streaks of ½" to 1" thickness only, ore being ainly chalcocite, with some azurite and malachite, having a gangue of calcspar nd quartz, ranging 15 to 45% in copper tenor. The property has been proven o a depth of 150'.

On reaching surface, ore is hand-picked, crushed by rolls and moulded nto blocks, with 5% of clay for a binder, bricks being dried by waste heat rom the furnace, and partially roasted in a kiln.

The reduction plant is of an experimental nature, and of small capacity nly. Roasted ore is crushed fine and leached in lead-lined tanks with spent iquor from the electrolytic baths containing about 5% of free sulphuric acid, iving, as a product, a liquor containing about 5% copper and 1% free acid. his is put through a filter-press, then goes to electrolytic tanks having in- oluble anodes of lead plates, in cloth bags, with thin copper cathodes. Cur- ent is 1,000 amperes, at 2.5 volts, giving a current density of 1 ampere per quare decimeter of cathode surface. Deposition of copper is about 1.1 gram er ampere-hour, nearly equal to the theoretical deposit, and power consumed, er kilogram of copper deposited, is 2.48-kw.-hours. Liquor is exhausted in bout 36 hours, when it is returned to extraction baths, for treatment of fresh re. Cathodes remain in the bath for about one month, when the deposit be- omes 1" to 1¼" thick. Product is said to be of greater purity than ordinary lectrolytic copper. The process is simple, and requires but a single trained orkman for its operation.

IHARA MINE. **JAPAN.**

Office: Mihara-mura, Chitsuki-gori, Bitchu, Japan. Production was 36,266 lbs. fine copper in 1903, and 293,045 lbs. in 1906.

ILAN MINING & MILLING CO. **NEW HAMPSHIRE.**

Office: 120 Exchange St., Portland, Me. Mine office: West Milan, Coos

Co., N. H. Employs circa 35 men. J. B. Carper, president and general m ager; R. C. Bradford, secretary and treasurer. Organized August, 1906, u laws of Maine, with capitalization $125,000, shares $100 par. Reported, 21, 1908, having $100,000 cash on hand.

Lands, 240 acres, freehold, also 140 acres timber lands. Mineral l show serpentine, with fissure veins in schist, carrying chalcopyrite associ with pyrite, there being 2 veins under development, these averaging a 20′ width, with northwest and southeast strike, giving average assay about 3% copper, 5% zinc, 1 to 3 oz. silver and 44% sulphur. Has shaft 40′ and 260′, and 4 short tunnels, with about one-half mile of undergr openings, estimated to show 200,000 tons of ore, with 25,000 tons blocked for stoping. Work was begun by present company August, 1906.

Equipment includes a 150-h. p. steam plant, with 35-h. p. hoist, 4- air-compressor, machine shop, carpenter shop, crusher house, several dwell etc., with total of 11 buildings. Has a 40x60′ wooden concentrator buil with one jaw-crusher and 4 Wilfley tables. Is served by the Grand T railroad, ¼ mile from the shaft, connected by siding. Production, 1906, about 11,000 tons of pyrites and 100 tons of 20% copper ore, produced a average cost of about $1.50 per ton. Company plans installation of new chinery in mill and adding 6 Wedge furnaces, with chlorination works.

MILFORD COPPER MINING & SMELTING CO. UT

Office: 5 Walker Bank Bldg., Salt Lake City, Utah. Mine office: ford, Beaver Co., Utah. Geo. H. Dern, president; Chas. E. Hudson, secre and treasurer; Frank H. Lathrap, general manager. Organized 1902, u laws of Utah, with capitalization $300,000, shares $1 par. Lands, 11 cl area 220 acres, near the O. K. mine of the Majestic. Idle and appar moribund.

MILFORD GOLD & COPPER MINING CO. UT

Mine office: Milford, Beaver Co., Utah. Long idle and apparently bund.

MILLER MINING CO. MEX

Dead. Was succeeded, circa August, 1908, by Kansas-Cananea Copper Formerly at La Cananea, Arizpe, Sonora, Mex.

MILLER MINING, MILLING & SMELTING CO. UT

Mine office: American Fork, Utah Co., Utah. Russell Benedict, presi Property, in American Fork Cañon, formerly was leased, but work wa sumed by company circa July, 1908.

CHAS. S. MILLS & CO. MEX

Office and mine: Hocasitas, Ures, Sonora, Mex. Chas. S. Mills, ge manager. Lands, 103 hectares, known as La Colorada group, also a 6-he millsite, showing 5 veins, ranging 2′ to 100′ in width, occurring as fis in porphyry and as contacts between porphyry and phonolite, carrying silver, copper, nickel, cobalt and platinum. Mine has a 100′ shaft and a tunnel, steam power and a 20-ton stamp-mill and concentrator. Nearest road, 25 miles, is the Sonora branch of the Southern Pacific. Idle since

MILTON COPPER CO. MICHI

Dead. Wound up 1902. Formerly at Victoria, Ontonagon Co., Mich. scribed Vol. II.

MILWAUKEE-MONTANA NATURAL BRIDGE GOLD & COPPER MINING CO. MONTA

Dead. Was promoted by C. T. McElroy. Formerly at Contact, Park Mont.

MILWAUKEE & NEW MEXICO MINING CO. NEW MEX

Office: 97 Wisconsin St., Milwaukee, Wis. Mine office: Tres Pie

Taos Co., N. M. J. D. Draught, secretary and treasurer. Property is known as the Sardine group. Presumably idle.

MILWAUKEE-PALMER MOUNTAIN GOLD & COPPER MINING CO. **WASHINGTON.**

Dead. Formerly at Loomis, Okanogan Co., Wash.

MINDOULI MINE. **FRENCH CONGO.**

Mine office: Comba, via Brazzaville, French Congo. Lands, in the Kouilou-Niari basin, circa 300 kilometers from the coast, show cupriferous sandstone overlying limestone, surface ores being mainly malachite, with some cuprite, both argentiferous. These deposits were worked by the natives, in a primitive way, for centuries, and a considerable trade once existed in copper and copper utensils, but this became extinct with French occupation. Mine probably is unworkable under modern conditions without railroad transportation, now lacking.

MINE DEVELOPMENT ASSOCIATION. **NEW MEXICO.**

Mine office: Socorro, Socorro Co., N. M. W. H. Bullard, president; H. L. True, secretary; Cony T. Brown, manager. Property includes the Stonewall Jackson mine, carrying zinc-lead ores, also sundry copper-zinc-lead lands.

COMPAÑIA MINERA DE MINAS NUEVAS. **MEXICO.**

Mine office: Alamos, Sonora, Mex. Has auriferous and argentiferous copper ore, with steam power, employing circa 30 men at last accounts.

MINERAL CREEK COPPER CO. **ARIZONA.**

Dead. Formerly at Globe, Gila Co., Ariz.

MINERAL CREEK MINES CO. **ARIZONA.**

Letter returned unclaimed from former office and mine, Globe, Gila Co., Ariz. A. J. Kaltenbach, president; E. E. Kaltenbach, vice-president; Harold E. Bierce, secretary and treasurer. Organized 1907, under laws of Arizona, with capitalization $250,000, shares $10 par.

MINERAL CREEK MINING CO. **ARIZONA.**

Dead. Operated circa 1881. Formerly at Red Rock, Pinal Co., Ariz.

MINERAL CREEK MINING & SMELTING CO. **WASHINGTON.**

Office: 515 California Bldg., Tacoma, Wash. Mine office: Mineral, Lewis Co., Wash. Adrian F. Kirkpatrick, president; Chas. H. Little, secretary. Organized June 14, 1901, under laws of Washington, with capitalization $2,000,000. Ores carry gold, silver, lead and copper. Has water power and a 20-ton smelter. Idle several years.

MINERAL FARM MINING CO. **IDAHO.**

Office: Spokane, Wash. Mine office: Mullan, Shoshone Co., Idaho. Daniel McQuarrie, president; M. J. McHugh, vice-president; Irvin D. Whitmore, secretary and treasurer; Louis C. Jaquish, manager; preceding officers, E. G. Ellis, D. R. Beck and M. Robert Weidner, directors. Lands, 11 claims, 8 patented, circa 1½ miles from Mullan, showing a fissure vein of 100′ reported average width, opened by 3 tunnels, No. 3 being 115′ long.

MINERAL HILL CONSOLIDATED COPPER CO. **ARIZONA.**

Office: 331 Fourth Ave., Pittsburg, Pa. Mine office: Tucson, Pima Co., Ariz. M. S. Isherwood, president; Boon Ingells, vice-president; E. B. Reeser, secretary, treasurer and superintendent; E. N. Ray, general manager. Organized March, 1904, under laws of Arizona, with capitalization $3,000,000, shares $1 par, as successor of Azurite Copper & Gold Mining Co.

Lands, 26 claims, 12 patented, area 520 acres, in the San Xavier district, 18 miles southwest of Tucson, including the Azurite group of 13 claims, said to have produced $550,000 worth of ore under former ownership, the American group of 8 claims, and the Mineral Hill group of 5 claims. The mine is said to show a large body of sulphide ore, of concentrating grade, averaging about 3.5% copper.

Development is by 74 pits and open-cuts, 8 tunnels, mostly short, longest being 250′, and 48 shafts, mostly shallow, 5 deepest being 130′, 125′, 150′, 345′ and 200′, mine having a total of circa one mile of workings, claimed to have blocked out, in the lower levels, 100,000 tons of 5% sulphide ore, which figures are considered unduly high.

The property is said to have a 150-h. p. steam plant, with hoists good for 350′ and 2,000′.

There is an antiquated smelter having a 30-ton water-jacket blast-furnace which is of no present value, and the company was said, April, 1908, to have contracted for a 100-ton concentrator, but in 1907 it was stated that a 500-ton smelter had been ordered, this not proving true. It was claimed, by its agents, who made some exaggerated statements, that the cost of mining and transportation to smelter was $4.50 per ton. In 1907 the mine shipped circa 2,500 tons of selected ore, of circa 3.5% copper tenor, to the Douglas smelter yielding 169,538 lbs. fine copper and 1,478 oz. silver. Property is considered promising, though ore is low in grade.

MINERAL HILL COPPER & GOLD MINING CO. ARIZONA

Mine office: Tucson, Pima Co., Ariz. Lands, 36 claims, having circa 1,000′ of workings, showing auriferous and argentiferous lead and copper ores.

MINERAL HILL COPPER SYNDICATE, LTD. ARIZONA

Dead. Formerly at Huron, Yavapai Co., Ariz.

MINERAL HILL MINING CO. WASHINGTON

Offices: 49 West 125th St., New York, N. Y. Mine office: Conconully, Okanogan Co., Wash. Dr. Jacob May, president; A. R. Lacey, secretary; E. P. Wheeler, superintendent. Lands, 20 claims, having a 1,800′ tunnel said to cut 3 veins carrying argentiferous copper and lead ores, mainly argentiferous tetrahedrite. Has steam power, ore bunkers with crusher and a saw-mill with an available waterfall, rated at circa 4,000-h. p. It was expected, early 1907, that company would be merged in the Washington Consolidated Copper Co. Idle at last accounts.

MINERAL HILL MINING & SMELTING CO. CALIFORNIA

Letter returned unclaimed from former office, 237 Twelfth St., San Francisco, Cal. Mine office: Spenceville, Nevada Co., Cal. C. C. Bitner, manager. Lands, 5 claims, opened by a 535′ tunnel showing gold-copper ore. Has water power. Idle.

MINERAL HILL TUNNEL & COPPER MINING CO. WASHINGTON

Office: 1140 Old South Bldg., Boston, Mass. Mine office: Danville, Ferry Co., Wash. Albert Vittum, president. Organized 1906, with capitalization $1,500,000, shares $1 par, as successor of Minnehaha Copper-Gold Mining Co. Is controlled, through ownership of majority of stock, by Boston Consolidated Mining Co.

Lands, 8 groups, lying at average distance of circa 2 miles south of the international boundary line, in the Wannicutt Lake district of Okanogan county, Washington, and in Ferry county, Washington. The Minnehaha group, 4 claims, area 70 acres, has several shafts, deepest 250′, and a 200′ tunnel, showing a vein of low grade auriferous copper ore with a 12″ pay streak of ore of good tenor. Shipped some ore, December, 1904, to the Granby smelter, that gave net returns of circa $250 to $400 per car.

MINERAL MINING CO. OREGON

Mine office: Huntington, Baker Co., Ore. Has a tunnel, showing copper ore, also a small smelter. Idle.

MINERAL MINING & SMELTING CO. NEVADA

Office: Reno, Nev. Mine office: Palisade, Eureka Co., Nev. Lands, *sundry claims*, on Mineral Hill, midway between Eureka and Palisade, said *to show* a 16′ vein, carrying auriferous and argentiferous copper and lead

es, giving assays up to $1,108 per ton in gold. Is said to have started a 60-ton elter. Idle.

INERAL MOUNTAIN MINING CO. **ARIZONA.**

Dead. Operated circa 1902. Formerly at Calabasas, Santa Cruz Co., Ariz.

INERAL MOUNTAIN MINING CO., LTD. **NEW MEXICO.**

Mine office: Steins, Grant Co., N. M. Has argentiferous lead and copper s. Idle several years and apparently moribund.

INERAL POINT MINING CO. **COLORADO.**

Mine office: Marble, Gunnison Co., Colo. Lands include the Carbonate oup, carrying auriferous and argentiferous copper ore. Has gasoline power d a 50-ton smelter. Presumably idle.

INERAL POINT MINING CO. **IDAHO.**

Mine office: Osburn, Shoshone Co., Idaho. S. V. Osburn, manager. nds, south of Osburn, adjoining the Marie, have 2 tunnels, lower showing 12" vein of tetrahedrite.

INERS COPPER CO. **MICHIGAN.**

Dead. Merged, March, 1899, in Isle Royale Copper Co. Formerly at oughton, Houghton Co., Mich.

INERS' SMELTING CO. **UTAH.**

Letter returned unclaimed from former office, 42 Broadway, New York, Y. Works office: Garfield, Salt Lake Co., Utah. Organized July, 1907, der laws of Maine, with capitalization $10,000,000. Property is a smelter- te, well located, at Lake Point, circa 2 miles west of Garfield Beach, on the uthern end of Great Salt Lake, on which it was planned, early 1908, build- g a 3,000-ton smelter, at an estimated cost of $2,000,000. Company is said have a 10-year contract for smelting the ores of the Silver King Coalition.

INES DEVELOPMENT CO. OF NEVADA. **NEVADA.**

Office and mine: Lovelock, Humboldt Co., Nev. John T. Reid, president, easurer and general manager; Patrick K. Reid, vice-president; Paul G. Reid, cretary and superintendent; preceding officers, Emmet E. Reid, R. C. Moore, Thies, Peter Ancher, E. B. Loring and John O'Kane, directors. Organized ept. 1, 1904, under laws of Arizona, with capitalization $750,000, shares $1 ar; issued, $300,000.

Lands, 5 claims, area 100 acres, in the Juniper Mountain district, show- g various fissure veins, of which 2, of about 4' average width, under de- lopment, show chalcocite, bornite and tetrahedrite, giving average assays f 2% copper, 11 oz. silver and $3.50 gold per ton. Development is by a 30' haft and a 185' tunnel. Is practically idle, except for annual assessment ork, but company plans resumption on a considerable scale.

INESOTA MINING CO. **MICHIGAN.**

Dead. Lands now owned by Michigan Copper Mining Co. Paid large ividends. Formerly at Rockland, Ontonagon Co., Mich. Very fully de- cribed, under title Michigan Copper Mining Co., Vol. II.

INES VENTURE SYNDICATE. **CALIFORNIA & OREGON.**

Office: 327 Pacific Electric Bldg., Los Angeles, Cal. E. Shirley Wilson, resident; J. Munroe Layman, general manager. Organized under laws of rizona, with capitalization $2,000,000, shares $1 par. Lands are sundry un- eveloped copper claims in Modoc county, California, and Lake county, Oregon.

INGINEW COPPER SYNDICATE, LTD. **AUSTRALIA.**

Dead. Formerly at Mingenew, Western Australia.

INGUS MOUNTAIN COPPER CO., LTD. **ARIZONA.**

Office: 516 Grant Bldg., Los Angeles, Cal. Mine office: Jerome, Yavapai o., Ariz. R. A. Thomas, president; Thos. E. Metcalf, vice-president; W. W. Thomas, second vice-president; J. R. Thomas, secretary and treasurer; A. M. McDermott, assistant secretary; *preceding officers*, W. B. Simmons and W. B.

Metcalf, directors; Thomas Brothers & Metcalf, managers. Organized March, 1900, under laws of Arizona, with capitalization $3,000,000, shares $1 par; issued, $2,350,000.

Lands, 38 claims, area 750 acres, fairly timbered and watered, in the Black Hills district, 12 miles south of Jerome, the nearest railroad point, showing 3 fissure veins carrying oxide and sulphide ores, one vein, having a claimed extreme width of 40′ and said to be traceable 4,000′, giving good surface showings of carbonate ores, assaying up to 16% copper. Development is by shafts of 120′, 250′ and 370′, with several tunnels, giving a total of 3,670′ of workings. Company estimates average tenor of ore at 8% copper, with small gold and silver values, which is thought too high.

Equipment includes a 50-h. p. steam plant, with 2 hoists good for 1,000′ each, and several mine buildings. Company is out of cash and apparently in a bad way.

MINING EXPLORATION CO., LTD. **ARGENTINA.**

Office: 19 New Union St., London, E. C., Eng. Operating office: 1128 Agustinas, Santiago de Chile. Works office: Tinguiririca, Chile. Col. Sir Thos. Hungerford Holdich, K. C. M. G., chairman; Wm. Rich, consulting engineer; Frank Lumley, general manager; F. A. Bagnell, secretary. Organized Sept. 29, 1900, under laws of Great Britain, with capitalization £175,000, shares £1 par; issued, £205,000.

Lands include La Victoria and Las Choicas mines, which are in Argentina, circa 60 miles from Tinguiririca, Chile, which is the nearest rail point, and, although lands are in Argentina, operations, to all practical effect, are in Chile. Las Choicas mine, on the eastern slope of the Andes, shows considerable rich ore carrying high values in both silver and copper, and was estimated, 1908, to have in sight 100,000 long tons of ore averaging 8% copper and 50 oz. silver per ton, which figures are considered high. Development is mainly by tunnels.

The reduction plant, on the Rio Tinguiririca, has water power available for development. Company ordered, 1907, material for a 53-kilometer railway, of 60-cm. gauge, from the Choicas mine to the reduction works, which include a 100-ton mill and smelter, expected to begin smelting late in 1908. A wagon-road for traction engines has been built from Tinguiririca to the mine. Property is considered promising.

MINNEAPOLIS COPPER CO. **MEXICO**

Mine office: 550 Security Bank Bldg., Minneapolis, Minn. J. W. Christy, general manager; Tom. L. West, resident manager. Lands are near the Bele and Transvaal mines. Has gasoline power. Was developing, 1908, with a small force.

MINNEAPOLIS COPPER MINING & MILLING CO. **WYOMING & MONTANA**

Dead. Formerly at Boulder, Jefferson Co., Mont., and Encampment, Carbon Co., Wyo.

MINNEHAHA COPPER-GOLD MINING CO. **WASHINGTON**

Dead. Absorbed, 1906, by Mineral Hill Tunnel & Copper Mining Co. Formerly at Danville, Ferry Co., Wash. Described Vol. VI.

MINA MINNIE. **CHILE**

Mine office: Higuera, La Serena, Coquimbo, Chile. T. H. Everitt, Juan Bade and J. Aldai, owners and managers. Lands, 1 pertenencia, area 3 hectares, circa 13 miles north of Higuera, showing a vein of 10′ width at surface, producing carbonate ore of 10% average tenor. Mine is opened by 2 adit levels, and ore is sold to Sociedad Minera San Juan. Employs 16 men.

INNIE GULCH MINING & TUNNEL CO. **COLORADO.**

Mine office: Silverton, San Juan Co., Colo. Ores carry gold, silver and pper. Has steam power. Idle several years.

INNIE HEALY MINING CO. **MONTANA.**

Dead. Property sold, 1906, to Butte Coalition Mining Co. Formerly at tte, Silver Bow Co., Mont.

INNIE MABEL GOLD & COPPER MINING CO. **WYOMING.**

Dead. Formerly at Rambler, Carbon Co., Wyo.

INNIE MINING & MILLING CO. **UTAH.**

Mine office: Bingham Canyon, Salt Lake Co., Utah. Long idle and pre-mably out of business.

INONG MINING CO. **MICHIGAN.**

Dead. Was the most important copper mine on Isle Royale, having made 8,650 lbs. fine copper. Formerly on Isle Royale, Mich. Described Vol. II.

INONG RANGE COPPER CO. **WISCONSIN.**

Dead. Succeeded, 1906, by Rudolph Land Co. Formerly at Gordon, ouglas Co., Wis. Fully described Vol. III.

INT GROUP. **WASHINGTON.**

Office: care of D. F. Strobeck, owner, Spokane, Wash. Mine office: leyers Falls, Stevens Co., Wash. Lands, on Gold Hill, show 3 veins, of 8' to 5' width, giving assays up to 8% copper, 5 oz. silver and $8 gold per ton. Idle veral years.

IRANDA HERMANOS. **PERÚ.**

Office and mine: Cajamarca Cajamarca, Perú. Mine, known as the legritos, carries rich argentiferous copper ore, and is reputed to be highly rofitable.

ISKWABIK DEVELOPMENT ASSOCIATION, LTD. **MICHIGAN.**

Dead. Lands sold, March, 1907, to Ojibway Mining Co. Formerly at hoenix, Keweenaw Co., Mich. Described Vol. VI.

ISSIZONA GOLD & COPPER CO. **NEVADA.**

Mine office: Las Vegas, Lincoln Co., Nev. D. F. Watson, manager. ands are on the Colorado River, near the Sears mine.

ISSOULA & COEUR D'ALENE COPPER CO. **IDAHO.**

Letter returned unclaimed from former mine office, Murray, Shoshone o., Idaho. Property, on the old Murray trail, known as the Cook & Barnes roup, has a 600' tunnel with a 480' back, showing a fissure vein, apparently f fair width, carrying copper ore.

ISSOULA COPPER MINING CO. **IDAHO.**

Mine office: Mullan, Shoshone Co., Idaho. Robert R. McCormick, presi-ent and general manager; Thos. G. Kennedy, secretary and treasurer; J. A. ushnell, superintendent. Capitalization increased, 1907, from $100,000 to 1,500,000, shares $1 par. Lands, 20 claims, 2 fractional, in Deadman's Cañon, miles east of Mullan. Has 2 tunnels, longest 1,000', and is continuing the ndependent tunnel 700' into Missoula ground, to open a wide ledge of quartz-te showing occasional stringers of high-grade copper carbonates. Has secured res assaying up to 30% copper. Has electric power and an 8-drill air-com-ressor.

ISSOURI & ARIZONA COPPER MINING CO. **ARIZONA.**

Office: 733 R. A. Long Bldg., Kansas City, Mo. Mine office: Mayer, avapai Co., Ariz. A. A. Whitney, president; B. A. Stiles, vice-president; B. . Stevenson, secretary; E. C. Cooper, treasurer. Organized 1907, under laws f Arizona, with capitalization $1,000,000, shares $1 par. Lands, 5 claims, area 00 acres, in the Big Bug district, claimed to have a shaft showing sulphides assaying 4.5% copper and $2 gold per ton, with a trace of silver. Is not re-garded favorably.

MISSOURI COPPER CO. MISSOU

Dead. Formerly had an office, circa 1903, at 50 State St., Boston, Mass.

MISSOURI COPPER MOUNTAIN MINING CO. MISSOU

Office: 323 West 7th St., Sedalia, Mo. Mine office: Sullivan, Crawfo Co., Mo. L. M. Barnard, president; W. H. H. Myers, secretary. Capitalizati $1,000,000, shares $100 par. Lands, 74 acres freehold and 690 acres leasehe Mine, worked in a small way, before 1850, has 4 shafts and tunnels of 240' a 1,000', showing carbonate ores, with hematite gangue and heavy clay gou claimed to average about 10% copper. Has steam power and concentra with a Blake crusher, 18" and 22" rolls, 4 New Century jigs, Card concentr ing table and hydraulic classifiers. Smelter has a 40-ton Allis-Chalmers wat jacket furnace, with Root blower. Country rock is magnesian limestone, body having a good gossan capping, with vein showing chalcopyrite and pyr in the sulphide zone. Idle several years and apparently moribund.

MISSOURI & MEXICAN MINING CO. MEXI

Office: Dwight Bldg., Kansas City, Mo. Mine office: Suaqui de Bat Ures, Sonora, Mex. Geo. A. Wittig, president; Leo N. Leslie, secretary. La 370 acres, on the Yaqui River, 9 miles northwest of Suaqui de Batuc, circa 100 miles from a railroad, said to show ore carrying values of $60 $300 per ton. Idle several years and apparently moribund.

MITCHELL COPPER MINING CO. MONTA

Letters returned unclaimed from former office, Missoula, Mont., and fr former mine office, Florence, Ravalli Co., Mont. Organized July, 1907, un laws of Montana, with capitalization $1,000,000.

MITCHELL DEVELOPMENT CO. ARIZO

Dead. Liquidated, 1906. Formerly at Bisbee, Cochise Co., Ariz. F described Vols. IV and V.

MITCHELL MINING CO. MEXI

Office: 52 Wall St., New York, N. Y. Mine office: Chilpancingo, Bra Guerrero, Mex. John A. I. Cassidy, president; Thos. H. Anderson, vice-pr dent; Wm. F. Fluhrer, treasurer; preceding officers, Samuel V. Woodw Martin F. Morris, B. F. Cole, Robt. E. Morrison, Geo. W. Burleigh and Ph S. Dyer, directors; J. McD. Mellen, secretary; E. D. Elson, general manag E. E. Noon, mine superintendent.

Organized Apr. 16, 1902, under laws of Arizona, with capitalizat $5,000,000, increased circa August, 1906, to $8,000,000, shares $10 par. H lands through La Dicha Mining & Smelting Co., S. A., organized under law Mexico. Controls, through ownership of stock, La Dicha & Pacific Railr Co., which has an issue of $1,000,000 bonds, at 6%, said to have been und written by large shareholders of the Mitchell, and guaranteed, both princi and interest, by the Mitchell Mining Co. Knickerbocker Trust Co., New Yo registrar. Annual meeting, first Monday in April.

A 5% dividend was declared, December, 1905, but this proved a promi dividend only, payable in bi-monthly installments of 1%, of which only first and second installments were paid, in January and March, 1906, the p text for passing further payments being the cost of enlarging the plant, Geo. Mitchell, promoter of the company, and its former president, is said have voted himself two years' back salary, at $25,000 per annum, just be quitting office.

Lands, 1,800 pertenencias, area 4,446 acres, in 7 groups, forming a pa lelogram of 1 by 7 miles, with axis of the tract along the strike of the v in the districts of Bravos and Tabares, circa 40 miles in an air-line from A pulco. There are also circa 18,000 acres of plantation lands, and 164,000 ac of virgin timber lands, including some good oak, yellow pine and hardwo The district is fertile and healthy, with an excellent climate, the temperat

; 74° F. El Rincon ranch, area 18,000 acres, is said to have 8,000
es, 16,000 cacao trees, pineapples, oranges, etc., besides raising veg-
id cereals, and grazing large herds of cattle and flocks of sheep, fur-
ll food supplies for the workmen at the mine.
ldition to the copper property, the Mexican lands of the company
eposits of coal and iron ore, also mineralized veins carrying gold and
es.
ipal mining property is La Dicha group, said to carry a con-
ein of sulphide ore upwards of 5 miles in length, continuity being
a heavy gossan capping, and by exposures where a series of mountain
ave cut the vein, at intervals of a quarter to a half mile, claimed
the ore body being 150′ to 225′, with a granite footwall and schistose
The vein is said to have been exposed to a depth of 745′ at one
a stream cutting through. Below the gossan, and above the base
tituting the great bulk of ore, is a layer of 1′ to 6′ of chalcocite,
ip to 74% copper tenor. The vein matter is essentially chalcopyrite,
l pyrrhotite.
Rio Alcaparosa parallels a considerable portion of La Dicha vein, re-
s affluents numerous smaller streams that have cut across the vein
imately right angles, wearing down new beds, sometimes for hun-
eet, affording perfect cross-sections of the ore body.
opment is by 8 shafts and 4 tunnels, with circa 3 miles of workings,
and tunnels being reported to be in ore. Principal developments
en shaft No. 1 and tunnel No. 8, a distance of circa 2,800′. Shafts
llowing depths: No. 1 is 65′; No. 2 is 151′; No. 3 is 130′; No. 4 is
5 is 74′; No. 6 is 690′; No. 7 is 338′; No. 8 is 470′; No. 9 is 640′; No.
No. 11 is 356′, and No. 12 is 308′. All shafts are of 2-compartment
ly timbered and equipped with temporary wooden shafthouses, iron-
Development is mainly by tunnels, of which Nos. 4, 6, 8 and 9 have
ts. At different times various officers of the company have claimed
to 18,000,000 tons of ore in sight, and former President Mitchell
o shareholders that the ores of the mine would average 6% copper.
, 1904, the company claimed to have 861,975 tons of ore blocked out
g, with 6,898,636 tons in sight. These figures were gross exaggera-
ugh the mine has large ore bodies, and the original claims of Presi-
hell that the ore would average 6% copper tenor were modified to
aim that the mine had 2,500,000 tons of ore blocked out averaging
, and 6,000,000 tons averaging better than 3.5% in copper tenor. In
nany past exaggerations these claims must be viewed with deep sus-

equipment is light, owing partially to the development of the mine
ls. The power plant includes two 40-h. p. and two 120-h. p. hoists, 2
compressors and 12 power drills.
lings include a general store and a considerable number of cabins for
. The supply of native labor is said to be ample, and fairly efficient,
nging from 29 cents to 42 cents, gold, per day.
Rio Papagalla, circa 3 miles from the southern end of the mine, has
ible head of 200′, if reached by a tunnel of about 1,000′ length, esti-
capable of developing 8,000 h. p. in the dry season, and there is a
horsepower available on the Rio Alcaparosa, for which it is claimed
50-h. p. installation was ordered, but it cannot be learned that this
ived. The management had a cheerful way of stating as facts things
ld have been facts, but were not.
smelter, located at a 75′ waterfall, has on Mitchell economic
furnace, *and it was claimed that a 300-* furnace of the same

make was being installed, March, 1906, but apparently the second fu failed to materialize. Blast is furnished by 3 Connersville blowers. Th verter plant, of 25 tons daily capacity, has one stand and 3 shells, an put in commission circa August, 1906. Fuel was coke, wood and charcoal

La Dicha & Pacific Railroad, planned to be 83 miles long, from the near Chilpancingo to Puerto Marquez, 10 miles south of Acapulco, has bee veyed, and it was claimed, early 1906, that contracts were let for gradin laying steel. Apparently work actually was begun May, 1906, but at la counts the first section of 30 miles was uncompleted, and none of the l operation.

Production, 1905, was estimated, 1906, by the Copper Handbook, at 3,0 lbs., with the statement that the estimate might be too high, which doubtedly was, as the company dealt consistently in exaggerations reg production, as well as all other features of operation. The company i to have shipped 201,000 lbs. of copper, 1906, via Panamá, which may o not have been true.

The company was said, 1906, to have given up the Point Vesuvius on Galena Bay, Prince William Sound, Alaska, but it is not certain that lands were held by the Mitchell Mining Co., as the boundaries separatin company from the other Mitchell promotions were very hazy.

The company formerly held the Schultz mine and adjoining prop near Globe, Gila county, Arizona, but threw up its bonds.

On June 13, 1908, Geo. Mitchell assigned, to the Mitchell Mining C company's note to him for $156,875.93, issued to cover alleged advances personally by Mitchell to La Dicha Mining & Smelting Co., S. A. Two ganization committees were appointed, 1907, and apparently these are p at cross purposes. Company's property was attached, October, 1908, by erick Cuthbertson, for $57,291. The company apparently is hopeless volved, and the miserable manner in which the property has been mana highly discreditable to Mitchell and all others connected with the pron The outcome fully verifies the criticisms of the Copper Handbook, m Vols. V, VI and VII.

MITSU BISHI GOSHI-KWAISHA. JA

Office: Mitsu Bishi Bldg., Yaesucho Itchome, Kojimachi-ku, Tokio, Branch office: 10 Aioicho, Itchome, Kobe, Japan. Mine offices are gi detailed mine descriptions following. K. Nambu, president; S. Harada president; S. Sho, secretary; R. Tayakawa, treasurer; A. Yamada, genera ager; K. Kimura, manager Kobe office.

The company is an extensive producer of copper, its principal mines the Yoshioka, Arawaka, Makamine, Ikuno, Sawatari, Omodani, Mozumi, and Sado, with various smaller properties.

The Osaruzawa mines are at Hanawa, Kazuno, Rikuchu, Japan. K hara, superintendent; K. Okamoto, smelter superintendent; W. Mats mine superintendent; K. Ikeda, mill superintendent; T. Kawamura, en Lands, circa 1,000 acres, also 200 acres of miscellaneous lands adjoining. are very ancient, having been opened in the Eighth Century, but were for gold only, until circa 1650, when copper ores were developed. mainly chalcopyrite, with occasional bornite and a little native copper ciated with pyrite and small quantities of sphalerite, galena and he Occasionally native gold is found, mixed with the copper ores, and in a fahlband, gold values occurring mainly in the upper workings. The ve very numerous, ranging from 5" to 30' in width, with average width The veins, which are very persistent in strike, and hold workable to an a depth of 500', traverse Tertiary shales and tuffs, with intrusive augite-a and liparite. Development is by 8 working shafts, deepest 470', and 7

, longest 7,500', the mines having upwards of 15 miles of workings. elter has two 40-ton water-jacket blast-furnaces and a 250-h. p. electric turning out blister copper of 99.09% tenor. The Osaruzawa mines circa 1,000 men, and, in 1,200 years of operation, have produced im- quantities of gold, silver and copper. Production was 2,448,000 lbs. per in 1902; 2,817,152 lbs. copper, 142,492 grams silver and 6,161 grams 1906, and 2,537,710 lbs. copper, 204,313 momme silver and 2,600 momme 1907.

Yoshioka mine is at Fukiya-mura, Kawadami-gori, Bitchu, Japan. ka, general superintendent. The mine, opened 1806, was worked con- , but never became a considerable producer until taken over, 1873, nt owners. The property was very difficult of access until a new road t by the Mitsu Bishi company. Ore is chalcopyrite, associated with e, pyrite and pyrrhotite, with quartz gangue, and averages, after 9% copper. Ore occurs in veins in country rocks of clayslate, sand- l schalkstein, traversed by porphyry dykes. Production was 1,081,346 copper and 1,722,000 momme silver in 1900; 1,674,648 lbs. fine copper 1,725 grams silver in 1906, and 1,809,679 lbs. fine copper, 461,170 ilver and 1,080 momme gold in 1907.

Arakawa mine is at Arakawa-mura, Senhoku-gori, Ugo, Japan. M. neral superintendent. This property, formerly known as the Ugaiwa reopened 1871, and, after passing through various hands, was bought, the present owners. Country rocks, of Tertiary and Quaternary ages, ornblende-andesite, liparite and propylite, carrying numerous parallel propylite, with strike approximately northeast and southwest. Pro- as been as follows: 566,268 lbs. fine copper in 1900; 1,200,215 lbs. in 1,645,921 lbs. in 1907.

Hisanichi mine is at Arakawa-mura, Senhoku-gori, Ugo, Japan. M. neral superintendent. This property, near the Arakawa, shows 6 main e largest, known as the Ugaisawa, of about 24' average width, carries of payable ore, and occasionally branches into several smaller veins. er workable veins range 5' to 7' in width. Ore is chiefly argentiferous rite, associated with pyrite, frequently carrying native copper, cuprite socolla, associated with pyrite, sphalerite and galena, with quartz The property has water and electric power, and a 50-ton smelter, g circa 1,200 men. Production, 1900, was 1,734,522 lbs. fine copper.

Ikuno mines are at Ikuno, Tajima, Japan. T. Hori, general manager. operties employ circa 1,000 men. Mines were discovered A. D. 807, extensively worked, 1596-1620, under the direction of the Tokugawa nt, but were taken over, 1868, by the Imperial government, and sold, the present owners. The three principal mines of this group are the nagase and Kasei. The Tasei mine has a main vein of 14' average ith numerous branches traversing liparite, propylite and Tertiary ying native gold, argentite, and silver, malachite, chalcopyrite, sphal- galena, associated with pyrite. The Kanagase mine, near the Tasei, ame country rocks, but is traversed by basalt dykes, a great fault- to 40' in width, filled with brecciated country rock, showing 6 veins native copper, bornite, chalcopyrite, tetrahedrite, argentite, sphalerite, yrargyrite and stibnite. The Kasei mine shows diorite, traversed by nd propylite dykes, the metalliferous veins, occurring in diorite, carry- opyrite and native silver, with ores of lead, zinc and antimony. The s have steam, water and electric power. Production of the Ikuno s been as follows: 984,355 lbs. fine copper, 1,260,932 momme silver momme gold in 1900; 1,435,234 lbs. fine copper in 1903; 1,845,091 copper, 6,368,010 grams silver and 131,794 grams gold in 1906;

1,979,789 lbs. fine copper, 1,499,664 momme silver and 22,596 momme gold in 1907.

The Makamine mine is at Kitakata-mura, Higashi-Usuki-gori, Hyuga, Japan. This property is an old mine, idle for many years, until reopened, circa 1896, by the Mitsu Bishi company. Ore is chalcopyrite, associated with pyrite, averaging 3.5 to 4% in copper tenor. The property has been modernized in equipment and methods. Production has been as follows: 1,208,282 lbs. fine copper in 1900; 1,933,227 lbs. in 1903; 1,275,097 lbs. in 1906; 1,179,212 lbs. in 1907.

The Omodani mine is at Kami-Anana-mura, Ono-gori, Echizen, Japan. This property, opened A. D. 1350, has numerous small veins, none exceeding 4' in width, carrying bornite, chalcopyrite, sphalerite and galena, all argentiferous and showing occasional native silver. Production has been as follows: 614,438 lbs. fine copper and 103,682 momme silver in 1900; 432,248 lbs. copper and 1,043,115 grams silver in 1906; 502,331 lbs. copper and 282,723 momme silver in 1907.

The Sawatari mine is at Kitakata-mura, Higashi-Usuki-gori, Hyuga, Japan. This property, adjoining the Hibira mine, carries small lenses of ore in Paleozoic clayslate and sandstone. Production was 137,191 lbs. fine copper in 1902 and 227,684 lbs. in 1903. There is no later production reported, and mine probably is idle.

The Kamioka mine is at Funatsu, Yoshiki-gori, Hida, Japan. Bichro Matsuda, superintendent. The property is essentially a silver-lead mine, making copper as a by-product. Ores are mainly argentiferous chalcopyrite, arsenopyrite, galena, sphalerite and pyrite, associated with occasional malachite and chrysocolla. The mine has steam and electric power, and a small smelter employing circa 600 men. Production has been as follows: 8,475 lbs. fine copper, 537,487 kin lead and 148,670 momme silver in 1900; 46,621 lbs. fine copper and 3,704,437 grams silver in 1903, and 84,331 lbs. fine copper and 1,336,239 momme silver in 1907.

The Sado mines are at Arakawa-cho, Sado, Japan. Y. Uriu, general superintendent. This property, 425 miles from Tokio, on the Island of Sado, formerly was owned by the Mikado and operated as a sort of government mining school, until 1898, when bought by the Mitsu Bishi company. The mines carry auriferous and argentiferous copper ores, being primarily gold and silver mines with a little copper secured as a by-product. Equipment includes steam, water and electric power, with an exceptionally good plant of modern mining machinery. Production has been as follows: 12,730 lbs. fine copper, 3,098,26 grams silver and 374,899 grams gold in 1906; 12,812 lbs. fine copper, 963,75 momme silver and 109,344 momme gold in 1907.

Production by all mines of the company was 12,727,944 lbs. fine copper in 1905, and 13,535,458 lbs. copper, 19,084 kgs. silver and 578 kgs. gold in 1907. The Mitsu Bishi is one of the four large copper mining companies operating in Japan, and, like the others, is exceptionally progressive. Success has not been won by the possession of mines of exceptional value, though the company has some excellent properties, but rather by the utilization of the most modern methods and appliances in mining and metallurgy, directed by the best technical skill available.

MITSUI & CO. JAPAN

Mine office: Funatsu, Yoshiki-gori, Hida, Japan. C. Tanikawa, superintendent. Property is the Mozumi mine, near the Kamioka of the Mitsu Bishi Goshi-Kwaisha. The Mozumi mine, opened A. D. 1573, is primarily a silver-lead mine, but a little copper is secured as a by-product. Production, 1906, was 119,044 lbs. fine copper and 858,900 grams fine silver.

In addition to metalliferous mines, Mitsui & Co. are extensive miners of al, and their various properties are well equipped and handled with technical kill.

MITTERBERG COPPER CO., LTD. **AUSTRIA.**

Office: 16 St. Helens Place, London, E. C., Eng. Mine office: Innsbruck, Tyrol, Austria. Chas. C. Turnbull, J. P., chairman; Gerald B. Elkington, J. P., vice-chairman; H. Read Smith, secretary; preceding officers, Jacques Oppenheim and G. Muir Ritchie, directors; Robt. Addie, consulting engineer; Henry Merton & Co., commercial agents. Organized Dec. 14, 1905, under laws of Great Britain, with capitalization £200,000, shares £1 par; issued, £175,000. Paid a 1s. dividend early 1907.

Lands, 10 mining claims and 10 prospecting claims, area 1,551 acres, also 3,304 acres of timber lands, 15 miles from Bishofshofen, midway between Salzburg and Innsbruck, in the Austrian Tyrol. The Mitterberger mine shows argillaceous Silurian schists, limestone and dolomite, carrying 3 parallel veins, known as the Josephi, Johanni and Marien, of 6′ to 9′ average width, carrying auriferous, argentiferous and nickeliferous chalcopyrite, associated with arsenopyrite, pyrrhotite and siderite, with gangue chiefly of quartz. The veins do not carry synchronous values, there being only one payable lode in any given cross-section, mineral values switching from one vein to another at intervals. The veins carry high values in stringers of 1″ to 30″ width, with balance of ore body payable throughout the vein, at the points mineralized, ore averaging circa 3% in copper tenor.

The Mitterberger mine is an old property, and has extensive underground workings, estimated to show 3,000,000 tons of ore, with circa 400,000 long tons blocked out for stoping, but these estimates are considered high. The mine is developed exclusively by tunnels, with small concentrators at the portals.

The reduction works, at Ausserfelden, include a mill, in which it was said, 1907, that an Elmore vacuum flotation process was being installed, and an antiquated smelter, which the company is said to plan reconstructing upon a modern scale. It is said also that the new management plans sinking two shafts, to open the mine at depth.

Production, under former ownership, was about 600 long tons of fine copper yearly, and for the first 9 months of operation, ending early 1907, production under present management was 473 long tons of fine copper, and a small quantity of bluestone, showing that the new owners apparently are making no more copper, despite the very high capitalization, than was made formerly. The arrangements of the company with the directors are considered unfavorable to the corporation, and the management has been sharply criticised, by Austrian mining publications of good standing, which complain that a raft of relatives and place-seekers were turned loose on the property.

MITTERBERGER KUPFER GEWERKSCHAFT. **AUSTRIA.**

Mine office: Innsbruck, Tyrol, Austria. Is controlled, through stock ownership, by Mitterberg Copper Co., Ltd., and property is described under title of that company.

COMPAÑIA MINERA MIXTA MICHOACANA. **MEXICO.**

Mine office: Ario de Rosales, Ario, Michoacán, Mex. Tomás González, manager. Has gold, silver and copper ores, employing circa 60 men at last accounts.

MIZPAH CONSOLIDATED COPPER & GOLD MINING CO. **NEVADA.**

Mine office: Mizpah, Elko Co., Nev. T. J. Duddleson, president; H. P. Crist, secretary and treasurer; Henry Darlington, manager. Lands, in the southeastern portion of Elko county, 5 miles east of a railroad, have a 70′ two-compartment incline shaft, planned to be sunk 250′, said to show ore assaying 17% copper *and $7 per ton in combined gold* and silver values.

MIZPAH COPPER CO. NEVAD

Dead. Organized circa February, 1907, and was succeeded, 1907, by E National Copper Co. Formerly at Ely, White Pine Co., Nev.

MIZPAH COPPER & GOLD MINING CO. NEVAD

Mine office: Mizpah, Elko Co., Nev. Has secured assays of 12 to 20 copper, with combined gold and silver values of $8 to $20 per ton.

MIZPAH COPPER KING MINING CO. NEVAD

Mine office: Mizpah, Elko Co., Nev. J. H. Wilson, president; Hon. Jo Donaldson, vice-president; C. C. Shettles, secretary and treasurer; Chas Young, superintendent; preceding officers, W. E. Young, Chas. S. Watson an A. E. Strong, directors. Organized 1907, under laws of Arizona, with capitali ization $1,000,000. Lands, 5 miles from Nevada Northern railway, sho quartzite and granite-porphyry dykes, carrying a 3′ fissure with ore assaying up to 32% copper, 23 oz. silver and $10 gold per ton, opened by a 60′ shaf and 100′ tunnel.

MIZPAH COPPER MINING CO. IDAHO

Office and mine: Palouse, Whitman Co., Wash. C. E. Frederick, presi dent; J. C. Northrup, vice-president; H. C. Johnson, secretary; W. F. Chalene treasurer. Organized October, 1906, under laws of Washington, with capitali ization $1,500,000. Lands, in the Hoodoo district of Latah county, Idaho, hav about 1,000′ of workings, main tunnel showing high-grade cuprite, azurite an malachite, all argentiferous and of good copper tenor. Expended, 1907, abou $20,000, and plans a 2,000′ aerial tramway to connect with a branch railway

MIZPAH MINES & REALTY CO. NEVADA

Dead. Was organized circa March, 1907. Formerly at Ely, White Pin Co., Nev.

MIZUSAWA MINE. JAPA

Owned by Furukawa Mining Co.

MOAB COPPER MINING CO. N. UTA

Office and mine: Moab, Grand Co., Utah. Organized Nov. 2, 1905, und laws of Utah, to take over claims in the La Sal district. Apparently id since birth.

MOBILE MINE. GEORGI

Mine office: Pierceville, Fannin Co., Ga. Is an old and slightly develop property, idle many years.

MINA MOCTEZUMA. MEXIC

Mine office: San Juan de Guadelupe, Durango, Mex. Ramón Gait owner and manager. Mine, opened by tunnel, carries argentiferous lead a copper ores, employing circa 50 men.

MOCTEZUMA-ARIZPE DEVELOPMENT CO., S. A. MEXIC

Is the Mexican incorporation of the Arizpe Development Co.

MOCTEZUMA COPPER CO. MEXIC

Office: 20-99 John St., New York, N. Y. Mine office: Nacozari, Moc zuma, Sonora, Mex. Jas. Douglas, president; A. C. James, vice-president; G Notman, secretary and treasurer; Jas. S. Douglas, superintendent; T. A. St ton, assistant superintendent; Geo. Kingdon and Geo. Reed, mine superinte ents; Al. Berner, mill superintendent; Dr. A. Sandberg, metallurgist; D. Giddings, engineer; Geo. M. Douglas, superintendent of motive power.

Organized under laws of West Virginia, with capitalization $3,000,0 Is a close corporation, owned and managed by members of the firm of Phel Dodge & Co.

Lands, circa 2,000 acres, in the Moctezuma and Arizpe districts of Sono including the Pilares de Nacozari mine, 6 miles east of Nacozari, also t *Juárez* and Nicolás ranches, area circa 35,000 acres.

The Pilares mine lies in a hilly country, near the divide of the Yaq

rivers. The lands have been probed extensively, by diamond drill . Ore occurs in a broad friction zone, in which the original rock has oken into pieces, ranging in size from gravel up to masses many tons ht, the porphyritic rock in this crushed zone, which is the matrix of , carrying mainly auriferous chalcopyrite, with occasional bornite, ed with pyrite. The deposit has no clearly defined footwall, and the dips at an angle of about 80°. There is a small outcrop of rich car- ore, but croppings are mainly red-stained porphyry, carrying consider- grade hematite. The leached zone is about 20′ in depth only, with coming in at depth of circa 60′. The ore body apparently is about e by 1,500′ long, at surface, with increased area at depth. The matrix e-grained silicious rhyolite, and ore averages about 2.7% in copper mined, before concentration, though some high grade ore is found. elopment is mainly by tunnel, though there are two vertical shafts, 87′ incline shaft on the San Pedro, deepest workings being only 700′. on is mainly through the Porvenir tunnel, about one mile long, with al shaft at the end, the tunnel, which is on the 700′ level, being with railroad tracks of 20″ gauge. The Porvenir tunnel has extensive at either side, with storage bins in a 25x100′ chamber, to which ore l down from the upper workings. The mine shows some enormous No. 4 stope, on the third level, being 85′ high, 125′ wide and 150′ long. e has about 50 miles of workings, and is very dry and well ventilated. is extracted in stopes 100′ square, and, after removal of ore, the de- topes are caved in from surface, after which another 100′ section is This is repeated for the entire length of the ore body, after which 100′ section is started, at a distance of 100′ from the previously mined leaving a 100′ strip of unmined ore between the length of the prop- er which the unmined section, 100′ wide, is stoped, ground being held roken rock on either side. The Pilares has one of the largest copper s in the world, and it is comparable, in many respects, with the Rio The mine has several million tons of ore blocked out for stoping, with of known ore of enormous tonnage.

new 1,200-h. p. power plant, completed 1908, has a battery of Stirling vith a 196′ reinforced concrete smokestack, and is equipped with steam and electric generators, distributing electric power to the new con- r and the mine. The old power plant has both steam and gas power, the latter, with Loomis-Pettibone generators making both producer er gases, which are stored in separate gasometers, of 15,000 and 5,000 et capacity respectively, gases being mixed in due proportions, before e consumption of fuel in the producer gas plant is under 3 lbs. of very wood, per horsepower hour. The old power plant has eight 100-h. p. single-cylinder 4-cycle gas engines, with 18½″ cylinders and 24″ naking 200 revolutions per minute, each direct-connected to a 65-kw. irrent generator, and one 200-h. p. Crossley engine, driving a 150-kw. r. Current is sent from the central station, at 250 volts, to some 40 motors, installations ranging from 5 to 175 h. p. each. Electric r the mine is transmitted 6 miles, at 6,600 volts, and at the mine is down to 230 volts, for the pumps, while the hoists and the electric ves use a 250-volt direct current.

dings, mainly of steel, include a brick machine-shop. Lighting at the l mills is by arc and incandescent electric lights.

mine, mill and smelter are connected by a 6-mile narrow-gauge rail- own as the High Line, which was extended, improved and relaid with el rails, in 1908. Rolling stock includes 60-ton locomotives and 25-ton -cars.

shares $1 par. Lands, 8 patented lode claims and 2 patented placer
a circa 150 acres, also a millsite and right of way to railroad, in-
operties formerly held by the Minah Consolidated. Presumably idle.

Stanton, *vice-president; Fred Smith*, agent; preceding officers and

There are two mills, the old concentrator, of 600 tons daily capacity, being in 2 sections, equipped with 2 Blake crushers, 4 sets of 54x3" roughing rolls, 2 sets of finishing rolls, 24 revolving screens, ten 5' Huntington mills, 48 Harts jigs, 56 six-foot Frue vanners, 20 Bartlett tables, 7 settling tanks and hydraulic classifiers. Slimes from the settlers are worked by vanners exclusively, and rolls are used in crushing, as far as possible, to obviate sliming. Tailings are reground and treated on Frue vanners. Equipment of the old mill includes five 50-h. p. motors, eight 30-h. p. motors and one 20-h. p. motor. The old mill, designed by Dr. L. D. Ricketts, is said to save upwards of 90% of assay values, although the ore is not readily amenable to satisfactory treatment.

The new mill, of 2,000 tons nominal daily capacity, 6 miles from the mine, is in 2 sections, the first half having gone into commission circa July 1, 1908. Equipment includes 15 Allis-Chalmers 3-phase, 60-cycle, 220-volt induction motors, of 10 to 75 h. p. each, and the mill has 70 Risdon-Johnston concentrating tables. The new mill makes concentrates of about 12% copper tenor, with a saving of about 82% of assay values. Equipment includes 20 thirty-ton Ingoldsby side-dumping cars.

The mills are supplied with water by one Triplex and 3 Worthington pumps, forked from a well in the river to a reservoir at the millsite, and wash-water from the concentrators is settled and re-used.

The smelter, near the mill and 5 miles from the mine, has two 42x130" elliptical water-jacket blast-furnaces, of the Copper Queen type, flanked by tilting wells that can be tilted both front and rear. The converter department has 2 stands, with 96x114" shells of the Copper Queen type. Fumes from furnaces and converters pass into an 8' horizontal steel flue, connecting with a 750' brick flue that discharges into a 70' brick stack. Blast is furnished by a blower, direct-connected to a 75-h. p. dynamo. This smelter was closed, September, 1904, upon completion of the railroad line from Cos to Nacozari, since which time all concentrates have been shipped to the Douglas smelter of the Copper Queen, 77 miles distant.

The company maintains both English and Spanish schools, for children of employes, also a hospital, public library and well-stocked general store.

The mine workers are mainly Mexicans, as are many of the employes at the mill, and the bulk of the forces employed on surface. Native labor is paid 2 to 3 pesos per 10-hour shift. Forces are about 800 men.

Production has been as follows: 9,632,000 lbs. fine copper in 1904; 10,160,016 lbs. fine copper in 1905; 12,714,726 lbs. in 1906; 9,640,390 lbs. in 1907. Production for latter half of 1908 was considerably increased, as a result of starting the first section of the new mill, and should be raised, ultimately, to 25,000,000 to 30,000,000 lbs. fine copper yearly. The management is excellent, and the property, while low in average grade, has an enormous tonnage of ore, and is certain to become a much heavier producer in the future than it has been in the past.

MOCTEZUMA DEVELOPMENT CO. MEXICO.

Office: Douglas, Ariz. Mine office: Moctezuma, Sonora, Mex. Jas. E. Suits, T. S. Lamberson, Geo. W. Cass, J. J. Brown and Gid Graham, directors. Organized Aug. 6, 1906, under laws of Arizona, with capitalization $200,000, shares $1 par. Mine, having 4 tunnels, with about 2 miles of workings, greatest depth being 700', is claimed to have produced, under former ownership, about $2,000,000 worth of copper, lead, gold and silver ores.

MOCTIGAN MINING CO. MONTANA.

Office: care of J. H. Vivian, president, Butte, Silver Bow Co., Mont. Mine office: Corbin, Jefferson Co., Mont. Jas. Higgins, vice-president; J. K. Rowe, secretary and treasurer; preceding officers and Jas. B. White, directors. *Organized* February, 1907, under laws of Montana, with capitalization

$1,000,000, shares $1 par. Lands, 8 patented lode claims and 2 patented placer claims, area circa 150 acres, also a millsite and right of way to railroad, including properties formerly held by the Minah Consolidated. Presumably idle.

MODERN COPPER MINING CO. **ARIZONA.**

Office: Utica, N. Y. Mine office: Bisbee, Cochise Co., Ariz. W. J. Thistlethwaite, president, R. Harlan, general manager; J. C. Green, secretary. Lands, 28 claims, unpatented, area circa 500 acres, at the northwestern end of Tombstone Cañon, in the Warren district, showing 5 fissure veins, carrying carbonate and sulphide ores, of which one vein, slightly developed, is said to give average assays of 7% copper, 10% lead, 14 oz. silver and 1 oz. gold per ton. Has shafts of 25', 40', 50' and 100', and has started a tunnel, to strike a vein claimed to show a gossan outcrop. Claims considered poorly located.

MODOC MINING CO. **NEW MEXICO.**

Dead. Lands passed to American Metals Co. Formerly at Organ, Donna Ana Co., N. M. Described Vol. VI.

MOGOLLON GOLD & COPPER CO. **NEW MEXICO**

Office: 516-290 Broadway, New York, N. Y. Mine office: Cooney, Socorro Co., N. M. Thos. J. Curran, president and general manager; Walter D. Buchanan, vice-president; Geo. H. Masten, secretary and treasurer; preceding officers, Geo. W. Stubbs and William J. Weatherby, directors; James P. Butchen, superintendent; J. D. Murphy, mine superintendent; Robert G. Bailey, mill superintendent. Organized Sept. 12, 1901, under laws of New Mexico, with capitalization $1,250,000, shares $1 par; issued, $950,000. Bonds, $350,000 authorized, $105,000 issued. Paid dividends of $22,500 to March 12, 1906.

Lands, 29 claims, area 500 acres, partly patented, also a 40-acre millsite, in the Cooney district of the Mogollon Mountains, circa 85 miles northeast of Silver City, the nearest railroad point, including 5 groups, known as the Cooney, Peacock, Little Charley, Independence and Fluoride.

The Peacock mine has a 400' shaft, about 1,500' distant from the Cooney shaft, and connected therewith by drifts on several levels. The Cooney group, 8 claims, is developed by a 550' two-compartment main shaft. The mine is opened on a fissure vein, in porphyry and andesite, that averages 5' to 10' width, with occasional greater width, carrying a paystreak of 3' to 30' width, with numerous narrow feeders, some of which have high values in gold. Ores are principally slightly auriferous and highly argentiferous chalcocite, bornite and chalcopyrite, with silver values increasing at depth. The Cooney has 6 levels opened, and the Cooney and Peacock have been producers of ores to the estimated value of $1,250,000, in the past.

Equipment includes a machine shop, electric light plant and a small concentrator. A receivership was asked, May, 1907, on the alleged ground of insolvency and bad management, but apparently was not granted by the courts, and the property was working, with a small force, at last accounts.

MOGOLLON MINING CO. **NEW MEXICO.**

Office: Deming, N. M. Mine office: Cooney, Socorro Co., N. M. W. L. Nixon, president and general manager; T. B. Dillon, vice-president and mill superintendent; W. B. Westgate, secretary; E. S. Milford, treasurer. Company has a 5-year lease of the Deep Down mill.

MOHAWK MINING CO. **MICHIGAN.**

Office: 615 William St., New York, N. Y. Mine office: Mohawk, Keweenaw Co., Mich. Mill office: Gay, Keweenaw Co., Mich. Employs circa 1,000 men. Jos. E. Gay, president and treasurer; J. Wheeler Hardley, secretary; John R. Stanton, *vice-president; Fred Smith*, agent; preceding officers and

Wm. A. Paine, directors; Willard J. Smith, superintendent; Frank Getchell, clerk; John Trevorrow, mining captain; F. Wm. Hartmann, engineer.

Organized November, 1898, under laws of Michigan, with capitalization $2,500,000, shares $25 par; paid in, $21. Dividends have been as follows: $500,000 in 1906; $900,000 in 1907; $200,000 in 1908. Boston Safe Deposit & Trust Co., registrar; American Trust Co., Boston, transfer agent. Annual meeting, last Tuesday in March.

Lands, 800 acres, forming an irregular tract having its axis on the strike of the lode, in Sections 27, 28, 33 and 34, T. 57 N., R. 32 W. The Mohawk lies about 4 miles northeast of Calumet, having the Ahmeek and Seneca on the north, and Ahmeek on the west. The Mohawk, formerly known as the Fulton, was supposed to lie too far east to carry the outcrop of the Kearsarge bed until it was found, accidentally, circa 1896, by the cutting of a wood-road. The Kearsarge amygdaloidal bed, on which the mine is opened, outcrops for about one mile on the Mohawk tract, and the deepest shaft can be sunk, on the dip of the bed, for nearly 1½ miles, before reaching the boundary.

Crossing the Kearsarge lode at approximately right angles, with nearly vertical dip, are 3 fissure veins, carrying sundry arsenides of copper, including mohawkite, keweenawite, mohawk-whitneyite and stibio-domeykite, the two former being peculiar to this mine. Mohawkite occurs in considerable quantities in the upper north drifts of No. 1 shaft, in a vein ranging 3" to 3' in width, which was found mineralized at the crossing of the amygdaloidal bed and for an indefinite but unusually short distance on either side, the mohawkite and allied arsenides of copper occasionally occurring massive, though usually disseminated in an arenaceous gangue. On the deeper levels the mineral contents of the principal fissure veins are small, and apparently the production of mohawkite for the future will be trifling. Sales of mohawkite and allied arsenides, to end of 1907, returned $116,407.79.

In addition to the Kearsarge amygdaloid and the arsenical fissure veins, the Mohawk property carries sundry other copper-bearing amygdaloidal beds which may be given attention later, but work, very wisely, has been confined to date, to the development of a profitable mine on the Kearsarge bed.

The mine has 5 shafts, numbered from north to south. New openings have been as follows: 10,812' in 1905; 13,314' in 1906; 11,043' in 1907. The mine is equipped with Richmond electric signals, and operates 65 power drills. The shafts are connected by drifts down to and including the 5th level, these drifts running from the northern boundary to circa 600' south of No. 5 shaft. Shafts 1 to 4, inclusive, are connected down to and including the 8th level, and shafts 1 and 2 are connected to the 14th level. The use of concrete stringers was begun in 1905, in shafts 1, 2, 3 and 4, below the timbering formerly installed, and No. 5 has concrete stringers from surface. The wooden sleepers in the four older and deeper shafts will be replaced by concrete, from time to time, as the wooden sleepers decay.

Shafts are of uniform size, 8x18' inside of timbers, with solid cribbing through the overburden, and are to have identical equipments. The lode runs 15' to 18' wide, or about the same as in the Wolverine, and carries about the same percentage of copper as the Wolverine at similar depth, but is not nearly so rich as the bottom workings of the Wolverine.

No. 1 shaft, circa 1,500' south of the northern boundary, on the strike of the lode, is 1,700' deep. This shaft gave a good showing near surface, which became poor at depth, but is improving again in the lower levels. The hoist for No. 1, located in the central power plant of No. 2 shaft, operates two 4-ton skips in counterbalance. No. 1 has a combination shaft-rockhouse, equipped with a 12x24" Nordberg engine and rock-crushers.

No. 2 shaft, 1,100' southwest of No. 1, is 1,575' deep. Like No. 1, the

owing was good near surface, but poor at depth, though improving below e 12th level. The power plant at No. 2 shaft, serving both of the northern afts, includes an engine-house and boiler-house of mine rock with redstone mmings. Hoists are Nordberg double-conical-drum duplex-cylinder engines, od for 6,000′ depth, each handling two 4-ton skips in counterbalance. The iler-house has 2 locomotive firebox boilers, with foundations for 3 additional, nd the engine-house has an auxiliary compressor plant, with 2 Ingersoll-Ser-eant air-compressors, of 40 drills combined capacity. No. 2 has a combina-ion shaft-rockhouse, similar to No. 1 in design and equipment.

No. 3 shaft, 1,100′ southwest of No. 2, is 1,225′ deep, and will reach the estern boundary at a depth of circa 2,000′. Equipment includes a shaft-ockhouse similar to the northern shafts, and a Fraser & Chalmers geared oist, good for 3,000′ depth, operating 2-ton skips in balance.

No. 4 shaft, 1,300′ southwest of No. 3, is 1,175′ deep, developing good verage ground from surface. Equipment includes a steel shaft-rockhouse ith 3 crushers and a steam-hammer. The engine-house, of redstone, has a Nordberg double-conical-drum hoist, good for 6,000′ depth. The central com-pressor plant, at No. 4, has a 60-drill Nordberg air-compressor and a 60-drill Ingersoll-Sergeant cross-compound 2-stage air-compressor, with steam cylinders of 22″ and 46″ diameter, and air cylinders of 27¼″ and 42¼″ diameter, with stroke of 48″, having a piston efficiency of 5,260 cubic feet of free air per minute, compressed to a pressure of 70 lbs. per square inch. The boiler-house at No. 4, of redstone, has 5 locomotive firebox boilers and a 160′ self-sup-porting brick-lined steel smokestack.

No. 5 shaft, 1,800′ south of No. 4, is 575′ deep, with an excellent showing of copper from surface. The temporary rockhouse, with one crusher, is to be replaced by a shaft-rockhouse similar to those at the other shafts. Equipment includes a frame power-house, with a Fraser & Chalmers straight-face drum hoist good for 2,000′, brought from No. 1. A Bullock hoist, good for 4,000′ depth, formerly at No. 4 shaft of the Wolverine, is on the ground, and to be installed, during 1909.

There are large coal-trestles at No. 4 shaft and between shafts 2 and 3. The mine has a complete telephone system, on surface and underground. Buildings include two miners' changing houses, a machine shop, smithy, com-bination carpenter shop and warehouse, 30x40′ office, a well equipped hos-pital, numerous minor buildings and dwellings for employes. A considerable village, with business houses, a bank, newspaper, etc., has grown up around the mine.

The mill, near the mouth of the Tobacco river, on Traverse Bay, Lake Superior, opposite the mill of the Wolverine, is 178x206′ in size, of steel frame, sheathed with iron, on foundations of sandstone quarried from the ompany's own land. A steel trestle, 350′ long and 50′ high, leads into the ill, loaded cars being pulled up the incline by a winding engine. The mill as 4 stamps, all compounded, giving a daily capacity of about 3,000 tons. he mill has a Chilean mill and 3 sets of auxiliary crushing rolls, with fixed arings, to reduce oversize material from the mortar-boxes of the heads, is averaging 20 to 25% of rock stamped. Mineral from the wash dis-harges automatically, and is sluiced into the basement, where shoveled into ½-ton mineral cars, having 14-mesh perforated steel bottoms that allow the raining out of water, after which the cars are weighed, then lifted by a age-elevator and dumped into bins. The bin-house has 4 compartments, each ith a cement floor and steam pipes underneath for drying the remaining oisture from the wash. The mineral is taken from the bin-house, in self-amping steel mineral cars, to the Michigan smelter at Houghton, for re-uction.

The boiler-house, of steel, adjoining the mill, has four 250-h. p. Stirling water-tube boilers.

Water for both the Mohawk and Wolverine mills is furnished from a joint pumphouse, standing near the Tobacco River, from which water is taken. The pumphouse has a 20,000,000-gallon triple expansion Snow pump, supplemented by a new 9,000,000-gallon Nordberg pump, giving an ample water supply for both mills.

A 30x300' wharf, on Traverse Bay, a short distance from the mill, with 14' of clear water alongside, is fitted with coal-hoists and storage sheds, ample for the needs of both mills.

The townsite at the Mohawk and Wolverine mills, named in deserved honor of Jos. E. Gay, long identified with honest and successful copper mining in the Lake Superior district, is well laid out, with wide streets, water mains and hydrants, and has a number of substantial dwellings for employés.

Production has been as follows: 6,284,327 lbs. fine copper in 1903; 8,149,515 lbs. in 1904; 9,387,614 lbs. in 1905; 9,352,252 lbs. in 1906; 10,107,205 lbs. in 1907. In October, 1908, the fourth stamp was being worked part time and production for 1909 should be circa 13,000,000 lbs. fine copper. Yield of fine copper per ton of rock stamped was 21.79 lbs. in 1903; 17.76 lbs. in 1904; 16.01 lbs. in 1905; 15.12 lbs. in 1906, and 15.77 lbs. in 1907. Costs per ton of rock stamped, less construction, were $1.92 in 1903; $1.63 in 1904; $1.56 in 1905, $1.59 in 1906 and $1.54 in 1907. The cost of copper per pound, exclusive of construction, was 8.78 cents in 1903; 9.19 cents in 1904; 9.77 cents in 1905; 10. cents in 1906, and 10.725 cents in 1907, with total costs, for 1907, including construction, of 11.75 cents per pound. Costs for 1908 should be circa 10 cents per pound. The Mohawk, while it has not proven as rich a mine as was generally anticipated, is a magnificent property, with an assured future, and has a strong, honest and thoroughly competent management.

MOHAWK MINING CO. UTAH.

Mine office: Bingham Canyon, Salt Lake Co., Utah. F. S. Bascom, president; E. B. Critchlow, vice-president; Edward W. Duncan, secretary and treasurer. Organized Nov. 28, 1902, under laws of Utah, with capitalization $150,000. Lands, 7 claims. Idle and apparently moribund.

MOIRA COPPER CO. ALASKA.

Office: Milwaukee, Wis. Letter returned unclaimed from former mine office, Ketchikan, Alaska. Lands, 7 claims, adjoining the Niblack Copper Co., on Prince of Wales Island. Idle.

MOJAVE COPPER CO. CALIFORNIA.

Dead. Operated circa 1902. Formerly at Mojave, Kern Co., Cal.

MOLLIE STARK COPPER MINING CO. WYOMING.

Dead. Formerly at Encampment, Carbon Co., Wyo. Described Vol. VI.

MOLOLOA MINING CO. MEXICO.

Office: Toronto, Ont. Mine office: Hostotipaquillo, Ahualulco, Jalisco, Mex. Dr. Willet G. Miller, president; Frank G. Stevens, managing director. Organized 1908, under laws of Ontario, with capitalization $250,000. Property, bought of Carlos Romero, is said to show good ore.

MONA & PARYS MINES, LTD. WALES.

Office: Amlwch, Anglesey, Wales. Mine office: Mona, Amlwch, Anglesey, Wales. R. Bridson, secretary. Organized Jan. 13, 1899, with capitalization £75,000, shares £1 par; issued, £55,000. Debentures, £20,000 first mortgage, at 6%, and £10,000 second mortgage, at 7%. Lands, 1,067 acres, with improved water-frontage, warehouses, ochre works, tramways, etc. Also has a color-works plant at Amlwch. Makes a little copper, by cementation, from mine-*waters*. Mines in this district were worked by the Romans. The Parys mine

as opened 1768, and made 3,000 tons of copper in 1784. Present production 25 to 50 tons fine copper yearly.

ONARCH CONSOLIDATED GOLD & COPPER MINING & SMELTING CO. **COLORADO.**

Office: 1932 Thirteenth St., Boulder, Colo. Mine office: Sunshine, oulder Co., Colo. Thos. S. Waltenmeyer, president and treasurer; Chas. Wol ott, vice-president; F. H. Wolcott, secretary. Organized September, 1903, nder laws of Colorado, with capitalization $1,000,000, shares $1 par. Bonds, 200,000, at 6%, running 3 years; $200,000 outstanding.

Lands include the Buena and Pilot mines, at Sunshine, Colorado, which are old properties, and the Copper King group, on the south fork of the Grand iver, in Middle Park, Grant county, Colorado, latter, area 1,740 acres, carrying 3 miles of the strike of a copper vein said to be 15′ to 50′ wide. The Copper King group has a 25-h. p. hydro-electric power installation, and developments thereon have been suspended for several years. The company claims to have 50,000 tons of ore blocked out in its gold mines, and the mill was remodeled, 1907. Early 1908 company planned production on a considerable scale, but at last accounts, circa September, 1908, a reorganization was under consideration.

MONARCH COPPER MINING CO. **CALIFORNIA.**

Dead. Was a swindle, promoted by "Baron" W. E. von Johannsen. Formerly at Callahan, Siskiyou Co., Cal. Fully described Vol. VII.

MONARCH GOLD & COPPER MINES, LTD. **BRITISH COLUMBIA.**

Dead. Formerly at Nelson, Trail district, B. C.

MONARCH GOLD & COPPER MINING CO. **ARIZONA.**

Dead. Was promoted by G. P. Morrill. Formerly at Big Bug, Yavapai Co., Ariz.

MONARCH MINES & SMELTERS CORPORATION. **UTAH.**

Dead. Name changed, Nov. 26, 1904, to Nevada-Utah Mines & Smelters Corporation. Formerly at Milford, Beaver Co., Utah.

MONARCH MINING, MILLING & SMELTING CO. **ARIZONA.**

Mine office: Macon, Ga. Mine office: Wickenburg, Maricopa Co., Ariz. Has about 7,000′ of workings, including various tunnels, shafts, pits and trenches. Equipment includes an air-compressor and experimental mill.

ONARCH MINING & SMELTING CO. **ARIZONA.**

Mine office: Wickenburg, Maricopa Co., Ariz. J. T. Ross, president; K. Harris, vice-president; J. F. Minton, secretary and treasurer. Organized gust, 1904, under laws of Arizona, with capitalization $1,000,000, shares $1 r. Lands, 10 claims, known as the Three Black Buttes, in the Black Rock strict, 9 miles southeast of Wickenburg, opened by tunnel, with circa 4,000′ workings. Ores are low in average tenor, giving assays of 3 to 20% copper d $3 to $15 gold per ton. Old 50-ton mill, burned April, 1907, was replaced, 08, by a 50-ton mill on same site.

ONARCH-SMUGGLER MINING & REDUCTION CO. **COLORADO.**

Office: 521 Commonwealth Bldg., Denver, Colo. Mine office: Eldora, oulder Co., Colo. Earl W. Kelly, president and general manager; Fred S. reet, vice-president; J. Horace Shepard, treasurer; preceding officers, Eda . Kelly and Oscar Sorsonsen, directors; Charles E. Dawson, secretary. Organed Jan. 2, 1906, under laws of Colorado, with capitalization $3,000,000, shares par.

Lands, 14 claims, area 137 acres, in the Harmon district of Grant county, olorado, circa 50 miles northwest of Denver, said to show surface ores assayg $6 to $98 per ton. Company planned a 1,500′ tunnel, designed to cut the ain vein at 800′ depth. *Idle.*

AGUIRRE MONCADA i HERMANOS. CHILE.

Mine office: Higuera, La Serena, Coquimbo, Chile. Property is the Carmelita mine, at Yerbas Buenas, circa 13 leagues from Higuera, the nearest railroad point, with 10 pesos per ton transportation charges on ore and supplies. Mine, opened to depth of 115 meters, produced 200 metric tons of 12% ore, after discarding about 2,000 tons of 5% ore, from a vein of 6′ to 7′ width, in 1903.

MOND NICKEL CO., LTD. ONTARIO.

Office: 39 Victoria St., London, S. W., Eng. Mine office: Victoria Mines, Algoma, Ont. Works office: Clydach, Wales. Dr. Ludwig Mond, F. R. S., chairman; Robt. Mathias, secretary; Dr. Bernard Mohr, general manager; C. V. Corliss, mine superintendent. Organized Sept. 20, 1900, under laws of Great Britain, with capitalization £600,000, in £250,000 cumulative 7% shares of £5 par, £300,000 ordinary shares of £1 par, and £50,000 deferred shares of £1 par, all issued and fully paid. Paid dividends on ordinary shares of 6% in 1905, 10% in 1906, and 12½% in 1907. Paid dividends on deferred shares of 18% in 1906 and 33% in 1907.

Lands, 3,350 acres freehold and 1,550 acres leasehold, held under 3-year option, in the townships of Blezard, Denison, Snider and Garson, in the Sudbury district of Ontario, carrying nickeliferous and cupriferous pyrrhotite.

The Victoria mine, which is the principal property, has a 3-compartment vertical shaft, 4x12′ inside of timbers, sunk to depth of circa 720′, with 9 levels opened, the bottom level showing ore bodies maintaining their size and quality of ore. The Victoria carries 2 lenses of nickeliferous pyrrhotite and chalcopyrite about 160′ apart, with east and west strike, and uniform dip of about 75° to the east, connected by stringers, in schistose diorite near a granite contact. No. 1 shaft has a rockhouse and shafthouse. Equipment includes 5-drill and 10-drill Rand straight-line air-compressors, and hoists.

The Garson mine has a 225′ shaft, and apparently has been idle for some years.

The mine and works are operated by electric power, transmitted 10 miles from the Wahnapitae River, by the Wahnapitae Power Co.

A 11,000′ Bleichert aërial gravity tram connects the Victoria mine with the roast-heaps and smelters. Ore is dumped from the buckets of the aërial tram at the roast-yard, and, after burning, is carried by bucket to the smelter.

The smelter, of steel, sheathed with corrugated iron, has 2 water-jacket blast-furnaces, and 2 converter stands with a traveling crane. The smelter power plant has five 100-h. p. return tubular boilers, a Riedler air-compressor for converter blast, 2 Connersville blowers with direct connected engines, and a 125-kw. dynamo. The works have direct connection with the Canadian Pacific railway.

About 200 men are employed at the mine and smelter.

At the refining works, in the Swansea Valley, the bessemerized copper-nickel matte from the smelter is dead-roasted and treated with dilute sulphuric acid, which permits the extraction of about two-thirds of the copper and 2% of the contained nickel. The residue, after drying, assaying 45 to 60% nickel, is treated, in charges of 500 kgs., with water-gas, in a reduction tower, at a temperature of about 300° Centigrade. This tower has shelves, and the ore is moved from shelf to shelf by automatic rakes, the lower shelves being cooled. After treatment in the reduction tower, the charge is transferred to a volatizing tower, and treated with carbon monoxide, at a temperature of about 100° C. The residue therefrom is returned to the reducing tower, and the charge goes forward and back between the two towers, for 10 to 15 days, and when 60% of the nickel has been volatized, as nickel carbonyl, the residue of the charge is returned to the roasting furnace. The nickel carbonyl

treated in a decomposing apparatus, wherein the metal is recovered in granules, assaying 99.4% to 99.8% nickel. The copper is turned out as blue-stone.

Production for 1906 was 54,079 short tons of ore, yielding 3,365 short tons of nickel-copper matte that returned 2,588,000 lbs. fine copper and 1,798,000 lbs. refined nickel.

MONETT GOLD & COPPER MINING & MILLING CO. **UTAH.**

Office: care of J. J. Davis, secretary, Monett, Mo. Mine office: Ibapah, Tooele Co., Utah. O. P. Shaffer, president; H. L. Eckert, vice-president; F. E. Shaffer, treasurer. Organized under laws of Utah, with capitalization $100,000, shares 10 cents par. Lands, 37 claims, area 740 acres, showing argentiferous copper and lead ores.

MONEY METALS MINING CO. **ARIZONA.**

Office: Prescott, Arizona. Mine office: Jerome, Yavapai Co., Ariz. H. L. Sweeney, vice-president; W. H. Reiterman, secretary, treasurer and general manager. Organized 1905, with capitalization $1,200,000, shares $1 par. Lands, 7 claims, unpatented, also sundry timber lands, giving total holdings of 120 acres, in the Big Bug and Black Hills districts, circa 3 miles south of the Yaeger Cañon mine, and 6 miles from a railroad. Mine has 275′ of workings, including the Bordeaux shaft of 165′, showing a 3′ vein of argentiferous lead and copper sulphides.

MONFARLAND COPPER EXPLORATION, LTD. **TRANSVAAL.**

Office: 52 New Stock Exchange, Johannesburg, Transvaal. H. Martyn Burgess, manager. Organized April, 1908, under laws of Transvaal, with capitalization £2,350. Lands show 2 practically parallel veins, one of circa 6′ average width, carrying considerable chalcocite, and one of about 8′ width showing chalcopyrite and what the manager terms carbonate of copper glance. Some trenching was done, and a shaft was started, in the 6′ vein, July, 1908.

MONIDA GOLD & COPPER MINING CO. **IDAHO.**

Letter returned unclaimed from former office and mine, Mullan, Shoshone Co., Idaho. Organized under laws of Idaho, with capitalization $1,000,000, shares $1 par, by L. T. Nystrom, et al. Lands, 6 claims, in the Hunter district.

MONITOR CONSOLIDATED COPPER MINING CO. **IDAHO.**

Office: Wallace, Idaho. Mine office: Saltese, Missoula Co., Mont. Hon. Herman J. Rossi and Dr. Harold J. Reed, managers; Thos. Jay, superintendent. Paid a dividend, 1907, of $9,500.

Lands, 12 claims, near the Richmond, 6 miles west of Saltese, just over the line in Shoshone county, Idaho, carrying a fissure vein up to 14′ in width, with northeast and southwest strike, standing nearly vertical. Mine has a 90′ shaft and management plans a tunnel to carry a back of about 1,000′. Shipments, 1907, of selected ore, returned 17 to 22% copper, circa 7 oz. silver and $1.50 to $2 gold per ton, ore being mainly chalcopyrite, carrying an excess of iron with very little silica, and occasional native copper. Has steam power and a 3-drill air-compressor. Surveyed line for extension of Chicago, Milwaukee & St. Paul Railway passes within 3 miles of the mine. Production, 1906, was 320,000 lbs. fine copper.

MONITOR COPPER MINING & SMELTING CO.

Office: Wallace, Idaho.

MONITOR MINING CO. **BRITISH COLUMBIA.**

Dead. Formerly at Alberni, Vancouver Island, B. C. Described Vol. III.

MONITOR TUNNEL & PARK CANYON MINING CO. **MONTANA.**

Mine office: Butte, Silver Bow Co., Mont. Capitalization, $3,750,000, shares $1 par. Lands are *in Park Cañon, about* 2 miles east of Butte, near the

Homestake claim of the Butte Coalition, having a 1,500′ crosscut tunnel s
ing a wide ledge.

MONO-BALTIC MINING & SMELTING CO. COLORA

Office: 50 Congress St., Boston, Mass. Mine office: Red Moun
Ouray Co., Colo. E. W. Averill, president and treasurer; Frank Woodb
vice-president; E. J. Wescott, secretary; Joseph Irving, general mana
preceding officers, M. T. Chestnut and S. J. Ryan, directors. Organized
under laws of Colorado, with capitalization $500,000, shares $10 par; iss
$300,000.

Lands, circa 180 acres, in the Red Mountain district, showing fissure v
and contact deposits having large bodies of oxidized silicious ores of
tenor, but carrying high silver values, with some gold, also bornite and cha
pyrite associated with pyrite, all auriferous and argentiferous, a comp
sampling of the mine, with 500 assays, giving an average of 3.5% copper
12 oz. silver per ton, with small gold values.

Development is by 4 shafts, deepest 140′, and by tunnels of 120′, 7
1,000′, and 1,100′, with circa 8,000′ of workings, estimated by company
show 122,000 tons of ore.

Equipment includes a smithy and shops. The property carries limest
for fluxing, and a smelter site has been graded and the company contempl
building a steel smelter building, with bins, aerial tram, and a 42x120″ wa
jacket blast-furnace, planned to be blown in circa July, 1909.

MONROE CONSOLIDATED MINES CO. ARIZO

Dead. Formerly at Prescott, Yavapai Co., Ariz.

MONSTER MINING CO. UT

Dead. Was merged, circa 1907, in Garrison-Monster Mining Co.
merly at Ibapah, Tooele Co., Utah.

MONTAGNAT MINE. NEW CALEDON

Mine office: Diahot, New Caledonia. Property, slightly prospected, sh
ore for upwards of 500 meters length. Idle some years.

MONTANA APEX COPPER CO. MONTA

Office and mine: Dillon, Beaverhead Co., Mont. Organized circa Fe
ary, 1907, under laws of Arizona, with capitalization $800,000. Land
claims, known as the Snowball, Whale and Los Angeles, in the Utopia
trict, near the Indian Queen mine, showing indications of copper.

MONTANA & ARIZONA CONSOLIDATED COPPER CO. MONTA

Dead. Disincorporated circa 1902. Formerly had an office at 68 S
St., Boston, Mass.

MONTANA-ARIZONA COPPER CO. ARIZO

Office: Spokane, Wash. Mine office: Planet, Yuma Co., Ariz. J.
Greenough, manager. Lands, 26 claims, area 520 acres, circa 30 miles n
of Wendendale, the nearest railroad station. Property is said to show 5 v
of 3′ to 100′ width, traceable circa 7,000′, including a 3′ vein carrying
gold values. Development is by a 2-compartment 300′ shaft and a consi
able number of trenches. Equipment includes a 60-h. p. gasoline hoist. M
agement considered good.

MONTANA BELLE COPPER CO. ARIZO

Office: 52 Jacobson Bldg., Denver, Colo. Mine office: Wendendale, Y
Co., Ariz. Chas. P. Pierce, president; Luther Bain, vice-president; A
Emberson, secretary and treasurer; preceding officers and A. T. Cronin,
rectors. Organized Feb. 7, 1906, under laws of Arizona, with capitaliza
$800,000, shares $1 par.

Lands, 6 claims, area 120 acres, one mile west of Cunningham Pass
6 miles north of Wellton, in the Ellsworth district of the Harcúvar M
tains, said to show a vein of 8′ to 25′ width, with a good gossan carr

idized ores to a depth of 100′ to 150′, succeeded by sulphides. Shaft is said show ore assaying 5 to 17% copper, and the property is said also to have nsiderable free milling gold ore. Company's advertising is much disliked, cause misleading on many points.

ONTANA-BOSTON MINING & MILLING CO. **MONTANA.**

Office and mine: De Borgia, Missoula Co., Mont. Emil Anderson, superinndent. Organized July, 1907, under laws of Montana, with capitalization 100,000, shares 10 cents par.

ONTANA CONSOLIDATED COPPER CO. **MONTANA.**

Office: 46 Wall St., New York, N. Y. Mine office: Basin, Jefferson Co., Mont. Samuel L. Fuller, president; Marcus L. Hewett, vice-president; Otto Julius Merkel, secretary; preceding officers, G. Herman Kinnicut, Ellis Postlethwaite and D. Crawford Clark, directors; Capt. John L. Armit, general manager; M. E. Barr, engineer.

Organized June 13, 1906, under laws of Maine, as International Copper Co., with capitalization $10,000,000, and name changed to present title July 19, 1906.

Lands, 699 acres, in 4 groups, lying northeast of the New Boston, including several old properties, idle, except for operations of leasers, for 9 to 13 years before purchase by present company. The Hope group, 192 acres, includes the Hope and Comet mines, formerly considerable producers, popularly credited with a gross output of $10,000,000, which probably is a considerable overestimate. The Gray Eagle group, 139 acres, includes the Gray Eagle and Minneapolis mines. There also are placer claims and millsites aggregating 101 acres. The Comet mine, 820′ deep, and the Hope mine, 220′ deep, are the principal properties, these showing fissure veins in granite, carrying mainly argentiferous and auriferous copper and zinc sulphides, ore reserves in the old mines being mainly refractory zinc and lead sulphides, associated with auriferous pyrite, unprofitable for direct shipment and requiring concentration. Management expects an increase of copper and silver values with depth. Equipment includes an electric plant.

Company refuses to furnish a statement, declaring that there is nothing interest, and that property is in the hands of a few friends only. Development apparently is along business-like and well considered lines, and property considered promising.

ONTANA CONSOLIDATED COPPER CO. **MONTANA.**

Office: 42 Broadway, New York, N. Y. Mine office: Butte, Silver Bow , Mont. H. C. Wilmot, superintendent. Organized circa June, 1907, under s of Maine, with capitalization $2,500,000, shares $1 par. Is controlled by General Development Co.

Lands include the Granite Mountain claim, near the Jessie mine of the rth Butte, but do not include the Flatiron mine, near the Butte-Ballaklava. e Altoona mine, in the northern part of Butte, held, 1906, under bond and se, has been abandoned.

ONTANA CONSOLIDATED MINING CO. **MONTANA.**

Dead. A swindle, put out, circa 1903, by M. P. Hillyer & Co. Formerly Saltese, Missoula Co., Mont.

ONTANA COPPER CO. **MONTANA.**

Office: care of John F. Davies, Butte, Mont. Letter returned unclaimed m former mine office, Helena, Lewis & Clark Co., Mont. Lands, known as e Spokane Hill group, 7 miles northeast of East Helena, have a 115′ shaft, owing ore said to give average assays of 10% copper. Has steam power d several mine buildings.

ONTANA COPPER & GOLD MINING CO. **MONTANA.**

Office: 1122-135 *Adams St., Chicago, Ills.* Letter returned unclaimed

from former mine office, Dillon, Beaverhead Co., Mont. Was controlled through stock ownership, by International Copper & Gold Co., supposedly succeeded by Sonora Central Mines Co. Lands were 6 claims, in the Stone Creek district of Madison county, Montana, claimed to show carbonate ores. Is regarded with suspicion.

MONTANA COPPER MINING CO. MONTANA

Dead. Formerly at Helmville, Powell Co., Mont. Described Vol. II.

MONTANA COPPER & SILVER MINING CO. MONTANA

Office: Butte, Mont. Mine office: Clancey, Jefferson Co., Mont. C. H. Lane, superintendent. Capitalization $2,000,000, shares $10 par. Lands, 2 claims, in Lump Gulch, 2 miles from Clancey, opened by the 275′ Clara Bell shaft, lower drift of which shows tetradedrite assaying 60 to 400 oz. silver per ton. Has steam power.

MONTANA ELECTROLYTIC CO. MONTANA.

Works office: Wickes, Jefferson Co., Mont. J. L. Malm, superintendent.

MONTANA FURNACE CREEK COPPER CO. CALIFORNIA.

Office: care of Hon. John MacGinnis, Butte, Mont. Mine office: Green water, Inyo Co., Cal. Organized Dec. 6, 1906, under laws of Montana, with capitalization $1,000,000, shares $1 par. Lands, 8 claims. Idle at last accounts.

MONTANA-HECLA MINING CO. MONTANA.

Office: 1004 Broadway, Oakland, Cal. Mine office: Norris, Madison Co., Mont. J. K. Riordan, president, treasurer and general manager; M. F. Webster, vice-president; Mark E. Davis, secretary; Daniel O'Shea, superintendent. Organized Jan. 20, 1906, under laws of Washington, with capitalization $375,000, shares $2 par; issued, $225,000.

Lands, 28 claims, area 560 acres, on Old Colony Hill, a few miles from Norris, in the Lower Warm Springs unorganized district. Property shows 3 fissure veins, in granite, of which one, under development, of about 6′ average width, traceable 2 miles, shows, below circa 200′ depth, sulphide ores with silicious gangue, giving assays of 0.5 to 1% copper, 3% lead, 50 to 75 oz. silver and $2 gold per ton, with ledge matter giving assays up to $4.12 gold per ton. Development is by numerous pits of 10′ to 50′ depth, shafts of 95′, 100′ and 210′, and tunnels of 250′ and 700′, with a total of 2,340′ of workings.

Company plans installing a 200-h. p. water plant, having circa 1,000 h. p. available, also a new mining plant with a 3-drill air-compressor and 50-h. p. Westinghouse electric motor. There are 7 mine buildings, and a good wagon road to the Northern Pacific, 3 miles distant.

Property is not yet deep enough for copper in considerable quantities, but indications are decidedly favorable, and company plans steady development and extending No. 1 tunnel 1,500′ on the ledge. Property considered promising.

MONTANA-ILLINOIS COPPER MINING CO. MONTANA.

Office: 218 LaSalle St., Chicago, Ills. Mine office: Mammoth, Madison Co., Mont. W. G. Bennett, president. Organized circa 1907, under laws of Montana, with capitalization $2,000,000, shares $1 par. Lands, 11 lode claims, 2 placer claims, 1 millsite, 1 water right and 320 acres timber lands, giving total holdings of circa 550 acres, including part of lands formerly held by Bismarck-Nugget Gulch, in the Ruby Mountains. Mine, said to have circa 1,100′ of workings, shows bornite and chalcopyrite said to average about 5% copper, 1.25 oz. silver and 40 cents gold per ton. The Bismarck-Nugget Gulch had a 30-ton smelter, presumably held by present company. According to company's advertising, its shares offer a better investment than North Butte *which nobody but fools will believe.* Is not regarded favorably.

ANA MINE. **AUSTRALIA.**
ne office: Sunny Corner, N. S. W., Australia. M. Welch, superintend-
as a shaft about 150′ deep and has secured ore up to 16% in copper

ANA MINERAL LAND DEVELOPMENT CO. **MONTANA.**
ce: Findlay, Ohio. Mine office: Basin, Jefferson Co., Mont. John
r, president and treasurer; Antoine Lutz, vice-president; Alfred Graber,
y; Thos. C. Kelly, superintendent. Organized 1902, under laws of
a, with capitalization $3,500,000, shares $1 par.
ds, 19 claims, area circa 300 acres, known as the Eva May and Red
up, on Cataract Creek. Property shows fissure veins in granite carry-
hide ores, mainly chalcopyrite. Development is by a 1,200′ vertical
d tunnels of 525′, 1,400′ and 800′, developing a vein of 100′ claimed
iving assays of 6% copper, 6 to 12% lead, 15 to 30 oz. silver and 20
$3 gold per ton. The property shows a considerable body of low to
grade ore, and the company estimates 50,000 tons blocked out for

ipment includes a 200-h. p. steam hoist having two 75-h. p. hoists,
g a 14x16″ Vulcan hoist raising single-deck cages, and a 4-drill Inger-
cant air-compressor. Buildings include a 20x40′ log machine shop,
mithy, 24x34′ carpenter-shop, and a 30x80′ powerhouse. The concen-
f logs, is 35x120′, with a 7x10″ Blake crusher, one set of rolls, 8 three-
nent jigs and 2 Wilfley tables. The property, which has been de-
steadily, and has produced circa 7,000 tons of ore, sold for $166,238,
ered promising.

NA MINING & DEVELOPMENT CO. **MONTANA.**
l. Stock was "guaranteed" by "gold bonds." Formerly at Carter,
Co., Mont. Fully described Vol. V.

NA-MORNING MINING CO. **MONTANA.**
e office: Libby, Flathead Co., Mont. Lands, on Callihan Creek, show
of about 8′ width, carrying a 5′ paystreak of mixed galena and
e, apparently of smelting grade, with about 3′ of copper sulphides of
ating grade.

NA-NEVADA COPPER CO. **NEVADA.**
e office: Ely, White Pine Co., Nev. Capitalization $5,000,000, shares
Lands are said to be fairly located, but in limestone.

NA ORE PURCHASING CO. **MONTANA.**
e: 42 Broadway, New York, N. Y. Mine office: Butte, Silver Bow
t. F. August Heinze, president and general manager; John MacGin-
-president; Arthur P. Heinze, secretary; Stanley Gifford, treasurer.
d 1883, under laws of Montana, with capitalization $2,500,000; deben-
,000,000, first-mortgage 6% bonds. Is controlled by United Copper
h holds 76,791 shares out of 80,000 shares issued, and which formerly
he entire bond issue. The mining property of the company was sold,
Butte Coalition Mining Co.

NA REDUCTION CO. **MONTANA.**
e office: Cooke, Park Co., Mont. C. R. Tuttle, president; Robt. I.
secretary. Organized under laws of Arizona, with alleged capitaliza-
1,000,000, shares $1 par. Idle and apparently moribund.

NA SCOTCH BONNET COPPER **MONTANA.**
OLD MINING CO.
e: Spokane, Wash. Mine office: Cooke, Park Co., Mont. W. M.
n, general manager. Capitalization $3,000,000. Lands include the
aggie and Jennie V. groups, carrying ores of gold, silver and copper,
New World district, 70 miles from a railroad. A radical change in

management, made September, 1907, is hoped to prove a betterment, and scarcely can prove otherwise.

MONTANA STANDARD MINING CO. MONTANA.

Office: Columbus, Ohio. Mine office: Thompson, Sanders Co., Mont. M. J. Lisle, president; M. J. Maher, vice-president; Otto A. Schenk, secretary and treasurer; preceding officers, B. B. Baker, John Chester and H. Eddy, directors; Fremont S. Rowe, manager. Capitalization 1,000,000 shares, presumably $1 par. Lands, 10 miles east of the Bitter Root Mountains and 11 miles from Thompson, show 3 veins, 2 of which have been prospected, one being said to show 6′ to 8′ of concentrating ore.

MONTANA VERDE COPPER CO. MONTANA.

Dead. Formerly at Corbin, Jefferson Co., Mont.

MONTANA ZINC CO. MONTANA.

Mine office: Butte, Silver Bow Co., Mont. A. L. Strasberger, president. Practically succeeded by Butte Copper & Zinc Co., only assets, 1907, being 7,500 shares of Alice stock. Fully described Vol. VI.

HILARIO MONTAÑO. MEXICO.

Office and mine: Guachinango, Mascota, Jalisco, Mex. Lands, 8 pertenencias, showing strong veins, carrying auriferous and argentiferous copper ore, with antigua workings and recent workings.

SOCIÉTÉ DES MINES DE CUIVRE DE MONT CHALMERS. AUSTRALIA.

Dead. Voluntarily wound up, May 1, 1901. Formerly at Mt. Chalmers, Queensland, Australia.

MONTE CARLO CONSOLIDATED COPPER CO. NEW MEXICO.

Office: 1013 Union Bank Bldg., Pittsburg, Pa. Mine office: Orogrande, Otero Co., N. M. Chas. H. Spriggs, president; H. H. Schneider, secretary; G. B. Wharey, treasurer. Organized 1907, under laws of New Mexico, with capitalization $1,000,000, shares $25 par. Lands, 170 acres, 5 miles north of Orogrande, in the northern end of the Jarilla Mountains, having two 70′ shafts and a 100′ three-compartment shaft, showing ore that has assayed up to 35% copper, 800 oz. silver and $4 gold per ton. Was developing steadily at last accounts.

SOCIETÀ ANONIMA DELLE MINIÈRE DI MONTECATINI. ITALY.

Office: 49 Piazza Santa Apostoli, Rome, Italy. Mine offices: Boccheggiano, Grosseto, Tuscany, Italy, and Massa Marittima, Grosseto, Tuscany, Italy. I. Castelbolognesi, president; Alfred Deschars, vice-president; Alfredo Santori, secretary; Paolo Marengo, general manager; Paolo Cerrina, superintendent; Guglielmo Vallada, engineer. Organized 1888, under laws of Italy, with capitalization 5,000,000 lire, increased, circa 1906, to 6,500,000 lire, shares 100 lire par. Paid dividends, 1899-1902, of 82 lire per share.

Lands include the Montecatini, Boccheggiano, Capanne Vecchie, Fenice Massetana and Val di Nievole mines, all very ancient properties, worked successively by the Etruscans, Romans, Goths and Italians. The principal properties are 20 miles from Massa Marittima, the nearest station on the Mediterranean railroad. The Montecatini mines have a brecciated red porphyry, carrying occasional native copper, massive disseminated chalcocite, bornite and chalcopyrite, ores averaging about 3.5% in copper tenor, as mined. Development is by a 125-metre shaft and 5 tunnels, with nearly 10,000 metres of workings, putting about 500,000 tons of ore in sight. The property is equipped with steam power, and has a concentrator with 5 crushers. Production of the Montecatini mine, 1905, was 1,197 metric tons fine copper.

The Boccheggiano mine, which is the principal property, has a quartzite vein with ore in the southern end mainly zinciferous, carrying small quantities of copper and lead, the veins ranging from 13′ to 16′ in width, with a dip of

bout 50° East, carrying paystreaks along the hanging wall. The vein occu-ies a fault between micaceous Permian shales and Eocene limestone, carrying halcopyrite disseminated in pyrite and occasional hematite, with a quartz angue. There also are occasional veinlets of highly argentiferous tetrahedrite. The Boccheggiano carries about 0.05% tin. Development has been difficult, on account of the heavy inflow of thermal waters, at a temperature of 105° Fahrenheit. For 1905 the Boccheggiano yielded 3,138 metric tons of high grade ore averaging 8.88% copper, and 13,158 metric tons of second grade ore aver-aging 3.09% copper, and the mine also produced 441 metric tons of copper precipitate of 69.25% tenor.

The Capanne Vecchie and Poggio Bindo mines are ancient properties, re-opened 1846, since which time they have been small but steady producers. These mines were taken over by the company, circa 1904. The principal vein is 6" to 50' in width, ore being mainly chalcopyrite, which is assorted into first grade smelting ore of about 10% copper tenor, and second grade ore, carrying about 3% copper only, which is heap-roasted and leached. Produc-tion, 1905, was 572 metric tons fine copper, all obtained as precipitate.

The Fenice Massetana mine, also at Massa Marittima, shows ore bodies of 6" to 65' width, apparently lenticular, carrying chalcopyrite associated with pyrite, in a quartz gangue, with occasional sulphides of higher grade. The high grade ore, averaging 10% in tenor, is heap-roasted at the mine, and smelted at Leghorn, and second grade ore, averaging about 3% copper, is heap-roasted and leached at the mine. Production, 1905, was 693 metric tons fine copper, in precipitate, and 94 metric tons fine copper secured by smelting first grade ore.

The Val di Nievole mine carries low grade ores that can be worked profit-ably only when copper prices are high, and this property is idle.

The smelter, at Leghorn, has 4 reverberatory furnaces and a converter plant. In connection with the smelter is a sulphuric acid plant, for the utiliza-tion of the sulphur fumes, the low grade ores of 3.5% copper tenor averaging about 40% sulphur contents.

Production, 1903, was 3,086,440 lbs. fine copper, and 1905 was 5,892,895 lbs. The property is well managed, with a magnificent market at its command, and is likely to prove an increasingly important producer in years to come.

MONTE CRISTO CONSERVATIVE MINING CO. **ARIZONA.**

Mine office: Paradise, Cochise Co., Ariz. Lands, sundry claims, circa 2 miles north of Paradise. Idle several years and apparently moribund.

MONTE CRISTO GOLD & COPPER CO. **UTAH.**

Dead. Formerly at Milford, Beaver Co., Utah. Described Vol. V.

MONTE CRISTO MINING CO. **ARIZONA.**

Office and mine: Metcalf, Graham Co., Ariz. Henry Brigham, president; Refugio Murillo, secretary and general manager. Lands, 5 claims, on Chase Creek, about 2 miles above Metcalf, carrying a fissure vein in porphyry, show-ing 3' to 4' of oxidized ores, assaying up to 45% copper, opened by a shallow shaft and tunnels of 100' and 200'. Made small ore shipments, 1904. Idle several years.

MONTEREY GOLD & COPPER MINING CO.

Dead. Formerly had an office at 11 Broadway, New York.

MONTEREY GOLD MINING CO. **WASHINGTON**

Dead. Formerly at Bolster, Okanogan Co., Wash.

MONTEREY SMELTING & REFINING CO. **MEXICO.**

Works office: Monterey, Nuevo León, Mex. Is controlled by American Smelting & Refining Co. and described under Mexican title of Compañía Minera Fundidora y Afinadora *de Monterrey, S. A.*

COMPAÑIA MINERA FUNDIDORA y AFINADORA DE MONTERREY, S. A. M

Office and works: Monterey, Nuevo León, Mex. Mine offices: de la Mula, Monclova, Coahuila, Mex., and Pánuco de Coronado, San J Rio, Durango, Mex. Arthur K. Brewster, manager; Juan Chiado, supe ent; José M. Padilla, superintendent Pánuco mines. Organized under Mexico, with capitalization increased, 1903, to 8,000,000 pesos. Is co by American Smelting & Refining Co.

Lands include the Ocampo and Santa Elena mines, at Mineral de l carrying auriferous copper and lead ores, and La Cruz y Anexas mi Pánuco de Coronado, carrying argentiferous lead and copper ores.

The smelter, at Monterey, of circa 1,200 tons daily capacity, does tensive custom business, in addition to treating the ores of the com own mines. About 1,500 men are employed, and latest reported prod 1903, was 215,568 lbs. fine copper.

MONTEZUMA COPPER CO. NEW M

Dead. Formerly at Albuquerque, Bernalillo Co., N. M.

MONTEZUMA COPPER MINING CO. ARI

Mine office: Globe, Gila Co., Ariz. Lyman C. Woods, president an ager; Mrs. Lyman C. Woods, secretary; Louis Berndt, treasurer; Chas bush, superintendent. Lands, 17 claims, shortly west of the Live O Inspiration mines, and about one mile west of the Miami, with so similar geological conditions. Lands show porphyry and quartz, with eralized zone of 23′ estimated average width, opened by a 150′ shaft, s carbonate ore assaying about 1% copper and $2 gold per ton. Prop held by A. G. Smith, of Globe, Arizona, under an 18-month bond and running from Aug. 1, 1908, for $150,000.

MONTEZUMA MINING CO. M

Office: San Antonio, Tex. Mine office: Charcas, Moctezuma, Sa Potosí, Mex. C. H. Hoffman, superintendent. Property carries coppe and company was said, 1907, to be employing 75 men.

MONTEZUMA MINING & SMELTING CO. CALIFO

Office: care of Southwestern Securities Co., Los Angeles, Cal. Cap tion $1,000,000, shares $1 par. Lands, supposed to be somewhere i county, California, are claimed to carry gold, silver, lead and coppe Company was claimed, July, 1906, to be paying dividends at rate of 1 annum, on price at which stock was sold. Is regarded with much sus

MONTEZUMA & THE WHIZZERS MINE. SOUTH DA

Office and mine: Deadwood, Lawrence Co., S. D. J. T. Gilmore ager. Lands, 13 claims, patented, area 135 acres, on the divide between wood and Whitewood Cañons, showing Algonkian schists, slates and qua and carrying about 3,000′ of a strong gossan of 45′ estimated average Principal development is on the Whizzers mine, by 2 tunnels, the Mon having superficial development on a parallel quartzite reef. The W was worked for gold, producing circa 30,000 tons of low grade fluxing or to the Golden Reward smelter, at Deadwood. Ore is slightly auriferou copyrite, with gangue of hornblende schist, carrying 0.5 to 1.5% copper, u oz. silver and 50 cents to $2.50 gold per ton. Though low in grade, pr is considered decidedly promising, because of immense tonnage assured.

MONTGOMERY GOLD LEAF MINING CO. NEW JE

Dead. Apparently succeeded by Pahaquarry Copper Mining Co. For in Warren county, New Jersey.

MONTOSA COPPER CO. ARIZ

Mine office: Patagonia, Santa Cruz Co., Ariz. W. H. Thompson, g

'. Lands, in the Tyndall district, at the western end of the Santa ountains, were held formerly by the Calabasas Copper Co., Ltd., a -Lacey swindle. Mine has a 110′ two-compartment shaft, and an ted smelter with a 50-ton water-jacket blast-furnace. Presumably idle.

'ELIER COPPER MINING & SMELTING CO. **IDAHO.**

id. Merged November, 1905, in Bonanza Mining Co. Formerly at lier, Bear Lake Co., Idaho.

REAL & BOSTON CONSOLIDATED **BRITISH COLUMBIA.**
NING & SMELTING CO., LTD.

id. Absorbed by Dominion Copper Co., Ltd. Formerly at Greenwood, ry district, B. C. Fully described Vol. V.

REAL SMELTING & REDUCTION CO. **ONTARIO.**

rks office: North Bay, Nipissing, Ont. E. E. Leonard, president; Brown, vice-president and managing director; Benj. Burlan, treasurer; Cartier, secretary; P. W. Brown, manager. Works, sometimes known North Bay or Trout Lake smelter, said to have cost $700,000, were de- primarily to reduce the argentiferous ores of the Cobalt district, but nned also to smelt copper ores. Blown in Jan. 7, 1908.

IÓN MONTT. **CHILE.**

lce and mine: San Juan, Freirina, Atacama, Chile. Principal prop- are the Quebradita, 300 meters deep, opened 1834; Rosario, 290 meters pened 1864; Manto, 160 meters deep, opend 1846, and San José, 180 deep, opened 1851. Properties have been considerable producers in t, but at last accounts output was practically nil.

MENT COPPER MINING CO. **MONTANA.**

ne office: Dillon, Beaverhead Co., Mont. Organized August, 1902, laws of Montana, with capitalization $75,000. Lands, on Bloody Dick are developed by a 165′ shaft, bottomed in auriferous copper ore, and tunnel, planned to be driven 500′, at which length it should strike a high-grade auriferous copper ore.

'LAATS (NO. 83) COPPER DEVELOPING SYNDICATE, LTD. **NATAL.**

ice: care of E. J. Edmonds, Newcastle, Natal. Mine office: Enton- Zululand, Natal. Chas. Earl, chairman. Organized, 1907, under laws al, with capitalization £5,000, shares £1 par. Property is a lease, with f purchase for £8,000, of the Farm Mooiplaats No. 83, area 6,156 acres.

-ANCHOR COPPER MINING CO. **WYOMING.**

lce and mine: Encampment, Carbon Co., Wyo. L. W. Tennant, presi- nd general manager; W. J. Wernli, secretary and treasurer. Organized nder laws of Wyoming, with capitalization $1,000,000, shares $1 par. 3 claims, area 60 acres, on Green Mountain, in the Upper Platte dis- aid to show a 50′ fissure vein of sulphide ore, giving assays up to 10% developed by a 200′ shaft. Has steam power. Idle.

GOLD MINING CO. **CALIFORNIA.**

lce: Valley Springs, Cal. Mine office: Richey, Amador Co., Cal. J. B. vice-president and general manager. Has shafts of 100′ and 140′. tuff is a sulphide mineralization of diabase and talcose schist, carrying nd copper values. Idle.

LIGHT MINE. **MONTANA.**

wned by Washoe Copper Co.

MERA COPPER MINING CO., LTD. **AUSTRALIA.**

lice: 69 Queen St., Brisbane, Australia. Mine office: Moonmera, Rock- on, Queensland, Australia. T. G. Dewar, secretary; Samuel Phillips, l manager.

nds, 4 leases, area 200 acres, showing 4 ore bodies, of which 2 are partly

developed. Country rocks are sandstone and granite, veins having an a ceous gangue. Gold is found in the oxidized zone, but values turn to co at a little depth, ores being mainly sulphide, with a little oxidized ore some native copper, latter sometimes occurring as flakes and small sh but commonly disseminated in small particles. The property also shows l bodies of low-grade carbonate ores. The ores average 1.75 to 2% co only, but by rejecting about 70% of the ground broken, can furnish 5% to the mill, making concentrates carrying circa 17.5% copper and 9 dwts. per long ton. The mine is opened by shafts of 50′ and 93′, and by 5 tun of 90′ to 280′ length. Idle.

MOONTA CENTRAL COPPER CO., LTD. AUSTRAL

Offices: 30 Moorgate St., London, E. C., Eng., and Adelaide, South A tralia. Mine office: Wallaroo, Daly Co., South Australia. A. Lesser, ch man; John Alex. Russell, secretary; John S. Scott, manager. Organized 29, 1901, as a reconstruction of the Mid-Moonta Copper Mines, Ltd., capitalization £110,000, shares £1 par, in 50,000 cumulative preference shares and 60,000 ordinary shares. Debentures, £1,400 issued, at 10%.

Lands, 152 acres, held under 99-year lease, expiring 1991. Has 4 sha deepest 432′, said to show considerable medium grade ore, with steam po and a small concentrator. Idle since circa 1904, and apparently moribund.

MOONTA SYNDICATE, LTD. AUSTRAL

Dead. Wound up March 5, 1907. Formerly at Moonta, Daly Co., So Australia.

MOORE COPPER CO. ALASI

Office and mine: care of J. R. Heckman & Co., Ketchikan, Alaska. P erty is on the southern arm of Moira Sound. Presumably idle.

MOQUI COPPER CO. VIRGIN

Office: 42 Broadway, New York, N. Y. Mine office: Reager, Rappah nock Co., Va. Is successor of Mannassas-Gap Copper Mines, Inc.

Lands, 700 acres, freehold, including circa 400 acres of timber land Fauquier county, Virginia, 3 and 6 miles from 2 railroads, carrying 2 con veins between Cambrian sandstone and Silurian slates, claimed to range 3 11′ in width, and claimed to give average assays of 5% copper, 10 oz. si and $4 gold per ton, which figures are considered unduly high, from malach bornite and chalcopyrite, associated with a little native copper. Mine about 600′ of workings.

SOCIEDAD ESPLOTADORA DEL MORADO. CHI

Office: Santiago de Chile. Mine office: Freirina, Atacama, Chile. ganized Dec. 22, 1906, under laws of Chile, with capitalization 500,000 p shares 20 pesos par. Property is the Arenillas mine, opened 1860, and a s matting furnace, idle for several years until taken over by present comp

SOCIEDAD MINERA DEL MORADO. CHI

Dead. Succeeded, Dec. 22, 1906, by Sociedad Esplotadora del Mor Formerly at Freirina, Atacama, Chile.

MOREDYKE MINING CO. ARIZO

Office: 404 Jackson Bldg., Denver, Colo. Mine office: Casa Grande, P Co., Ariz. J. R. Smith, president; J. F. Kramer, vice-president; W. H. Ha secretary and treasurer; A. R. Benzie, general manager; preceding officers W. B. LeFave, directors. Organized Sept. 10, 1907, under laws of Ariz with capitalization $1,500,000, shares $1 par. Lands, 8 claims, area 160 a 28 miles from a railroad, showing a 2′ vein of silver-lead ore, with occasi gold values, opened by several pits and a 60′ shaft.

COMPAÑÍA COBRE DE MORELOS, S. A. MEXI

Is the Mexican incorporation of the Royal Morelos Copper Co.

ORENCI COPPER CO. **ARIZONA.**

Dead. Formerly at Morenci, Graham Co., Ariz. Described Vol. V.

ORENCI COPPER MINES, LTD. **ARIZONA.**

Dead. Merged, 1903, in Clifton Consolidated Copper Mines of Arizona, td. Formerly at Morenci, Graham Co., Ariz.

IORGAN-ARGENTINE MINING CO. **UTAH.**

Office: 54 West Second South St., Salt Lake City, Utah. Mine office: eterson, Morgan Co., Utah. Herbert Pembroke, president and general man ger; W. H. Croft, vice-president; A. B. Pembroke, secretary and treasurer; ssie R. Pembroke, engineer; preceding officers, John Croft and S. J. Pem roke, directors. Organized 1900, under laws of Utah, with capitalization 50,000, shares 1 cent par. Annual meeting, third Tuesday in May.

Lands, 10 claims, area circa 175 acres, partly patented, 11 miles from Union Pacific railway, in the Argentine district, showing fissure veins in Carboniferous limestone, and contact deposits between limestone and quartzite. Main vein, of 2′ to 10′ width, with northwesterly strike, carries mainly silver lead ore, with copper and gold values, opened by a 175′ shaft, with circa 2,000′ of workings. Property supposedly is in the same limestone belt as Park City, about 30 miles to the south.

KUPFERBERGWERK MORGENSTERN. **GERMANY.**

Mine office: Kupferberg, Schlesien, Germany. Employs circa 200 men.

MORMON GIRL MINING CO. **ARIZONA.**

Dead. Was a bad egg. Formerly at Cave Creek, Maricopa Co., Ariz. Described Vols. V and VI.

MORNING BELL COPPER MINING & SMELTING CO. **BRITISH COLUMBIA.**

Office: Spokane, Wash. Registered 1907, under laws of British Columbia, a foreign corporation, with capitalization $250,000, shares 25 cents par.

MORNING GLORY MINE. **ARIZONA.**

Office and mine: care of Chas. Wilson, owner, Patagonia, Santa Cruz Co., riz. Mine has a 5′ vein of medium grade sulphide ore, and shipped, 1907, out 1,000 tons.

MORNING STAR MINE. **CALIFORNIA.**

Mine office: Markleeville, Alpine Co., Cal. An old mine, in the Mogul strict, north of Markleeville, showing ores assaying up to 17% copper, 49 silver and $32 gold per ton. Long idle.

MORNING STAR MINING CO. **ARIZONA.**

Dead. Formerly at Dewey, Yavapai Co., Ariz.

MORRIS MINING CO. **WYOMING.**

Office: Morris, Ills. Letter returned unclaimed from former mine office, attle, Carbon Co., Wyo. F. H. Mattison, president; J. R. Collins, vice-president; G. A. Leach, secretary; A. Hollenbeck, treasurer; J. T. Brown, general anager.

Lands, sundry claims, on Nellie Creek, one mile below Battle, adjoining e Continental Copper Mining Co., opened by a 500′ tunnel, said to cut a 15′ ein of copper ore. Also has a 50′ shaft showing a 7′ vein assaying 5% copper. resumably idle.

MORRISON MINES, LTD. **BRITISH COLUMBIA.**

Dead. Absorbed, 1904, by Montreal & Boston Consolidated Mining & melting Co., also dead. Formerly at Greenwood, Boundary district, B. C. ully described Vol. IV.

MORRISON MINING CO. **NEVADA.**

Dead. Name changed, 1907, to Imlay Copper Mining Co. Formerly at Humboldt House, Humboldt Co., Nev.

MORROW COPPER CO. ARIZON

Dead. Was merged, August, 1908, in Clara Consolidated Gold & Copp Mining Co. Formerly at Planet, Yuma Co., Ariz.

MOSCOW MINING CO. UTA

Office: Salt Lake City, Utah. Mine office: Milford, Beaver Co., Uta Mathew Cullen, manager; Daniel Ferguson, superintendent. Mine, 15 mil west of Milford, opened to depth of circa 400', is a small producer of medi and high grade silver-lead and gold-copper ores, averaging about $1,000 p carload in gross values. Shipment of 45 tons, circa May, 1908, returned 12.6 copper and 6% lead, with small silver and gold values.

MOTHER LODE COPPER CO. ARIZONA

Mine office: Prescott, Yavapai Co., Ariz. Organized 1907. Lands, claims, area 140 acres, in the Copper Basin, 10 miles west of Prescott, showin an ore body between limestone and porphyry, said to give average assays circa 12% copper and $6 gold per ton.

MOTHER LODE COPPER MINES OF ALASKA. ALASKA

Office: 902 Lowman Bldg., Seattle, Wash. Mine office: McCarthy Creek Alaska. Clarence L. Warner, president; Joshua Menach, vice-president; Ja A. Godfrey, secretary and treasurer; preceding officers, Chas. G. Hubbard an John Miller, trustees. Organized under laws of Washington, with capitaliz tion $5,000,000, shares $1 par. Lands include 120 acres of placer claims, sai to be well timbered, presumably in the interior of Alaska; claims on Dry Bay, known as the Valdez group, and the Copper River group, 19 claims adjoining the Bonanza group, on McCarthy's Creek, in the Copper River di trict, Alaska, claimed by company to have a better showing than the Bonanza, which statement is not believed. The Copper River group, having a 105 tunnel, is said to show a mineralized zone of 50' to 60' width, carrying 6' to 8' paystreak of massive chalcocite assaying 18 oz. silver per ton, wit small gold values. Company's prospectus is very loosely written, and fille with a vast amount of misinformation regarding general copper condition but property is considered of more than usual promise.

MOTHERLODE COPPER MINING CO. VIRGINIA

Office: 623-18 Broadway, New York, N. Y. Mine office: Virgilina, Hal fax Co., Va. Joseph H. Morong, president and general manager. Organize September, 1902, under laws of New York, with capitalization $1,500,000. Idle

MOTHER LODE MINES. BRITISH COLUMBIA

Owned by British Columbia Copper Co., Ltd.

MOUNTAIN COPPER CO., LTD. CALIFORNIA

Office: 22 Abchurch Lane, London, E. C., Eng. American agency office 811-56 Beaver St., New York, N. Y. Mine office: Keswick, Shasta Co., Ca Works office: Martinez, Contra Costa Co., Cal. Wm. Keswick, M. P., chair man; preceding officer, Sir Andrew Noble, Bart., K. C. B., Henry J. Wenham Sir Walter Scott, J. P., and Chas. W. Fielding, directors; Alfred N. Frewe secretary; Lewis T. Wright, resident manager; W. F. Kett, assistant gener manager; T. J. Jones, mine superintendent; J. A. Black, smelter superintend ent; J. J. Murray, assistant smelter superintendent; W. Cole, railway superi tendent.

Organized Dec. 1, 1896, under laws of Great Britain, and reorganized Ma 10, 1902, with capitalization £250,000, shares £1 par. In 1899 the compan changed its capitalization of £1,250,000 into £250,000 in shares and £1,000,00 in 6% debenture stock, shares £4 par, on which a first repayment of £1 p share was made Jan. 16, 1905, leaving £750,000 of stock now outstandin The change in 1899 was practically a complete amortization. Dividends befo reconstruction, 1897-1901, aggregated 58½%. Profits for 1907 were £150,25

Lands are extensive, including the Iron Mountain and Hornet mines, I

les northwest of Redding. The Iron Mountain mine was worked originally, a small way, for gold and silver values carried in the gossan. The main body of the Iron Mountain mine is a solid pyritic mass, approximately 00' to 400' wide, 800' long and 500' deep, with a gossan of 100' to 300' width. Ore is mainly chalcopyrite, associated with pyrite and pyrrhotite, occurring in a shear zone of meta-rhyolite, the ore averaging circa 5% copper, 2 oz. silver and slightly under $1 gold per ton. The mine was worked pillar-and-stall, and depleted stopes filled with rock, quarried just west of the mine. Considerable ore has been left in the pillars, which undoubtedly will be robbed, eventually, by open-cast work. Ore reserves are estimated at less than 500,000 tons, and diamond drill borings show comparatively little ore outside of the fire zone. The ore being strongly pyritic, there has been considerable trouble from mine fires, caused by spontaneous combustion. In 1902 C. Colcock Jones was engaged as engineer, for the special object of controlling fire conditions, and, as a result of the combined efforts of Messrs. Wright and Jones, the plenum system of ventilation was applied, overcoming heat troubles in the masses of pyritic ore, and restoring normal conditions sufficiently to save a large tonnage of ore. J. J. Shaw, then in charge of underground work, later applied the same ideas, under even more drastic conditions, in the United Verde mine, with like success. Considerable copper is secured by precipitation from the charged mine water coming from the fire zone.

The Hornet mine, lying to the north of the Iron Mountain, has developed about 5,000,000 tons of ore, apparently averaging about 1% only in tenor, though some of the ore carries up to 2.5% copper, all ore being strongly pyritic, ranging 47 to 50% in sulphur tenor.

The mine is connected with the Keswick smelter by an 11-mile narrow-gage electric railway, traversing a rugged country, with an average grade of nearly 2%, the elevation gained being 2,000'.

Ore is heap-roasted in open air, 8 to 10 weeks being required for burning, raw ore carrying about 45% sulphur and roasted ore only 7%. The roasted ore is loaded by steam-shovel.

The Keswick smelter, in the cañon of Spring Creek, less than a mile from the Sacramento river, does considerable custom smelting. The plant has 5 water-jacket blast-furnaces, of 300 tons daily capacity each, with 11 Wright circular calcining furnaces having settlers with slag overflow to ladle cars, and a slag railway, the matte pouring into iron casting-moulds on a slow-moving belt-conveyor, and passing under jets of water to chill the pigs, which are dumped into barrows and hoisted to the charging floor. The first-fusion matte, of 25 to 30% copper tenor, is resmelted, and the second-fusion matte roasted and blown up to white metal, running into settlers, and being taken thence, in ladles, by traveling crane, to the converters. Stands are controlled hydraulically, from a single pulpit, and linings are tamped by power. Fumes from roasters, furnaces and converters are carried through dust-chambers, and flue-dust is briquetted and resmelted. Fines and ores from the roast-heaps are calcined in Wright turret roasters, and briquetted by 3 machines, which also handle flue-dust and calcined granulated matte, using lime for a binder.

The power plant of the Keswick smelter includes rotary blowers, driven by 3 engines, including an Allis-Chalmers cross-compound, Risdon cross-compound and a small auxiliary straight-line engine, steam being furnished by 3 Babcock & Wilcox boilers and a Heine water-tube boiled, all fired with petroleum. Blast is heated by stoves fired with oil, before entering the tuyeres. The converter plant has an air-compressor driven by a 500-h. p. Allis-Chalmers engine. Electric power, generated 80 miles distant, is used, at a cost of ¾ cent per h. p.-hour. In connection with the smelter are a large machine shop, foundry and smithy.

The operation of the Keswick smelter has been greatly hampered by s of neighboring ranchers, and the plant was idle for some time, on account this trouble. The company has withdrawn its appeal from an adverse deci in the case of a suit for damages brought by the United States governm for injury done to federal lands, and the company has promised to pay d ages to the government.

The Keswick smelter is not modern, and doubtless would be rebuilt w there sufficient ore in sight to justify such an expenditure. The results cured, however, are unusually good, and this plant stands second only to works of the Mount Lyell as a successful pioneer in the field of pyritic sm ing. After idleness for a long period, the roasters were started, circa Mar 1908, to treat fines from the mines, before shipment to the Martinez smelt

The Martinez smelter, on San Francisco Bay, includes the old works the San Francisco Chemical Co., taken over as the nucleus of the new pla The Martinez works have one of the most extensive and best planned a works in existence, built at a cost of approximately $1,000,000. The Hor ores, which are low in copper, but rich in sulphur, are burned, and the sulph fumes collected in lead-lined chambers and transformed into sulphuric a by the contact process, and the cinder remaining after the roasting is leach for its copper contents. The acid is sold crude, and also is used as the ba of commercial fertilizers, for which there is an enormous demand in the ri fruit and agricultural districts of California and the other Pacific coast stat The Martinez works have a smelting capacity of 350 tons daily, and also a general custom business.

Production of the Iron Mountain mine has greatly decreased, figures output in fine copper being as follows: 29,727,040 lbs. in 1901; 19,116,160 l in 1903; 5,708,000 lbs. in 1906; 6,814,000 lbs. in 1907. In October, 1908, t Iron Mountain mine was shipping 100 tons daily, with a considerable prod tion of cupriferous pyrites from the Hornet mine. Notwithstanding the dep tion of the company's reserves of medium and high grade ore, the finan have been managed with great prudence and marked success, and the co pany, while facing a partially exhausted mine, has been able to make a s cessful change of base, by which low grade pyritic ores are utilized for a making, and the company is in excellent condition financially.

MOUNTAIN GEM MINING CO. MONTAN

Office: care of W. D. Greenough, Wallace, Idaho. Mine office: Salte Missoula Co., Mont. Organized late in 1907.

MOUNTAIN HOME COPPER CO. AUSTRAL

Mine office: Cloncurry, Beaconsfield Co., Queensland, Australia. A c siderable share interest is said to be owned by Queensland Copper Freeho Ltd. Lands are circa 600 acres.

MOUNTAIN KEY MINE. NEW MEXI

Office: Pinos Altos, Grant Co., N. M. W. C. Chandler, owner and m ager. Property is one of the oldest mines in Grant county, having a 700' sh and producing auriferous and argentiferous copper sulphides. Has ste power. Presumably idle.

MOUNTAIN LAKE CONSOLIDATED MINING CO. UT

Office: Provo, Utah. Mine office: Brighton, Salt Lake Co., Utah. Je Knight, president. Organized circa 1906, under laws of Utah, as successor Mountain Lake Mining Co.

Lands include the Original group, 24 claims, area circa 400 acres, and Mountain Lake Extension, an adjoining property, bought circa April, 19 The Original group, at the head of Big Cottonwood Cañon, adjoining the Cottonwood Gold & Copper Co., shows 2 contact deposits, between diorite a *limestone*, of 100' claimed average width, traceable circa 2,000', carryi

nite and chalcopyrite, giving average assays of 2.5% copper, 2 oz. silver \$1 gold per ton. Development is by a 100′ shaft and 5 tunnels, longest, wn as the Steamboat tunnel, circa 2,500′.

UNTAIN LAKE MINING CO. **UTAH.**

Dead. Succeeded, circa 1906, by Mountain Lake Consolidated Mining . Formerly at Brighton, Salt Lake Co., Utah. Fully described Vol. VI.

OUNTAIN LION GOLD & COPPER CO. **MEXICO.**

Letter returned unclaimed from former office, La Cananea, Sonora, Mex. rganized 1905, with capitalization \$50,000. Lands were circa 400 pertenenas, in the Magdalena district of Sonora. Moribund.

IOUNTAIN MEADOWS COPPER CO. **CALIFORNIA.**

Mine office: Quincy, Plumas Co., Cal. Property, in Lights Cañon, has a 00′ tunnel, said to show native copper.

MOUNTAIN MONARCH GOLD MINING CO. **CALIFORNIA.**

Office: 319 Yuba St., Redding, Cal. Mine office: Shasta, Shasta Co., Cal. W. F. Aram, president and general manager; J. H. Hunter, secretary; C. E. Armstrong, treasurer. Organized Nov. 25, 1905, under laws of California, with capitalization \$75,000, shares \$1 par, in \$25,000 preferred and \$50,000 common stock; issued, \$68,500.

Lands, 11 claims, unpatented, area 220 acres, in the Whiskeytown district, north of Redding, 10 miles from Southern Pacific railway, showing 3 fissure veins in rhyolite, main vein, of 140′ estimated width, traceable circa 2,500′, carrying malachite, bornite and chalcopyrite associated with pyrite, giving average assays of 7% copper, 1.5 oz. silver and \$3.40 gold per ton. Development is by tunnels of 200′ and 750′, with 1,200′ of workings. Equipment includes a 6,000′ sawmill and 5 mine buildings. Company plans extension of main tunnel.

MOUNTAIN RUN MINE. **AUSTRALIA.**

Mine office: Rockley, N. S. W., Australia. Has shafts of 120′ and 180′, and at last accounts was erecting a smelter with a small water-jacket blast-furnace.

MOUNTAIN VIEW COPPER CO. **OREGON.**

Dead. Lands sold, 1903, to Vulcan Copper Co. Formerly at Kerby, Josephine Co., Ore.

MOUNTAIN VIEW DEVELOPMENT CO. **ARIZONA.**

Letter returned unclaimed from former mine office, Bisbee, Cochise Co., Ariz. Geo. Bennett, president; H. M. Woods, vice-president; W. D. Kinsey, secretary; Chas. Trotman, treasurer. Organized 1903, under laws of Arizona, with capitalization \$1,000,000, shares \$1 par. Lands, 9 claims, 4 miles northwest of Bisbee, opened by 2 shallow shafts and a tunnel. Ores carry occasional lead values, and a small test shipment gave returns of 16.74% copper and 100 oz. silver per ton. Idle and apparently moribund.

MOUNTAIN VIEW MINING CO. **UTAH.**

Dead. Property sold, 1908, to Yankee Consolidated Mining Co. Formerly at Eureka, Juab Co., Utah.

MOUNT ANDREW MINING CO. **ALASKA.**

Office: 1500-52 William St., New York, N. Y. Mine office: Ketchikan, Alaska. Property, leased to Britannia Smelting Co., Ltd., is described under title of that company.

MOUNT BAKER & SHUKSAN MINING CO. **WASHINGTON.**

Office: 18 Post-Intelligencer Bldg., Seattle, Wash. Mine office: Maple Falls, Whatcom Co., Wash. J. Conaway, president; C. M. Welsh, secretary; Geo. B. Conaway, superintendent. Lands, 320 acres, having an available water power and said to carry 7,000,000′ of good standing timber. Has 4 tunnels, longest 320′, with about a quarter-mile of workings, showing ore said to

MOUNT EDDY MINING & DEVELOPMENT CO. **CALIFORN**

Dead. Formerly at Sisson, Siskiyou Co., Cal.

MOUNT ELLIOTT, LTD. **AUSTRAL**

Offices: Palmerston House, Old Broad St., London, E. C., Eng., and Collins St., Melbourne, Australia. Mine office: Selwyn, Cloncurry, Beace field Co., Queensland, Australia. E. Habben, London secretary; E. H. Schack Melbourne secretary; G. A. Walker, general manager. Organized June 1907, under laws of Great Britain, with capitalization £750,000, shares £1 pa issued, £600,000, as reconstruction of a corporation of same name organiz 1906, under laws of Victoria.

Lands, 260 acres, 58 miles south of Cloncurry, on the 2 upper branches Maggie's Creek, a tributary of the Cloncurry River. Has a townsite call Selwyn, one-half mile north of the mine. Lands show a big outcrop of ri ore, in an area of pre-Devonian upturned slates and schists, there being t usual oxidized ores, with considerable chrysocolla and a fine showing of chalc cite. Main shaft is 231', sunk at an angle of 65°. Ore reserves estimate August, 1907, at 71,000 long tons, first estimated to average 25% copper, bu after resampling, estimated to carry 16.4% copper and 2 dwts. gold per ton which figures still seem high, though ore shipped, 1907, assayed 37% copper, oz. silver and 9 dwts. gold per ton. A railway is projected to reach the mine and it is planned working the property open-cast to depth of 135'.

Smelter, built 1907-1908, has a water-jacket blast-furnace. Production, 1906, was 182 long tons of high grade copper ore, yielding circa 140,000 lbs. fine copper. Property considered decidedly promising.

MOUNT FISHER PROPRIETARY CO. **AUSTRALIA.**

Office: 114 Pitt St., Sydney, N. S. W., Australia. H. Ernest A. Miller, secretary. Idle and apparently moribund.

MOUNT FLORA COPPER CO. **AUSTRALIA.**

Mine office: Mackay, Queensland, Australia. Lands, 300 acres, in three 100-acre tracts, known as the Mount Flora, Wallaroo and Eastern Selections, opened by a 140' shaft on the Wallaroo vein, said to be 18' in width, surface ores being melaconite, azurite and malachite, with some native copper, bottom of shaft carrying chalcopyrite, ores shipped ranging 15.5 to 43.5% in copper tenor. Property also has a number of other copper veins. Begun 1908 with indebtedness of £2,250, and it was planned, February, 1908, to form a local company, with capitalization of £12,000, and build a smelter.

MOUNT FRASER COPPER MINES (N. S. W.), LTD. **AUSTRALIA.**

Dead. Voluntarily wound up, June, 1902. Formerly at Springfield, Bathurst Co., N. S. W., Australia.

MOUNT GARNET & CHILLAGOE EXPLORATION CO., N. L. **AUSTRALIA.**

Dead. Formerly at Mt. Garnet, Queensland, Australia.

MOUNT GARNET FREEHOLD COPPER & SILVER MINING CO., LTD. **AUSTRALIA.**

Dead. Company liquidated, and property taken over by bondholders. Formerly at Mt. Garnet, Queensland, Australia.

MOUNT GARNET RAILWAY & FREEHOLD MINES. **AUSTRALIA.**

Dead. Voluntarily wound up, 1903. Formerly at Mt. Garnet, Queensland, Australia.

MOUNT GLASSFORD COPPER CO. **AUSTRALIA.**

Mine office: Glassford Creek, via Miriam Vale, Queensland, Australia. Has expended circa £1,250 in exploratory work on claims adjoining the Glassford Creek mine, finding a little copper ore of fair grade. Out of funds and idle at last accounts.

MOUNT GLINES GOLD & SILVER MINING CO. **MAINE**

Mine office: Bryant Pond, Oxford Co., Me. W. N. McGrillis, superin

it. Property shows auriferous and argentiferous copper and lead ores. team power and a small mill. Presumably idle.

NT GODDARD COPPER MINING CO. **CALIFORNIA.**

ffice: Fresno, Cal. Property is located in San Bernardino Co., California. idle and apparently moribund.

NT GUNSON MINING CO. **AUSTRALIA.**

line office: Pernatty Lagoon, South Australia. Works office: Port Au-, South Australia. Lands, 460 acres, one mile west of Pernatty Lagoon, les southeast of Mount Gunson, and circa 90 miles northwest of Augusta. Property, discovered 1875, and worked in an exceedingly small before present ownership, shows 2 practically parallel ore bodies, of 6′ to idth, with a northeasterly strike, carrying malachite, azurite and tetra-te, giving average assays of about 26% copper. The old mine shows car-te impregnations in practically horizontal beds of quartzose sandstone, adjoining seams and cracks carrying copper carbonates and chalcocite. any was said, 1905, to have built a small reverberatory smelter. Property dered promising.

NT HECTOR COPPER MINES, LTD. **AUSTRALIA.**

Office: William St., Rockhampton, Queensland, Australia. Mine office: ford Creek, Queensland, Australia. Thos. Gibb, managing director; A. A. , secretary; Matthew Caldwell, mine manager; Clifton-G. Rutledge, er superintendent. Capitalization £25,000, shares £1 par, divided equally full-paid and half-paid stock. Lands, 346 acres, 7 miles north of Glass-Creek, and 29 miles from a railroad, in the Monal Goldfield, showing rocks vonian age. Mine has a tunnel and a 270′ shaft, and also is worked open-producing auriferous and slightly argentiferous copper ores. Smelter, in, 1907, has one 20-ton reverberatory furnace, producing matte of about copper tenor. Production, 1907, from circa 3,000 tons of ore treated, was ons of 55% matte, carrying circa 325,000 lbs. fine copper. Employs about n.

NT HOPE COPPER PROPRIETARY. **AUSTRALIA.**

ffice: 114 Pitt St., Sydney, Australia. Mine office: Mount Hope, Blax-Co., N. S. W., Australia. H. Ernest A. Miller, agent. Organized 1904, laws of New South Wales, as successor of New Mount Hope Copper g Co., N. L.

ands, circa 600 acres, freehold, well watered, about 90 miles south of and 80 miles west of Condobolin. District is subject to drought, but provision is made for the conservation of water, there being 2 dams, of cubic yards aggregate storage capacity.

he property has had a somewhat checkered career, since opened in 1880, as been closed down and reopened fully a half dozen times. The mine ced upwards of $500,000 worth of copper, to the end of 1901.

he property shows altered sandstone, carrying 3 parallel outcrops of grained ferruginous slates, and quartz seams with silicious sulphide ore ng 4.5 to 7% in copper tenor, as broken in the stopes. Above 250′ the re oxidized, being mainly earthy carbonates, and a considerable amount idized ore remains available in the upper workings. The ore shades into walls, which are impregnated for some distance, the main ore body g an extreme width of 80′. The property resembles the Great Cobar in respects.

Development is by a 400′ main shaft, showing on the bottom level a 30′ with some stopes of 30′ to 50′ width, ore occurring in chutes of 200′ to length.

Equipment includes a fair machinery plant, with reduction works having ock jigs making *concentrates of 15 to 25%* copper tenor. The smelter has

4 reverberatory furnaces, formerly making rough copper of about 96% tene but planned, at last accounts, to turn out high-grade blister copper. Flux iron ore, secured from a quarry 12 miles from the mine. Forces are abo 85 men. Production, 1878-1898, inclusive, was 5,070 long tons fine copper, a for 1906 was 485,280 lbs. fine copper, valued at £14,672.

MOUNT HOPE COPPER MINES CO. AUSTRALI

Mine office: Cloncurry, Beaconsfield Co., Queensland, Australia. Orga ized circa 1906, under laws of Queensland, with capitalization £30,000. Lan include the Mount Hope, Mount Hope North, Regina and Aurum mines, a leasehold, showing 2 veins, of which No. 1 vein is said not to be payable, whi No. 2, in schist, carries chalcopyrite. Property was idle, late 1908, with months exemption from labor conditions.

MOUNT JUKES PROPRIETARY MINING CO., N. L. TASMANIA

Office: care of T. L. Hood, agent, Hobart, Tasmania. Lands are in th Mt. Jukes field, Tasmania. Idle and apparently moribund.

MOUNT LYELL ANACONDA MINING CO., N. L. TASMANIA

Office: 60 Queen St., Melbourne, Australia. Mine office: Mt. Lyell Montagu Co., Tasmania. N. Madden, manager. Organized under laws o Victoria, with capitalization £50,000, shares 10s. par; fully issued. Lands, 3 acres, leasehold. Idle some years.

MOUNT LYELL BLOCKS COPPER CORPORATION, LTD. TASMANIA

Dead. Reorganized, 1903, as Mt. Lyell Blocks Mining Co., N. L. For merly at Mt. Lyell, Montagu Co., Tasmania.

MOUNT LYELL BLOCKS MINING CO., N. L. TASMANIA

Offices: 47 Queen St., Melbourne, Australia, and Palmerston House, Lon don, E. C., Eng. Mine office: North Mount Lyell, Montagu Co., Tasmania Employs, normally, about 250 men. Colin Templeton, chairman; preceding officer, Alfred Tolhurst, Thos. Harvey and Alex. Campbell, directors; Thos Rollason, secretary; Edwin Habben, London secretary; Robert Ferguson, gen eral manager. Organized March 20, 1908, under laws of Victoria, as a recon struction of Mount Lyell Blocks Copper Corporation, Ltd., with capitalizatio £300,000, shares £1 par; paid in, 19s. 9d. First half of 1907 made a profit o £3,247. Half yearly meetings, February and August.

Lands, 317 acres, including 17 acres held under mineral lease, 60 acre timber lands, 150 acres miscellaneous lands and a millsite. In addition th company has the right to mine on adjoining lands of the Mount Lyell Consol for 7 years, on a royalty of 40% of net profits.

The property shows two ore bodies, carrying native copper, in minut particles, disseminated quite evenly through argillaceous schists, locall termed clays, as the schists are very soft and weather readily. These or bodies were estimated to carry 3% copper, but revised figures, 1906, gave aver age estimates of 2.15% copper, and, as a matter of fact, the average probabl is about 1% copper. Development is by the 240′ Balance shaft and 250′ Mai shaft, and by the Consols tunnel of 1,638′ and the Office tunnel of 680′, min being estimated to show 100,000 long tons of ore. The ground is very soft turning to clay when weathered, and is exceedingly treacherous, requiring heavy timbering and constant watchfulness.

In addition to the two schistose ore bodies, the property shows sulphid ores giving assays up to 6% copper, in a 30′ bed of conglomerate, but this ha not been worked for some time.

The company also holds options on lands in the Mount Darwin distric Tasmania, on which some prospecting work was done, 1907.

Miscellaneous improvements at the mine include a small sawmill, and framing mill for mine timbers. The Mount Lyell & North Mount Lyell Ra way is 5 miles distant. Fuel is wood, costing 10s. per cord.

The 350-ton concentrator begun work August, 1904, and gave very unsatisfactory results at first, but has done better latterly, after some minor changes. The mill, of steel frame, has 10 gravity stamps, 20 Wilfley and Phoenix-Weir tables, canvas tables and 12 Frue vanners. The ore is concentrated quite easily.

During the first half of 1905 the mine showed a working profit of £1 11s. 11d., and at the end of 1905 was treating circa 1,000 tons of ore weekly, making 15 to 20 tons of fine copper therefrom. At last accounts the mine was practically closed, on account of the low price of copper. Mr. Ferguson seems to be handling a hard proposition with skill and technical ability.

MOUNT LYELL COMSTOCK COPPER CO., LTD. TASMANIA.

Offices: Alderman's House, Bishopsgate, London, E. C., Eng., and Broken Hill Chambers, 31 Queen St., Melbourne, Australia. Mine office: Mount Lyell, Montagu Co., Tasmania. Works office: Pillinger, Macquarie Harbour, Tasmania. T. J. Ive, chairman; Chas. Alfred Sack, secretary; Geo. A. Moore, manager. Organized June 1, 1907, under laws of Great Britain, with capitalization £150,000, shares 4s. par; issued, £105,066 8s., with 2s. 6d. per share paid up. Was organized as a reconstruction of the Lyell Comstock Consolidated Copper Co., Ltd., which was a reconstruction of the Mount Lyell-Comstock Copper Co., Ltd., thus changing back to the original title.

Lands, 300 acres, on Mount Lyell, considered fairly located, showing a considerable amount of ore of low to medium tenor. Some boring was done, 1908, by a petrol drill.

Development is by the Central tunnel, showing ore assaying 3.7% copper, and by a 450′ main shaft, with levels opened at depths of 50′, 137′, 163′, 250′, 325′ and 425′, which is poor mining practice. The main shaft shows a fissure carrying ore said to give average assays of 6.8% copper, 5.7% tin and 25 oz. silver, which figures seem large. The property, as a whole, shows considerable ore of low to medium grade, best ore averaging circa 4.5% copper. A tramway is built to within 2 miles of the mine. Company employs circa 15 men.

MOUNT LYELL COMSTOCK MINING ASSOCIATION, N. L. TASMANIA.

Dead. Was succeeded by Mount Lyell-Comstock Copper Co., Ltd. Formerly at Mount Lyell, Montagu Co., Tasmania.

MOUNT LYELL CONSOLS, N. L. TASMANIA.

Dead. Was succeeded, July, 1906, by Mount Lyell Consols Mining Corporation, N. L. Formerly at North Mount Lyell, Montagu Co., Tasmania. Described Vol. VI.

MOUNT LYELL CONSOLS EXTENDED MINING CO., N. L. TASMANIA.

Dead. Formerly at North Mt. Lyell, Montagu Co., Tasmania.

MOUNT LYELL CONSOLS MINING CORPORATION, N. L. TASMANIA.

Offices: 47 Queen St., Melbourne, Australia, and Palmerston House, London, E. C., Eng. Mine office: North Mount Lyell, Montagu Co., Tasmania. Arthur J. Price, chairman; preceding officer, Wm. P. Jarvie and Wm. Colman, directors; Thos. Rollason, secretary; Edwin Habben, London secretary; Henry Doyle, mine manager. Organized July, 1906, under laws of Victoria, with capitalization £93,750, shares 7s. 6d. par, fully issued and fully paid. Authorized, June, 1908, a £15,000 debenture issue.

Lands, 78 acres, leasehold, on Mount Lyell, south of the Mount Lyell Blocks, and 40 acres at Mount Darwin, Tasmania, though lease on latter possibly forfeited.

The Mount Lyell property has a 90′ shaft, near the mouth of No. 2 tunnel, showing a gossan said to carry native copper. Principal development is by 2 tunnels, driven in hope of striking a continuation of the sulphide ore body worked in the adjoining North Mount Lyell mine. Circa 600′ south of the shaft is a body of *cupriferous clay, similar to that of* the Mount Lyell Blocks,

outcropping for 900', with an average overburden of 6', estimated approximately 700,000 tons of ore, and management estimated Jan. that there was in sight 94,117 long tons of cupriferous clays, of al average copper tenor.

The mill, completed October, 1907, of circa 200 tons daily capaci stamps, puddling machines and Wilfley tables, water being secure pumping plant at Linda Creek. The property employed 12 men, pr May, 1908, when all hands were discharged, on account of financial st

Taylor, secretary in London. Capitalization £150,000, shares Lands, 30 acres on Mt. Lyell and 80 acres on Mt. Darwin. Lands, circa 1906, and bid in by company's local agent, for £505.

MOUNT LYELL EXTENDED MINING ASSOCIATION, N. L. TAS

Dead. Was succeeded by Mount Lyell Extended Co., N. L. For Mt. Lyell, Montagu Co., Tasmania.

MOUNT LYELL MINING & RAILWAY CO., LTD. TAS

Offices: 39 Queen St., Melbourne, Australia, and Palmerston H Broad St., London, E. C., Eng. Operating office: Queenstown, T Mine office: Gormanston, Montagu Co., Tasmania. Employs circa 2, Bowes Kelly, chairman; Hon. Wm. Knox, M. P., vice chairman; officers, Wm. Jamieson, Jos. Cowen Syme and Lindsey Tullock, dire Williamson, J. Dowling, Sir John A. Cockburn, K. C. M. G., and J Ball, directors London Board; Robt. C. Sticht, general manager; Alfre secretary; Edwin Habben, London secretary; R. M. Murray, eng charge of mine; A. Lewis Dean, metallurgist; W. H. Wesley, assista lurgist; G. W. Wright, mechanical engineer; P. A. Mackay, manager works; E. Carus Driffield, railway superintendent; Dr. F. J. Howell, tendent; Hon. B. Stafford Bird, Tasmanian agent; A. G. S. Willi Thos. Woodward, auditors.

Organized Aug. 11, 1903, under laws of Victoria, as a merger o company of same name with North Mount Lyell Copper Co., L capitalization £1,300,000, shares £1 par; issued, £1,200,000. Deben £140,000, at 5%, were retired, 1908, leaving the company without bon Dividends were £150,000 in 1904; £205,000 in 1905; £285,000 in 1 £330,000 in 1907. Company and its predecessors paid dividends, t 1907, of £1,966,574. Balance of liquid assets, March 31, 1908, was Half yearly meeting, May; annual meeting, November.

Lands, 4,108 acres, including 3 consolidated leases and a large n ordinary leases from the crown, for 20-year and 30-year periods, acres of mill and smelter sites, 17 miles southeast of Zeehan, in t Coast mining district of Tasmania. The company also holds an optio Tasman & Crown Lyell property, and is prospecting in other mine and holds, outright and under option, 1,368 acres of tin-bearing l addition to damsites and water rights of circa 900 acres area. The

from the smelter, and are connected therewith by surface and

Lyell mine was discovered 1883, and the gossan was worked, in as a gold mine, until taken over by the predecessor of the present 1892. The North Lyell mine was developed in 1897.

rocks are schist, conglomerate, quartzite and sandstone, ore ring as massive lenses in the schist, near conglomerate contacts, ving a generally NW. and SE. trend. There are 15 known lenses, are under development, these having average dimensions, at the ine, of 270′ width, 660′ length, and a proven depth of 730′, and Mt. Lyell mine, 100′ width, 180′ length and 600′ proven depth.

two varieties, the Mt. Lyell ores consisting of massive pyrite seminated bornite and chalcopyrite, with average values of 2.18% oz. silver and 0.055 oz. gold per long ton, while the North Mt. carries silicious sulphide ores, including chalcocite, bornite and , with quartzose schist gangue. There are occasional occurrences pper and tetrahedrite, but the ores of commercial importance are sively sulphide. In addition to the ores previously enumerated, ll has large bodies of very low-grade sulphide ores, averaging circa r, 2 oz. silver and 0.0725 oz. gold per ton, which doubtless will able in time. The North Mt. Lyell ores are higher in copper those of the main mines, but are decidedly refractory, unless ked, carrying 15 to 20% alumina and 60 to 75% silica. An lysis of ores, made circa 1903, gave, in addition to copper, silver tents, 40.3% iron, 46.5% sulphur, 4.4% silica, 2.5% barium sulphate mina.

unt Lyell mine proper is developed by tunnels of 320′ and 1,450′, blind shaft, and has circa 15 miles of workings, with estimated of upwards of 1,000,000 long tons available for open-cast extrac- wards of 2,100,000 long tons available for underground extraction. lone open-cast, in terraces, at the Mount Lyell and its principal mines, underground extraction at these properties being confined the removal of the richer patches of ground encountered during . A traveling crane is used in open-cast mining. The overburden nt Lyell main ore body is estimated at 1,500,000 cubic yards, all ust be stripped, eventually. The mine is lighted by electricity, ond drills are employed, steadily, in exploratory work. A little er is secured by leaching the charged mine waters.

rth Mount Lyell mine is a comparatively small property, though excellent average grade, showing considerable bornite of better verage copper tenor. Development is by 2 shafts, known as the uxiliary, former 1,122′ and the latter 1,000′ in depth, both being , with tunnels of 850′ and 1,080′ length. Stoping is mainly on the 0′ levels, with promising developments under way on the 1,000′ being driven at 150′ intervals. The ore body is variable in size, t at the fourth level, but showing a 60′ stope below. The North the richest produced in Tasmania, but is refractory in smelting, ed with the basic ores of the Mount Lyell.

to extraction of ore largely by tunnel and from quarries, the at the mine is of only 300 indicated horsepower, taking energy electrically from the main power plant at the smelter. There including an Ilgner electric engine, and 2 Corliss cross-compound rs of 40 drills aggregate capacity.

s include 13 smithies, of various sizes, a 40x50′ machine shop, nter shop, *boiler and compressor-house*, engine-house, warehouse,

office, locomotive roundhouse and numerous dwellings for employes. The c pany also owns and operates three sawmills, at various points, for the prep tion of mine timber, and lumber for general building purposes. In addit to the ore mines there are extensive silica and limestone quarries, with a cr ing plant, near the reduction works.

The mines are connected with the Queenstown smelting plant by aerial tramway and counterbalanced inclines, surmounting the intervenin hills, the tramway being of 1,500 long tons daily capacity.

The company has two private railroad systems, of 31 and 38 mil respectively, also a 24" gauge line, with 6 locomotives, connecting the min flux quarries, smelters, warehouses and yards. The 31-mile line, of 42" gau runs from the smelter at Queenstown to the seaport of Strahan, with extensi wharves on Macquarie Harbor, connecting at the latter point with the Str han-Zeehan government line, giving rail connections with all parts of t colony. The Queenstown-Strahan line traverses an exceedingly difficult cou try, 4½ miles of this line having gradients of 1 in 20 and 1 in 16, employi 4 special Abt type locomotives and centre-rack railway, in addition to ord nary adhesion engines. The company's private lines have 238 cars, and a good general business, in addition to handling the company's traffic.

The 250-ton North Lyell smelter, 28 miles from the mine, is 75x210' size, with four 16x32' reverberatory furnaces, 4 blast furnaces and a co verter plant. The North Lyell works also have a 69x72' sampling mill, 41x6 boiler-house with three 250-h. p. Stirling water-tube boilers, and a 60x10 power-house with 200-kw. generators and cross-compound blowers. This plan is idle, and likely to remain out of commission permanently.

The Queenstown smelter, on the Queen river, 1¼ miles from the mine receives ore by aerial tram and counterbalance inclines. This plant, whic also treats custom ores, is in 2 sections, known as Nos. 1 and 2, latter bein the principal plant. No. 1 smelter has 5 water-jacket blast-furnaces, 40x16 at the tuyeres, and No. 2 has 6 water-jacket blast-furnaces, 32x127" at th tuyeres and 20' in height over all, all furnaces having cast-iron water-jacket while a twelfth furnace, of greater capacity, was added to No. 2 plant, i 1908. The capacity of the 6 furnaces in No. 2 smelter is circa 2,000 ton daily. No. 2 smelter has mechanical feeders, and the two grades of ore fro the two principal mines afford an excellent furnace mixture. A 48-oz. blas formerly was supplied by 9 No. 8 Root blowers, and 3 No. 7 Root blowers each driven by a 12x22x28" direct-connected compound condensing vertic engine, but these were replaced, circa 1908, by 2 large steam turbo blowers of 36,000 cubic feet capacity each, with a pressure of 4 lbs., and a simila smaller turbo blower of 18,000 cubic feet capacity per minute, at the same pressure. Blast is heated by 8 hot-blast stoves, of the hanging U-pipe typ

Pyritic smelting is employed for the first fusion, which gives a 15% matte, showing a concentration of 6 into 1, with slags averaging 46% iron 38% silica and only 0.3% copper. The low-grade first-fusion matte is blown up, to a tenor of 40 to 50%, without previous calcining, in a small hot-blast furnace, using only a 5% coke charge, the consumption of coke amounting, 1906, to about 120 lbs. per long ton, or practically 5%.

In front of the furnaces are 4 rectangular forehearths, slag and matte flowing into the first and slag skimming from the fourth into a stream of running water, granulating the slag, which is carried to a pit, whence centrifugal pumps raise it to a launder running to the slag-dump. Matte is tapped from the first forehearth three times hourly, and from the others also every two hours.

The 75-ton converter plant has 2 remelting furnaces, 6 stands and Stahlmann shells, each 60x96". Converter blast is furnished by two 16x24x2

ound condensing air-compressors. The final product is blister copper aging 98.83% copper, 100 oz. silver and 3.21 oz. gold per long ton, sent he United States for electrolytic refining.

The power plant at the smelter has twelve 125-h. p. Babcock & Wilcox ers, and 16 multitubular boilers, with aggregate steaming capacity of 0 h. p. There is a Green fuel economizer with induced draft, and super ters, the joint use of the various steam economies effecting a saving of % in fuel costs. The electric plant, of 1,200 h. p., includes 2 Brown-Boveri sons steam turbines, direct-connected to generators, and a complete electric t plant.

Fuel is mainly cordwood costing 8 to 11s. per long ton, with a little soft l costing circa 27s. per ton, and coke costing 30s. per long ton. Yearly sumption of fuel is 67,500 tons of firewood, 42,200 cords of cordwood, 2,500 s of bituminous coal and 10,000 tons of coke.

The company owns and operates coke works at Port Kembla, N. S. W., stralia, these having 62 funnel-shaped ovens. The coking plant does a neral custom business, in addition to meeting the company's requirements.

Miscellaneous enterprises include a machine shop, iron foundry, brass undry, brickyard and 3 sawmills.

The company built, 1905, at Yarraville, a suburb of Melbourne, Australia, acid and fertilizer plant that makes sulphuric acid from the low grade piferous pyrites of the Mount Lyell mine.

A second acid and fertilizer plant at New Birkenhead, Port Adelaide, uth Australia, was put in commission Apr. 1, 1908. The basis of the Port lelaide plant is the old Junction smelter, which has been remodeled and atly enlarged. These works are built of timber and roofed with rubberoid, order to withstand the strongly acid fumes. The plant has 6 Herreshoff rnaces, each discharging into hoppers at the bottom, fumes going by flue to ad-lined acid-chambers, where, by the agency of nitrous gases and steam, e fumes are condensed and made into dilute sulphuric acid, which is run to storage tanks, and forced, by pneumatic power, to the tower of the super-sphate building. The plant has 2 Westinghouse engines, with Babcock & Wilcox boilers, and electric power is used throughout. Guano rock is secured om Ocean Island, in the Pacific, and the product of the works is super-sphates of high grade, for which there is a large demand in the Australian mmonwealth. The acid and fertilizer plants have proven highly successful.

Although the company's ore averages under 2½% in copper tenor, the ost-sheet makes an excellent showing, ore secured by quarrying costing pproximately one-third as much as that taken by underground extraction om the North Mount Lyell mine, the latter furnishing one-fourth to one-hird the total ore supply. The average cost of mining and treatment, for he fiscal year 1907, was only $3.58 per long ton, reflecting great credit upon he manager and staff.

To the end of 1907 the mine had produced about 160,000 tons of copper, nd large quantities of gold and silver. Production, for fiscal year 1904, was circa 406,000 long tons of ore, and remained practically unchanged until the latter half of 1907, when there was a considerable falling off, owing to depression in the metal industry. For the half-year ending March 31, 1908, production was circa 202,000 long tons of ore, yielding 4,247 long tons fine copper, 344,608 oz. silver and 10,489 oz. gold, and ore production for quarter ending June 30, 1908, was 106,241 long tons. For half year ending Sept. 30, 1907, the ore treated returned an average of 2.22% copper, 1.72 oz. silver and 0.045 oz. gold per ton. Production of fine copper has been as follows: 8,511,000 lbs. in 1904; 18,506,000 lbs. in 1905; 19,298,120 lbs. in 1906; 17,644,640 lbs. fine copper, 7,087 oz. silver and 19,849 oz. gold in 1907.

The Mount Lyell has been a hard property to handle, presenting of financial, mining and metallurgical problems, all of which have bee with great skill. The management is most excellent, in all departme the company obviously is endeavoring to extend its operations and pro which is the part of wisdom.

MOUNT LYELL NORTH CO. TAS

Dead. Formerly at North Mt. Lyell, Montagu Co., Tasmania.

MOUNT LYELL PEAKS MINING CO., N. L. TAS

Office: 90 Queen St., Melbourne, Australia. Mine office: North Lyell, Montagu Co., Tasmania. W. D. McWhae, manager. Capita £40,000, shares 10s. par. Lands, 80 acres, leasehold. Idle some ye apparently moribund.

MOUNT LYELL PROPRIETARY MINES, LTD. TAS

Dead. Voluntarily wound up, June, 1901. Formerly at Mt. Lyel tagu Co., Tasmania.

MOUNT LYELL SOUTH CO. TAS

Dead. Formerly at Mt. Lyell, Montagu Co., Tasmania.

MOUNT LYELL TASMAN COMSTOCK GOLD, SILVER, LEAD & COPPER MINING CO., LTD. TAS

Office: Launceston, Tasmania. Mine office: Mt. Lyell, Monta Tasmania. Bernard Bradley, manager. C. H. F. Shern, agent. Lan acres, leasehold. Idle and apparently moribund.

MOUNT LYELL WEST CO. TAS

Dead. Formerly at Mt. Lyell, Montagu Co., Tasmania.

MOUNT MERLIN COPPER CO., LTD. AUST

Office: Eagle St., Brisbane, Queensland, Australia. Thos. Welsby tary. Property is the Horse Creek mine, having a 114' shaft, showing tically vertical ore body.

MOUNT MOLLOY, LTD. AUST

Office: Irvinebank, Queensland, Australia. Mine office: Molloy well Co., Queensland, Australia. G. C. Young, secretary; J. Horsburg eral manager; R. Refle, superintendent Mount Molloy mine; T. Gurrin, intendent Mount Cardwell mine. Organized 1906, under laws of Que with capitalization £100,000, shares £1 par. Planned, circa June, 1908, ing capitalization by £50,000. Profits, for half year ending Dec. 3 were £41,257. Company paid dividends, to June 30, 1907, of 10s. share, amounting to £52,500.

Lands include a timber reservation, shortly north of the mine, quarry of ironstone, said to carry 1.5 to 2% copper, which is used for There also is a limestone quarry, near Nine-Mile Siding, about between Molloy and Bihoohra. The Mount Cardwell mine, at Nymboi well County, employed 13 men only at last accounts, and is but slightly oped. The Mount Molloy mine has 5 shafts, No. 5, the main shaft 475' deep. The 370' level does not show an ore body as big or as anticipated, though of fair size and grade. The 190' level proved disa ing also, showing a wide vein, low in copper contents, the 270' level be best in the mine. Ore occurs in rich chutes, mainly as chalcopyrite, m which is massive, said to assay as high as 50% in copper tenor, whi dently cannot be, as if ores do assay up to 50% copper, the so-called ch rite must be mainly chalcocite, associated with some chalcopyrite and On the 270' level the vein is 17' wide, carrying a 5' paystreak of high sulphides, balance of 12' consisting of low grade cupriferous pyrite. Th is estimated to show ore reserves of circa 20,000 long tons.

Equipment, at No. 5 shaft, includes a good engine-house, with first- *hoist*, boiler-house, air-compressor, etc. There is a 20,000-gallon under

, holding water for boilers and water-jackets of the 16-drill Thompson compressor. The company plans building a sawmill.

The smelter had a very troublesome water-jacket blast-furnace, which replaced by a larger furnace, blown in early 1907, and plans a second blast-furnace. Matte is taken from a storage forehearth to the converter department, which has one stand with 6x7′ shells, of barrel type, turning converter bars of 99% average copper tenor.

A 20-mile railway line, from Bihoohra to Mt. Molloy, was completed c. 1, 1908. This line, of 42″ gauge, laid with 45-lb. rails, is of great advantage to the company.

Production, 1906, was 10,359 tons of ore, of slightly better than 10% erage copper tenor, which yielded 2,441,846 lbs. fine copper and 9,118 oz. ver. Property is valuable, being one of the best copper mines in Queensnd, and management is considered good.

OUNT MORGAN COPPER CO. **AUSTRALIA.**

Dead. Reorganized as Moonmera Copper Mining Co., Ltd. Formerly at t. Morgan, Queensland, Australia.

OUNT MORGAN GOLD MINING CO., LTD. **AUSTRALIA.**

Office: 118 Pitt St., Sydney, Australia. English office: 9 Gracechurch t., London, E. C., Eng. Mine office: Rockhampton, Palmerston Co., Queensnd, Australia. Robt. Stubbs Archer, chairman; Walter Russell Hall, chairan Sydney board; Wm. Knox D'Arcy, chairman London board; preceding fficers, Hon. Albert James Callan, Kelso King, Richard Gardiner Casey and enneth De Lacy Cudmore, directors; George Anderson Richard, general manger; H. P. Seale, assistant manager; Holyoake Wood, secretary; John Jenkins, ondon secretary; J. B. Wilson, mine manager; N. F. White, engineer.

Organized Oct. 1, 1886, under laws of Queensland, with capitalization £1,000,000, shares £1 par; 17s. 6d. paid in. From organization to and including May 31, 1908, company paid dividends of £7,079,166, 13s. 4d. Dividends, 1907, were £237,500, and largest dividends were £1,100,000, in 1889. Declared, circa February, 1908, a 1s. dividend. Company is second only to the Broken Hill Proprietary as a dividend payer among Australian mines, and is one of the most profitable mines of any metal in existence.

Lands, circa 640 acres, freehold, also 80 acres leasehold and 90 acres perpetual leasehold, about 25 miles southwest of Rockhampton, also miscellaneous landed holdings, including the Many Peaks mine. The Mount Morgan has been, for two decades, one of the greatest gold producers of the world, but has shown declining values and decreasing gold output for several years, due mainly to increased depth, but partially to the mistaken policy formerly followed of extracting the richest ore without due regard for reserves.

The Mount Morgan gold mine apparently is merely the gossan of a mammoth copper deposit. This showing increased copper values at depth, the company wisely begun extensive diamond drill borings, which proved an immense tonnage of copper ore. While the Mount Morgan formerly was a gold mine, and now is a copper mine also, the two mines really are one, the copper ores coming mainly from the 750′ level, or below. The gold ore of the mine carries copper, and the copper ore carries gold, the classing of the ore being largely a matter of selection according to predominant mineral values. The mine, while a single mammoth property, is worked as two connected mines, the upper section being worked open-cast, yielding oxidized gold ore, while the underground workings yield cupriferous gold sulphides and auriferous copper sulphides. The overburden is removed by steam shovels, which are used also in ore extraction, to some extent, and about one-half of the gold ore treated is secured by *open-cast workings*. The oxidized ores are decreasing in *tonnage and values, oxidized ores*, for fiscal year ending May

31, 1908, yielding an average of only 3.4 dwts. gold per ton, a considerable decline from the high values formerly secured. The sulphide gold ore, known locally as mundic, being pyrite, yielded circa 11 dwts. gold per long ton.

The underground workings are developed by the 1,035′ Main shaft and the 650′ Lynda incline shaft, which is the largest in the Commonwealth of Australia. Extraction is mainly from the 750′ level, and the deepest level is at 850′. For fiscal year ending May 31, 1908, the mine made 4,752′ of underground openings, in addition to extensive open-cast operations. The mine shows reserves of low grade sulphide ores, from the 315′ to 750′ levels inclusive, estimated at 7,000,000 long tons, but it is not certain just what proportion of this tonnage is payable. Estimates of auriferous copper ores, 1906, were 1,212,000 long tons of ore averaging 3.5% copper and 8 dwts. gold per ton, and 1,597,000 tons of ore averaging 3% copper and 2.5 dwts. gold per ton, with considerably larger quantities carrying 2 to 3% copper and 1 to 2 dwts. gold per ton, all of which should be available for extraction later. For 1906 the copper ore treated averaged circa 2.5% copper and 7 dwts. gold per ton.

The Many Peaks mine, some miles distant from Mount Morgan, carries a considerable body of low grade pyritic ore, averaging circa 2.5% copper, which is excellently adapted to fluxing the Mount Morgan copper ores. A railroad connecting the Many Peaks mines with Mount Morgan is planned, and it is expected to use circa 100,000 tons of low grade ore yearly, from the Many Peaks, for fluxing, on the completion of this line.

Ironstone for fluxing is brought by vessel from Iron Island, circa 15 miles north of Keppel Bay, and limestone is secured from a quarry at Marmor, which has electric lights.

The district being arid, extensive dams have been built, these having a total capacity of 380,000,000 gallons. It is planned to transfer water by pipe line, thus obviating considerable present losses through seepage and evaporation.

The company has an extensive mill for reduction of gold ores, gold being secured from oxidized ores and from sulphide ores by chlorination, while gold also is secured from blister copper by electrolytic refining, and the gold mill furnishes circa 500 tons yearly of copper precipitate, of about 60% copper tenor.

The copper reduction plant, built at a cost of about £250,000, was completed, and the first furnace blown in, January, 1906, the third furnace going into commission early 1908. The smelter has 3 blast-furnaces, and a converter department with 2 stands. The product is blister copper averaging 98.6% copper and 14.5 oz. gold per ton, which is shipped to the De Lamar works, in New Jersey, U. S. A., for electrolytic refining, but the company will have in operation, 1909, its own electrolytic refinery, at Port Kembla.

Forces employed are circa 2,500 men, and ore is broken mainly on contract, this system proving very satisfactory to both employer and employe.

The Mount Morgan has yielded over £12,000,000 in gold, and crushes yearly circa 225,000 long tons of gold-bearing quartz, carrying an average of about 8 dwts gold per long ton. Production, for fiscal years ending May 31, has been as follows: 5,760,458 lbs. fine copper and 120,606 oz. fine gold in 1906; 12,456,640 lbs. fine copper and 153,092 oz. fine gold, valued at £911,72[illegible] in 1908. Copper ore treated for fiscal year 1908 gave an average extraction of 3.3% copper and 8.75 dwts. gold per long ton. In August, 1908, the works treated 16,780 long tons of ore, yielding 539 long tons blister copper and 6,730 oz. gold, and secured also, from the gold mill, 45 long tons of copper precipitate, carrying 34 long tons fine copper and 13 oz. gold, in addition to the gold production from the gold mill.

The Mount Morgan is one of the very best gold [illegible]

UNT READ MINING CO., LTD.

[illegible]

on the shores of Spirit Lake, in the St. Helen's district, circa 50 miles from Portland. Lands include former holdings of the Sweden Copper Co., Calumet Copper Mining Co., Bronze Monarch Mining Co., Chicago Mining Co., Yellow Metal Mining Co., Earl Mining Co. and Cascade Copper Mining Co. The company also owns a three-fourths in the United mines, the holdings being practically a parallelogram of 1½ miles width by 4 miles in length. In addition to copper ores the tract contains sundry gold veins, an ochre bed, granite quarry, and a deposit of pumice stone.

The property shows syenite, diorite and slate, carrying fissure veins and contact deposits between diorite and syenite, with about 20 ore bodies more or less developed, these ranging from 5′ to 100′ in width, carrying mainly sulphide ores, including chalcocite, bornite and chalcopyrite, giving assays of 2 to 25% copper, 2 to 50 oz. silver and $1 to $40 gold per ton, with occasional lead values, the usual oxidized ores being absent.

Development is almost exclusively by tunnels, there being a 50′ shaft and tunnels of 250′, 400′, 600′ and 2,300′, with total workings of circa 5,500′, estimated to show 125,000 tons of ore of medium and high grades, with a greater tonnage of milling ore.

The Sweden-Norway-Denmark group carries a vein of 30′ to 40′ width, between diorite and syenite, mineralization being mainly on the footwall, with frequent chutes of rich ore, running from 3 to 20% copper, 4 oz. silver and $1.50 to $7 gold per ton.

The Earl group shows a strong gossan carrying small gold values, with occasional bunches of high grade copper ore, the gossan apparently overlying a breccia.

The Bronze Monarch group, adjoining the Sweden, opened by a 300′ tunnel, has produced circa 1,000 tons of auriferous and argentiferous copper sulphides.

The Polar Star mine is said to show a 2′ to 5′ vein of ore giving assays of 10 to 30% copper, 8 to 70 oz. silver and $3 to $11 gold per ton.

The Minnie Lee group, 4 miles from the Polar Star, has about 500′ of workings, showing low grade auriferous and argentiferous copper ore.

The Index mine, circa 2½ miles from the main group, shows a vein of 44′ estimated average width, carrying ore said to average 1.5% copper, 8 oz. silver and $4 gold per ton.

Equipment includes an 80-h. p. Pelton water-wheel and a 6-drill Sullivan air-compressor. There is a sawmill, with about 25 shops and cabins at the various camps.

The property has been practically idle for several years, but a small amount of development work is planned for 1909. Lands are owned outright, and the company has no bonds or debts, with a small amount of cash on hand. Property considered promising and management good.

MOUNT SHASTA GOLD MINES CORPORATION. **CALIFORNIA.**

Dead. Was partly "succeeded," 1904, by Phœnix Gold Mining Co. Was an unsavory bit of stock jobbery. Formerly at Shasta, Shasta Co., Cal. Fully described Vol. IV.

MOUNT SICKER & BRITISH COLUMBIA DEVELOPMENT CO., LTD. **BRITISH COLUMBIA.**

Office: 116 St. Vincent St., Glasgow, Scotland. Mine office: Mount Sicker, Vancouver Island, B. C. Kenneth H. M. Connal, chairman; John D. Steel, secretary. Organized Oct. 20, 1898, under laws of Great Britain, with capitalization £125,000, shares £1 par. Lands, sundry claims on Mount Sicker, Vancouver Island and in the East Kootenai district of British Columbia. *Idle for some years.*

OUNTS SICKER & BRENTON MINES, LTD. **BRITISH COLUMBIA.**

Office: 764 Bullitt Bldg., Philadelphia, Pa. Mine office: Mount Sicker, ancouver Island, B. C. Dr. T. J. Jones, president; John Edmonds, vice esident; Jas. A. Cameron, secretary, treasurer and managing director; Jas. mes, superintendent. Capitalization, $1,000,000.

Lands, 9 claims, area 352 acres, 49 miles north of Victoria, in 2 groups, own as the Copper Cañon group of 5 claims, on Mount Sicker, and a oup of 4 claims on Mount Brenton. Property is in the same geological rizon as the Tyee and Lenora mines, and carries a continuation of the histose ore formation of those mines. Development is by a two-compartent shaft, sunk at an angle of 76°, variously reported as 80′ to 144′ deep, owing a little good ore in the bottom, values apparently improving with pth. Considerable development work, done at different times, on various aims, has given encouragement, but the company has not yet secured a rkable ore body. Equipment is said to include necessary mine buildings.

OUNT STANLEY MINING CO. **ARIZONA.**

Mine office: San Carlos, Gila Co., Ariz. Martin Davis, superintendent, last accounts. Organized, 1905, with capitalization $1,000,000, shares $1 ar.

OUNT TRITLE COPPER CO. **ARIZONA.**

Mine office: Prescott, Yavapai Co., Ariz. H. R. Ward, consulting engier. Organized under laws of Arizona, with capitalization $500,000, shares 1 par. Lands, 11 claims, on the southern slope of Mount Tritle, near the ead of Slate Creek, circa 12 miles south of Prescott. Mine, formerly known the Dunkirk, is an old property, once worked as a gold mine, having 4 annels, of 150′, 160′, 170′ and 270′ length, driven at vertical intervals of 0′, showing argentiferous and auriferous copper and lead ores, apparently arrying values in copper, gold, silver and lead, in order named. Has steam ower, air-compressor and electric light plant. Has a 30-ton mill with 4 issen stamps, 3 Wilfley tables, 100-ton ore bin and 10,000-gallon water ank. Begun production early 1907, and middle of year was producing about 00 tons of ore monthly. Property considered promising, but creditors applied or a receiver, October, 1908.

OUNT TURNBULL COPPER MINING & SMELTING CO. **ARIZONA.**

Mine office: Safford, Graham Co., Ariz. P. W. Keller, president; Larkin . Rockwell, secretary. Idle since circa 1899, and presumably moribund.

OUNT UNION CONSOLIDATED MINING CO. **ARIZONA.**

Office Germania Bldg., St. Paul, Minn. Mine office: Prescott, Yavapai o., Ariz. R. H. Green, president; W. H. Fagley, vice president; H. M. emple, secretary; J. E. Whalen, general manager; Edward M. L'Engle, uperintendent. Organized 1904, under laws of Arizona, with capitalization 3,600,000, shares $1 par, as successor of the Mount Union Mining Co. and Arizona-Michigan Mining Co. Lands, 19 claims, in Cook Cañon, on the outhwestern slope of the Mount Union, in the Senator Range of the Bradshaw Mountains, Hassayampa district, circa 14 miles south of Prescott. The roperty has about 2,000′ of workings. The Arizona-Michigan mine, 9 claims, has a 175′ shaft, with circa 1,000′ of workings, showing a vein of 3′ to 6′ width, carrying a 12″ paystreak of argentiferous and auriferous copper ore and galena. The property also is reported to have a 460′ shaft. Equipment includes a 75-ton mill. Idle.

OUNT UNION MINING CO. **ARIZONA.**

Dead. Merged, 1904, in Mount Union Consolidated Mining Co. Formerly Prescott, Yavapai Co., Ariz.

OUNT WARATAH COPPER MINES, LTD. **TASMANIA.**

Office: 6 Moorgate St., *London, E. C., Eng.* Operating office: Zeehan,

Tasmania. Mine office: Heazlewood, Tasmania. J. H. Wolf, chairman; J. E. Meadowcroft, secretary; preceding officers and S. F. Ralli, directors; Capt. John Walters, general manager. Organized Feb. 18, 1907, under laws of Great Britain, with capitalization £125,000, shares £1 par; issued, £100,000.

Lands, 202 acres, in 3 leases from the Tasmanian government, showing 5 ore bodies, carrying chalcopyrite, associated with pyrite in a quartz gangue, averaging circa 5% in copper tenor, also a body of galena. Development is by shafts of 60′ and 170′, with tunnels aggregating 1,000′ length. Company plans continuous development.

MOUNT WARMINSTER MINE. AUSTRALIA.

Office: 166 Bolsover St., Rockhampton, Queensland, Australia. Mine office: Mt. Chalmers, Palmerston Co., Queensland, Australia. Wm. Thompson, secretary; J. Bruce, mine manager. Lands, 100 acres, 80 acres freehold, 2 miles from Fitzroy and 10 miles northeast of Rockhampton. Mine has 2 shallow shafts and a short tunnel, latter showing a 12′ vein of oxidized and sulphide ores of 2% copper tenor. Shipped, 1907, a parcel of 23 tons of 20% copper ore to Waratah smelter. Employs 10 men.

MOUNT WASHINGTON COPPER CO. MARYLAND.

Dead. Property sold under foreclosure, March, 1903. Formerly at Mount Washington, Baltimore Co., Md.

MOUNT WHIPPLE MINING CO. CALIFORNIA.

Mine office: Needles, San Bernardino Co., Cal. Lands are near Empire Flats, on the Colorado river, near the junction of the Bill Williams Fork river. Presumably idle.

MOUNT ZIRKEL COPPER MINING CO. COLORADO.

Office: 240 La Salle St., Chicago, Ills. Mine office: Pearl, Larimer Co., Colo. Wm. A. McGuire, president; E. B. Boisot, secretary and treasurer. Organized 1901, under laws of Washington, with capitalization $1,000,000, shares $1 par. Is controlled by Standard Development Co. Lands, 7 claims, area 60 acres, also a 5-acre millsite, in the Big Horn district, showing a 7′ fissure vein, claimed by company to average 20% copper, 4 oz. silver and $1 gold per ton, which is untrue, opened by a 250′ shaft. Idle some years. Is not regarded favorably.

MOURGOUL RIVER COPPER CO., LTD. RUSSIA.

Dead. Formerly at Dzansulski, Kutais, Russia.

SOCIÉTÉ ANONYME DE MOUZAÏA. ALGERIA.

Office: 5 Rue St. Vincent-de-Paul, Paris, Xe., France. Mine office: Camp des Chenes, par Blida, Alger, Algeria. E. Raschlé, president; R. Lavy, secretary; M. Duvialard, general manager. Organized 1891, with capitalization 350,000 francs.

Lands, 5,362 hectares, showing 6 fissure veins, in schists, carrying chalcopyrite, and 10 contact veins carrying antimonial gray copper, veins ranging from 2cm. to 1m. wide and averaging 4 to 5% copper, and from nothing to 27 oz. silver per ton. Mine is opened by a 17m. shaft and 7 tunnels of 39m. to 63m. length, in chalcopyrite, and by 12 tunnels, four longest 220m., 240m., 255m. and 265m., in gray copper ore. Property is served by the West Algerian railroad, 2km. distant. Copper properties have been idle since 1899, but the company has developed large bodies of hematite and spathic iron, estimated to contain 1,200,000 metric tons of ore of merchantable grade.

MOZUMI MINE. JAPAN.

Owned by Mitsu Bishi Goshi Kwaisha.

M'TAMBA COPPER DEVELOPMENT CO., LTD. TRANSVAAL.

Office: Johannesburg, Transvaal. J. H. Rainier, P. J. Dennyssen, F. T. Blane and Geo. Peel, directors. Organized circa February, 1908, under laws of Transvaal, with capitalization £16,000, shares £1 par. Vendors took £9,000

shares. Lands, 1,284 claims, in a tract circa one mile wide and three miles ng, 107 miles from Pietersburg.

ULATOS MINING CO. **MEXICO.**

Dead. Formerly at Mulatos, Sahuaripa, Sonora, Mex.

ULLAN MINING CO. **IDAHO.**

Mine office: Mullan, Shoshone Co., Ida. Lands are on the east fork of eadman Creek. Resumed operations, October, 1908, after about 3 years lleness.

ULOCK MINE. **MICHIGAN.**

Office: care of R. P. Mulock, owner, Colfax, Ia. Mine office: Matchwood, Ontonagon Co., Mich. John F. Dreiss, superintendent. Lands, 160 cres, being the Northwest ¼ of Section 9, Town 49 North, Range 41 West, ear the Norwich. Exploratory work, 1903-1905, has shown 2 amygdaloidal eds, outcropping at a distance of about 400' apart, with average widths of irca 6' and 15', opened by several pits, showing copper.

ULTNOMAH MINING & MILLING CO. **WASHINGTON.**

Office: 1214 Harmon Ave., Minneapolis, Minn. Mine office: Bangham, Okanogan Co., Wash. J. N. Hudnut, president; M. J. Hills, vice president; David W. Peabody, secretary; Geo. S. Wickman, treasurer; Dr. F. O. Hudnut, general manager; Thos. B. Early, superintendent. Organized under laws of Washington, with capitalization $2,000,000, shares $1 par.

Lands, 8 claims, opened by a 930' tunnel, planned to be driven 1,500', said to cut a 15' vein, carrying mainly auriferous and argentiferous lead ore.

MUNGANA (CHILLAGOE) MINING CO., LTD. **AUSTRALIA.**

Office: 39 Queen St., Melbourne, Australia. English office: Palmerston House, Old Broad St., London, E. C., Eng. Mine office: Mungana, Lynd Co., Queensland, Australia. Employs 350 men. Harvey Patterson, chairman; W. J. Saddler, vice-chairman; C. L. Hewitt, secretary; Edwin Habben, London secretary; Stanley N. Rodda, manager. Organized March 1, 1901, under laws of Queensland, with capitalization £125,000, shares 5s. par, fully issued. Statement of finances, as of date June 30, 1908, gave assets of £185,072 7s. 3d., and liabilities of £134,088 13s. 8d., with £6,123 12s. 10d. on hand. For fiscal year ending June 30, 1908, net profit was £8,090 17s. 2d. Annual meeting, second Monday in October.

Lands, 5 claims, area 287 acres, in the Walsh and Tinaroo districts, about 10 miles west of Chillagoe, including a number of mines, of which the principal properties are the Girofla and Lady Jane. The property shows considerable ore, assaying up to 8% in copper tenor, but is primarily a silver-lead mine, with greatest values in silver, followed in turn by lead and copper. The mine is very wet, and considerable trouble has been had in sinking at times, inflow of water being beyond the pumping capacity. Timbering is by square sets.

The Girofla mine gives a good surface showing, and carries a large ore body containing workable values in silver, lead and copper. Equipment is three shafts, No. 3 being 510' deep. There also is a large open cut to depth of 60'.

The Lady Jane mine lost its old shaft from a crush, and now has a water flow of circa 200,000 gallons daily. The old shaft, through drawing, has been replaced by the 630' Saddler shaft, with 4 compartments and is 4' 6"x15' 9" in size, inside timbering. It is 100' west of old Lady Jane No. 3 shaft.

There also are minor properties, including the Chillagoe Consolidated open-cut; Calumet, having an 80' shaft; Magazine, having an open pit, and the Dorothy, having a 200' shaft.

The mine has a number of sheds and buildings, [illegible]

workshop, built 1908. Waterworks include a service furnished to t with fire protection for all mine buildings, with tanks holding 4 supply at each mine. The property is served by the Chillagoe to Railway. Fuel is wood.

Production for fiscal year ending June 30, 1906, was 969,280 copper, 652 long tons lead and 128,600 oz. silver, and for fiscal year June 30, 1907, was 30,275 tons of ore, yielding 2,719,360 lbs. fine copp long tons lead and 298,505 oz. silver.

SUCESIÓN JUAN MUÑOZ.

Office and mine: Higuera, La Serena, Coquimbo, Chile. José general manager. The mines are Las Casas and Ají, opened to depth meters, with horizontal workings 1,350 meters in length, developmen partly by tunnel. Country rock is syenite. Equipment includes a & Halske electric plant. Near the mine is the smelting establishment, as San Juan, having a modern equipment, including an electric ligh intercommunicating telephone system, etc. Ores under 5% in coppe are not treated. Smelter has 3 reverberatory furnaces. Productio was 3,770 tons of ore averaging 9.5% in copper tenor, from which w duced 775,680 kilos of ejes, averaging 46.31% copper tenor, giving an equal to 791,958 lbs. fine copper. The mines offer good working co and the property is managed with vigor and success.

MUNROE-THOMPSON ORE REDUCTION CO. NOVA S

Dead. Was a bad egg. Formerly at Wentworth Centre, Cumberl N. S. Fully described Vol. IV.

MURCHISON COPPER MINING SYNDICATE. AUST

Mine office: Barraba, N. S. W., Australia. Lands, 30 acres, le 2 miles north of Gulf Creek, slightly prospected.

MURRAY COPPER MINING CO.

Mine office: Brighton, Salt Lake Co., Utah. Henry Harker, pr Matt. Gilby, vice-president; A. R. Condict, secretary. Organized 190 laws of Utah, with capitalization $50,000, shares 10 cents par.

MURRIN COPPER MINES, LTD. AUST

Dead. Voluntarily wound up, March, 1905. Formerly at Murri Australia.

MURTEGA MINERALS CO., LTD. POR

Office: 8 Princes St., London, E. C., Eng. Letter returned unclaimed f mer mine office, Barrancos, Alemtejo, Portugal. J. Dunham Massey, ch H. G. Jones, secretary. Organized Dec. 8, 1900, under laws of Great with capitalization £80,000, shares £1 par; issued, £67,567. Lands i old copper mines. Company endeavored to open a mine at the pre point of intersection of 3 main veins, in the center of a hill, under a ing gossan capping, by shaft and tunnel. Idle several years and ap moribund.

MUTOOROO COPPER & SILVER MINING CO., LTD. AUST

Office: care of J. P. Winch, Hindley St., Adelaide, South A Mine office: Cockburn, South Australia. Lands, 320 acres, leasel miles southwest of Cockburn, carrying lenticular ore bodies of cons size, in contact deposits near intrusive rocks, ores including cuprit chite, azurite, chrysocolla and atacamite in the oxidized zone, chan depth to chalcocite, bornite and chalcopyrite, associated with pyrite. reported production, first half 1905, was 100 long tons of 16% cop Property has paid several small dividends. Idle.

COMPAÑIA MINERA y FUNDIDORA DE LA MUTUA. M

Mine office: Zimapán, Hidalgo, Mex. León Lemaire, general m

NACOZARI CONSOLIDATED COPPER CO. MEXIC

Office: care of W. L. Musick, president, Burlington Bldg., St. Louis, M Mine office: Pilares de Teras, Moc ezuma, Sonora, Mex. John G. Alexand superintendent. Organized under laws of Arizona, apparently succeeding t Nacozari Copper Co., and protocolized under laws of Mexico. Lands, 40 pe tenencias, area 98 acres, including La Galera, La Puerta and Copper Que mines, one said to be an antigua, near the Moctezuma Copper Co., and carr ing a 10′ to 20′ vein, supposed to be the extension of the Pilares ore body the Moctezuma.

NACOZARI COPPER CO. MEXIC

Dead. Organized September, 1906, and apparently succeeded, 1907, b Nacozari Consolidated Copper Co. Formerly at Pilares de Teras, Moctezum Sonora, Mex.

NADAR COPPER MINES, LTD.

Office: Bassishaw House, London, E. C., Eng. Robt. Biggar, secretar Organized Apr. 5, 1907, under laws of Great Britain, with capitalizati £100,000, shares £1 par. Apparently inoperative.

NAFVERBERGS KOPPARVERK. SWEDE

Owned by Naversberg Falun Copper Mines & Works, Ltd.

NAGAMATSU MINE. JAPA

Owned by Furukawa Mining Co.

NAHMINT MINING CO., LTD. BRITISH COLUMBI

Mine office: Alberni, Vancouver Island, B. C. A. C. Cabel, superi tendent. Organized 1898, with capitalization $100,000. Property is the Hay mine, on the western side of the Alberni Canal, having 3 tunnels, longe 1,200′, with about 1 mile of workings. Has a 1-mile aerial tram, leadi to a shipping wharf at tidewater. Ore shipped, 1898-1899, to Tacoma smelt gave average returns of 13% copper, 1 oz. silver and 65 cents gold per to Suspended operations, 1902, when mine was said to be nearly exhausted, a idle since circa 1904.

F. B. NAJARA y CA. MEXIC

Office and mine: Topia, Tamazula, Durango, Mex. Properly has aurife ous and argentiferous copper ores. Employed circa 40 men at last account

COMPAÑIA MINERA DE NALTAGUA. CHIL

Dead. Was succeeded, Jan. 26, 1907, by Société des Mines de Cuivre Naltagua (Chili). Formerly at Naltagua, Milipilla, Santiago, Chile.

SOCIÉTÉ DES MINES DE CUIVRE DE NALTAGUA (CHILI). CHIL

Office: 52 Blvd. Haussmann, Paris, France. Mine office: Naltag Milipilla, Santiago, Chile. J. de Bethan, A. Boscher, Chas. Chalput, H. Lamarre, A. de Bitrick, P. Keller, E. Leolino, M. Lyon and A. de Mun, dir tors. Organized Jan. 26, 1907, under laws of France with capitalizati 10,000,000 francs, shares 100 francs par. Mine, opened 1898, was owned p viously by Compañía Minera de Naltagua.

NAMAQUA VENTURE SYNDICATE. CAPE COLON

Mine office: Wittwater, Little Namaqualand, Cape Colony. Did so development work, circa 1904. Presumably idle.

NANAIMO JUBILEE MINING & DEVELOPMENT CO., LTD. BRITISH COLUMBI

Mine office: Dunsmuir, Vancouver Island, B. C. Lands, known as t Delphi group, on the south fork of the Nanaimo River, circa 18 miles from t Esquimault & Nanaimo railway, show a vein of 10′ to 15′ width, carrying f copper values. Property considered promising.

NANCOT COPPER CO. NEW MEXIC

Office: care of H. S. Clark, president, Southboro, Mass. Mine offic

len, Valencia Co., N. M. Organized October, 1902, under laws of New Mex-, with capitalization $1,000,000, shares $1 par. Bonds, $250,000 authorized, nning 5 years, at 6%, company giving a $2 stock bonus with each dollar of nds sold. Lands, 26 claims, in the Manzana Mountains, near Belen, fairly mbered and watered. Mine has a 2-compartment shaft, and shipped a few rloads of ore running 15 to 20% copper. Presumably idle.

ANTLLE VALE COPPER MINING CO., LTD. **WALES.**

Office: 11 Dale St., Liverpool, Eng. Mile office: Llanllyfin, Carnarvon, ales. O. A. Harling, chairman; W. H. Hill, secretary. Organized Sept. 9, 00, with capitalization £5,000, shares £1 par. Issued, £4,007. Debentures, ,500, "protected" by first, second and fourth mortgages. Idle and appar-tly moribund.

APA COUNTY COPPER MINING CO. **CALIFORNIA.**

Dead. Formerly at Middletown, Lake Co., Cal., but with lands in Napa unty, California. Deseribed Vol. VI.

APOLEON & MAGHERA COPPER MINING & REDUCTION CO. UTAH.

Office: Lock Box 537, Cedar Rapids, Ia. Operating office: Ogden, Utah. ine office: Utah Hot Springs, Box Elder Co., Utah. Employs 10 to 40 men. on McGuire, president and general manager; John H. Kincaid, vice-presi-ent; Dr. Frank Carroll, secretary and treasurer; John E. Dalbey, superin-endent; preceding officers, Lee Kincaid, Wm. Zaff and Dr. C. T. Chandler, irectors. Organized Feb. 23, 1904, under laws of Utah, with capitalization 1,000,000, shares $1 par. Annual meeting, second Tuesday in June.

Lands, 12 claims, area 240 acres, also a 10-acre millsite, in the Sierra adre district, showing gneiss carrying 4 fissure veins, of which 2, under evelopment, are practically parallel, estimated by company at 20' average idth and traceable 5,000'. Veins show malachite, bornite and chalcopyrite, ith occasional chalcocite and copper silicates, estimated to average 2% cop-er, 4 oz. silver and $2 gold per ton. Development is by a 120' shaft and by unnels of 1,800', 1,100', 300' and 50', with about 4,000' of workings, esti-ated to show 400,000 tons of ore, with 75,000 tons blocked out for stoping. here is a 2,682' Broderick & Bascom aërial tram.

Equipment includes a 20-h. p. steam plant. There is a 30x36' machine hop and a 30x36' carpenter shop, both of frame construction, covered by heet steel. Company plans a concentrator.

APOLEON MINE. **CALIFORNIA.**

Mine office: Copperopolis, Calaveras Co., Cal. Is the oldest copper mine n California, and once was a considerable producer. Vein channel is 100' ide and ranges from diabase to talcose schist, ore bodies occurring in lenses p to 20' wide. Ores are principally sulphide, with a fair sprinkling of car-onates and oxides. Old shaft, 325'. A new shaft has been sunk to the west ard. Some copper has been produced, during past few years, by leaching he old dumps.

APOLEON MINE. **WASHINGTO**

Mine office: Boyds, Ferry Co., Wash. Is owned by British Columbia Copper Co. Ore is low in grade, carrying small values in copper, silver and gold, with about 20% silica and 40% iron, being valuable mainly for flux. Has 3-drill and 7-drill air-compressors, and a 4,100' tram. Is said to plan an cyanide plant to treat low grade auriferous ores. Was shipping when 100 tons of ore daily.

ARLARLA SILVER-LEAD MINING CO., LTD.

Mine office: Mount Marmion, Western Australia. Y. H. anager. Lands, 240 acres, 30 miles from Mount Marmion and Perth, on the Barker River, in the Napier Range, carrying [illegible] ', assaying 24 to 164% copper, 47 to 68% lead and [illegible]

mated by company to average 8% copper, 50% lead and 10 oz. silver, w in all likelihood, is an overestimate. Also has property at Moondoom miles from Narlarla, said to show a 20′ vein traceable 3,000′, showing crops of ore that can be hand-sorted to 30% copper tenor.

NASSAU COPPER CO. CALIFOR

Mine office: Milton, Calaveras Co., Cal. A. S. Pool, superinten Property, known as the Goat Ranch mine, was developing with about 20 at last accounts.

NAST MINING & MILLING CO. U

Dead. Was absorbed by New England Gold & Copper Mining Co. merly at Bingham Canyon, Salt Lake Co., Utah.

NATICK COPPER CO. MICHI

Office: Leopold Bldg., Houghton, Mich. Mine office: Copper Falls, weenaw Co., Mich. F. W. Nichols, resident manager. Lands, 200 acres tween the Humboldt and Eagle River properties, being the West ½ of S 17, Town 58 North, Range 31 West. Idle for many years.

NATIONAL CAPITAL COPPER CO. MEX

Office: Dallas, Texas. Mine office: Coapa, Morelia, Michoacán, Neale Starke, president; W. F. Thatcher, secretary. Organized Apr. 23, under laws of Virginia, with capitalization $150,000, shares $1 par. L 550 pertenencias, area circa 1,375 acres, in the Tacambaro district, show contact deposits between granite and limestone, carrying native copper argentiferous and auriferous oxide, carbonate and sulphide ores. Two are being developed by tunnels, the Confianza vein being said to be 70′ Nearest railway is the Mexican National, 45 miles distant. Property is watered and timbered.

NATIONAL CONSOLIDATED MINING CO. ARIZ

Office: 420 Milwaukee Ave., Chicago, Ills. Operating office: No Ariz. Mine office: Patagonia, Santa Cruz Co., Ariz. Employs 8 men. E. Porter, president; S. F. Johnson, vice-president; A. F. Richardson, tary; Alfred Thurtell, treasurer and general manager; preceding officers E. E. Bethel, directors; Geo. D. Gross, superintendent. Organized D 1905, under laws of Arizona, with capitalization $1,000,000, shares $1 issued, circa $700,000. Annual meeting, first Monday after first Tuesd January.

Lands, 21 claims, area circa 400 acres, also 40 acres in millsites, pr including the Silver Glance group, about 12 miles northwest of No Lands show granite and diorite, former frequently decomposed, and occa limestone, carrying a number of fissure veins and contact deposits, of 6 are partly developed, principal vein of circa 12′ average width ca chalcocite and galena, estimated to average 3% copper, 10% lead, 12 oz. and $9.75 gold per ton. Development is by shafts of 60′, 110′, 80′ an and by tunnels of 193′ and 120′.

Equipment includes a 12-h. p. Fairbanks & Morse gasoline hoist and are 5 mine buildings. Company plans continuous and systematic develop

NATIONAL COPPER CO. CALIFO

Mine office: Needles, San Bernardino Co., Cal. Lands, in the W Mountain district, in the eastern part of San Bernardino county, have s prospecting shafts, with small mine buildings, and company was said, A 1908, to plan beginning small ore shipments.

NATIONAL COPPER CO. NEW JE

Office: 250 Water St., New York, N. Y. Works office: Elizabeth, Co., N. J. H. Heppenheimer, president and general manager. Orga circa August, 1906, under laws of New Jersey. Property is a small sm *plant, treating* custom ores and matte. Became bankrupt Jan. 10, 1908.

ONAL COPPER CO. **NEW MEXICO.**

fice: care of Col. Ed. Butler, president, St. Louis, Mo. Mine office: City, Grant Co., N. M. C. P. Laughlin, superintendent. Capitalization, 000. Lands, circa 12 claims, 4 miles from Chemung Copper Co., in water Cañon, Burro Mountains, opened by a tunnel and 200′ main shaft, g a fissure vein in granite, of 60′ estimated average width, carrying chalcocite, with considerable ore developed. Has steam power and a lk air-compressor, and is said to plan a concentrator.

ONAL COPPER CO. **WASHINGTON.**

ine office: Springdale, Stevens Co., Wash.

ONAL COPPER & GOLD MINING CO. **ARIZONA.**

fice: care of Gates M. Fowler, general manager, Phœnix, Ariz. Mine Wellton, Yuma Co., Ariz. Organized 1904, under laws of Arizona. are the Rogers Springs group, held on $60,000 bond and lease from Marlar. Presumably idle.

ONAL COPPER MINES CO. **IDAHO.**

fice: 605 Couch Bldg., Portland, Ore. Mine office: Cuprum, Washing-, Idaho. J. J. Richardson, president; Wm. Trevor, vice-president and tendent; R. A. Proudfoot, treasurer; L. B. Reeder, secretary; preced-ficers, J. F. Boone, F. B. Jones, W. E. Jones, H. A. Mautz and J. W. , directors. Organized May, 1905, under laws of Oregon, with capitali-$1,000,000, shares $1 par. Lands, 17 claims, area 330 acres, on Horse in, in the Seven Devils district, opened by a shallow shaft and several , longest circa 750′, with about 1,000′ of workings, showing argentif-nd auriferous chalcocite.

ONAL COPPER MINING CO. **IDAHO.**

fice: 115 Howard St., Spokane, Wash. Operating office: Wallace, Mine office: Mullan, Shoshone Co., Idaho. D. E. Keys, president; r McCrea, secretary; Chas. McKinnis, manager; F. Cushing Moore, con-engineer. Organized Sept. 22, 1906, under laws of Washington, with ization $1,250,000, shares $1 par.

nds, 6 claims, west of the Lucky Calumet, between the east and west f Deadman Creek, circa 4 miles northeast of Mullan, near the Imperial pper King properties, and west of the Lucky Calumet. Suit has been t by C. H. Williams and A. H. Featherstone over title to lands.

velopment is by a tunnel and a 2-compartment main shaft, showing a 7′ to 10′ width, with a 30″ paystreak giving average assays of about copper, 25% lead and 10 oz. silver per ton, copper being mainly from ite and occasional chalcopyrite, while lead values are mainly from car-ores and occasional galena. Both the lead and copper ores are con-ly argentiferous.

uipment includes a 15-drill electric air-compressor, energy being taken he Washington Water Power Co.

NAL COPPER MINING CO. **UTAH**

ice: 400 D. F. Walker Bldg., Salt Lake City, Utah. Letter return-ed from former mine office, Castleton, Grand Co., Utah. F. Rankin, t; W. H. Tibbals, vice-president; C. E. Peyton, secretary and [illegible] Capitalization $100,000, shares 10 cents par. Lands, circa 110 [illegible] Sal Mountains, Sonoma district, showing ore assaying up to [illegible] and 17.5 oz. silver per ton, taken from a 6-foot vein [illegible] Long idle and apparently moribund.

NAL COPPER MINING CO.

ce and mine: Douglas, Converse Co., Wyo. Frank [illegible] W. Johnson, secretary; R. C. Paul, general [illegible] 06, with capitalization $250,000. Long idle and [illegible]

NATIONAL COPPER ORE CO. **VIRGINIA.**

Mine office: Garrisonville, Stafford Co., Va. Has cupriferous pyrite. Idle and apparently moribund.

NATIONAL COPPER TEMPERING CO. **COLORADO.**

Office: 808 Continental Bldg., Denver, Colo. David Lamon, president; Henry Stewart, vice-president; Theo. H. Thomas, secretary and treasurer. Organized under laws of Colorado, with capitalization $500,000, shares $1 par. Claims to have a process for tempering copper that increases tensile strength by more than 500%, which is untrue. Careful tests of copper, claimed to have been tempered by this process, show no improvement whatever in the metal, and Mr. Lamon excuses himself therefor by the puerile statement that successful tests can be made only on a considerable quantity of material. Process considered worthless. Promised dividends impossible of realization, and company considered a mere bit of stock-jobbery.

NATIONAL DEVELOPMENT & MINING CO. **ARIZONA.**

Dead. Was succeeded, June 5, 1906, by Sultana-Arizona Copper Mining Co. Formerly at Kolvin, Pinal Co., Ariz.

NATIONAL GOLD & COPPER CO.

Office: care of Lewis Lusk, Spokane, Wash. Organized 1906, under laws of Washington, with capitalization $1,500,000, shares $1 par, to operate in "the United States, Canada and Mexico." Location of lands, if any, unknown.

NATIONAL GOLD & COPPER CO. **ARIZONA.**

Office: care of Ben Blanchard, manager, Prescott, Ariz. Mine office: Bouse, Yuma Co., Ariz. Lands are slightly developed by several shallow shafts. Idle.

NAMAQUA COPPER CO., LTD. **CAPE COLONY.**

Office: 3 Fenchurch St., London, E. C., Eng. Mine office: Concordia, Little Namaqualand, Cape Colony. Frederick J. Mirrielees, manager; Francis Phillips, superintendent; A. W. Outram, secretary. Organized Apr. 23, 1888, under laws of Great Britain, as a reconstruction of Namaqua United Copper Co., Ltd., with capitalization £200,000, shares £1 par; issued, £188,662. Operating profits were £57,819 in 1905, and nearly £100,000 in 1906. Has paid annual dividends of 5 to 40% since organization, except 1891-1894, and 1901-1902. Dividends were 5% in 1903; 7.5% in 1904; 7.5% in 1905; 10% in 1906 and 35% in 1907. A 2s. dividend was announced May, 1908. The company has a surplus fund of more than £40,000, invested in British consols, and has returned in dividends more than its capitalization.

Lands, 680 acres, leasehold, held on royalty of 2s. 6d. per long ton of ore produced. Mines are the Tweetfontein, with 7 shafts; Wheal Julia, with 3 shafts; Flat, with 1 shaft; New East Centre, with 1 shaft; Jubilee, with 2 shafts; Henderson, with 2 shafts, and Prospect, with 2 shafts. Ore is high-grade chalcopyrite, occurring in intrusive greenstone traversing granite, and the property has considerable ore reserves.

There are concentrating plants at the Flat and New East Centre mines, where crude ore is dressed up to circa 25% copper tenor and shipped for smelting to Swansea, via Port Nolloth.

Production was 5,276,712 lbs. fine copper in 1905, and 5,931,521 lbs. in 1906. The property is managed conservatively, and with marked financial success.

NATIONAL GOLD & SILVER MINING CO. **NEW MEXICO.**

Mine office: Steins, Grant Co., N. M. M. H. Sherman, president; B. L. Berkey, superintendent, at last accounts. Has steam power and a 50-ton concentrator. Shipped a little ore and concentrates, 1906. Presumably idle.

NATIONAL METAL CO. **MEXICO.**

Offices: 170 Broadway, New York, N. Y., and Apartado 71b, Mexico, D. F.

...ico office: Guadalajara, Jalisco, Mex. C. B. Lewis, president; H. B. Lewis, ...president and general manager; D. C. Doney, metallurgist. Apparently ...n auxiliary of the American Smelting & Refining Co. Has sampling plants ...Chihuahua; Guanaceví, Durango; Ameca and Guadalajara, Jalisco; ...ca and Temascaltepec, Mexico; San Luis Potosí; Hermosillo, Sonora, and ...ales, Arizona. Also has purchasing agencies at various other points in the ...ican Republic. Had a refinery at Nonoalco, and sold same, circa December, ...7, to Société Affinage des Metaux.

TIONAL METALLURGICAL CO. **MEXICO.**

Office: 1503 Arrott Bldg., Pittsburg, Pa. Mine office: Matehuala, Catorce, ...Luis Potosí, Mex. D. C. Noble, president; C. H. Fogg, vice-president; J. McConnell, treasurer and chairman board directors; preceding officers, Gen. Ladd, Jas. A. Steele, J. H. Douglas and H. N. Nichols, directors; W. A. ...ifith, secretary; Samuel James, general manager; A. P. Callender, general ...nt; H. T. Schmidt, mine superintendent; W. E. Newnam, smelter superin...dent; Grattan Foley, cashier.

Organized August, 1901, under laws of Colorado, with capitalization ...00,000, shares $25 par. Debentures, $500,000 authorized, at 6%; issued, ...2,000. Annual meeting, last Tuesday in July. Holds lands through a Mexi... corporation, the Compañía Metalurgica Nacional.

Lands are circa 1,300 acres, and a 160-acre millsite, in the Matehuala and ...Saludo subdivisions of the Catorce district. Property shows limestone meta...rphosed by intrusive granite-porphyry, ore bodies occurring as irregular ...tart deposits in an altered zone of garnetiferous limestone and wollastonite. ...company's lands carry 26 known ore bodies, of which 7 are more or less ...eloped, these ranging from 3' to 120' in width, and from 200' to 1,200' length; ...e bodies being under development at present. Ores are mainly galenite, ...nite and chalcopyrite, carrying estimated averages of 5% copper, 6 oz. silver ...2 gold per ton.

Lands include mines known as La Colorina, Santa Ana, Las Agustias, Santo ...nio, Monte Celeste, Alpha and Beta mines.

Principal openings include the 200' Aarons shaft; 200' El Carmen shaft; ...Santiago shaft; 1,000' El Carmen tunnel; 900' No. 2 tunnel; 350' Russian ...nel, and 600' Portero tunnel, all tunnels being crosscuts, with about 25 ...er tunnels and cuts, with a total of circa 6,500' of workings.

La Colorina y Anexos, opened by shaft and tunnel, have ore carrying 5 to ...% copper, circa 250 grams silver and 2 grams gold per metric ton, and were ...d September, 1906, to be shipping 50 tons of ore daily.

Las Agustias mine has a shaft with circa 2,000' of workings, ore averaging ...ut 10% lead and 20 oz. silver per ton.

Santa Teresita mine, developed by shaft, with about one-half mile of open..., has silver-lead ore averaging circa 10% lead and 20 oz. silver per metric ...

Santa Ana mine, opened by tunnel, has a silver-lead vein carrying 10%... ...ad and 20 oz. silver per metric ton, and also has undeveloped silver-lead ores.

Mining equipment is slight, including a 25-h. p. gasoline hoist and a 10x10' ...t three-compartment.

There are 8 buildings at the mine, including office, assay office and dwell...s.

The principal mines are connected with the smelter by the 7-mile Matehu... narrow-gauge railroad. A spur of the Mexican Central railway runs into ...melter.

The smelter, according to the mill and hoist, and doing a general custom ...ess, in addition to treating the company's own ores, is of 500 tons rated

daily capacity, having 150-ton and 200-ton water-jacket blast-furnaces lead and one for copper, with a 30-ton reverberatory furnace, calcining briquetting plant and a small sampling mill, the reverberatory being treating flue dust. Product is matte averaging circa 45% copper, 5 oz. silver and 1 oz. gold per metric ton, shipped to the Aguascalientes for refining.

The power plant at the smelter includes three 125-h. p. boiler 275-h. p. Corliss tandem-compound engine, direct-connected to a 150-h. p. generator, with a number of smaller dynamos and motors.

Miscellaneous enterprises include a brick plant with a capacity o finished brick daily, and the company holds various government fr and concessions, and plans securing a water supply from a distanc miles, and furnishing water to the city of Matehuala.

Production, 1906, is reported by company as 2,295,270 lbs. fine co addition to lead, silver and gold. The mines and smelter employ ci men, mainly at the reduction plant.

The company was promoted from Denver, and estimates of pro profits made by the promoters, while placing stock, were ridiculously h the present management apparently has no connection with the origi moters, and seems operating along sound lines.

NATIONAL MINES CO.

Office: Portland, Ore. Mine office: Weiser, Washington Co., Ida Trevor, vice-president. Lands, 20 claims, in the Seven Devils district, on the King group, a 275′ tunnel with 100′ blind shaft at its end, show assaying up to 5% copper, 33% lead, 90 oz. silver and $2.50 to $5 gold

NATIONAL MINING CO. BRITISH COLUMBIA & CALIF

Office: Tacoma, Wash. Mine office: Waldo, Josephine Co., Ore Pritchard, president; Geo. P. Larsen, secretary; John Sanger, superin Capitalization $10,000,000. Property is the Sanger group, 35 claims, a acres, in Del Norte county, California, shortly south of Waldo, also mining claims in British Columbia, "oil lands" in western Washing several mining claims in the lower Arrow Lake district, British Columb Sanger ores give good assay values in copper and gold: Capitalizatio cessive and claims made for company even more inflated. Idle and pre moribund.

NATIONAL MINING CO. MICH

Office: 15 Congress St., Boston, Mass. Mine office: Rockland, On Co., Mich. John C. Watson, president; Alvin R. Bailey, secretary an urer; preceding officers, F. H. Raymond, Geo. H. Flint and Capt. Jas. C eth, directors. Organized 1848, and rechartered 1878, with capitaliza creased later to $2,500,000, shares $25 par; issued, $1,875,000. In No 1908, company had a floating debt of circa $25,000. Has paid divid $320,000.

Lands lie west of the old Minesota mine, now owned by Michigan Mining Co. The National has produced nearly 6,000 short tons of fine but has been idle since 1893. At last accounts management was makin tive plans for resumption. Fully described Vol. II.

NATIONAL MINING & DEVELOPMENT CO. WYO

Office: 1314 Eleventh St., N. W., Washington, D. C. Mine office: Frémont Co., Wyo. Chas. Jacobsen, president; H. Clay Browning, J president; Melvin A. Wertz, secretary; preceding officers, J. Frank Hess, E. Burklin, John H. Muirhead, John R. Galloway, Burt H. Brockway an J. Berner, directors; Col. John T. Wertz, general manager; A. L. LaVi *gineer.* Organized May 22, 1903, under laws of Maine, with capita *$500,000,* shares $10 par. Annual meeting, first Monday in June.

Lands, 43 claims, unpatented, area 875 acres, in the Willow Creek district, showing about a dozen ore bodies, of which 5, mainly fissure veins, are under development, these being estimated by company to average 25' width and to be traceable 5 miles, carrying an average of 8% copper, up to 100 oz. silver and up to $2 gold per ton, mainly from chalcopyrite with quartz gangue, which figures are excessive. Development is by 5 pits and shafts, deepest 60', and by 3 tunnels, longest 93', with 378' of workings. Property is 30 to 35 miles from nearest railroads.

NATIONAL MINING EXPLORATION CO. **ARIZONA.**

Office: 1012-60 State St., Boston, Mass. Mine offices: Globe, Gila Co., Ariz., Kelvin, Pinal Co., Ariz., and Safford, Graham Co., Ariz. Hon. Chas. M. Bruce, president; Wm. W. Williamson, vice-president; Jas. A. Otis, secretary and treasurer; Frank A. Woodward, general manager. Organized November, 1905, under laws of Maine, with capitalization $1,500,000, shares $1 par; issued, $796,013. Authorized, Sept. 21, 1908, an issue of $250,000 first-mortgage 10-year 5% gold coupon bonds, convertible into stock at par at any time within 2 years, and retirable by company at any time on 60 days' notice, at 5% premium. Bond issue apparently was not put out, though supposed to be placed, and money advanced the company thereon. A note, supposedly for advance on bond issue, is said to have been repaid, November, 1908.

Lands are in 3 groups in Gila, Pinal and Graham counties, Arizona, the principal property being at Globe.

The Iron Cap group of 7 claims, patented, area circa 130 acres, at Globe, is well located between the two properties of the Arizona Commercial, and not far from the Superior & Boston. The upper workings of the Iron Cap show leached ore, with promising ore in the lower workings, the mine having nearly a mile of openings. A crosscut from the 350' level has cut what is believed to be an extension of either the Black Hawk or Old Dominion fissures, presumably the former, considerably leached, but with indications of good ore at a little greater depth, this being circa 14' wide, with a paystreak of 20" to 24" of commercial ore. The company plans locating a new 3-compartment shaft, early 1909, and shipped, circa August, 1908, to the Old Dominion smelter, some ore returning net values of $8.08 per ton.

The Fumarole group, of 15 claims, circa 10 miles south of Safford, shows an oval ore body, circa 125x160' in extreme area, with a 700' two-compartment shaft, near the centre, having levels opened at depths of 200' and 500', with about a quarter-mile of workings. Apparently the Fumarole has a pipe vein, carrying gold in a disintegrated quartz gangue, ore assaying $5 to $16 gold per ton. Active development is in progress at the Fumarole.

The Copper Ridge group, 8 claims, area 160 acres, lying on the northern bank of the Gila river, circa 7 miles west of Kelvin, shows 3 veins, in a mineralized zone of circa 500' width, opened by an old 130' shaft. The Copper Peak group, on the northern bank of the Gila River, circa 2 miles southwest of the Copper Ridge, has a 100' tunnel in conglomerate. Apparently both of the Pinal county properties are idle.

NATIONAL MINING & INVESTMENT CO. **MONTANA.**

Mine office: Butte, Silver Bow Co., Mont. Is said to hold an option on a controlling interest in the stock of the Farrell Copper Co.

NATIONAL MINING & MILLING CO. **COLORADO & WYOMING.**

Dead. Formerly at Pearl, Larimer Co., Colo. Fully described Vol. VI.

NATIONAL MINING & SMELTING CO. **MONTANA.**

Dead. Changed title, 1906, to New York & Saltese Copper Mining Co. Formerly at Saltese, Missoula Co., Mont.

NATIONAL RADIUM & COPPER CO. COLORA

Dead. Formerly at Denver, Denver Co., Colo. Described Vol. VI.

NATIONAL SMELTING CO. MEXI

Office: 2030 Land Title Bldg., Philadelphia, Pa. Mine office: Cha huites, Sombrerete, Zacatecas, Mex. L. H. Taylor, Jr., president; Richar Park, vice-president; Paul W. Meyers, secretary; John J. Little, treas preceding officers, John P. Logan, Clarkson Clothier and John P. Whi directors; Theo. Montgomery, general manager; John M. Bell, mine sup tendent; Albert R. Wores, smelter superintendent; Henry Carnaghan, superintendent. Organized March 27, 1906, under laws of Maine, with cap zation $1,000,000, shares $5 par; issued, $389,375. Formerly had a $1 bond issue, at 6%, which has been converted into stock, at par. Divi 1907, were $14,000. The company reports that it has no debts or liabi other than outstanding capital stock, and that properties are free from incumbrances. Annual meeting, first Monday in June.

Lands, 194 pertenencias, held through a Mexican incorporation, kno the Compañía Minera y Beneficiadora de Minerales de Chalchihuites, There also are 38 acres of mill and smelter sites and sundry water r mining lands being in 10 groups, in the Sombrerete district.

The property shows limestone, with frequent intrusions of eruptive carrying fissure veins in the eruptives, and contact deposits between ig rocks and limestone, and in limestone near the point of contact. Ore are mainly in silver-lead.

The company's mines consist of the Colorado silver-lead mine, San silver mine, Anaconda mine of iron ore flux, Esplendida gold mine, El and El Tigre silver-gold mines, Estufa silver-lead mine, Constancia silv mine, Santa Rita de Las Boas mine, and stock control of the Núngano lead-copper mine. The company has state concessions exempting it taxation and granting various privileges.

The Anaconda mine shows a 36′ vein, mined open-cast, carrying so averaging 2.5 to 3% copper. The Núngano has an ore body of 6′ to 15′ developed for 120′ in length and 160′ in depth, giving ore of 2.5 to 3% tenor, opened by shafts of 30′, 60′ and 160′, and by tunnels of 250′ an being estimated to show 100,000 tons of ore, which seems high. The mines carry silver-lead ores, mainly auriferous, ranging in tenor from 45% lead, 10 to 50 oz. silver and $2 to $5 gold per ton. The mines ha tensive openings, but were not developed in a systematic manner, b former owners, having been opened in the Seventeenth Century, and, taken over by present company, July, 1906, had been worked, from 1850, in a small way, by local owners, the mines being operated exclu by hand-power, with malacates, and the ores reduced in adobe smelters.

Equipment includes a 30-h. p. producer gas engine, with malacates a different mines for hoisting, and stoping is entirely by hand. Buildings, 20 in number, mainly of timber and adobe, include a 20x20′ carpente 50x60′ machine-shop and 20x25′ smithy.

The concentrator, of wood and iron, of 60 tons daily capacity, 14x17″ Dodge crusher, 2 pairs of rolls, 3 New Century jigs, 2 Standar centrating tables and settling tanks.

The smelter, at Chalchihuites, is 2 to 12 miles from the various receiving ores by burros and wagons. Equipment of the smelter incl brick stall calciners, a 10-ton reverberatory furnace and 40-ton and water-jacket blast-furnaces, latter working interchangeably on lead and ores. The smelter has circa 125 tons daily capacity, product bei lead-silver bars, with some copper matte averaging about 45% co

and 2 oz. gold per ton, sent to the Aguascalientes smelter for re-
e works do a general custom smelting business.
mpany, in its short career, has met with a variety of misfortunes,
involved in legal difficulties upon the completion of its smelter.
adjusted, temporarily, in September, 1906, but in June, 1907, new
ose, and were adjusted February, 1908, leaving the company free
and in full legal possession of its properties, but without working
resumption.

L SMELTING & REFINING CO. **NEW MEXICO.**

Formerly at Lordsburg, Grant Co., N. M. Described Vol. V.

OPPER CO. **MICHIGAN.**

68 Devonshire St., Boston, Mass. Mine office: Delaware Mine, Co., Mich. M. Augustus O'Neil, president; F. W. Morandi, secre-reasurer. Lands, 480 acres, being the South ½ of Section 3 and ¼ of Section 10, Town 58 North, Range 30 West. A little work on a fissure vein crossing the ashbed, 1852-1855, company levying s of about $39,000. Since idle.

OPPER MINING CO. **NEVADA.**

Reno, Nev. Mine office: Yerington, Lyon Co., Nev. Benj. Cur-ent; H. Pennington, vice-president; Sophia Knox, secretary and preceding officers, John Pothoff, Theresa Pennington and F. B. King, Organized under laws of Nevada, with capitalization $500,000, ar. Lands 3 miles west of Yerington, said to be near the Bluestone, l to have an 8′ vein, carrying auriferous and argentiferous copper ree gold, opened by 3 short tunnels, longest, 185′.

OPPER MINING CO. **NEW MEXICO.**

Succeeded, 1907, by Native Copper Mining & Smelting Co. For-Hanover, Grant Co., N. M.

OPPER MINING & SMELTING CO. **NEW MEXICO.**

nd mine: Hanover, Grant Co., N. M. Organized 1907, under laws exico, with capitalization $5,000,000, as successor of Native Copper

MINERA NATIVIDAD. **PERÚ.**

ffice: Morococha, Junín, Perú. Nicholás Azalia, manager; Manuel uperintendent. Employs 114 men. Organized 1895, under laws of ds, 4 pertenencias, showing a vein with northeast and southwest ed by a 360-meter tunnel, with upper workings practically barren, elow the barren zone by very evenly mineralized ore that is mainly e and tennantite, associated with pyrite. For first 9 years of opera-ge smelter returns were 21.65% copper and 530 grams silver per with a total production of 2,988,300 kilograms fine copper, and ams fine silver. Production, 1904, was circa 2,400 metric tons of elding 1,058,108 lbs. fine copper.

G MINING CO. **MICHIGAN.**

nd mine: Houghton, Houghton Co., Mich. Thos L. Chadbourne, o Dec. 31, 1871, old company of this name had levied assessments Lands, 400 acres, being the N. ½ of Section 3, and the N. ½ of ection 3, Town 54 North, Range 34 West. Has a 112′ shaft, sunk ince idle, until 1907, when diamond drilling was begun. Property that it should carry the southern extension of the Pewabic lode y.

RG FALUN COPPER MINES & WORKS, LTD. **SWEDEN.**

25-35 New Broad St., London, E. C., Eng. Mine office: Falun, pparbergslän, Sweden. *J. Lee*, chairman; R. W. Blackburn,

secretary. Organized July 5, 1907, under laws of Great Britain, with capitalization £100,000, shares £1 par, in 20,000 A shares and 80,000 B shares; issued, £5,200, in A shares. Production, 1902, under old ownership, was 361,800 kilograms of low grade copper matte.

NAVY GOLD & COPPER MINING CO. **WASHINGTON.**

Mine office: Orient, Ferry Co., Wash.

NEEDLES EYE COPPER MINING CO. **CALIFORNIA.**

Letter returned unclaimed from former mine office, Needles, San Bernardino Co., Cal. Organized May, 1907. Lands, 11 claims, circa 7 miles from Needles, having a 100′ shaft, said to show a little good ore. Company apparently has claims also in Dulzura, Rawhide and other mining camps in the southwest. Apparently organized mainly to sell stock.

NEEDLES SMELTER. **CALIFORNIA.**

Owned by Arizona-Mexican Mining & Smelting Co.

NELSON COPPER FIELDS, LTD. **BRITISH COLUMBIA.**

Dead. Formerly at Nelson, Kootenay district, B. C. Described Vol. VII.

NELSON COPPER MINING CO. **NEVADA.**

Dead. Formerly at Amos, Humboldt Co., Nev.

NELSON COPPER SYNDICATE, LTD. **BRITISH COLUMBIA.**

Mine office: Nelson, Kootenay district, B. C. Organized January, 1905, under laws of British Columbia, with capitalization $10,000, shares $100 par. Idle and apparently moribund.

MINAS DE COBRE DE NERVA, S. A. **SPAIN.**

Office: Madrid, Spain. Mine office: Valverde del Camino, Huelva, Spain. Sr. Don Andres Mellerdo, president; Marquess de Portago, vice-president; E. Sanchez Ocaño, secretary; J. J. C. Fernan, general manager; Chas. Haase, smelter superintendent. Organized April, 1907, under laws of Spain, with capitalization 20,000,000 pesetas, in 250,000 shares of 50 pesetas par, fully paid, and 15,000 shares of 500 pesetas par in deferred stock. Dividend rate is 4% for 3 years on the preferred shares. Company reports three dividends of 2 pesetas each, for three half-years ending Dec. 31, 1907, amounting to 750,000 pesetas.

Lands, formerly held by Arenillas Copper Mines, Ltd., which was liquidated May, 1904, include the Chaparrita group, in the commune of Nerva, and the Ratera group, 8 kilometers from a railroad station. Company reports that its ores are cupriferous pyrites, averaging 3.5% copper, which estimate is considered excessive. Company reports steam plants of 250 h. p. at the mines and 400 h. p. at the smelter.

The company reports a 300-ton smelter, 2 miles from the mine, receiving ore by rail, having 2 water-jacket blast-furnaces, with a converter department having one stand, turning out blister copper of 98% tenor, carrying small quantities of silver, the works doing custom smelting also.

The company reports that its mine is served by its own 5-mile branch railroad, to Buitron. The company reports that production for 1906 was nil, but says nothing about production for later years.

The prospectus issued by this company, or by some other person interested in pushing its shares, was most misleading. The compiler of the prospectus in question secured, presumably by accident, a photograph of the village at the mines of the Compañía del Castillo de las Guardas, showing a hospital, etc., and printed a reproduction of this photograph in the prospectus, but the Castillo de las Guardas mines are 150 kilometers from La Ratera. The same careless compiler of prospectii also secured a photograph showing the shipping facilities of the Sotiel Coronada mine, instead of the Nerva, and *this also* appeared in the prospectus. Under these circumstances, and because

e capitalization, the company is viewed with suspicion, notwithe fact that its president is a senator of the Spanish Cortes, and ident a member of the Spanish grandezza.

GOLD & COPPER MINING CO. **NEVADA.**

402 Majestic Bldg., Denver, Colo. Letter returned unclaimed r mine office, Ely, White Pine Co., Nev. David J. Reed, president; lerson, vice-president; Albert L. Hiller, secretary and treasurer; fficers, Dr. C. S. Roberts and Geo. A. Huestiss, directors. Organ- laws of Arizona, with capitalization $3,000,000, shares $1 par. ide the Portland group, 6 claims, area 440 acres, in the Ely dis- claims in the Bullfrog district, and company is said also to have Searchlight. Cannot be learned that any work is in progress, and pparently was promoted mainly to sell shares.

NN & CO. **CAPE COLONY.**

ffice: O'okiep, Little Namaqualand, Cape Colony. Did some de- work on copper lands, circa 1903. Presumably idle.

BELL COPPER MINING & REDUCTION CO. **NEVADA.**

Formerly at Lovelock, Humboldt Co., Nev. Fully described Vol. VI.

BLACKHORSE MINING CO. **NEVADA.**

returned unclaimed from former mine office, Black Horse, White Nev. Organized circa April, 1907. Idle and apparently moribund.

BONANZA COPPER CO. **NEVADA.**

care of Freeman Morningstar, president and general manager, City, Utah. Mine office: Aurora, Esmeralda Co., Nev. Lands, 15 rtly west of the Ludwig mine, showing ore assaying 5 to 15% $4.15 gold per ton.

BRITON MINING CO. **NEVADA.**

care of Alfred Fletcher, president, Leeds, Eng. Letter re- laimed from former mine office, Golconda, Humboldt Co., Nev. ker, general manager; Wm. F. Fletcher, secretary. Capitalization shares $1 par. Lands, sundry claims, known as the Chief of the , in the Cherry Creek district, west of the Adelaide Star Mines,

BUNKER HILL MINING CO. **NEVADA.**

Elko, Nev. Mine office: Bullion, Elko Co., Nev. Employs 8 Johnson, president; W. W. Booker, vice-president; Frederick Davis, nd general manager; John Henderson, treasurer; preceding officers, and Chas. E. Van Barneveld, directors. Organized Apr. 28, 1905, of Navada, with capitalization $2,000,000, shares $1 par. 20 claims, area circa 320 acres, 10 miles from a railway and about uth of Elko, showing argentiferous and auriferous copper, lead, ron sulphides. Has a 15-h. p. gasoline air-compressor. In 1907 2 tons of ore to Salt Lake smelter, securing therefrom average irca 6% copper, 12% lead, 6% zinc and 20 oz. silver per ton. Com- continuous development and production.

CALIFORNIA PROSPECTING CO. **CALIFORNIA & NEVADA.**

returned unclaimed from former office, Hall St., Goldfield, Nev. Greenwater, Inyo Co., Cal. Robt. T. Todd, president; Milton M. president; T. F. Carney, treasurer; J. B. Hainer, secretary; pre- rs. Lewis W. Aubury, N. M. Willett and Leonard Merrell, directors. nder laws of Nevada, with capitalization $240,000, shares $240 , 27 claims, circa 30 miles west of Goldfield, 6 claims in the Tule 10 claims in the Greenwater district. Presumably idle.

CALUMET COPPER MINING CO. **NEVADA.**

52 *Journal Bldg., Boston, Mass. Mine office:* Buckskin, Lyon Co.,

Nev. John D. Kazar, president and general manager; Francis E. Higgin vice-president; John O. Brigham, secretary; Chas. E. Hayes, treasurer; pr ceding officers, Arnold Schaer, Henry A. Stearns, Thos. Malcolm, Geo. W Dryden and Wm. E. Blanchard, directors; Philip J. Stacey, superintendent Arthur Prill, engineer. Organized May 4, 1907, under laws of Arizona, wit capitalization $200,000, shares $5 par.

Lands, 22 claims, unpatented, area circa 440 acres, 6 miles northeast of Buckskin and circa 10 miles northwest of Yerington, showing diorite, porphyry and silicious limestone, carrying 3 contact deposits with gossans estimated as averaging 12′, 30′ and 40′ in width, and traceable 500′ to 1,200′, of which two, under development, opened by vertical shafts of 60′ and 200′, show cuprite, malachite, chalcocite and chalcopyrite, giving assays of 4 to 6% copper and $5 to $8 gold per ton.

Equipment includes two 25-h. p. gasoline hoists, good for 600′ each and 5 mine buildings, including a 20-room boarding house. Company plans continuous development and deepening both shafts to 500′. While no great quantity of ore has been developed as yet, the cappings are wide and promising, and if the company continues development, its prospects of finding a mine are considered fair.

NEVADA CARBONATE COPPER MINING CO. NEVADA.

Letter returned unclaimed from former office, Globe, Ariz. Mine office: Siegel, White Pine Co., Nev. D. A. McCarthy, president and treasurer; A. J. Rieman, vice-president; M. E. Brooke, secretary. Organized Oct. 10, 1906, under laws of Arizona, with capitalization $1,000,000, shares $1 par. Lands, 120 acres, adjoining the Vulcan, having a 33′ tunnel.

NEVADA CENTRAL COPPER CO. NEVADA.

Office: 157 Michigan Ave., Chicago, Ills. Mine office: Palisade, Eureka Co., Nev. Col. Chas. Lay, president; Geo. W. Leighton, vice-president; Robt. L. Benson, secretary and treasurer; preceding officers, Wm. Andrews, Jos. D. Wright, John A. Saull and Edwin L. Wilson, directors. Organized under laws of District of Columbia, with capitalization $1,000,000, shares $10 par, in $750,000 preferred non-cumulative 7% stock and $250,000 common stock.

Lands, 10 claims, area 200 acres, in the Antelope district, on the western slope of the Sulphur Mountains, opened by a 130′ shaft, showing ore said to give average assays of 21% copper. There is some litigation over titles, but company seems likely to win out. Property formerly was held by Whalen Consolidated Copper Mining Co., for which Wm. Whalen, while president, secured large sums, but did little work. Whalen eventually was driven out by shareholders, but not until he had destroyed the standing of the company, so that it went to pieces in 1903. Whalen is in prison at San Quintin, California, sentenced to 10 years for swindling women of Sacramento and Minneapolis out of about $8,000, on alleged gold mines at Alpha, this being Whalen's second sentence, as he served 5 years in the Missouri penitentiary. The company has taken action in the Federal courts against Davies and others. The company seems to be making a brave fight against considerable odds. Only development work was in progress at last accounts.

NEVADA CENTRAL GOLD & COPPER CO. NEVADA.

Mine office: Pioche, Lincoln Co., Nev. R. D. Montgomery, secretary and treasurer; L. F. Peer, manager. Lands adjoin the Nevada Horn Silver Mining Co., in the Bristol district, and property was under development at last accounts.

NEVADA CHAMPION COPPER CO. NEVADA.

Office: care of J. C. McCormick, president, Goldfield, Nev. Mine office: *Mina*, Esmeralda Co., Nev. E. J. Amann, vice-president; C. M. Miller, secretary; F. M. Dorsey, treasurer; J. F. Meikle, general manager; preceding

rs and A. E. Beetles, directors; Geo. Oswell, superintendent. Organized February, 1907, under laws of Arizona, with capitalization $500,000, s $5 par.

Lands, 7 claims, area 130 acres, 9 miles northwest of Mina, carrying a 6' 5' contact deposit between limestone and quartzite. Has a 400' three com ment shaft, planning to be sunk to 700', and about 15 other shallow shafts, and tunnels, showing ore assaying 3.7 to 11.2% copper and up to 6 oz. r per ton. Sulphides were encountered at depth of circa 300'. Has con rable ore on the dumps, ranging 2 to 3% only in copper tenor. Is claimed ave contracted to furnished 100,000 tons of ore to a new smelter, but elopments scarcely seem adequate to warrant such a contract.

VADA-COLORADO COPPER CO. **NEVADA.**

Office: Colorado Springs, Colo. Letter returned unclaimed from former e office, Yerington, Lyon Co., Nev. Lands, 19 claims, near the Ludwig, to have been bought for circa $30,000. Idle.

VADA-COLORADO GOLD & COPPER MINING CO. **COLORADO & NEVADA.**

Office: care of B. Ross, general manager, Denver, Colo. Mine office: ho Springs, Clear Creek Co., Colo. Grant L. Hudson, president; Ben K. fy, vice-president; Robt. H. White, secretary. Capitalization, supposedly 00,000, shares $1 par. Lands, 7 claims, on Chicago Mountain, near Idaho ings, and 10 claims and a millsite in the Walker Lake district of Nevada. Colorado property has a 200' tunnel. Early 1908 was developing Colorado perties only.

VADA-COMMONWEALTH MINING & MILLING CO. **NEVADA.**

Office: 502 Hall Bld., Kansas City, Mo. Mine office: Galena, Lander , Nev. J. B. Hamner president; W. F. Miller, secretary and treasurer; W. Clapp, general manager; Jas. W. Boileau, engineer. Organized 1906, er laws of Arizona, with capitalization $10,000,000, shares $1 par, prac lly all issued.

Lands, 29 claims, 1 patented, area circa 400 acres, [illegible] wing 8 ore bodies, reported as fissure [illegible] 35' average width, of which 3 [illegible] rage of 1% copper, 1% lead, 5% [illegible] . A new ore body showing [illegible] give average assays of 6% copper [illegible] ton.

Development is by a shaft of [illegible] h about 5,000' of workings, [illegible] ut 500,000 tons blocked [illegible] is argentiferous and [illegible] sulphides, badly mixed [illegible]

Equipment includes a [illegible] ral mine buildings.

The mill, 70x150', of wood, [illegible] a 9x16" Blake crusher, 4 [illegible] g of the mill running [illegible]

The mine shipped [illegible] tons of low grade [illegible] and silver, with [illegible] g to low prices [illegible] hopes for [illegible]

ADA CONSOLIDATED COPPER CO. **NEVADA.**

Office: City Investing [illegible] Co., Nev. Jas. Phillips, [illegible]

G. M. Borden, secretary; preceding officers, W. Hinckle Smith, M. L. Col. Chas. Hayden, Wm. B. Thompson, F. W. Hills and J. K. MacGow rectors; Pope Yeatman, general manager; Jos. Gazzam, local manager; W. Cox, general superintendent; E. F. Gray, mine superintendent; Pe McCracken, chief engineer.

Organized Nov. 17, 1904, under laws of Maine, as a merger of the & Nevada Copper Co. and White Pine Copper Co., with capitalization $5,0 shares $5 par, increased, Feb. 5, 1908, to $8,000,000, shares $5 par, in being made to provide for retirement of a $3,000,000 issue of first-mo 6% convertible gold bonds, dated Apr. 1, 1908, due April, 1918, convertibl shares, at any time prior to Apr. 1, 1913, on the basis of $10 per shar redeemable, by company, at par, on one month's notice. Ended fiscal Sept. 30, 1908, with $793,940 in cash and call loans, with $178,152 in ac payable, and expenditures, to that date, aggregated $4,481,208. Stock is on the Boston Stock Exchange and New York Produce Exchange. Bosto Deposit & Trust Co., transfer agent. Annual meeting, first Tuesday vember.

The Nevada Consolidated is controlled by the Guggenheim int through their control of the American Smelting & Refining Co., through by latter of the American Smelters Securities Co., which controls the N Consolidated Copper Co., through the ownership of 51% of the stock issue

The company controls, through stock ownership, the Nevada No Railroad, circa 90 miles in length, running from Ely to Cobre Station, Southern Pacific Railway. Company also owns a half interest in the S Mining & Smelting Co., and a large share interest in the Cumberland-E par value of stock held in subsidiary companies, Sept. 30, 1908, being $4,8 The company's financial arrangements with the subsidiary and affiliate panies are not as clear as might be desired, and the reason for some juggling with shares and bonds, between the Nevada Consolidated, C land-Ely and subsidiary corporations, is not readily apparent.

Lands, 63 claims, partly patented, area circa 850 acres, being the group of 27 claims and the Ruth group of 36 claims. The company too the Chainman property, but surrendered it later.

Lands include properties formerly held by White Pine Copper Co. York-Nevada Copper Co., and sundry other corporations and individuals company also owns the Georgetown Ranch, area circa 320 acres, including able water-rights on Murray Creek, which carries a flow of 4,000,000 daily, assuring an ample water supply.

The company's mineral lands show an outcrop of gray sintery carrying occasional copper carbonates. One portion of the tract shows treme width of 2,000' of these croppings, below which, at a depth of circ are found low-grade ores in the original plutonic quartz-porphyry, the above being quite thoroughly leached. The upper workings show mel and chalcocite, changing at depth to sulphides, mainly disseminated chal with some chalcopyrite, associated with pyrite, in fine seams, and as a of the gangue rock, also occurring as speiss, disseminated through the mass. The ore body is without defined walls, the entire country rock impregnated by ore to a greater or less extent. The mine water is st impregnated with copper, causing trouble with pumps and pump-columns. mates of ore in sight vary greatly, but the tonnage is enormous. It wa mated, November, 1907, by Mr. Yeatman, a competent authority, th mine had in sight 14,432,962 tons of ore averaging 2% copper, with con gold and silver values of circa 15 cents per ton, and, at the end of 19 mine had blocked out nearly or quite 20,000,000 tons of ore.

The Ruth group includes the Ruth and Star Pointer mines, operate

he mines being connected by a 2,700' tunnel, with an extensive electric
e system, with practically all hoisting done through the Star Pointer
It is planned to use the caving system in the Ruth mine, as the ore is
nd can be broken cheaply. The Ruth has an incline shaft of circa 640'
, showing large bodies of low and medium grade ore, with a marked
ncy toward decreased values at depth, leading to the opinion that the
may have reached the bottom limit of payable ore. Mr. J. Parke Chan
estimated this mine, in 1903, to show 2,400,000 tons of ore, averaging
copper, 0.05 oz. silver and 0.02 oz. gold per ton, and the ultimate amount
e available in the Ruth obviously will be much greater than the original
mate. Surface improvements at the Ruth include an engine-house, board-
ouse, office, stable and numerous dwellings.

The Star Pointer mine has a mammoth 4-compartment shaft, of 3,500 tons
mated daily capacity. This great shaft has a timber compartment 9'
he clear, handling loaded timber cars on cages. The shaft has a 140' steel
igeur, on concrete foundations, perhaps the largest in the world, and the
pment includes a crushing plant.

The Eureka mine, or group of mines, shows ore of somewhat lower average
e than the Ruth group, though in larger tonnage, careful sampling of
ch, in 1905, gave average assays of 2.2% copper, 0.63 oz. silver and 0.02 oz.
l per ton. This group has 2 shafts, one being the Eureka, with vertical
th of 400', bottomed in poor ore, the other shaft being known as the Star
the West, but the Eureka group is being worked open-cast, by steam-shovel.
ore is very soft, but requires blasting, and holes of 50' to 670' depth are
led for the explosives, each blast breaking tremendous quantities of ground.
re are five 95-ton steam-shovels, with dippers of 2½ cu. yds. capacity, to
replaced by shovels with dippers of 5 cu. yds. capacity. In November, 1908,
one day, there was removed, by steam-shovels, 9,680 tons of overburden
l ore, of which circa 3,500 tons was ore. It is probable that the Eureka
up has little less than 20,000,000 tons of ore in sight, with every prospect
a much larger tonnage eventually.

Ore is milled and smelted by the Steptoe Mining & Smelting Co., a sub-
iary corporation, the works of which are separately described, under the
le of that company.

The Nevada Northern Railway Co., controlled by the Nevada Consolidated
pper Co., has a standard-gauge line of circa 90 miles length, running from
y to a junction with the Southern Pacific Railway at Cobre Station, 3 miles
st of Toano. Capitalization of the railway company is $3,000,000, with a
000,000 bond issue, at 5%. This line does a large general business, in addi-
n to handling the traffic of the Nevada Consolidated and affiliated companies.

Production for 1908, begun early in the year, was circa 20,000,000 lbs.
ally, for the Nevada Consolidated and Cumberland-Ely, of which the Ne-
da Consolidated had a major portion, and for August, 1908, the Nevada
nsolidated produced 785,706 lbs. fine copper. For September, 1908, the
mpany produced circa 46,000 tons of ore, putting about 12 into 1, ore assay-
g 2.7% copper and yielding an actual extraction of 69.3% of the assay
lues. The company hopes to make circa 25,000,000 lbs. fine copper in 1909,
d eventually production should be much larger. Finished product is handled
the American Smelting & Refining Co., on a 1% commission basis.

The Nevada Consolidated is a property of the first magnitude, and mining
s are said to be as low as 40 cents per ton, for steam-shovel ore. The prop-
has not been developed as rapidly as was anticipated at the time of or-
ization of the company, but the work has been well done, and there is no
stion about the great future of the mine.

NEVADA CONSOLIDATED COPPER & GOLD MINING & MILLING CO. NEVA

Dead. Formerly at Yerington, Lyon Co., Nev. Described Vol. VI.

NEVADA CONSOLIDATED EXTENSION CO. NEVA

Office: 475 Broadway, New York, N. Y. Mine office: Ely, White P Co., Nev. Organized circa 1907, under laws of Arizona, with capitaliz $1,000,000. Presumably idle.

NEVADA CONSOLIDATED MINES, LTD. NEVA

Dead. Reorganized, circa 1907, as Philadelphia Searchlight Gold & Co Mining Co. Formerly at Searchlight, Lincoln Co., Nev.

NEVADA CONSOLIDATED MINES & SELLING CO. NEVA

Office: 316 Lick Bldg., San Francisco, Cal. Alex Brown, president; C L. Newton, vice-president; F. G. Carey, treasurer. Lands are said to be Cat Creek, in Esmeralda county, Nevada, and company claims over 4,000 workings, which seems doubtful, and is said to plan a 100-ton concentra Officers are said to stand well, but the company's advertising is not liked.

NEVADA CONSOLIDATED SMELTING & REFINING CO. NEVA

Letter returned unclaimed from former office, 201 Exchange Bldg., Den Colo. Works office: Pioche, Lincoln Co., Nev. Wm. Gelder, manager. practically a subsidiary corporation of the Bristol Copper Mining Co., s reorganized, and stock is said to have been furnished gratis to shareho of the latter. Property is a 200-ton smelter and a 22-mile narrow-gauge road. At last accounts was in debt and moribund.

NEVADA COPPER CO. NEVA

Office: 372 Bullitt Bldg., Philadelphia, Pa. Operating office: Tono Nev. Mine office: Mina, Esmeralda Co., Nev. John W. Brock, presid Chas. R. Miller, vice-president; C. A. Higbee, secretary and treasurer. L near the Blue Light mine, include the Dunlap property. Company declined furnish a statement, September, 1908, and presumably is idle.

NEVADA COPPER CO. NEVA

Office and mine: care of W. K. Robinson, secretary, Goldfield, Esmera Co., Nev. Organized 1907, under laws of Arizona, with capitalization $2,000,0 shares $1 par. Lands, 4 claims, including the Blue Jay and Gold Coin, circa miles northwest of Goldfield, said to show argentiferous cuprite averaging copper. Presumably idle.

NEVADA COPPER CO. NEVA

Dead. Merged, 1902, in Nevada Bell Copper Mining & Reduction Formerly at Lovelock, Humboldt Co., Nev. Described Vol. II.

NEVADA COPPER CO. NEVA

Mine office, Sandy, Lincoln Co., Nev. N. M. McFatridge, presid Lands, 13 claims, showing an auriferous copper vein, assaying up to copper and $20 gold per ton, paralleled by a silver-lead vein, showing assay values up to $150 per ton, opened by a 90' shaft. A small smelter ment, circa 1906, to El Paso, gave returns of 50% copper, with gold and s values. Idle.

NEVADA COPPER CO. NEVA

Mine office: Yerington, Lyon Co., Nev. Lands are said to show a of 60' to 100' width, opened by a 330' main shaft. Company is said to the old Boston & Nevada smelter, across the river from Yerington. Idle apparently moribund.

NEVADA COPPER CO. NEVA

Letter returned unclaimed from former mine office, Ely, White Pine Nev. Organized, 1906, by residents of Spokane, Washington. Lands 12 claims, adjoining the Vulcan, said to carry carbonate and sulphide per ores.

.DA COPPER BUTTE MINING CO. **NEVADA.**

ffice: 2376 Mission St., San Francisco, Cal. Letter returned unclaimed former mine office, Austin, Lander Co., Nev. J. Herbert Reeve, presi- A. L. Hanson, vice-president and treasurer; Peter McAuslan, secretary; ling officers, H. W. Matthews and F. A. Limbaugh, directors. Organized 18, 1906, under laws of Nevada, with capitalization $500,000, shares 50 par.

ands, 5 claims, area 100 acres, in Trenton Cañon, near Valmy, in the Mountain district, said to show a vein of argentiferous and auriferous r ore up to 90′ in width, opened by tunnels of 40′, 50′ and 60′, yielding ssaying up to 11.2% copper, 10 oz. silver and $2.20 gold per ton. Pre- ly idle.

ADA COPPER MINING & SMELTING CO. **NEVADA.**

)ffice: 806-25 Broad St., New York, N. Y. Mine office: Cuprite, Esmer- Co., Nev. Col. Oliver P. Posey, president; Hon. W. E. Mitchell, vice- lent; W. M. Hoagland, secretary and treasurer; preceding officers, Wm. y, R. F. Stewart and Edwin B. Tustin, directors. Organized Aug. 28, under laws of Maine, with capitalization $5,000,000, shares $5 par. Owns trolling interest in the Lida Thanksgiving Gold Mining Co., at Lida, Nev. Lands, 85 claims, area circa 1,700 acres, in 3 groups, circa 4 miles apart, ling the Cuprite group of 50 claims, the Rea group of 20 claims and the t group of 15 claims. Company also owns a townsite. The Parrot group, ly developed by shafts of 55′ and 70′, is said to show a 12′ vein of ore ging 10 to 15% copper, which is doubted. Ores are said to carry copper, silver and gold.

Early 1907 the company planned building a 500-ton smelter, and at last nts was talking of building a smelter at Mina, Gillies, Goldfield, or else- e. Financial statement, as of date Aug. 1, 1907, gave total receipts of 95, with expenditures leaving a balance of $202,013, mainly in form of receivable, and a stockholders' committee has been appointed, to investi- the company, on an accusation of making fraudulent claims. Company arded with suspicion.

ADA COPPER, PLATINUM & NICKEL CO. **NEVADA.**

ffice and mine: Bunkerville, Lincoln Co., Nev. Property is the Great rn group, with about one-fourth mile of openings, said to show ore av- g about 4% copper, 2.5% nickel and one-third oz. platinum per ton. Pre- ly idle.

ADA COPPER QUEEN MINING & MILLING CO. **NEVADA.**

ffice: care of Raymond D. Frisbie, fiscal agent, Tonopah, Nev. Letter ed unclaimed from alleged former mine office, Mina, Esmeralda Co., Nev., notation from postmaster that no such company is known there. Lands ed were 5 claims, 7 miles northwest of Mina. Is not regarded favorably.

ADA DEVELOPMENT CO. **NEVADA.**

)ffice: 201 Walnut Place, Philadelphia, Pa. Mine office: Lovelock, Hum- Co., Nev. Theo. H. Lowe, superintendent, at last accounts. Lands are opper Glance group and adjoining claims. Idle several years.

ADA-DOUGLAS COPPER CO. **NEVADA.**

)ffice: 60 State St., Boston, Mass. Operating office: 306 Auerbach Salt Lake City, Utah. Mine office: Yerington, Lyon Co., Nev. Em- 60 men. J. D. Wood, president; Frank J. Hagenbarth, vice-president; r C. Orem, secretary and general manager; Windsor V. Rice, treasurer; ling officers, A. J. Orem, H. P. Henderson, E. R. Hastings, Frank A. er and Arthur L. Pearse, directors; S. S. Arentz, superintendent; C. S. , engineer. Organized Sept. 4, 1906, under laws of Utah, with capital- $5,000,000, shares *$5 par; issued, $3,750,000.* Debentures, $600,000 6-pct.

mortgage 5-year 6% convertible bonds, issued May 1, 1908, convertible in stock on basis of $7.50 per share. Of the 250,000 shares remaining unissued 80,000 have been set aside for conversion and redemption of bonds. Of the bond issue $500,000 was issued to pay balance due on the Ludwig mine.

Lands, 30 claims, area circa 550 acres, also 80 acres in two millsites, with miscellaneous lands, including water-rights, giving total holdings of circa 700 acres, in the Buckskin district. Property includes former holdings of the Douglas Copper Mining Co. and Ludwig Copper Mining Co. The original group of 11 claims formerly was owned by the Douglas Copper Co., these and adjoining claims, circa 7 miles west of Yerington, lying at an average elevation of one mile above sea-level. The Ludwig group included 2 patented claims and 3 claims formerly in conflict with the Nevada-Douglas. There also is one claim carrying fluxing iron ore, at Buckskin, several miles distant.

The property shows granite-porphyry and wollastonite, carrying fissure veins and contact deposits, and is said to have 3 different intersecting ore systems. The principal ore bodies consist of contact metamorphic deposits, with quartz fissures carrying oxidized ores and cupriferous pyrite, mainly in wollastonite, walls being strongly impregnated with ore. The property shows very strong and promising gossans, the surface carrying low grade oxidized ores of about 2% copper tenor, followed by low grade garnetiferous sulphide ores of circa 3% tenor, and, at depth, by sulphide ores of 5 to 6% copper tenor. At surface and to depth of circa 10' the property shows oxidized ores and chrysocolla, succeeded by a secondary zone carrying oxidized ores and secondary sulphides. The zone of oxidation and secondary enrichment apparently extends to depth of 500', giving an ore zone of 100' to 400' thickness, in wollastonite, with claimed superficial area of 1,800,000 square feet, or approximately 42 acres, in addition to strong gossans showing elsewhere on the property. The principal ore body is chalcopyrite, associated with pyrite, in granules, in wollastonite. The vein system has a generally meridional strike, with average dip of circa 60°, and the 3 principal veins, of about 20' average width, are estimated by company to carry an average of 6.5% copper.

The Douglas mine has a number of shallow shafts and open-cuts, in addition to the main workings, which include the 2,500' Douglas tunnel, planned to cut the main ore body at a vertical depth of circa 600', and 3 shafts, known as the Sunlight, Double Ess and Amalgamated, latter vertical. The mine as a whole has about 7,500' of workings, showing large quantities of sulphide ore, with circa 150,000 tons of 3% ore blocked out, latter in the upper levels, with high grade ore ranging 10 to 30% in copper tenor. Ore has been proven to a depth of 700' below the base of the mountain, and the lower levels show a sulphide ore body ranging upwards of 300' in length and up to 80' in width, giving a general average sample of 6.5% copper and 20% iron.

The Ludwig mine, bought June 29, 1907, for a price said to have been $1,000,000, includes 2 claims, on which the mine is opened, and a 40-acre tract in Smith Valley having a well and pumping station. The Ludwig, about one mile northwest of the main workings of the Nevada-Douglas, is developed by a 400' vertical shaft, work by former owners being poorly planned, but the property was a shipper of small quantities of high grade auriferous and argentiferous ore for some years, production including some very handsome malachite and azurite, a portion of which was sold to lapidaries. The old ore bodies of high grade have been developed more extensively, and new ore bodies have been found, these including both oxidized ores and sulphides, with some carbonate ore assaying up to 25% copper, and a fair showing of chalcocite. The Ludwig mine was opened circa 1865, and was worked, at intervals, for bluestone and high grade copper, having been last reopened 1905.

at Ludwig's four 100-h. p. hoists, good for 1,000' depth each, and
-stage belt-driven air-compressor.
power is generated by electric power, transmitted 20 miles from
the plant of the Truckee River General Electric Co.
is secured from artesian wells in Smith Valley, brought to the
mine by pipe line.
properties have 33 buildings, including a 11x16' machine shop, 11x18'
16' carpenter shop, all of wood, also a compressor house, office, lab
dwellings.
nearest railway station is at Wabuska, 20 miles northward, on the
Mine Railway, and the company plans organizing a subsidiary co
to build a branch railway line. A wagon road has been built from
mine on the Southern Pacific Railway 6 miles west of Wabuska,
station is by fleet traction engine.
many claims milling ore to Nixon smelter, which apparently is a mo
to the amount of ore blocked out might seem to warrant
from concentrator and 250-ton smelter, would, in the end, prob
a profit, though requiring a much larger tonnage.

pur. Lands, 50 claims, area 995 acres. Company's "conservative" figu claimed millions of tons of ore in sight, with at least 1,000,000 tons of ore the Home Bee mine, said to assay 6 to 31% copper, but the information ma have been obtained by a clairvoyant, as developments do not show the ex Apparently merely a bit of stock-jobbery, and presumably idle.

NEVADA GREENWATER MINING CO. CALIFORNIA

Mine office: Greenwater, Inyo Co., Cal., Geo. Jones, superintendent. Nevada Greenwater Mining Co. was organized November, 1906, under laws o Arizona, with capitalization $2,000,000, by Marius Duvall, Jas. Gleason an T. W. Kendall, and a Nevada Greenwater Mining Co. was organized circa No vember, 1906, under laws of Arizona, with capitalization $3,000,000, by A. J. Daggs and L. Morgan Darby. Lands, in Willow Creek section of the Green water district, are said to show a 16′ vein of 16% ore, which is not true.

NEVADA GREENWATER MINING, MILLING & SMELTING CO. CALIFORNIA & NEVADA

Office: 1118-67 Exchange Place, New York, N. Y. Mine office: Green water, Inyo Co., Cal. Wallace H. Hopkins, president; T. H. McInnerney, vice-president; Thos. J. Delahunt, secretary; Maj. L. H. French, managing director. Capitalization $5,000,000, shares $5 par.

Lands, 15 claims, at Greenwater, 5 at Lida, 2 at Tonopah and 2 at Gold field, with sundry alleged Goldfield leases. The president became an embezzler and fugitive from justice, and the company is considered merely a bit of stock jobbery.

NEVADA NICKEL & COPPER CO. NEVADA

Mine office: Bunkerville, Lincoln Co., Nev. Property is the Key West group, said to have about one mile of workings, left by a former owner, said to give average assays of 5 to 6% copper, 2% nickel and 0.3 to 0.5 oz. platinum per ton. Presumably idle.

NEVADA NORTHERN COPPER CO. NEVADA

Dead. Was reorganized, circa December, 1906, as Ely Northern Copper Co. Formerly at Ely, White Pine Co., Nev.

NEVADA NORTHERN COPPER MINING & MILLING CO. NEVADA

Office: 51 Sherman St., Deadwood, S. D. Mine office: Winnemucca, Humboldt Co., Nev. Dr. Jas. A. Ogden, president; C. H. Miller, vice-president; G. S. Harper, secretary; S. T. Arnold, treasurer; J. C. Fuller, general manager; F. W. Barbee, mine superintendent. Organized May, 1907, under laws of South Dakota, with capitalization $1,500,000, shares $1 par; issued, $115,000.

Lands, 17 claims, unpatented, area 340 acres, also a 20-acre millsite, in the Sonora range, 12 miles southeast of Winnemucca, showing 8 contact deposits, of which 4, under development, are reported as of 18′ average width, traceable circa one mile, carrying native copper, oxides, bornite and chalcopyrite, with slate gangue, estimated by company to average 15% copper, 5 oz. silver and $1.50 gold per ton, which figures are excessive. Development is by 10′ and 20′ pits, a 50′ shaft and a 330′ tunnel. Company plans continuous development.

NEVADA-PHOENIX MINING CO. NEVADA

Mine office: Beowawe, Eureka Co., Nev. P. V. Locker, manager. Lands, 22 claims, south of Beowawe, having a shallow 2-compartment shaft and a 200′ crosscut tunnel, showing a 3′ vein said to give average assays of 7.2% copper, 55 oz. silver and $16 gold per ton.

NEVADA QUEEN COPPER CO. NEVADA

Office: care of D. Chisholm, Colorado Springs, Colo. Organized 1906, under laws of Colorado, with capitalization $1,500,000. Presumably is successor to the Nevada Queen Mining Co. Location of lands, if any, unknown.

VADA QUEEN MINING CO. **NEVADA.**

Office: care of J. K. Miller, P. O. Box 1202, Colorado Springs, Colo. Never ive and presumably succeeded, 1906, by Nevada Queen Copper Co.

VADA SMELTING & MINES CORPORATION. **CALIFORNIA.**

Office: 25 Broad St., New York, N. Y. Mine office: Greenwater, Inyo Co., . Malcolm L. Macdonald, president; M. R. Ward, vice-president; Arthur Joseph, treasurer; H. L. Fridenberg, secretary; Chas. Kirchen, general nager. Organized June, 1906, under laws of South Dakota, with capitaliza- n $5,000,000, shares $5 par. Lands include copper claims at Greenwater and ld claims at Kawich, Reveille and elsewhere in Nevada. Idle at last ac- nts.

EVADA UNITED MINING CO. **NEVADA.**

Office: 51 Wall St., New York, N. Y. Mine office: Lovelock, Humboldt ., Nev. Oliver G. Jennings, president and treasurer; Louis J. Merkel, vice- esident; David R. Foster, secretary; John T. Reed, general manager; pre- ding officers, Geo. Lowther and John G. Gillig, directors. Organized May 1, 06, under laws of Arizona, with capitalization $200,000, shares $1 par; is- ed, $145,000.

Lands, 33 claims, partly patented, area circa 500 acres, also a 68-acre mill- te, in the White Cloud district of Churchill county, Nevada, showing mainly nestone, with 2 ore zones, having gossans of cupriferous hematite, carrying idized ores in the gossan, and sulphides at depth.

Development is by shafts of 40′, 60′, 70′ and 120′, and by 5 tunnels, longest 000′, with circa 4,000′ of workings, estimated to show 10,000 tons of ore, with 000 tons blocked out for stoping. Property was worked, 1871-1873, and again 90-1895, and was reopened, 1906, by present management.

Equipment includes a 160-h. p. steam plant, with hoist good for 750′ depth, d a 4-drill Ingersoll-Rand air-compressor. There are 10 mine buildings, and antiquated smelter having a 30-ton Fraser & Chalmers water-jacket blast- rnace, of no present value. Company plans continuing exploratory work, d adding new equipment as development will justify.

EVADA-UTAH MINES & SMELTERS CORPORATION. **NEVADA & UTAH.**

Office: 100 Broadway, New York, N. Y. Mine offices: Pioche, Lincoln ., Nev., Cactus, Beaver Co., Utah, and Bingham Canyon, Salt Lake Co., Utah. o. E. Learnard, president; Dr. L. R. Loomis, vice-president and manager; ederick F. Burgin, treasurer; preceding officers, John W. Griffs and Heman wd, directors; Millard W. Baldwin, clerk; Morris D. Kirk, superintendent ngham property. Organized 1904, under laws of Maine, with capitalization 500,000, increased later to $15,000,000, shares $10 par. On June 10, 1907, mpany took over the Imperial Gold & Copper Mining Co., of Beaver county, vada, and the Manhattan Copper & Gold Mining Co. and Pioche Consoli- ed Mining Co., two latter of Pioche, the Pioche Consolidated having been ght at a price said to be $425,000, less 7.5% cash discount. Debentures, 000,000, in registered 5-year 6% gold bonds, due Sept. 1, 1909, convertible, option of holders, into common stock, at par. Is said to have circa 12,000 reholders.

Landed holdings are extensive and valuable, but definite statements re- ding same have not been secured, despite repeated efforts. The company e held options on various properties, including the Montreal, in Beaver nty, Utah, which apparently were not exercised.

Landed holdings include property formerly held by the Pioche Consoli- ed, which had 38 claims, of which 33 were patented, also 51 town lots and 28 acres miscellaneous lands.

The Pioche *mine, which was a good silver-lead* property, circa 1870-1876,

and which was closed down 1893, is popularly credited with a past production of $20,000,000 in gross value. The May Day mine of this property has a 1,100' shaft, and there are 2 old shafts on the Yuba mine, an adjoining property, also the 400' Meadow Valley No. 5 three-compartment incline shaft. The old Independence shaft is said to show a 40' body of sulphide ore between the third and fourth levels. There is a 700' Leschen aërial tram from the May Day shaft to the ore-bins on the company's private railway, running from the mine to Pioche. The Pioche has a good mining equipment.

The Half Moon group of 6 claims, area 42 acres, lies circa one and one-half miles west of Pioche.

The Manhattan mine, in the Pioche district, is supposed to be owned by this company, but apparently is idle.

Company's holdings in the Jack Rabbit district, 15 miles west of Pioche, are 5 patented claims, area 115 acres, including the Day and Onondaga mines. The Day mine has a tunnel, completed late 1908, with a back of 1,300', showing ore said to assay up to 2.5% copper, 217 oz. silver and 0.06% gold.

The Imperial group, which includes the Comet mine, area 400 acres, lies near the Horn Silver, Cactus and Majestic mines, in Beaver county, Utah. The Imperial group, developed by tunnels, has carbonate ores above and sulphides at little depth, ore being claimed to average circa 3% copper, 15% lead, 18 oz. silver and $9 gold. Ore is mainly of concentrating grade, but considerable ore has been shipped to smelters, from time to time. The Comet mine, a single claim, adjoining the Cactus, undoubtedly carries a continuation of the Cactus ore bodies of the Newhouse Mines & Smelters. The Comet has a single shaft of circa 300' depth, in a gossan carrying about 1% copper, and company planned beginning crosscutting on the 300' level. The former management figured on 3.5% copper ore in the Comet, which carries ore mainly of concentrating grade, with values in copper, silver and gold. The adjoining Cactus mine is opened by a 6,000' tunnel, and the development of the Comet would necessitate an even longer tunnel, or an extensive aërial tram.

The Last Chance mine, 13 claims, area 115 acres, formerly owned by the New England-Utah Mining Co., lies between the Highland Boy and United States, southwest of the Boston Consolidated, in the West Mountain district of Utah, and shows fissure veins and contact deposits of 3' to 50' width, carrying fair values in copper, lead, silver and gold, with values mainly in silver and lead. The principal ore body is said to have produced circa $1,250,000 in ore values. Development is by tunnels of circa 7,000' aggregate length, with about 2 miles of workings.

The Last Chance has a mill of 125 tons rated daily capacity, in commission February, 1907, which, a few months later, was producing about 5 tons daily of concentrates averaging circa 10% lead and 70 oz. silver per ton. The mill was closed October, 1907. The Last Chance is well located, and is considered promising.

The Jack Rabbit group is connected with Pioche by a 20-mile narrow gauge railway, and Pioche is connected with the San Pedro Railway by a 28-mile branch line, known as the Caliente & Pioche, completed 1907, toward the construction of which the company is said to have advanced $80,000, to apply on first freights.

There is an old smelter, with 2 small furnaces, about a mile from Pioche, owned by the company, but this is antiquated in design and equipment, and of small present value. It was claimed, July, 1907, that the Nevada-Utah might buy the reduction plant of the Consolidated Arizona Smelting Co., at Humboldt, Arizona, but it is difficult to see how a smelter in Yavapai county, *Arizona, could* be of any particular value to the mines of this company in *Utah and* Nevada.

anding of the company has been greatly injured by its connection otorious Thos. W. Lawson, who concocted a very clever scheme, in with the rigging of the stock market, in March, 1907. On Feb. 28, son advertised, at heavy cost, that he was planning taking up ab, and, by clever manipulation, strung along the speculators for , but, on March 13, announced that he was through with the prop- was not as represented, following this statement with another that f, would double the market price, or thereabouts, to help out the s, and, of course, unloaded his holdings. The stock was sold mainly awkers, newsboys, bar porters, scrubwomen and other unfortunates caliber, who comprise the bulk of Lawson's following. These, as a wiped out completely, and the profits accruing doubtless went to us Lawson. The company states that Lawson took an option on a nt of its stock, and allowed the option to lapse, this being the com- rsion of its connection with this malodorous campaign.

rently it was predicted by President Learnard that at the end of 1908 nine would be producing daily 250 tons of silver-lead ore, netting the $45,000 per month. Apparently only the Day mine is being worked at Forces were greatly reduced, October, 1907, owing to the slump in market. The property includes several mines of promise, but, on f Lawson's connection, the company necessarily rests under a cloud, nds of prudent investors.

Office: 43 State St., Boston, Mass. Mine office: Clifton, Ariz. E. Rollins Morse, president; Edmund Bristol, vice-presiden aging director; Alex. Veitch, general manager; C. E. Phippen, se treasurer; Horace Moses, superintendent. Organized 1903, und Maine, with capitalization $5,000,000, shares $5 par, in $2,000,000 p stock, cumulative after payment of 8% dividends, and $3,000,(stock. Issued, $1,373,745 preferred and $2,722,750 common shar September, 1908, for sale, $100,000 first-mortgage 7% bonds, runn to raise funds for building a 100-ton concentrator. Company w of the New England Copper Co. and Clifton Consolidated Mines Annual meeting, second Monday in August.

Lands, 78 claims, area 1,006 acres, lying mainly near the Sh 5 miles northwest of Clifton, on the north side of the San Fra The property includes the Clifton, New England, Antietam and mines, with principal developments of value mainly on the New E principal group shows a main vein, occurring as a fissure in grani 5′ average width, said to show an extreme width of 150′, with an to 400′ in length, carrying highly silicious sulphide ores, mainly with some chalcocite and occasional oxides and carbonates, all si erous and argentiferous, said to average about 12% copper to de 350′, the ore chute declining rapidly in grade below depth of 350′ silicious sulphides of about 2.5% average copper tenor on the The main group is opened by shafts and tunnels, connecting at de 750′. The Clifton has 7 shafts, of 70′ to 315′ depth, and tunnels 700′, 800′, 1,000′ and 1,700′. The New England is opened by shafts 400′, and by a 2,000′ tunnel, the principal vein of the latter bein average width, carrying high grade cuprite, chalcocite and chalco various mines of the company show a considerable amount of ore grade from very rich to very poor.

The Antietam mine, area 3 claims, has a 140′ two-compart showing an ore body of 15′ to 35′ width, carrying chalcocite and giving assays of 4 to 10% copper, up to 7 oz. silver and $2 gold *is said to* have about 40,000 tons of ore in sight. There is a tr *the Antietam* to the Shannon railway. The property has ore bun

les below the mine, connected therewith by wagon road, and connecting by -mile ground-tram, of 20" gauge, with the Arizona Railroad.

The Copper King mine, which apparently is but slightly developed, is said have about 40,000 tons of ore in sight, which estimate perhaps is high.

Equipment includes steam, gasoline and electric power, and there are a nber of mine buildings.

Production has been as follows: 1,140,770 lbs. fine copper, 10,472 oz. er and 43 oz. gold in 1906; 1,981,189 lbs. fine copper, 19,578 oz. silver and oz. gold in 1907. The property has shipped considerable ore averaging ter than 10% in copper tenor, and, until the break in the metal market, , was shipping circa 1,000 tons monthly. Work was resumed March, 1908. nagement considered good and property promising.

W ENGLAND-COLORADO COPPER MINES CO. **COLORADO.**

Dead. Formerly in Chaffee and Frémont counties, Colorado.

V ENGLAND COPPER CO. **ARIZONA.**

ENGLAND GOLD & COPPER MINING CO. **UTAH.**

ffice: 67 Milk St., Boston, Mass. Mine office: Bingham Canyon, Salt Co., Utah. Employs circa 40 men. Daniel W. Williams, president; E. E. rombie, vice-president and managing director; Geo. F. Bradstreet, secre- nd treasurer; preceding officers, Jas. S. Williams, Geo. Bancroft, Wood- Ierxa and Thos. Kellough, directors; David J. Cook, superintendent. Or- d June, 1899, under laws of Colorado, with capitalization $2,000,000, $10 par; issued, $1,201,130. Bonds, $500,000 authorized, at 6%; issued, 00. Federal Trust Co., Boston, registrar; Geo. F. Bradstreet & Co., trans- ents. Annual meeting, first Monday in June.

nds, 13 claims, 9 patented, area circa 115 acres, including a group of tional claims, area circa 18 acres, in the West Mountain or Bingham t, and sundry claims near Goldfield, Esmeralda Co., Nev.

ie Bingham group shows porphyritic country rock, carrying 3 principal veins, of 30" average width, 1,000' average length and known depth ', opened by the 1,600' Nast tunnel, and the 1,670' Benton tunnel, both and a 159' shaft, with a total of circa 5,600' of workings. Apparently ins are growing wider at depth. Ores are said to give average assays % lead, 10% zinc, 15 oz. silver and $4.50 gold per ton, with small and le values in copper, in addition to which the monzonite country rock small copper values, and perhaps may prove workable, in parts, at ater date.

quipment includes a steam plant, with a 30-h. p. hoist good for 800'

e concentrator, of 50 tons rated daily capacity, uses electric power, from a commercial company. Equipment includes a 4x12" Sturtevant , 2 rolls, 2 double Hartz jigs and 1 Wilfley table.

oduction, 1907, was 2,108 tons of lead concentrates and 165 tons of cop- . Property closed down, late 1907, on account of low metal prices.

NGLAND MINING CO. **MASSACHUSETTS.**

ce: 35 School St., Greenfield, Mass. Mine office: Charlemont, Frank- Mass. Othello A. Fay, president; Capt. Geo. H. Davenport, treasurer eral manager. Organized 1902, with capitalization $500,000, shares $5 nds, circa *1,000 acres, 2 miles west* of the Davis pyrite mine. Vein,

traced 700', is approximately vertical, conforming closely in dip and with the Savoy schist in which it occurs, and apparently is a fahlband, b well-defined walls, ore occurring scattered through 15' to 20' of the schist a 6" to 12" vein of quartz, well mineralized, on the south wall, and a impregnation of chalcopyrite, 1' to 2' wide, on the north wall. Has partly stripped, and vein trenched across. Idle several years.

NEW ENGLAND-UTAH MINING CO. U

B. NEWGASS & CO. S

'Office: 7 Lothbury, London, E. C., Eng. Mine office: Changoa, Navarra, Lands, at Arrieta and Changoa, include the Ollin, Arrieta and Changoa carrying silver, lead and copper ores. Idle some years.

NEW HIGHLAND GOLD & COPPER MINING CO. CALIFO

Letter returned unclaimed from former office, 1209 Broadway, O Cal. Mine office: Georgetown, El Dorado Co., Cal. Thos. F. Graber president; C. L. Colvin, secretary and treasurer. Organized Sept. 11 under laws of California, with capitalization $2,000,000, shares $1 par. 11 copper claims and 9 gold claims, area 355 acres, on the mother lode, Georgetown district, showing a fissure vein in slate, giving assays o copper, 15 oz. silver and $2.50 gold per ton. Copper property idle severa and company apparently moribund.

NEWHOUSE MINES & SMELTERS.

Office: 512-71 Broadway, New York, N. Y. Operating office: P. 1388, Salt Lake City, Utah. Mine office: Newhouse, Beaver Co., Utah ploys circa 250 men. Samuel Newhouse, president; Jas. W. Hoban, vic dent; John Josten, secretary and treasurer; preceding officers, J. F. A. Alvin Untermeyer and Hon. Heber M. Wells, directors; Lafayette Ha general manager; Lawrence Townsend, assistant manager; Thos. R. Drur superintendent; Harry Kee, mill superintendent; A. C. Dart, engineer.

Organized May 16, 1903, under laws of New York, with capital $6,000,000, shares $10 par. Debentures, $1,500,000 first-mortgage 6% fund gold bonds, due 1913, of which amount it is variously reporte $900,000 and $1,400,000 are outstanding. Colonial Trust Co., New York, t agent; Windsor Trust Co., New York, registrar. Stock is listed on the Stock Exchange and New York Produce Exchange. Annual meeting, Friday in March.

A dividend of 50 cents per share, amounting to $300,000, was paid 31, 1907, and was called the first quarterly, but was not succeeded by quarterlies, owing to there being no profits to divide. The management have known, when declaring this dividend, in July, 1907, that market tions were such that a continuation of quarterly dividends was somethin than doubtful, and apparently the action of the management, in calling quarterly dividend, was for market effect only, hence highly censurabl fiscal year ending June 30, 1908, the property made net earnings of against which was bond interest of $81,000, showing a small actual net the year's operations.

Lands, 13 claims, patented, area 201 acres, in Copper Gulch, 7 mil *Frisco*, carrying about one mile of the strike of the Cactus vein, also

vale placer, area 168 acres, available water rights at Wah Wah Springs, and agricultural and grazing lands, giving total holdings of 7,882 acres.

The Cactus group, formerly operated, in a small way, without success, by several previous owners, shows country rock of monzonite porphyry, and the Cactus mine is essentially a pyritic impregnation, near the limestone contact, the ore being largely mineralized monzonite, carrying some oxidized ores in the upper workings, but at depth mainly chalcopyrite in pyrite, both slightly argentiferous and auriferous, averaging perhaps 30 cents per ton in combined gold and silver values, and being practically without lead and zinc. Previous to 1905 the Cactus ores are said to have averaged about 1% copper only, and the average grade of ore in the mine is very low, though there is some high grade sulphide ore, mainly chalcopyrite, assaying up to 15 to 20% in copper ener. The mine has ore bodies of large size, ranging up to 200′ in width and 00′ in length, and the company reports its main ore body as 175′ wide, 700′ ong and 600′ deep, with a northwesterly strike and vertical dip. Reserves ere estimated, early 1908, at 4,332,023 tons, averaging 2.5% copper, above the 00′ level. There are persistent rumors that the mine shows diminished values depth, and that the high grade ore body is nearing exhaustion.

Development is by two 3-compartment main shafts, of 600′ and 900′ depth, ith levels at 100′ intervals, connected on the 600′ level with a 6,200′ tunnel, hich has a grade of 5%, and is laid with 30-lb. steel rails. There is an elec- ic hoist on the second level. The lower level is reported to be developing atisfactorily, and the mine is said to have a good ore body on the 800′ level, veraging circa 4% copper. Tramming in the tunnel is done by 2 electric ecomotives, each hauling trains of 21 cars. The tunnel is electric-lighted hroughout, and cut several cupriferous veins before reaching the main vein. he mine has about 3 miles of workings, and for fiscal year 1908 made 3,025′ f new openings.

A steam-shovel, used for stripping, is capable of handling about 1,000 ons of material daily, and company plans extracting a large portion of its re by steam-shovel, first blasting with black powder. There was some trouble, 908, from caving, and the management is said to plan winning ore by the aving system.

After reaching the portal of the main tunnel, the electric trains pass over high trestle to an ore-building, where 7 cars at a time are run into a great eel tube, which is partially rotated, and the ore in the cars dumped onto izzlies, oversize going to Blake crushers, that reduce it to lumps of 1″ size nd smaller, fines and crushed ore going to 800-ton storage bins, whence the re is loaded into railroad cars and taken to the mill.

The mine has a 200-h. p. steam plant, with a 150-h. p. hoist good for 600′, nd a 40-drill Ingersoll-Sergeant air-compressor, both hoist and compressor ing operated electrically. Power formerly was furnished the mine from the ntral plant, by compressed air, piped through a line 13,000′ long, this operat- g steam-shovels and hoists, water for steaming purposes not being available the mine.

The mine and mill are connected by the Newhouse, Copper Gulch & Sevier ake Railroad, 2.3 miles in length, of standard gauge, owned by the company, hich connects with the San Pedro & Salt Lake Railroad, equipment including Shay mountain-climbing locomotive and 5 dump-cars.

The mill is 100x400′ in size, in two 500-ton duplicate sections, being de- ned on the unit plan to allow for future expansion. The western section, hich is the concentrator proper, is of structural steel, with corrugated iron les and roof, while the power plant, under the same roof, is of structural el and brick. Equipment includes three 10x24″ Blake crushers, 4 sets of ls, 18 Hartz jigs, 32 Wilfley *tables*, 8 Wilfley slimers, Sherman settling tanks

and classifiers and a 15-ton Whiting traveling crane. Ore is dumped, as ceived, into 1,000-ton steel bins, whence it is drawn out by belt-convey equipped with plunger feed, and transferred to elevators, of which there ar for each section, one for dry and one for wet ore. Some additional machine was installed, 1908, bringing the mill up to its rated capacity of 1,000 t daily. The mill puts about 8 tons into 1, and is said to effect a saving of ci 80% of assay values, making a concentrate carrying 10 to 25% excess of i which commands a premium of about 10 cents per unit.

In connection with the mill is a 40-ton experimental lixiviation pl planned to leach oxidized ores of the Cactus, which average circa 2.5% cop with small gold and silver values. This plant has certain features pate by Mr. D. H. Waterbury.

The power plant includes five 350-h. p. Babcock & Wilcox boilers a Green fuel economizer, the boiler plant having a 165′ self-supporting smokestack of 8′ diameter. The steam plant is held in reserve, machi being actuated by electric energy, brought 50 miles over the lines of the luride Power Co. There are two 500-h. p. Westinghouse-Parsons steel turb making 3,600 revolutions per minute, formerly direct-connected to two 40 generators that furnished all power, except compressed air, used in the and mill.

The property has an antiquated old smelter, put up by a French com that formerly owned the Cactus, but this is of no particular value at pr

Water is brought from 6 large springs, at Wah Wah, 8½ miles from mill, through a line of 12″ and 14″ riveted steel pipe, laid across Preuss v discharging into a cement reservoir of 300,000 gallons capacity, locate high ground above the mill and townsite, the springs having a flow of 1,000 gallons per minute.

Buildings of the company include a 30x50′ brick machine shop, 3 carpenter shop, smithy, bunk-house and boarding-house. There also is a mill and a 3-ton ice plant, the latter being necessary in summer, as the erty is on the edge of the Escalanta desert.

A townsite called Newhouse has been platted near the mill, and the pany owns therein 47 dwellings, a club-house and a brick hotel with ac modations for 150 men. From the profits of the club-house and clubs, suffi money was realized to build a small opera-house, which is much appreci by the company's employes.

Production has been as follows: 5,020,992 lbs. fine copper for 5,670,993 lbs. fine copper, 53,862 oz. silver and 2,272 oz. gold for fiscal ending June 30, 1906; 176,766 tons of ore, of which 10,014 tons was smel ore, and 19,367 tons of concentrates, yielding 7,244,179 lbs. fine copper, 4 oz. silver and 1,721 oz. gold, for fiscal year ending June 30, 1908. The prop was closed down October, and reopened December, 1907, but in March, the mill was being run only one shift daily, and production was about from smelting ore and half from concentrates. The mine and mill have handled with skill and technical ability, and a large tonnage has been tracted and treated with a comparatively small force. The property has ing capacity for an output of 12,000,000 lbs. copper yearly, or upwards.

Samuel Newhouse, president of the company, was quoted January, as stating that company was then producing copper for 6 cents per p including refining and selling. This simply was not the case. Costs were to have been 8 cents per pound for 1907, but apparently these figures d include marketing. Costs are said to be about 40 cents per ton for mi which probably is rather low, though the mill is doing excellent work, a cost. For fiscal year 1908 the management figures copper costs at 7.05 *per pound* or 10.5 cents per pound with freight, refining and smelting ch

but the fiscal year 1908 showed that the entire net profits had been
d by bond interest, leaving a small deficiency. Apparently there has
uch manipulation of this stock in the New York and Boston markets,
ny misleading statements have been put out regarding production, costs
earnings.

ERSEY-ARIZONA MINING CO. **MEXICO.**

e: P. O. Box 750, Bisbee, Ariz. Letter returned unclaimed from
mine office, Fronteras, Arizpe, Sonora, Mex. Property was claimed
the vicinity of the Greene Consolidated, Hidalgo, Picacho and Mocte-
nes, which was physically impossible. Apparently the only certainty
ation is that the property was claimed to be in northern Mexico, and
ly in Sonora. Property supposedly is controlled, through stock owner-
United Mining Co., of New York, F. L. Brinkerhoff, president. The
claimed to have 18,000,000 tons of ore, capable of making a profit
00,000, and these figures tell the story of what it was—or wasn't.

RSEY METAL REFINING WORKS, LTD. **NEW JERSEY.**

ts office: Elizabeth, Union Co., N. J. Is controlled by Mountain
o., Ltd.

NG SOLOMON'S MINES, LTD. **TRANSVAAL.**

: Johannesburg, Transvaal. Capitalization, £5,000. Property is the
ater's Kop No. 152, in the Zeerust district of the Transvaal.

NCOLN COPPER CO. **WYOMING.**

. Was merged, circa 1907, in Rambler Copper & Platinum Co. For-
Holmes, Albany Co., Wyo. Described Vol. VI.

MMOTH MINING & MILLING CO. **UTAH.**

office: Bingham Canyon, Salt Lake Co., Utah. Ores carry gold,
copper. Idle several years and apparently moribund.

SSINA COPPERS, LTD. **TRANSVAAL.**

: National Mutual Bldg., Rissik St., Johannesburg, Transvaal. Or-
1907, under laws of Transvaal, with capitalization £10,000, shares
working capital, £4,000. Property is 192 base metal claims, on the
nt farm Oestenryk No. 1421, in the Zoutpansberg district, Transvaal.

XICO COPPER MINING & SMELTING CO. **NEW MEXICO.**

. Formerly at Lucero, Mora Co., N. M.

XICO DEVELOPMENT CO. **NEW MEXICO.**

office: Fierro, Grant Co., N. M. Idle and apparently moribund.

XICO GOLD & COPPER MINING CO. **NEW MEXICO.**

: 39 Cawker Bldg., Milwaukee, Wis. Mine office: Tres Piedras,
N. M. Wm. H. Devos, president; Geo. R. Hayden, secretary. Organ-
under laws of New Mexico, with capitalization $2,500,000, shares $1
ds, $25,000 authorized, $4,850 issued, at 7%.
s, 11 claims, area 140 acres, in the Bromide district, showing fissure
chist, and contact deposits between schist and granite. Five veins de-
re claimed to average 7′ in width and to carry native copper, car-
nd sulphide ores, assaying 5 to 40% copper, with occasional high
gold. Has a 130′ shaft with 350′ of workings. Has steam power and
k air-compressor. Has a worthless townsite, called Bromide City.
, and facing bankruptcy.

XICO IRON & COPPER CO. **NEW MEXICO.**

: care of Hon. J. Maurice Finn, president and manager, Denver,
ne office: Corona, Lincoln Co., N. M. Lands, in the Red Cloud dis-
e undergoing development, 1907.

XICO VERDE COPPER CO. **NEW MEXICO.**

: *100 First St., Elizabeth, N. J.* Organized, late 1906, under laws

of New Jersey, with capitalization $1,000,000, by Walter A. Smith, Cornelius M. Garrison and Wm. P. Wallace. Location of lands, if any, unknown.

NEW MICHIGAN COPPER MINING CO. WYOMING.

Office and mine: Laramie, Albany Co., Wyo. Idle since circa 1904, and presumably moribund.

NEW MOONTA MINE. AUSTRALIA.

Office and mine: Mount Perry, Queensland, Australia. T. Hanifan, superintendent. Property, 12 miles northeast of Mount Perry, was a small producer, 1906, employing 59 men.

NEW MOUNT HOPE COPPER MINING CO., LTD. AUSTRALIA.

Dead. Succeeded, circa 1906, by Mount Hope Copper Proprietary. Formerly at Mount Hope, Blaxland Co., N. S. W., Australia.

NEW MOUNT HOPE COPPER MINING CO., LTD. AUSTRALIA.

Dead. Formerly at Mount Hope, Blaxland Co., N. S. W., Australia. Described Vol. VI.

NEW ORE KNOB COPPER CO. NORTH CAROLINA.

Dead. Formerly at Jefferson, Ashe Co., N. C.

NEWPORT & ARIZONA COPPER & GOLD MINING CO. ARIZONA.

Dead. Had an office, circa 1900, at 60 State St., Boston, Mass.

NEW RED WING MINING CO. UTAH

Mine office: Bingham Canyon, Salt Lake Co., Utah. Benj. L. Corum, president; A. D. Lee, vice-president; F. M. Orem, secretary and treasurer. Organized circa 1900, with capitalization $500,000, as successor of Red Wing Gold Mining Co. Is said to have a $50,000 bond issue. Is controlled, through ownership of majority of stock, by Utah Development Co., and owns a half interest in the Markham Gulch Milling Co., which has a 200-ton concentrator. Lands, 110 acres, partly patented, with 2 adverses in litigation. Mine has 3 tunnels, No. 3, circa 700′ long, being claimed to show a 15′ vein of milling ore, carrying values mainly in lead and silver. Also has a 5′ vein, carrying a 3′ paystreak, said to assay 23.2% copper, 12% lead, 60 oz. silver and $1 gold per ton.

NEW RIO TINTO COPPER CO., LTD. SPAIN.

Dead. Absorbed, circa 1904, by Caridad Copper Co., Ltd. Formerly at Lozoyuela, Madrid, Spain.

NEW RIVER COPPER CO.

Office: care of F. W. Pratt, Huntsville, Ala. Organized August, 1902, under laws of Delaware, with capitalization $1,000,000. Apparently abortive.

NEWSBOY COPPER MINING CO. WYOMING.

Dead. Formerly at Encampment, Carbon Co., Wyo.

NEWS COPPER MINING CO. ARIZONA.

Mine office: Jerome, Yavapai Co., Ariz. Lands, sundry claims, 1½ miles southeast of Jerome. Shaft was unwatered and retimbered, 1905, after several years' idleness, and property was investigated by F. August Heinze, but not taken by him, failing to prove as represented. Since idle.

NEW SOUTH WALES MINES & SMELTERS, LTD. AUSTRALIA.

Mine office: Blayney, N. S. W., Australia. Organized circa January, 1907, with capitalization £75,000, shares 10s. par. Property is the Blayney mine, known also as the Great Blayney and Annandale, reopened April, 1907, showing a 40′ vein carrying chalcopyrite with andesitic gangue, opened by a 390′ shaft. Has a 50-ton smelter, with 2 small water-jacket blast-furnaces. In 1901 produced 418 long tons of copper, from 18,666 long tons of ore smelted.

NEW STATE COPPER MINING CO. ARIZONA.

Office and mine: Tucson, Pima Co., Ariz. James W. Bogan, president; *Chas. Bent*, vice-president; Lyman W. Wakefield, treasurer; Ralph K. Shelton, *secretary*. Capitalization, $2,000,000, shares $1 par. Lands, 9 claims, in the

a Mountains, 14 miles west of Tucson, showing a prominent gossan, g oxidized ores and a little chalcocite with small gold and silver values, e for fluxing ore, and presumably underlaid by copper ores of better Has a 40′ shaft showing a little chalcopyrite, and a short tunnel, with 0′ of workings. Has shipped about 300 tons of ore. Idle.

TRATAN COPPERS, LTD. **TRANSVAAL.**

ce: P. O. Box 1276, Johannesburg, Transvaal. J. M. Calderwood, . M., consulting engineer. Organized under laws of Transvaal, with ation £11,000, shares £1 par, fully issued. Lands include 96 claims on popo River, and 360 base metal claims on government Farm Stratan , in the Zoutpansberg district of the Transvaal, latter, slightly pros- iving, 1907, average assays of 17.72% copper, with traces of silver

N COPPER CO. **CALIFORNIA.**

e: 420 Montgomery St., San Francisco, Cal. Mine office: Ranlett, Co., Cal. Col. Horace D. Ranlett, president and general manager. l 1887, under laws of California, with capitalization $200,000, shares Lands, 100 acres, patented, showing 3 fissure veins in slate, carrying lphide ores, averaging circa 8% in copper tenor. Mine, opened 1861, s of 200′ and 430′, with about 20,000 tons of ore in sight. Has steam id smelter with an 80-ton water-jacket blast-furnace, also a 100-ton plant, ore being especially adapted to lixiviation. Idle since circa

COPPER MINING CO. **WYOMING.**

. M. B. McKillep was manager. Property, near Elwood, 7 miles ampment, was said to have 12′ vein of copper ore, opened by a 125′ ormerly at Encampment, Carbon Co., Wyo.

, KEATES & BOLTON. **ENGLAND.**

: 13 Charles St., Princess St., Manchester, Eng. Works office: St. ancashire, Eng. Property is copper smelting and refining works.

AH MINING CO. **UTAH.**

: Salt Lake City, Utah. Mine office: Ibapah, Tooele Co., Utah. ffernan, president; W. W. Thompson, vice-president; Geo. A. Udall, James Norman, treasurer; Timothy Manion, manager. Lands are Flying Dutchman mine. Idle.

LVET-PORTLAND MINE, LTD. **BRITISH COLUMBIA.**

: 535 Salisbury House, London, E. C., Eng. Letter returned un- rom former mine office, Rossland, Trail district, B. C. Allan Maclean, F. A. Labouchere, secretary; S. Severin Sörensen, general manager. Nov. 18, 1905, as successor of the Velvet-Portland Mine, Ltd., with tion £10,000, shares £1 par; issued, £5,699. Lands on Sophie Moun- land, carry low-grade auriferous copper ores. Has a 75-ton concen- h three Tremaine two-stamp mills, 2 Overstrom tables, two sets of hydrometric classifiers, and one Jenckes crusher, putting five tons Idle.

SNAES COPPER CO., LTD. **NORWAY.**

: 32 Charles St., Cardiff, Wales. T. J. Masters, chairman; Herbert secretary. Organized Oct. 28, 1905, under laws of Great Britain, talization £10,000, shares £1 par; issued, £9,000. Property is the copper mine, on Karme Island, Norway. Presumably idle.

ST MUTOOROO COPPER MINING CO. **AUSTRALIA.**

: Melbourne, Australia. Mine office: Cockburn, South Australia. 0 acres, leasehold, 12 miles from Cockburn, having a 110′ shaft, sunk for 60′, cutting an 8′ vein carrying 2 to 3% copper ore, after which *follows the dip of the vein, which* is said to be 20′ wide on the 110′

level. Company planned, late 1907, installing a 100-ton reduction pl
apparently failed to do so.

NEW WORLD SMELTING CO. MO

Office: 306 Pacific Blk., Seattle, Wash. Mine office: Gardiner, I
Mont. Dr. G. L. Tanzer, president. Lands are 60 miles from Gard
3½ miles east of Yellowstone National Park. Company contracted
Colorado Iron Works Co. for a 100-ton copper matting furnace. Pr
idle.

NEW YELTA COPPER MINING & SMELTING CO., LTD. AUS

Dead. Mines, sold, 1903, to Paramatta Copper Mines, Ltd. For
Wallaroo, Daly Co., South Australia.

NEW YORK-ARIZONA COPPER CO. A

Letter returned unclaimed from former mine office, Dewey, Yav
Ariz. Lands are the Denver group, in the Black Hills district, 3 mile
Dewey. Has a 400′ shaft. Idle and apparently moribund.

NEW YORK & ARIZONA COPPER MINING & SMELTING CO. A

Office: 261 Broadway, New York, N. Y. Letter returned unclai
former mine office, Globe, Gila Co., Ariz. Lionel Hagenaers, preside
Macqueston, secretary. Organized 1901, with capitalization $3,000,0
agement poor, property fair, company moribund. Idle since circa 190

NEW YORK-ARIZONA GOLD & COPPER CO. A

Office and mine: Morenci, Graham Co., Ariz. A. L. Work, presid
Cleaveland, vice-president; C. E. Tyler, secretary and treasurer;
officers, R. E. Moore, W. C. Crawford and D. M. Causler, directors;
Molder, general manager; J. R. Wester, superintendent. Organized
1907, under laws of Arizona, with capitalization $900,000, shares $1 p

Lands, 30 claims, unpatented, area 600 acres, in the Copper Mou
trict, 4 miles west of Morenci, also a 150-acre millsite. Property
the Buzzard Shadow and adjacent groups, showing quartzite, shale,
and porphyritic rocks, carrying contact ore bodies having a generally
west strike, with vertical dip. Four ore bodies, under developme
from a few inches to 50′ in width, one showing auriferous and arg
sulphides assaying 15% copper, 10 oz. silver and $10 gold per ton.

Development is by 5 shafts, deepest 80′, and by 4 tunnels, of
600′ and 900′ length, with a total of circa 2,500′ of workings, esti
show 100,000 tons of ore. The Lillian tunnel is said to show a 50′
carrying average values of $12 gold per ton, which, in all likeliho
overestimate. The Buzzard Shadow group shows a 2′ to 4′ vein carryi
cerous and argentiferous copper ore. Values, as developed, are mainly

Equipment includes a 19-h. p. gasoline hoist, and 5 mine buildin
pany plans drifting and sinking on the Lillian and Buzzard Shadow
adding an air-compressor, and building a 10-stamp mill and cyani
Development on the principal copper claim has been hampered by
water.

NEW YORK CANADIAN COPPER CO., LTD. O

Dead. Formerly at Kashaboiwe, Rainy River district, Ont.
scribed Vol. IV.

NEW YORK CONSOLIDATED MINING CO. MI

Office: Leopold Bldg., Houghton, Mich. Lands, 720 acres, being
3, 10 and 15, in Town 57 North, Range 32 West, Keweenaw County,
lying just east of the Manhattan. Idle many years.

NEW YORK COPPER MINING & SMELTING CO. A

Office: 46 North Stone Ave., Tucson, Ariz. Mine office: Helva
Co., Ariz. Frank H. Lee, president; Samuel Seinsheimer, vice-presid
Trippel, secretary; Harry A. Drachman, treasurer; Henry Buchma

r. Organized Nov. 4, 1901, under laws of Arizona, with capitalization 0, shares $1 par. Lands, 8 claims, area 110 acres, showing contact de- between limestone and porphyry, opened by 3 shafts, with total depth and 3 tunnels with total length of 475', showing copper carbonates and s giving average assays of about 4% copper.

ORK & ELY CONSOLIDATED COPPER CO. **NEVADA.**

d. Formerly had an office at 1103-66 Broadway, New York, N. Y. at Ely, White Pine Co., Nev.

ORK & GREENWATER COPPER CO. **CALIFORNIA.**

e office: Greenwater, Inyo Co., Cal. Organized October, 1906, under Arizona, with capitalization $1,000,000. Idle.

ORK & INYO COPPER CO. **CALIFORNIA.**

e: 254 Wilcox Bldg., Los Angeles, Cal. Mine office: Citrus, Inyo Co., J. Lang, president; A. G. Lang, vice-president; A. N. Francisco, secre- D. Gordon, treasurer; F. S. Gordon, consulting engineer. Lands, 5 rea 100 acres, circa 6 miles from Citrus, taken over from the Inyo Consolidated Copper Co. Property has a 100' tunnel, showing oxidized ying 2.5 to 17% copper, with combined gold and silver values of $1.50 per ton.

ORK & MEXICO EXPLORATION & ELOPMENT CO. **ARIZONA & MEXICO.**

. Was organized March 1, 1906, under laws of Maine, and name Oct. 31, 1906, to Cananea & Globe Exploration & Development Co. at Globe, Gila Co., Ariz., and La Cananea, Arizpe, Sonora, Mex.

ORK & MONTANA COPPER MINING CO. **MONTANA.**

e: 32 Broadway, New York, N. Y. Mine office: Corbin, Jefferson t. J. H. McCabe, general manager. Organized 1903, under laws of , with capitalization $1,000,000, shares $1 par. Lands, circa 250 acres, the Erickson, Scioto and Copper Gulch groups, opened by 3 two- ent shafts, said to make a good showing of medium-grade ore. Idle ears.

ORK & NEVADA COPPER CO. **NEVADA.**

. Lands sold, 1905, to Nevada Consolidated Copper Co. Fully de- ols. III. and IV.

ORK-NEVADA GOLD-COPPER MINING CO. **NEVADA.**

: 504 Rector Bldg., Chicago, Ills. Mine office: Goldfield, Esmeralda Jas. Rice, president; W. B. McConnell, vice-president and treasurer; ebb, secretary; Harry F. Parker, general manager. Organized August, er laws of Arizona, with capitalization $5,000,000, shares $1 par.

s are said to be 31 claims, including 12 claims 3 miles from Copper- neralda Co., Nev., circa 50 miles northwest of Tonopah, which are ow veins of 7' to 12' width, carrying high grade copper ores; 19 claims northeast of Goldfield, near Red Mountain, and a 5-acre millsite near ev. The company claims to have one mile of workings, with 20,000 re blocked out, carrying values in copper, lead, silver and gold.

ORK & SALTESE COPPER MINING CO. **MONTANA.**

office: Saltese, Missoula Co., Mont. Organized 1906, with capitali- ,000,000, shares $10 par, as a reconstruction of the National Mining ng Co. Presumably idle.

ORK-SEATTLE COPPER MINING CO. **WASHINGTON.**

: 237 Broadway, New York, N. Y. Mine office: Index, Snohomish h. Harry D. Cowden, president; R. H. Hingston, secretary; Philip treasurer and superintendent. Organized Aug. 17, 1901, with capi- $1,000,000, shares $1 par.

ls, 8 claims, area 160 acres, well timbered and watered, with an avail-

able water-power, 13 miles from the Great Northern railroad, with a go wagon-road thereto, in the Mineral City and Silver Creek districts. Mine h a 212′ shaft and circa 1,250′ of tunnels, showing 4 veins, of 4′ to 20′ avera width, carrying copper ore that gave average returns of $14.42 per ton, i mill tests.

Equipment includes a hydraulic power installation, air-compressor an sawmill. Has a 100-ton concentrator, milling circa 60 tons daily, at la accounts, shipping concentrates to Everett smelter. Management seems vigo ous and efficient.

NEW YORK & UTAH COPPER & GOLD MINING & MILLING CO. UTA

Office: Salt Lake City, Utah. Letter returned unclaimed from forme mine office, Milford, Beaver Co., Utah. J. E. Galigher, president; A. Schneider, vice-president; G. D. B. Turner, secretary and treasurer. Organize July, 1907. Property is the Blue Bird group, formerly owned by Blue Bi Copper-Gold Mining Co., near the Hickory group of the Majestic Mines C having a 275′ shaft.

NEW YORK & VIRGINIA COPPER CO. VIRGINI

Office: 50 Broadway, New York, N. Y. Letter returned unclaimed fr former mine office, Woltz, Carroll Co., Va. Ambrose C. Dunn, president a general manager; Wm. D. Boggs, secretary and treasurer. Organized 19 under laws of West Virginia, with capitalization $2,500,000, shares $1 p Lands, 740 acres, showing 7 cupriferous fissure veins and 2 gold veins, 2 copp veins being developed by shafts of 372′ and 381′ and 2 tunnels of 100′ ea Main vein is claimed by company to average 96′ width, and to show argent erous melaconite, bornite and chalcopyrite, carrying 10% copper, 25 oz. silv and 1 oz. gold per ton, which is an exaggeration. Claims to have about 40,0 tons of smelting ore on the dumps, with a larger amount blocked out f stoping. Idle and presumably moribund.

NEW ZEALAND COPPER ESTATES CO., LTD. NEW ZEALAN

Dead, though not buried at last accounts. Formerly in New Zealand.

NIAGARA COPPER CO. ARIZON

Office and mine: Prescott, Yavapai Co., Ariz. Herman Voge, presid and treasurer; G. H. Schuerman, vice-president; J. P. Bauder, secretary a general manager. Capitalization $1,000,000, shares $1 par.

Lands, 7 claims, area 140 acres, and a 5-acre millsite, in the Copper Cr district, circa 25 miles southwest of Prescott, showing native copper, mel onite, malachite, azurite, chalcocite, bornite and chalcopyrite. Property f merly was claimed to show a vein of 50′ to 150′ width, with footwall t hanging wall paystreaks, giving assays up to 50% copper, 9 oz. silver and $1 gold per ton, opened by shafts of 60′, 60′, and 125′ and by several tunn The property was reported, 1908, by company to have shafts of 40′, 50′ 85′, with tunnels of 50′, 200′, 100′, 400′, 200′ and 260′, with circa 2,000′ workings, showing ore estimated to average 3 to 6% copper, 2 to 7 oz. sil and $1 to $10 gold per ton. The shrinkage in depth of shafts doubtless due to seismological disturbances causing severe contraction of the eart crust in Yavapai county, whereby the shafts were forced upwards and portions thus protruding above the earth's surface were broken off by th own weight. This would seem the most plausible explanation, as none ot has been supplied.

NIAGARA MINING & SMELTING CO. UT

Letter returned unclaimed from former mine office, Bingham Canyon, S Lake Co., Utah. Is controlled, through ownership of majority of stock, *United States* Mining Co., which operates the mine. To all practical inte *and purposes*, is out of business.

COPPER CO. **ALASKA.**

310 American Trust Bldg., Cleveland, Ohio. Mine office: Niblack, ales Island, Alaska. M. P. O'Brien, president and treasurer; Frank , vice-president; S. C. Vessy, secretary; Benedict Crowell, con- neer; Burton B. Nieding, general manager; Wm. N. Fink, engineer.)ct. 12, 1904, under laws of Arizona, with capitalization $250,000. 2 claims, leased from the Geo. M. Wakefield Mineral Land Co., ion over royalties, on the eastern side of the island, having a lake s capable of developing 2,000 h. p. under a 290′ head. Main shaft, levels opened at 50′ intervals. Geology of property is similar to Ketchikan district, on the mainland, showing sedimentary deposits, stone of Devonian or Silurian age, having a general dip to the with intrusions of later eruptive rocks, that have forced their way beds, and altered them to such an extent that identification is he greenstone, in various phases of alteration, carries a mineralized l to the fault planes, with ore-bodies having a general strike of southeast, with dip of circa 60° to southwest. The principal ore ense in greenstone, having a width of 60′, with another ore body level, estimated at 20′ width, and a third lense outcropping on the bove the mine. Ore is chalcopyrite, averaging circa 4% copper, iron, silica and sulphur, with combined gold and silver values of per ton. Property also shows covellite and chalcopyrite, in quartz- sts, at present undeveloped

ent includes a steam hoist, good for 1,000′, and a 6-drill air-com- ildings include a power-house, machine-shop, carpenter-shop, smithy, al store, boarding-house and cabins for miners. Large ore-bunkers, aft, are connected by tramway with a 700′ wharf, tramway and double-tracked, and tram operated by gravity. The wharf is on chorage, a nearly landlocked harbor having deep water, but high sitating a long pier, which is built with pockets, similar to those Superior iron ports. Production, 1905, was 10,209 tons of ore, con- a 850,000 lbs. fine copper.

COPPER DEVELOPMENT CO. **ALASKA.**

Succeeded Oct. 12, 1904, by Niblack Copper Co. Formerly at ince of Wales Island, Alaska.

CHEMICAL CO. **QUEBEC & NEW YORK.**

Succeeded May, 1905, by Nichols Copper Co. Formerly at Capel- oke Co., Que. Fully described Vol. VI.

COPPER CO. **QUEBEC & NEW YORK.**

25 Broad St., New York, N Y. Mine office: Capelton, Sherbrooke . Works office: Laurel Hill, Queens Co., N. Y. Employs about Wm. H. Nichols, president; John B. F. Herreshoff, vice-president; Luther, secretary and general manager; Edw. R. Nichols, treas- ling officers, Wm. H. Nichols, Jr., G. G. Teller and Sanford T. tors; W L. Spofford, mine superintendent. Organized May, 1905, of New York, with capitalization $10,000, shares $100 par, as suc- ichols Chemical Co. Controls, through ownership of majority of an Carlos Copper Co., of Tamaulipas, Mexico.

ert mine, at Capelton, area 640 acres, carries lenses of chalcopyrite the former carrying circa 5% copper and the latter about 38% sul- lopment is by 6 shafts, 4 under 500′ depth each, with one of 800′ 2,000′, with upwards of 5 miles of workings.

ent includes steam power, a 150-ton concentrator, and a smelter. s an acid plant at Capelton, completed, 1907, at a cost of about *ith capacity of about 150 tons of* commercial sulphuric acid daily,

which is one of the most complete in existence. The acid plant burns pyrites, and cupriferous cinder is smelted in a small blast-furnace, producing 1 to 2 tons daily of matte averaging about 40% copper, with small silver contents, which is shipped to the Laurel Hill works for refining, production being circa 350,000 lbs. fine copper yearly.

The company also operates the Davis pyrite mine, at Davis, Franklin Co., Mass., which produces slightly cupriferous pyrites, the principal value being in the sulphur, with copper as a small by-product.

The Laurel Hill works include a smelter and electrolytic refinery, with steam and electric power. Material treated is mainly ores and matte from outside producers in the smelter, and western blister copper in the electrolytic plant.

The Laurel Hill smelter has 10 reverberatory furnaces, taking 40 ton charges, with hearth-linings of quartz sand containing a small quantity of feldspar, each furnace heating a tubular boiler with waste gases. There are two 46x120″ Herreshoff water-jacket blast-furnaces, of 210 tons rated daily capacity each. Matte and slag flow, in an uninterrupted stream, to a large settler, whence slag skims into pots, and matte is tapped into an iron bed. Fuel charges average 14%. Waste gases pass into a 1,000′ main flue, of iron and brick, leading to a 300′ chimney. About 100 tons of flue-dust, recovered monthly, is briquetted and resmelted. The first-fusion product is a matte of 40 to 60% copper tenor, which is resmelted in a water-jacket blast-furnace, with 9% coke charges.

The converter department of the Laurel Hill works has 4 stands, tilted by hydraulic accumulators, with 12 shells, linings for which are made of 85% crushed quartz and 15% clay, ground and mixed in 3 silica-mills with revolving bottoms, linings being tamped by hand, to a thickness of 18″. The linings last from 12 to 16 blows, and the shells vary in capacity, according to the state of linings, from 2 to 6 tons each. The converter blast, at only 8 to 10 lbs. pressure per square inch, is furnished by 100-h. p. and 120-h. p. Connersville blowers. The final converter product is blister copper assaying 99 to 99.5% copper, 50 to 100 oz. silver and 1 to 2 oz. gold per ton. There is a Herreshoff casting table, with 9 moulds, casting anodes. After electrolytic refining cathodes are melted down, in 8 reverberatory furnaces, taking charges of 30 to 45 tons each.

The Laurel Hill electrolytic plant is operated on the series system, with a current of 800 amperes, at 155 volts, generated by 17 dynamos, and the plant has 120 tanks. Anodes are cast ¼x16x59″, with an average weight of 57 lbs., and are smoothed by passing between rolls, after casting. The final product is cast mainly into wire-bars, in moulds painted with a mixture of lampblack and benzine after each casting. This company enjoys a deservedly high reputation for the purity of its product and the efficiency of its metallurgical practice.

JOHN NICHOLSON & SONS, LTD. **ENGLAND.**

Office: Leeds, Eng. Mine office: Hunslet, Yorkshire, Eng. Property is copper reduction works using the wet process for extracting values from cupriferous cinders remaining from the burning of iron pyrites for making sulphuric acid.

NICKEL-COPPER CO. **ONTARIO.**

Office and mine: Worthington, Algoma, Ont. Company experimented with a new process of reducing nickel-copper ores, with the result of failure. Mine idle some years, finances muddled and company apparently hopelessly involved.

NICKEL PLATE MINE. **BRITISH COLUMBIA.**

Owned by Daly Reduction Co.

IGHT HAWK MINING CO. **WASHINGTON.**

Office: 201 Uihlein Bldg., Milwaukee, Wis. Mine office: Loomis, Okanoan Co., Wash. W. E. Stevens, president; A. W. Schroeder, vice-president; . D. James, secretary and general manager; Chas. A. Druse, treasurer; preding officers, P. Meehan and Edward Kolb, directors; Chas. T. Peterson, perintendent. Organized 1901, under laws of Montana, with capitalization 5,000,000, shares $1 par.

Lands, 65 claims, 10 fractional, area circa 1,250 acres, also 150 acres misellaneous lands, including a millsite and townsite, on Mount Ellemeham, in e Wannicut Lake district, east of the Similkameen River. Company bought e Grand View property, at Loomis. Development is by 3 shallow shafts and tunnels, longest circa 1,200'. Property shows numerous fissure veins, of ich 5 have been partly developed, these ranging 6' to 10' in width, carrying timated averages of 8% copper and 1 oz. gold per ton, which estimate unquestionably is excessive.

Equipment includes an electric plant, installed 1908, and a 20-stamp mill, ught, 1908, from the Grand View Mining Co. Property considered promising.

NIKKO COPPER WORKS. **JAPAN.**

Owned by Furukawa Mining Co.

NIKOLAJAV WORKS. **RUSSIA.**

Office and works: Nijni Novgorod, Russia. Property is a copper reduction plant, with an electrolytic refinery of 70 tanks having multiple arrangement of electrodes, with a daily capacity of 1 ton of electrolytic copper.

ILPENA COPPER MINING CO., LTD. **AUSTRALIA.**

Mine office: Blinman, South Australia.

IPISSING COPPER & SILVER CO., LTD. **ONTARIO.**

Office: 609 Temple Bldg., Toronto, Ont. Mine office: Cobalt, Nipissing, t. A. Aubin, president; Duncan Donald, vice-president; F. Asa Hall, secrery; T. Baycroft, mine manager. Organized under laws of Ontario, with pitalization $3,500,000, shares $1 par. Lands, 2,200 acres, said to show a vein of sulphide ore assaying 11% copper and 41 oz. silver per ton. Comny not regarded favorably, on account of the extravagant nature of its adrtising.

IPPER CONSOLIDATED COPPER CO. **MONTANA.**

Office: 42 Broadway, New York, N. Y. F. August Heinze, general manger; Stanley Gifford, secretary and treasurer. Capitalization $3,750,000; nded debt, $2,500,000. Is a subsidiary corporation of the United Copper . Lands sold, 1906, to Butte Coalition Mining Co.

IPPER MINE. **MONTANA.**

Owned by Butte Coalition Mining Co.

ISHINOKAWA MINE. **JAPAN.**

Mine office: Oboki-mura, Nii-gori, Iyo, Japan. Property shows lenses of to 12' thickness, in quartz-schists carrying chalcopyrite associated with halerite, pyrite, magnetite and hematite, with quartz gangue, assaying 3 to % copper. Production was 183,415 lbs. fine copper in 1900; 242,215 lbs. in 903, and 164,645 lbs. in 1907.

IZINA GOLD & COPPER CO., OF ALASKA. **ALASKA.**

Dead. Formerly at McCarthy Creek, Copper River district, Alaska. Deribed Vol. VII.

'KANDHLA SYNDICATE, LTD. **NATAL.**

Office: 1 Great Winchester St., London, E. C., Eng. A. Lee, secretary. rganized March 13, 1902, under laws of Great Britain, with capitalization 2,000, shares £1 par; issued, £1,800. Property was prospecting rights over 4 locks, each 600 yards square, on the Umhlatuzi river, N'kandhla district, ulinland. *Moribund and should be buried.*

NOBLE GOLD MINES, LTD. MONTANA

Dead. Was organized under laws of South Dakota, with capitalization $1,000,000, shares $1 par. Lands were 11 claims, area 320 acres, in the Silver Star district, said to carry gold and copper ores, and company claimed to have a mill. Formerly at Sheridan, Madison Co., Mont.

NOBLE MINING & MILLING CO. MONTANA

Office: 209 Railway Exchange Bldg., St. Louis, Mo. Mine office: Sheridan, Madison Co., Mont. S. M. Kennard, president; J. H. Wyeth, secretary and treasurer; D. H. Noble, general manager. Organized 1887, under laws of Montana, with capitalization $2,000,000, shares $10 par.

Lands, 7 claims, area 75 acres, patented, also a 20-acre millsite, in the Wisconsin district, carrying fissure veins in gneiss, of which two 4′ veins are developed by a 200′ shaft and by tunnels of 16′, 200′, 333′ and 2,150′, showing silicous sulphide ores claimed to average 1.5% copper, 10 oz. silver and $[illegible] gold per ton. Equipment includes a small hoist and a 2-drill Ingersoll-Sergeant air-compressor. Has a small concentrator and a 10-stamp mill. Presumably idle.

NOGALES COPPER CO. ARIZONA & MEXICO

Dead. Reorganized, 1904, as Black Mountain Mining Co. Formerly at Nogales, Santa Cruz Co., Ariz. Described Vol. IV.

NOLANGENI NICKEL & COPPER SYNDICATE, LTD. CAPE COLONY

Mine office: Mount Ayliff, Griqualand, Cape Colony. A. E. Gilson, E. S. Campbell, J. Taylor and Maj. A. Webster, directors; J. P. Johnson, engineer. Capitalization £10,000, vendors taking £200 cash and £7,800 in shares. Lands are 2 areas, bought of E. S. Campbell, showing surface ores assaying up to 0.97% copper and 2.08% nickel. A short tunnel shows chalcopyrite disseminated in pyrite, assaying 7.6% copper and 4.89% nickel.

NOME-MONTANA-NEW MEXICO MINING CO. NEW MEXICO & MONTANA

Office: Iron Blk., Milwaukee, Wis. Mine offices: Tusas, Rio Arriba Co., N. M., and Elliston, Powell Co., Mont. Chas. E. Freet, president; Geo. C. Weiss, secretary. Organized 1902, under laws of Arizona, with capitalization $3,000,000, shares $1 par. Lands include 8,000 acres of placer ground, on creeks near Nome, Alaska, estimated by company to carry an average of $1 gold per cubic yard of gravel, which probably is much too high, also 6 claims adjoining the Copper Cliff mine, near Elliston, and 3 claims in the Bromide district of New Mexico, showing copper and lead sulphides. Is said to have a bucket dredge working in Alaska. Montana and New Mexico properties idle. Is not regarded favorably.

NONESUCH MINE. MICHIGAN

Office: 78 Prospect Ave., Milwaukee, Wis. Mine office: Ontonagon, Ontonagon Co., Mich. A. K. Camp and M. P. O'Brien, owners; Thos. Wilcox, superintendent. Lands, 640 acres. This is the pioneer and principal mine of the Porcupine Mountain district, carrying native copper freely in an argillaceous sandstone-conglomerate. Property was idle for many years, until tested, under option, 1906-1907, through diamond drill borings, by the Calumet & Hecla Mining Co. Very fully described Vol. II.

NONOALCO REFINERY. MEXICO

Owned by Société Affinage des Metaux.

SOCIEDAD FRANCÈSCA DE MINAS y FUNDICION DE NONOGASTA. ARGENTINA

Mine and works office: Nonogasta, Rioja, Argentina. Lands include the Andueza, Atacama, Muerto and San Toribio copper mines, also various silver *mines*, in the Tigre district. Ores of the Andueza are claimed to average *to 20%* copper, 3 oz. silver and 2 oz. gold per ton, which either is an excessiv

ate, or veins are very narrow. Has steam power and a small
1887 to treat dry silver ores, but altered to smelt copper.

l meeting, last Monday in April.
nds, 280 acres, in the Pyramid district, including
Negra groups, showing fissure veins in porphyry
oxides, carbonates and sulphides, giving
er and \$10 gold per ton, said by company
dy being stated, by an observer not
lakes of copper in absolutely unpayable
uipment *includes steam power, with a*

eral mine buildings and 4 dwellings. Company shipped, 1907, to El Paso and Douglas smelters, 98 carloads of ore netting $43,333.36. Company plans moving the Lena concentrator to the Nellie Bly mine, and deepening the shaft 200'.

NORTH AMERICAN COPPER CO. OREGON.

Office: Baker City, Ore. Mine office: Burkemont, Baker Co., Ore. A. B. Spencer, president; W. G. Drawley, vice-president; D. W. C. Nelson, secretary, treasurer and general manager. Organized circa 1907, with capitalization $3,000,000, shares $1 par, as a reconstruction of the North American Mining Co., which was organized, 1905, as a reconstruction of a company organized 1898 under same title. Has authorized a $25,000 bond issue.

Lands, 26 claims, 4 patented, also 440 acres of timber land, circa 25 miles northeast of Baker City, showing a mineralized zone up to 500' in claimed width, opened by numerous pits and trenches, and by a 2-compartment inclined main shaft, circa 300' deep, said to have cut several low grade bodies of copper ore carrying circa $5 per ton in combined silver and gold values. Property shows auriferous and argentiferous ores of copper assaying up to 10% in copper tenor, also a little native copper.

Equipment includes a first-motion hoist and a small air-compressor. The old management lied atrociously in its advertisements, until the reorganization in 1905, but apparently the new officials have no connection with the old management.

NORTH AMERICAN COPPER CO. WYOMING.

Dead. Succeeded by Penn-Wyoming Copper Co. Formerly at Encampment, Carbon Co., Wyo. Fully described Vol. IV.

NORTH AMERICAN EXPLORATION CO. ARIZONA.

Mine office: Gilbert, Yavapai Co., Ariz. Geo. W. Middelton, superintendent. Ores carry gold and copper. Idle some years and apparently moribund.

NORTH AMERICAN EXPLOITATION CO. ARIZONA & MONTANA.

Office: 327 New York Life Bldg., Chicago, Ills. William R. Everett, president; Chas. W. Cheney, vice-president; Davis Ewing, secretary; Western Trust & Guaranty Co., treasurer; Frank F. Day, managing director; Frank A. Summerill, assistant general manager. Capitalization $10,000,000, shares $1 par. Controls, or did control, under lease, the Rambler Mining & Smelting Co., of Wyoming, Mormon Girl Mining Co., of Arizona, Bradshaw Mining Co., of Arizona, and sundry gold mining companies. The North American Exploitation Co. claimed to own 54% of the Rambler stock, 91% of the Bradshaw and 96% of Mormon Girl stock. Company has sold stock on a special repayment contract, alleging that under these terms investments will be repaid in full, with interest, and that the stock is certain to advance immediately upon the installation of smelters. The plan of promotion is a self-evident delusion, as no corporation, even those of the most philanthropic intent, sells stock that is backed by a thoroughly sound guaranty. Stockholders must take their chances, and a guaranteed stock always should be viewed with distrust. Company claimed, in an advertisement, March, 1906, to have 40,000 tons of ore developed, ready for smelting, and to plan installing copper furnaces, of some patent design, at each property, in the near future, notwithstanding which the Mormon Girl property, controlled by this company, was sold for debt, early in 1906, this property bringing the truly magnificent price of $400, cash, at sheriff's sale. The Rambler Mining & Smelting Co. has been reorganized. Company is regarded with deep suspicion as a mere bit of stock-jobbery, or something worse.

NORTH AMERICAN LEAD CO. MISSOURI.

Office: 824 Columbus Savings & Trust Bldg., Columbus, Ohio. Mine office: *Fredericktown*, Madison Co., Mo. Jos. F. Davidson, president; E. A. Cole, vice-

sident; Wm. D. McCullough, secretary; V. Hybinette, assistant general nager; preceding officers and N. Gumble, directors. Employs 400 men. anized 1906, under laws of Ohio, with capitalization $2,000,000, shares $100 , divided into 5,000 shares of 8% preferred and 15,000 shares of common k, of which 3,500 shares preferred and all common stock are issued. Bonds, 0,000 authorized, at 6%; issued, none.

Lands, 2,000 acres, about 2 miles east of Fredericktown, including the old ckeye copper mine, which, circa 1860, was worked in a small way for cop- . Property is a short distance southeast of the celebrated Mine La Motte, untry rock being magnesian limestone, with porphyritic intrusions, carrying ctically horizontal blanket veins, the ore body having a width of about and being traceable about 4 miles, carrying chalcopyrite, linnéite, galena l marcasite, estimated by company to average 5% copper, 4% lead, 2% kel and 1% cobalt.

The predecessor of the present company opened, circa 1901, a new lead e, northeast of the old copper mine, and, in addition to opening one of the st lead mines in southeastern Missouri, also has a very extensive body of per-nickel-cobalt-lead ore: The mine has shafts of 280', 200' and 125', with tal of about 5,000' of workings, and is estimated to show about 1,000,000 s of workable ore.

Equipment is excellent, including a 2,000-h. p. steam plant, 600-kw. electric nt and 350-h. p. air plant, 2 hoists, and Norwalk and Laidlow-Dunn-Gordon compressors of 50 drills combined capacity.

The reduction plant includes a 500-ton lead concentrator and a copper lter, latter, begun July, 1906, and completed late 1907, having been built the plans and under the supervision of Mr. Hybinette, who was general nager of the Orford works for 10 years, and was the inventor of the greater rt of the processes for nickel reduction used at those works, which unques- nably lead in the metallurgy of nickel. Several new processes and modifica- ns of old processes were devised by Mr. Hybinette for the North American nt, which has shaft-furnaces, and a complete electrolytic refinery, for the king of both copper and nickel.

The company has a 2-mile standard-gauge railroad, with one locomotive, nnecting with Iron Mountain railway at Fredericktown.

Production includes varying quantities of lead concentrates, also high de electrolytic copper, electrolytic nickel in cathodes, cobalt oxide and lead centrates, amounting, 1907, to 125,000 lbs. electrolytic copper, 50,000 lbs. ctrolytic nickel and 15,000 lbs. cobalt oxide monthly. Production, 1908, circa 500,000 lbs. fine copper. Property considered valuable and manage- nt good.

RTH AMERICAN MINING CO. **NEW MEXICO.**

Dead. Succeeded, 1906, by North American Copper Co. Formerly at dsburg, Grant Co., N. M. Fully described Vol. VI.

RTH AMERICAN MINING CO. **OREGON.**

Dead. Succeeded, circa 1907, by North American Copper Co. Formerly Burkemont, Baker Co., Ore. Fully described Vol. VI.

RTH AMERICAN PROSPECTING & MINING ASSOCIATION. **COLORADO.**

Office: 405 Temple Court Bldg., Denver, Colo. Mine office: White Pine, nnison Co., Colo. Chris. C. Sierk, president and general manager; Jas. T. se, secretary. Lands, 60 acres, showing 7 contact veins, between limestone d shale, said to give average assays of 2% copper, 25% lead and 20% zinc, m carbonate and sulphide ores. Has water power and a small concentrator, king 55% zinc concentrates and 55% *lead concentrates, carrying copper and* d values, *when working. Idle.*

NORTH ARKANSAS ZINC, LEAD, COPPER, SILVER & GOLD MINING CO. ARIZONA, ARK & CALIFO

Dead. Formerly at Morristown, Maricopa Co., Ariz. Described Vo

NORTH BAY SMELTER. ONT

NORTH BISBEE DEVELOPMENT CO. ARI

Office and mine: Bisbee, Cochise Co., Ariz. H. S. Jones, president; Davis, vice-president; Oscar Zapf, secretary; E. H. Clark, superinte Organized Apr. 19, 1906, under laws of Arizona, with capitalization $6 shares $3 par, increased, Apr. 9, 1907, to $999,999, shares $3 par. Lan claims, area 400 acres, in Tombstone Cañon, near the Mountain View De ment Co., circa 4 miles northwest of Bisbee, opened by a shallow shaft 260′ tunnel, showing ore assaying up to 19.7% copper, with small go silver values. Has gasoline power.

NORTH BURRO COPPER MINING CO. NEW ME

Office: Silver City, N. M. Mine office: Leopold, Grant Co., N. M. Sublett, manager. Lands, 14 claims, adjoining the National Copper Co., in Whitewater Cañon, Burro Mountains.

NORTH BUTTE EXTENSION COPPER MINING CO. MONT

Office: 1911-74 Broadway, New York, N. Y. Mine office: Butte, Bow Co., Mont. W. T. Van Brunt, president; Thos. Lavell, vice-pres Fayette Harrington, secretary and treasurer; D. S. Harding, assistant sec and treasurer; G. A. Lauzier, managing director; preceding officers, Ge Lovell, Chas. Passmore and Wm. McDermott, directors; John A. Ryan, intendent. Organized October, 1906, under laws of Arizona, with capi tion $5,000,000, shares $5 par, as North Butte Extension Mining Co., and changed, January, 1907, to present title. Is said to have circa 2,500 holders. In August, 1908, contemplated an issue of $400,000 five-yea bonds, but apparently was unable to place same.

Lands originally were 4 claims and 2 millsites, area 55 acres, lying of the Butte & London and supposed to carry the extension of the Black vein. In March, 1908, the company added the Michigander and Third S claims, on which options were extended, October, 1908. The company al its options on the Occidental and Free Trade claims to lapse, 1908, afte ment of $90,000 on the bonds. Apparently the only property owned ou is the Black Crow fractional claim, of circa 2½ acres area, and the C and Assay millsites.

Development was by a 600′ shaft, planned to have been sunk to 1,000′, proved to be quite wet. A crosscut on the 300′ level showed a small slightly mineralized, and on the 520′ level a plat, cut April, 1908, sho stringer of 2″ to 18″ width, carrying ore assaying up to 20% copper, 3 oz. and 50 cents gold per ton.

The company planned a large electric installation, including a drum hoist, air-compressor and pump, but failed to get it.

A curb pool in the stock of this company was badly nipped, throu dumping of shares held by a bank, as collateral for a loan, hence the p has few friends among the New York curb brokers, who rest under the i sion that they were handed a package, by friends in Butte.

It is alleged that G. A. Lauzier, vendor, made a contract, Jan. 17 with W. T. Van Brunt, the president, giving an option on 700,000 sh 76 2/7 cents per share, and that, by conspiracy, false and fictitious sh the amount of 222,150, were issued from the treasury, with a furthe issue of 100,000 shares, held by Lauzier, and there also is alleged a mi *priation* of $50,000.

The first bankruptcy proceedings begun against the vendors were

he company's favor, but a second series was started. Both Lauzier, the lor, and John A. Ryan, the manager, sued the company.

In October, 1908, sundry interests planned a reorganization, under the s of Maine, with capitalization $1,500,000, shares $1 par, these plans call- for the elimination of the entire former directorate, which is in exceed- y bad odor with investors. The title selected for the proposed reorganiza- n was North Butte Extension Development Co., and the plan of reorganiza- n called for the issue of 1,000,000 shares of stock in the new corporation, exchange for old shares on a parity, plus payment of a 50-cent assessment, 2 installments, the first money to be turned over to the old company for ttlement of its debts, which are pressing. The company owed, late 1907, a ge balance on its bonds on 2 claims, in addition to floating indebtedness timated at $125,000, but, on June 27, 1908, the floating debt, amounting to rca $70,000, was partially met by the sale of notes. The entire proposition s been badly handled, and everybody connected with it comes out with a tirched reputation, while some of the principals can congratulate themselves lucky in having escaped jail.

ORTH BUTTE EXTENSION MINING CO. **MONTANA.**

Dead. Was organized October, 1906, under laws of Arizona, with capital- ation $5,000,000, and title changed, January, 1907, to North Butte Extension pper Mining Co. Formerly at Butte, Silver Bow Co., Mont.

ORTH BUTTE MINING CO. **MONTANA.**

Office: 508 Lyceum Bldg., Duluth, Minn. Mine office: Butte, Silver Bow , Mont. Employs circa 900 men. Capt. Jas. Hoatson, president; Chas. A. ean, vice-president and treasurer; Jos. Cotton, second vice-president and citor; preceding officers, Wm. J. Olcott, John Uno Sebenius, Chester A. gdon, James Gayley, Thomas F. Cole and Daniel M. Clemson, directors; leric R. Kennedy, secretary; Arthur C. Carson, general manager.

Organized Apr. 5, 1905, under laws of Minnesota, with capitalization 00,000, shares $15 par; issued, $6,000,000. American Loan & Trust Co., on, transfer agent; Old Colony Trust Co., Boston, registrar. Shares are d on the Boston Stock Exchange. Has about 5,000 shareholders.

Dividends have been as follows: $1.25 per share in 1905; $7.25 per share 906; $6 per share in 1907; $3 per share in 1908; a total of $17.50 per share, 7,000,000, for four years' operations. Last regular dividend was passed nd of 1907, owing to depression in the metal market. Net earnings, 1907, $2.14 per share. Company ended 1908 earning at the rate of about $7 share per annum. Balance sheet, at end of fiscal year March 31, 1907, actual cost of lands at $7,211,277.

Lands are circa 200 acres, mainly owned outright, but with some small tional interests outstanding, in the case of several properties. The tract compact as could be expected in a district where claims are so irregu- located as in Butte, with small fractions so valuable as is the case. Hold- include the following claims: Speculator, Edith May, Jessie, Adirondack, Emmett, Berlin, Ground Hog, Gustavus, East Gem, West Gem, Copper m, Croesus, Miners' Union, Eva, Emily, Snow Ball, Margaretha, Hancock, hburg and Mill View. Several small fractional interests were exchanged, with the Davis-Daly Estates Copper Co. The Berlin group includes 5 s, and the Ground Hog claim is a small 700′ fraction between the Jessie Hancock. The lands are in the northern part of the proven portion of utte district, near the Anaconda and Boston & Montana mines.

The North Butte is the largest single mine in the camp, and also mines ighest average grade of ore of any Butte mine. The ore is typical of the district, including much high grade chalcocite, frequently massive, but y disseminated, *with considerable quantities* of enargite, and smaller

proportions of other secondary sulphides and chalcopyrite. All ores are m
or less argentiferous, frequently carrying high silver values.

Development is mainly on the Speculator, Jessie and Edith May prop
ties, the lands carrying about one-half mile of the Edith May vein. All o
is raised through the Speculator shaft, and the mines are connected und
ground with the High Ore mine of the Anaconda, and the new Badger Sta
shaft of the Boston & Montana. The old Speculator shaft, taken over in ba
condition, was cut down to 4 compartments, and entirely retimbered, in
weeks, in 1905, during which time ore was hoisted through the High Ore shaf
The Speculator shaft, 1,700′ deep when the property was taken over, 1905,
now 2,240′ deep, with levels opened at 200′ intervals, from the 1,400′ to 2,20
levels inclusive. At the end of 1908 stoping was in progress on the 1,40
1,600′ and 1,800′ levels, with development in progress on the 2,000′ and 2,20
levels. This shaft develops the Speculator, Edith May, Gem and Jessie vein

The veins are treacherous, requiring heavy timbering and close attentio
square sets being employed throughout, with monthly timber requirements
about 1,000,000′, board measure. No waste is hoisted, all ore being sorte
underground, and culls used for dry filling. Cull material is largely low gra
ore, a considerable portion of which probably will be available for smelting
some future date, and can be extracted merely by loading. On Apr. 1, 190
the mine had about 18,000′ of workings, and 6,961′ of new workings were mad
in 1907. The company ended 1907 with 4 years' ore reserves, and at the en
of 1908 had ore reserves of at least 8 years, the openings on the 2,000′ an
2,200′ levels at least doubling the amount of former reserves, with every pro
pect of immense bodies of exceptionally rich ore at greater depth. The fir
ore was hoisted September, 1908, from the 2,200′ level.

The Edith May vein, the principal ore body of the property, as now de
veloped, is 18′ to 42′ in width, carrying phenomenally high grade ores. The
vein is opened at 200′ intervals from the 800′ to the 2,200′ levels, carryin
much chalcocite and bornite, with considerable enargite, the vein increasin
in richness at depth, the north drift on the 1,800′ level of the Edith May ve
being the show stope of Butte, and one of the most phenomenal stopes ev
opened in any copper mine. The Edith May vein divides east of the shaf
and on the 1,600′ and 1,800′ levels shows no commercial ore in the sou
branch, but apparently these branches should unite, some distance west of th
shaft.

The Jessie mine has an old and idle 500′ shaft, extraction being throu
the Speculator, which reaches the Jessie vein by crosscuts. The Jessie sho
a well-mineralized 12′ vein, with a paystreak of high grade chalcocite on th
1,600′ level.

The Gem mine has an old 700′ shaft, now idle, and to all practical purpo
may be considered a portion of the Jessie workings.

The Miners' Union claim, reached on the 1,600′ level through the Spe
lator shaft, via the Edith May vein, shows a fine body of high grade ore.

The Ground Hog mine, reached from the Jessie workings, shows good
on the 1,600′ level.

The Adirondack mine has an old 500′ shaft, and presumably will
opened by crosscuts from the Speculator shaft.

The Berlin mine, to the north of the Speculator, Edith May, Gem
Jessie, has an old 350′ two-compartment shaft, out of commission, and a n
shaft of larger capacity is planned. The Berlin has been opened from
Speculator shaft by crosscuts on the 1,000′ and 1,200′ levels, showing rat
disappointing ore of low average grade, but, late 1908, crosscutting was
progress on 3 levels, from the Speculator shaft, for the Berlin vein, the 1,6

crosscut showing low grade ore. The Berlin, however, should prove to carry higher grade ore with further development.

The Speculator shaft has a 128′ steel gallows-frame, standing on a 41x60′ concrete foundation, having self-dumping skips and pockets with a daily capacity of circa 1,500 tons of ore, as no waste is hoisted, all being used to advantage for underground filling.

The engine-house has a 20-ton traveling crane and a 32x72″ Nordberg duplex-cylinder hoist, operating two cages in counterbalance, with two 8-ton Kimberley skips swung under each, hoisting with 1½″ steel cable, and is capable of raising 2,000 tons daily from an average depth of 2,000′, with capacity to hoist from a depth of 3,500′. An 18x36″ duplex-cylinder hoist operates a double-deck cage in a third compartment, for handling men, material and timber, and the shaft has a fourth compartment for ladder and pipes.

The compressor-house, 24x70′ in size, has a 40-drill air-compressor, with piston efficiency of 3,282 cubic feet of free air per minute reduced to a pressure of 70 lbs. per square inch.

The boiler-house has two batteries of boilers, including boilers of 500 h. p. capacity installed late 1907.

Ore is smelted by the Washoe works of the Anaconda. The original 3-year contract, made 1905, was renewed for 3 years June 1, 1908, the new contract reducing the cost of smelting by about $1 per ton, and providing for settlements on the basis of the average price of copper for the third month after delivery of ore, on the 14th day of the month, which is advantageous on a rising market, but disadvantageous on a falling market. The North Butte contract with the Washoe smelter permits the North Butte to supply the smelter to one-fifth of its capacity, which nominally is 10,000 tons, and actually is nearly or quite 12,000 tons, providing for smelting an output from the North Butte of 2,000 to 2,400 tons daily, which is beyond the present possible productive capacity of the mine, with a single shaft. The Butte Reduction Works treated some ore for the North Butte, when the Washoe works were closed, 1907-1908.

Relations between the North Butte and the Amalgamated Copper Co. are very close and cordial. While this may prove to the disadvantage of the company at such times as the Amalgamated interests see fit to hold the umbrella over the metal market, there can be no question that, on the whole, the North Butte is in better position for being on such friendly terms with its powerful neighbor.

Production for fiscal years ending March 31 has been as follows: 30,954,788 lbs. in 1906; 32,865,907 lbs. in 1907; 16,520,062 lbs. in 1908. For calendar year 1907 the production was circa 37,500,000 lbs. Production was curtailed for the fiscal year ending March 31, 1907, by repairs on the shaft and the installation of a new hoisting plant, and for fiscal year ending March 31, 1908, production was greatly curtailed by suspension of output late in 1907 until early 1908. The company shipped, for last 3 quarters of 1908, circa 1,400 tons daily of ore representing 3,500,000 to 4,000,000 lbs. fine copper monthly.

Gross earnings and net profits, after the deduction of all expenditures for improvements, have been as follows, for fiscal years ending March 31: $5,788 gross earnings, from copper, silver and gold produced, with net profits $2,720,670, in 1906; gross earnings of $6,694,844 and net profits of $3,623,162 in 1907; gross earnings of $2,703,971 and net profits of $857,880 in 1908. Company's ended fiscal year March 31, 1908, with $174,774 cash on hand, with accounts receivable of $10,620, and accounts payable of $74,412.

Returns to the State of Montana, for year ending June 1, 1908, gave a production of 284,003 short tons of ore, with average gross values of $11.36 per ton, with gross proceeds of $3,224,763 and net profit of $1,113,647. Costs were

$3.49 per ton for mining and $3.76 per ton for reduction, with average cost $7.43 per ton. Apparently the gross costs for refining, freight and selling charges are about 2.05 cents per lb. Mining costs, for year ending June 1908, of $3.49, were $1.40 per ton lower than for the preceding year, and mining costs are said to have been reduced to $2.70 per ton, which is a very creditable figure. Costs for July, 1908, were 7.35 cents per lb. of copper, with average extraction of about 6.5%, or about double the average of the Anaconda, and costs were said, October, 1908, to be between 7 and 8 cents per lb. Production includes circa 150,000 oz. silver monthly, with considerable gold values, on a basis of 1,400 tons of ore daily, or nearly $1,000,000 yearly returns from the precious metals.

Apparently the company's ores returned an average of about 5% copper only, for fiscal year ending March 31, 1907, as against 7% in the preceding year, but this apparent decline in values was due to the policy of the company in extracting largely second class ores, during the era of high prices for copper. This policy greatly increased the gross cost per lb., but secured a handsome profit on ores that would net the company nothing during a period of low prices. While this policy is criticized, it seems fundamentally sound as it permits the profitable extraction of much ore that otherwise would be unavailable.

The North Butte is capable of making nearly or quite the cheapest copper produced from any mine in the camp. The company has been criticized for its smelting contract with the Anaconda, but a careful consideration of the facts leads to the conclusion that its contract is advantageous, rather than the reverse, to the North Butte Mining Co. The property is capable, with its present equipment, of producing, at its full capacity, from high grade ores, nearly or quite 60,000,000 lbs. fine copper yearly, but is following a better policy by extracting considerable quantities of medium grade ores in periods of low prices for copper, and large quantities of low grade ores in times of high copper prices. The North Butte is a magnificent property, and is excellently managed.

NORTH BUTTE MOUNTAIN COPPER CO. MONTANA.

Letter returned unclaimed from former office, 803-43 Exchange Place, New York, N. Y., and from former mine office, Butte, Silver Bow Co., Mont. Thos. A. Marlowe, president; Chas. M. Webster, vice-president; J. L. Smith, treasurer; E. L. Mayo, secretary and manager; preceding officers, F. E. Kessler, H. L. Wilson, Thos. Bryant, M. S. Largy, T. B. Miller and H. R. Cunningham, directors; Jas. E. Higgins, superintendent. Organized April, 1906, under laws of Montana, with capitalization $5,000,000, shares $5 par. Lands, 8 claims, area circa 150 acres, lying north of Walkerville and northwest of the Butte & Bacorn, including the J. I. C. group, 8 claims, circa one mile north of the Jessie mine of the North Butte, said to have a good surface showing, with 3 veins, one of which, of 7' estimated width, shows a little copper and silver, at depth of 35'. Lands are said to include 9 distinct veins, with one, of 6' to 8' width, giving surface assays of 0.2 to 1.25% copper, 6 to 14 oz. silver and $4 to $6 gold per ton. Idle at last accounts, but said to have cash on hand, and to plan resumption.

NORTH BUTTE SUMMIT COPPER MINING CO. MONTANA.

Dead. Was organized January, 1907, by residents of Butte. Lands were 7 claims, in the Lost Child district, circa 5 miles northeast of Butte, showing ore giving assays of 1.3% copper. Formerly at Butte, Silver Bow Co., Mont.

Davey, resident engineer; Tom Donald, secretary. Organized Feb. 16,
r laws of *Great Britain as Northern* Territories (B. S. A.) Exploring

Co., Ltd., and name, changed June, 1899, to present title, with capitalization £250,000, shares £1 par; issued, £178,000. Debentures, £45,900 outstanding, 6%; issued 1903, redeemable at £105, December, 1908, and convertible, when fully paid, into £10 shares, on one month's notice, in writing.

The company large share interests in the Rhodesia Copper Co., Ltd., also in the Kafue and other corporations. Apparently the Bwana M'Kubwa mine formerly owned by this company, has been sold to a subsidiary corporation the Northern & General Syndicate, Ltd. Owing to the interchange of share ownerships between these different companies, it is extremely difficult to arrive at their true status, such vast and loose financing rendering the work of investigation extremely difficult, while the various companies give reports upon the properties in which they are interested, without detailed explanation as whether such properties are owned outright, or are merely interests owned through holding shares in other corporations possessing direct title.

Lands, originally were 500 square miles, near the Zambesi river, also 12,000 acres of coal lands and 220 gold claims in the Umniati and Guay districts, but 500 square miles were sold to the Rhodesia Copper Co., Ltd., leaving 5 blocks of 10 square miles each, on either side of the northern reach of the Kafue river, scattered over an area of 160 miles east and west by 100 miles north and south. Lands include the Silver King, Sable Antelope, North Star, Maurice Gifford, True Blue, Wonder Rocks, Crystal Jacket, Blue Jacket, Bob Lou-Lou, Sugar Loaf, Lishambika, Inyarka, Kwemba, Hippo, and Beehive, in the main concession, also the Chanobi concession of 10 square miles, southeast of the main concession. Of the 11 so-called mines, but 3 are really worthy the name, these being the Chanobi, Silver King and Sable Antelope, the two latter being small, pockety mines. Apparently the lands are being prospected in connection with the Rhodesia Copper Co., Ltd.

The principal copper deposits so far located are at and near sundry ancient workings, located in a belt of limestone, about 10 miles wide, running nearly north and south for almost the entire length of the concession. The limestone belt is flanked and sometimes intruded by talcose, quartzose and micaceous schists, and by granite, feldspar and quartz-porphyries, the copper occurring as irregular deposits in limestone, and in veins traversing schists, with oxidation at surface, the predominant ores being tetrahedrite and chalcocite, with occasional bornite and chalcopyrite, the ores in schists being more highly oxidized than those in limestone. The company has secured ores in greater or less quantities, ranging from 2.5 to 50% copper tenor, and also has ores of lead and zinc, sundry gold claims and a 12" to 24" seam of bituminous coal, with indications of the existence of larger coal measures of better quality.

The company's main camp is at the Silver King mine, in south latitude 14° 36' 11" and east longitude 26° 55', twelve miles south of the northerly reach of the Kafue river. The main shaft was 205' deep at last accounts, the ore body, which apparently is a lense, pinching out before the bottom of the shaft was reached, with the possibility that other lenses will follow.

The Chanobi mine, 45 miles from the Silver King, has 5 shafts on 4 separate outcrops. No. 1 shaft is 100'; No. 2 outcrop has a north shaft of 92' and a south shaft of 98', latter showing favorable copper values at bottom; No. 3 outcrop has a 78' shaft showing chalcopyrite and occasional chalcocite; No. 4 outcrop shows copper carbonates on surface. Apparently the various outcrops are of the same small sulphide vein. The Chanobi has a warehouse, and a compound for native workmen.

The Sable Antelope has 3 shafts, showing high-grade chalcopyrite in a vein of 20' width, on the 50' level.

The Hippo mine has a 99' shaft, showing from depth of 34' to 99' a good vein of 4' 8" average width, assaying 21.36% copper and 2.4 dwts. to 13 dwts

per long ton. A second shaft, of 100′, seems not to have developed any- of especial promise.

The True Blue mine has steam power and a pump. The Sugar Loaf mine an immense ore outcrop standing 120′ high, and a tunnel showing a con- able body of low-grade copper ore. No. 3 shaft of the Blue Jacket mine, deep, shows carbonate copper ores and chalcopyrite.

Transportation is by traction engines to the nearest railroad, which is ned to reach the Kafue river eventually, and probably will touch the .

The management seems good, and some of the copper properties are con- ed promising, but further extensive development will be required before company can become a producer, with any reasonable degree of safety, of the properties having been opened to sufficient depth to give assured age.

THERN EXPLORATION CO. **BRITISH COLUMBIA.**

Office: 655 New York Blk., Seattle, Wash. Mine office: Gribbell Island, na River division, Cassiar district, B. C. Capitalization $500,000, shares ar. Presumably idle.

as El Colosus, lying circa 25 miles west of Suaqui de Batuc. Idle and app
ently moribund.

NORTHERN TERRITORIES MINES OF AUSTRALIA, LTD. AUSTRALI

Office: Broad Street House, London, E. C., Eng. Mine offices: Palme
ton, Northern Territories, South Australia, and Dundas, Montagu Co., T
mania. H. J. Nevill, chairman; T. I. Dyson, manager; H. Simpson, secreta
Organized Jan. 25, 1905, under laws of Great Britain, as a reconstruction
Northern Territories Mining & Smelting Co., Ltd., with capitalization £175,0
shares 10s. par; issued, £160,003.

Lands are in two groups, in South Australia and Tasmania, including
Howley mine and adjoining properties, area 604 acres, circa 70 miles fr
Palmerston and 113 miles by rail from Port Darwin. The copper properties
this group include the Mount Ellison mine, opened by a 143′ shaft, showi
auriferous and argentiferous copper ores, assaying up to 12% in copper ten
The mine is very wet, and apparently nearly exhausted. The Iron Blow mi
has a 196′ main shaft, and a mining plant with an air-compressor, with o
bins at the mine, connected by a one-mile tram with the smelter.

The Yam Creek smelter, in South Australia, formerly had two rev
beratory furnaces, and a converter that was not installed. This smelter, co
pleted 1904, ran 3 months only, treating an average of 66 long tons of o
daily, producing 204 long tons of matte carrying 61 long tons copper, cir
17,500 oz. silver and 350 oz. gold. In 1907 the smelter was dismantled, a
material shipped to Tasmania.

The Northern Territories property includes a 40-stamp mill at the Howl
mine, Yam Creek, and a 20-stamp mill at Brock's Creek. Apparently both s
idle.

The Tasmanian properties include the Adelaide lead mine, area 160 acr
at Dundas, where operations are largely centered, with a small lead smelt

The company and its various predecessors have struggled against financ
difficulties, due mainly to lack of cash, from their births.

Office: care of Joseph A. Jennings, secretary, Salt Lake City, Utah. Mine office: Oasis, Millard Co., Utah. M. S. Browning, president; John T. White, vice-president; Joseph B. Toronto, treasurer; J. D. Clive, manager. Organized April, 1904, under laws of Utah, with capitalization $250,000, shares $1 par. Lands, in the Drum district, are opened by a 185′ shaft, showing 6 ore chutes, from which ore assaying 4.3% copper, 10 oz. silver and $19.20 gold per ton, was shipped, 1904, to Salt Lake smelters. Idle several years.

OATES-NEWMAN COPPER CO. **ARIZONA.**

Mine office: Globe, Gila Co., Ariz. F. C. Alsdorf, superintendent, at last accounts.

OAXACA CONSOLIDATED COPPER CO. **MEXICO.**

Office: Ap. 49, Oaxaca, Oax., Mex. C. C. Lastinger, manager, at last accounts. Property includes the Magistral and Predilecta mines, near Oaxaca, carrying copper ores. Has water power.

OAXACA EXPLORATION CO. **MEXICO.**

Mine office: Ocotlán, Oaxaca, Mex. Has auriferous and argentiferous copper ores, opened by 2 shafts, of about 150′ each, and is equipped with steam power. Presumably idle.

OAXACA MINES & EXPLORATION CO. **MEXICO.**

Office: care of Kaye, DeWolf & Co., New York, N. Y. Works office: Oaxaca, Oaxaca, Mex. Harry M. Holbrook, president; O. F. Westlund, general manager; R. R. Moore, superintendent; Jos. T. Wallace, receiver.

Property is a smelter, 4 kilometers from Oaxaca, completed August, 1907, rated at 600 tons daily capacity, having two 46x162″ water-jacket blast-furnaces, 22′ high over all. These are planned for reduction of either lead or copper ore, with daily capacity each of about 175 tons of lead ore or 300 tons of copper ore. Has electric power and crushers. Receiver appointed, and bondholders plan reorganization. With finances on a substantial basis, and given good management, the plant might prove successful, as it could draw ore from a rich district.

OAXACA MINING, MILLING & INVESTMENT CO. **MEXICO.**

Office: Wilmington, Del. Mine office: Ixtlán de Juárez, Ixtlán, Oaxaca, Mex. C. C. Arthur, manager; Robert McCormick, superintendent. Property includes La Esperanza mine, having auriferous and argentiferous lead, copper and zinc sulphides, with water power and 10-stamp mill.

OAXACA SMELTING & REFINING CO. **MEXICO.**

Dead. Property was sold, circa July, 1908, at public auction, and was bought in, by bondholders, for $275,546. Formerly at Oaxaca, Oaxaca, Mex.

OE MINE. **JAPAN.**

Mine office: Nakanosha-mura, Tsu-gori, Bitchu, Japan. Employs circa 100 men. T. Sakamoto, owner; K. Ogawa, manager. Is a very old mine, having numerous 2′ to 4′ veins carrying chalcopyrite, and small quantities of argentiferous galena, with quartz gangue, traversing clay-slate and granite. Has steam power and a good smelter. Production was 1,281,146 lbs. fine copper in 1903; 1,455,488 lbs. in 1906, and 1,541,806 lbs. in 1907.

O. GRAY COPPER CO. **NEW JERSEY.**

Dead. Formerly at Pennington, Mercer Co., N. J. Described Vol. VI.

OCALA COPPER CO. **NEW MEXICO.**

Mine office: Silver City, Grant Co., N. M. R. P. Thompson, superintendent. Lands, in the Burro Mountains, said to give a promising surface showing, with a 185′ shaft, showing low grade copper sulphide ore.

OCAMPO MINING CO. **MEXICO.**

Mine office: Cuatro Ciénegas, Monclova, Coahuila, Mex. José Marco, manager. Lands include El Barrio *mine, carrying* auriferous and argentiferous

copper ores, equipped with steam power. Employed circa 100 m accounts.

CAMILO OCAÑA.

Office and mine: Taltal, Antofagasta, Chile. Ramón A. H David B. Contreras, superintendents. La Estrella de Venus mine, depth of 125 meters, but hampered in operation by excess of wate ore said to average 24.1% copper, after selection. La Ligua and La mines carry auriferous and argentiferous copper ores. Equipme steam power and a concentrator with 4 Chilean mills. Mine and wor circa 75 men.

OCCIDENTAL COPPER CO.

Office: 120 Broadway, New York, N. Y. Mine office: Hach Co., N. M. Idle. Saml. W. Fergusson, president and general manag R. Hensey, vice-president and treasurer; Joseph R. Draney, secretar ing officers, Garth W. Fergusson, Emlyn Lewys, Anthony J. Rom Rosendale, Geo. F. Small and Horace P. May, directors. Organize 1906, under laws of Arizona, with capitalization $5,000,000, share issued, $3,025,000, as successor of the Royal Morelos Copper Co. An ing, first Tuesday in December.

Lands, circa 700 acres, in the Suna Rica district of Chihuahu 7 miles south of El Paso & Southwestern railway and just south of Mexico line, showing limestone, with eruptive dikes, carrying mainly ores, with some bornite and chalcopyrite. Development is by 5 pits a of 16′ to 68′ depth, and a small tunnel. Property has 8 buildings. I

OCCIDENTAL MINING CO. CAL

Office: 6 Eddy St., San Francisco, Cal. Mine office: Keswi Co., Cal. Lands are claimed to be 3 miles south of the Iron Moun opened by 2 tunnels. Company's advertising is filled with miss and corporation presumably is merely a stock-jobbing device.

MINERAL DE COBRE LOS OCOTES, S. A.

Dead. Lands sold, 1906, to Teziutlán Copper Mining & Smeltin $565,000. Formerly at Ejutla, Oaxaca, Mex. Described Vol. VI.

OCTAVIA MINING CO. W

Mine office: Cambria, Weston Co., Wyo. David Jones, presiden 54 claims, including the Straight Up group, near the head of Ja slightly developed by a 60′ tunnel. Idle, since circa 1904, but f assessment work.

ODIN MINING CO.

Mine office: Park City, Summit Co., Utah. Main tunnel, 740 Odin and Columbus veins, former, of about 2′ width, showing an a about 3% copper, with some ore assaying up to 4% copper, 40% le oz. silver per ton. First smelter shipment returned 2.7% copper, 1 40 oz. silver and $2 gold per ton.

O'DONNELL COPPER CO. A

Dead. Formerly at Clifton, Graham Co., Ariz.

OGDEN BUCKHORN MINING CO.

Office and mine: Ogden, Weber Co., Utah. F. L. Woods, mana S. Burbank, superintendent. Lands, in Coldwater Cañon, shortly east have a 12′ vein, with paystreak giving assays of 34% copper, 9 oz. oz. gold per ton.

OGOYA MINE.

Mine office: Nishio-mura, Nomi-gori, Kaga, Japan. T. Yokoya and general manager.

Mine, opened 1878, carries chalcopyrite, associated with n cassiterite, bornite, native copper and pyrite, with quartz gangue, in

traversing liparite. Three practically parallel veins main are worked, ranging 1" to 4' in width, and 500' to 2,000' in length. Mining plant is n, and property has a hydro-electric power installation. Smelter is rated ly 30 tons daily capacity, but probably is larger. Production was 967 lbs. fine copper in 1906 and 1,412,706 lbs. in 1907, an increase of ally 50% in eight years.

RA MOUNTAIN GOLD & COPPER CO. **NEVADA.**

lice: Denver, Colo. Mine office: Reno, Washoe Co., Nev. Alleged y was claims in the Grapevine district of Nevada, and O'Hara, the er, is a professional bunco-steerer, masquerading as a mine promoter. arrested, tried and found guilty of swindling operations in connection e promotion of this company, and for punishment was given a light a sentence of one day in jail, which leads to the inevitable conclu- d there is a very strong sentiment in Denver in favor of fake mining rs. Denver is one of the most beautiful towns in the United States, population includes some of the greatest scoundrels in existence, and n unenviable reputation among investors as the hatching place of a le of fraudulent mining companies. So notorious is this fact that te mining companies with offices in Denver are seriously handicapped.

ARIZONA COPPER MINING & SMELTING CO. **ARIZONA.**

d. Corporation dissolved, 1903. Formerly had an office in Covington, Ky.

COLORADO SMELTING & REFINING CO. **COLORADO.**

e and works: Salida, Chaffee Co., Colo. John M. Thomas, general ; Geo. B. Griswold, superintendent. Smelter, rated at 1,000 tons daily , is equipped with steam and electric power and has a refinery, doing l custom smelting business in gold, silver, lead and copper ores, from Juan district and elsewhere in Colorado.

OPPER CO. **UTAH.**

e: 42 Broadway, New York, N. Y. Mine office: Bingham Canyon, e Co., Utah. Jas. MacFarlane, president; Russell Hopkins, first vice- t; Carlos Warfield, second vice-president; George Baglin, secretary surer; preceding officers, David Keith, Thos. Weir, N. J. Catrow, J. P. son, F. August Heinze and Philip Carroll, directors; Duncan McVichie, manager; Colin MacIntosh, superintendent; W. A. Kidney, mill super- t.

nized Nov. 1, 1903, under laws of Maine, with capitalization 0, and reorganized, 1907, under laws of Maine, with capitalization 00, shares $10 par, and an increase in capitalization to $15,000,000, 0 par, was authorized February, 1908. Is controlled by United Copper ugh ownership of about two-thirds of stock issue.

ls authorized, $2,000,000 ten-year 6% gold bonds, in denominations of ated Sept. 1, 1907, convertible into stock at $10 per share, at any ore maturity. Previous to new bond issue of 1908 company was said irca $350,000. Company plans a sinking fund, calling for $120,000 eginning Sept. 1, 1910.

s, 14 claims, patented, area 120 acres, surrounded by holdings of Copper Co., Boston Consolidated, United States, Fortuna and Copper Property was bought of the Columbia Copper Mining Co. for $245,000. ore body formerly was a vein carrying disseminated chalcopyrite, width of 30' on the 400' level, but the principal ore, as developed is cupriferous monzonite, similar to that of the Utah Copper Co. and nsolidated, but said to concentrate somewhat better. Late 1907 the had developed ore under about 5 acres, the porphyritic ore body mated at 400' in width, 1,000' in length and 600' in depth, latter

figure being considered excessive, and company estimated, September, having ore reserves of 13,484,855 tons, averaging 1.606% in copper tenor.

Development is by several shallow shafts, one showing a 3' vein carr an 8" paystreak of malachite averaging circa 25% copper, balance of being disseminated cuprite, estimated to average 5.12% copper. The 3- partment 580' main shaft, begun circa October, 1906, sunk at an angle of is to be connected, at depth of 1,100', early 1909, with the Mascotte tu of the Dalton & Lark, circa 2½ miles in length. The Mascotte tunnel been enlarged, retimbered and double-tracked, and ore extraction will be electric haulage, with 5-ton cars. In addition to the Mascotte tunnel, property has an 800' main crosscut tunnel, which intercepts the What C and All's Well veins, lying 400' apart and parallel. The All's Well show 6' vein assaying up to 5% copper, with small gold values, and a winze on What Cheer vein is said to show 11' of rich sulphides. Ores shipped by old management were said to average 12% copper.

The property includes an old gravity mill with 5 stamps, and a 20-ton centrator, both remains of former ownership, and both idle.

The Winnimuck mill, bought 1904, and enlarged to circa 150 tons d capacity, has 1 crusher, 3 sets of rolls, 1 Chilean mill, 4 three-compart jigs, 50 Wilfley tables and 1 Wilfley slime table.

The new mill, at Lark, near the mouth of the Mascotte tunnel, is of construction, built, 1907, by the Minnesota Steel Co., at a cost of $200,000. This mill, variously rated at 4,000 to 4,500 tons capacity, when pletely equipped, is in eight 500-ton units, of which 4 were practically pleted at the end of 1908, when the mill was expected to be in operation d the first quarter of 1909. Water is supplied from wells in the valley.

The company had financial troubles, in common with many other d oping copper mines, during 1907 and 1908, and considerable property attached for debt, but the debts were adjusted with money secured fro new bond issue.

On test the old Winnimuck mill is said to have given extraction 85% of assay values, and the company estimates that the new mill should 75% of the gross values, or circa 24 lbs. fine copper per ton, from the por ores. The ore is said to concentrate as high as 15 into 1, making a 20% c concentrate, at a cost under 50 cents per ton for milling, and the com estimates that the ore can be mined at a cost of 75 cents per ton. Pro copper costs from the porphyry ores are variously estimated, by differe thorities, at 6 to 9 cents per pound, but it is probable that finished c laid down at the seaboard, will cost much nearer to 10 cents than to 6. property is considered one of exceptional promise.

OHIO LEAD MINING & SMELTING CO. NEV

Office: Salt Lake City, Utah. Mine office: Sprucemont, Elko Co., Lands, 8 claims, area 160 acres, showing 7 fissure veins, said to give a assay values of 7% copper and 7 oz. silver per ton, also a silver-lead opened by a 400' shaft and tunnels of 700' and 900', with circa 3,000' of ings. Has a 50-ton concentrator, and a smelter with 3 small water-jacket furnaces. Presumably idle.

OHIO-MEXICAN MINING CO. ME

Office: 1703 First National Bank Bldg., Cincinnati, Ohio. Mine Caborca, Altar, Sonora, Mex. J. H. McKibben, president; John Hend vice-president and general manager; W. K. McKibben, secretary and urer; preceding officers, O. E. Peters, B. B. Tuttle and Hon. J. A. R directors; I. R. Henderson, mine superintendent; Oscar A. Nemingar, *superintendent*. Organized August, 1904, under laws of Arizona, with ca *ization* $3,000,000, shares $10 par. Lands, 47 acres, also a 25-acre millsit

0 acres ranch lands, showing country rocks of limestone and granite, with phyritic intrusions, carrying several ore bodies, of which 3, under develeat, have estimated average widths of 16', 20' and 40', opened by shafts of 156', 156', 210' and 100' and by a tunnel of 380', with total openings of 4,000', estimated to show 30,000 to 60,000 tons of ore, with 20,000 tons ked out for stoping, giving average assays of 9.3% copper, 4 to 10 oz. r and $2 to $5 gold per ton, from carbonate ores and chalcocite. Mine worked 1857-1860, and reopened, 1904, by present company. Property has h. p. steam plant at the mine, and a 100-h. p. steam plant at the smelter. ment includes 3 hoists, good for 400' to 600' depth, and a 2-drill Rand mpressor, with 15 shops and mine buildings, of wood, sheathed with iron. he smelter, at Calera, receiving ore by wagon from the mine, has a 60-ton jacket blast-furnace, turning out black copper of 90 to 95% tenor, with ed gold and silver values, shipped to the Nichols Copper Co. for electrorefining. Presumably idle.

MINES DEVELOPMENT CO., LTD. **BRITISH COLUMBIA.**

ad. Succeeded, 1907, by True Fissure Mining & Milling Co. Formerly t Lake, Kootenay district, B. C.

Y MINING CO. **MICHIGAN.**

e: Lyceum Bldg., Duluth, Minn. Operating office: Houghton, Mich. ice: Phœnix, Keweenaw Co., Mich. Dr. L. L. Hubbard, president eral manager; Chas. A. Duncan, first vice-president and treasurer; Huggart, second vice-president; preceding officers, Thos. F. Cole, Capt. tson, Capt. Thos. Hoatson, Chas. d'Autremont, Jr., Chester A. Congdon, Ryan and Oscar J. Larson, directors; Frederick Kennedy, secretary; ormis, superintendent; *Capt. Richard* Trevarthen, chief mining eay

tain; Henry Roberts, assistant superintendent; Wm. H. Charlton, clerk; Stephens, master mechanic.

Organized June 8, 1907, under laws of Michigan, with capitaliz $2,500,000, shares $25 par; issued, $2,100,000. Company began business circa $500,000 cash, and June 1, 1908, had cash resources of $227,342, and not need to call for further funds until about the middle of 1909.

Lands, circa 1,600 acres, bounded on the north by the Cliff and on south by the Seneca. Property includes the old Manhattan tract, Bac Jacobs lands, property bought of the Union Copper Land & Mining Co., the Miskwabik tract of 1,224 acres, in Section 5, Town 57, and Sectio and 33, Town 58, North, all in Range 31 West.

The Kearsarge lode was located, circa 1904, on the Miskawabik t about 4 miles northeast of No. 1 shaft of the Mohawk. The Kearsarge was proven by 5 diamond drill holes, crossing the formation at interval 1,200', of which 4 holes gave good cores, predicating the making of a mine, the cores being especially rich well toward the northern limits o tract. The drill cores showed the Kearsarge amygdaloidal bed to be di into 4 sections, separated by narrow layers of trap, and underground wor verified this peculiar condition.

Development is by 2 shafts, both sunk at an average depth of circa 4 the footwall, which shows some heavy copper, indicating strong miner tion. Work was begun July, 1907, and good progress has been made. shafts are concreted from their collars into the rock ledge, and both permanent concrete roadbeds.

No. 1 shaft, circa 1,500' from the northern boundary of the property sinking for the 650' level at the end of 1908. A crosscut to the west on the 500' level, late 1908, penetrated a 30' amygdaloidal bed, thought the lower footwall bed of the Kearsarge lode, with principal ore value pected in the upper bed, and the second bed from the base of the series opened November, 1908, this being about 20' in width.

No. 2 shaft, about 1,100' southwest of No. 1, was circa 500' deep a end of 1908, opening a well mineralized bed of about 15' width.

The power plant is unusually complete for a new property. The central power-house, between the two shafthouses, has 2 duplicate Nor duplex-cylinder hoists, good for about 2,000' depth, the cables from the e passing over idlers and turn-sheaves at each shaft. Steam is furnish 150-h. p. Burt locomotive-firebox boilers, the steam plant having a 10 condenser. Buildings are heated by the Webster reheating system, charg exhaust from the air-compressor, which also heats water for boiler feed. power plant includes an air-compressor and a 140-h. p. Russell high-spe gine, belt-connected to a 100-kw. generator. Power is furnished the v shops by individual motors, and the mine has an electric pump, with ca of 85 gallons per minute working against a 500' head. There also is an e light plant.

Near the central power plant are a carpenter-shop, smithy and ma shop, each 24x48' in size, and a warehouse with an office in front. The ma shop has a hardwood floor, laid with 2x4" stringers, bedded in concrete. also is a 28x48' bunk-house and 24 dwellings for employes, at a townsite one-half mile from the shafts, the mine and townsite having hydrants complete water system, with ample fire protection.

The mine is served by the Keweenaw Central railway, a short spur the main line reaching the shafts and buildings.

The Ojibway has an exceptionally strong and experienced manage and is being developed along systematic and well considered lines, with *prospect of* making an excellent mine.

CKS, LTD. **AUSTRALIA.**

Cairns, Queensland, Australia. Mine office: Mungana, Queensalia. A. J. Draper, secretary; A. F. Martyn, mine manager. Has f sulphide copper ore. Decided, June, 1908, to liquidate.

ER MINES DEVELOPMENT SYNDICATE, N. L. **AUSTRALIA.**

Cairns, Queensland, Australia. Mine office: Chillagoe, Queensalia. John Newell, chairman; preceding officer, E. B. Torpey, W. and A. Overend, directors; Thos. Welsby, secretary; Richard Shepal manager; H. Twynam, mine manager. Organized under laws of with capitalization £45,000, shares 2s. par. Dividends, 1906, were ., and for first half of 1907 proceeds were £88,637 and profits aid a 1s. dividend Oct. 31, 1907.

haft, early 1907, was 300′ deep, with 4 levels opened, at 80′, 115′, ′, levels being much too close together, with a plat cut at 250′. Little t work was done during the era of high prices, 1906-1907, until late sinking was resumed. This should have been done several years company was badly cramped after the fall in copper. A new ore een opened to the east of the old lode, on the second and third er levels make considerable water. Mine had reserves of 23,400 d out, at end of 1907, ore as smelted running 9 to 10% copper. ill borings, 1907, show the main lode to carry 12% copper at depth eating that the mine will hold values to good depth. Property also rn ore body, cut by drill holes, giving cores assaying 7.5% copper. equipment was overhauled and amplified, 1906, now including a plant, air-compressor, etc. District is arid, causing occasional water, but with frequent excess of water in the rainy season, roads and rendering transportation difficult. Camels, formerly een replaced by traction engines. A railroad, which would greatly of operation, is needed badly.

lter has a converter, added 1906, and a new stack was built, 1907, troublesome fumes. For first half of 1907 actual cost of blister e mine was £40 12s. 6d. per long ton, and for last half of 1907 yielded 8.1% copper, showing a decline in values. Production, 3,867 long tons of ore smelted, giving an average return of 10.8% making 3,351,197 lbs. fine copper. Mine is valuable, but company was overly anxious for dividends, when it would have been much ve accumulated a surplus for emergencies. With a continuance vigorous policy of development, begun 1907, the property should importance and production. Employs circa 250 men.

melting plant of the Rammelsberg mine.

O. K. GOLD & COPPER MINING CO. ARIZONA.

Office: Lyndon, Kansas. Letter returned unclaimed from former mine office, Florence, Pinal Co., Ariz. W. L. Newcomer, president; S. B. Johnson, secretary; J. Banning, treasurer and general manager. Organized 1902, under laws of Arizona, with capitalization $1,000,000, shares $1 par. Lands, 15 claims, area 300 acres, in the Picacho district, showing numerous veins, of which two, of 3′ average width, are opened by 6 shallow shafts, deepest 120′, and by 4 tunnels, longest 125′, showing oxide, carbonate and sulphide ores, giving assays up to 20% copper, with traces of gold and silver. Idle several years and apparently moribund.

OKLAHOMA COPPER CO. ARIZONA.

Office: Shawnee, Okla. English office: Worcester House, Walbrook, London, E. C., Eng. Mine office: Florence, Pinal Co., Ariz. Idle. H. G. Beard, president and general manager; S. T. Pierson, vice-president; H. A. Pierson, secretary and treasurer; preceding officers and W. M. Longmire, directors; Roy Troxel, superintendent. Organized March 29, 1906, under laws of Oklahoma, with capitalization $2,000,000, shares $1 par; issued, $1,120,000.

Lands, 25 claims, unpatented, area circa 500 acres, next south of the Ajax Central Copper Co., in the Mineral Hill district, said to show 5 ore bodies, of which one, under development, of 10′ claimed width, said to be traceable 2½ miles, is estimated by company to average 3% copper and $2 gold per ton, from oxidized ores and chalcopyrite. Development is by 8 pits and shafts, of 20′ to 200′ depth, and by a 50′ tunnel. The advertising of Joseph & Wilson, the fiscal agents, was not altogether correct. Idle.

O. K. SOUTH BLOCK CO. AUSTRALIA.

Mine office: Mungana, Queensland, Australia. Lands, adjoining the O. K. Copper Mines Development Syndicate, N. L., have a 100′ shaft, with steam power.

OKUZU MINE. JAPAN.

Mine office: Okuzu-mura, Kita-Akita-gori, Ugo, Japan. Property shows numerous fissure veins, of about 1′ average and 3′ maximum width, traversing Tertiary tuff and augite-andesite, carrying argentiferous chalcopyrite, associated with pyrite and occasional sphalerite. Mine, near Hanawa, discovered 1604, was worked for 2 centuries for silver, making but a trivial amount of copper as a by-product, but in the past few years the copper output has increased, production having been 143,597 lbs. fine copper in 1906, and 131,467 lbs. copper, 6,404 momme silver and 2,739 momme gold in 1907.

OLALLA COPPER MINING & SMELTING CO. BRITISH COLUMBIA.

Office: Second National Bank Bldg., Paterson, N. J. Mine office: Olalla, East Yale district, B. C. Robert Gaede, president; Joseph Bamford, Jr., vice-president; John E. Tylee, secretary and treasurer; A. A. Watson, general manager. Organized October, 1901, under laws of Maine, with capitalization $8,000,000, shares $25 par. Company controls the Similkameen & Keremeos Ry. Co., capitalized at $3,000,000. Annual meeting, second Tuesday in November.

Lands, about 50 crown-granted claims, area circa 2,500 acres, also a 100-acre mill and smelter-site, in the lower Similkameen and Keremeos camps, Osoyoos division, East Yale district, showing contact veins between diorite and felsite, ore bodies occurring in both, but mainly in the felsite. Veins, about a dozen in number, were claimed, by a former management, to range in width from 3′ to 500′ and were estimated to average about 5% copper, 2 to 5 oz. silver and $1 to $40 gold per ton, but this estimate, which was utterly unwarranted, has been revised to reasonable dimensions by the present management, which claims to be developing a vein averaging 7′ width, carrying auriferous chalcopyrite averaging 1% copper and $4 gold per ton. Gangue is spar, garnetite and magnetite. Development includes a 70′ shaft and tunnels a

200′ and 600′. Property has hand power only, and is 87 miles from 60 miles of which has steamer transportation. Presumable idle.

Dodge, Jas. pley Amory, Chas. S. Lund and J. Waldo Smith, directors. Organ- 5, 1904, under laws of Maine, with capitalization $8,750,000, shares sued, $7,313,025. Company issued 12,000 shares circa April, 1907, st dividend, of 50 cents per share, was paid Dec. 15, 1905, and a $1 per share was paid Aug. 1, 1907.

npany is a securities holding corporation only, organized to promote n of the mines of the Old Dominion Copper Mining & Smelting Co. Globe Mines under a joint management, while technically comply- junctions restraining the merging of these two corporations. Prop- Old Dominion Co. is exclusively shares in the two subsidiary cor-

porations named, and the Old Dominion Co. is controlled by the United
Mines, owned by Phelps, Dodge & Co., the United Globe having given 1
shares of its stock, and $250,000 cash, for 138,000 shares of the Old Dom
Co. The Old Dominion Co. has exchanged its stock for shares of the
Dominion Copper Mining & Smelting Co., and owns nearly 95% of the sto
the Old Dominion Copper Mining & Smelting Co. The balance sheet, on De
1907, showed stock holdings, in subsidiary companies, of $6,981,125, with
and accounts receivable $564,066, with $200,000 floating indebtedness
$11,073 accounts payable, with cash and accounts receivable of $453,920.

The Old Dominion and United Globe mines are operated by the Old
minion Co. as entities, but with a free interchange, upon an equitable
of ores for smelting and fluxing. The Old Dominion Co. financed the flo
indebtedness of the Old Dominion Mining & Smelting Co., by means of a
The properties are described under the titles of their respective owners.

OLD DOMINION COPPER MINING & SMELTING CO. ARIZ

Office: 852-50 Congress St., Boston, Mass. Mine and works office: G
Gila Co., Ariz. Employs circa 2,500 men. Chas. Sumner Smith, president;
ceding officer, Geo. Napier Towle and Dr. Joseph T. Herrick, executive
mittee; preceding officers, Chas. T. Lund, E. F. Newton and G. Waldo S
directors; Chas. H. Altmiller, secretary and treasurer; Niles S. Berray,
eral superintendent; R. B. Hegardt, superintendent; Dr. L. D. Ricketts,
sulting engineer.

Organized July, 1895, under laws of New Jersey, with capitali
$5,000,000, shares $25 par; outstanding, $4,050,000. Is controlled, th
ownership of all but about 8,000 shares, standing in the name of some 25 mi
shareholders, by Old Dominion Co. Annual meeting, first Wednesday in

Paid, July, 1907, a dividend of $1.25 per share, amounting to $2
this being the first since 1895. Company formerly had a considerable fl
debt, which was taken up by the Old Dominion Co., and last of floating
$100,000, was paid, October, 1908. Earnings for 1907 were about
share, or circa $600,000. Balance sheet, of Dec. 31, 1907, showed quick
of $1,696,656, with floating debt and accounts payable of $1,329,848, lea
net balance of quick assets of $366,808. For 4 years, ending 1907, im
ments cost $1,875,647.

The company is engaged in extensive litigation with A. S. Bigelo
the Estate of Leonard Lewisohn, suing for recovery of promotion profits
litigation is extremely involved, being in the state courts of New Jers
Massachusetts, and also in the Federal courts, and has been further
cated by efforts of the New Jersey courts to restrain the company from
cuting suit against the promoters in the Massachusetts courts. On
1907, the company secured, in the Massachusetts court, a verdict for d
of $1,700,000.

Lands, 9 claims, 3 fractional, and a 10-acre millsite, at Globe, also
Dominion and Keystone claims, circa 3½ miles north of Globe, the Cont
group, 240 acres, the Chicago & New York group of 60 acres, and the
mine. Principal developments are on the property at Globe.

The principal ore zone occurs along a displacement having a no
and southwest strike, with sharp dip eastward. The hanging-wall is lim
and quartzite, with footwall of diabase of more recent age, faulting ev
occurring before and after the intrusion of the diabase. The ore fav
hanging-wall, occurring in lenses parallel to the bedding planes of th
stone and quartzite, the largest lense yet developed being circa 60x1
in size. The oxidized ores are mainly cuprite, associated with a little ma
and chrysocolla, in a gangue of iron oxides and quartz. Sulphide or
appear at a depth of about 350', the principal sulphide ore in the upper

ing chalcocite, with gangue of pyrite and quartz, the lower workings
chalcopyrite of 3 to 4% copper tenor. All ores are more or less ar-
rous, and, as a rule, are highly silicious, requiring heavy lime and iron
n smelting. The mine suffered severely from fire and flood, in 1906, and
wet, making circa 3,000,000 gallons of water daily Underground de-
nts are extensive, and during the greater part of 1908, new drifts were
at the rate of 2,000′ to 2,500′ monthly.

was thought, for years, that the ore was cut off in what is known
s the West Country, by a fault, but the extension has been located, and
uch promise. A dam across Pinal Creek was completed, November,
obviate the heavy seepage of water that has caused unduly high
charges in the past. Principal new developments are on the 10th
h levels, in the extreme eastern end of the mine, and on the 10th to
els, inclusive, at the western end. The ore body under Pinal Creek,
1905, shows oxidized ores, up to 20% in copper tenor, on the 8th,
10th levels, with chalcocite of even better copper tenor on the 11th
he property has suffered in the past from lack of sulphide ores, which
en bought extensively from small adjoining mines in the Globe dis-
d also have been imported from other mining fields in Arizona, Cali-
nd Mexico. The mine shows sulphides, of low average copper tenor,
4th, 15th and 16th levels, and these are to be developed extensively,
needed in the smelter.

mine has a pumping capacity of 6,000,000 gallons daily, with a
lon Prescott pump, on the 10th level, which has a 12″ water-column,
ng 30′ above the collar of the shaft, into a launder on a trestle lead-
storage tank, whence water is drawn for use of the mill and smelter.
old shafts of the mine suffered severely from crushes and creeping,
w shafts have been sunk, in the footwall. A shaft, on the western
Pinal Creek, in what is known as the West Country, has 5 compart-
perating two 3-deck cages and one 2-deck cage, and, November, 1908,
below the 14th level. Crosscuts from A shaft, of about 800′ length,
h, 9th and 10th levels, reach the West Country, and crosscuts will be
the 14th and 16th levels also.

aft, on the eastern side of Pinal Creek, has 4 compartments, and is
on the 14th level, with a big station on the 6th level.

aft is bottomed on the 8th level.

aft, on the western side of Pinal Creek, about 2,000′ west of the most
workings previously made, is to be sunk to the 14th or 1,000′ level.
Continental mine shows some high grade sulphide ores, and has con-
ore bodies assaying about 3% only in copper tenor.

ace equipment includes engine-houses and boiler-house of steel frames,
sides and roofs. There is a large and well equipped machine-shop,
a factor of prime importance, as the mine is located some hundreds
from the nearest large custom shops. Equipment includes a 30-drill
hoist, compound air-compressor with intercooler and water-jacketed
ers, and a complete electric light plant. The management has given
tion to the matter of a new electric power plant. Petroleum is used
y for fuel.

nine, mill and smelter are connected by a private railway having a
orter locomotive and 50-ton ore cars.

are graded and furnace charges prepared at the millsite, a short dis-
n the mine. The grading plant has 6 steel coarse ore bins, of 85 tons
ach. Ore is drawn from the various pockets onto trommels of man-
el, undersize dropping to an 18″ conveying belt, which carries it to
torage bins, while oversize goes to a 10x20″ crusher, and thence to

a 36" picking-belt, from which smelting ore is hand-picked, and resi
put through a 10x20" rock-breaker, and crushed to 2" size, the materi
the last crusher being taken, on an 18" belt, to the conveyor storage
200 tons capacity each. From the storage-bins ore is drawn automati
a conveying belt that takes it to the top of the mill, where ore is dis
into a mixing-box, and passed to revolving screens for classification.

The mill, of 300 tons daily capacity, is of structural steel, iron-s
standing on concrete foundations. Equipment includes 18 Frue vann
9 Wilfley tables. The plant is entirely automatic, and is one of the
existence, both in theory and in practice.

The smelter includes several buildings of structural steel on stone
tions. There are 8 double storage-bins, holding 1,000 tons of coke, li
and ore. Mixing, weighing and charging are done automatically, req
force of only 4 men. Equipment includes 6 blast-furnaces, each 44x180
tuyeres, set tandem, with common settlers between, charged auton
from side-dumping cars. The 6 furnaces give the smelter a normal
of about 2,400 tons daily, but one furnace is held in reserve. The
chamber is 20x20x250', connecting with a 200' smokestack, of 23' dia
the bottom and 14' at the top, set on a base 25' above the tuyeres. F
is briquetted for resmelting. Fuel is New Mexican coke, taken from t
son Coke Co., under a one-year contract, at $9.65 per ton, which compa
a former cost of $14.75 per ton for eastern coke, this saving reducing
finished copper about one-half cent per pound.

The converter department has 3 stands, with shells 84x132", linec
mixture of clay and quartzite carrying 4.5% copper, the linings a
about 75% silica, each lining making an average of 18 tons of blister
Shells are handled by a 40-ton electric traveling crane. The convert
50% matte and turn out blister copper of 99.5% copper tenor carryi
silver values. The converter slag-yard is 18x70', with a floor of 2" iro
laid on brick bedded in concrete.

The smelter power plant has two 200-h. p. and two 325-h. p. boile
ing petroleum. Furnace blast is supplied by Connersville blowers,
cubic feet aggregate capacity per minute, and converter blast is furn
a Nordberg air-compressor of 18,000 cubic feet per minute air capac
electric generator furnishes energy for the crane, lighting and tracti
being an electric locomotive and three 3,000-lb. tilting cars for charg
a steam locomotive and dump-cars for handling slags.

The smelter does considerable custom work, and is an extensive
of sulphide ores, which are necessary for fluxing the oxidized ores of
Dominion and United Globe mines. The amount of sulphide ore ava
the district is increasing rapidly, and the company also is develop
sulphide ore bodies in its own mines.

The old slag-dump is estimated to carry nearly 50,000,000 lbs. fin
ranging in tenor from 2 to 4% copper in the more modern slags, ma
the present management took charge, up to as high as 8% in the old
The slag-dump is being resmelted, gradually, with an average recovery
2% copper, the slags serving for flux, while their removal will give
room that they now occupy.

Production has been as follows: 28,919,217 lbs. fine copper
16,602,186 lbs. fine copper, 74,123 oz. silver and 1,798 oz. gold in 1906;
lbs. fine copper, 69,067 oz. silver and 2,407 oz. gold in 1907. Producti
ber, 1908, was 2,685,891 lbs. blister copper. Production is circa 35
of ore monthly, in addition to custom ore treated. Copper was being
a cost of about 11 cents per pound, at the end of 1908, with a pr
10-cent copper ultimately.

Old Dominion has been well handled, physically and financially, by nt management, despite numerous criticisms from shareholders clam- dividends. Much of the criticism has been ill advised, as the prop- been managed with a view to permanent rather than temporary ad- and the mine never was in as good shape physically, or the company , as at the end of 1908.

MINION DEVELOPMENT **BRITISH COLUMBIA.**
DICATE, LTD.

office: Kamloops, Yale district, B. C. Organized 1906, with capital- 5,000, shares $1 par. Lands, 3 claims, on Coal Hill, 6 miles south- amloops.

RY COPPER CO. **MONTANA.**

office: Butte, Silver Bow Co., Mont. J. Benton Leggat, manager. Jan. 29, 1906, under laws of Maine, with capitalization $1,000,000. s a seven-eighths interest in the Old Glory mine, lying west of and the Mountain Consolidated mine of the Anaconda, and between the Snoozer claims of the Raven Copper Co., other eighth being owned Coalition Mining Co. Mine has a 1,200′ shaft, upper levels showing g small copper values and high gold and silver values, with an in- opper at depth. Mine, opened 1885, has raised a little ore occasion- 1903, through the Buffalo shaft of the Anaconda.

ERNORS COPPER MINING & SMELTING CO. **NEW MEXICO.**

215½ North Main St., Roswell, N. M. Mine office: San Marcial, , N. M. I. B. Rose, president; J. A. Cottingham, vice-president; B. ecretary and treasurer; H. Fitzgerald, general manager. Organized 1903, under laws of New Mexico, with capitalization $1,000,000, ar; issued, circa $700,000. Annual meeting, second Tuesday in May. 6 claims, area 120 acres, also a 5-acre millsite, in the Dripping trict, 25 miles from the Santa Fé railway, with a good wagon road showing 3 fissure veins in porphyry, of which one, of 18′ estimated pened by a 50′ tunnel and shafts of 30′, 50′ and 100′, showing mal- sulphide ore formerly said to assay 12% copper, 2 oz. silver and $8 n, and now claimed by company to average 25% copper and $3 n, which figures seem excessive. Idle.

ORY COPPER MINING CO. **NEW MEXICO.**

Absorbed, circa 1901, by Copper Chief Mining Co., later Sater, later ormerly at Clayton, Union Co., N. M.

DRED MINING CO. **COLORADO.**

43 Wall St., New York, N. Y. Mine office: Silverton, San Juan Howell Hinds, president; Thos. A. Nevins, vice-president; Thos. , secretary and treasurer; preceding officers, Wm. C. Eakins and eiser, directors; Robt. W. Davis, Jr., general manager; J. M. Elmer, ent. Organized June, 1906, under laws of Maine, with capitaliza- 000, *shares $5 par; issued, $4,500,000.* Company was stated, July,

1908, to have a floating indebtedness of $75,000. Stock was floated Nevins & Son, of New York, and then advanced, by manipulation, share, which was above any possible actual value.

Lands, 26 claims, patented, area circa 500 acres, on Galena M Cunningham Gulch, near the Silverton & Northern railway. Prop a quartz vein of 5′ to 12′ claimed width, carrying values in gold, and copper, with an increase in copper at depth, developed mainly and claimed to have upwards of 4 miles of workings.

Equipment includes a power building of steel and concrete, and electric plants. There also is a tramline, store and numerou

The mill, of steel frame, of 200 tons rated daily capacity, has plete equipment, including 40 stamps, crushers, rolls, jigs, Frue va tables and concentrating tables. Company is in bad condition fina is not regarded favorably.

OLD IMPERIAL MINING & MILLING CO.

Mine office: Cherry Creek, White Pine Co., Nev. P. H. Cann tendent. Has auriferous and argentiferous copper ores, employi men at last accounts.

OLD IRONSIDES MINING CO. **BRITISH C**

Dead. Was merged, March 29, 1901, in Granby Mining, Smelti Co., Ltd. Formerly at Phoenix, Boundary district, B. C.

OLD PUEBLO MINING & MILLING CO.

Mine office: Tucson, Pima Co., Ariz. Alexander Rossi, presi Roche, vice-president and general manager; W. P. Haynes, secretar urer. Capitalization $1,000,000, shares $1 par. Lands, 9 claims, west of Tucson, having about 600′ of workings, with a 70′ shaft t depth of 30′, a 15-ton pocket of chalcocite assaying 33% copper, and $2.50 gold per ton. Has several mine buildings. Arranged, Tucson Consolidated Copper Co., for latter to do $50,000 worth ment work, in exchange for 51% of the stock, to be turned over o of work. In October, 1907, made an initial shipment of ore, rangin copper and $5 to $10 combined gold and silver values per ton. E 20 men.

OLD RELIABLE MINING CO. **NE**

Mine office: Golden, Santa Fé Co., N. M. Ores carry gold Has two 5′ Huntington mills. Presumably idle.

OLD TIEWAUKEE MINING CO.

Office: care of Lewis A. Jeffs, president, Salt Lake City, office: Bingham Canyon, Salt Lake Co., Utah. Capitalization $50 $5 par. Lands include the old Tiewaukee mine, area 120 acres, a Winnimuck, supposed to carry the Caledonia vein at a depth o Deepest shaft is less than 100′, development being mainly by tun property has produced some good ore in the past. Company said the Yellow Creek property, area 90 acres, near the Hidden Fort the Black Hills district of South Dakota. Presumably idle.

OLD TOWN MINING & MILLING CO.

Mine office: Russell Gulch, Gilpin Co., Colo. Ores carry gol copper. Main shaft, 900′. Has steam and electric power. Presu

OLGA COPPER CO.

Letter returned unclaimed from former mine office, Luning Co., Nev. Property, near Luning, has shafts of 20′ to 60′ for 2,20 outcrop of a vein said to show ore averaging 8% copper, with son to 50% in tenor. Idle and apparently moribund.

OLIVE CAMP MINING CO.

Letter returned unclaimed from former office and mine, Tucso

iz. W. W. Wishon, general manager; John Ellis, vice-president; D. H. llins, superintendent. Lands, circa 12 miles south of Tucson, have a 55′ ft. Idle and apparently moribund.

SEPH OLIVER. **NEW MEXICO.**

Office and mine: Chloride, Sierra Co., N. M. Employs 4 men. Lands, 120 es, in the Apache district, showing 6 contact deposits, between limestone porphyry, of which 2, under development, of 40′ reported average width, said to be traceable 7 miles, carrying oxide, carbonate and sulphide ores copper, claimed to average 18% copper and 25 oz. silver per ton, which esti- es are too high. Mine is opened by shafts of 30′, 50′, 75′, 100′ and 110′, by a 200′ tunnel.

YMPIA MINING CO. OF WYOMING. **WYOMING.**

Office: 187 E. Chicago Ave., Chicago, Ills. Mine office: Encampment, bon Co., Wyo. Pehr W. Nillson, president; Herman C. Johnson, secretary; O. Borgquist, treasurer; John Lundgren, general manager. Idle and ap- ntly moribund.

YMPIC MINING CO. **WASHINGTON.**

Office: 301 Lumber Exchange, Seattle, Wash. E. R. Butterworth, presi- ; Alfred Jeffery, secretary. Company advertised stock on the installment , claiming that its lands contained gold, copper and coal, but secretary s that no copper property is being developed, and manifests a reticence ding the alleged properties of the company utterly at variance with the on-toned advertising done in the press. Location of lands, if any, un- n, and company regarded with suspicion.

HA COPPER MINING CO. **WYOMING.**

Office: 1017 New York Life Bldg., Omaha, Neb. Mine office: Encamp- , Carbon Co., Wyo. Jas. H. Kyner, secretary. Is a twin of the Blanche er Mining Co. Idle.

HA GOLD & COPPER MINING & SMELTING CO. **MONTANA.**

Dead. Formerly at Bigtimber, Sweetgrass Co., Mont.

KI MINE. **JAPAN.**

Mine office: Nishitate-mura, Kita-Akita-gori, Ugo, Japan. Mine was d circa A. D. 1750, and reopened 1885. Ore bodies are lenses in Tertiary and andesite. Largest lense is 70′ deep and 130′ long. Ore is argentite, iated with chalcopyrite, sphalerite and galena. Latest reported produc- 1896, was 242,690 lbs. fine copper and 858,316 momme fine silver. Idle years.

R MINING CO. **ALASKA.**

Office: Canterbury Bldg., Portland, Ore. Mine office: Kiam, Prince of s Island, Alaska. Chas. E. Ladd, president; W. A. Howe, vice-president; S. Wood, secretary and treasurer; W. W. Catlin, general manager; H. W. er, superintendent. Organized 1904, under laws of Oregon, and is oper- as a close corporation.

Lands, 6 claims, area 120 acres, 4 miles from tidewater, on McKenzie Inlet, elevation of 3,200′, held, on a long lease, from the Khayyam Copper Co. erty shows Kasaan greenstone and schists, latter in part dioritic, carrying allel ore zones, having lenticular ore bodies in schist, these ranging 4′ to width. Development is by tunnels of 140′, 240′ and 650′, with about a er-mile of workings, showing ore giving average assays of about 3% r, with small gold and silver values, and occasional zinc. Ore is mainly site, carrying small percentages of disseminated chalcopyrite, with more pyrite and pyrrhotite.

Equipment includes an aërial tram of 4,186′, and a surface tram of 12,160′, g at ore-bunkers upon a wharf on McKenzie Inlet. The old management over-enthusiastic, and built the tramway and wharf before a mine was

opened, and production, 1907, was only 2 carloads of ore. Prope cred promising.

OMEGA COPPER CO.

Office: Tucson, Ariz. Mine office: Vail, Pima Co., Ariz. L. president and treasurer; Capt. T. C. Roberts, vice-president an Frank H. Hereford, secretary. Organized May, 1906, under laws with capitalization $2,500,000, shares $10 par.

Lands, 2 claims and a smelter site, 16 miles from Vail, in t district, also sundry lode claims in the Tyndall district of Santa C Arizona. The Helvetia property was one of the first copper mi county, having shipped considerable carbonate ore in the past. Mi by a 150′ upper tunnel, and the 1,100′ Tilly tunnel having a back o with about one mile of workings. Main vein, of about 40′ ave carries carbonate and sulphide ores averaging 6 to 9% copper, wi and silver values, selected ore running up to 30% copper and 20 o ton. Suspended October, 1907, after shipping a little ore.

OMEGA MINING CO.

Dead. Lands sold, May, 1906, to Omega Copper Co. Forme Pima Co., Ariz.

OMODANI MINE.

Owned by Mitsu Bishi Goshi-Kwaisha.

OMORI MINE.

Mine office: Omori-mura, Nima-gori, Iwami, Japan. Propert mine, opened circa A. D. 1300, and reopened 1525. The mine once productive, but output was greatly reduced toward the end of the Century, and is again increasing. The Eikyu group carries mainl and argentiferous chalcopyrite, and the Hontani group carries m argentite, with some native silver.

Production has been as follows: 80,139 lbs. fine copper, 122 silver and 2,880 momme gold in 1900; 210,596 lbs. fine copper in 1 lbs. fine copper, 1,564,702 grams silver and 21,427 grams gold in 1 lbs. copper, 556,269 momme silver and 9,068 momme gold in 1907.

ONECO COPPER MINING CO.

Office: 64-50 State St., Boston, Mass. Mine office: Demmo Co., Mich. Wm. F. Fitzgerald, president; S. S. Millet, secretary an Jos. Hocking, superintendent. Organized 1899, under laws of Mi capitalization $2,500,000, shares $25 par; issued, $1,473,500. Levie ment of 50 cents per share, Jan. 15, 1906.

Lands, 800 acres, known originally as the Hungarian mine, the Fitzgerald. First work was done 1862, when a shaft was su 100′. Property was idle until 1899-1900, and a little work was 1906-1907. The mine has one shaft, of circa 500′ depth. Impr clude several mine buildings and dwellings. Fully described Vol.

ONEIDA GOLD & COPPER CO.

Dead. Formerly at Nogales, Santa Cruz Co., Ariz.

ONOKO MINES CO.

Office: 203 Kittredge Bldg., Denver, Colo. Letter returne from former mine office, Central City, Gilpin Co., Colo. Samue president; Edgar T. Butler, secretary and treasurer. Organized u Colorado, with capitalization $1,800,000, shares $1 par. Lands, 5 cl by a 229′ vertical shaft, showing a vein with a 12″ paystreak, values up to 11.95% copper, 3.91 oz. silver and 0.17 oz. gold. Idl ently moribund.

ONTARIO & CŒUR D'ALENE MINING CO.

Office: care of Fred Baier, agent, Saltese, Mont. Mine offi

, Idaho. Geo. Isle, president; M. N. Stratton, secretary and treas-
ng officers, Geo. M. Reasoner, J. A. Reinhart and Henry Billberg,
ands, 15 claims, near the East Snowstorm, on which work was
1906. Development is by a tunnel, planned to cut the vein at
pth.

COLORADO GOLD & MINING CO. — **COLORADO, ONTARIO & YUKON.**

ormerly at Central City, Gilpin Co., Colo. Described Vol. VI.

OPPER CO. — **ONTARIO.**

520 University Blk., Syracuse, N. Y. Mine office: El Dorado,
, Ont. Jas. B. Cook, president; Arthur Coe, mine manager; G. H.
erintendent. Property formerly was under lease to the Medina
Co., which seems to have gone under, and is the only copper
tern Ontario. Ore occurs in a contact deposit between limestone
showing hematite outcrops, succeeded at depth of circa 75', by
and a little high grade chalcocite, in a vein of 7' to 8' width,
Ontario Geological Survey to carry 4 to 10% copper, and esti-
mpany to average 7% copper, which probably is too high. Prop-
lly was an iron mine, from which considerable hematite was
iron ore proved to be merely a gossan. Mine, opened to depth
', has a 140' main shaft. Equipment includes an air-compressor
light plant.
is at the mine, a derrick hoisting ore from the mine dumps into
building. Smelter, blown in June 25, 1906, and since run at inter-
ot being sufficiently developed to supply ore steadily, has a 48"
r-jacket blast-furnace, of 50 tons rated capacity, making a 45%
fusions. Was said, 1907, to be producing 30 to 35 tons of ore
have shipped some matte to the DeLamar works in New Jersey.
ompany has same officers as the Medina Gold Mining Co., which
ds while peddling stock, and which came to grief. Property con-
ising, but company not regarded favorably.

EVELOPMENT CO. — **ONTARIO.**

care of Frank Howard, Munising, Mich. M. J. Morrisey, secre-
easurer. Organized under laws of Ontario, with capitalization
ands, 320 acres, 40 miles north of Sault Ste. Marie, Ontario, and
f Goulais Bay, opened by 14 shallow pits, deepest 24', showing
f ore, with quartz gangue, giving good assays in copper. Idle.

OLD & COPPER MINING CO. — **ARIZONA.**

Formerly at Prescott, Yavapai Co., Ariz.

ICKEL CO., LTD. — **ONTARIO.**

ice: Worthington, Algoma, Ont. G. E. McGinley, president; W.
nager. Organized Oct. 5, 1906, under laws of Ontario, with capi-
,000,000, succeeding the Canada Nickel Co. Property is the Totten
lf mile west of Worthington, having a 90' shaft. Is said to use
s for the recovery of nickel.

MELTING CO. — **ONTARIO.**

Formerly at Massey Station, Algoma, Ont.

INE. — **CAPE COLONY.**

by Cape Copper Co., Ltd.

D MINING & MILLING CO. — **WASHINGTON.**

ice: Chesaw, Okanogan Co., Wash. Ores carry gold, silver and
s steam power. Idle.

SOLIDATED MINES CO. — **UTAH.**

Provo, Utah. Mine office: Eureka, Juab Co., Utah. Jesse Knight,
lmer R. Jones, vice-president; R. E. Allen, secretary; M. H. Walk-

er, treasurer; Frank P. Swindler, general manager; preceding officers, Mangum, Amanda M. Knight, Lafayette Hanchett and Geo. T. Odell. Organized October, 1908, under laws of Utah, with capitalization shares $1 par.

OPHIR CONSOLIDATED GOLD & COPPER MINING CO.

Dead. Formerly at Florence, Pinal Co., Ariz. Described Vol.

OPHIR CONSOLIDATED MINES CO.

Office: Madison, Wis. Mine office: Ames, San Miguel Co., C Ladd, general manager; F. E. Trumble, superintendent. Mine, kn Silver Bell, has gold, silver and copper ores, of importance in the copper being merely a by-product. Has hydro-electric power, with mill, employing circa 60 men.

OPHIR COPPER MINING CO.

Dead. Lands sold, 1906, to Butte Central & Boston Copper Formerly at Butte, Silver Bow Co., Mont. Fully described Vol. V

OPHIR GOLD & COPPER MINING CO.

Office: Spokane, Wash. Mine office: Helena, Lewis & Clark Capitalization $1,000,000. Lands, in the Blackfoot district, near H a fissure vein carrying copper ore of fair assay tenor.

OPHIR HILL CONSOLIDATED MINING CO.

Mine office: Ophir, Tooele Co., Utah. E. W. Clarke, superinten carry gold, silver, lead, copper and zinc, with values mainly in silv Has water, steam and electric power, and a 150-ton concentrator. by Hon. W. A. Clark, and is operated as a close corporation, but posedly profitable. Litigation over land titles was settled favora pany, February, 1908. Was producing on leases about half nor early 1908.

OPHIR MINING CO.

Dead. Formerly at Butte, Silver Bow Co., Mont.

OPHIR MINING & DEVELOPING CO.

Dead. Formerly at Butte, Silver Bow Co., Mont.

OPHIR QUEEN MINING CO.

Office: Cedar River, Mich. Letter returned unclaimed from office, Ophir, Tooele Co., Utah. Samuel Crawford, secretary, tr general manager. Organized Apr. 19, 1902, under laws of Utah, ization $250,000, shares 25 cents par. Lands, 4 claims, area 53 a Ophir district, showing a 25′ vein, giving assays up to 12% coppe 15% zinc, 16 oz. silver and 40 cents gold per ton, opened by a 335 two 5x8′ compartments, and 3 tunnels, longest 220′ and 225′. Ha gasoline hoist, 3-drill Rand air-compressor and power drills. Idle ably moribund.

OPTIMO GOLD & COPPER MINING CO.

Office: Missoula, Mont. Mine office: Saltese, Missoula Co., Heidenreich, manager. Organized 1904, under laws of Montana, ization $1,500,000, shares $1 par. Idle several years.

Formerly at Sumpter, Baker Co., Ore.

OMESTEAD MINING & REDUCTION CO. **OREGON.**
care of C. J. Allen, president, Portland, Ore. Mine office: Galice, ., Ore. Frank B. Roberts, vice-president and general manager; secretary and treasurer. Organized, 1904, to take over the Allen mine, on Rogue river, 3½ miles south of Galice creek, Josephine on, at a reported consideration of $750,000. Apparently no work

AHO INVESTMENT CO. **OREGON.**
ice: Sparta, Baker Co., Ore. Jas. A. Howard, manager. Lands Poorman and Iron Mask claims, showing a heavy gossan. A 120′ uel is said to be entirely in ore, giving average assays of about with small gold and silver values.

E REDUCTION WORKS. **OREGON.**
Was a fake. Formerly at Portland, Multnomah Co., Ore.

IORT LINE MINING CO **NEVADA.**
Sold lands to Bristol Consolidated Mines Co. Formerly at Pioche, Nev.

MELTING & REFINING CO. **OREGON.**
Postal Telegraph Bldg., New York, N. Y. Works office: Sumpter, Ore. Walter E. Lindsay, president; G. F. Holmes, vice-president; bols, secretary; E. J. Lindsey, treasurer; Fred D. Fuller, general receeding officers; Scott German and Jas. H. Caldwell, directors; superintendent. Organized March 16, 1902, under laws of Arizona, ization $600,000, shares $10 par.
nclude a 200-acre smelter site, a 640-acre timber tract and 40 cellaneous lands. Company was said, 1905, to have taken a bond a sulphide copper property in the Seven Devils district, circa 20 Weiser, Washington Co., Idaho.

The smelter, at Sumpter, of 150 tons nominal daily capacity, has a 33x37 sampling mill, 16x86′ ore-bins, 46x88′ furnace building, 32x66′ briquetting plant, 46x77′ boiler-house and 32x52′ laboratory. The cupola building has a 38x144″ Allis-Chalmers blast-furnace, making matte, formerly estimated by company to average 40% copper, 300 oz. silver and $150 gold per ton, but actually averaging only about 15 to 40% copper, with an average of 60 oz. silver and $200 gold per ton, sent for refining to the Tacoma smelter. Fuel is wood, costing $2.50 per cord; soft coal, costing $8 per ton, and coke costing $8 per ton. In 1905 the smelter treated 8,798 tons of custom ore, making therefrom 174,758 lbs. fine copper, with considerable gold and silver values. The supply of custom ore available is insufficient to keep the plant running at its full capacity. The company was in financial difficulties, February, 1908, but these are said to have been settled April, 1908, and at last accounts resumption was planned.

ORE KNOB COPPER CO. CAROLINA.

Dead. Property was sold, circa 1885. Formerly at Jefferson, Ashe Co., N. C.

ORE KNOB MINE. NORTH CAROLINA.

Office: Ellicott Square Bldg., Buffalo, N. Y. Mine office: Jefferson, Ashe Co., N. C. Capt. John Bent, superintendent. Mine, opened previous to 18[illegible] and closed 1885, is said to have yielded, 1874, net profits of $60,302. Property shows a fissure vein of 6′ to 20′ width, of nearly vertical dip, in micaceous granite and mica-schist, carrying mainly high grade sulphides, claimed to average 12 to 20% copper, which is an overestimate. Development is by shafts, deepest 400′. The smelter, built 1902, has a 150-ton Garretson pyritic furnace. Idle since 1905.

ORE KNOB MINING CO. NORTH CAROLINA.

Dead. Formerly at Jefferson, Ashe Co., N. C. Described Vol. V.

ORFORD COPPER CO. NEW JERSEY.

Office: 43 Exchange Pl., New York, N. Y. Works office: Bayonne, Hudson Co., N. J. Robert R. Moffett, superintendent; E. Franki, chief engineer. Is controlled by the International Nickel Co. and refines nickel mattes and ores from New Caledonia and nickel-copper matte from Canada, in addition to treating copper ores and mattes from the United States, Canada, Mexico and elsewhere. Capacity of plant is about 8,000,000 lbs. copper and 1,000,000 lbs. metallic nickel, monthly. Works are exceptionally well equipped, and company enjoys a deservedly high reputation for metallurgical ability, and the fine quality of its metallic products.

ORIENTAL COPPER CO. ARIZONA.

Office: 303 Security Bldg., St. Louis, Mo. Mine office: Cave Creek, Maricopa Co., Ariz. W. F. McDonald, president; John B. Cabanne, vice-president; F. W. Irland, secretary and treasurer; preceding officers, H. [illegible] Townsend, W. C. Stith, S. B. Schuyler, C. A. Deane, E. B. Lane and H. [illegible] Berkley, directors; A. S. Mills, superintendent. Organized, 1904, under laws of Arizona, with capitalization $2,000,000, shares $1 par.

Lands, 19 claims and a 5-acre millsite, area 385 acres, having a 475′ tunnel, said to crosscut a number of veins showing ores that have given assays of 8.9% copper and 6.8 oz. silver per ton, with occasional small gold values. Management claims many carloads could be shipped, but that such shipments would be inadvisable. Tunnel is in schist, and ore found must have been from small stringers. Property poorly developed and not regarded favorably.

ORIENTAL MINING & MILLING CO. ARIZONA.

Office: Jamestown, N. Y. Mine office: Providence, Yavapai Co., Ariz. A. F. Kent, president; W. A. Keeler, secretary; Wm. A. Kent, assistant treasurer; L. B. Kent, superintendent. Is primarily a gold and silver mine, [illegible] ing a small percentage of copper. Has a 20-stamp mill, employing circa 25 [illegible]

GOLD MINING CO. **WASHINGTON.**
office: Bossburg, Stevens Co., Wash. Ores carry gold and copper.
power. Idle several years.

L BLUE BIRD COPPER MINING CO. **CALIFORNIA.**
office: Oasis, Mono Co., Cal. Capitalization $1,500,000, shares $1
, circa 2 miles south of Oasis, having shafts of 80′ and 130′, made
circa 1865, of high grade ore, ranging up to 250 oz. silver per ton,
med to have, on an old dump, several hundred tons of ore averaging
r, 35 oz. silver and $2 to $12 gold per ton. Formerly had a mill.

L CONSOLIDATED MINING CO. **MONTANA.**
and mine: Miner Bldg., Butte, Silver Bow Co., Mont. Employs
Hon. Wm. A. Clark, president; Arthur H. Wethey, vice-president
l manager; W. M. Bickford, secretary; Thos. Bryant, superintendent;
ie, assistant superintendent. Organized Feb. 20, 1904, under laws
gton, with capitalization $10,000,000, shares $100 par, as successor
l Mining Co.
include the Original, West Stewart, East Stewart, Dives, Home,
nd other adjoining properties, the Original and West Stewart, both
tional claims, being the principal producers. The mines are con-
lerground with adjoining properties.
riginal mine has a 2,200′ two-compartment shaft, which was
d and retimbered, early 1908, this shaft having a 126′ steel gallows-
a 36x72" first-motion duplex hoist, good for circa 2,600′ depth.
est Stewart mine has a 1,900′ vertical shaft, showing, at the bottom,
ielding considerable ore assaying up to 10% copper, with fair silver
h ore of better grade in the bottom levels than above. The West
s a 120′ steel gallows-frame, with a hoist duplicating that at the

ent includes 4 steam air-compressors and 2 Ingersoll-Sergeant
-compressors, each of latter being driven by a 200-h. p. induction

e of the Original company is treated at the Butte Reduction Works,
ame ownership, located circa 1½ miles south of the mine, ore being
, at night, over the line of the Butte Electric Railway Co.
tion normally is circa 18,000,000 lbs. fine copper yearly, but, for
nly 12,500,000 lbs., owing to depression in the metal market during
half of year. For year ending June 1, 1907, ore extracted was
s, yielding $9.31 per ton gross, with cost of extraction $4.08 per
t earnings were $663,259. The property, despite its small area, is
tive and valuable, and is well managed in all departments.

L MINING CO. **MONTANA.**
Succeeded, Feb. 20, 1904, by Original Consolidated Mining Co.
Butte, Silver Bow Co., Mont.

L YERINGTON COPPER CO. **NEVADA.**
ffice: Yerington, Lyon Co., Nev. Organized, 1907, under laws of
ith capitalization $1,000,000.

OPPER MINING CO. **WYOMING.**
Douglas, Wyo. Mine office: Clarence, Converse Co., Wyo. Hon.
k, president; T. H. Howard, vice-president; E. J. Wells, secretary,
nd general manager; Chas. J. Wells, superintendent. Organized
r laws of Wyoming, with capitalization $750,000, shares $1 par.
4 claims, area 80 acres, in the War Bonnet district, carrying an
ein in granite, opened by shafts of 75′ and 255′, showing carbonate
g about 6% copper, with traces of gold and silver. Has a 40-h. p.
t, with Inlet and 2-drill Leyner air-compressor. Presumably idle.

ORIOLE MINING & MILLING CO. WASHINGT

Mine office: Metaline, Stevens Co., Wash. Has secured ores assay well in lead, copper and silver.

ORION MINING CO. NEW MEXI

Office: P. O. Box 12, El Paso, Tex. Mine office: Lordsburg, Grant N. M. A. W. Gifford, manager. Organized 1898, under laws of New Mex with capitalization $200,000, shares $1 par. Property is the Dundee mine the Shakespeare district, Grant county, New Mexico, having about 1,000 underground openings, claimed to show 10,000 tons of ore, with quartz gan carrying $12 to $14 per ton in gold, silver and copper, which must be centrated to afford a profit. Company also owns claims in the Jarilla dist of Otero county, New Mexico. Apparently idle for some years.

COMPAÑIA DE MINAS EL ORITO. CHI

Office: Valparaiso, Chile. Mine office: Vallenar, Atacama, Chile. Or ized July 19, 1904, under laws of Chile, with capitalization £50,000, share par. Property is Las Breas mines, opened 1888. Preceding company w considerable producer, making upwards of 1,000,000 lbs. fine copper yearly.

SOCIEDAD MINERA EL ORITO. CHI

Dead. Was succeeded, July 19, 1904, by Compañía de Minas El O Formerly at Vallenar, Atacama, Chile. Described Vol. V.

ORKLA GRUBE AKTIEBOLOG. NORW

Norwegian incorporation of Orkla Mining Co., Ltd.

ORKLA MINING CO., LTD. NORW

Office: 61 Gracechurch St., London, E. C., Eng. Norwegian of Thamshavn, Trondhjem, Norway. Mine office: Lökken Vaerk, Meld Trondhjem, Norway. Thos. Fearnley, chairman; Consul-General Chris Thams, general manager; preceding officers, P. M. Wikström, Thv. Olrog, M Wallenberg, Consul-General Jacob Finne and J. M. Berner, directors. Or ized Dec. 7, 1904, under laws of Norway, with title Orkla Grube Aktieb with capitalization kr. 4,140,000, shares 180 kr. par. Controls a subsid railway and power company.

Lands, 120 claims, including mining, timber and miscellaneous l area 2,500 acres, in the Meldal and Orkedal valleys, Sondre Trondh Principal properties are the Lökken, Höidal and Dragset mines, carryi main ore zones, the southern running from the Dragset, through the Lö and Höidal, to the Aamot mines, in the southeast, a distance of about 9 m The southern zone runs from the Holum mine to various ore deposits in Grefstadfjeld, in the east, a distance of about 6 miles. Ore occurs in v and lenses in a brecciated schistose diorite country rock of Silurian age, being disseminated chalcopyrite and cupriferous pyrite.

The Lökken mine, opened A. D. 1657, has a 200′ upper shaft and incline shaft, with double hoist for ore and double hoist for men, and a tunnel, showing considerable ore bodies.

The Höidal, opened A. D. 1680, includes the Nya Höidal and Gamla Hö mines, principal openings being tunnels of 200′ and 500′.

The Dragset mine has shafts of 200′ and 300′, and a 100′ tunnel.

The Aamot and Kong Karl mines have 100′ tunnels each, and the toria mine, opened circa 1870, also has comparatively slight develop The Holum mine, recently opened, consists of 3 parallel ore bodies, of 3′ t width, traced for distance of about 160′.

The main dressing plant is at the Lökken mine, where the mining equ ment includes two 20-h. p. Ingersoll-Rand compressors. There is a 5-t Elmore experimental mill, and a large mill with 11 Elmore units, rated *800 tons* daily capacity, being the largest copper concentrating plant in Sc *dinavia*. Ore is brought to this mill by aerial trams of 8.4 kilometers fr

set mine, and 2.7 kilometers from the Höidal mine. Electric power
at 30 kilometers from the Skjaenaldfos waterfall station, at 15,000
a 3-phase alternating current, about 2,000 h. p. being utilized.
lings at the property include 6 dwellings for officers, 40 dwellings for
, compressor house, machine shop, transformer station, administration
warehouses, stores, hotel, etc., with a total of about 20 miscellaneous
. Company has its own postoffice and telegraph office, by arrange-
h the Norwegian government.
absidiary company, organized for the purpose, has installed a fine
ant at the Skjaenaldfos waterfall, and has built an electric railroad
6 kilometers for transporting ore from the Lökken mill to Thamshavn,
outh of the river Orkla, in the Orkedalsfjord, where the company
wharves for goods and passenger traffic, and automatic loading de-
the dispatch of ore. The transportation company, which has the official
Chr. Saldeson & Chr. Tham's Communication Aktieselskab, has a
making 2 round trips daily between Thamshavn and Trondhjem.
plans of the company, which has a strong and ambitious management,
the export of circa 100,000 tons of pyrite and cupriferous pyrite, be-
with 1909.

BRA MINING CO. **ARIZONA.**

e: 715 High St., Burlington, Iowa. Mine office: Wendendale, Yuma
z. Thos. Wilkinson, president and general manager; Hon. John J.
, vice-president; S. M. Wilkinson, secretary. Organized October, 1901,
ws of Arizona, with capitalization $1,500,000, shares $1 par; issued,

ds, 10 claims, area 200 acres, adjoining the Harcúvar Copper Co., in
worth district, 12 miles west of Wendendale, showing country rocks
e, granite, and porphyry, carrying several fissure veins in diorite and
, these ranging from a few inches to 20′ in width, showing oxide
bonate surface ores giving assays of 12 to 15% copper and $1.50 to
bined gold and silver values per ton. Development is by shafts of
and 100′, and by a tunnel of 175′. Presumably idle.

BRE MINING CO. **ARIZONA.**

ce: care of Geo. Duffy, Globe, Ariz. Organized Oct. 12, 1906, under
Arizona, with capitalization $300,000, shares $1 par. Presumably idle.

NSOLIDATED MINING CO. **ARIZONA.**

ce: care of R. M. Reid, secretary, Colorado Springs, Colo. Mine
Prescott, Yavapai Co., Ariz. H. I. Read, president; O. P. Hopkins,
r. Lands, 5 claims, patented, area 100 acres, in the Mineral Point
, 2 to 4 miles from two railroads. Ore values apparently are mainly
and company claims to have developed 7,000 tons of ore, worth $9 to
r ton, which is doubted. Idle.

ENORO MINES, LTD. **BRITISH COLUMBIA.**

ad. Succeeded by Denoro Mines, Ltd. Formerly at Rossland, Trail
, B. C. Fully described Vol. V.

RANDE MINES CO. **ARIZONA.**

tter returned unclaimed from former office, 1034 Park Row Bldg., New
N. Y. Mine office: Wickenburg, Maricopa Co., Ariz. Geo. B. Upton,
tendent. Mine has upwards of 3,300′ of openings, showing a large
dy, considerably mixed with country rock. Has gasoline power and
amp mill. Property well regarded, but management not.

RANDE MINING CO. **ARIZONA.**

ice and mine: Globe, Gila Co., Ariz. Lands, on Upper Mineral Creek,
110′ shaft, showing a 5′ vein giving ore assaying up to 5% copper,
ilver and 1.5 *oz. gold per ton. Presumably* idle.

OROGRANDE SMELTER. NEW ME

Owned by Southwest Smelting & Refining Co.

ORO MAXIMO MINING CO. ME

Office: Detroit, Mich. Mine office: Bacoachi, Arizpe, Sonora, N. L. Clancey, secretary and superintendent. Has 600,000 shares.

Lands, circa 1,000 acres, about 40 miles from La Cananea, the r railroad point. The mine is opened by a 275′ two-compartment shaft 300′ three-compartment shaft, with considerable development. Equipm cludes 2 hoists and a 12-drill Rand air-compressor. Water is supplie 2-mile pipeline. At last accounts company planned a 60-stamp mill. Pr which is considered promising, was attached, circa September, 1908.

COMPAÑIA DE ORO y PLATA, S. A. ME

Is the Mexican incorporation of the Carman Consolidated Copper C

ORO PLATA MINING & DEVELOPMENT CO. MON

Dead. G. W. Simpkins was president and general manager; G. H. first vice-president; N. M. MacLeod, second vice-president and secret G. Laurence, treasurer. Lands, near the Copper Chief, were said to s vein of 4′ to 5′ width, carrying auriferous copper ore. Former office w Hyde Block, Spokane, Wash. Formerly at Dillon, Beaverhead Co., Mon

ORO QUAY GOLD MINING & REDUCTION CO. COLO

Mine office: Ortiz, Conejos Co., Colo. Lands, 12 miles south of show considerable bodies of magnetic iron ore, some of which carri assay values in copper, silver and gold. Was under development, 19 Colorado Fuel and Iron Co., under lease.

FRANCISCO RODRÍGUEZ OROZCO y CA. ME

Office and mine: Mazapil, Zacatecas, Mex. Property is 23 min cluding the Todos Santos and La Nieva, developed by a 175′ main shaf a 1,000′ main working tunnel. Ores carry copper, lead, silver and gold Equipment includes a 75-ton mill and a 75-ton smelter. Employs circa 20

ORPHAN COPPER CO. ARI

Office: 1 West 34th St., New York, N. Y. Mine office: Globe, Gi Ariz. Melville D. Chapman, president; Chas. M. Clark, vice-presider general manager; preceding officers, P. P. Greer, A. J. Smith, Frank feller, Ezra B. Hamilton, Chas. T. Martin and G. B. Fox, directors; Wa Dunlap, secretary and treasurer. Organized May 15, 1908, under la Arizona, with capitalization $3,000,000, shares $5 par.

Lands, 10 claims, 1 fractional, area 190 acres, southeast of the Ke and near the Miami, 6 miles southwest of Globe, the nearest railway Property is said to show 9 main vein systems and a prominent fault, th cipal ore body under development occurring at the contact of schis granite-porphyry, this being estimated by company to average 30″ to width, and to be traceable 1,000′, carrying bornite, chalcopyrite and t arite, estimated to average 5 to 9% in copper tenor. The company p sinking 500′ shafts on both the Orphan and Iron Lode claims, 600′ apar connecting by a crosscut on the 500′ level, but only one shaft, of 230′ has been sunk, this showing a 30″ vein carrying mainly chalcopyrite, as up to 20% copper, with gangue of limestone and calcspar. The property ore of good assay tenor in shallow workings.

Improvements include a 20x22′ machine shop, carpenter shop, s assay office, warehouse and foreman's dwelling. Connection by Globe t a good wagon-road. Equipment includes a steam hoist and air-comp bought of the Calumet & Globe Development Co.

The company did not finish making its first payment until Aug. 1, one month after due. The company is in bad odor with careful inve because of the methods used in booming its shares, and the men con

this work. Mr. Frank Rockefeller, one of the directors, a brother of D. Rockefeller, was accused of dumping considerable stock, in violation agreement, and there was talk of a suit against Mr. Rockefeller, but ently this was merely a bluff. It has been asserted, in the press, that lockefeller's stock was donated, for the use of his name, and that the ny refused to transfer his certificates, when presented. The stock was ed in Boston by Cardenio F. King, a notorious personage who succeeded, anipulation, in getting the stock to $8 per share, but, late in September, the stock opened on the Boston curb at 8⅝ on Monday, and closed day at 1½ bid. Mr. King, who is under indictment for larceny, is said ie company to have no official connection therewith, but to have been ing the shares for a few shareholders, which may or may not have been ase. The property is considered as of some promise, but the methods romotion and financing are much disliked.

EGA MINING CO., S. A. **MEXICO.**

Is the Mexican incorporation of the Southwestern Mining Co.

ILLE GOLD & COPPER MINING CO. **BRITISH COLUMBIA.**

Mine office: Golden, Kootenay district, B. C. Idle for some years.

KA ELECTROLYTIC REFINING CO. **JAPAN.**

Office and works: Osaka, Izumi, Japan.

RUZAWA MINE. **JAPAN.**

Owned by Mitsu Bishi Goshi-Kwaisha.

ORN CONSOLIDATED MINING & MILLING CO. **UTAH.**

Mine office: American Fork, Utah Co., Utah. S. Osborn, superintendent. ds, 8 claims, west of the Pacific Mining Co.

EOLA CONSOLIDATED MINING CO. **MICHIGAN.**

Office: 303-199 Washington St., Boston, Mass. Operating office: Hough- Mich. Mine office: Opechee, Houghton Co., Mich. Employs 1,500 men. ert S. Bigelow, president; Hon. Norman W. Haire, vice-president and gen- manager; Wm. J. Ladd, secretary and treasurer; preceding officers, J. y Brooks, Edw. S. Grew, Edw. R. Hall and Walter A. S. Chrimes, directors. J. Uren, general superintendent; Frank H. Haller, assistant superintend- A. L. Burgan, mill superintendent; A. G. Gullberg, superintendent motive r; Chas. D. Hohl, chief engineer; Jas. Rowe, mining captain Osceola h; Jos. Biscombe, mining captain North Kearsarge branch; Frank Lan- mining captain South Kearsarge branch; John T. Reeder, purchasing t; Wm. Veale, clerk; Thos. Burgan, assistant clerk.

Organized 1873, under laws of Michigan, and reincorporated, 1903, for d of 30 years, with capitalization $2,500,000, shares $25 par; issued, 3,750. Shares are listed on the Boston stock exchange. Annual meeting, d Thursday in March.

Dividends, begun 1878, were $7,612,550 to end of 1908, recent dividends as follows: $2 in 1904; $6 in 1905; $13 in 1907; $6 in 1908.

Lands, 2,120 acres, in 4 separate tracts, also an extensive millsite, in ghton county, and considerable holdings of timber and miscellaneous in Houghton and Keweenaw counties, Michigan. Company's property des 4 mines, known as the Osceola, North Kearsarge, South Kearsarge and rack Junior, the latter being idle. The various mines employ about 150 r drills.

New openings, 1907, were as follows: 4,024′ in the Osceola branch; 18,532′ e North Kearsarge branch; 635′ in the South Kearsarge branch. Cost of penings is charged direct to operating expenses, which is the correct plan. e is comparatively little rock *selection*, though discrimination is used, ourse, in *breaking ground*. *The amount of* rock broken that was rejected

on surface was 9% in 1904; 12% in 1905, and 9% in 1907. The matter of power haulage has been given tentative consideration.

The Osceola mine proper was opened, 1873, on the southern extension of the Calumet conglomerate, upon which 6 shallow shafts were sunk, but this bed proved unremunerative, except under a few acres, and work was abandoned thereon and development begun on the Osceola amygdaloidal bed, lying parallel with and 730′ east of the Calumet conglomerate, at surface. The Osceola mine proper, area 720 acres, lying next south of the Calumet & Hecla mine, has 6 shafts on the Osceola amygdaloid, which has a strike of approximately N. 39° E., shafts being numbered from north to south. Crosscuts have been sent from the Osceola workings to the Calumet conglomerate, at various depths, without encouragement, and diamond drilling was done, 1904, to locate and test the Kearsarge amygdaloid on the old Osceola tract, but the results presumably were not encouraging. The Osceola mine proper uses 50 power drills.

Nos. 1 and 2 Osceola shafts have been abandoned for some years, owing to exhaustion of mineral ground tributary thereto.

No. 3 Osceola shaft, with 3 compartments, circa 3,000′ deep, has been idle for some years, and is practically abandoned.

No. 4 Osceola shaft, 600′ next south of No. 3, with 3 compartments, is circa 3,700′ deep, and has been idle for several years. There is small likelihood of shafts 3 and 4 being reopened, as the ground tributary to them is nearly exhausted, and the good stopes remaining can be reached from the shaft next south.

No. 5 Osceola shaft, 1,300′ south of No. 3, was 4,360′ deep on Aug. 1, 1908, and was cut down and retimbered throughout, in 1903.

No. 6 Osceola, formerly known as the Opechee shaft, is 1,300′ next south of No. 5, and was 4,423′ deep on Aug. 1, 1908. This shaft shows some excellent stopes, especially in the southern drifts, toward the Tecumseh line, in the lower levels. This shaft was retimbered with concrete between the 43d and 44th levels, and partly retimbered with wood above, in 1907. There is room on the company's lands for one additional shaft south of No. 6, if desired, but it is probable that the ground will be mined through No. 6, instead of by a new shaft.

The shops of the Osceola, formerly scattered along the line of shafts, have been centered between shafts 5 and 6. The new boiler plant at No. 6 has 5 Burt locomotive firebox boilers, with a coal-trestle and bin, and a 125′ brick-lined self-supporting steel smokestack, of 7′ inside diameter, standing on a sandstone base. The old boiler-house at No. 6, with stone walls and steel roof, has been lengthened 30′, and made into a compressor-house, equipped with a 50-drill Nordberg 2-stage cross-compound air-compressor, having 36″ and 40″ air cylinders, and steam cylinders of 22″ and 42″, with 48″ stroke. A new boiler-house has been built to the north of the old structure.

A new combination smithy and machine shop, between shafts 5 and 6, is 60x144′, in 2 sections, with brick walls and steel truss roof, covered with corrugated steel. Electric power is used.

A new electric plant, complete 1907, located in the compressor-house, has a 100-kw. 220-volt direct-connected generator, delivering a direct current, and also furnishes electric light for the Osceola mine and location, using direct current enclosed arc lamps.

In addition to the mine buildings, the Osceola location has a large number of dwellings for workmen. Water is secured from Lake Superior through a 6″ pipe line, of 1½ miles length, connecting with the stand-pipe at the Tamarack mine, leading to a 130,000-gallon concrete reservoir between Osceola shafts 5 and 6.

The Osceola mine-proper has a local telephone system, connecting all de-ents, with an exchange in No. 6 engine-house.

The Kearsarge or North Kearsarge mine, area 1,120 acres, lies north of the erine, with which it has underground connections, and with which land exchanged, to the extent of 13½ acres, permitting both mines to square boundaries with the strike and dip of the lode. Extensive diamond ng, done 1905-1907, has shown considerable good stamp-rock in the foot- and hanging-wall, at points where the main lode was impoverished. Dia- drill boring costs $2 to $3 per foot, as against $6 to $8 per foot for ing. The Kearsarge amygdaloidal bed ranges 16′ to 20′ in width, in this , and has proven very bunchy, though with good average values. The ern workings, approaching the Wolverine, are showing improvement, but ine is richest near the Ahmeek, to the north. The mine is being deepened e rate of about 400′ yearly. About 60 power drills are used in this ity. Shafts are numbered from south to north.

No. 1 North Kearsarge shaft was 3,873′ deep, on Aug. 1, 1908. The former ies under the shaft, resulting from opening through old workings, have filled with waste-rock, and capped with cement, concrete stringers being . No. 1 shaft has a Nordberg hoist, good for 6,500′ depth, operating two skips in counterbalance.

No. 2 North Kearsarge shaft is idle, having been abandoned at depth of ′, and the ground formerly tributary thereto is mined from the shafts on r side.

No. 3 North Kearsarge shaft, lying 1,825′ northeast of No. 1, was 3,192′ in h on Aug. 1, 1908, developing a large area of good ground, especially to- the Ahmeek. The collar of this shaft has been concreted, and the hoist duplicate of the Nordberg engine at No. 6 Osceola.

The No. 4 North Kearsarge shaft, started 1907, is sinking 75′ in the foot- , and will crosscut to the lode on the 7th level, the ground having been en previously by diamond drill borings. This shaft should be a producer 1910. Equipment includes a structural steel boiler-house, with a 150′ brick- d self-supporting steel smokestack of 7′ internal diameter.

The North Kearsarge surface plant includes a stone compressor-house and 0-drill compressor at No. 1 shaft, where are located also the combination chine and carpenter shop, warehouse and office, all of wood. At No. 3 shaft re is a 45-drill compressor, with 2-stage air-end and compound steam-end, ing 22x48″ and 42x48″ steam cylinders, with 40x48″ and 36x48″ water- keted air-cylinders, and vertical intercooler, housed in a 25x55′ stone and k building with steel truss roof. There is a 75-h. p. electric plant, pro- ing electric energy for both the North and South Kearsarge mines.

The South Kearsarge mine, area 160 acres, lying south of the Wolverine east of the Centennial, was known formerly as the Iroquois. Develop- t was begun September, 1899, and the best stopes are toward the Centen- line, the Kearsarge bed averaging about the same width as in the North rsarge and Wolverine mines, the rock being remarkably uniform in copper es.

No. 1 South Kearsarge shaft, to the north, was 2,604′ deep on Aug. 1, 1908, can be sunk to depth of circa 3,000′ before reaching the boundary. Two are operated, in counterbalance. The shaft-rockhouse is exceptionally and well equipped, also caring for rock from No. 2 shaft, with which it nnected by a trestle of 1,100′ length.

No. 2 South Kearsarge shaft was 1,787′ deep Aug. 1, 1908, and can be to depth of circa 2,800′, before reaching the boundary. The hoist, taken No. 2 North Kearsarge shaft, raises 5-ton skips.

Surface equipment of the South Kearsarge is mainly second-hand, taken

from other branches of the mine, but is sufficient for present requi
This branch has air-compressors of 55 drills aggregate capacity, and
40 rock drills.

The Tamarack Junior mine, area 120 acres, lying between the Ce
and Calumet & Hecla, has 2 vertical shafts, on the Calumet conglomer
2 being 3,360′ deep, with 12 levels opened. Mining was stopped, 1902,
ploratory work suspended, 1903. A little rock was shipped from the
on a royalty basis, 1906, and the shaft-house at No. 6 was burned, Ju
The Tamarack Junior apparently is dead for all time to come, so far
as the conglomerate openings are concerned, with poor prospects of
other workable cupriferous beds on the tract.

Rock is transported from the various mines to the mills by the
& Calumet Railroad, a branch of the Duluth, South Shore & Atlantic

The Osceola has 2 stamp-mills, adjoining those of the Tamarack,
shore of Torch Lake, the first mill, of wood, built 1886, having been tor
1905. The second mill, completed 1899, is 135x215′, having 3 stamps
cular screens having ⅝″ openings, allowing the discharge of coarse
The third mill, completed 1902, in line with the second, is 176x213′,
frame, having 4 Nordberg steeple-compound heads, with circular mortar
⅝″ screens and hydraulic separators, about 20% of the copper secured
ing coming from the separators and mortar discharges. The compound
stamp by superimposing the low-pressure cylinder upon the high-press
inder was first suggested by A. L. Burgan, mill superintendent of the
and the idea was carried into execution by Bruno V. Nordberg. The
mental compounded head gave such satisfactory results that the com
head is now in general use in the Lake Superior district. The wash
ment of the 2 mills has 110 Hodge jigs, with quick eccentric return
each stamp having 6 round tables and one Wilfley table, latter taking
from the round tables. There also is an Allis-Chalmers Chilean mill
grinding, and for reducing oversize material from the mortars of the
Crushing rolls with fixed bearings were introduced also by Mr. Burgan
of stamping at the Osceola mills, 1905, was only 16.95 cents per short
rock, which then constituted a world's record, and for 1907 was repo
the company as only 11.71 cents per ton.

The 43x150′ steel boiler-house, adjoining the mills and furnishing
for both, has three 72″ 250-h. p. boilers, delivering steam at 150 lbs.
and nine 84″ 250-h. p. boilers operated under 105 lbs. pressure, all of t
motive firebox type. Coal is brought to a 500-ton bin, over a trestle,
road cars, and draft is furnished by a 150′ brick-lined self-supportin
stack. An automatic ash-discharge washes the ashes through a lau
water flushed from a stand-pipe at intervals of 3 minutes. The powe
includes an Allis-Chalmers Corliss engine, operating a 100-kw. Morgan-
direct-current generator, which furnishes current for 220-volt incan
enclosed arc lamps.

The joint pump-house of the Osceola and Tamarack mines, of steel,
in size, houses two 40,000,000-gallon triple-expansion Nordberg pumps
22″, 40″ and 60″ cylinders, with three 30″ horizontal plungers of 52″ str
42″ discharge. Water is taken through an 8′ tunnel, running 1,275′ unde
Lake, drawing water through 3″ intake holes, these guarding against c
by ice.

Production has been as follows: 924,400 tons rock stamped, y
16,059,638 lbs. fine copper, in 1903; 1,095,520 tons rock stamped, y
20,472,429 lbs. fine copper, in 1904; 1,007,200 tons rock stamped, y
18,938,965 lbs. fine copper, in 1905; 1,016,240 tons rock stamped, y
18,588,451 lbs. fine copper, in 1906; 811,603 tons rock stamped, y

53 lbs. fine copper, in 1907. The decreased production of 1907 was by following the leadership of the Amalgamated Copper Co., which, as fore, in 1901, resulted disastrously to the Osceola shareholders. Copper ion was circa 17 lbs. fine metal per ton of rock stamped, in 1908, rock mainly from the North Kearsarge mine. For June, July and August, ock stamped averaged circa 111,000 tons monthly, materially the largest tion in the history of the mine. Total cost of fine copper, per pound of tion, has been as follows: 10.29 cents in 1903; 9.96 cents in 1904; 10.68 in 1905; 10.89 cents in 1906; 12.44 cents in 1907. The company ended with liabilities, all in accounts payable, of $433,026.39, with a balance of of $1,386,869.21.

he Calumet & Hecla Mining Co. owns 22,061 shares of Osceola stock, and, annual meeting, March, 1907, held proxies for about 50,000 shares addi-, thus controlling about 75% of the entire stock issue, but, through court edings, was restrained from voting its own stock or proxies, and there was nual meeting in 1907 or 1908, due to court injunctions. The litigation een protracted and bitter, but indications strongly favor the success of alumet & Hecla in securing control of the property, eventually.

EOLA GOLD & COPPER MINING CO. **WYOMING.**

Dead. Property sold, circa 1902, to North American Copper Co. Formerly ddefeha, Carbon Co., Wyo.

EOLA JUNIOR MINING CO. **WYOMING.**

Office: Rawlins, Wyo. Mine office: Dillon, Carbon Co., Wyo. J. M. sey, secretary; A. L. Clendennin, superintendent. Lands, near the Ferris-garty mine, have an old 120′ tunnel. Apparently idle since circa 1906.

URO COPPER CO.

Office: care of H. A. Rideout, Wollaston, Mass. Organized March, 1903, er laws of Maine, with capitalization $250,000. Location of lands, if any, nown.

HKOSH-WYOMING MINING CO. **WYOMING.**

Office: 365 Tenth St., Oshkosh, Wis. Mine office: Dillon, Carbon Co., o. O. A. Koch, president; E. E. Mullins, vice-president; H. O. Granberg, retary, treasurer and general manager; Frank Earle, consulting engineer. anized June 20, 1904, under laws of Wyoming, with capitalization 000,000, shares $1 par.

Lands, 11 claims, area 220 acres, in the Battle Lake district, carrying 4 ure veins in gabbro, of 22′ estimated average width, opened by shafts of and 72′ and a 22′ tunnel, showing malachite, azurite and chalcopyrite, esti-ted to carry average values of 18% copper. Idle several years.

NRIQUE OSORIO i CA. **CHILE.**

Mine office: Mina Grande, La Serena, Coquimbo, Chile. Property is El sterio mine, which produced, 1903, circa 300 metric tons of 22% ore from a n of about 40″ average width, opened to about 50 meters depth, and La risima mine, which in 1903 produced about 400 tons of 18% ore, equal to an tput of circa 300,000 lbs. fine copper.

OS OSOS MINE. **CALIFORNIA.**

Office: care of J. M. Gleaves Estate, owner, San Francisco, Cal. Mine, ar San Luis Obispo, San Luis Obispo county, California, is opened on a fissure in, carrying copper ores with porphyritic gangue, traversing sandstone and ales. Idle since circa 1865.

TA MINE. **JAPAN.**

Mine office: Ota-muri, Mine-gori, Nagato, Japan. Production, 1906, was 45 lbs. fine copper and, 1907, was 139,125 lbs. fine copper, 10,478 momme ver and 52 momme gold.

OTATE COPPER CO. MEXICO

Mine office: Llano, Magdalena, Sonora, Mex. L. H. Jansen, presid... W. P. Ross, superintendent. Lands, east of Llano, near the Cobre Gran... mine of the Sonora Copper Co., are well watered and fairly timbered, and ... said to show promising indications of ore.

OTAVI MINEN- UND EISENBAHN-GESELLSCHAFT. GERMAN SOUTHWEST AFRICA.

Office: 14 Behrenstrasse, Berlin, W., Germany. Mine office: Tsum... Otavi, Ovambaland, German Southwest Africa. Forces, 120 whites and 1,... blacks. Alex Schoeller, chairman; Dr. P. D. Fischer, vice-chairman; E. Labo... sky, chairman executive committee; preceding officers, P. Boettger, Edmu... Davis, Dr. Julius Scharlach, Dr. C. Schnabel, Dr. P. von Schwabach and L... Steinthal, directors; K. Hassinger, acting general manager; T. H. Gothma... mine superintendent; A. Morgenstein, railway superintendent; Dr. P. Glo... and Gustav Gluft, managers. Organized Apr. 6, 1900, and reconstructe... 1903, under laws of Germany, with capitalization increased from 1,000,0... marks to 20,000,000 marks, shares 100 marks par, in 20 series of 10,000 sha... each, fully issued. The company's plan of finance calls for carrying a 5... reserve, followed by dividends of 5% on ordinary shares, after which 10... will be allowed the board, as a bonus, out of surplus, and balance will b... divided equally between the ordinary and deferred shares. Company is con... trolled, through ownership of about 55% of stock, by South West Africa Co., Ltd. Annual meeting, in December.

Lands, 500 square miles freehold and 500 additional square miles of mining rights, in strips of 10 kilometers width, along the right of way of the railroad... property including valuable farming lands. Property includes the Otavi and Tsumeb mines, latter having the principal development. The mining properties show blue dolomitic limestone, with ores occurring as replacements, and occasionally as intrusions in dolomite and sandstone.

The Otavi mine has been opened to a depth of 230′, and has developed considerable ore, some of which assays up to 30% in copper tenor.

The Tsumeb mine, discovered, 1892, by natives, and taken over, 1901, by present owners, shows a strong gossan, standing above the surface for some distance. The principal ore body, of 40′ estimated average width, traceable 400′, carries copper oxides and carbonates, succeeded, at shallow depth, by chalcopyrite and galena, with occasional lead carbonates and chalcocite. Development is by the 274′ Main shaft, 225′ New West shaft, 60′ Old West shaft, 160′ New East shaft and 66′ Old East shaft. Levels are opened at depths of 65′, 160′ and 225′, with connection by three 200′ crosscuts between the principal shafts. The mine has about 4,000′ of workings, showing about 300,000 metric tons of ore, of which 60,000 tons is of low grade. It is proposed to open and work the entire ore body open-cast, to the present level of 160′.

Equipment includes a 60-h. p. steam plant and a 25-h. p. electric plant at the mine, with a 32-h. p. gasoline plant at the mill and an 80-h. p. plant at the smelter. There are two 60-h. p. hoists, good for depth of 125 meters each. Fuel is coal and wood for the mine and coke and charcoal for the smelter, coke costing 130 marks per metric ton, delivered. The company maintains a general store, and has a sawmill.

The mill has two Bartsch jaw-crushers, and gives the ore merely a rough dressing.

The smelter, at Tsumeb, near the mine and mill, receives ore by rail, and is rated at 40 to 60 tons daily capacity, having been blown in Sept. 10, 1907. Equipment includes 2 small blast-furnaces, one running on copper and the other on lead ores. Local iron ore is used for fluxing, and products are silver-lead bullion and copper matte, latter of 30 to 40% tenor, carrying circa 30 o...

r per ton, shipped to Europe for conversion, though possibly a converter t may be installed later, at Swakopmund, at the other end of the railroad. The Otavi Railway, 351 miles long, of 600-mm. gauge, runs from Swakopd, on the coast, to the interior terminus at Tsumeb, and was opened for eral traffic, for its entire length, Nov. 16, 1906. Equipment includes 37 motives and 330 cars. This railroad is doing a very satisfactory business, will be of immense utility in developing a district rich in natural rees.

Production, 1907, was circa 15,000 metric tons of ore shipped, and for 1908 s about 30,000 metric tons of lead and copper ore, estimated at 19% average or in copper and 23% in lead, yielding circa 6,000,000 lbs. fine copper, with ge quantities of lead and silver.

Average costs are estimated by company at 2 marks per metric ton for ning, and 3 to 5 marks per metric ton for concentrating.

The company plans continuing exploratory and development work, openg the Tsumeb mine below the third level, and developing other mines, inding the Little Otavi, elsewhere on the company's lands. The property is e of much promise, with a strong management, and bids fair to make one the really great copper mines of the world.

TAVI MINES & RAILWAY CO. **GERMAN SOUTHWEST AFRICA.**

English incorporation of Otavi Minen- und Eisenbahn-Gesellschaft.

TORI MINE. **JAPAN.**

Owned by Furukawa Mining Co.

TTUMWA COPPER CO. **WYOMING.**

Letter returned unclaimed from former office, Laramie, Wyo. Mine office: olmes, Albany Co., Wyo. C. B. Richey, president; W. B. Russey, secretary nd treasurer. Lands, 9 miles from Holmes, have a 280′ tunnel, not in ore. le several years.

UED-MOUGRAS COPPER & IRON CO., LTD. **ALGERIA.**

Office: 135 Wellington St., Glasgow, Scotland. Mine office: 5 Rue Lecreier, Bône, Constantine, Algeria. T. T. Stewart, chairman; J. A. French, retary. Organized Oct. 9, 1903, under laws of Great Britain, with capitalizan £12,500, increased, July 12, 1907, to £30,000, shares £1 par; issued, £24,243.

ENZA MINES CO. **ALGERIA.**

Mine office: Clairfontaine, Algeria. Property is the Djebel Ouenza mine, ar the Tunisian frontier, circa 25 kilometers from Clairfontaine. Lands show prominent gossan of cupriferous hematite, the copper being in the form of centiferous oxidized ores. Ore, as mined, 1905, averaged about 5% copper lor.

MPAÑIA MINERA LAS OURAS. **MEXICO.**

Dead. Formerly at Tepezalá, Ocampo, Aguascalientes, Mex.

RAY CHIEF MINING CO. **COLORADO.**

Office: Youngstown, Ohio. Mine office: Ouray, Ouray Co., Colo. W. D. wer, president; John Beil, secretary; David Woods, superintendent. Ores ry gold, silver and copper. Has gasoline power.

RAY CONSOLIDATED MINING CO. **COLORADO.**

Mine office: Ouray, Ouray Co., Colo. Joseph H. Tumbach, resident manr. Is successor of Colorado Gold-Copper Mining & Tunnel Co. Lands are a 60 claims, developed by a tunnel of about 5,000′ length.

ERFLOW MINES, N. L. **AUSTRALIA.**

Office: 18 Bridge St., Sydney, N. S. W., Australia. Mine office: Bobadah, S. W., Australia. T. H. Palmer, manager, at last accounts. Ores carry d, silver, lead and copper, latter being produced merely as a by-product. s a Ball mill, 40-ton cyanide plant and 50-ton smelter.

OVERLAND GOLD MINING CO. OR

Mine office: Cableville, Baker Co., Ore. Has auriferous and argent copper, lead and zinc sulphides. Presumably idle.

OVERLAND MINING CO. ARI

Letter returned unclaimed from former mine office, Willcox, Cochi Ariz. Lands are just north of the Mascot Copper Co. At last account March, 1908, property was undergoing development.

OVERLOCK COPPER CO. MI

Letter returned unclaimed from former mine office, Moctezuma, S Mex. Idle and apparently moribund.

OVERSIGHT MINING & MILLING CO. WASHIN

Office: Seattle, Wash. Mine office: Republic, Ferry Co., Wash. Preston, president; Chas. E. Murphy, vice-president; S. E. Dewsnap, sec C. A. Wallace, treasurer; E. J. Delbridge, general manager. Capitali $1,500,000, shares $1 par.

Lands, 11 claims, adjoining the Copper Ko, in the Lambert Cr Eureka district, north and west of the Turtle river, circa 10 miles no of Republic, showing 4 veins. Mine has a quarter-mile of workings, wit shaft, but principal development is by the Pinmoney tunnel. The wid money vein is mainly auriferous mispickel, carrying small silver and values. Has gasoline power, air-compressor and 300-ton shipping bin plans an aërial tram.

OVOCA COPPER SYNDICATE, LTD. IRE

Office: 10 Austin Friars, London, E. C., Eng. Mine office: County Wicklow, Ireland. Maj. Ralph P. Cobbold, chairman; W. Smith, tary. Organized Nov. 27, 1901, under laws of Great Britain, with capitali £12,000, shares £1 par.

Property is the old Cronnebane mines, in the Vale of Ovoca, which making about 1,250,000 lbs. refined copper yearly, at the end o Eighteenth Century. Mines were closed, circa 1875, and reopened, 1902, advice of Mr. Philip Argall. High grade oxidized ores were mined out i operations, but the vein, about 50' in average width, shows immense of low grade disseminated chalcopyrite, with quartz gangue, averaging a 3% copper, 1.5% zinc, 1.5 oz. silver and 1 dwt. 6 grains gold per long t new shaft has been sunk and some ore was shipped, 1907. Property c ered promising.

OWL COPPER MINING CO. CALIFO

Office: 777 Bacon Blk., Oakland, Cal. Mine office: Indian Gulch, posa Co., Cal. A. A. Leonard, president; J. T. Victor, vice-president; Thomes, secretary; Asa B. Mendenhall, treasurer; preceding officers and Hartung, directors. Organized June 17, 1907, under laws of Arizona, capitalization $1,250,000, shares $1 par.

Lands are one copper claim and two gold claims, latter being near S Springs, El Dorado Co., Cal. The John Dias mine, in Section 12, Town 6 Range 16 East, near Indian Gulch, has a 168' shaft on a 3' vein in se diabase, carrying mainly cuprite, azurite, chalcopyrite and chrysocolla, which ore has been smelted returning 2 to 30% copper and 26 cents t combined gold and silver values per ton. Company has secured ore as 27.18% copper and $2.70 gold per ton. There also are several shallo showing ore. Equipment includes gasoline power.

OWL HEAD MINING CO. ARI

Office and mine: care of Ferris S. Fitch, Tucson, Pima Co., Ariz. ized 1904, to take over sundry claims in the Owl Head Mountains, 2 from Tucson, carrying auriferous and argentiferous copper ores, also 10 miles west of Tucson. Idle, apparently since birth.

JORDALEN COPPER CO., LTD. **NORWAY.**
Dead. Liquidated Sept. 27, 1906. Formerly in Norway. Described Vol. V.

ORD COPPER MINING CO. **IDAHO.**
Mine office: Pierce, Nez Perce Co., Idaho. Was developing, with a small , November, 1908, and planned installing a power hoist and pump.

DE COPPER CO. **ARIZONA.**
Office: 85 Ames Bldg., Boston, Mass. Mine office: Red Rock, Pinal Co., . Frank Higgins, superintendent. Is controlled, through stock ownership, Arimex Consolidated Copper Co. Lands are the Copper Prince group, ously reported as 30, 50 and 140 claims, in the Silver Bell district, circa 7 s south of the Imperial mine. Apparently landed holdings are about 60 ns, area 1,200 acres, showing contact veins carrying copper sulphides with stone gangue. Property has been opened to depth of 50′ to 150′, and is to have a half-mile of workings. Production, 1907, was 319,591 lbs. fine per and 3,338 oz. silver.

CIFIC COAST COPPER CO. **ALASKA.**
Dead. Reorganized as Pacific Coast Mining, Milling & Developing Co., dead. Formerly at Ketchikan, Alaska.

CIFIC COAST SMELTER. **CALIFORNIA.**
Office and works: Bay Point, Contra Costa Co., Cal. Was built by the per King, Ltd. Plant includes a 100-ton furnace, with steam and electric wer. Presumably idle.

CIFIC CONSOLIDATED MINING CO. **NEVADA.**
Office: 131-32 Broadway, New York, N. Y. Mine office: Reno, Washoe Nev. Chas. B. Hill, president; Franklin Leonard, vice-president; mis A. Newton, secretary; Clinton E. Brain, treasurer; H. L. Cowles, eral manager; preceding officers, F. P. Knott, J. A. Alexander and k N. Waterman, directors; Robert W. Perry, superintendent; Dr. Jos. e Pratt, consulting engineer. Organized October, 1901, under laws of h Dakota, with capitalization $3,000,000, shares $1 par; issued, $2,500,000, hich originally $1,000,000 was common and $2,000,000 cumulative 6% pre- d stock, but all preferred shares have been retired.

Lands, 32 claims and a 50-acre millsite, area circa 650 acres, in the Pyra- district, showing 4 parallel ledges, of which 2, of 30′ to 60′ estimated ge widths, give assays of 2 to 40% copper, 6 to 100 oz. silver and $1.50 per ton. The oxidized zone, extending to depths of 200′ to 350′, carries gold and silver values, succeeded by base ores having small gold values fair silver values. Principal ore is chalcopyrite, associated with pyrite, silicious gangue. Mine has circa 30 shafts, of 30′ to 75′ depth, and a shaft of 522′, also tunnels of 250′, 1,000′ and 2,400′, with about 19,000′ of rground workings, estimated to show 500,000 tons of ore. Mine was ed, circa 1876, for gold and silver, ore turning to copper at depth. Surface ovements include a smithy, carpenter-shop and various other mine build-

Nearest railroad is 28 miles, but company has franchise for a railway nnect with Southern Pacific, estimated to cost $300,000. Property con- ed promising. Presumably idle.

IFIC COPPER CO. **MICHIGAN.**
Office: 709-199 Washington St., Boston, Mass. Mine office: Leopold , Houghton, Houghton Co., Mich. Nathaniel Thayer, president; Chas. J. e, Jr., secretary; Fred. W. Nichols, agent. Organized August, 1890, under of Michigan, with capitalization $1,000,000, shares $25 par; paid in, $2.

Ended 1907 with $35,715 out at interest, with income exceeding expendit

Lands, 960 acres, just northwest of the Atlantic mine, and suppose carry the northern extension of the Atlantic ashbed, on which a little exp tory work was done, circa 1880, previous to the organization of the comp Idle since circa 1890, but lands considered promising.

PACIFIC COPPER CO., LTD. MEX

Office: 1214 Monadnock Blk., Chicago, Ills. Operating office: 2146, Mexico, D. F. Mine office: Zihuatanejo, Montes de Oca, Guer Mex. W. S. Cockrell, president; Thos. Milan, vice-president; J. P. Ta secretary; Addison H. McKay, treasurer; preceding officers and Col. Randolph, directors; W. H. Austin, general manager; H. L. Swain, sup tendent. Organized June, 1906, under laws of Mexico, with capitaliz 10,000,000 pesos, shares 100 pesos par.

Lands, circa 30 miles from Zihuatanejo, near the Murga river, in the Copper King group, area 1,000 hectares, carrying copper and suppo placer gold, having a vein of 30′ to 200′ width, traceable about 3 miles, reported by company as tested, for about 1½ miles, to depth of 60′, at a 900′ below highest outcrop by erosion of streams at 2 points. Vein ca a gossan, mainly covered by soil, occasional exposures showing chalcop disseminated in pyrrhotite, without appreciable gold or silver values. slight depth, the pyrrhotite is replaced by argentiferous and auriferous ite, estimated by company to average 4% copper, with considerable and silver values, and which has assayed up to 16% copper, 90 oz. silve $26 gold per ton. Company estimates that gold and silver will cover a part and probably all of the cost of making copper, but this estimate is tically certain of failure. Property also is reported to carry 47 other of 1′ to 90′ width. Development is by 2 shallow shafts and 3 short tunnels. have been built to and on the property, and company plans eventually bui a railroad line from Zihuatanejo, which will be necessary for the econo working of the property on a large scale.

Equipment includes a fair outfit of machinery, installed 1907, with sary mine buildings and about 25 dwellings for workmen. Property bids to make a large low grade mine with careful development and econo management, and is considered promising. Officers include men of fina strength and good standing. Was said to employ circa 350 men, but sumably is idle.

PACIFIC COPPER EXPLORATION CO. ARIZ

Mine office: Prescott, Yavapai Co., Ariz. Geo. Roper, general man Lands, 15 claims, including a water right, in Spruce Cañon, circa 10 west of Prescott, opened by a 220′ tunnel.

PACIFIC GOLD & COPPER MINING CO. MEX

Office: 308 East Ninth St., Kansas City, Mo. J. J. Myers, presi D. C. Rhodes, secretary. Organized under laws of South Dakota, to de extensive mineral holdings in the Taviche district of Oaxaca, Mexico. traces of operations found, and apparently moribund.

ACIFIC SMELTING CO., LTD. **CHILE.**

Dead. Property sold, 1907, to Taltal Railway Co. Formerly at Taltal, ntofagasta, Chile. Described Vol. VI.

ACIFIC SMELTING & REFINING CO. **MEXICO.**

Office: 42 Broadway, New York, N. Y. Mine office: Fundición, Alamos, onora, Mex. Theo. Douglas, president and general manager; E. Kneeland, perintendent; Jas. F. Berry, metallurgical superintendent. Is controlled, rough ownership of entire stock issue, by Douglas Copper Co., and holds rect title to property through a Mexican corporation, the Compañía Metal-rgica y Refinadora del Pacifico. Smelter is located circa 30 miles south of e Anita mine of the Douglas Copper Co., and 153 kilometers northeast of uaymas, on the line of the Cananea, Rio Yaqui y Pacifico railroad. The melter is planned to do a general custom business, in addition to treating ouglas ores.

Ore is received from the Anita mine by trains of traction engines, each rain consisting of an engine and 5 trucks, each of the latter carrying three -ton steel ore buckets, which are dumped by overhead electric traveling rane. Equipment of the transportation service includes 4 Holt traction ngines, one having a derrick, and each drawing one trainload daily of circa 0 tons of ore. A train crew consists of an engineer, fireman and brake-an, wood being used for fuel.

The works have a 36" gauge railway equipped with 2 Davenport locomo-ives.

The works, designed throughout by Mr. Douglas, are designed to have an ltimate capacity of 600 tons daily, having a present capacity of 300 tons aily, with a single furnace.

The plant includes a small sampling mill, with a Vezin automatic ampler, mounted on trucks, of 30 tons hourly capacity, taking a cut of ne-tenth, which goes to the sampling mill.

The smelter has one 44x160" water-jacket blast-furnace, of circa 300 tons aily capacity, and is planned for a second furnace of the same size, with oom for a third. Charging is by Jeffrey roller-bearing conveyors, two per urnace, which elevate the weighed charge to the feed floor, discharging into teel bins at each side of the furnace. The side-dumping feed cars have 4 ransverse compartments, for coke, limestone, iron ore and copper ore, charges, hich are measured by gauges in each compartment, instead of weighed, being dumped into a hopper forming the boot of an incline Jeffrey elevator, which leads to buggies on the feed-floor, there being 2 elevators, of 30 tons hourly apacity. The furnace has a sheet-steel settler, 5' in diameter and 5' deep, lined with magnesia brick laid in magnesia clay.

The steel dust-flue, of the balloon type, with cars running underneath to draw off flue-dust, is 11x14x172' in size, connecting with a 177' self-supporting teel stack, 14' in diameter at the bottom and 8' at the top, standing on a 27' stone foundation. Flue-dust and fines go to a pug-mill, and are pugged to a stiff sludge, which is fed direct to the furnaces, without drying or briquetting.

The power plant has two 150-h. p. Morrison boilers, and an electric plant, for which current is furnished by a 75-kw. Westinghouse generator, direct-connected to a Bates-Corliss vertical compound engine, having 13" and 20" ylinders, and a Western Electric 25-kw. generator, direct-connected to a 9x10' ngine. Blast is furnished by a Connersville blower, direct-connected to a ates-Corliss tandem engine with 12x24x36" cylinders.

Water is secured from an artesian well having an estimated flow of 000 gallons daily.

The furnace was *blown in circa June, 1908*, when the first shipment of

ls, representatives, etc., but certainly these mishaps were through no of the management, directly or indirectly. Company is regarded with suspicion.

LANT & STOFFEL. MEXICO.

Mine office: Charcas, Moctezuma, San Luis Potosí, Mex. Arthur Pallant, ger. Mine is Los Morelos, carrying auriferous and argentiferous copper lead ores. Has steam power and a 50-ton mill, employing circa 100 men, st accounts.

M DEVELOPMENT CO. CALIFORNIA.

Dead. Formerly at Acton, Los Angeles Co., Cal. Described Vol. VI.

LMER MOUNTAIN COPPER MINING & MILLING CO. WASHINGTON.

Office: Spokane, Wash. Mine office: Loomis, Okanogan Co., Wash. nized under laws of Washington, with capitalization $1,500,000. Lands on Palmer Mountain. Idle since circa 1903.

LMER MOUNTAIN GOLD & COPPER CO. WASHINGTON.

Dead. Formerly at Loomis, Okanogan Co., Wash.

LMER MOUNTAIN GOLD MINING & TUNNEL CO. WASHINGTON.

Dead. Reorganized, circa 1905, as Palmer Mountain Tunnel & Power Co. merly at Loomis, Okanogan Co., Wash.

LMER MOUNTAIN TUNNEL & POWER CO. WASHINGTON.

Office: 303-56 Wall St., New York, N. Y. Mine office: Loomis, Okanogan , Wash. John Tilley, president; F. G. Burnham and E. Burr, vice-presidents; uel Porter, treasurer; Lee H. Porter, secretary; John Boyd, general man- r. Organized circa 1905, under laws of Arizona, with capitalization 00,000, shares $1 par, as successor of Palmer Mountain Gold Mining Co. Lands, 65 claims, on Palmer Mountain, said to show 28 veins, carrying ly gold values, opened by a 4,000′ tunnel, planned to be driven 8,000′ to a back of 4,000′. Has opened, to depth of circa 200′, a copper vein ng ores assaying up to 28.8% copper. Mine has an electric haulage system. Equipment includes necessary mine buildings, 100-stamp mill and a 750-h. p. ro-electric plant, with estimated energy of 3,000 h. p. available from Tout lee Creek.

OMA MINING CO. MEXICO.

Dead. Formerly at Ayutla, Autlán, Jalisco, Mex. Described Vol. VI.

O VERDE COPPER MINING CO. ARIZONA.

Mine office: Vail, Pima Co., Ariz. W. H. Martin, president; W. T. Payne, tary. Capitalization, $3,000,000, shares $1 par. Lands, 10 claims, 9 miles east of Vail, opened by tunnels of circa 200′ and 500′, showing auriferous argentiferous copper ore. Presumably idle.

O VERDE MINING CO. ARIZONA.

Mine office: Yucca, Mohave Co., Ariz. J. L. Whitney, manager.

IPAÑIA MINERA EL PALQUI. CHILE.

Mine office: El Palqui, La Ligua, Aconcagua, Chile. Mine, circa 20 kilo- ers from Cabildo, has a manto, or blanket vein, of about 5 meters thick- , showing an abundance of ore of 5 to 6% average copper tenor, but is handi- ed by transportation charges averaging 6.65 pesos per metric ton to the ildo smelter. Production, 1903, was circa 300 metric tons of ore averaging % copper tenor.

N-AMERICAN DEVELOPMENT CO. MEXICO.

Office: 83 Dexter Bldg., Chicago, Ills. Mine office: Aguacaliente de a, Fuerte, Sinaloa, Mex. Harry Austin Clapp, president and general man- r; Paul H. Seymour, secretary; F. B. Grubb, treasurer; Daniel H. Living- n, general superintendent. Apparently has some connection with Las Tablas pper Co.

PAN-AMERICAN EXPLORATION CO. ME

Office: 711 Missouri Trust Bldg., St. Louis, Mo. Mine office: Manz Medellin, Colima, Mex. A. K. Vickers, president; Col. Kent E. Keller, tary; Schuyler S. Gates, general manager. Organized March 8, 1901, laws of Missouri, with capitalization $1,000,000, shares $10 par.

Property is the Camotlán mine, 10 hours' ride by horseback from zanillo, carrying gold, silver and copper ores. Company formerly owne hectares, including the Cacoma mine, sold to Cacoma Mines & Smelter Co.

PAN-AMERICAN FEDERAL SMELTING & REFINING CO. NEW ME

Office: El Paso, Tex. Works office: Socorro, Socorro Co., N. M. Smith, president; W. P. Stewart, vice-president; J. A. Lowe, general ma Organized April, 1908, under laws of Arizona, with capitalization $5,00

The company was claimed, August, 1908, to be building small c smelters at Lordsburg, Grant Co., N. M., Nogales, Santa Cruz Co., Ariz. Van Horn, El Paso Co., Tex. Apparently the smelters outside of S remain in the air, and apparently the company expects citizens to donate and subscribe for stock. The Socorro plant is said to be planned to small lead and copper stacks, of 100 tons daily capacity, with a 5-to centrator in connection. Company is not regarded favorably.

PAN-AMERICAN MINES CO. ME

Dead. Formerly at Etzatlán, Ahualulco, Jalisco, Mex.

PAN-AMERICAN MINING & SMELTING CO. ARIZONA & ME

Office: 905-11 Broadway, New York, N. Y. Mine office: Prescott, pai Co., Ariz. A. Howard Skinner, president; Harry F. Lindsley, sec and treasurer. Organized under laws of Arizona, with capitali $15,000,000, shares $5 par, in $3,000,000 preferred 7% stock and $12,0 common stock.

This company was promoted by the notorious Dr. R. C. Flower, wh successful in swindling many unsuspecting American investors, and wh last accounts, was supposed to be traveling in Mexico, in various disg and hitting the high spots only. The company was also assisted in sec the Quebradillas mine, of Parral, by Grant G. Gillett, the cattle plunger, left Kansas City—and many creditors—between two suns. That precio firm of mining swindlers, L. E. Pike & Co., of Boston, also aided in the promo The company succeeded the Lone Pine Mining Co., alias the Arizona, Ea & Montana Smelting & Ore Purchasing Co., of most unsavory memory, ceeding the Buenos Aires Mining Co., Urique Gold Mining Co., Sunset M Co. and La Paz Mining Co., all dubious propositions. Several mines abandoned, without taking final titles. The Quebradillas mine, of Parral, optioned, but bond was allowed to lapse. The various Mexican holding the Pan-American company, some of which may or may not still be held cluded the Recompensa group, at Maguarachic, the Hernandez group at Mi and La Liga and Santa Camilla mines, at Concepción, all of Chihuahua, ico, also the Ambidexter group, in Arizona, located circa 1900, on which n was found. Idle and moribund.

hise Co., Ariz. Described Vol. VI.

MINING CO. **ARIZONA.**
ce: Paradise, Cochise Co., Ariz. Is controlled, through owner-
of stock, by Bisbee-Sonora Development Co. Lands, near the
Mining Co., have a 245' shaft, with crosscuts showing sulphide
rade.

OPPER-GOLD MINING CO. **COLORADO.**
bsorbed, 1903, by San Juan Smelting & Refining Co. Formerly
San Juan Co., Colo.

MINING & MILLING CO. **COLORADO.**
Grand Junction, Colo. Mine office: Paradox, Montrose Co., Colo.

J. A. McCulloch, president; T. W. James, vice-president; A. A. Mill
tary and general manager; D. T. Stone, treasurer. Organized Jan.
under laws of Colorado, with capitalization $1,500,000, shares $1 par.

Lands, 12 claims, area circa 110 acres, also a 5-acre millsite, in th
and Paradox districts, 65 miles from a railroad, showing limestone, s
shales and quartzite, with intrusive porphyry, carrying 3 fissure and
veins of 2′ to 7′ width, opened by tunnels of 85′, 100′, 200′ and 400′,
melaconite and argentite, giving assay values of 3 to 75% copper,
1,000 oz. silver per ton, with a trace of gold.

PARAMATTA COPPER MINES, LTD. AUST

Offices: 22 Chancery Lane, London, E. C., Eng., and 29 bis, Rue N
Lille, France. Mine offices: Wallaroo, Daly Co., and North Yelta, I
South Australia. Eugene Dervaux, chairman; G. de Venancourt, mi
nager; Henri Duquesne, secretary. Organized May 18, 1899, under
Great Britain, with capitalization £200,000, shares £1 par. Debentures,
authorized, £9,300 issued, at 5%. Shareholders are mainly French.
netted £13,165 and in 1905 netted £7,353.

Lands, 1,340 acres, held from the South Australian governme
99-year lease expiring June 30, 1988, at annual rental of 1s. per a
2.5% royalty on net profits. Lands include the Paramatta, Yelta,
Hughes and Wheal James mines.

The Paramatta, which is the principal mine, is an old and import
ducer, adjoining the Wallaroo mine of the Wallaroo & Moonta, reopen
by present company. Deepest shaft is 500′, bottomed in a vein rangi
8′ width, with richer portions carrying up to 25% copper, and form
about 50,000 tons of ore reserves, which have been nearly exhausted by
management. A new shaft was sunk crosswise, and is practically w
Water supply is scant, causing trouble at times. Equipment includes a
machinery plant. The Yelta mine, taken over 1903, has been reope
equipped with modern machinery.

The reduction plant includes a 200-ton concentrator and a 400-ton
latter having blast-furnaces turning out matte which formerly was c
at the adjoining plant of the Wallaroo & Moonta, but is now shipped to
for reduction, at considerably increased cost. Production, for year
June 30, 1905, was 2,069,760 lbs. fine copper. Local management was c
circa 1906. Under former direction of L. G. Hancock, money was ear
dividends with copper at £57 per long ton, company paying 25% divid
1903 and 5% dividends in 1904. Under present management the c
has lost money with copper at £85 per ton. With adequate expendit
opening of new reserves, and under good management, the property is
to be capable of making a good mine, but the present management
Operations were suspended, 1907, on account of the depression in copp

PARCIONERA CONSOLIDATED MINING CO. M

Office: 29 Broadway, New York, N. Y. Mine office: Santa
Iturbide, Chihuahua, Mex. Jos. S. Qualey, president; Ernest Hes
secretary. Is a close corporation, shares $100 par. Lands, under devel
at last accounts, are said to give an encouraging copper showing.

PARINGA COPPER MINES, LTD. AUST

Dead. Formerly at Callington, Adelaide Co., South Australia. De
Vol. V.

PARINGA MINING SYNDICATE. AUST

Mine office: Callington, Adelaide Co., South Australia. Lands, 17
Presumably idle.

PARIS BOULDER MINING CO.

Office and mine: Paris, Bear Lake Co., Idaho. Andrew Madsen

J. H. Eversoll, secretary and treasurer; preceding officers, W. D. Passey, Candland, J. H. Grimmett, J. Russell Shepherd, Chas. Innes and B. F. ward, directors; L. W. Johnson, superintendent. Organized 1908, under of Idaho, with capitalization $50,000, shares 5 cents par. Lands, 23 s, showing ores carrying copper, lead and silver.

K CITY MAJESTIC MINING CO. **UTAH.**

Dead. The promoter, S. T. Rolph, disappeared. Formerly at Park City, nit Co., Utah. Described Vol. IV.

K CITY MINING CO. **WASHINGTON.**

Mine office: Keller, Ferry Co., Wash. W. T. Connell, manager. Lands de the Mountain Boy and Hercules mines, latter having a 331′ tunnel ring ore assaying up to 6.5% copper and 140 oz. silver per ton, with small values and traces of lead.

K COPPER CO. **MONTANA.**

Office: 33 West Granite St., Butte, Mont Letter returned unclaimed a former mine office, Dillon, Beaverhead Co., Mont. Wm. O. Climo, presi-; John H. Judge, vice-president; R. M. Cobban, treasurer and manager; eding officers, E. B. Howell and W. M. Bickford, directors; Forbes F. ne, secretary. Organized Oct. 6, 1906, under laws of Montana, with capi-ation $1,000,000, shares $1 par.

Lands, 6 claims, on the Wise River, said to show a 60′ vein, outcrop-g for 2,000′. Has 2 shafts, known as the Park and Williams, latter, 200′ , with 2 compartments, showing argentiferous copper ore assaying up to % copper. Has an air-compressor.

EK COPPER & GOLD MINING CO., LTD. **IDAHO.**

Office and mine: Mullan, Shoshone Co., Idaho. Patrick Burke, manager. nds, 6 claims, on the southern side of Stevens Peak, having tunnels of 550′ d 1,000′, showing a vein of 3′ to 50′ width, with average of circa 20′, capped a gossan, of about 40′ average width, of mixed hematite and siderite, carry-g kidneys of high grade copper carbonates and chalcopyrite, with some native pper. Veins apparently should carry chalcopyrite of fair grade at greater pth.

EKS MINING CO. **MONTANA.**

Mine office: Polaris, Beaverhead Co., Mont. Has copper-gold ores.

MPAÑIA ESPLOTADORA DE PARRAL. **MEXICO.**

Mine office: San Bartolo, San Juan de Guadalupe, Durango, Mex. perty includes El Lentisco mine, carrying auriferous copper ores. Idle.

RRAL SMELTING CO. **MEXICO.**

Office: care of Samuel Garrison, president, Pittsburg, Pa. Works office: ral, Hidalgo, Chihuahua, Mex. D. M. Evans, general manager. Capitaliza-, $1,000,000. Property is a smelting concession, from the State of Chihua-and it was planned to build a 250-ton smelter, with both lead and copper ks. Apparently abortive.

RROT MINING & MILLING CO. **COLORADO.**

Letter returned unclaimed from former mine office, Leadville, Lake Co., . Property includes the Golden Fleece mine, said to show auriferous and ntiferous copper ore assaying 5.5 to 22% copper.

RROT SILVER & COPPER CO. **MONTANA.**

Office: 42 Broadway, New York, N. Y. Mine office: Butte, Silver Bow Mont. Employs circa 350 men. A. H. Melin, secretary; John D. Ryan, aging director; H. A. Gallwey, superintendent; preceding officers, Sidney se, F. P. Addicks, John E. Judson and A. B. Grafius, directors. Organized , under laws of Montana, with capitalization $2,300,000, shares $10 par; ed, $2,298,500. Is controlled, through ownership of slightly more than a ority of stock, by Amalgamated Copper Co. Paid dividends, to end of

1907, of $6,807,260. Recent dividends have been as follows: 50 cents in nothing in 1903; $1 in 1904; $2 in 1905; $1.25 in 1906; 75 cents in 19 quarterly dividend of 25 cents, due November, 1907, was passed.

Lands, 19 claims, mainly fractional, area 40.6 acres, well located, central portion of the Butte district, including the Parrot, Little Mina lona and Original No. 6 mines. The Parrot mine, opened 1884, is one pioneer mines of the camp. The property shows a barren zone, at de circa 1,000', succeeded by fair ore bodies below. Ore of the mine, as a averages about 3% copper, and carries fair silver and small gold values.

The Parrot mine is opened by a 2,300' shaft, having 3 compartme the fourth level, and 4 compartments below, retimbered, 1904. The m timbered with 10x10" square sets and round timbers, having électri bells, and is connected underground with the Colusa-Parrot, Neversweat, and Original No. 6 mines. The lower workings show an ore body up in width, apparently a continuation of the Anaconda vein, carrying some grade chalcocite and bornite, but the Blue Vein fault cuts the Anaconda in such a manner that the Parrot loses about 100' in length of wo ground with each 100' in depth. The Parrot also is mining the Nipper which shows ore up to 10% copper and 15 oz. silver per ton, but the Parrot only a 5/36 interest in the Nipper vein, balance belonging to Butte Coa The Parrot shaft has a 112' steel gallows-frame, with maximum load ca of 50 tons, and a Union Iron Works hoist with 28x96" cylinders, capa raising 10-ton loads from a depth of 3,000', hoisting 2 double-deck cages 10-ton skips swung under, using a flat steel rope ⅝" thick and 8" wide.

The Little Minah mine has a 1,000' two-compartment shaft, with opened at 600', 800' and 1,000', the bottom level showing to the west a body assaying 3.5% copper and 6 oz. silver per ton, and to the ea an ore body averaging 18' width for 100' length, giving assays of 4% c and 6 oz. silver per ton. The Blue Vein fault carries some concentrati on this property. The temporary equipment at the Little Minah is to placed by a hoist good for 2,000' depth.

The Original No. 6 mine, having a shaft of circa 1,000' depth connected underground with the Parrot and adjoining mines, is a con tively small producer.

Equipment includes an 80-drill Ingersoll-Sergeant air-compressor 22-drill Rand air-compressor. Mine buildings, mainly of steel, stone and include an engine-house, boiler-house, compressor-house and a model two change-house, with cement floors, 24 shower-baths and lockers for 350 me

There is an antiquated smelter, idle since 1900, which is an asset particular value, though some copper is secured by precipitation from t dumps and slag-piles.

The company owns copper refining works at Bridgeport, Conn., whi are antiquated, and have been idle for some years.

Production, for year ending June 1, 1908, was only 57,964 tons or about one-third as much as two years previously, and smelter returns aged about 2.5% copper only, with fair silver values. In August, 19 Parrot was yielding about 300 tons and the Little Minah 100 to 150 tons Normal production is circa 8,000,000 lbs. fine copper yearly, but, for 19 about 5,000,000 lbs. only. For year ending June 1, 1907, there was a of $141,730, and for year ending June 1, 1908, there was a deficit of $1 The property apparently has seen its best days, though under normal tions it is capable of yielding small profits, with possibilities of openi ore bodies of larger size and better average grade.

PARRY SOUND COPPER MINING CO., LTD. ONT

Office: 500 Germania Life Bldg., St. Paul, Minn. Mine office:

Parry Sound district, Ont. Employs 10 men. Frank Johnson, presi-
anford B. Lewis, vice-president; Otto Monson, secretary and treasurer;
g officers, John Ogren and Chas. Burton, directors; Chas. Anderson,
perintendent. Organized March 23, 1899, under laws of Ontario, with
zation $5,000,000, shares $1 par; issued, $2,500,000. Liabilities are
t $25,000 floating indebtedness, and a $5,000 mortgage at 6% on 200
land. Annual meeting, second Tuesday in August.
ds, 10 claims, area 2,000 acres, one-half freehold and one-half held
contract requiring $2,000 to perfect title. Property, on the eastern
f Georgian Bay, includes the McGowan and Wilcox mines.
e Wilcox mine has indications of 4 parallel veins in a cross-section
t one-quarter mile, with a 145′ shaft on a 20′ ore body in granite, trace-
00′, carrying auriferous and argentiferous bornite assaying 2.8 to 11%
There also is an open-cut of 20x150′, 18′ deep, showing 3% chalcopyrite.
e McGowan mine has shafts of 100′, 100′ and 250′, and a 150′ crosscut
showing bornite and tetrahedrite, and occasional chalcopyrite, with
gangue. A smelter shipment of 240 tons of selected ore returned 17%
and $5 in combined gold and silver values.
uipment includes a 10-stamp mill, hoisting machinery and several build-

iron, copper, zinc and lead, employing circa 25 men.

GOLD & COPPER PRODUCING CO. **UTAH.**
ice: care of J. W. Guthrie, secretary, Salt Lake City, Utah. A. H.
th, president; Leonard Hilpert, treasurer. Organized, 1907, with capi-
on $500,000, shares $1 par. Lands are said to be 12 claims, in Salt
unty, Utah.

ITY COPPER CO. **MEXICO.**
ice: care of H. E. Runkle, El Paso, Texas. Lands, sundry claims, in
rra de Las Arradas, district of Bravos, Chihuahua, Mexico, developed by
ifts, one tunnel and an open-cut, with a total of about 350′ of openings,
g stringers of oxide and carbonate copper ores, in limestone. Idle and
ıtly moribund.

S & SON, LTD. **ENGLAND.**
ice and works: Bristol, Somersetshire, Eng. Property is the Bedmin-
elting Works, treating ores imported from a great variety of sources.

GONIA MINING CO. **ARIZONA.**
ice: care of Francis J. Heney, San Francisco, Cal. Mine office: Pata-
Santa Cruz Co., Ariz. Benj. Heney, president; R. R. Richardson, secre-
d treasurer; Fredk. John Zebert, consulting engineer. Capitalization
0, shares $1 par. Lands, 31 claims, unpatented, area 620 acres, in 2
known as the Hardshell and Flux, in the Patagonia Mountains, having
incline shaft with circa 2,000′ of workings. The Hardshell group shows
ous silver-lead ore, slightly zinciferous in the bottom workings, with
ores on the Flux group.

FINDER CONSOLIDATED MINES, LTD. **BRITISH COLUMBIA.**
ne office: Grand Forks, Boundary district, B. C. John Rogers, presi-

dent. Lands, on Pathfinder Mountain, circa 14 miles from Grand Forks, show 4 parallel veins of 8′ to 20′ width, carrying auriferous and slightly argentiferous chalcopyrite, disseminated in pyrrhotite, with quartz gangue, assaying 2.5 to 4% copper and circa $2 gold per ton. Has 3 shafts, with aggregate depth of 357, and about 800′ of tunnels. Has steam power, hoist, 7-drill Rand air-compressor and necessary mine buildings. Property considered promising, but idle for several years.

PATHFINDER GOLD & COPPER CO. IDAHO.

Dead. Lands were 8 claims, on the Queen River, worked in a small way, many years ago, having a 500′ crosscut tunnel, showing a vein of about 3′ width, carrying auriferous and argentiferous copper ores, with values mainly in the precious metals. Former office was Canton, Ohio. Formerly at Atlanta, Elmore Co., Idaho.

PAUDORNE COPPER MINING CO. VIRGINIA.

Mine office: Houston, Halifax Co., Va. Organized December, 1902, under laws of South Dakota. Apparently idle since birth and presumably moribund.

PAULL'S CONSOLIDATED COPPER PROPRIETARY, N. L. AUSTRALIA.

Mine office: Burr Well, South Australia. Presumably idle.

PAY COPPER CO. CALIFORNIA.

Letter returned unclaimed from former office, Tonopah, Nev. Mine office: Greenwater, Inyo Co., Cal. Lands, 4 claims, adjoining the Greenwater Black Jack Mining Co. Idle and apparently moribund.

PAYMASTER CONSOLIDATED MINES CO. ARIZONA.

Office and mine: Tucson, Pima Co., Ariz. J. Edw. Owen, vice-president and treasurer; John P. Owen, president; R. W. Langworthy, secretary. Capitalization $5,000,000, shares $1 par. Is said to have authorized, November, 1907, a $300,000 bond issue.

Lands, 52 claims, circa 25 miles southeast of Tucson, in the Pima district of the Sierrita Mountains, including the paymaster group of 17 claims; Olive group of 2 claims; North Prosperity group of 7 claims; Schumaker group of 2 claims, and Keystone group of 24 claims. The Keystone group has 3 tunnels, showing gold and lead values. The Paymaster mine, opened 1887, and said to have produced upwards of $500,000 worth of ore, under former ownership, has shafts of 90′ to 325′, with circa 4,000′ of workings, on a vein of 15′ to 20′ width, carrying argentiferous lead and copper ores, said to average 6% copper, 40% lead and 65 oz. silver per ton, with 100,000 tons of ore in sight, which estimates are considered excessive. Shipped some ore, 1907.

PAYMASTER COPPER MINING CO. WYOMING.

Dead. Formerly at Encampment, Carbon Co., Wyo.

PAYMASTER MINE. IDAHO.

Mine office: Wardner, Shoshone Co., Idaho. Lands, one mile east of Wardner, are said to have a 4′ vein carrying lead and copper values. The mine has a 280′ upper tunnel and a 100′ lower tunnel, with a 100′ blind shaft from the lower tunnel, showing good lead and copper ore, former assaying up to 42% in tenor.

PAYMASTER MINING & SMELTING CO. UTAH.

Mine office: St. George, Washington Co., Utah. S. L. Adams, Jr., superintendent. Property was said, 1906, to be operated by Samuel Newhouse and associates. Is said have a 20-ton smelter.

PEACH BOTTOM COPPER CO. NORTH CAROLINA.

Dead. Formerly at Elk Creek, Ashe Co., N. C.

PEACOCK CONSOLIDATED MINING CO. UTAH.

Mine office: Milford, Beaver Co., Utah. Lands show a fissure vein of 2′ to 5′ width, giving ore assaying up to 42% lead, 23 oz. silver and $1.60 gold per ton.

zation $50,000, shares $25 par.
60 acres lode claims and 272 acres placer claims, all patented, with
cluding 2 coal claims, of 811 acres, lying in the Hamilton district,
es over the mountains from Santa Fé, and about 18 miles from
. Lands are well timbered, and a considerable water power is
m the Pecos river, which company controls for 2½ miles.
perty shows granite, slate and quartzite, with underlying strata
rboniferous age, cut through by the valley of the Pecos river.
various contact deposits, having ferruginous quartzite on the
granite and slate to the north, of which two, under development,
eralized zone up to 225′ in width, with ore bodies of 12′ to 18′
dth, carrying massive chalcopyrite and massive sphalerite, formerly
give average assays of 3.5% copper, 3.75 oz. silver and $1.60 gold
e ores are slightly argentiferous and auriferous zinc, lead and
ides, of low average tenor, though in large quantities, and will

require reduction on the ground, in a plant especially adapted to the tr ment of complex sulphide ores.

Development is by the Katydid shaft of 60′ and the Evangeline shaf 310′, with 450′ of tunnels, and about 3,600′ of workings. The manage claims to have 168,304 tons of ore blocked out. The property was opened and closed shortly thereafter, owing to zinc ores near surface proving workable.

Equipment includes a 165-h. p. steam plant, with 2 hoists, good for depth each, and a 3-drill Rand air-compressor, with several mine buildings. company has been said to consider building a 23-mile branch line, from mines to Pecos switch, on the Santa Fé Railway. Idle.

PEERLESS COPPER EXTRACTION CO. ARIZO

Office: 405 Bank Blk., Denver, Colo. Mine office: Florence, Pinal Ariz. J. Bradbury, secretary; A. F. Abbott, manager. Organized circa with capitalization $1,000,000. Property is the McIntosh experimental lea plant.

PEERLESS GOLD & COPPER MINING CO. COLOR

Letter returned unclaimed from former office, 153 La Salle St., Chi Ills. Mine office: Silver Cliff, Custer Co., Colo. H. S. Taylor, president treasurer; C. E. Wilcox and A. G. Gage, vice-presidents; V. N. Brant, s tary. Organized circa 1905, under laws of Colorado. Lands, 29 claims, 3 ented, in the Spruce district, circa 12 miles from Silver Cliff, developed 1,655′ tunnel, supposed to be closely approaching an ore body.

PEERLESS MINING & MILLING CO. COLOR

Office and mine: Salida, Chaffee Co., Colo. Lands, 6 claims, on Cy Mountain, 16 miles west of Salida, opened by an 800′ crosscut tunnel, sho ores carrying values in lead, copper, gold and silver, lead predominating. several years and apparently moribund.

PEHOVAZ HERMANOS y CA. P

Mine office: Uliachiu, Cerro de Pasco, Junín, Perú. Property is a producer of silver and copper, when worked. Presumably idle.

PEÑA COPPER MINES, LTD. SP

Office: 3 Laurence Pountney Hill, Cannon St., London, E. C., Eng. office: Nerva, Huelva, Spain. Nicol Brown, chairman; Albert Straube, d chairman; T. Stephenson Dick, secretary; Enrique Schreck, mine man Wm. Neil, auditor. Organized Sept. 19, 1900, under laws of Great Britain capitalization increased, January, 1905, to £600,000, shares £1 par; is £537,600. Debentures originally were £200,000 authorized, and £193,800 is at 5%, reduced, 1907, to £63,500, with sinking fund for redemption amou to £51,500. Net profits for fiscal years have been as follows: £17,293 in £45,697 in 1906; £19,522 in 1907. Dividends have been as follows: 5% in 5% in 1905; 4% in 1906; 7½% in 1907.

Lands, 183 hectares, 2 miles northeast of the Rio Tinto, being the del Hierro group of 17 old mines, taken over from the Sociedad Peninsul Brussels. Extraction is mainly open-cast, and large quantities of overb are removed, stripping having been 195,430 cubic meters in 1905; 2 meters in 1906, and 174,324 meters in 1907. Eventually the capping w removed almost entirely, and the mine worked open-cast down to the 9th there being a very limited amount of underground mining in progress. reserves were estimated, 1907, at 3,000,000 long tons.

Equipment includes hoists, crushing plant, shops and dwellings. A 2½ private line, equipped with one locomotive and 14 cars, connects the and works with the nearest railway.

Ores produced are divided into cupriferous pyrites, iron pyrites and w sulphur ore, latter being ore previously leached for copper, and sold ther

ulphur contents. The leaching plant has settling tanks, boilers and pumps. cupriferous pyrites of the Sierra Morena lend themselves with special ty to copper extraction by a combination of natural weathering and arti- leaching, and this process, in use by the Peña, gives cheap costs, but en- long waits and heavy investments before profits are returned, a term of 10 years being required for complete extraction of copper values, which s that the operators must put more in than is taken out, for a long term ars.

Production was 624 long tons fine copper in 1902, and for 1905 was ,800 lbs. fine copper and circa 110,000 long tons of pyrites, sold for sul- At the end of 1905 the quantity of ore in the tereros, or leach-heaps, 480,803 long tons, and Dec. 31, 1907, was 536,476 long tons, estimated to in 4,119 long tons fine copper. Owing to prolonged drought, production ampered in 1907, but heavy rains, at the end of the year, gave sufficient ves of water. Production, 1907, included 15,104 tons of leached sulphur 9,550 tons of ore extracted and 167,236 long tons of ore added to leach- , and production of fine copper has been as follows: 1,724,800 lbs. in 2,421,440 lbs. in 1906; 2,036,160 lbs. in 1907. Property is considered val- and well managed.

EDAD ANONIMA MINERA DE PEÑAFLOR. **SPAIN.**

Office: Bilbao, Vizcaya, Spain. Mine office: Peñaflor, Sevilla, Spain. Luis de Salazar, president; Don P. Alzaga, manager; Don Angel Iznarde y e, superintendent. Organized Jan. 1, 1901, under laws of Spain, with alization 4,500,000 pesetas. Property includes the Concepción, Descuido Segunda Preciosa mines, equipped with an electric pumping plant. Is sup- l to be working with a small force.

Dead. Lost lands, circa 1904. Formerly at Santa Catarina, Norte, Baja ornia, Mex. Fully described Vol. V.

EDAD PENINSULAR DE BRUSSELS. **SPAIN.**

Dead. Was wound up, 1900, and mines sold to Peña Copper Mines, Ltd. erly at Nerva, Huelva, Spain.

N-ARIZONA COPPER CO. **ARIZONA.**

Office: Greenburg, Pa. Mine office: Prescott, Yavapai Co., Ariz. R. H. tz, president; N. J. Baxter, vice-president; Geo. S. Sarver, secretary; Jas. eeble, treasurer; S. J. Gnash, general manager. Organized under laws of na, with capitalization $1,000,000, shares $1 par. Lands, 27 claims, in opper Basin district.

N CHEMICAL WORKS. **CALIFORNIA.**

Office and mine: Campo Seco, Calaveras Co., Cal. J. K. Harmon, presi- and general manager; Albert C. Harmon, secretary, treasurer and super- dent; A. L. Willie, assistant superintendent; John Cocking, mine foreman; t Baird, smelter superintendent. Organized 1880, under laws of Cali- .

Lands, 4 claims, area 80 acres, patented, also a 20-acre smelter-site, 640 of timber lands and 450 acres miscellaneous lands, giving total holdings 90 acres, in the Campo Seco district. Property includes the Campo Seco, and Satellite mines, which were considerable producers, circa 1860-1870. are developed by 5 tunnels and 2 shafts, latter of 500′ and 700′, cutting ore body, at depth of 400′. Ore is slightly argentiferous and auriferous pyrite, associated with sphalerite and pyrite, with gangue ranging from e schist, through clay, to quartz.

Equipment includes steam plants of 150 h. p. at the mine, and 400 h. p.

at the smelter. Shafts have 44-h. p. and 100-h. p. hoists, good for depths of 1,000' and 2,000' respectively, and there is a 14-drill Ingersoll-Sergeant air compressor. Fuel is petroleum. A little cement copper is produced by leaching old waste burrows.

The property is served by the Southern Pacific Railway, 6 miles distant, and transportation is by wagon between the mine and Valley Springs, the distance being short, allowing one round trip daily.

The smelter, one-fourth mile from the mine, receiving ore by tram, has a 100-ton blast-furnace and two 50-ton reverberatory furnaces. The works have been much improved, and brought to the point of doing economical work. The works produce matte, brought to 60% copper tenor in 3 fusions, shipped to the American Metal Co., Ltd., New York, for refining and marketing. Semi-pyritic smelting formerly was employed in the blast-furnace, but reduction is now mainly by reverberatories, burning petroleum, effecting an estimated reduction of 40% in cost of smelting. Property considered promising and management good.

PENN-MONT MINING & MILLING CO. MONTANA.

Office: 102 Trout Bldg., Lancaster, Pa. Mine office: Elliston, Powell Co., Mont. W. H. Guthrie, president; C. V. Lichty, vice-president and fiscal agent; W. J. Merrill, secretary and treasurer; Thos. S. Rogers, superintendent. Organized under laws of Montana, with capitalization $1,000,000, shares $1 par. Lands, 460 acres, including 15 lode claims and one placer claim, circa 2 miles south of Elliston, opened by a 100' incline shaft and a 125' vertical shaft, showing a 4' fissure vein in granite, carrying mainly auriferous and argentiferous lead ore, but it is hoped to develop copper sulphides of good average tenor at greater depth. Is said to plan a concentrator.

PENNSYLVANIA & ARIZONA CONSOLIDATED COPPER CO. ARIZONA.

Office: care of Wm. Cunningham, secretary, Phoenix, Ariz. Mine office: Hot Springs, Yavapai Co., Ariz. Jas. H. Bennett, president and manager; Jos. J. Shaw, vice-president. Organized circa January, 1907. Lands, 8 claims, about 10 miles north of Hot Springs, in the Red Picacho district, showing a 47' vein with prominent gossan opened to depth of 300', carrying sulphide ore at depth of 285'. Shipped, 1907, ore of 20 to 40% copper tenor, to the Humboldt smelter.

PENNSYLVANIA & CANANEA COPPER CO. MEXICO.

Office: 1220-25 Broad St., New York, N. Y. Mine office: Baca Bldg., La Cananea, Arizpe, Sonora, Mex. Robt. Mitchell, president and general manager; Henry J. Stevens, vice-president; E. B. Crary, treasurer; Geo. A. Fitch, secretary; Chas. McHenry, superintendent. Organized under laws of Arizona, with capitalization $5,000,000, shares $10 par; issued, $2,500,000. Direct title to lands is held through South Cananea Copper Co., S. A., organized under laws of Mexico.

Lands, 587 hectares, including the Collins group of 305 pertenencias, Arizpe group of 40 pertenencias, Homestake group of 60 pertenencias, Last Chance group of 22 pertenencias and Gladys group of 150 pertenencias, latter adjoining the Massey mine of the Greene Consolidated, and supposed to carry the extension of the Massey ore body, bulk of lands being circa 2 miles from La Cananea. Considerable development has been secured, the Collins claim having a 250' shaft. Company was said, 1906, to have bought a tin mine in the state of Jalisco, of which nothing has been heard since, and was said, late 1906, to have sold lands to Cananea & Globe Exploration & Development Co., another Mitchell company.

PENNSYLVANIA, CANANEA & GLOBE MINING CO. ARIZONA.

Office: 37 Wall St., New York, N. Y. Mine office: Globe, Gila Co., Ariz. Geo. Mitchell, general manager; John Britt, superintendent. Appar-

closely connected with Pennsylvania & Cananea Copper Co. Is said bought a controlling interest in the Five Points Mining Co., having s in the Pinto Creek district, also 3 groups of claims near Superior, , Ariz. Idle and apparently moribund.

'LVANIA CENTRAL GOLD MINING CO. **COLORADO.**

oflice: Russell Gulch, Gilpin Co., Colo. Property is the Delaware ne, carrying ores of gold, silver and copper. Has steam power.

'LVANIA COPPER CO. **NEW MEXICO.**

l. Formerly at San Pedro, Santa Fé Co., N. M. Described Vol. VI.

'LVANIA COPPER MINING CO. **PENNSYLVANIA.**

l. Delaware charter repealed 1903. Was promoted by Paul Morris & merly at Pottstown, Montgomery Co., Pa. Described Vol. VI.

'LVANIA MINE. **MONTANA.**

ed by Boston & Montana Consolidated Copper & Silver Mining Co.

'LVANIA MINING CO. **NEW MEXICO.**

e: Franklin, Pa. Mine office: Los Cerillos, Santa Fé Co., N. M. y gold, silver, copper and lead. Idle several years.

'LVANIA & MONTANA MINING CO. **MONTANA.**

office: Basin, Jefferson Co., Mont. Curtiss Denbow, secretary. irca 100 acres, having a 130′ shaft showing a 2′ vein carrying an 8″ aystreak.

'LVANIA SMELTING CO. **IDAHO.**

ks office: Ponderay, Bonner Co., Idaho. Geo. Faunce, president. is a one-third share interest in the Idaho Smelting & Refining Co., he Ponderay smelter.

'YOMING COPPER CO. **WYOMING.**

e: 731 Monadnock Bldg., Chicago, Ills. Branch offices: 1308-74 y, New York, N. Y., and 14 Great Winchester St., London, E. C., Eng. ce: Rudefeha, Carbon Co., Wyo. Works office: Encampment, Carbon o. E. M. Cobb, president; Frank Burke Draper, first vice-president; Norton, secretary and general manager; preceding officers constitute utive board; John F. Mallory, second vice-president; preceding officers, onard, Frederick Davidson, D. H. Lambertson and J. Q. Riddle, di- L. M. Fishback, treasurer; H. Gulliver, London secretary; Geo. H. neral superintendent; J. B. Barriani, transportation superintendent.

nized Sept. 13, 1904, under laws of Wyoming, with capitalization 00, shares $1 par; issued, circa $9,000,000. Succeeded North American Co., organized 1902, under laws of New Jersey, with capitalization 00, shares $100 par. Of the capitalization of the Penn-Wyoming, half aside for the redemption of $1,500,000 worth of bonds of the North Copper Co., at the rate of 3⅓ for 1. Controls, through ownership of 90% stock issue, the Haggarty Copper Mining Co., Encampment Smelting ampment Tramway Co., Encampment Pipe Line Ditch Co., Encamp- nd & Townsite Lot Co., Carbondale Coal Co., Emerson Electric Light toga & Encampment Railroad Co. and North American Mercantile named corporation being the purchasing and distributing end of the oming. Controls the Battle Lake Tunnel Site Mining Co., through p of $2,361,400 stock out of total issue of $2,500,000. The Battle pany had outstanding, June 15, 1907, bonds aggregating $13,400.

company paid dividends, at the rate of 6% yearly, for 2 years, until 907, on issued stock, when the dividend rate was increased to 8%, ividend of July, 1907, was canceled, on account of the burning of the Dividends paid to July, 1907, were $531,250, on outstanding share $5,500,000. The company has circa 3,400 shareholders, a large num- om are residents of Great Britain.

Lands, including holdings of the Battle Lake Tunnel Site Mining C aggregate 1,373 acres, property including 773 acres of patented mineral lan 80 acres of coal lands, a 24-acre millsite, limestone quarry, 320 acres of timb lands and the entire townsites, less lots sold, of Encampment, Rudefeha a Rambler.

The Ferris-Haggarty mine, 8 claims, one fractional, 5 patented, area 1 acres, discovered 1898, shows an outcrop of decomposed spongy limonite, wit carbonate copper stains, under which is a fissured zone of about 20′ averag width, having a mica-schist hanging-wall and slightly stratified footwall, wit strike of northwest and southeast, and dip of 50° from the horizon to th southwest. At depth of about 40′ the ore is massive bornite, carrying 40 t 45% copper and $2 to $9 combined gold and silver values per ton. The ric zone has been partially worked out, the bornite being replaced, in the lowe levels, by disseminated chalcopyrite, estimated to average 10% copper, 1½ oz. silver and $6 gold per ton, but yielding, in actual production, 4 to 6% copper, about 1 oz. silver and $2 to $4 gold per ton, with mixed charges, includ ing ore from the old mine dump, estimated to average about 4% copper. A promis ing new ore body, opened, 1907, by crosscuts on the 140′ level, is about 1 wide, for depth of 75′ and length of 350′, and is estimated, by Superintendent Hand, as averaging better than 20% copper, which probably is an over estimate. The statement by Swasey & Co., of New York, that the Ferris-Hag garty has a vein of 65′ average width averaging 8% copper is a serious exag geration. A low grade copper vein was located by diamond drill, September, 1908, at a distance of 130′ in the footwall. Development is by a 1,490′ main working tunnel, connecting with a 540′ shaft, and a 180′ winze has been sunk below the tunnel level. The mine has about 6,500′ of workings. Ore is milled down to the tunnel level, through chutes, and hauled to ore-bins at the portal by compressed air locomotives. The mine was estimated, July, 1907, to be capable of producing 500 tons of ore daily, which seems a serious overestimate in view of the comparatively limited extent of the workings.

The power plant of the Ferris-Haggarty mine, at the mouth of the tunnel, includes three 180-h. p. boilers, a 25-drill air-compressor, and a 3-stage Norwalk air-compressor furnishing air, at 1,250 lbs. pressure per square inch, to a 5½ Porter locomotive used for underground traction. There also are 4 hoists, and 24 power drills. Buildings include a 30x40′ wooden machine-shop, 20x40′ wooden carpenter-shop, a 35x42′ wooden smithy, office, warehouses, ore-bins, bunkhouse, eating-house and 14 dwellings.

The Osceola mine, adjoining the Ferris-Haggarty, is but slightly developed, and apparently is not a producer.

The Doane-Rambler mine, 30 claims, area 600 acres, with 80 acres of miscellaneous lands, shows country rocks of granite, diorite and quartzite carrying numerous veins, of which 5, under development, of about 4′ average width, show oxidized ores above and sulphides below, latter mainly chalcopyrite, but with considerable chalcocite, covellite and bornite, which have shown an average assay of 40.7% copper from 16 carload shipments. The mine is opened by a 500′ working shaft and 3 tunnels, two longest 900′ and 1,600′, with upwards of one mile of underground workings, and is considered a promising property. Plant includes 3 boilers, an air-compressor and a 70-h. p. hoist.

A 16-mile Leschen aërial tramway, which is the longest installation of the sort ever made, connects the Ferris-Haggarty mine with the smelter. The tram was built in 4 sections, of 4 miles each, but is now operated in two 8-mile sections, by steam power, generated at 2 stations, 8 miles apart, each station having storage-bins. The length of cables is 293,275′; weight of cables 439,669 lbs.; number of tension stations, 16, four being double; greatest elevation above sea-level, 10,690′, on Bridger Peak; highest tower, 69′; number

); highest span, 250′ above surface, at Heaning's Gulch; longest
′, across Cow Creek Cañon; general rise, 900′; number of buckets,
vice; capacity 700 lbs. each; speed, 5½ miles per hour; maximum
city, upwards of 1,000 tons. The plant has automatic filling and
g devices, and was built so that its capacity can be doubled, if de-
e aërial tramway has given some trouble in operation. A 2-mile
mway to the Doane-Rambler mine apparently is not completed.
eduction plant, located on the banks of the Encampment river, does
business, in addition to treating the company's own ores. The first
or, burned, March, 1906, was replaced, July, 1907, with a larger
r mill, of 800 tons daily capacity. The concentrator is in 2 parts,
hroughout, with a drop of about 60′, permitting the handling of ma-
gravity. The plant has storage-bins and picking-tables, equipment
a 700-ton Blake crusher, 4 roughing and finishing rolls, automatic
revolving trommels, hydraulic classifiers, two 700-ton Hancock jigs,
grinding rolls, two 6′ Calumet regrinding mills, 8 Frue vanners, 12
bles and a V-shaped slime tank, 12′ deep, 28′ wide and 70′ long. Tail-
the new mill are reported by the company to assay under 1% of
al metallic values, which seems almost too good to be true. The old
as burned May 10, 1907, this being the second bad fire in 3 years,
v smelter, of steel frame on concrete foundations, rated at 1,000 tons
acity, was blown in Aug. 16, 1907. Equipment includes a 100-ton
raight-line roaster, a 40-ton mechanical straight-line roaster, and
nd 300-ton water-jacket blast-furnaces. Slag is granulated by a jet
and washed through a launder to the dump. Blast for the furnaces
ed by No. 6 Connersville and No. 7 Greene blowers.
onverter department has a 25-ton electric traveling crane, 3 converter
ted electrically, and 6 shells, of the Copper Queen type. Linings are
mixture of clay and quartz, ground in a 7′ silica-mill, replaced every
rge. Blast for the converters is supplied by an electrically driven
r-compressor, with a capacity of 6,000 cubic feet of free air per min-
pressed to 15 lbs. per square inch. There also is a White mineral
briquetting fines and flue-dust.
power plant includes hydraulic and steam installations. Water is
hrough a 4-mile pipe-line, of 48″ diameter, from a 23′ dam on the
k of the Encampment river, driving 6 DeRemer impact wheels, direct-
with generators furnishing current for a 1,000-h. p. common system.
r-power plant proved somewhat unreliable, varying in energy deliv-
600 to 1,200 h. p., hence was supplemented by a steam plant with
h. p. Babcock & Wilcox boilers, and a 500-kw. Westinghouse-Parsons
bine. Fuel for power purposes is wood, costing circa $3.50 per cord,
is used for smelting. The company has a mine of lignite, on the line
rial tramway, at Carbondale, 12 miles from Encampment.
ings at the reduction plant include a machine-shop, pattern-shop,
p, foundry, sawmill, smithy, office and laboratory. The Encampment
orks Co., owned by the Penn-Wyoming, has a franchise for supplying
the town of Encampment, and the Emerson Electric Light Co. has
ng franchise for the town.
company's operations were greatly hampered by inadequate trans-
facilities, the smelter being 45 miles from Walcott, the nearest rail-
ion. The Saratoga & Encampment Railway Co., capitalized at
, is controlled through ownership of entire stock issue, and, at last
a $750,000 bond issue by the railway company remained in the Penn-
treasury. The railway, of 45 miles length, of standard gauge, was
August, 1908, giving greatly reduced operating costs.

The mine secured more or less production in 1902 and 1903, and the smelter was again blown in June 28, 1905, running continuously until Oct. 29, 1905, making, in that campaign, 2,385,629 lbs. fine copper, 3,549 oz. silver and 226 oz. gold, from 28,039 tons of ore smelted, giving an average extraction of 4.25% copper, said by company to have been made at the cost of slightly under 9 cents per pound. For 1906 production was 2,402,985 lbs. fine copper, secured at a gross cost, for mining, smelting and hauling to railway station at Walcott, of $203,000.57, giving average costs of 8.45 cents per ton, showing a marked gain over the preceding year, gross receipts being $378,786.58. In 1906 smelter costs were $64,213.24, or $2.46 per ton, on 26,145 tons of ore smelted, the cost of $2.46 per ton of ore, or 2.67 cents per pound on finished copper, with an average return of 5.36% copper per ton of ore smelted, showing an increase in average copper tenor of ore and decrease in costs. The smelter was again blown in March 15, 1907, running until May 10, 1907, making 1,580,000 lbs. fine copper from 11,000 tons of ore smelted, giving an average return of 7.2% copper. Production was resumed, September, 1907, and was said to average about 4% copper, from Ferris-Haggarty ore. Production was said, February, 1908, by Swasey & Co., who were selling the company's shares, to be 600,000 lbs. fine copper monthly, but these figures are considered excessive, and apparently production, May, 1908, was circa 125 tons of ore daily. Production, 1908, is estimated at 5,000,000 lbs. fine copper.

Assets of the old North American Copper Co. were bought, at public sale, by the present company. A suit against the Penn-Wyoming, by shareholders of the old North American, has been decided against the plaintiffs, who apparently lack grounds for complaints against the Penn-Wyoming company or management. The statement, in a former edition of the Copper Handbook, that Mr. E. M. Cobb, president of the Penn-Wyoming, formerly was connected with Mr. John S. Carey in the management of the North American, was based on misapprehension, as the only connection of Mr. Cobb with Mr. Carey, or with the old North American company, was that of an unfortunate investor.

In past editions of the Copper Handbook the Penn-Wyoming Copper Co. has been criticized for two shortcomings and one misfortune, the latter being the lack of a railroad, which has been remedied by the completion of the rail line. The principal criticism was based upon the payment of dividends contemporaneously with the raising of additional capital by sale of shares, a policy that is wrong, no matter by whom followed, or how strongly endorsed. The last financial statement obtained from the company, of date August, 1907, gave assets of $76,481.07 accounts receivable, practically all due from subsidiary companies, $3,657.50 bills receivable of the Battle Lake Tunnel Site Mining Co., and $6,695.13 cash on hand. Current liabilities included notes payable of $370,086.76, due on the Ferris-Haggarty mine, and $318,959.62 trustee notes, running to A. F. Richardson, secured to the trustee by underlying notes of the various subsidiary corporations aggregating $1,390,798.62, held by the trustee under an agreement to cancel all notes of the various subsidiary corporations upon payment of the Penn-Wyoming notes for $318,959.62, this amount being the balance due on the underlying notes, on which $1,072,839 had been paid previously. The anomalous arrangement, formerly existing, by which stock of the Penn-Wyoming, while nominally common stock, and on a parity, was, for all practical purposes, divided into three classes, has been terminated, there being now only common stock outstanding, with all shareholders on an equal footing.

Apparently the company has considerable indebtedness, and its inability to sell its $750,000 railroad bond issue is said to have caused financial embarrassment. A stockholders' committee was endeavoring, late 1908, to work out a plan of reconstruction. The cost-sheets of the 1906 and 1907 smelting cam-

ns show that copper has been produced, in considerable quantities, at onable prices, and, as pointed out by the Copper Handbook two years ago, ultimate success of the mine would seem to depend upon its ability to fur- large tonnages for steady smelting operations. Apparently the mine has en unequal to the task, owing to insufficient development. While the agement has been censured, in past editions, for its mistaken policy of ing dividends while raising further share capital, it is believed that the agement has been doing its best to work out from under an embarrassing l of debt, and it is to be hoped that some plan of financing may be devised which the company will be given the considerable working capital needed nable it to develop its mines to a point where they can furnish a steady assured tonnage to the smelter.

IEDAD ANONIMA MINAS DE PEÑUELAS. SPAIN.

Office and mine: Paimogo, Huelva, Spain. José Maria Soto y Rosso, rman; Miguel Borrero Morón, vice-chairman; Mateo Santos Mora, secre- ; Gregorio Peres Díaz, treasurer. Organized July 19, 1898, under laws of n, with capitalization 12,600 shares, wholly issued. Annual meeting, in ist.

Lands, 139 hectares, with miscellaneous lands giving total holdings of ectares, in the Paimogo district, showing slate and granite, with numerous e and contact veins, of which one, under development, of 4′ estimated ge width, shows oxidized ores and chalcopyrite, giving average assays of % copper, developed by shafts of 200′, 30′, 60′ and 50′, and by tunnels 0′ and 130′.

Equipment includes an 18-h. p. hoist, and there are 17 dwellings and cot- for workmen.

Product is mainly cupriferous pyrites, sold to Thos. Morrison & Co. Mine rved by the Tharsis Railway. Production, to Jan. 1, 1908, was circa 4,000 of ore, giving average returns of 15.34% copper. Production, 1907, esti- d at 125,000 lbs. fine copper.

PLES MINING CO. ARIZONA.

Office and mine: Willcox, Cochise Co., Ariz. S. N. Kemp, superintendent. nized circa 1905. Has auriferous and argentiferous copper ore, said to hown in considerable quantities, with steam power.

CIVAL MINING CO. WISCONSIN.

Dead. Organized 1873, succeeded 1898, by Percival Copper Mining Co. nerly at Gordon, Douglas Co., Wis.

CY-CHESTER CONSOLIDATED MINING CO. COLORADO.

Office: Council Bluffs, Iowa. Mine office: Red Cliff, Eagle Co., Colo. I. Donald, lessee. Ores carry gold, silver and copper. Has steam power. umably idle.

CY RIVER SYNDICATE. AUSTRALIA.

Office: Irvinebank, Queensland, Australia. Mine office: Ortona, via getown, Queensland, Australia. C. E. Young, secretary; J. F. Puxley, gen- manager; E. Joyce, superintendent. At last accounts employed 12 men, ploratory work, in connection with the Ortona.

NCISCO DE PAULA PEREZ. CHILE.

Mine office: Los Condes, Santiago, Chile. Works office: Ñuñoa, San- de Chile. Property is La Central mine, opened 1880, adjoining the prop- of the Compañía Esplotadora Los Bronces, and the two were driving a long l, jointly, at last accounts. Ores average, after selection for smelting, 23% copper. La Central smelter has a matting furnace only, and pro- on, 1903, is estimated at 500,000 lbs. fine copper.

KIOMEN MINES. PENNSYLVANIA.

Mine office: Shannonville, Montgomery Co., Pa. Are old mines, that were

quite extensively worked, and produced a large variety of copper and lea at one time. Long idle.

PERMIAN & TRANS-PECOS COPPER CO. TE

Dead. Texas charter forfeited, 1905, for non-payment of taxes.

PERSON CONSOLIDATED COPPER & GOLD MINES CO. NORTH CAROL

Office: 1901-42 Broadway, New York, N. Y. Mine office: Virgilina, fax Co., Va. E. D. Beecher, president and general manager. Organized laws of New York, with capitalization $1,000,000, shares $10 par.

Lands, 1,372 acres, in several neighboring tracts, including the D mine, located in Person county, North Carolina. Main shaft, 330'. Vein ages 4' in width, carrying ores ranging 4 to 20% in copper tenor. Has a 5 concentrator. When worked, shipped concentrates averaging 45% copper 20 oz. silver per ton, with small gold values, sending a limited amoun high-grade ore, averaging 30% copper and 10 oz. silver per ton, direc smelter. Idle.

PERÚ COPPER SYNDICATE, LTD. PE

Dead. Liquidated July 16, 1906. Formerly in Perú.

PERUVIAN COPPER MINING & SMELTING CORPORATION. ARGENTI

Dead. Was still-born.

PERUVIAN MINING & MILLING CO. UT

Mine office: Alta, Salt Lake Co., Utah. B. F. Clays, superintend Capitalization was increased, 1908, to 250,000 shares, presumably $1 Lands, 5 claims, known as the Hungry Ten group, idle several years 1908. Development is by a 1,100' tunnel, being driven for the main cont and cutting several fissure veins giving assays up to 12% copper, 20% l 78 oz. silver and $1.60 gold per ton. Property has several mine buildings.

PERUVIAN MINING, SMELTING & REFINING CO. PE

Office: 400-55 Congress St., Boston, Mass. Mine office: Moroco Junín, Perú. Works office: Rio Blanco, Junín, Perú. A. S. Hight, presid S. E. Farwell, treasurer; Julio L. East, general manager; G. Wagner, m superintendent; S. C. Hazelton, smelter superintendent; A. A. Abbott, c sulting engineer; M. F. Church, constructing engineer. Organized July 1906, under laws of Maine, with capitalization $5,000,000, shares $10 p issued, $4,000,000. Has outstanding a $950,000 issue of 7% convertible bo Is controlled, through ownership of $1,000,000 stock, by United States Sm ing, Refining & Mining Co.

Lands include the Churruca mine, in the Morococha district, said to capable of producing 300 tons daily of ore averaging 9% copper, with silv and gold contents.

The reduction plant, blown in July 5, 1908, of 300 tons daily capacity, h a steel building, terraced, to use gravity throughout, and treats largely co ores. The smelter is at Rio Blanco, on Lake Huacracocha, near Lake Mar cocha, 135 kilometers from Callao and 120 kilometers from Lima, on the Ferr carril Central del Perú.

A railroad track, on a trestle behind and above the sampling mill, ru over ore-bins, which discharge to belt-conveyor carrying ore to the sampl which is of 60 tons hourly capacity, equipped with Vezin automatic sampli machinery. The ore-bins are of 12,000 tons capacity, and storage is provide for 600 tons of limestone and 300 tons of coke.

The smelter has a 100-ton cintering plant, for concentrating ores befor smelting, consisting of 12 one-ton pots.

The cupola building has a 44x186" blast-furnace, with room for a seco of the same size, making matte of 50 to 55% copper tenor. The furnace ha

e of brick, on steel columns, bottom being hoppered for automatic dis- of accumulated dust, with 2 dust-chambers, of masonry, intervening n the flue and stack, latter being of steel, 150′ high and 12′ in diameter. ere is a hydro-electric power plant, with a 1,200′ pipe-line of 40″ diam- om the Rio Blanco, delivering water to the power-house under a head ′, generating approximately 500 h. p. There is a Connersville blower of cubic feet capacity, and three 35-kw. direct-current generators, which tuate an electric light plant. Miscellaneous buildings include a machine- smithy, office and dwelling.

SKEY MINING CO. **ARIZONA.**

etter returned unclaimed from former mine office, Williams, Coconino riz. Organized 1907. Built a leaching plant, which was burned. Since nd apparently moribund.

O MINING CO. **UTAH.**

ead. Lands sold, 1905, for $30,000, to Utah-Apex Mining Co. Formerly gham Canyon, Salt Lake Co., Utah.

ABIC MINING CO. **MICHIGAN.**

ead. Wound up, 1905. Lands now owned by Quincy Mining Co. For- at Hancock, Houghton Co., Mich. Described Vol. II.

ON CHEMICAL CO. **CALIFORNIA.**

ffice: 430 Mills Bldg., San Francisco, Cal. Mine office: El Dorado, El o Co., Cal. Works office: Peyton, Contra Costa Co., Cal. Property is oonday mine and adjoining claims, in the Diamond Springs district. The lay, held under bond and lease, has shipped a little ore to the company's . Presumably idle.

GOLD MINING & REFINING CO. **ARIZONA.**

ead. Merged, 1907, in Verde River Copper Co. Formerly at Jerome, ai Co., Ariz.

DELTA THETA COPPER MINING CO. **WYOMING.**

ead. Formerly at Dillon, Carbon Co., Wyo.

ADELPHIA & ARIZONA MINING CO. **ARIZONA.**

ffice: 614 Real Estate & Trust Bldg., Philadelphia, Pa. Mine office: ide, Mohave Co., Ariz. H. T. Goodman, president; E. F. Lukins, secre- and treasurer; E. T. Loy, general manager. Organized 1900, under laws izona, with capitalization $1,000,000, shares $1 par.

ands, in the Wallapai district, include the Minnesota, Merrimac, Connor, anita and other mines, carrying sulphide ores, in fissure veins averaging lth, with assay values of 1 to 20% copper, 15 oz. silver and $6 gold per ith a little lead. Development is scattered over a number of different including 20 shafts from 20′ to 600′ in depth, and a 3,500′ tunnel. Has and electric power, a 10-stamp mill and a 150-ton concentrator. Presum- dle.

ADELPHIA COPPER & GOLD MINING, **MEXICO.**
ILLING & SMELTER CO.

lice: 507 Drexel Bldg., Philadelphia, Pa. Mine office: Ameca, Jalisco, Employs circa 50 men. Edwin F. Hall, president; Dr. S. C. Runkel, esident; Francis J. Fee, secretary; Josiah G. Williams, treasurer; A. F. eneral manager; J. A. Hall, superintendent; Ernest Koch, mill superin- t; Braulio Medina, mining captain. Organized 1900, under laws of New , with capitalization $3,000,000, shares $1 par.

nds, 73 hectares, near San Martin Hidalgo, including La Perla, La Fé, ncha, San Vicente, Ajax and other mines. Property shows veins of 3′ to 25′ carrying auriferous and slightly argentiferous chalcopyrite. San Vicente 12 miles southeast of Ameca, with circa 600′ of workings, is claimed to 00,000 tons of ore blocked out, and has a steam hoist and air-compressor

installed 1907. La Fé mine is said to show ore up to 30% in copper
Ajax mine shows a 12′ vein, estimated to average 7% copper, 2 oz
$20 gold per ton, which is considered excessive. La Estrella del
is opened by a 260′ tunnel. The property as a whole has 8 shafts, o
average depth, with a total of about 8,000′ of workings. Equipme
a 25-ton Elspass mill, 25-ton lixiviation plant and a 30-ton concentra

PHILADELPHIA COPPER MINES CO. **NEW**

Office: 206 Stephenson Bldg., Milwaukee, Wis. Mine office:
Grant Co., N. M. J. W. McAlpine, president; E. W. F. ReQua, vice
A. E. Johnson, secretary and treasurer; preceding officers, Wm. Schr
Keough and G. M. Petty, directors; B. F. Baker, superintendent; F
auditor. Organized circa January, 1907, under laws of New Me
capitalization $500,000, shares $1 par.

Lands, 5 claims, partly timbered, on the Santa Fé railroad in t
mining district, near Hanover, carrying a limestone and porphyry
25′ to 75′ width, showing copper carbonates and sulphides, latter m
copyrite, with some bornite and occasional chalcocite, principal value
cupriferous pyrite. Mine, opened 1880, shipped some good ore, a
to have paid its way in the past, under various managements.
numerous opencuts and 4 shafts, deepest 75′, 100′ and 150′, all in
tunnel showing chalcopyrite up to 6% in copper tenor, with gold
values. Selected surface ores assay circa 2% copper, 2 oz. silver
gold per ton. Is developing at rate of 75′ to 100′ per month. Ha
power, engine house, smithy and sorting shed, and plans a new
equipment. A railroad runs 1,500′ from shaft. Made several small
1907. Employed circa 35 men at last accounts.

PHILADELPHIA MINING & MILLING CO. **NEW**

Dead. Lands sold to Hillsboro Consolidated Mines Co., a fr
merly at Hillsboro, Sierra Co., N. M.

PHILADELPHIA-SEARCHLIGHT GOLD & COPPER MINING CO.

Office: 810 Witherspoon Bldg., Philadelphia, Pa. Mine office:
light, Lincoln Co., Nev. John C. Groome, president; Jos. W. Sharp
president; J. M. Stewart, secretary and treasurer; preceding officers
M. Popham, E. C. Knight, Jr., Richard W. Meirs and Chas. Wheeler,
W. H. Bainbridge, superintendent. Organized under laws of Ariz
capitalization $5,000,000, shares $1 par; issued, $1,000,000.

Lands, 23 claims, 1 fractional, area 450 acres, in the Sunrise
miles northeast of Searchlight. Has a 356′ vertical shaft, with cross
bottom showing several veins of 3″ to 4′ width, carrying aurife
argentiferous copper ore, of fair tenor, with quartz gangue. Has s
gasoline power, with necessary mine buildings. Employs circa 15 me

PHILLIPS RIVER GOLD & COPPER CO., LTD. **AUS**

Office: Salisbury House, London Wall, London, E. C., Eng.
works office: Ravensthorpe, Phillips River Goldfield, Western Australi
Kaufman, chairman; E. Protheroe Jones, secretary; G. C. Klug, gen
ager; Fred W. Morgan, mine manager. Organized Jan. 6, 1906, under
Great Britain, with capitalization £100,000, shares £1 par. Owns 44,3
of Mount Cattlin Copper Mining Co., Ltd.

Lands, 247 acres, apparently held under lease and option, in the
thorpe division of the Phillips River Goldfield, circa 32 miles from Po
toun, including the Mount Benson and Mount Desmond mines, and
stone quarry of fluxing ore. The Mount Cattlin mine was sold, N
1906, for £100,000. The Mount Benson mine has a 200′ shaft, but
developments are at the Mount Desmond-Elverdton group, having
263′ and 267′, with development under way on the 250′ level, this

cludes a steam pump, 14 Cleaves jigs and 4 Woodbury jigs. While th is idle, the mill is operated, day-shifts only, on rock from the Medor of the Keweenaw Copper Co.

PHOENIX & EASTERN SMELTING & REFINING CO. ARI

Works office: Phoenix, Maricopa Co., Ariz. Geo. F. Goerner, manager. Late 1906 was said to plan building a 300-ton smelter, in vici Phoenix, but no such smelter built, and probably no prospect of bu Ralph Jacoby was one of the organizers, hence the company is regarde suspicion.

PHOENIX GOLD & COPPER MINING CO. NEV

Office: 218 La Salle St., Chicago, Ills. Mine office: Tenabo, Land Nev. Organized circa 1907. Property is the Howie lease of the Phoeni on lands of the Gold Quartz Mining Co., said to have a shaft showing a with ore assaying up to $100 per ton in combined copper, silver and gold

PHOENIX MINING CO. C

Office: Valparaiso, Chile. Mine office: Tocopilla, Antofagasta, Organized Apr. 18, 1905, under laws of Chile, with capitalization 250,000 shares 100 pesos par.

PHOENIX MINING CO. U

Mine office: Bingham Canyon, Salt Lake Co., Utah. H. A. Gel superintendent. Mine, near the Utah-Apex and Yampa, is opened by 4 t one, a 2,700′ crosscut adit, showing a vein of 7′ to 14′ width, carrying silv ore. Smelting ore assays 35 to 40% lead and 10 oz. silver per ton, and ore, running 10% lead, with small silver values, makes a 40% lead conce after putting 5 into 1. Has a 200-ton mill, on Carr Fork, with electric completed 1908. Employs circa 40 men.

PHOENIX MINING, SMELTING & DEVELOPMENT CO., LTD. BRITISH COLU

Office and mine: Phoenix, Boundary district, B. C. Julius Carson, dent; A. F. Geddes, vice-president; W. S. Longhurst, secretary; Wm. D treasurer; preceding officers and M. J. Carson, directors. Organized 1908, under laws of British Columbia, with capitalization $1,000,000, sha par. Lands, 2 claims, one fractional, in the Wellington camp, circa 3 from Phoenix, having a 60′ shaft showing auriferous copper ore. Co plans driving a tunnel.

PHOENIX MINING SYNDICATE. WASHIN

Office: Seattle, Wash. Mine office: Berlin, King Co., Wash. Lan clude the Mona group, east of Miller river, 2½ miles from a railroad, sh a 60′ vein, carrying a 20′ paystreak of low grade chalcopyrite, opened shaft of 50′ and by tunnels of 80′, 230′ and 700′. Presumably idle.

PICACHO BLANCO MINING CO. ARI

Letter returned unclaimed from former mine office, Morristown, Ma Co., Ariz. M. E. Waldstein, president; T. O. Otis, secretary and tre Is a consolidation of the San Domingo Gold & Copper Co. and Exposition ing Co. Capitalization $5,000,000, shares $1 par. Lands, 31 claims, in copa and Yavapai counties, Arizona. Has a 400′ main shaft, with free-m gold ores claimed to average $22 per ton. Has a 15-stamp mill and a cyanide plant. Idle several years and apparently moribund.

MINAS PICACHO y CAMPO RICO. MEX

Mine office: Bavispe, Moctezuma, Sonora, Mex. Corella & Hone, ow B. J. Hone, manager. Ores carry copper, gold, silver and lead. Has power, arrastras and a small adobe smelter. Employ circa 40 men.

PIC COPPER & GOLD MINING CO. OF LAKE SUPERIOR, LTD. ONTA

Dead. Formerly at Port Arthur, Thunder Bay district, Ont.

T CREEK DEVELOPMENT CO. **OREGON.**
ine office: Grants Pass, Josephine Co., Ore. Lands, on Picket Creek, are show several veins of 3' to 7' width, carrying auriferous copper ore of nde. Early 1908 planned development by tunnel.

MONT COPPER MINING & SMELTING CO. **VIRGINIA.**
lice: 320 Broadway, New York, N. Y. Letter returned unclaimed from mine office, Elkton, Rockingham Co., Va. Morris D. Brown, president; . Blauvelt, vice-president; E. Porter Emerson, secretary and treasurer; Brown, general manager. Organized 1901, under laws of New Jersey, apitalization $2,000,000, shares $100 par, $30 paid in.
ands show 3 fissure veins, carrying occasional native copper and sulphide with claimed average values of 6% copper, 10 oz. silver and $15 gold n. Veins are said to be persistent and traceable for about a mile, with ical conditions much the same as at the High Top mine, adjoining. Idle years and apparently moribund.

RAS HERMANOS. **CHILE.**
ffice and mine: Chañaral, Antofagasta, Chile. Property is the Esplora- mine, situated in the northern limits of the department of Chañaral, at oot of the Cordillera Encantada. Lands show 3 parallel veins, with an gate of about 8 meters width. Mine, opened to vertical depth of 160 s, has produced a large quantity of 8 to 12% ore, and is estimated to on surface, 75,000 tons of ore of 7 to 8% copper tenor. Property lacks portation facilities and is greatly hampered by high carriage charges. t, 1903, was 2,485 metric tons of ore, averaging 19.72% copper, equivalent 80,346 lbs. fine copper. Apparently if given adequate transportation ties and good management, this should make one of the best copper in Chile.

PAÑIA MINERA PIEDRAS VERDES y ANEXAS. **MEXICO.**
)ffice and mine: Alamos, Sonora, Mex. Angel Almado, president; Joaquin ange, superintendent. Lands, circa 15 miles northwest of Alamos, and 2 north of the Rio Mayo, include the Piedras Verdes, Union and Sonora s, showing a mineralized zone of about one mile width and 4 miles length, veins outcropping 10' to 40' in width, carrying considerable oxidized ore gh grade, and occasional native copper in masses of considerable size. lopment is by a 350' shaft and a 375' tunnel. Has steam power and a matting furnace, and shipped, 1902, small quantities of matte carrying 40% copper, 20% lead and 200 oz. silver per ton. Presumably idle.

DRAS VERDES MINING CO. **MEXICO.**
Office: Fuerte, Sinaloa, Mex. Has argentiferous copper ores, slightly de ed by tunnel. Idle.

DRAS VERDES MINING CO. **MEXICO.**
Mine office: Sunqui Grande, Hermosillo, Sonora, Mex. Geo. M. Cochran intendent. Presumably idle.

CE MINING CO. **COLORADO.**
Dead. Formerly at Central City, Gilpin Co., Colo.

EDALE COPPER CO. **AUSTRALIA.**
Mine office: Stanthorpe, Queensland, Australia. Mine has [illegible] ly very shallow, showing self-fluxing argentiferous copper and [illegible] a mill, built 1907, with magnetic separation process, giving [illegible] ntrates. Smelter has a reverberatory furnace, and addition [illegible] ace is contemplated. Production, November, 1907, was 147 [illegible] melted to matte, carrying 14,000 lbs. copper and 2,928 [illegible] 1907, is estimated at 160,000 lbs. fine copper.

E HILL MINES, INC.
Office: 82 Beaver St., New York, N. Y. Mine office: [illegible]

Vt. N. M. Macdonald, president; H. H. Knox, vice-president; John H
secretary and treasurer; Harry G. Hunter, superintendent; preceding
and D. S. Conant, directors. Organized Jan. 9, 1906, under laws of V
with capitalization $200,000, shares $100 par. Annual meeting, second
in January.

Lands, 101 acres, freehold, in the Corinth district, 14 miles from B
Maine railroad, showing mica-schist carrying lenses of chalcopyrite
inated in pyrrhotite, of 3.5% estimated average copper tenor. Propert
old mine, worked at intervals during the Nineteenth Century.

Equipment includes a 75-h. p. steam plant, held in reserve, and a
plant with 20-h. p. and 80-h. p. gas engines and a 25-kw. electric ge
20 h. p. being used at the mine and 80 h. p. at the mill. Fuel is pea-c
wood. Buildings include necessary mine structures and 4 houses for wo

The wooden concentrator, of 6,600 square feet area, has a 9x15"
crusher, 3 rolls and 2 magnetic separators, with roaster and dryer.

Production has been as follows: 131,911 lbs. fine copper in 1905;
lbs. copper and 1,698 oz. silver in 1906; 425,367 lbs. copper and 2,
silver in 1907. Product of latter year was secured from 5,951 tons of ore
yielding an average extraction of 3.21% copper, and from 624 tons of s
ore shipped. Company contemplates building a 100-ton smelter. Sus
operations November, 1907.

NEGOCIACION MINERA PILARES DE TERAS. MI

Mine office: Pilares de Teras, Sonora, Mex. Francisco H. García,
manager; Alberto C. García, superintendent. Is primarily a silver mine,
ing small values in copper, gold and lead, opened by a 1,400' tunnel a
main shaft. Has steam power.

PILOT-BUTTE COPPER MINING CO. MON

Office: 516 Colby-Abbott Bldg., Milwaukee, Wis. Mine office:
Silver Bow Co., Mont. Wm. P. Jahn, president and general manager; E
Uhrig, vice-president; Geo. P. Meyer, secretary; Geo. F. Brumder, tre
Arthur C. Uihlein, assistant secretary. Organized 1907, under laws of
with capitalization $5,000,000, shares $5 par.

Lands, 1 fractional claim, area 10.19 acres, with average width
and length of 1,405', adjoining the Berlin claim of the North Butte, a
posed to be traversed by several veins having an estimated combined w
135', all said to apex on the Pilot claim, these including extensions of
of the Berlin. Development is by a 515' three-compartment shaft, wit
cuts east and west on the 500' level, in search of the Elm Orlu vein of
iferous copper ore. Has a 50-h. p. electric hoist and Ingersoll-Rand
pressor, actuated by 100-h. p General Electric motor, taking power fr
Madison River Power Co. Property, though very small, is well locat
of considerable promise, and the officers and leading shareholders are
the most substantial business men of Milwaukee.

PILOT KNOB COPPER MINING CO. NE

Dead. Formerly in Nevada.

PILOT RANGE MINING CO. NE

Dead. Lands owned, 1908, by Mrs. Fermenia Sarrias. Former office
60 State St., Boston, Mass. Lands were 35 claims, circa 7 miles from

PILOT RANGE MINE. NE

Mine office: Luning, Esmeralda Co., Nev. Mrs. Fermenia Sarrias,
and general manager; Fermin Arrega, superintendent. Lands, 57 claim
1,140 acres, with 160 acres miscellaneous lands, in the Santa Fé district,
ing syenite and limestone, with 57 reported ore bodies, this number n
ously matching the number of claims, with 5 ore bodies under develop

traceable 7 miles and to give average assays of 10% copper and 2 per ton from azurite, malachite, bornite and chalcopyrite, which e too high. Development is by tunnels of 60′, 100′, 150′, 150′ and 500′ of workings, estimated by management to show 100,000 tons ith 20,000 tons blocked out for stoping, which estimates are excessive. pment includes a small steam plant and 3 mine buildings. The nearest s the Southern Pacific, 8 miles distant. Property considered promising.

NES DE CUIVRE PILOU, LTD. **NEW CALEDONIA.**

. Formerly at Noumea, Diahot district, New Caledonia.

BUTTE GOLD & COPPER CO. **CALIFORNIA.**

e: care of Vernon L. Clark, Los Angeles, Cal. Letter returned un- from former mine office, Forbestown, Butte Co., Cal. Organized, 1907, ws of Arizona, with capitalization $2,500,000. Property is the Hazel-, idle since 1905, until bought by this company. Has a mill, which g enlarged at last accounts. Idle.

COPPER CO. **ARIZONA.**

. Reorganized, 1905, as Arizona Banner Copper Co. Formerly at ila Co., Ariz. Described Vol. III.

ILL CONSOLIDATED MINING CO. **CALIFORNIA.**

e: 1416-141 Broadway, New York, N. Y. Mine office: Wolf, Nevada J. Frank Mase, secretary and treasurer. Organized under laws of . Has a copper ledge, claimed to be 100′ feet wide, carrying mal- zurite, bornite, chrysocolla and native copper, with a gold vein on the and an auriferous gossan, opened by a two-compartment main shaft. eral years.

OUNTAIN COPPER CO. **ARIZONA.**

er returned unclaimed from former office and mine, Globe, Gila Co., . J. Cole, Elmer Long, J. H. Lucas, J. F. Hatrick and Wm. Pohl, . Organized Apr. 6, 1907, under laws of Arizona, with capitalization shares $1 par. Lands are the Ava group, 5 claims. Idle and ap- moribund.

ALE COPPER SYNDICATE, LTD. **AUSTRALIA.**

e: 24 Copthall Ave., London, E. C., Eng. Mine office: Mirani, nd, Australia. E. O. Chudleigh, secretary; G. Lloyd Owen, mine man- rganized May 1, 1906, with capitalization £17,225, in 11,000 preference 0 ordinary shares of £1 par each, and 4,500 shares of 1s. par, prefer- es taking all profits up to 100%, with interest at 6% per annum, after l shares rank alike.

ÑIA MINERA PINTADOS. **CHILE.**

e: Santiago de Chile. Mine office: Tarapacá, Tarapacá, Chile. Or- Dec. 23, 1905, under laws of Chile, with capitalization 6,000,000 pesos, pesos par.

COPPER CO. **NEW MEXICO.**

e: 9 Bartles Bldg., Iola, Kansas. Mine office: Santa Rita, Grant Co., Geo. A. Bowlus, president; F. S. Bennett, secretary and general man- rganized July, 1902, under laws of South Dakota, with capitalization 0, shares $1 par. Lands, 8 claims, area 121 acres, in the Central dis- owing 4 veins, said to average 20′ width and carry carbonate and ores assaying 2.5 to 12% copper, 3 to 10 oz. silver and $2 to $400 gold opened by shafts of 65′, 75′ and 140′. Idle several years.

CREEK COPPER CO. **ARIZONA.**

. Title changed, circa 1902, to Arizona & Hancock Mining Co. For- Florence, Pinal Co., Ariz.

CREEK COPPER MINING CO. **ARIZONA.**

e and mine: Globe, *Gila Co., Ariz.* *Thos. P. Kelly*, president. Organ-

ized Nov. 21, 1906, under laws of Arizona, with capitalization $1,000,000, $1 par. Lands, 9 claims, near the Arizona National and Globe Stand Pinto Creek, said to have about one-half mile of workings.

PINTO CREEK MINING & SMELTING CO. ARI

Office: 402 German American Bank Bldg., St. Joseph, Mo. Mine Globe, Gila Co., Ariz. Employs circa 40 men. Thos. G. Cockrill, pre Chas. Riemenschneider, vice-president; Grant S. Watkins, secretary; Castle, treasurer; preceding officers, H. E. Bragg, J. Berger and Geo. D. directors; G. P. Fuller, superintendent. Organized Dec. 11, 1896, unde of Arizona, and capitalization increased, 1906, to $1,250,000, shares $1 pa

Lands, 36 claims, area circa 700 acres, showing granite and schist 6 fissure veins, in granite, of reported average width of 3′ to 6′, of wh gives considerable promise, carrying sulphide ores assaying 4 to 12% circa 5 oz. silver and $2 to $10 gold per ton. The mine has shafts of 7 570′, and 8 tunnels, shortest 100′, and 2 longest 900′ and 1,100′, the low nel being connected with the upper workings. The main tunnel is driven with air-hammer drills, said by the company to be doing doub work of piston drills at half the cost, which seems almost too good to b Main development is on the Yo Tambien claim, where the 570′ shaft s promising body of sulphide ore. The Manitou claim has a 70′ shaft, tunnels of 1,500′ aggregate length.

Mining equipment includes a gasoline hoist and a 6-drill Sulliv compressor, and there is an aërial tram between the mine and mill.

There is an old 10-stamp mill, and a concentrator, formerly of 3 daily capacity, overhauled and rebuilt, 1907, to 100-ton size, with the tion of $14,000 worth of new machinery, including a Hancock jig. Th ton mill requires a force of 3 men only, as against 8 in the old 30-ton mi is planned as the first unit of a 600-ton mill.

The management of this company deserves credit for great pe ance. Large sums have been expended, and indications favor the makin mine. Work was resumed March, 1908.

PIONEER COPPER & SILVER MINING CO. CALIFO

Office: care of J. H. Platner, president and general manager, Reno, John Holley, treasurer. Organized February, 1907, with capitali $1,500,000. Lands, 15 claims, 11 said to carry silver and 4 to carry g Inyo county, California. Mine, said to have circa 6,000′ of workings, producer for about 15 years, until 1879.

PIONEER WALKER LAKE GOLD & COPPER MINING CO. NEV

Office: care of J. F. Maier, president, Los Angeles, Cal. Letter re unclaimed from former mine office, Yerington, Lyon Co., Nev. Col. Diss, vice-president; Ferdinand K. Rule, Jos. Erzenberger, Samuel P. D H. H. Wallace, O. H. Kiesker, C. E. Killan and H. Hawgwood, directors. ized 1906, under laws of Arizona, with capitalization $1,000,000. La claims, 4 miles north of Yerington, said to show a gossan of about 25′ a width, carrying copper carbonates.

PISHMINSKO-KLUCHEVSKI WORKS. RU

Mine office: Upper Issetzk, Perm, Russia. Count Stenbok-Fermor, Production, 1905, was 868,188 lbs. fine copper.

PITKÄRANTA KOPPARBRUK. FINL

Office: care Russian Imperial Bank, owner, St. Petersburg, Russia. office: Pitkäranta, Viborg, Finland. Lands, circa 10,000 acres, mainly wooded, near Lake Ladoga. Mine, opened circa 1820, was operated st until about 1903, making an average annual production of circa 750,00 fine copper during the last decade of operation. Has been under pr ownership, which is practically that of the Russian government, since 189

Lands carry several ore bodies, but the one developed is a 15′ bed of ru," which is a granular mixture of augite, garnet and other ferro- esian silicates, impregnated with chalcopyrite, in veinlets. This ore body, h dips to the south, at 40° to 50°, has been opened at intervals for a th of about 1½ miles. To the eastward the ore occurs as bunches, up veral pounds in weight, and at this end of the workings the ore body parated into 5 sections, the footwall bed of about 70′ width carrying y disseminated chalcopyrite in "skarn," overlaid by a 2′ to 3′ layer of en material, followed in turn by 3′ of barren schist, succeeded by a cuprif- s bed of about 20″ thickness, carrying somewhat argentiferous copper sul- es. Property also has iron ore, and is said to have indications of tin. The has a small smelter. Idle since circa 1903, but said, June, 1907, to have optioned to a British syndicate.

RIVER GOLD, SILVER & COPPER MINING CO. **CALIFORNIA.**

Dead. Formerly at Redding, Shasta Co., Cal.

TSBURG & ARIZONA MINING CO. **ARIZONA.**

Mine office: Johnson, Cochise Co., Ariz. Lands include the Manila mine, a double compartment shaft, planned to be sunk 400′, showing a promis- vein of high-grade ore. Has a steam plant, with hoist, air-compressor and ips. Presumably idle.

TTSBURGH & BOSTON COPPER CO. **MICHIGAN.**

Dead. Property sold to Tamarack Mining Co. Was the first dividend- er among Lake Superior mines. Formerly at Phœnix, Keweenaw Co., h. Fully described, under title Cliff mine, Vol. II.

TTSBURG & CHIRICAHUA DEVELOPMENT CO. **ARIZONA.**

Mine office: Paradise, Cochise Co., Ariz. Lands, 16 claims, in the Chirica- Mountains. Idle some years.

TTSBURG CONSOLIDATED MINING CO. **UTAH.**

Dead. Formerly at Alta, Salt Lake Co., Utah. Described Vol. VI.

TTSBURG COPPER CO. **NEW MEXICO**

Mine office: Clayton, Union Co., N. M. Lands, shortly east of the Rohr- dder Mining & Development Co., are developed by a 350′ tunnel.

TTSBURG COPPER MINING & REDUCTION CO. **ARIZONA.**

Office: 300 Heist Bldg., Kansas City, Mo. Capitalization, $150,000,000. as a swindle, promoted by Theodore Stegner, a notorious crook. Company eld 40 acres of alleged copper mining ground in Box Cañon, on the Bill illiams Fork river, about 50 miles from Congress Junction, Arizona, and also laimed to own other lands, none of which can be located. Company's capi- alization is preposterous, and the shares are absolutely worthless. Stegner as done time before, and should be locked up permanently.

TTSBURG & DULUTH DEVELOPMENT CO. **ARIZONA.**

Dead. Succeeded, October, 1904, by Pittsburg & Duluth Mining Co. For- erly at Bisbee, Cochise Co., Ariz.

PITTSBURG & DULUTH MINING CO. **ARIZONA.**

Dead. Was merged, circa 1907, in Superior & Pittsburg Mining Co. For- erly at Bisbee, Cochise Co., Ariz. Fully described Vol. VI.

PITTSBURG-ELY COPPER CO. **NEVADA.**

Office: 721 Symes Bldg., Denver, Colo. Mine office: Ely, White Pine Co., Nev. B. P. Morse, president; Hon. Harry C. Riddle, vice-president; J. A. Varney, secretary; Frank Straub, treasurer and trustee; preceding officers and Edwin A. Kistler, directors. Organized January, 1907, under laws of Arizona, with capitalization $5,000,000, shares $5 par. Lands, circa 350 acres, in 2 groups, including the Keyboard group, 6 claims, area 120 acres, near the Key- stone claim of the Nevada Consolidated. Another group of 10 claims, area 200 acres, lies to the north, and a third small group is near the Cumberland-

Ely. The Keyboard group has a 60′ shaft, sunk 1907, claimed by company to be in the ore formation, which may mean much or little. The Keyboard group is considered promising, but apparently company has done more advertising than development. Employed 3 men at last accounts.

PITTSBURG & GREENWATER COPPER CO. CALIFORNIA.

Office: care of L. P. McGarry, president and general manager, Rhyolite, Nev. Mine office: Greenwater, Inyo Co., Cal. Organized October, 1906, under laws of Arizona, with capitalization $2,000,000. Lands, 16 claims, known as the Iron Mask group, near Resting Springs, about 35 miles south of Greenwater. Was promoted, for purely stock-jobbing purposes, by the notorious Dr. J. Grant Lyman. Idle and presumably moribund.

PITTSBURG & HECLA DEVELOPMENT CO. ARIZONA.

Dead. Formerly at Bisbee, Cochise Co., Ariz. Fully described Vol. V.

PITTSBURG & HECLA MINE. ARIZONA.

Office and mine: Bisbee, Cochise Co., Ariz. Thos. Tate, manager. Is idle, except for annual assessment work.

PITTSBURG-IDAHO MINING CO. IDAHO.

Dead. Was succeeded by Pittsburg-Idaho Mining & Milling Co. Formerly at Greer, Nez Perce Co., Idaho. Fully described Vol. VI.

PITTSBURG-IDAHO MINING & MILLING CO. IDAHO.

Office: Kamiah, Idaho. Mine office: Greer, Nez Perce Co., Idaho. Jas. F. Bridwell, president; Daniel Laverty, vice-president and general manager; Hugh Laverty, secretary and treasurer; E. E. Krengel, engineer; preceding officers, Fred Worrell, Otto Gorke, Jas. Laverty, William S. Pitman and Patrick Laverty, directors. Organized January, 1903, under laws of Idaho, with capitalization $1,000,000, shares $1 par.

Lands, 19 claims, area 380 acres, in the Lo Lo district, said to show 6 contact veins, between gneiss and quartz-porphyry, of which 2, of 50′ to 100′ width, under development, carry cuprite, malachite, bornite and chalcopyrite, giving assays up to 12% copper, 14 oz. silver and $20 gold per ton. Has about 1,700′ of workings, including pits and shafts, deepest 180′, with tunnels of 40′, 290′ and 600′. Has gasoline power and 5 small buildings, and plans a hydro-electric installation, to utilize power from the Clearwater river.

PITTSBURG-JEROME COPPER CO. ARIZONA.

Office: 1219 Park Bldg., Pittsburg, Pa. Mine office: Jerome, Yavapai Co., Ariz. Thomas Houlette, president; Jos. Atkins, vice-president; C. S. Cochran, treasurer; T. D. McDonald, secretary; preceding officers, W. E. Crow, Robt. Stewart, A. C. Spindler and D. M. Clemson, directors; W. A. Edeburn, consulting engineer; D. F. Houlette, superintendent. Organized 1904, under laws of Arizona, and capitalization increased, March 9, 1906, to $3,000,000, shares $1 par; issued, $1,482,699. Annual meeting, first Monday in March.

Lands, 26 claims, area circa 520 acres, lying 2 to 3 miles south of Jerome, a short distance northwest of the Black Hills property and about midway between the United Verde and Equator mines. Development is by the Pittsburg shaft, planned to have been sunk 1,000′, which is said to show, at 250′ depth, argentiferous and auriferous sulphide ore, of about 4% copper [illegible]. Development was hampered by a heavy inflow of extremely acid water.

Equipment includes a 50-h. p. Fairbanks & Morse hoist, good for 1,500′ depth, and an Ingersoll-Rand 2-stage air-compressor. Property was closed down June, 1907, ostensibly on account of differences in the directorate, but perhaps from lack of cash as well.

PITTSBURG-JEROME COPPER & GOLD MINING CO. ARIZONA.

Dead. Succeeded, circa 1904, by Pittsburg-Jerome Copper Co. Formerly at Jerome, Yavapai Co., Ariz.

TSBURG-MAYER MINING CO. **ARIZONA.**

Mine office: Mayer, Yavapai Co., Ariz. Louis D. Hall, general manager, at last accounts.

TSBURG MINING & MILLING CO. **IDAHO.**

Dead. Formerly at White Bird, Idaho Co., Idaho.

TSBURG & MONTANA COPPER CO. **MONTANA.**

Office: 1124 Farmers Bank Bldg., Pittsburg, Pa. Mine and works office: te, Silver Bow Co., Mont. Employs circa 250 men. J. H. Reed, president; ding officer, T. H. Given, J. W. Friend, Hay Walker, Jr., and D. C. ole, directors; R. T. Rossell, secretary and treasurer; Oscar Rohn, manager. nized July 9, 1902, under laws of West Virginia, with capitalization ,000,000, shares $100 par. Has authorized a $3,000,000 bond issue, at 6%; red by trust deed. The company has a considerable floating indebtedness, h apparently is being financed by the Pittsmont Copper Co., organized for purpose. Annual meeting, first Monday in August.

Lands, 46 claims, area 850 acres, also 634 acres miscellaneous lands, giving holdings of 1,384 acres, in the Butte, Helena, Elk Horn and Greenhorn icts of Montana. Principal property is the main tract of 260 acres, lying e flat east of Butte, including the McQueen placer and adjoining claims, erly owned by Franklin Farrell.

Owing to the great depth of overburden, the solid ledge was not reached a depth of several hundred feet, and sinking was difficult and costly, g to the existence of considerable quicksand above the ledge. The erty carries 4 veins, of 2′ to 12′ estimate average width, which presumably continuations of the veins of the Butte & Boston. Development is by 2 ts, known as Nos. 2 and 3, each of 1,240′ depth, with a 300′ winze below bottom level, the mine having about 8 miles of workings. No. 2 shaft has gallon electric pumps on the 700′ and 1,200′ levels, and the shafts are nected with a half-mile crosscut on the 1,200′ level. The ore bodies are ll, compared with the big veins to the eastward, but carry good silver es, ore assaying 3.5 to 10% copper and 5 to 12 oz. silver per ton, with ll gold values. The richest ore has been found between the 800′ and 0′ levels, and some ore of 7% copper tenor was stoped on the 180′ level. t-class ore ranges 6 to 8% copper and 8 to 12 oz. silver per ton.

The Swissmont mine, near Elkhorn, Jefferson county, Montana, bought for ,000, shows a large body of low grade sulphide ore, of 1.5 to 3% copper er. This is idle.

The Chamounix mine, near Austin, Lewis & Clark county, Montana, in des the Christina group of 6 claims, and the Fannie Parnell group of 33 ms. This property has considerable development, and has shipped some ntiferous copper ore, but was idle at last accounts.

The company also owns mining claims at Pittsburg, 4 miles from Helena, is & Clark county, Montana, which are idle.

Equipment at the Butte property includes a 2,000-h. p. steam plant and 0-h. p. electric plant, 1,900 h. p. being used at the mine and 700 h. p. at melter. There is a 500-h. p. hoist, good for 1,600′ depth, and a 600-h. p. good for 1,300′, with a 25-drill Nordberg air-compressor, 10-drill Rand mpressor, and 20 power drills.

Buildings include a 38x70′ brick carpenter shop, frame smithy, 2 engine-s, 2 boiler-houses, changing-house, office, laboratory and miscellaneous ings, with a total of about 16 structures. The large office building is ped with a library, reception room, billiard room and café.

The property has about 3 miles of railroad track, connecting the various s and works. The lands, in two tracts, are surrounded by high board s.

The reduction plant, known as the Pittsmont works, include a 250-ton concentrator, built 1907, near the smelter.

The Pittsmont smelter does a limited custom business, in addition to treating the company's own ores. The furnace building, with room for 4 cupolas, has a 250-ton blast-furnace, added 1908, and an old 150-ton blast furnace, which it is planned replacing by a new 250-ton furnace. The small cupola is a Garretson pyritic furnace, remodeled by Mr. Baggaley, the former manager, and gave considerable trouble in operation, on semi-pyritic smelting. The converter department has 2 stands, with 96x156" shells, and there also are 2 experimental Baggaley converters, of smaller size, not in use. Product is blister copper, averaging circa 96% copper, 200 oz. silver and 3.5 oz. gold per ton, sent for electrolytic refining to the Nichols Copper Co.

Production, 1905, was 790,600 lbs. fine copper, 81,911 oz. silver and 1,4[illegible] oz. gold, secured from 11,000 tons of ore smelted, giving average returns of 3.6% copper, 7.5 oz. silver and $2.50 gold per ton. The smelter was closed Apr. 14, 1906, but resumed work in 1907, and November, 1908, was said to be smelting circa 250 tons of ore daily, of which about 50 tons was first class and 200 tons was second class ore. Property is considered valuable, though not up to the average of the Butte camp in quantity or quality of ore.

PITTSBURG & MOUNT SHASTA GOLD MINING & MILLING CO. CALIFORNIA.

Office: 424 Fifth Ave., Pittsburg, Pa. Letter returned unclaimed from former mine office, Redding, Shasta Co., Cal. B. H. Scott, president; Dr. J. R. Phillips, vice-president; J. S. Parish, secretary; T. V. Scott, treasurer. Organized 1903, under laws of West Virginia, with capitalization $500,000, increased later to $1,000,000, shares $1 par.

Lands, 9 claims, partly patented, area 170 acres, known as the Bennington group, in the Flat Creek district, north of Redding, said to have been bought for $18,000 cash and $60,000 shares. Company claims to have expended about $50,000 in development and equipment. Property mortgaged, previous to 1907, for $13,300. Mine has a 280' crosscut tunnel and 2 other tunnels, showing auriferous and argentiferous copper ore of varying tenors. Has a carpenter shop, smithy, boarding house and 3 bunk-houses, with electric power. Shipped, previous to 1907, circa 100 tons of selected ore, running $3 to $[illegible] gold and averaging about 10 oz. silver per ton. Idle.

PITTSBURG-NEW YORK COPPER MINING CO. MONTANA.

Office: care of W. H. Lindsay, secretary and treasurer, Butte, Mont. Mine office: Elkhorn, Jefferson Co., Mont. Alexander Johnson, president; Thos. S. Killgallon, vice-president; W. J. Dawson, superintendent. Organized under laws of Montana, with capitalization $1,250,000, shares $1 par. Lands, 5 claims, adjoining the Park Copper Co.

PITTSBURG-OAXACA MINING CO. MEXICO.

Office: 119 Farmers Bank Bldg., Pittsburg, Pa. Mine office: San Bartola Coyotepec, Centro, Oaxaca, Mex. W. J. Burke, president; P. J. Kane, vice-president; M. J. Gannon, secretary and treasurer; W. H. Baird, manager. Organized 1904, under laws of Delaware, with capitalization $1,000,000, shares $1 par.

Mine, said to have circa 6,000' of workings, with 50,000 tons of ore blocked out, has a 5' vein, carrying mainly gold values, with some copper ore ranging 5 to 9% in tenor. Property is served by the Mexican Southern railway, and has a 25-ton mill. Was raising money, at last accounts, for alleged purpose of installing a $150,000 machinery equipment. Advertising makes exaggerated claims. Is said to employ circa 50 men.

PITTSBURG & SONORA DEVELOPMENT CO. MEXICO.

Office: care of Hon. W. G. McDonald, Douglas, Ariz. Mine office: Cur-

Moctezuma, Sonora, Mex. Holds direct title to property through a Mexican poration known as the Quatro Grande. Lands include the Estrella de la Plata e, near Cumpas, also claims circa 18 miles south of Douglas. Presumably

TSBURG & UTAH GOLD, SILVER, COPPER & LEAD MINING CO. **UTAH.**

Mine office: Ophir, Tooele Co., Utah. Idle.

TTSMONT COPPER CO. **MONTANA.**

Office: 1124 Farmers Bank Bldg., Pittsburg, Pa. Mine office: Butte, ver Bow Co., Mont. Was organized, 1908, as a holding company for the ittsburg & Montana Copper Co., presumably for the purpose of providing eded funds.

ITTSMONT SMELTER. **MONTANA.**

Owned by Pittsburg & Montana Copper Co.

IZARRO COPPER MINING CO. **NEW MEXICO.**

Dead. Was a swindle, put out by the Financial Security & Trust Co., of nver, which also promoted the Spanish Lost Bullion Mines, Geronimo Copper ining Co. and Blanca Copper Mining Co. Formerly at Silver City, Grant , N. M.

LACERVILLE COPPER MINING & REDUCTION CO. **COLORADO.**

Mine office: Placerville, San Miguel Co., Colo. Organized circa May, 7, under laws of Colorado, with capitalization $500,000, by A. B. Cooper, F. Margowski and L. L. Knutson. Presumably is successor of Placerville d & Copper Mining Co.

LACERVILLE GOLD & COPPER MINING CO. **COLORADO.**

Mine office: Placerville, San Miguel Co., Colo. W. K. Johnson, president. anized circa 1903, with capitalization $1,000,000, shares $1 par. Lands, 8 ms. Presumably succeeded, 1907, by Placerville Mining & Reduction Co.

LAKALNITZA MEDNA PLANINA. **BULGARIA.**

Office: care of M. Mavrokordato, owner, Constantinople, Turkey. Mine ce: Plakalnitza, Vratza, Bulgaria. Lands are sundry claims, held as a cession from the Bulgarian crown, showing bornite and a little chalcopyrite, in dolomite. Copper mines were worked in this vicinity by the nans. Idle.

LANET COPPER MINING CO. **ARIZONA.**

Office: 74 Broadway, New York, N. Y. Mine office: Planet, Yuma Co., z. J. Stanley Jones, president and general manager; Chas. S. Barton, vice sident; W. B. Storer, secretary and treasurer; H. L. McCarn, superintendent. anized Aug. 14, 1902, under laws of Arizona, with capitalization $1,500,000, res $10 par; issued, $1,120,000. State Street Trust Co., Boston, registrar transfer agent. Annual meeting, in May.

Lands, 25 claims, area 500 acres, also 40 acres in millsites, in the Hassayar trict, on the south side of Bill Williams Fork river, 12 miles east of the orado river. Property shows about 50 exposures of ore, with 2 ore zones, arently metamorphic contact deposits, having diorite on the footwall, and l by sedimentary shales and impure limestone, much altered by intrusive ptives, the veins carrying a heavy iron capping, mainly of hematite, for tance of 3,000', averaging about 30' in thickness and up to 200' in sh parently the gossan is of workable grade, and it is estimated that the y shows circa 1,000,000 tons of 60% iron ore. The main ore zone, for best 2,700', ranges up to 200' in width, carrying oxidized and sulphide per, estimated to average 7 to 8% copper and 50 cents gold per ton, ces of silver, but apparently the workable portion of the vein is width. The vein is very flat, dipping about 15° only.

Development is by 2 incline shafts, deepest 800', giving

365', showing ore of 5 to 12% copper tenor, and by 12 vertical pits and sh of 25' to 325' depth, and by 8 tunnels, longest 225', with total working 4,000', estimated to show 100,000 tons of ore, with 75,000 tons blocked ou stoping. The sulphide zone has not been reached, as yet, by any worki which is an indication of strong and persistent copper values.

Equipment includes a 75-h. p. gasoline plant with two 15x25" hoists a 5-drill air-compressor. Buildings include a 15x40' frame carpenter-shop, 10 smithy, 2 shafthouses and 3 dwellings.

The mine, opened circa 1864, was worked in a small way until 1874, was reopened 1884, when a 36" blast-furnace was erected. Property was ta over, 1902, by present company, and has been developed steadily, with a s force, since then. The mine produced upwards of $500,000 worth of high gr ore, ranging from 15 to 40% in copper tenor, which was shipped by water t port on the Gulf of California, presumably Guaymas, and transshipped th to Swansea for reduction. A little ore was sent to San Francisco also, and duction is said to have given fair profits, notwithstanding the heavy expe for freight and smelting, and the harassing difficulties caused by various Ind uprisings.

The property has been handicapped by lack of rail connections, but Arizona & California railway is now only 27 miles distant by wagon-road, the company is negotiating for the construction of a branch line from B to Planet. Property considered promising and management good.

PLANT & CALLAHAN MINING CO. WASHINGT

Office: care of J. T. Plant, president, Mora, Minn. Letter returned claimed from former mine office, Conconully, Okanogan Co., Wash. C Williams, vice-president; H. Rines, secretary and treasurer. Organized with capitalization $1,500,000. Lands, 4 claims, including the Anaconda in the Ruby camp, having a 600' tunnel, showing a 20" vein carrying about copper, with high silver values.

PLATA COBRE MINING & TRANSPORTATION CO. ARIZ

Dead. Formerly at Florence, Pinal Co., Ariz. Described Vol. VI.

PLATA COPPER MINING CO.

Dead. Was a swindle, promoted by the notorious Wm. F. Wernse, o Louis.

PLATTE CAÑON MINING CO. WYOM

Mine office: Wheatland, Laramie Co., Wyo. Idle several years.

PLATTE COPPER MINING CO. WYOM

Office: 20 Broad St., New York, N. Y. Letter returned unclaimed former mine office, Encampment, Carbon Co., Wyo. John R. Dixon, presi Wm. C. Ledbetter, vice-president and general manager; Thos. Delaney, tary and treasurer; preceding officers, Philip S. Delaney and A. E. Wilso rectors. Organized 1906, under laws of Colorado, with capitalization $1,00 shares $1 par. Lands, 2 claims, area 40 acres, showing a shear zone of 500' width, carrying ore assaying 5 to 10% in copper tenor.

PLENTY COPPER CO. ARIZ

Dead. A swindle, promoted by the notorious Wm. F. Wernse, of St. Formerly at Pima, Graham Co., Ariz.

PLUMAS COPPER MINING & SMELTING CO. CALIFOR

Dead. Was still-born. Formerly at Taylorsville, Plumas Co., Cal.

PLUMAS MINING, MILLING & SMELTING CO. CALIFOR

Dead. Still-born. Formerly at Taylorsville, Plumas Co., Cal.

PLUTO GOLD & COPPER MINING CO. WYOM

Office: 365 Tenth St., Oshkosh, Wis. Mine office: Dillon, Carbon Wyo. Ole Granberg, president and general manager; H. Thorsgaard, president; H. O. Granberg, secretary and treasurer; E. M. Sanders, sup

; Frank Earle, engineer. Organized Dec. 15, 1902, under laws of Wyo- with capitalization $1,000,000, shares $1 par.
nds, 11 claims, patented, area 220 acres, also a 40-acre millsite, in the Lake district, near the Ferris-Haggarty mine, showing 2 fissure veins in ite, and 2 contact veins between diorite and quartzite, ranging 2′ to 30′ lth, and carrying cuprite, melaconite and copper sulphides, associated nanganese, giving average assays of 1% copper, a trace of silver and $3 er ton, developed by numerous pits of 10′ to 20′ depth, 5 shafts of 55′ ′ depth, and by a tunnel of 1,004′ with circa 2,000′ of underground work- Equipment includes a 40-h. p. steam plant and 3-drill air-compressor. ngs are a 36x40′ machine-shop, 38x20′ carpenter-shop, and 6 other mine ures. Idle except for annual assessment work, but hopes to resume y.

HONTAS COPPER MINING CO. **CALIFORNIA.**

line office: Lewis, Mariposa Co., Cal. David Ross, general manager; J. berts, superintendent. Lands, 150 acres, including the Great Northern in the White Rock district, showing several veins of cupriferous iron etween diorite, vein matter being mainly diabase, usually altered. The pal ore body, about 100′ wide, occurs in a mineral belt up to 1,000′ in , the oxidized zone, circa 100′ in depth, having been a limited producer gh grade ores, many years ago. Development is by tunnel and a 200′ showing ore said to carry 6 to 12% copper and circa $2.50 gold per Has steam power and necessary mine buildings. Ore is shipped, via La e, nearest railroad point, 15 miles distant, to Peyton Chemical Works, at oint, California, and some selected ores were shipped, 1907, to the Tacoma r. Employs circa 20 men. Property considered promising.

HONTAS COPPER QUEEN MINING CO. **ARIZONA.**

lice: Pocahontas, Ark. Mine office: Mayer, Yavapai Co., Ariz. Jos. orhees, president; W. H. Skinner, vice-president and treasurer; T. T. ttorney; A. L. Porterfield, general manager. Organized 1906, under laws izona, with capitalization $1,000,000, succeeding the Big Bug Gold & Mining Co.
nds, 14 claims, 4 miles southeast of Mayer, including the Spar group, , 1908, of the Spar Mining Co., having a 200′ shaft, with a vein up to width, which, under former ownership, shipped 23 carloads of high grade id to have given sufficient returns to former owner to pay cost of par- price and development. Has steam power.

TELLO GOLD & COPPER MINING CO. **IDAHO.**

lice and mine: Pocatello, Bannock Co., Idaho. E. Craanson, president; uheen, secretary; N. M. Eldredge, general manager; Jos. E. Munn, super- ent. Organized Dec. 1, 1902, under laws of Idaho, with capitalization 000, shares 50 cents par.
nds, 7 claims, area 140 acres, in the Fort Hall district, 12 miles east of llo, showing a vein of about 3′ average width, reported to give assays copper and 75% lead (total 115%), with 35 oz. silver and $1 gold per om bornite and chalcopyrite. This evidently is very rich ore, as veins g 115% in metallic values are unusual. From another source it is said iat the ore is mainly of milling grade, with a small paystreak of smelting om which small shipments to the White Knob smelter gave returns of 30% copper and 15 to 18 oz. silver per ton. Development is mainly by unnels, with circa 1,000′ of workings. Presumably idle.

AÑIA MINERA PODEROSA DE COLLAHUASI.

lice: Valparaiso, Chile. Mine office: Collahuasi, Tarapa seo Javier, president; Juan G. Searle, vice-president; Carlos ry; preceding officers, Thompson Matthews, Carlos Gregor

Gustavo Jullian, directors; Robt. Hawxhurst, Jr., mine manager. Organized Apr. 4, 1905, under laws of Chile, with capitalization £240,000, shares £5 par.

Lands, 37 contiguous claims, area 185 hectares, equal to 457 acres, carrying strike of the ore formation for 4,500'. Lands include the Mina Poderosa, which is the principal property, and the San Carlos, Rosario and Condor mines. Lands, located at an extreme elevation of 15,400', on the Bolivian plateau, lie above the timber-line, and are barren of vegetation, with the exception of a fungus, bearing the botanical name of fungi cordillerensi, which forms the local fuel of the district. There are no high hills in the vicinity, lands being on the top of an elevated plateau, surrounded, at a considerable distance, by high peaks of the Andes. There are no running streams, and potable water is scarce. The climate is extremely bleak, winter prevailing 12 months yearly, with snow or hail falling nearly every day in the year. Copper mines in this district were worked under Spanish domination, and previously by the Indians, as shown by the ancient remains of furnaces, fragments of matte, scoria, and tools left in old workings.

The country rock is feldspar-porphyry, stratified and fissile, there being a slight stratification, with dip of about 70° to the westward, with an amygdaloidal diabase running northwest and southeast, dipping with the country rock to the westward, ore bodies occurring in contact with and in the immediate vicinity of the intrusive dykes. There has been considerable disintegration, and overburden covers the rock formation so that latter gives few outcrops, these usually carrying low grade malachite and chrysocolla, or brochantite, gangue being mainly felsitic rock, much decomposed. The Poderosa lode consists of several parallel bodies of partly or wholly decomposed country rock, with considerable faulting, having a general strike of N. 40° W., crossed, at practically right angles, by a secondary set of leaner veins, the master veins being fissures in a shear-zone. Characteristic ores of the Poderosa system are cuprite, melaconite, malachite, chalcocite, covellite, bornite, chalcopyrite, chrysocolla, brochantite, atacamite and tetrahedrite, latter decidedly argentiferous, the ores, as a whole, averaging about 8 to 12 oz. silver per metric ton.

The Poderosa mine, which is the principal property, has a 433' main shaft, with about 7,000' of workings, carrying oxidized ores on the 400' level. Mine has 2 main veins, known as the Poderosa and Portillo, of 3' to 30' width, carrying paystreaks of high grade ore 1' to 20' wide, with average width of about 6', gangue being decomposed quartzose felsite, very soft, requiring heavy timbering, while, unfortunately, the timbering in place is extremely poor. The hanging-wall is well defined, but the ore shades gradually into the altered country rock of the footwall, there being a flucean, usually of 3" to 12", and even up to 4' width, on the hanging, with an occasional flucean on the foot-wall. Main shaft is only 6x8' inside of timbering, and should be cut down to larger size. The shaft is in the hanging-wall, west of the lode, crossing the vein about the fourth level, with 5 levels opened, at only 22-meter intervals, shaft cutting another vein about midway between the fifth and sixth levels, this vein, averaging circa 30" width and dipping toward the main vein, carrying exceedingly high grade ore. The various levels are connected by winzes, with indications that ore will grow richer until the base zone is reached. The mine is quite wet, making about 90,000 gallons of water per day, in the wet season. Estimated ore reserves of the Poderosa mine alone, March, 1907, were 101,600 long tons, with average tenor of 63.66% copper, and circa 10 oz. silver per long ton. These figures, while appearing very high, seem warranted. Equipment of the Poderosa mine is primitive, consisting only of a wooden head-frame, with a 10x15" single Tangye hoist, raising half-ton buckets.

The Rosario mine, northwest of the Poderosa, has a 166' incline shaft, on a 30" vein dipping at about 80°, ore assaying about 15% copper, shaft being

ottomed in the top of the base zone, which shows chalcopyrite, arsenopyrite and
rite. The San Carlos mine, practically an extension of the Poderosa, and
be connected therewith, has a 146′ shaft, showing a 3′ vein carrying ore of
bout 19% average copper tenor. The Condor mine has a 147′ shaft showing
2′ vein, carrying ore giving average assays of about 18% copper. The Cam-
ail mine, a new property, is being opened by shaft. Mine timber used is
regon fir and pine, costing at Antofagasta £9 per thousand feet, with 4d. per
quare foot transportation charges thence to the mine. During the period of
velopment, supplies and ore were hauled 65 miles, over an extremely rough
ad, between Carcote station and the mine, one week being required for the
und trip, but a branch of the Antofagasta & Bolivian railway, building from
lagüe to the mine, was practically completed, at last accounts.

Labor is supplied mainly by Bolivian Indians, from the neighboring repub-
, who work intermittently, putting in about half time, and are dull, drunken
l lazy, but, bad as it is, the labor supply is short, though the completion of
railway should give improvement. The manager desires to import Chinese,
ich would seem a sensible plan. Mine has 9x18″ and 6x20″ crushers, re-
cing ore to 2″ to 3″ size before shipment. Ore formerly was hand-picked
an average tenor of about 45% copper, for shipment, and ore shipped to end
1906 was 770,185 kilograms, giving average returns of nearly 40% copper
d 17.5 oz. silver per long ton. Production, 1906, is estimated at 500,000
. fine copper.

This is a property of exceptional promise, and has been well handled by
. Hawxhurst, under exceedingly trying circumstances. With sufficient out-
, apparently the Poderosa mine alone could be put in condition, in one to two
ars, to produce 100 to 150 tons daily, of ore of 15 to 20% average copper
nor, giving, on the mean of these figures, an average production of fully
00,000 lbs. fine copper monthly.

OLAND-AMERICAN GOLD MINING & MILLING CO. ARIZONA.

Mine office: Humboldt, Yavapai Co., Ariz. Organized, circa 1904, as a
rger of the American Gold & Copper Co. and the Poland Extension Gold
ining & Milling Co., with capitalization $2,500,000, shares $1 par. Was pro-
ted by Chas. J. George and is not regarded favorably. Idle.

OLAND EXTENSION GOLD MINING & MILLING CO. ARIZONA.

Dead. Merged, 1904, in Poland-American Gold Mining & Milling Co. For
rly at Poland, Yavapai Co., Ariz.

OLARIS MINING & MILLING CO. ARIZONA.

Office and mine: Clifton, Graham Co., Ariz. Samuel Abraham, president;
M. Williams, vice-president; D. P. W. Eylar, secretary; E. J. Lehmann,
easurer; L. F. Sweeting, general manager; preceding officers, Geo. Crispin,
icholas Cole, W. A. Hamilton and Ira Harper, directors. Organized March
, 1902, under laws of Arizona, with capitalization $2,500,000, shares $1 par.
bond issue, formerly authorized, has been recalled and canceled. Annual
eeting, third Wednesday in January.

Lands, 40 claims, area 700 acres, also a 70-acre millsite and 400 acres mis-
llaneous lands, in the Greenlee district, on the San Francisco river, circa 5
iles from Clifton. Property, lying northeast of the Clifton Consolidated and
ew England mines, shows granite, with parallel porphyry dykes, and many
honolite and rhyolite dykes, at acute and right angles to the vein system, ore
odies occurring mainly as contact deposits between limestone and igneous
ocks, with disseminated ores in porphyry. Lands show 4 ore bodies, of which
, under development, are of 8′ to 100′ estimated average width, traceable
irca 6,000′, carrying oxide, carbonate and sulphide ores, estimated to average
% copper, 4 to 15 oz. silver and $4 to $15 gold per ton. The copper ores are
ssociated with gold-bearing quartz with argillaceous gangue. The lower work-

ings show mainly auriferous and argentiferous chalcopyrite. Develop
by the 105′ Black Prince shaft, the 100′ Nonesuch shaft, the 140′ Golde
shaft, the 560′ Black Prince tunnel, the 320′ Fraction tunnel, the 307′
Eagle tunnel and the 532′ Phonolite tunnel, with circa 2,500′ of workin
mated to show 10,000 tons of ore in sight, with 4,000 tons blocked
stoping.

Improvements include 6 mine buildings. The nearest railroad is the
& New Mexico, 7 miles distant. Property is being operated, under le
piring 1912, by the Southwestern Development & Improvement Co.,
plans the erection of a concentrator, and, eventually, a smelter.

POLLYTON GOLD MINING CO. WY

Office: Centennial, Wyo. Mine office: Holmes, Albany Co., Wyo.
Emmons, president; R. F. Lawson, vice-president; E. B. Steadman, se
M. D. Reed, treasurer; preceding officers and G. C. Mason, director
Benton, superintendent. Organized March, 1908, under laws of Wyomi
capitalization presumably $3,000,000, shares $3 par. Lands, well wate
timbered, near the Maudem mine of the Topeka Copper Co., in the La
district, are supposed to carry the extension of the Maudem vein.
has a vein of 4′ to 8′ width, carrying a 12″ paystreak showing ore
20 to 50% copper and $2 to $40 gold per ton, with considerable fr
opened by a shallow shaft.

PONDERAY SMELTER.

Owned by Idaho Smelting & Refining Co.

PONDEROSA COPPER CO. CALI

Office: Delta Bldg., Los Angeles, Cal. Mine office: Bagdad,
nardino Co., Cal. J. H. Canovan, president; J. W. Green, superi
Lands are circa 14 miles from Bagdad.

PONDILLAI & VOLCAN MINES. NEW CALE

Letter returned unclaimed from former mine office, Diahot, N
donia. Properties are said to have rich ores, but are only slightly d
and have been idle some years.

PONTIAC COPPER MINES, LTD. BRITISH COL

Dead. Changed title, 1906, to Keremos-Pontiac Mines, Ltd. For
Olalla, East Yale, B. C.

PONTIAC GOLD & COPPER MINING CO. NEW

Dead. Formerly at Tres Piedras, Taos Co., N. M.

PONTIAC MINING CO. VIRGINIA & NORTH CA

Office: 19 Liberty St., New York, N. Y. Mine office: Virgilina,
Co., Va. A. A. Sumner, president; Samuel Bryant, secretary; Robt. G.
general manager. Organized 1902, under laws of New York, with capit
$1,600,000, shares $10 par.

Lands, 1,340 acres, in the Virgilina district of Virginia and North
carrying a fissure vein in schist, opened by the Tuck shaft of 125′
Glasscock shaft of 203′, showing cuprite, malachite and azurite to dep
below which are chalcocite, bornite and chalcopyrite, with quartz and
gangue, giving average assays of 4% copper and 1 to 2 oz. silver per
traces of gold. Has gasoline power. Idle several years.

PONTOTOC MINING CO. A

Office: care of T. H. Bass, secretary and treasurer, Beaumo
Mine office: Tucson, Pima Co., Ariz. J. M. Eastham, president; S. Y
son, general manager. Lands, 15 claims and 4 millsites, 7 miles north of
having a 75′ shaft, showing ore giving assays of 10.3% copper, with an
tenor of circa 5%.

POONA COPPER CO. SOUTH AUST

Office: Adelaide, South Australia. Mine office: Moonta, Daly Co

ia. Organized 1907. Lands, 240 acres, including the Poona and Matta nines, adjacent to the Moonta mine, having shafts of 120′ and 228′, considerable ore of good average tenor.

PINE MOUNTAIN COPPER CO. **MICHIGAN.**

ce: Cleveland, Ohio. Mine office: Ontonagon, Ontonagon Co., Mich. Watterson, president; E. S. Hough, secretary and treasurer. Was said been organized, 1901, under laws of New Jersey, with capitalization 0, but returns from Mr. Watterson give the ownership as vested in a e, promoted 1890, with 7 shareholders, title being held by trustees.

ds, 1,100 acres, well timbered, including a portion of the old Carp Lake the Porcupine Mountains, showing a continuation of the Keweenawan belt, with amygdaloidal traps, intercalated conglomerate tuffs, and e, having sundry beds carrying native copper, disseminated as speiss, sandstone. Property has 2 ore bodies, of 27′ estimated average width, terly and westerly strike and dip of 30° to the north, carrying esti- verage values of 3% copper, which is too high. Mine has circa 1,700′ ground workings, estimated to show 150,000 to 200,000 tons of stamp- lle several years.

GE LAKE & BISBEE MINING CO. **ARIZONA.**

ce: 12 First National Bank Bldg., Hancock, Mich. Letter returned d from former mine office, Bisbee, Cochise Co., Ariz. W. S. Cleaves, t; John Funkey, vice-president; W. I. McMaster, secretary; Chas. reasurer. Organized April, 1903, under laws of Arizona, with capital- $1,000,000, shares $1 par, succeeding the Portage Lake & Calumet De- nt Co.

ds, 12 claims, 3 fractional, area 191 acres, owned in fee and partly , 3 miles southeast of Bisbee, showing country rock of limestone, with ry contact. Has a 302′ shaft, with 2 compartments, well timbered. nall air-compressor, Worthington sinking pump, 75-h. p. hoist, boarding- unkhouse and smithy. Extensive diamond drilling was done, 1903-1904, iderable leached ore cut, the showing, while not including workable ore eing of an encouraging nature. Idle since 1904.

GE LAKE & CALUMET DEVELOPMENT CO. **ARIZONA.**

d. Reorganized, April, 1903, as Portage Lake & Bisbee Mining Co. at Bisbee, Cochise Co., Ariz.

ND COPPER CO. **WASHINGTON.**

e office: Berlin, King Co., Wash. Lands are sundry claims 5 miles from howing a 17′ vein, with east and west strike, carrying native copper, and chalcopyrite, opened by tunnels of 40′ and 75′. Idle.

ND COPPER MINING CO. **WYOMING.**

ce: 20 Broad St., New York, N. Y. Mine office: Rambler, Carbon o. P. S. Delaney, vice-president; Hon. J. C. Helm, secretary and treas- . C. Ledbetter, general manager; preceding officers, W. H. D'Esterre, T. C. Delaney, directors. Organized under laws of West Virginia, and proclaimed forfeited, 1902; reorganized 1908, under laws of Colorado, pitalization $1,500,000, shares $1 par.

ds, 5 claims, 3 patented, area 95 acres, known as the Portland mine, Battle Lake district, on the line of the Penn-Wyoming aërial tram. shows 12 veins, 6″ to 40′ wide, in a mineralized zone of circa 600′ hat averages about 1% copper. Has a sulphide copper vein of 30′ to h, estimated to carry average values of 11% copper and $4 to $40 gold which is much too high, the vein actually having a paystreak of 8′ to h, carrying about 5% copper and $2 to $4.80 gold per ton. Has 13 pits fts, deepest 243′, and a 650′ tunnel, latter said to show 35′ of 3% ore. am power, and has been developing steadily for several years, being

one of the few properties in Carbon county to do so. Planned beginning duction, 1908, by shipments to the Penn-Wyoming smelter, but apparentl not do so.

PORTLAND GOLD & COPPER MINING CO. WASHING

Office: 7-127½ First St., Portland, Ore. Mine office: Spirit Lake, mania Co., Wash. Harvey Bailey, president and general manager; C Wyss, vice-president; H. W. Bailey, secretary and treasurer; A. B. Burg general superintendent; preceding officers and Dr. R. D. Wiswall, dire Organized under laws of Washington, with capitalization $1,250,000, shar par. Lands, 17 claims, area 340 acres, well timbered, on the north fork o Toutle river, having circa 500′ of workings, showing ore giving good values in gold and copper. Idle.

PORTLAND-IMNAHA COPPER MINING CO. ORE

Dead. Disincorporated, September, 1902, with all debts paid. For at Imnaha, Wallowa Co., Ore.

PORTLAND LUNING COPPER CO. NEV.

Letter returned unclaimed from former mine office, Luning, Esmeralda Nev. Property is slightly developed by shaft and tunnel. Idle and appar moribund.

PORTLAND MINING CO. BRITISH COLUM

Office: 19 North Seventh St., Terre Haute, Ind. Mine office: Grove, Yale district, B. C. Andrew J. Crawford, president; M. T. Hidden retary; J. E. Bates, general manager. Organized 1901, under laws of B Columbia, with capitalization $15,000, shares 1 cent par.

Lands, 4 patented claims, area 200 acres, also 160 acres miscellaneous in the Aspen Grove district, showing 10 veins, of which 2, under develop give assays of 15% copper, 3 oz. silver and 80 cents gold per ton, fro bonate and sulphide ores, opened by a 155′ shaft and a 32′ tunnel, s show a considerable body of low grade ore. Idle several years.

PORTLAND (ROSSLAND) MINE, LTD. BRITISH COLU

Dead. Merged, 1904, in Velvet-Portland Mine, Ltd. Formerly at Ros Trail district, B. C.

PORT LINCOLN COPPER CO., LTD. AUSTR

Offices: 20 Copthall Ave., London, E. C., Eng., and 95 King Willia Adelaide, South Australia. Mine office: Reedy Creek, Robe Co., South tralia. Col. A. G. Pawle, chairman; G. F. B. Hancock, mine manager; R Orr, secretary. Organized July 13, 1906, under laws of Great Britain capitalization £350,000, shares £1 par.

Lands, 400 acres, freehold, on Tumby Bay, north of Port Lincoln, 35 northeast of Adelaide, and across Spencer Bay from Wallaroo. Pr known as the Kitticoola, Tungkillo or Reedy Creek mine, opened 1845, second oldest copper mine in South Australia, having 2 ore bodies, kno the north and south lodes, ranging up to 11′ width, and giving average of about 18% copper and 4 dwts. 6 grains gold per ton, from melaconite, and chalcopyrite. Main shaft, 115′. Has steam power.

SOCIEDAD MINERA PORVENIR DE COLLAHUASI. C

Office: Valparaiso, Chile. Mine office: Collahuasi, Tarapacá, Chil ganized Apr. 10, 1904, under laws of Chile, with capitalization 550,000 shares 100 pesos par.

PORVENIR DE SONORA CO. ME

Dead. Reorganized, 1902, as Coast Line Copper Co. Formerly Calera, Altar, Sonora, Mex.

SINDICATO MINERO DE POSCO.

Office: Iquique, Chile. Mine office: Posco, Camaná, Perú. Org *Dec. 9, 1905*, under laws of Chile, with capitalization £10,000, shares £1 p

AL GOLD, PLATINUM & COPPER MINING CO. **WYOMING.**
)ead. Formerly at Rambler, Carbon Co., Wyo. Fully described Vol. V.

'AL SAVINGS MINING & MILLING CO. **WYOMING.**
)ffice and mine: Centennial, Albany Co., Wyo. Capitalization $1,000,000, s $1 par. Richard F. Lawson, manager. Lands, 90 acres, in the Medicine range, including the old Centennial mine, which produced some gold.

)SI MINING CO., LTD. **IDAHO.**
Mine office: Silver City, Owyhee Co., Idaho. J. E. Masters, superintend- Has auriferous and argentiferous lead and copper ores, with electric r.

PAÑIA MINERA POTOSINA. **MEXICO.**
)ead. Formerly at Charcas, Moctezuma, San Luis Potosí, Mex.

PAÑIA MINERA POTRERILLOS. **CHILE.**

ERS GULCH DEVELOPMENT CO. **ARIZONA.**
Mine office: Globe, Gila Co., Ariz. Lands, on Pinto Creek, show a 6′ vein condary copper sulphides, with a paystreak giving average assays of about copper.

OCIACION MINERA DE POZOS. **MEXICO.**
Mine office: Pozos, Ciudad Porfirio Díaz, Guanajuato, Mex. Property in- s Santa Brigida y Anexas, Santa Lucia and La Argentina mines, produc- old, silver and copper, latter as a by-product. Has steam power.

)S MINING CO. **MEXICO.**
Mine office: Ahualulco, Jalisco, Mex. Kratz & Carroll, managers. Prop- has auriferous and argentiferous copper ores.

SSENOS COPPER CO. **ARIZONA, CALIFORNIA & MEXICO.**
Mine office: Casa Grande, Pima Co., Ariz. S. C. Palmer, president; C. E. , secretary; W. H. Birchfield, treasurer; B. S. Wilson, general manager; S. Wilson, mine superintendent. Organized under laws of South Dakota, capitalization $5,000,000, shares $1 par. Lands include a group of claims 30 miles south of Casa Grande, held under bond and lease, said to have ed $75,000 worth of silver-lead ore, under former management. Also holds ameron group, circa 11 miles southwest of Casa Grande, and has claims les south of Arizpe, Sonora, Mexico. Controls, through stock ownership, margosa Copper Co., which has lands in Inyo and San Bernardino counties,)rnia.

FT MINE. **GEORGIA.**
Mine office: Dahlonega, Lumpkin Co., Ga. Ores are cupriferous and erous pyrite, carrying up to 2% copper and $2 gold per ton. Presumably

MIER COPPER & ASBESTOS CO. **CAPE COLONY.**
Mine office: Prieska, Cape Colony. A. M. Reid, consulting engineer. Cap- ation £20,000; issued, £18,000. Lands, 14,000 morgen, or nearly 30,000 , known as the Schreuder group, apparently carrying mainly asbestos, g a continuation of the seam developed by the Cape Asbestos Co., Ltd.

MIER MINING, MILLING & LEASING CO. **NEW MEXICO.**
)ffice: care of J. H. K. Martin, secretary, Denver, Colo. Letter returned imed from former mine office, Pinos Altos, Grant Co., N. M. Alfred Mar- uperintendent. Property is the Copper Hill mine.

MIDENT COPPER & GOLD MINING CO. **MONTANA.**
)ffice: Butte, Mont. Mine office: Boulder, Jefferson Co., Mont. Dr. nand Grattan, president; *C. S. Shoemaker*, vice-president; Joseph Chauvin,

secretary; Walter Tallant, treasurer; Geo. Reeves, manager; preceding of Wm. Creedon and H. P. Bennett, directors. Organized circa August, under laws of Montana, with capitalization $1,200,000, shares $1 par.

Lands, 11 claims, 6 held outright and 5 under option, in the Big Foo trict, 14 miles southeast of Butte and 11 miles southwest of Boulder, s carry 1½ miles of a vein of 30′ to 60′ width. Development is by 80′ an shafts, 3,000′ apart. The 80′ shaft has ore giving average assays of abo copper, and the 210′ Roosevelt shaft is said to give ore assaying 2.5 to copper, 11 to 40 oz. silver and $2 to $10 gold per ton.

PRESIDENTIAL MINING CO. ARIZ

Mine office: Patagonia, Santa Cruz Co., Ariz. Lands, 6 claims, ci miles west of Patagonia, having 700′ of workings, showing argentiferous and copper ores. Employed 12 men, at last accounts.

PRESTON PEAK COPPER CO. CALIFOR

Dead. West Virginia charter forfeited 1902; lands sold, 1907, by s to Chas. F. Hickey, for $34,750.13. Formerly at Yreka, Siskiyou Co., Described Vol. V.

PRETORIA COPPER & TIN FIELDS, LTD. TRANSV

Office: P. O. Box 1223, Johannesburg, Transvaal. D. Symons, chair J. H. Munnik, manager; G. W. Morrison, secretary. Organized June 20, under laws of Transvaal, with capitalization £115,000, shares £1 par; i £103,333. Lands are the freehold farms Badfontein No. 600, Tweefontei 275 and Welgedacht No. 41, total area 10,683 acres. in the Pretoria dis also an option on the farm Elandsfontein No. 1782, area 10,882 acres, i Waterburg district, Transvaal. Operations are confined to prospecting, small scale.

PRICE COPPER MINE. COLOR

Office: 1313 Fillmore St., Topeka, Kans. Mine office: McCoy, Eagle Colo. Dr. J. C. McClintock, president; Chas. J. Price, vice-president; W Price, general manager; O. D. Mansfield, secretary and treasurer.

PRICKETT LAND CO. MICHI

Office: Marquette, Mich. Walter S. Prickett, chairman; J. E. Ball, s tary; Fred H. Begole, treasurer. Organized Sept. 18, 1905, under law Michigan, with capitalization $10,000, shares $10 par, fully issued. Has dividends, to Dec. 31, 1907, of $150,300. Lands are 3,694 acres of copper l in Keweenaw county, Michigan, including many old copper properties, acres of copper land in Ontonagon county, Michigan, and 520 acres of lands in Iron county, Michigan. Company sold circa 4,000 acres in Kewe county to the Keweenaw Copper Co., and has a large acreage of located mineral land on the Keweenawan trap range, carrying conside timber, with available millsites on both sides of Keweenaw Point, incl a good water frontage at the western end of Copper Harbor.

PRIDE MINING CO. COLOR

Dead. Formerly at Montezuma, Summit Co., Colo.

PRIDE OF ARIZONA COPPER CO. ARIZ

Dead. Was a swindle, promoted by Douglas, Lacey & Co. See Am mated Gold & Copper Co. Formerly in Yavapai county, Arizona.

PRIDE OF THE WEST MINING & MILLING CO. ARIZ

Office: 1801 Fifteenth St., Denver, Colo. Letter returned unclaimed former mine office, Washington, Santa Cruz Co., Ariz. Arthur R. Wilfley, P dent; Herbert E. Fiske, secretary. Organized May 1, 1901, under laws of rado, with capitalization $1,500,000, shares $10 par. Paid one dividend $15,000. Lands, circa 350 acres. Mine was opened 1870, reopened 1897, cl 1902, reopened circa 1906 and presumably closed 1907. Main shaft, about

re complex argentiferous copper, lead and zinc sulphides. Has a 200-ton
ntrator. Very fully described Vol. II.

SKA COPPER, LTD. **CAPE COLONY.**

ffice: Johannesburg, Transvaal. Mine office: Prieska, Cape Colony.
, 53,000 morgen, or upwards of 100,000 acres, including three farms,
n as the Prieska's Poort, Kalkgat and Dikklipspruit.

ST LAKE MINING CO. **IDAHO.**

ffice: Detroit, Mich. Mine office: Priest River, Bonner Co., Idaho.
LePage, secretary; C. George, treasurer. Development is by tunnel,
ed to cut the extension of the vein of the Idaho Continental, said to show
ssaying up to 16% copper.

A PRIMAVERA. **BRAZIL.**

Mine office: Cacapava, Rio Grande do Sul, Brazil. Lands, near the Santa
ara river, are in a mountainous district, showing Cambrian stratified beds
granite, having a nearly vertical vein variously reported as lying between
te and mica-schist and as between conglomerate and sandstone. Ores are
onates, silicates and chalcocite, mainly the latter, occurring disseminated
in small nodules, with average tenor of about 7% copper, with traces of
r, opened by a 100′ main shaft.

NCE ALFRED MINE. **AUSTRALIA.**

Mine office: Belton, South Australia. Produced, in first half of 1905, fine
er to amount of 78,400 lbs. Presumably idle.

NCE LYELL MINING CO., N. L. **TASMANIA.**

Office: 90 Queen St., Melbourne, Australia. Mine office: Gormanston,
tagu Co., Tasmania. G. A. Lawson, manager. Capitalization £100,000,
s £1 par. Lands, 25 acres, leasehold. Idle and apparently moribund.

NCE MINING & DEVELOPMENT CO., LTD. **BRITISH COLUMBIA.**

Office and mine: Revelstoke, West Kootenay district, B. C. J. T. Laing,
ident; J. A. Stone, vice-president; J. M. Scott, secretary, treasurer and
ager; C. J. Rumens, superintendent; preceding officers, Dr. C. Smyth, J. M.
racken and A. M. Smith, directors. Organized 1900, under laws of British
mbia, with capitalization $1,000,000, shares $1 par. Annual meeting, second
nesday in March.

Lands, 20 claims, area 800 acres, known as the Standard group, also a
ere millsite and 640 acres timber lands, giving total holdings of 1,920
, in the Standard basin, Big Bend district, circa 33 miles north of Revel-
. Country rocks are banded schist and diorite, carrying chalcopyrite and
ite, in a vein of 20′ width, with gangue of serpentine and argillaceous
, ore being estimated to carry average values of 6% copper, 2 oz. silver
$2 gold per ton. Development is by tunnels of 40′, 110′, 480′, 600′, 272′
720′, with circa 3,000′ of underground workings, estimated to show 150,000
of ore, with 100,000 tons blocked out for stoping. A good water power
ailable for mining and milling purposes. A tram-line and mill are needed.
erty considered promising.

NCESS ROYAL GOLD & COPPER MINING CO. **BRITISH COLUMBIA.**

Dead. Formerly on Princess Royal Island, B. C. Described Vol. VII.

NCETON COPPER MINING & SMELTING CO. **ARIZONA.**

Office: 171 Broadway, New York, N. Y. Mine office: Ft. Huachuca, Co
Co., Ariz. Henry Hamburg, president and general manager; Henry C.
ns, vice-president and treasurer; Herbert M. Kenner, secretary; preceding
rs, J. M. McConnell and L. de Vere Hamburg, directors; C. S. Wright,
tintendent. Organized 1901, under laws of South Dakota, with capitaliza
$2,500,000, shares $1 par.

Lands, 8 claims, well timbered, in Romney Cañon, Huachuca District, Hua
Mountains, opened by 4 shafts, deepest 70′, and by tunnels of 60′, 70′,

115′ and 250′, with a quarter-mile of underground workings, showing mal chalcocite and bornite, giving assays of 10% and up in copper, 10 to silver, and small gold values. Mine, discovered 1880, was worked 190 and work was resumed, circa 1907, after 2 years' idleness, caused by fi entanglements.

PRINCE WILLIAM COPPER CO. ALA

Office: 35 Wall St., New York, N. Y. Mine office: Valdez, Alaska. C. Nichols, president. Organized 1907, under laws of New Jersey, wit italization $500,000. Lands, 12 claims, area 240 acres, at tidewater, on K Island, having a vein claimed in press to be 260′ wide and to carr copper, which is a self-evident exaggeration. Vein is reported otherw be 40′ wide, carrying 5 to 9% copper, which is considered an overesti First smelter shipment, July, 1907, gave returns of 6.82% copper.

PRINCE WILLIAM SOUND AMALGAMATED COPPER CO. ALA

Letter returned unclaimed from former office, 1115 Stock Exchange cago, Ills. Mine office: Ellamar, Prince of Wales Island, Alaska. Wa to have been organized, circa 1907, by H. Curtis Elliott and associates, f purpose of operating the Ellamar and other properties in the Prince W Sound district. Idle and presumably moribund.

PRINCE WILLIAM SOUND MINING CO. ALA

Mine office: Valdez, Alaska. Lands, on Mummy Bay, Knights I have a 300′ tunnel, driving to intersect a shear-zone of about 40′ width, ing bands and scattered grains of chalcopyrite assaying up to 11.5% c and 1 oz. silver per ton.

PRODUCER MINING & SMELTING CO. ARIZ

Dead. Lands reverted to Frank Brownell, former owner. Formerly at Grande, Pinal Co., Ariz. Fully described Vol. VI.

PRODUCER GOLD & COPPER MINING & MILLING CO. WYOM

Mine office: Encampment, Carbon Co., Wyo. Capitalization $3,00 shares $1 par. Lands, 12 claims, on Copper Mountain, slightly developed. an air-compressor and a mill with 10 gravity stamps. Presumably idle.

COMPAÑIA MINERA PROMONTORIO. ME

Office and mine: Apartado 60, Durango, Durango, Mex. Maximiliano I general manager. Property is the Dulces Nombres mine, carrying large bo auriferous and slightly argentiferous copper ore. Has gas power and a mill, also a small matting furnace, employing circa 75 men, at last acco

PROMONTORIO CONSOLIDATED MINING CO. ME

Office and mine: Nogales, Magdalena, Sonora, Mex. Leopold Ep president; R. D. George, secretary. Lands, circa 30 miles south of N carry auriferous and argentiferous lead and copper sulphides. Was for about 12 years, by Mr. Ephraim, before formation of present co high grade ores being shipped to El Paso smelters and low grade ores a lated on dumps. Later developments have not come up to expectation concentrator planned was not built. Presumably idle.

PROMONTORIO MINING & SMELTING CO. ME

Dead. Formerly at Lampasos, Moctezuma, Sonora, Mex.

PRO PATRIA MINING & MILLING CO. COLO

Mine office: Rico, Dolores Co., Colo. W. J. Scoutt, superintende last accounts. Ores carry gold, silver, lead and copper. Has water and power and a 50-ton concentrator. Presumably idle.

PROSPER COPPER SYNDICATE. AUSTR

Mine office: Essington, N. S. W., Australia. Organized 1907, under of New South Wales, with capitalization £1,200, shares £12 par. Lands the Rockley district. Presumably idle.

SPER GOLD MINING CO. **NEW MEXICO.**
Mine office: Hillsboro, Sierra Co., N. M. Ores carry gold, silver and cop- Has steam power. Idle.

VIDENCE GOLD & COPPER CO. **CALIFORNIA.**
Office: 617 Homer Laughlin Bldg., Los Angeles, Cal. Mine office: Kelso, Bernardino Co., Cal. P. H. Mathews, president; W. E. Baxter, vice-presi- ; F. H. Messmore, auditor; preceding officers, C. M. Wood and Jas. H. ey, directors; C. J. Callahan, consulting engineer. Organized Nov, 2, 1901, r laws of Arizona, with capitalization $3,000,000, shares $1 par. Annual ting, first Monday in November.
Lands, 15 claims and 8 millsites, area 340 acres, patents applied for, in unorganized Arrow district, showing 15 fissure veins, carrying sulphide , assaying circa 1% copper and $4 to $1,000 gold per ton, with small silver es. Has several shafts, all under 100′, and an 800′ tunnel, with a total of t one-half mile of workings.

OVIDENCE MINING CO., LTD. **BRITISH COLUMBIA.**
Office: 525-204 Dearborn St., Chicago, Ills. Mine office: Greenwood, ndary district, B. C. Mark F. Madden, president; Dr. Frank Byrnes, vice- ident; M. S. Madden, secretary; John B. Heney, treasurer; P. J. Dermody, rintendent. Capitalization increased, January, 1907, from $200,000 to 00,000. Bonds, $50,000 authorized, at 6%. Paid dividends of $38,000, to of 1906.
Mine has a 600′ shaft, planned to be sunk to 1,000′, showing argentiferous auriferous copper sulphides, with principal values in gold, and has consid- le ore blocked out. Has a 10-drill air-compressor. Production, 1907, given 0 tons of ore, and, to end of 1907, had produced ore worth $400,000. Ap- tly paid in dividends money that should have been retained for develop-

VIDENCIA GOLD, SILVER & COPPER MINING CO. **ARIZONA.**
Dead. Formerly at Tucson, Pima Co., Ariz. Described Vol. VI.

VIDENCIA MINES CO. **MEXICO.**
Mine office: Cosalá, Sinaloa, Mex. E. A. Stent, manager, at last accounts. nized circa 1906, with capitalization $500,000, to operate the Campanillas . Presumably idle.

VINCIAL SMELTING & REFINING CO. **ONTARIO.**
Works office: Parry Sound, Ont. Early 1908 planned building a smelter.

DENTIAL COPPER MINING CO. **ARIZONA.**
Office: care of Shea Smith, president, 18 Custom House Pl., Chicago, Ills. r returned unclaimed from former mine office, Prescott, Yavapai Co., Idle and apparently moribund.

DENTIAL MINING CO. **CALIFORNIA.**
Office: care of H. S. Reed, manager, Medford, Ore. Mine office: Crescent Del Norte Co., Cal. Lands, near Shelly Creek, are slightly developed by and tunnel, showing 2 veins of 25′ to 30′ width, carrying slightly aurif- and argentiferous chalcopyrite, sphalerite and pyrrhotite. Idle several and apparently moribund.

DENTIAL MINING & DEVELOPMENT CO. **ARIZONA.**
Dead. Formerly at Nogales, Santa Cruz Co., Ariz.

IÉTÉ ANONYME FRANÇAISE DES MINES DE CUIVRE DE PRUNELLI (CORSE). **CORSICA.**
Office: 51 Rue Vivienne, Paris, France. Mine office: Marignana, Ajaccio, ica. Organized Dec. 29, 1906, under laws of France, with capitalization 0,000 francs, shares 100 francs par. Lands include the Argentella group, ying argentiferous *copper ores, associated* with sulphides.

PSYCHE MINING CO. OR

Dead. Formerly at Greenhorn, Baker Co., Ore. Described Vol. VII

PTARMIGAN MINES OF THE SELKIRKS. BRITISH COLU

Mine office: Wilmer, Northeast Kootenay, B. C. Thos. Starbird ager. Lands, at the head of McDonald Creek, an affluent of Horse Creek, show highly auriferous and argentiferous copper ores, with about of workings. Has steam and water power. Idle at last accounts, awaiting pletion of a projected railroad.

PUEBLO COPPER MINING & MILLING CO.

Letter returned unclaimed from former office and mine, Johnson, Ka Utah. T. G. McCarthy, president; John T. West, vice-president; R. Le ham, secretary; J. H. Means, treasurer. Organized circa December, 1907, laws of Utah, with capitalization $250,000, shares 25 cents par. La claims, in the Rock Spring district.

PUEBLO MINE. YU

Owned by Yukon Pueblo Mines.

PUERTECITO COPPER CO. ME

Mine office: La Cananea, Arizpe, Sonora, Mex. Succeeded the Copper Co. Assets consists of a lawsuit against Col. Wm. C. Greene.

PUGET SOUND COPPER MINES. BRITISH COLU

Mine office: Van Anda, Texada Island, B. C. Has a copper ore body heavy gossan capping of fair grade iron ore. Idle several years.

PUGET SOUND INVESTMENT CO. BRITISH COLU

Dead. Formerly at Van Anda, Texada Island, B. C.

PUGET SOUND IRON CO. BRITISH COLU

Mine office: Van Anda, Texada Island, B. C. W. H. Lee, superinte Has iron ore, also auriferous and argentiferous copper ore.

PUGET SOUND REDUCTION CO. WASHING

Works office: Everett, Snohomish Co., Wash. Is controlled, through ownership, by American Smelters Securities Co. Has three 30x180" furnaces, one running on copper ores, making a 50% matte, which is up to blister copper in a reverberatory furnace, and shipped east for el lytic refining. Also has an arsenic plant, formerly making about 5 to arsenic daily, from Monte Christo ores.

PUGWASH CONSOLIDATED MINING & SMELTING CO. NOVA SC

Dead. Formerly at Pugwash, Cumberland Co., N. S. Described Vo

PUGWASH RIVER COPPER CO. NOVA SC

Dead. Succeeded, circa 1904, by Pugwash Consolidated Mining & ing Co., also dead. Formerly at Pugwash, Cumberland Co., N. S. Des Vol. IV.

PULIDO MINING CO., LTD. PORTU

Office: 20 Bucklesbury, London, E. C., Eng Mine office: Beja, Ale Portugal. John Silva, chairman; F. E. Webb, secretary. Organized Au 1895, under laws of Great Britain, with capitalization £165,000, shares £ issued, £154,500. Lands, 32 copper and gold mining concessions, area acres. Idle since circa 1901.

COMPAÑIA DE MINAS y FUNDICIONES DE PÚQUIOS. C

Dead. Was succeeded by Compañía Minera de Púquois. Former Púquios, Rancagua, Atacama, Chile.

COMPAÑIA MINERA DE PÚQUIOS. CH

Office: Casilla 178, Valparaiso, Chile. Mine office: Púquios, Rare Atacama, Chile. Employs 60 men. E. J. J. H. Sandiford, chairman; F. H. Clelland, vice-chairman; H. S. Sydney-Merritt, secretary and treasurer ceding officers, J. C. Kenrick and Walter Squire, directors; Archibald S general manager; R. Benbow, mine superintendent. Organized Nov. 1,

laws of Chile, with capitalization £100,000, shares £1 par, as successor mpañía de Minas y Fundiciones de Púquios, and reorganized Jan. 8, 1906, laws of Chile, with capitalization £80,000, shares £1 par. Annual meet- fourth Saturday in February.

Lands, 44 claims, area 144 hectares, showing country rock of diorite, with t and west ore bodies, known as the Jefe, Repalon and Estaca lodes, inter- d at nearly right angles by the Verde, Sofia and Farellon lodes. The line nection between the Jefe and Verde lodes gives dykes of 30′ width. The and Jefe lodes are under development, latter, of circa 4′ average width, eable 2,500 meters, showing oxidized ores, bornite and chalcopyrite, giving mated average assays of 12% copper and up to 24 oz. silver per long ton, traces of gold. Development is by the old Farellon shaft of 693′, the Estaca shaft of 595′, the new Sofia shaft of 429′, also by the 610′ Sofia south nel, 612′ Jefe east tunnel and 500′ Jefe west tunnel, with a total of 3,140′ new workings, showing 3,000 long tons of ore, with 1,100 tons blocked out stoping.

The mine dates from 1862, and has been in the hands of various owners, was closed by two floods in the Sofia mine, caused by storm waters, and reason of the ore becoming base in the transition zone. Property was held rmerly by the Compañía Farellon de Púquios.

Equipment includes 2 hoists, good for 900′ each, and 2 Rand & Walker compressors. There are several buildings and ranchos, including administra- n building, hotel, office, store and foreman's dwellings. Ores are sent to ldera for reduction, by the Ferrocaril de Copiapó, connected with the mine a Bleichert aerial tram of 2 kilometers length, completed May, 1908. Fuel Australian coal, costing 55s. per long ton.

Production, 1907, was 104,000 lbs. fine copper, secured from 295 tons of extracted from development work only, giving returns of 14.7% copper. pany plans sinking the main Sofia shaft into the sulphide zone, opening 3 levels and building a new headgear and ore-bins. Property considered mising and management good.

RITAN COPPER & GOLD MINING CO. **NEW MEXICO.**

Dead. Was a swindle, promoted by Benj. F. Coburn, of Boston, who "guar- eed" 10% dividends for 5 years. Formerly at Tres Piedras, Taos Co., M. Described Vol. II.

MPAÑIA DE MINAS I FUNDICIONES DE PUTAENDO. **CHILE.**

Office: Santiago de Chile. Mine office: Putaendo, Aconcagua, Chile. anized Jan. 17, 1907, under laws of Chile, with capitalization 720,000 pesos, res 36,000 pesos par.

NE SMELTING CO. **CALIFORNIA.**

Letter returned unclaimed from former office, 26 First National Bank lg., San Francisco, Cal. Works office: West Alameda, Alameda Co., Cal. W. Pyne, manager. Works have a daily capacity of 100 tons. Idle since 3, having been closed by courts, on complaints that fumes injured vegeta- n, with small prospects of resumption.

RAMID COPPER CO. **UTAH.**

Mine office: La Sal, Grand Co., Utah. Organized 1902, under laws of ine, with capitalization $500,000. Lands, in the Sinbad Valley, have a nket vein between sandstone strata, carrying ore of about 3% copper tenor. mpany claims enough ore in sight to run a mill for 2 years. Has a 50-ton ching plant, using sulphuric acid made at the works from sulphide ores, med to effect an extraction of 98% of assay values, which is not believed. ed down, late 1907

AMID COPPER SYNDICATE, LTD. **BRITISH COLUMBIA.**

Dead. Dissolved *Aug. 8, 1905.* Formerly at Golden, East Kootenay, B. C.

PYRAMID GOLD & COPPER MINING CO. ARI

Dead. Formerly at Prescott, Yavapai Co., Ariz. Described Vols. V

PYRAMID PEAK MINING CO. NEW M

Dead. Lands sold, December, 1905, by sheriff. Formerly at Lor Grant Co., N. M.

PYRENEES COPPER MINES, LTD. FR

Dead. Dissolved, August, 1904. Formerly in the Basses Pyrenees,

PYRENEES MINERALS, LTD. FR

Office: 14 Great Winchester St., London, E. C., Eng. E. Glasse, ing director; H. Gulliver, secretary. Organized May 5, 1902, under Great Britain, with capitalization £150,000, shares £1 par; issued, Debentures, £60,000, at 6%. Lands, 1,818 acres, including the Alzen sil copper mines, in the department of Ariège, France. Has a 20-ton smelt last accounts was in litigation with former owners of the property.

"Q" COPPER SYNDICATE, LTD. AUST

Office: Worcester House, Walbrook, London, E. C., Eng. Mine Mackay, Queensland, Australia. T. W. Gilbert, secretary; G. Lloy mine manager; Edmund Lloyd-Owen, consulting engineer. Organize 29, 1905, under laws of Great Britain, with capitalization £10,000, cumulative 6% preference shares of £1 par, and 50,000 ordinary share par. Lands, 160 acres, leasehold, known as the Pine Vale and Ben Moh Presumably idle.

Q. S. GOLD MINING & SMELTING CO. WASHI

Office: 408 Empire State Bldg., Spokane, Wash. Mine office: ully, Okanogan Co., Wash. Col. Adelbert M. Dewey, president and manager; M. L. Bevis, vice-president; Carl L. Shuff, secretary; E. J. treasurer; L. K. Armstrong, consulting engineer. Organized 1897, und of Washington, with capitalization $2,000,000, shares $1 par.

Lands, 18 claims, also 60 acres of millsites and water-rights on Sin Creek, in the Salmon district, circa 12 miles south of Loomis. Propert diorite, with 6 fissure veins, carrying mainly low grade copper values pany claims an ore body more than 300′ wide and more than 4,500′ lon seems a serious overestimate as regards width. Development, begun by 2 tunnels, second started circa 1907, at base of the mountain, to at about 2,000′ estimated depth. The tunnel, at distance of 900′, is cut 50′ of ore, without proving the walls, carrying chalcopyrite, estim 2 to 4% copper tenor, with small and variable silver values and circa per ton. Ore is said, in the press, to average about $14 per ton in gross

Equipment includes a 200-h. p. hydro-electric power plant, takin from Sinlahekin Creek. Improvements include a sawmill and sever mine buildings.

The management claims to show more ore than the Granby, whic true, and of about double the average tenor of Granby ore, which is co something more than doubtful. Notwithstanding these exaggeratio company is to be commended for its steady continuance of work, whic well planned, and the property is considered promising.

QUANTOCK MINING & MILLING CO. MON

Mine office: Coloma, Powell Co., Mont. H. B. Salisbury, superint Has gold, silver and copper ores, with steam power, employing 12 men accounts.

QUARTZ KING MINING CO. ARI

Mine office: Parker, Yuma Co., Ariz. Capitalization $1,500,000, $1 par. Lands, circa 2,000 acres, 4 miles north of Parker, having 4 sh about 100′ depth each, and several tunnels, longest 125′. Employed men at last accounts.

EBEC COPPER CO., LTD. **BRITISH COLUMBIA.**

Dead. Formerly at Deadwood, Boundary district, B. C.

NA LA QUEBRADA. **VENEZUELA.**

Mine office: Aroa, Lara, Venezuela. Includes the principal mines of the ebrada or Aroa district of Venezuela, which have produced about 60,000 s of fine copper. Lands, 67 miles west of Puerto Cabello, include the muragua mine, having a vein of carbonate ore 1' to 5' wide; the Titiara ne, with vein 2' to 25' wide; the San Antonio mine, with vein of 3' to 18', d the Quebrada mine, with a vein 50' to 75' wide, 2,000' long and of unown depth, from which oxide and carbonate ore have been mined in the eration zone, leaving a large body of sulphide ore, averaging possibly 4 6% copper, in the lower workings. Was operated extensively, 1881-1894, oducing 271,770 long tons copper ore, valued at about £1,250,000. Idle since 94, and likely to remain so until Venezuela enjoys more settled political nditions, and better treatment is accorded foreign owners of mining conssions.

UEEN BEE COPPER MINING CO.

Dead. Formerly had an office at 220 Broadway, New York, N. Y. Locaon of lands, if any, unknown.

UEEN BEE COPPER MINING CO., N. L. **AUSTRALIA.**

Mine office: Wrightsville, Robinson Co., N. S. W., Australia. T. E. rquhar, chairman; preceding officer, J. R. Ratcliff and G. D. Elliott, direcrs. Lands are in the Bee Mountains, about 11 miles southeast of Cobar. ine has a 500' main shaft, showing ore assaying up to 45% copper, with fair old and silver values, and, on the 4th level has a vein of circa 20' width, eraging about 7% copper. Has steam power and an air-compressor. Smelter as 4 reverberatory furnaces and a small water-jacket blast-furnace, and mpany plans installation of larger blast-furnace. Ore smelted, last half of 07, gave average extraction of 7.75% copper. Production, 1907, was 1,104,320 s. fine copper. Employs circa 200 men.

UEEN BEE MINING & MILLING CO. **WYOMING.**

Dead. Was succeeded, June, 1902, by Wyoming Queen Mining Co. Forerly at Jelm, Albany Co., Wyo.

UEEN COPPER MINING CO. **ARIZONA.**

Office: Globe, Ariz. Mine office: Superior, Pinal Co., Ariz. W. D. Fisk, resident; J. H. Thompson, vice-president; Joseph W. Bandhauer, secretary nd superintendent; Richard Fleming, treasurer. Organized 1906, under laws f Arizona, with capitalization $5,000,000, shares $1 par. Property is the old ilver Queen mine, near the Lake Superior & Arizona, opened circa 1880, and orked some years for silver. Mine, opened to depth of 300', has extensive d workings, showing, on the 300' level, an 18" paystreak of chalcocite and to 4' of malachite assaying up to 40% copper, chalcocite carrying up to 310 z. silver per ton. Has steam power. Property considered promising.

UEEN & CRESCENT COPPER CO. **IDAHO.**

Dead. Was merged, circa 1908, in Copper Queen Mining & Smelting Co., areholders receiving one share new stock for 8 shares of old. Formerly at pper Queen, Lemhi Co., Idaho.

UEEN GOLD & COPPER MINING & SMELTING CO. **OREGON.**

Office: 1345 Pierce St., San Francisco, Cal. Mine office: Wonder, Jophine Co., Ore. W. H. Ramsey, president; B. M. Cahill, vice-president; John wson, secretary; W. A. McElroy, treasurer. Organized under laws of Oren, with capitalization $1,000,000, shares $1 par.

UEEN LYELL MINING CO., N. L. **TASMANIA.**

Office: 90 Queen St., Melbourne, Australia. Mine office: Germanston, ntagu Co., Tasmania. G. A. Lawson, manager. Capitalization £100,000,

shares £1 par. Lands, sundry leasehold claims, in the Mount Lyell field. Idle and presumably moribund.

QUEEN MINING & MILLING CO. NEW MEXICO.

Office: Galveston, Tex. Mine office: Cooney, Socorro Co., N. M. H. A. Griffin, secretary. Organized under laws of Texas. Lands, 5 claims, known as the Copper Queen group, showing good bodies of low grade gold-silver-copper ores, developed by about 3,000′ of underground workings. Has steam power and a 15-stamp pan-amalgamation mill. Idle.

QUEEN OF ARIZONA COPPER CO. ARIZONA.

Dead. Merged, circa 1902, in Great Belcher of Arizona Co. Formerly at Providence, Yavapai Co., Ariz. Described Vol. III.

QUEEN PRINCESS COPPER CO. COLORADO.

Mine office: Copperfield, Frémont Co., Colo. John R. Stephen, president; Edward S. Halter, secretary; Edward Baugh, treasurer. Capitalization $3,000,000, shares $1 par. Lands, 14 claims, area 147 acres, in the Red Gulch district, 9 miles north of Cotopaxi. Property has a main ore body said to average 2.5% copper, and has secured assays of 40 to 60% in tenor, and company claims that trial shipments returned 17% copper. Main vein is claimed to be 300′ wide, which is doubtful. Development is by a 135′ shaft. Equipment includes steam power and a hoist.

QUEEN REGENT COPPER & GOLD CO. NEVADA.

Office: 368 Bush St., San Francisco, Cal. Letter returned unclaimed from former mine office, Fairview, Churchill Co., Nev. J. E. Kerr, manager. Organized 1907, under laws of Arizona, with capitalization $2,000,000. Lands, 14 claims, 14 miles south of Fairview, on the southern side of Copper Mountain, known as the Copper King group, claimed to have a hematite gossan of 50′ to 100′ width, and claimed to show, in a trench, native copper of 12% tenor, with gold and silver values aggregating $42 per ton, which seems an unusual, if not impossible, combination. Has a 100′ tunnel, cutting a 4′ vein and planned to cut 5 additional veins in length of about 500′.

QUEENSLAND COPPER CO., LTD. QUEENSLAND.

Office: 6 Princes St., London, E. C., Eng. Mine office: Mount Perry, Bowen Co., Queensland, Australia. Employs 337 men. Geo. Grinnell-Miles, chairman; J. G. Tait, secretary; S. T. Williams, mine manager; Sydney H. Fulbrook, superintendent; J. S. MacArthur, consulting engineer. Organized Feb. 1, 1898, under laws of Great Britain, with capitalization £500,000, shares £1 par, in £250,000 cumulative 6% preference shares and £250,000 ordinary shares. After payment of 6% on ordinary shares, in any year, remaining profits are divisible equally between preference and ordinary shares. Last dividend, 1903, on ordinary shares, was 6%. For fiscal years ending July 31, profits have been as follows: £12,756 2s. 11d. in 1905; £28,893, with dividends of £12,810, in 1906; £36,143, with dividends of £19,486, in 1907.

Lands include 1,650 acres bought of the Mount Perry Copper Co., also the Normanby mine, near Mount Perry, taken over June, 1905, under 2 years option, and bought, 1907, for £12,000. Miscellaneous holdings include the Reed's Creek, Great Freehold and New Moonta mines, and company also bought the lands of the Burnett (Queensland) Exploration Co., Ltd. The 3 principal mines of the company have 15 shafts, of 120′ to 800′ depth, and the company also works various mines in the Wolca and Boolboonda districts. The combined area of the Mount Perry and Reed's Creek mines is 650 acres, freehold.

The Mount Perry mine has fissure veins traversing granite, the main vein, of about 12′ average width, having a paystreak 6″ to 8″ wide in the upper levels and 10″ in the lower levels, carrying an average of circa 16% copper. The mine formerly was opened by 3 shafts, poorly located and inadequate,

ave been replaced by new shafts. The ground is growing harder with

e Kennedy shaft, 1,020′ deep, with bottom level at 1,000′, shows a vein of ore of fair copper tenor, opened by crosscut. About two-thirds production, 1906, was from the Kennedy shaft.

e Milne shaft, planned to cut the lode at circa 1,000′ depth, early 1909, een the Kennedy and Southern shafts, and is planned to replace the y as the main working shaft of the mine. The Milne shaft is vertical, ll obviate considerable crosscutting and long trams.

e Southern shaft probably will be abandoned, and the ground tributary developed from the new Milne shaft.

e Palmer shaft is a considerable producer, showing good ore, and has hoisting plant, installed 1906.

e Reed's Creek mine has a fissure vein in granite, similar to that of . Perry, and is extensively developed, but the shafts are small and located for modern mining requirements.

e Normanby mine, 240 acres, freehold, on the other side of the moun- om the Mount Perry, formerly held under option, is now owned outright. ormanby shows a vein paralleling the Mount Perry, with ore of a similar averaging circa 13% copper and 10 to 15 dwts. gold per ton. The haft, on the southern part of the property, 352′ deep, is in a vein of 12″ average width, carrying ore averaging circa 12% copper, 6 oz. silver dwts. gold per long ton. The Normanby mine was producing about 400 ore monthly, at end of 1907.

e Great Freehold mine, area 811 acres, has a nearly vertical fissure vein, uite, averaging 5′ width, with an 18″ paystreak carrying chalcopyrite ing circa 14% copper, with fair gold and silver values, developed by a ain shaft. Apparently this mine is idle.

addition to the mines of the Mt. Perry district, the company holds eenback, Potosi and Wolca mines, in the Wolca district, northeast of rry, and the New Moonta, Edena and Boolboonda mines, in the Bool- district, northeast of the Wolca district. The veins of these latter ies are narrow, but persistent, and carry high-grade auriferous and ferous copper ores.

e New Moonta mine, at Boolboonda, 12 miles northeast of Mount is a new mine having a 121′ shaft, from which circa 2,000 long tons of rade ore were extracted, 1905, and gives promise of holding good ore to depth.

e smelter, at Mount Perry, built 1902, has 40-ton and 90-ton water- blast-furnaces, and a reverberatory furnace, with a 120′ smokestack. nelter is connected with the principal mines by a tram-line, and does smelting.

oduction, for fiscal years, has been as follows: 10,388 long tons of out 25% of which was custom ore, yielding 2,952,32[illegible] lbs. fine copper, oz. silver and 2,655 oz. gold in 1[illegible]; 3,857,2[illegible] lbs. fine copper, 9,[illegible] and 2,201 oz. gold in 1[illegible]; 4,575,6[illegible] lbs. fine copper, 195,701 oz. silver 341 oz. gold, from 17,944 long [illegible] smelted in 1907, showing an e extraction of about 11.4% copper from all ores treated, including ores. Costs, 1907, were £[illegible] per long ton of copper, at the [illegible]e.

e company's properties have proven somewhat disappointing as a possibly because the lodes originally [illegible] et understanding of the circumstances, [illegible] ed vigorous development work during the era of high prices became

was not caught unprepared by the slump of 1907. Property considered va ble and management good.

QUEENSLAND COPPER FREEHOLDS, LTD. AUSTRALI

Office: 2 Broad St. Place, London, E. C., Eng. Mine office: Clonc Beaconsfield Co., Queensland, Australia. T. G. Scott, chairman; Alex Hill Stewart, consulting and managing engineers; C. D. Comrie, secretary. Org ized Jan. 31, 1907, under laws of Great Britain, with capitalization £300, shares £1 par; issued, £250,000. Owns a third interest in the Mountain Ho Copper Co., Ltd. Lands, 378 acres, freehold, circa 90 miles north of Clonc in 8 groups, including the Malbon and Argylla, former having a 25′ shaft sh ing cuprite, azurite, malachite and chalcocite. Presumably idle.

QUEENSLAND MINES EXPLORATION CO. AUSTRALI

Dead. Formerly at Mt. Perry, Bowen Co., Queensland, Australia.

QUEENSLAND SMELTING CO., LTD. AUSTRALI

Office: Dashwood House, London, E. C., Eng. Works office: Alder Cook Co., Queensland, Australia. Chas. Poston, chairman; Jas. Lewis, sec tary; T. Rowe and E. P. Landon, trustees for debenture holders. Organ Jan. 3, 1899, under laws of Great Britain, as reconstruction of a company same name organized 1888, with capitalization £50,000, in £30,000 cumulati 5% preference shares and £20,000 ordinary shares; issued, £38,630. Deb tures, £65,000 authorized, £43,800 issued, in £100 bonds, at 5%. Paid a 5 dividend, on preference shares, 1903. Last published accounts, 1904, sho profits of £3,105. Property is 1,168 acres, freehold, with a smelting p having furnaces for reduction of copper, gold, silver and lead ores.

QUEEN VICTORIA MINE. BRITISH COLUMBI

Letter returned unclaimed from former mine office, Nelson, Kootenay di trict, B. C. Lands, at Beasley Siding, 7 miles from Nelson, show a big bl of ore, claimed to be 300′ wide and 400′ long, with rhyolite walls, carryi copper ore of low average tenor, with small silver and gold values, and a li nickel. Mine, worked opencast, is estimated to have 200,000 tons of ore sight, said to assay 5 to 7% copper, but probably averaging 2 to 4% copp and 1 oz. silver per ton, with small gold values. Has a tramway and c connection, and made, 1907, considerable shipments to the Trail smelter. Is property of considerable promise, owing to immense size of ore body, thou low in copper tenor.

COMPAÑIA EXPLOTADORA DE LA MINA DE COBRE QUILILLA. MEXICO

Office: Scranton, Pa. Mine office: Ameca, Jalisco, Mex. Chas. S. We ton, president; John W. Fowler, secretary and treasurer; Independence Gro general manager; Felix Orozco, superintendent. Lands, 50 pertenencias, are 123 acres, showing 2 fissure veins in porphyry, of which one, of 4′ to 6′ averag width has 5 shafts, of 40′ to 190′, and 5 tunnels, longest 460′, with abo 1,500′ of workings. Ores give average assays of about 9% copper, 10 to 25 o silver and $3 gold per ton.

QUINCY & ARIZONA DEVELOPMENT CO. ARIZONA

Dead. Formerly at Bisbee, Cochise Co., Ariz. Described Vol. IV.

QUINCY MINING CO. MICHIGAN

Office: 1000-32 Broadway, New York, N. Y. Mine and works offic Hancock, Houghton Co., Mich. Employs circa 1,800 men. Wm. R. Tod president; Walter P. Bliss, vice-president; preceding officers, Cleveland H Dodge, Jas. L. Bishop, Chas. J. Devereaux, Isaac H. Meserve, Daniel T Brigham, Wm. M. Belcher and Otto Kirchner, directors; W. A. O. Paul, secre tary and treasurer; Chas. L. Lawton, superintendent; Jas. W. Shields, a superintendent; Alex Laist, smelter superintendent; Thos. Whittle, ch

ain; Chas. K. Hitchcock, engineer; M. J. McLain, clerk; E. R. tant clerk; H. M. Tompkins, smelter clerk.

ed March 30, 1848, under special charter from the state of Mich- capitalization $500,000, for a period of 30 years; renicorporated, 78, under laws of Michigan for a second period of 30 years, with n $1,000,000, shares $25 par, increased later to $1,250,000, and ased, Apr. 16, 1897, to $2,500,000; reincorporated, 1908, under laws n, for a third term of 30 years, with capitalization $3,750,000; 50,000. Old Colony Trust Co., Boston, transfer agent. Shares are e Boston stock exchange.

incy paid its first dividend in 1862, and profits have been disbursed lders in every succeeding year, except 1866 and 1867, giving the continuous dividend record of more than 40 years, from 1868, t the oldest dividend paying American copper mine, and, among mines of the world, the second oldest dividend payer, being pre- by the Tharsis Sulphur & Copper Co., Ltd., which has a record of dividends since 1867, or one year longer than the Quincy's record. idends, by years, have been as follows: $550,000 in 1903; $500,000 600,000 in 1905; $1,250,000 in 1906; $1,350,000 in 1907; $495,000 Dividends for 1908 were $1.50 for the first quarter, and $1 each for remaining quarters of the year. The new stock issue, of 10,000 s sold to stockholders, at $70 per share. The company has paid ends, to end of 1908, of $18,450,000.

llowing table shows statistics of production, costs, etc., 1864-1905:

	Product. Pounds.	Yield fine copper per fathom broken. Pounds.	Price obtained. Cents.	Cost per pound exclusive of construction. Cents.	Number of miners.	Average monthly contract wages.

Lands are very extensive, the Quincy, by virtue of recent purcha owning the Pewabic lode, and a number of parallel cupriferous beds, f Hancock mine, on the northern shore of Portage Lake, to the Frankli mine, or about half way from Hancock to Calumet. The holdings Quincy now include lands formerly held by the Quincy, Pewabic, F Mesnard, Pontiac and St. Mary's companies, in order named, from s north.

The Quincy mine is opened on the Pewabic amygdaloidal bed, h strike of circa N. 30° E., with an average dip of 52° to 54° at surfac dip of approximately 37° 30′ at a depth of more than one mile, in th workings, the shafts following the pitch of the lode, on catenary curv bed averages about 20′ width, in the upper workings, but is materia rower at the bottom, with decreased copper values, the rock showi little heavy copper in the lower stopes, but being more uniform in va above. The Pewabic lode has an extreme width of 40′, at various poi is only 10′ to 15′ wide in the upper workings of the Mesnard shaft. Ninth Decade of the Nineteenth Century about 40% of the producti heavy copper, but this decreased to 9% in 1905. In the upper levels masses of native copper were found frequently, these ranging up to 3 in weight. Practically the entire bed is now mined, walls being stro requiring little timbering. Dry-walls are built of waste rock, in wide saving the cost of hoisting and the expense of extra timbering. Fi have been installed, and every precaution is taken against fire. Min carried to and from their work in man-cars holding 30 men, and h cables are inspected frequently, with every care taken to prevent ac Shafts are sunk mainly in the footwall, obviating the necessity of large quantities of payable stamp-rock in pillars. The southernmost dr the Quincy are under the city of Hancock, and about 3,000′ below mean datum of Portage Lake, while the northernmost workings, at No. 9 are fully two miles from the southern breasts.

In addition to the Pewabic amygdaloid, there is a footwall branch, as the Pewabic East Lode, underlying and paralleling the main bed, occasionally yields good returns. The mine was opened, 1848, on the amygdaloid, a parallel bed lying some distance west of the Pewabi which was abandoned, 1856, when the Pewabic was opened. The so West Lode, circa 300′ west of the Pewabic bed, has been opened from Nos. 4 and 7 by cross-cuts on the 30th, 39th, 40th, 44th and 49th level considerable stamp-rock has been extracted therefrom. About 150′ w the West Lode is another amygdaloidal bed, averaging 40′ in width carrying more or less copper, which possibly may prove workable at

ine. About 1,000′ west of the Pewabic bed is the Hancock amygdaloid, narrow, but fairly mineralized, and yielded an average of 21 lbs. fine per ton of rock stamped, when worked in the old Hancock mine, which ially above the present average return from the old Pewabic lode.

Quincy has been troubled greatly by air-blasts, these being violent nces brought about by the settling of superincumbent rock in the of miles of worked-out openings, causing violent compression of the where throughout the mine, giving considerable trouble and occasional life. The most serious disturbances from air-blasts, which practically ificial earthquakes, of local scope, felt for only a few miles distance urface, were experienced in February, 1906, and there seems reason to at these troubles will prove intermittently continuous for the balance mine's history, but there was less trouble from air-blasts during 1908 or several years previously.

he mine has compressor capacity for 260 power drills and operates about achines, in sinking, drifting and stoping, and the diamond drill is used ively in exploratory work. The mine has total hoisting and rockhouse ty for the production of 5,000 tons of stamp-rock daily.

lectric underground traction is in extensive use throughout the mine. lant was installed by the General Electric Co., tram-lines averaging about each in length, with gradients of 1.5% towards the shafts. The equip- includes 20 electric locomotives, each weighing 5,500 lbs., standing 3′ y 43″ wide and 9′ long, with draw-bar pull of 700 lbs. on a level track, hauling 4 or 5 three-ton rock-cars, at a speed of 6 to 8 miles per hour, an caring for each train. The haulage plant will be extended to No. 8 on the 49th level, from end to end of the mine. The underground trac- ower plant is on the 57th level of No. 2 shaft, having a 100-kw. direct t motor operating the haulage system. Tram-cars are unloaded into storage bins, built on the hanging-wall side of the shafts, there being ins on 2 levels of No. 2 shaft, 4 levels of No. 6 shaft and 7 levels of No. t. This system of storage obviates the loss of time by either the tram- r skips, and adds at least 25% to the hoisting capacity of the mine.

wing to the absorption of adjoining mines, from time to time, the Quincy are numbered irregularly, and are described hereinafter in order of ence from south to north, rather than in order by number.

o. 7 shaft, the southernmost, planned and sunk by Mr. John L. Harris, 62′ deep. This shaft is sunk on a catenary curve, leaving surface at an of 53°, and being bottomed at an angle of 37° 30′. The shaft was sunk , in 18 months, through very refractory rock, this speed being rendered ble by sinking and raising in 5 sections, simultaneously. This shaft ates 30 drills, and has a productive capacity of 1,800 tons daily, as com- d with a former capacity of about 1,000 tons.

The equipment of No. 7 shaft includes a steel shaft-rockhouse, 100′ high, large wings, which was remodeled, 1907, and nearly doubled in capacity, g given 750-ton bins. The rockhouse has a steam-hammer and two 24x36″ hers, latter replacing 5 smaller crushers. In 1904 this rockhouse required men for its operation, the force being reduced, 1905, by remodeling, to 16 , while after the changes of 1907, five men can handle 1,800 tons of rock ′, where 28 men were needed, five years previously, to handle less than this tonnage. It is this sort of progress that keeps the Quincy vigorous successful in its seventh decade of active production.

Equipment of No. 7 shaft includes an 8,000-h. p. Allis-Chalmers Corliss with 52x84″ cylinders and winding drums 28′ in diameter by 11′ 9″ carrying 8,000′ of 1½″ steel cable, the main shaft weighing 120,000 lbs. hoist can raise 6-ton skips, from a depth of 1½ miles, at a speed of 3,000′

per minute, hoisting being limited to this rate by an automatic cutoff, which also prevents overwinding. Starting a load of 6 tons from a depth of more than a mile, the hoist, if untouched, will check, without damage, after raising the skip a few feet higher than the appointed place in the shafthouse. There also is a 1,300-gallon bailer. The engine-house at No. 7 shaft is 58x94', with a 56x92' boiler-house adjoining, both of stone, with steel truss roofs, and there is a second boiler-house, each having eight 100-h. p. Roberts tubular return horizontal boilers.

No. 4 shaft, 860' next north of No. 7, is 4,186' deep, bottomed on the 51st level. The stoping ground tributary to No. 4 being nearly exhausted, and as a new hoist would be required for greater depth, the lower stretches of ground are reached from No. 7 shaft, by electric tram. Previous to abandoning No. 4, a more systematic search was made of the West Lode, which was successful, to the point of opening several years' reserves of stoping ground of fair tenor, though below the average grade of the Pewabic lode. Surface equipment at No. 4 shaft includes air-compressors of 40 drills aggregate capacity.

No. 2 shaft, 585' next north of No. 4, is 5,500' deep, being, except Quincy No. 6, the deepest in the Lake Superior district, outside of the Calumet & Hecla and Tamarack mines. This shaft operates 40 power drills and has a 1,300-gallon bailer for raising water.

No. 2 shaft has a new shaft-rockhouse, 160' high, of steel and reinforced concrete, built, 1908, by the American Bridge Co. Stamp-rock from the shaft is dumped onto grizzlies, with wide bars, smaller material falling into circular bins, whence it passes by gravity to the crushers and thence into the main rockhouse bin, which is circular, built of steel plates. The smaller mass copper passes through the grizzly-bars, and is picked out by workmen and dropped into a chute carrying it to a steam-hammer, there also being a chute for waste-rock. The grizzlies allow large pieces of rock to fall into a bin of reinforced concrete in front of the steam-hammer, where broken and sent to the main rockhouse bin through a chute, while mass copper from the steam-hammer is dropped into a tube of steel leading to a circular steel bin, with bottom of steel rails reinforced by concrete, which loads into railroad cars, through chutes with gates operated pneumatically.

No. 2 shaft has a special crushing plant for waste-rock, between the collar of the shaft and the rockhouse. Poor rock is dumped into a circular bin, and drawn by gravity to a crusher, going thence to circular storage-bins, from which it is drawn off into wagons or railroad cars, for use in railroad ballasting, road building and concrete work. When required, larger masses of rock are selected and stored for masonry work.

The surface equipment at No. 2 shaft is very heavy, being practically a duplicate of that at No. 7, including a powerful hoist. The 53x69' compressor house, of stone and steel, with fire-proof truss roof, houses two 60-drill cross-compound 2-stage condensing right and left hand Corliss air-compressors, so connected that air therefrom is available in any part of the mine, the cross-connection eliminating danger of inadequate air supply through disabling of either section. Steam from the compressor-plant exhausts into a dam built for the purpose. The boiler-house has 5 Hawley down-draft furnaces.

No. 6 shaft, 1,928' north of No. 2, is only 200' south of the Franklin line. This shaft has a 1,300-gallon bailer and operates 40 power drills. The shaft was 5,500' deep June, 1908, and production was somewhat decreased by No. 8 shaft taking considerable ground under the Franklin mine, previously tributary to No. 6. Equipment includes an Allis-Chalmers duplex hoist, with 22' 6" straight-face drum, raising 8-ton skips. There is a 100-drill 2-stage compound air-compressor, and a centrifugal feed-water heater, attached to

linder of the duplex hoist. The boiler-house, 56x75', has four 250-h. p. s water-tube vertical boilers and nine 100-h. p. locomotive firebox boilers, powerful fire-pump.

he Franklin mine lies next north of No. 6. The Quincy bought the old lin mine, area 160 acres, for $170,000, taking possession December, 1908, ranklin being closed down as soon as taken over by the Quincy. It is ain whether the old shafts of the Franklin will be used by the Quincy. o. 3 Franklin shaft is 3,200' deep, bottomed at the Quincy line, and has scram for some years.

lo. 5 Franklin shaft, 2,850' deep, also is bottomed at the Quincy line. stopes have been opened on the West Lode from this shaft.

lo. 8 shaft, also known as the Mesnard, is 4,168' north of No. 6, and is deep, the 24th level of No. 8 corresponding to the 42d level of No. 6. anent production was begun circa April, 1907, No. 8 operating 50 drills eing one of the largest producers of the mine. No. 8 shaft showed poorly e upper levels, but the lower workings, while by no means up to the y average of twenty years ago, in either quantity or quality of ore oped, show a wider and better mineralized lode than above, and the d is of very satisfactory average, the improvement beginning with the level and being marked below the 20th level, and the average of No. 8 arly or quite up to the present average of the old Quincy and Pewabic ings. The best ground apparently is shown to the southward, though ovement was noted, 1908, in the northern drifts, toward the Pontiac dary. Levels in No. 8 are opened, uniformly, at 135' intervals, and con- ion was secured July 15, 1906, between the 24th level of No. 8 and the level of No. 6, at a depth of 3,354', this level passing underneath the e workings of the old Franklin mine. The productive capacity of No. 8 is fully 1,000 tons daily.

The shaft-rockhouse at No. 8, of frame and structural steel, is 41x155' on ground and 150' high. Stamp-rock is dumped from the skips, as hoisted, grizzlies of 2" steel bars, placed 2" apart, at an angle of 45° in an upper n, with a lower section at 20° only, in which bars are 12" apart from r to center, the combination grizzly assorting rock automatically into grades, the fine stuff going to ore-bins and the coarse falling into two s, receiving equal portion, which feed direct to two rock-crushers on the below, no shoveling being required. The heavy rock, too large to pass 0" aperture in the lower section of the grizzly, falls to the floor, and is n by a trip-hammer. The new grizzlies save one-half on rock-house labor, greatly lighten the work of the remaining employes.

The power plant at No. 8, of structural steel and brick, is 140x162' in with a 9' basement under the engine room. Hoisting is by a Nordberg 2" duplex-cylinder engine, with double-conical drum of 12' 6" minimum 18' 6" maximum diameter, good for 6,000' depth. In a wing, built 1907, he south side of the power-house, is a 65-drill Nordberg 2-stage cross- ound air-compressor. The boiler room has ten 250-h. p. Parker and Burt rs, with steel and brick coal-bins that have direct rail connection over stle, and a 140' reinforced concrete smokestack, standing on a 16' base. pment at No. 8 shaft includes a change-house, with concrete walls and and a considerable number of dwellings for employes.

No. 9 shaft, 2,600' north of No. 8, is the old 100' Pontiac shaft, cut down compartment size, and was about 200' deep at the end of 1908, giving a ising showing at this shallow depth. The Pontiac tract never was a ucer, and has been but slightly explored.

The Quincy bought of the Arcadian, Nov. 19, 1906, for $750,000, a tract 00 acres, to the north of the Pontiac tract, carrying about one mile of

the Pewabic lode. These lands, formerly held by St. Mary's Mining Co., before bought by the Arcadian, are the N. ½ of Section 18, T. 55 N., R. 33 W., and the N. ½ and SE. ¼ of Section 13, T. 55 N., R. 34 W.

The surface plant of the Quincy is exceptionally complete. Near No. 2 shaft is the 62x145′ fireproof machine-shop, of stone, brick and steel, with truss roof, having a traveling crane with crane-run for entire length of shop, with a complete equipment of machinery and tools. A plastered brick tunnel, connecting the machine-shop, compressor plant and boiler-house, serves as a conduit for steam and air pipes. The blacksmith-shop is 50x154′, with a 50x90′ wing, of ashlar-finished redstone, with fireproof steel truss roof having 3 large ventilators, and is equipped with 12 forges, steam-hammer, fans, bolt cutters, drills, etc. Steam has been replaced by electric motors in the carpenter shop, smithy and roundhouse.

Miscellaneous buildings at the mine include a carpenter-shop, warehouse and a considerable number of miscellaneous structures required in the operation of an extensive mine. The general office is a handsome and substantial two-story and basement structure of ashlar-finished redstone.

Water for boilers, and for potable use at the mine location, is taken from Portage Lake, the pumping station, on the margin of the lake, being of ashlar-finished redstone, the pumps forcing water for a mile, against a head of 640′. A large coal-yard is located between shafts No. 2 and 4.

A private telephone exchange, with the central station in a 20x25′ frame building, has a switchboard for 100 instruments, with telephones installed in all parts of the mine, shops, mills and smelters.

The company owns several hundred dwellings at the mine location, and a considerable number of dwellings at the mills. The newer houses are mainly of 7-room size, on solid stone foundations, and the mine and mill locations are exceptionally neat. The company also has extensive holdings of valuable land, in and adjoining the city of Hancock, and portions of this land have been platted, from time to time, for residence purposes, and sold at good prices.

The company's private rail line, known as the Quincy & Torch Lake Railroad, built 1890, is 6 miles long, touching all of the shafts and shops at the mine, and at the boiler-house, wharves and coal-sheds at the mill, and is connected with the Mineral Range, Hancock & Calumet and Copper Range railroads. The rail line has solid rock ballasting and steel bridges, with a continuous down-grade haul between the mine and the mill. Equipment includes 6 locomotives, freight cars and nearly 150 hopper-cars for rock, the latter having automatic couplers and air-brakes. The roundhouse, near No. 7 shaft, has a 36x40′ addition containing a special machine shop, for the use of the railroad only.

The mills, 6 miles from the mine, at Mason, on Torch Lake, have a combined stamping capacity of about 4,500 tons daily. No. 1 mill, of wood, has 5 Allis-Chalmers 2-way stamps, with 20″ cylinders, using the coarse-stamping system, but 2 heads were given 24″ cylinders in 1908, with work begun on a third head. The heads with 24″ pistons take steam at 100 lbs. pressure, and it is probable that all the remaining stamps will be changed over to cylinders of 24″ size, credit for which is due Mr. Jas. W. Shields, the mill superintendent. On test, one 24″ head stamped 865 tons of rock in 24 hours, oversize being handled in another head, equivalent to handling oversize in rolls, as is done generally in the case of compound stamps. The heads with 24″ pistons have an average daily working capacity of 700 tons, occasionally reaching 800 tons, which compares favorably with the work of steeple-compound stamps. Dressing machinery at No. 1 mill includes 92 Hodge jigs and 32 Wilfley tables.

No. 2 mill, standing 630′ north of No. 1, is 132x216′ in size, of steel on stone foundations, with 180 windows, each having 13½ sq. ft. of glass,

nterior with light. This mill has three 20" Allis-Chalmers heads, et on foundations of heavy timbers and concrete, surmounted plate of 22 tons, a middle plate of 18 tons and a top plate of 18 lid iron castings, above which are the mortar-boxes of the stamps. s remodeled, as a steeple-compound stamp, in 1905, and this was ed, the water condensed from steam used being weighed, giving on the duty of the engine. The result of the very careful tests l the management to stick to simple heads. Finishing jigs and ave been replaced by 24 Wilfley tables, 8 for each stamp, assisted rd concentrators. Each stamp has 12 rough jigs, 6 Wilfleys for l 2 Wilfleys and 1 Standard table for slimes. Stamps have 1" reens for mortar-boxes and the mill has a settler, from which ken to the Wilfley tables. Regrinding is done by a Trent Chilean 3 jigs and 3 Wilfleys as auxiliaries. Regrinding of raggings in ne by an Allis-Chalmers Huntington mill. The mortars of all hydraulic discharges, as have the launders leading from the se giving about 60% of the total production of copper secured at By the adoption of hydraulic discharges and other improvements, of the stamp-heads has been increased about 25%, while changes have given an increased capacity of 30%, with labor costs reduced ss in tailings cut down 40 to 50%. About 35% of the present he mill is No. 3 grade mineral, carrying very fine copper. Mineral uch lower than formerly, averaging, 1907, only 63.2% fine copper. bins receive mineral in buckets by overhead trolley from the in No. 1 mill, and from No. 2 mill in hopper-cars drawn by an motive traversing a 650' track connecting the mills. The min- f concrete and cement, are kept at a temperature of 80° F., the water remaining from the wash, and gates are operated by s. There is a 54' platform-scale, with minimum weighing capacity nd maximum of 220,000 lbs.

x90' power-house, of steel frame, on stone foundations, at No. 2 pped with four 250-h. p. Wickes vertical water-tube boilers and a tack on a 30' foundation. There is an electric light plant, and n with the mills there is a machine shop and several minor build-

x54' brick and steel pumphouse at the mills has a 20,000,000-gallon ers vertical triple-expansion pump, and the old pumphouse has 3 a combined capacity of 21,000,000 gallons daily. Water is taken 6" tunnel, driven 100' under the bed of the lake. A 6x6' 6" tunnel nnects the mills, boiler-houses and pump-houses, this being bricked ed inside, and carrying both water and steam pipes.

iderable village, made up solely of employes and their families, has bout the mills.

tensive tailings of the mills at Mason are under lease to the Mason nd various experiments on reconcentration have been conducted, at ince 1902.

incy has 3 docks, of which the first is at Hancock, with a 40x416' a 64x124' warehouse, having deep water in front and railroad nd. A second dock, at the Ripley smelter, has a 350' shipping copper and a 250' coal-wharf. The third dock, at the Torch Lake 40x400' wharf, built of Washington fir, with 18' of water along- being a 300x300' coal-shed, of steel, with corrugated iron siding , having storage capacity for 80,000 tons of bituminous coal, this the annual consumption of the mine and mills. There are 3 steam capable of unloading 100 tons per hour each. These have 120'

steel towers, traveling on a track 22′ wide and 300′ long, running the length of the shed. The plant was built by the American Bridge Co., at of about $200,000, and effects a saving of circa 12 cents per ton on s used. The railroad reaches the coal-shed by a 650′ trestle, partly of and partly with steel bents, supported on 240 concrete piers.

The smelter, blown in Dec. 1, 1898, is at Ripley, on the shore of P Lake, opposite Houghton, just east of Hancock and only a half-mile fro mine. These works do a custom business, treating the mineral of the Fra Mass and Adventure mines, in addition to that of the Quincy. The pri buildings are of ashlar-finished redstone.

The 40x95′ mineral-house is reached by a 460′ trestle, mineral arr from the mills in hopper-bottom cars, and being dumped into storage whence it is drawn off, as required for smelting, into steel trucks, ru on rails under the gates of the bins.

The 84x144′ reverberatory furnace building has four 40-ton rever tories, and a second furnace building, erected 1904, has a 60-ton reverber furnace, equipped with an automatic casting machine. On arriving a reverberatory building, the trucks containing mineral are lifted by ele cranes, and contents dumped into the furnaces, which are top-charged. overhead trolley, in the main furnace building, permits handling large and cakes, and a trolley dipping system is in use for casting. Owing to of slag room, a new system has been installed, by which 3,000-lb. slag have replaced the diminutive pots formerly used. The slag-pots are tra from the furnaces to a 30′ hydraulic elevator, which raises the pots and d their contents over the end of a trestle.

A briquetting plant, built 1906, of concrete blocks, has 2 retorts of b iron, each 31′ long and 72″ in diameter, for briquetting low grade mi previous to smelting.

The smelting plant includes a cupola building with one blast-furnac engine-house, casting-house, cooper-shop, office, laboratory, coal-shed, a concrete machine-shop and a 50x100′ warehouse.

Production of fine copper has been as follows: 18,498,288 lbs. in 18,343,160 lbs. in 1904; 18,827,557 lbs. in 1905; 16,194,838 lbs. in 1906; 19,7 lbs. in 1907, and to the end of 1907 the mine had produced 390,274,0 fine copper. Production, 1908, was circa 20,000,000 lbs. fine copper. The makes about 100,000 oz. silver yearly. The last detailed annual figure 1905, gave a yield of 16.6 lbs. fine copper per ton of rock stamped, but r probably were about 15 lbs. only, in 1908. Production for last quar 1908 was circa 4,200 tons of stamp-rock daily.

But for the heavy outlay for improvements, begun in 1898, the w of which was questioned at that time by many shareholders, the Quincy would be a decadent property, with but a few uncertain years of life r ing, whereas, it secured, in 1908, the largest production in the history mine. The policy of growth, begun with the purchase of the Pewabic nearly 20 years ago, has been continued steadily, and the managem entitled to credit for following, consistently, the policy of expansio is necessary to the successful operation of any large industrial enterp the Twentieth Century.

QUINCY MINING CO.

Dead. Property sold, April, 1902, to Daly West Mining Co. Form Park City, Summit Co., Utah.

QUINTERA MINING CO., LTD. ME

Office: 11 Rue Boudreau, Paris, France. English office: 20 Bisho St., London, E. C., Eng. Mine office: Aduana, Alamos, Sonora, Mex. E *circa* 400 men. Jacques F. Kulp, chairman; A. Dubois, vice-chairman;

y; E. May, treasurer; J. Hebart, manager; C. Mahant, superin-
uel Valenzuela, mine superintendent; L. Le Bouticaut, mill super-
rancisco A. Esquer, smelter superintendent. Organized May 4,
aws of Great Britain, with capitalization £52,000, shares £1 par.
dividends of 2s. to 5s. Net earnings were £8,196, and dividends
in 1907.

6 claims, area 154 hectares, also a 2-hectare millsite, and the
eneguita and Calera, with total holdings of 6,000 hectares, in the
ct of Sonora and the Fuerte district of Sinaloa. Property shows
in trachyte, and contact deposits between trachyte and granite,
ore bodies, of which one, under development, is reported as a
, raking south, with strike of North 16° East, and dip of 80°, of
idth, traceable 500′, reported as proven to depth of 2,000′. Prop-
rily a silver mine, making lead and copper as by-products, ore
d by company to average 10% copper; 11% lead; 15% zinc; 200
d $5 gold per ton, principal copper ores being malachite and

is opened by shafts of 600′, 950′ and 540′, with circa 3,000′ of
owing 45,000 tons of concentrating ore and upwards of 10,000
locked out for stoping. Mine was opened in the Sixteenth Cen-
been working continuously.

it includes a 450-h. p. steam plant and 90-h. p. electric plant,
used at the mine, and 540 h. p. at the mill. There are 3 hoists,
gate horse power, good for 700′ depth, and a 4-drill Fraser &
compressor.

include a wooden carpenter-shop of 220 sq. ft. area, smithy of
fice and 3 dwellings. There also is a sawmill.

of wood, of 2,100 sq. ft. area, and of 45 tons daily capacity, has
amps.

entrator, of brick and lumber, of 3,024 sq. ft. area, has a No. 3
usher, 3 Wilfley tables and 6 slime tables.

ter, 2 miles from the mine, receiving ore by tramway, has a
& Chalmers blast-furnace, making matte carrying 40% copper,
r and 10 grams gold per ton, shipped to Ledoux & Co., New York,

n, 1907, was 14,500 tons of ore treated, yielding circa 350 metric
, carrying about 300,000 lbs. fine copper, 425,000 oz. silver and
old.

PPER MINING CO. **COLORADO.**

226 Seventeenth St., Denver, Colo. Mine office: Radium, Grand
arry S. Porter, president and treasurer; W. H. Gould, vice-presi-
Warren, secretary; preceding officers, A. Cunba and L. D. Cunba,
ganized under laws of Colorado, with capitalization $1,500,000,
Lands, 12 claims, in the Red Gorge district, having about 700′
with 2 tunnels, upper showing malachite and chalcocite, giving
to 45.7% copper, from a trace to 5 oz. silver, and from 20 cents
per ton.

NES CO. **ARIZONA.**

e: Globe, Gila Co., Ariz. Lands, 60 claims, circa 4 miles north
ominion, in a block of 1 to 2 miles width and nearly 4 miles
g eastward from Pinal Creek. Ten or more of these claims are
produced $10,000 to $20,000 each, from surface ores raised by
es. Idle.

INING CO. **ARIZONA.**

e: Crown King, Yavapai Co., Ariz. N. E. Paul, general man-

ager. Lands, 2 miles from Crown King, opened by a 160′ shaft and 340′ tu show a vein of 30″ to 6′ width, with an 8″ paystreak carrying argentife and auriferous copper ore of good average tenor. Presumably idle.

RAINBOW MINING CO. UT

Office: care of Ernest M. Fowler, secretary, Salt Lake City, Utah. M office, Alta, Salt Lake Co., Utah. Richard J. Jarvis, president and manager; G Saxon, vice-president; preceding officers, Andrew M. Jarvis, and Andrew Jackson, directors. Organized 1906, with capitalization $50,000, shares cents par. Has a 215′ tunnel, showing stringers of ore, and expects to cut t main vein at about 300′ length.

RAINBOW MINING & MILLING CO. IDAH

Office: Wallace, Idaho. Mine office: Osburn, Shoshone Co., Idaho. H Herman J. Rossi, president; G. E. Marlowe, secretary and treasurer; Chas. F. Merriam, consulting engineer. Lands, 6 claims, near the Gray, opened by 200′ tunnel on a 10″ vein of gray copper with iron and quartz gangue.

RAMBLER COPPER MINING CO. ARIZON

Dead. Lands sold, February, 1903, to Lion Copper Mining Co. Former at Stoddard, Yavapai Co., Ariz. Described Vol. IV.

RAMBLER COPPER MINING CO. WYOMIN

Dead. Was succeeded, Oct. 1, 1902, by Rambler Mining & Smelting C Formerly at Holmes, Albany Co., Wyo.

RAMBLER COPPER & PLATINUM CO. WYOMIN

Office: 710-145 LaSalle St., Chicago, Ills. Mine office: Holmes, Alta Co., Wyo. Frank M. Wootton, president; W. J. Sherwood, vice-president; M. Green, secretary; Frank C. Sheldon, treasurer; preceding officers, Dorche Mapes, A. C. Jones, W. C. Stone, W. R. Smythe, Jr., J. Thielman, Frank Day and J. B. Stephens, directors. Organized, circa 1907, as a merger Rambler Mining & Smelting Co. and New Lincoln Copper Co.

The lands formerly held by New Lincoln Copper Co. are 2 clai patented, area 40 acres, lying north of and adjoining the Rambler mine, which shafts of 30′ and 50′, sunk to cut the extension of the Rambler v are said to show auriferous and argentiferous copper ore.

The Rambler mine, 10 claims, area 200 acres, fairly timbered, is at head of Douglas Creek, on the crest of the Medicine Bow Mountains. M opened 1870, for gold, and relocated, 1900, for copper, shows a fault fissu grano-diorite, carrying a great variety of copper minerals in various st of alteration, associated with sundry rare metals in commercial quant comparatively free from such deleterious elements as bismuth, anti and arsenic. Ore includes a little native copper, in nuggets and dend associated with cuprite, in the upper levels, also melaconite, chalcocite, lite, chalcopyrite and chrysocolla, and is especially notable for cont large quantities of covellite, carrying gold, iridium, osmium, palladiu platinum, latter occurring as sperrylite. The ores have a gangue of posed granite, giving talcose alteration products, and carrying more pyrite, hematite and marcasite, all with small percentages of copper.

Development is by a 65′ vertical shaft, from the bottom of whic cline runs, on the vein, at an angle of 45°, with three levels opened, th being a 175′ vertical main shaft, connecting with the original working 2d and 3d levels. The mine has circa 2,800′ of workings, and was by former owners, to have 22,100 tons of ore, ranging from 20 to 45% blocked out for stoping on the first and second levels, but these figu exaggerated. Exact size of the ore body apparently is undeterm ores give assays ranging from 6 to 39% copper, with average smelte of 20 to 33% copper from carefully hand-selected ore. Assays of matte have given 6.75 oz. silver, 2.25 oz. gold and platinum combin

...n per ton. Cost of refining the matte ... is approximately $40 per ton of copper ... e improvements include a 15x44 ... y, office, assay office, sawmill, boarding house and ... is a small smelter having a 40-ton water jacket ... h the ore-bins by trestle, but the smelter has been ... nction was 249,196 lbs. fine copper. Property considered ... gement, which is practically same as that of the ... led favorably.

Horse Mining Co. Lands, 6 claims, known as the Iron Horse group,
from Globe and circa 3 miles east of the Iron Cap mine, having a 55
compartment shaft, in a vein showing a 25′ outcrop, selected ores fro
have assayed up to 16% copper and 192 oz. silver per ton.

RAVEN MINING CO. MON

Office and mine: 68 Silver Bow Blk., Butte, Silver Bow Co., Mont.
Frisbie, president; John Berkin, vice-president and general manager
Poore, secretary; A. B. Curtis, treasurer; preceding officers, Donald C

Robt. A. Griffing, E. J. F. Rea and E. A. Slack, directors; W. Spencer Hutchinson, consulting engineer. Organized 1903, under laws of Montana, with capitalization $500,000, increased, 1907, to $1,000,000, shares $1 par; issued, circa $630,000. Bonds, $65,000, at 7%. On Sept. 11, 1908, the company had on hand $1,822 in cash, with bills payable of $16,500. American Trust Co., Boston, transfer agent. Annual meeting, second Tuesday in June.

Lands, 2 claims, fractional, area 23 acres. Property includes the Raven claim, owned outright, and a six-sevenths interest in the Snoozer mine, one-seventh of which is owned by the Red Metal Mining Co., which is the operating corporation of the Butte Coalition Mining Co. Lands, which are considered well located, have an east and west length of circa 2,000′, in line with the Mountain Consolidated mine.

The Snoozer claim has shafts of 75′ and 125′, with 5,780′ of workings, but was a producer, through the Buffalo shaft of the Anaconda company, until June, 1906, when the company was enjoined from working the Snoozer vein, which is subject to litigation, as the Butte & Boston claims that the vein apexes on the La Plata claim of that company, and, July, 1907, the lease of the Buffalo shaft was canceled by the Amalgamated Copper Co., and the claim advanced that the Snoozer vein apexed beyond the Raven side-lines. This matter remains unsettled. The Snoozer claim shows 4 veins, and ore produced therefrom, prior to suspension, averaged about 4% copper, 8 oz. silver and $1.25 gold per ton. The Snoozer has been opened on the 800′, 1,200′ and 1,500′ levels, by crosscuts from the Buffalo shaft of the Anaconda, the 1,200′ level showing a 4′ vein carrying high grade ore, while on the 1,500′ level the ore body was much wider. Previous to suspension, the Snoozer was shipping about 30 tons of ore daily, to the Washoe works.

The Raven claim, previously idle for some time, has been developed vigorously since Apr. 1, 1907. Development is by a 700′ air-shaft and a 1,200′ incline known as the Raven shaft, planned to be sunk to 1,500′. The depth of 1,200′ on the incline gives a vertical depth of about 1,000′, and there are circa 5,500′ of workings on the Raven claim. On the 900′ level a crosscut shows a 25′ vein carrying a hanging-wall paystreak averaging about 3.5% copper. On the 1,100′ level the vein is of about 30′ width, showing ore, below commercial grade, averaging circa 2% copper, with small gold and silver values. The Raven claim has 3 veins, and to depth of circa 500′ was a silver-gold mine, yielding ore averaging circa 16 oz. silver per ton, with fair gold values.

Equipment includes a 20x36″ hoist, good for one-half mile depth, and a 5-drill Ingersoll-Rand air-compressor, with 4 mine buildings.

From June 1, 1907, to Sept. 11, 1908, four sets of leasers, working in the upper levels, extracted gold and silver ores, on a royalty basis, company's proportion of values amounting to $2,771.

The standing of the company was injured, 1906, by rank manipulation of the share market, stock going up to $8 per share, then back again to 50 cents. In November, 1908, large shareholders came to the company's relief, by purchasing 30,000 shares of treasury stock, at par, giving the company funds sufficient to liquidate its floating indebtedness, and provide for further development. Property is considered promising, though it has not yet reached an assured basis.

RAVENSTHORPE SMELTER. **AUSTRALIA.**

Owned by Phillips River Gold & Copper Co., Ltd.

RAWLEY MINING CO. **COLORADO.**

Mine office: Bonanza, Saguache Co., Colo. David G. Weems, manager, at last accounts. Ores carry lead, silver and copper. Has steam and electric power. Presumably idle.

RAY CONSOLIDATED COPPER CO. ARIZONA.

Office and mine: Exchange Bldg., Colorado Springs, Colo. Branch office: 1107 Union Trust Bldg., Los Angeles, Cal. Mine office: Kelvin, Pinal Co., Ariz. Sherwood Aldrich, president; D. C. Jackling, vice-president; E. P. Shove, secretary and treasurer; Philip Wiseman, general manager; Seeley W. Mudd, chairman executive committee; preceding officers, C. M. MacNeill, Spencer Penrose, John Annan and J. G. Gordon, directors; Chas. H. Cutting, superintendent; A. Chester Beatty, consulting engineer.

Organized circa May, 1907, under laws of Maine, with capitalization $6,000,000, increased, circa 1908, to $8,000,000, shares $10 par; issued, $6,156,000. Bonds, $3,000,000, at 6%, dated July 1, 1907, due July 1, 1924, convertible into stock until July 1, 1914; issued, $1,156,000. Hayden, Stone & Co. have an option, until July 1, 1909, on $1,800,000 of convertible bonds remaining unissued. Company was said, November, 1908, to have circa $275,000 on hand. Company is a twin of the Gila Copper Co., and is controlled by the same interests as the Utah Copper Co. Morton Trust Co., New York, registrar and transfer agent.

Lands, 1,296 acres, on Mineral Creek, 6 miles from Kelvin, the nearest railroad point, also the townsite of Kelvin, bought of the Ray Copper Mines Ltd. The property shows a mineralized zone approximately 3,000′ wide and 12,000′ long, with prospects of further extensions, with a porphyritic belt, cut by numerous diabase dikes, having impregnations of low grade copper sulphide ore being disseminated in granules and veinlets through the country rock, the deposits being markedly similar to those at Ely, Bingham and Clifton. Depth of payable ore apparently is undetermined, but presumably is at least 200′ to 300′. Under the old management the property was said to show nearly 1,000,000 tons of ore, claimed to average 4.5% copper, the claimed ore tenor being much too high, as apparently the average tenor of the ore is 2 to 2.5% copper, though with some ore of higher grade.

Development is by a 300′ shaft and several working tunnels, but the ore body has been proven mainly by the use of 6 diamond drills, each averaging about 50′ of boring daily, holes being bored at 100′ intervals to depth of 3[illegible], the drill borings being estimated to develop between 4,000,000 and 5,000,000 tons of ore, averaging 2.25 to 2.5% copper. The former owners expended about $1,000,000, largely in misdirected work.

Transportation between the mine and mill is by a 6-mile narrow-gauge private railway, which was not entirely completed, at the end of 1908.

An old concentrator, enlarged, 1907, to 300 tons daily capacity, on Gila river, is planned to be enlarged to 1,000 tons size, as the first unit of a 6,000-ton mill. It is claimed that the ore can be concentrated 15 or even into 1.

The property formerly had a smelter, erected 1897, but never blown in, which was burned, March, 1906, the fire being a blessing in disguise, as the smelter was of no particular value for the present day.

Very extensive development was under way, 1907, with a force of about 600 men, until September, 1907, when the force was first cut in half, and then all work suspended, work being resumed, 1908, with a smaller force. The Ray Consolidated is a property of exceptional promise, and is under thorough competent management.

RAY COPPER MINES, LTD. ARIZONA.

Dead. Lands sold, circa 1907, to Ray Consolidated Copper Co. Formerly at Ray, Pinal Co., Ariz. Fully described Vol. VI.

RAY EXTENSION COPPER CO. ARIZONA.

Mine office: Ray, Pinal Co., Ariz. Organized circa July, 1907, under laws of Arizona, with capitalization $1,000,000, by D. A. Seaman and R. W. Sea[illegible]

eturned unclaimed from former office, Guadalajara, Mex. Mine
lpa, Sayula, Jalisco, Mex. Silviano Camberos, manager, at last

accounts. Lands, 25 pertenencias, near Chiquilistlán, 50 kilometers northwest of Sayula, including the Cuprifera, Rinconada and Sin Nombre groups. Ore occurs in "mantos," or blanket veins, and in fissures, giving assays up to 60% copper, 2 kgs. silver and $10 gold per ton. A little ore, smelted in adobe furnaces, at the mines, has given good returns. Presumably idle.

REBELJ & VIS COPPER MINES, LTD. SERVIA.

Office: care of A. F. V. Wild, 28 Budge Row, London, E. C., Eng. Mine office: Rebelj, Vljewo, Servia. Organized Nov. 21, 1907, under laws of Great Britain, with capitalization £25,000, shares £1 par.

R. E. BRUNER COPPER CO. ARIZONA.

Office: 812 Grand Ave., Kansas City, Mo. Mine office: Patagonia, Santa Cruz Co., Ariz. R. E. Bruner, president; Rea M. Bruner, vice-president; Glen L. Bruner, secretary and treasurer. Organized June 24, 1907, under laws of Arizona, with capitalization $3,000,000. Company reported 680,000 shares unissued, Aug. 6, 1908.

Lands, 8 claims, unpatented, near the Anaconda-Arizona and Mansfeld. A 54′ tunnel, on the Mescal claim, is said to give indications of argentiferous lead and copper ore, and company claimed, August, 1908, to have opened the vein for nearly a mile in length, presumably by trenching, and planned driving a tunnel at least 500′ on the Mescal claim.

RED BIRD MINING CO. MONTANA.

Office: Helena, Mont. Mine office: Austin, Lewis & Clark Co., Mont. J. M. Clements, president and treasurer; Frank Jacquemin, vice-president; A. A. Pelletier, secretary and general manager; preceding officers, Robert Lucas and C. O. Clark, directors. Organized Aug. 18, 1902, under laws of Montana, with capitalization $1,500,000, shares $5 par. Paid dividends of $72,000, to end of 1905. Lands, 7 claims, area 140 acres, in the Greenhorn district, carrying 15 fissure veins, of which 2, of 5′ average width, are developed by the 400′ Red Bird shaft and the 300′ Copper Hill shaft. The Copper Hill mine shows sulphide ore averaging 1.3% copper, with a 30% excess of iron, in a 60′ vein. The Red Bird mine has about one mile of workings, claimed to put 250,000 tons of ore in sight. Estimated average ore values of the Red Bird, as given by a former management, were 21% copper, 45% lead, 35 oz. silver and $5 gold per ton, this being manifestly a great exaggeration. Has a 180-h. p. steam plant with 4 hoists and a 4-drill air-compressor. Has 5 mine buildings. Presumably idle.

RED CANYON MINING CO. NEVADA.

Office: 703 Marquette Bldg., Chicago, Ills. Mine office: Gardnerville, Douglas Co., Nev. H. P. Chesley, president; B. F. MacKay, vice-president; A. F. Doyle, secretary and manager; C. L. Doyle, treasurer; preceding officers, L. C. Hunter, W. L. Thompson and P. C. Wilder, directors; H. C. Jessen, superintendent. Organized February, 1907, under laws of Arizona, with capitalization $1,000,000, shares $1 par.

Lands, 5 claims, area 100 acres, well watered and fairly timbered, said to be in the Yerington district, but mine office is in the adjoining county. Property is said to show 3 veins, with northeasterly and southwesterly strike, traceable 7,500′. The main vein is said to be 30′ to 100′ wide, with dip of 30° to 45°, showing cuprite, malachite, bornite and chalcopyrite, assaying 2 to 6% copper, with some lead. Company claims to have exposed 13,000 tons of ore averaging 8% copper and $1.30 per ton in combined gold and silver values. Development is by 6 shafts of 30′ to 75′, and 6 tunnels of 60′ to 350′. Company is said to plan a 100-ton smelter.

RED CLOUD MINING CO. CALIFORNIA.

Office: Los Angeles, Cal. Mine office: Salton, Riverside Co., Cal. E. H. *Gould*, superintendent. Has auriferous and argentiferous copper and lead

with steam and gasoline power, 2-stamp mill, concentrator and 80-ton ter. Idle.

CLOUD MINING CO. **MEXICO.**

Dead. Apparently was successor of Consolidated Gold & Copper Co., and merged, circa August, 1908, in Kansas-Cananea Copper Co. Lands, circa les south of La Cananea, were said to show considerable ore of low average er tenor. Formerly at La Cananea, Arizpe, Sonora, Mex.

CROSS MINING CO. **WASHINGTON.**

Mine office: Index, Snohomish Co., Wash. David Boyle, president; D. canlan, treasurer; R. W. Emerson, secretary. Organized 1906, under laws Washington, with capitalization $1,000,000. Lands, 15 claims, in the Wal- district, near the Bunker Hill Mining & Smelting Co., said to show 4 , 3 of 7′ to 8′ average width, and one, in granite, of 25′ claimed and ap- ntly about 8′ actual average width, opened by a 65′ tunnel.

DING GOLD & COPPER MINING CO. **CALIFORNIA.**

Office: 15-951 Eddy St., San Francisco, Cal. Letter returned unclaimed former mine office, Redding, Shasta Co., Cal. Has a bad habit of ging offices and leaving no address behind. Letters have been returned rious times from former offices at Oakland and San Francisco. H. D. , president; R. W. Mayhew, vice-president; Thos. Gilbert, secretary; J. H. hton, superintendent; preceding officers, A. Ahnefeld and T. S. Rasmussen, tors. Organized under laws of South Dakota, with capitalization ,000. Has authorized a bond issue at 6%. Lands, circa 30 claims at h of Middle Creek, and sundry claims at Clear Creek, in the Muletown ct, circa 7 miles west of Redding, also placer gold claims. Company ed, 1905, to be developing a hydro-electric power plant, and claimed to building a 500-ton smelter. Is regarded with suspicion.

EMPTION COPPER MINING & MILLING CO. **ARIZONA.**

Office: Kingman, Ariz. Mine office: Chloride, Mohave Co., Ariz. Robt. rguson, president and general manager. Has auriferous and argentiferous zed ores of copper.

FOX MINING CO. **BRITISH COLUMBIA.**

Mine office: McGuigan, Yale district, B. C. Has argentiferous lead and r ores, slightly developed. Idle several years.

GULCH GOLD-COPPER MINING & MILLING CO. **COLORADO.**

Office: care of E. G. Bettis, president, Cañon City, Colo. Mine office: erfield, Frémont Co., Colo. Wm. T. Bridwell, vice-president; M. M. Van , secretary. Is capitalized at 3,000,000 shares, presumably $1 par. Lands, aims, in the Red Gulch district of Frémont county, 83 acres in the Ilse ict of Custer county, and sundry claims in the Monarch district of Chaffee ty, Colorado. The Red Gulch group has a 210′ shaft, developing silver- ore, and shipped, 1907, some ore of good grade.

HILL MINING & SMELTING CO. **CALIFORNIA.**

Office: care of C. B. Allen, secretary, Los Angeles, Cal. Mine office: or, San Bernardino Co., Cal. Dr. C. J. Allen, president; J. W. Jackson, president. Lands are about 10 miles from Victor. Idle and apparently bund.

HORSE COPPER CO. **IDAHO.**

Mine office: Springston, Kootenai Co., Idaho. Jasper Neederhood, presi- ; John Neederhood, vice-president; preceding officers and Geo. Ripley, tors; Rudolph A. Jonas, manager. Organized 1904, under laws of Idaho, capitalization $1,500,000, shares $1 par.

Lands, 18 claims, having a shaft and a 748′ tunnel, with circa 1,500′ of tings, showing ore said to assay 18% copper, with high gold values. Equip- t includes a 3-drill *air-compressor.*

Apparently the local officers stand well, but the company's advertis ments, through H. J. Leighton, fiscal agent, were outrageously exaggerated an highly misleading.

RED JACKET & BISBEE DEVELOPMENT CO. ARIZONA

Dead. Formerly at Bisbee, Cochise Co., Ariz. Fully described Vol. IV.

REDMAN MINING, MILLING & SMELTING CO. ARIZONA

Office: 17 Battery Place, New York, N. Y. Mine office: McCabe, Yav apai Co., Ariz. W. D. Wintemute, secretary and treasurer; John Derry, supe intendent. Organized under laws of Arizona, with capitalization $2,500,00 shares $1 par. Lands include claims in Nevada and Mexico, with princip group one mile northeast of McCabe, said to have about 1,000' of working showing a 30" vein of sulphide ore on the 100' level. Plans a 10-stamp mi and concentrator. Management makes promises more lavish than are wa ranted by development secured.

RED METAL MINING CO. MONTANA

Office: 42 Broadway, New York, N. Y. Mine office: Butte, Silver Bo Co., Mont. Thos. F. Cole, president; W. D. Thornton, vice-president; percedi officers, J. C. Lalor, C. D. Fraser and James O'Grady, directors; Arthur Carson, general manager; Geo. Moulthrop, general superintendent. Organiz Feb. 23, 1906, under laws of New York, with capitalization $11,000,000, shar $100 par. Entire stock issue is held by the Butte Coalition Mining Co., and t Red Metal Mining Co. is a holding company for the Butte Coalition, direct tit to lands being vested in the Red Metal. Holdings supposedly include lands d scribed under the title of Butte Coalition Mining Co., also stock control of t Alice, and a few other small properties, including a seventh interest in t Snoozer mine of the Raven Mining Co.

RED METAL MINING CO. NEVADA

Office: care of Alex Colbath, secretary, Salt Lake City, Utah. Mi office: Luning, Esmeralda Co., Nev. Lemuel U. Colbath, president; W. Craig, vice-president and general manager; preceding officers, W. Wrightma Wm. Pischel and Dr. John T. White, directors. Organized circa January, 190 under laws of Colorado, with capitalization $1,000,000.

RED MOUNTAIN GOLD & COPPER REDUCTION CO. WASHINGTON

Dead. Formerly at Chelan, Chelan Co., Wash.

RED MOUNTAIN RAILROAD, MINING & SMELTING CO. COLORADO

Office: 1004 West End Trust Bldg., Philadelphia, Pa. Mine office: Re Mountain, Ouray Co., Colo. Geo. Crawford, general manager; W. C. Aste superintendent. Lands include the Yankee Girl, Genesee and Vanderbilt pro erties, carrying auriferous and argentiferous copper ores. Has steam an electric power.

REDOUBTABLE GOLD & COPPER MINING & MILLING CO. COLORADO

Office: Salida, Colo. Mine office: Turret, Chaffee Co., Colo. David He ton, president; W. W. Roller, vice-president; J. W. Calhoun, treasurer; J. Hunt, secretary; preceding officers and Geo. Sullivan, directors. Organize circa 1907, under laws of Colorado, with capitalization $1,000,000.

Property, formerly held by Par Value Gold & Copper Mining Co., includ a 3-year bond and lease on the Gold Bug and Mandate claims. Lands sho 4 fissure veins of about 3' average width, carrying oxidized and sulphide ore former said to average 5% copper, 3 oz. silver and $10 gold per ton, opened b shafts of 200' and 400', with about 3,000' of workings.

RED RIVER COPPER CO. NEW MEXICO

Mine office: Red River, Taos Co., N. M. Geo. B. Paxton, superintendent *Property* is the Anaconda mine. Has steam power. Presumably idle.

REFORMA MINING CO. MEX

Dead. Formerly at Fuerte, Sinaloa, Mex.

REFUGIO SYNDICATE, LTD. MEX

Office: 3 Princes St., London, E. C., Eng. Letter returned unclaimed f former mine office, La Cananea, Arizpe, Sonora, Mex. S. A. Bird, chairm Henry H. Knox, consulting engineer; J. S. Dare, secretary. Organized J 30, 1905, under laws of Great Britain, with capitalization £11,250, in 1,00 shares and 10,000 ordinary shares of £1 par each, and 5,000 deferred sh of 1s. par each. Lands, 6 groups of copper claims, area 382 hectares. Pre ably idle.

REID-NEWFOUNDLAND CO. NEWFOUNDLA

Mine office: New Bay, Newfoundland. Donald McKenzie, superint ent. In 1907 was sinking a shaft planned to be 100′ deep, for prospec purposes.

COMPAÑIA MINERA LA REINA. MEX

Dead. Lands sold, circa 1907, to Mexican Mines Syndicate, Ltd. Form at Cusihuiriáchic, Iturbide, Chihuahua, Mex. Fully described Vol. VII.

COMPAÑIA MINERA REINA DE COBRE. MEX

Mine office: Ejutla, Oaxaca, Mex. Capitalization 100,000 pesos. Butler, general manager; Juan de Peza, superintendent, at last accounts. erty is the Luna de Oaxaca mine. Presumably idle.

MINA REINA DE COBRE. MEX

Mine office: Alamos, Sonora, Mex. Alfredo R. Cano y Ca., owners; G. Cano, manager. Has auriferous and argentiferous copper ores.

COMPAÑIA MINERA REINA DE COBRE DE SONORA. MEX

Letter returned unclaimed from former office, Nogales, Sonora, Mex. office: Santa Ana, Magdalena, Sonora, Mex. John Henderson, superinte Has auriferous and argentiferous copper ores. Has steam power, empl circa 30 men, at last accounts.

REINA COPPER CO., LTD. S

Office: 18 Walbrook, London, E. C., Eng. M. Graham, chairman. (ized Aug. 13, 1906, under laws of Great Britain, with capitalization £ shares £1 par, to acquire copper mines in Spain. Presumably idle.

REINDEER COPPER & GOLD MINING CO., LTD. ID

Office: 510 Bank St., Wallace, Idaho. Mine office: Mullan, Shoshon Idaho. F. C. Norbeck, secretary; Norman Ebberley, manager. Appare a Siamese twin of the Reindeer Copper Mining & Milling Co., Ltd. La claims, on Willow Creek, said to have a vein carrying a paystreak of 16 t copper tenor, with 3′ to 6′ of copper ore of concentrating grade. Is de ing by a tunnel, driven jointly with Copper Queen Mining Co., planned 3,000′ long. Has steam power and an air-compressor.

REINDEER COPPER MINING & MILLING CO., LTD. ID

Office: 510 Bank St., Wallace, Idaho. Mine office: Mullan, Shoshon Idaho. H. A. Keough, president; F. C. Norbeck, secretary. Appare Siamese twin of the Reindeer Copper & Gold Mining Co., Ltd., and imp to tell "t'other from which."

REINDEER MINING CO. ID

Dead. Succeeded by Reindeer Copper & Gold Mining Co., Ltd. Fo at Mullan, Shoshone Co., Idaho.

REINS COPPER CO. MONT

Office and mine: 46 East Broadway, Butte, Silver Bow Co., Mont. J. M. Guffey, president; John P. Reins and Asa Childs, vice-presidents; *ing officers*, Wm. P. De Armit, Hon. John Miller, Frank J. Weixel, E. W *land*, Geo. W. Stapleton, W. W. McDowell, E. D. Leavitt and Guy Sta

ment is on the Little Gem group, one mile from Tenabo, showing a c deposit between rhyolite and sedimentary rocks, carrying auriferous a gentiferous copper carbonates and chalcopyrite, with quartz gangue. 250′ incline shaft, sunk at an angle of 22°, showing an ore body ranging a few inches to 5′ in width, giving assays up to 31.1% copper, 122 oz. silv $9.60 gold per ton.

RELIANCE MINING & MILLING CO. PENNSYLV

Office: Lancaster, Pa. Mine office: Hunterstown, Adams Co., Pa. sumably idle.

RENDALL ORE REDUCTION CO. ARIZ

Office: 16 State St., Boston, Mass. Mine office: Gila Bend, Maricop Ariz. Chas. S. Ashley, president; Leonard L. Allen, vice-president; H. C Slack, secretary; A. D. Lee, superintendent.

Property is the Ajo mine, an antigua, opened A. D. 1763, and rec circa 1861, when native copper and considerable rich ore, said to have worth $300,000, was shipped to San Francisco and Swansea. Property is pered by lack of rail transportation. Mine has a 150′ shaft, showing good average tenor. During idleness of mine considerable regulus wa duced by deposits on old rails and pipes.

Reduction plant, rated at 50 tons daily capacity, uses the Rendall p which is claimed to treat, with equal facility, all classes of copper or cluding oxides, carbonates, sulphides, chloride, silicates and arsenides, is claimed that average ores can be treated at cost of $1 per ton, with tion of 95 to 98% of values, which claims seem very sweeping. The pla a special upright furnace, practically air-tight, with suction draft op above the charge. Ore is heated to low incandescence by gases from coal or oil, and at a proper degree of heat the combustion draft is inc fuel supply shut off, and a specially fluxed hot blast admitted to f causing chemical reactions by which the volatile elements are said to be off. The special fluxing gas is said to prevent oxidation, carbonizat chlorination of the ores, and it is claimed that copper, gold and silver in suspension, as the gangue rock of quartz or limestone is not fused. difficult to understand just what is volatilized, if neither metals nor rock are fused, and the utility of the volatilization process is not ap After volatilization, the ore is plunged into a vat containing water, w said to shock the gangue, and assist in breaking it up. Ore is then through a set of rolls, crushed fine, and copper ore concentrated or tre an arastra or Chilean mill, if containing high gold or silver values.

RENO-YERINGTON COPPER CO. NE

Mine office: Yerington, Lyon Co., Nev. S. H. Baker, manager. north of the Bluestone, have a 700′ tunnel, 200′ of which is said to show of 8′ average width, carrying ore of 3 to 4% copper tenor. Presumabl

REPUBLIC CONSOLIDATED MINING & MILLING CO. COL

Dead. Formerly at Idaho Springs, Clear Creek Co., Colo.

REPUBLIC MINES CO. NEW M

Office: 526 Exchange Bldg., Denver, Colo. Mine office: Lucer Co., N. M. Felix J. Woodward, president; Walter Littlefield, vice-pr Marcus Finch, secretary, treasurer and general manager. Organized 1903, under laws of Colorado, with capitalization $500,000, shares $1 sued, $490,000.

Lands, circa 7,500 acres, patented, half freehold and half held und and lease, known as the Constitution group, 30 miles from a railroad, ing for 8 miles along Coyote Creek, from Mora river to the adjacent tains, showing a series of 3 parallel cupriferous beds of slate and are shale, alternating with limestone, having an approximately meridional

ty has upwards of 120 openings, mainly shallow pits, showing cop- al workings being a 50′ shaft and several tunnels, longest 650′. The ls are of 3′ to 8′ thickness, with 3 minor ledges, said to show con- chalcocite, presumably in connection with oxidized ores, giving says of 8 to 17% copper, with an estimated average tenor of 6%. dans building a small smelter with a reverberatory furnace.

) MINING CO. **ARIZONA.**
office: Johnson, Cochise Co., Ariz. Lands, 9 claims, including the lican mine, having a 350′ shaft; the Republic Extension mine, with 50′, 75′ and 150′, and the Mammoth mine, having incline shafts of 00′. Property shows auriferous and argentiferous sulphides, up to per tenor.

) SMELTING CO. **COLORADO.**
and works: Leadville, Lake Co., Colo. Capitalization $500,000. s the remodeled 500-ton smelter, with 3 furnaces, formerly owned ston Gold-Copper Co. Presumably idle.

COPPER CO. **ARIZONA.**
Merged, Feb. 19, 1907, in Cornelia Copper Co. Formerly at Gila a Co., Ariz. Described Vol. VII.

TION MINING & SMELTING CO. **WASHINGTON.**
Lands sold, circa 1907, to Dominion Copper Co., Ltd. Formerly at Ferry Co., Wash.

E COPPER CO. **MICHIGAN.**
Wound up. Lands sold, 1905, to Keweenaw Copper Co. Formerly Mine, Keweenaw Co., Mich. Fully described Vol. II.

REVANCHA. **MEXICO.**
office: Ojocaliente, Zacatecas, Mex. J. Incarnacion Spina, owner; manager. Has argentiferous lead and copper ores, with a Chilean team power.

MINING CO. **ARKANSAS, UTAH & WASHINGTON.**
Formerly in Stevens county, Washington. Described Vol. VII.

MINING & MILLING CO. **WYOMING.**
Formerly at Encampment, Carbon Co., Wyo. Described Vol. VI.

COPPER MINING CO. **ARIZONA.**
Lands sold, Oct. 15, 1903, to United Arizona Copper Co., Ltd. at Vekol, Pinal Co., Ariz.

GOLD-COPPER MINING CO. **BRITISH COLUMBIA.**
returned unclaimed from former office, Spokane, Wash. Mine office: Boundary district, B. C. W. C. Lyall, attorney. Organized 1906, alization $1,000,000, shares $1 par. Idle and apparently moribund.

SILVER & COPPER MINING CO. **UTAH.**
office: Alta, Salt Lake Co., Utah. Lands are on the south fork of ttonwood.

RE MINING CO. **ARIZONA.**
Muskegon, Mich. Mine office: Safford, Graham Co., Ariz. Dr. , president; J. B. Barlow, secretary and treasurer. Organized 1903, of Arizona, with capitalization $1,000,000, shares $1 par. Lands, area 320 acres, in the Lone Star district, showing fissure veins, de- a 2-compartment incline shaft of 540′, with 700′ of underground Has a 28-h. p. steam hoist. Idle several years.

D MINES & INVESTMENT CO. **COLORADO.**
office: Leadville, Lake Co., Colo. Jesse F. McDonald, manager. ide the Rattler and Reconstruction mines, carrying gold, silver, lead ores. Has steam power. Presumably idle.

REY DEL ORO MINING CO. MEXICO.

Mine office: Mulatos, Sahuaripa, Sonora, Mex. Is controlled, through entire stock ownership, by the Greene Gold-Silver Co. Property is the Mulatos mine.

COMPAÑIA MINERA LOS REYES. MEXICO.

Mine office: Zitácuaro, Michoacán, Mex. Rafael Rodriguez Gil, manager, at last accounts. Has a tunnel, showing copper ore. Presumably idle.

REYNOLDS-ALASKA DEVELOPMENT CO. ALASKA.

Office: 43 Exchange Place, New York, N. Y. Mine office: Valdez, Prince William Sound district, Alaska. C. M. Baldwin, president; Percy Brundage, vice-president; Hon. John G. Brady, secretary; J. Frank Birdsell, treasurer; preceding officers, Horace E. Kistler, E. T. Teter, D. B. Hawes, O. W. Cobb, Omar J. Humphrey, A. E. Austin, H. M. Coffin, Chas. H. Kingsbury, J. J. Blackmore and W. S. Burrows, directors; Blamey Stevens, engineer; J. W. Spaulding, superintendent. Organized 1903, under laws of Washington, with capitalization $3,000,000, shares $1 par, in $1,000,000 cumulative 6% preferred and $2,000,000 common shares; issued, $2,632,906. Bonds, $500,000, twenty-year 6% gold bonds, authorized March 3, 1908; issued, none. Company paid dividends, to Oct. 1, 1908, of $38,644.72 on preferred stock, which was wrong, as the company was not in a position to earn any dividends. Company is said to have offered to pay 6% on preferred stock, from date of issue, and 6% on common shares thereafter. In March, 1908, the company had an indebtedness of circa $280,000. Washington Trust Co., Boston, registrar; Beacon Trust Co., Boston, transfer agent. Annual meeting, first Tuesday in April.

The Reynolds string of promotions included companies formed to carry on a great variety of businesses, including hotels, a dray-line, newspaper, building construction, smelting, laundering, merchandising, and the sale of musical instruments and sheet-music. Company controls the Copper River Lumber Co., with sawmills and yards at Valdez, and also holds, at Valdez, 20 parcels of real estate, including various hotels, warehouses, dwellings, etc.

Lands, 62 claims, area circa 1,200 acres, patents applied for, also an 80-acre millsite and 6,000 acres of coal and oil lands, in several different groups, in 2 different localities in the Valdez district. The coal and oil lands are not productive. The various properties show slate, greenstone and porphyry, carrying various contact deposits between slate and greenstone.

The Boulder Bay group, 23 claims, area 460 acres, on the Kenai peninsula, shows a contact deposit between greenstone and slate, carrying chalcopyrite, assaying up to 11% copper and $3 gold per ton, but probably averaging 2 to 4% in copper tenor, developed by 2 tunnels. Equipment includes a 60-h. p. boiler and a 5-drill Rand air-compressor.

The Aurora mine, at Kachekmak Bay, Cook Inlet, is a gold property, where considerable money was spent, and apparently little ore found. At one time a mill was planned for this property.

The Latouche Iron Mountain group, 20 claims, includes the Duchess and Blue Fox properties, on the west coast of Latouche Island, circa 60 miles west of Boulder Bay. The Blue Fox mine has a 4' vein of ore, of about 7% estimated copper tenor, which it was planned to develop by shaft. The Duchess mine, opened by tunnel, shows ore of low grade, but in larger quantities than found in the Blue Fox, having a vein estimated by company as of 100' width, traceable circa 700'. Another authority states that there is an ore zone up to 250' in width, traceable nearly one mile. Development is by tunnel and crosscuts, showing a large body of low grade copper ore, intersected by several high grade ore bodies.

Equipment includes a 200-h. p. hydro-electric installation, with a flume and steel pipe leading from Big Falls Creek to a Pelton wheel, direct-connected to

)-kw. generators. There is a 50-h. p. hoist and 2 Rand air-compressors, rills aggregate capacity, with 6 air drills and 10 Ingersoll-Temple electric

nprovements include a sawmill, electric light plant, 3 steamers, a store, hotel and barber-shop.

he company is giving tentative consideration to the erection of a 1,000-ton r. The management estimates that the mine should have a mean prob- re capacity of 3,000,000 tons.

enry D. Reynolds was arrested, April, 1908, on a secret indictment re- l against him by a Federal grand jury in Massachusetts, for using the to defraud, but wrote, Apr. 28, 1908, stating that he had just resumed l of the company and its subsidiary corporations, including the Alaska Railway and 13 other companies comprising the so-called Reynolds- a system. The company, together with its associated bank, railroad and rial enterprise, came to grief financially, 1907, but seems to have im- l its financial position during 1908.

NOLDS MINE. **VERMONT.**

Iine office: South Strafford, Orange Co., Vt. J. B. Reynolds, manager rincipal owner. Lands, 900 acres, held under deed of mining rights, near lizabeth mine, 13 miles from Boston & Maine railroad, showing gneiss, schists and hornblende-schists, carrying lenticular ore bodies in series rming to dip of the country rocks, under garnetiferous mica-schist and hornblende-schist, with strike of West of North, and average dip of 45°. One ore body, of 40′ extreme width, not mineralized for full width, able circa 4,000′ on the property, shows chalcopyrite disseminated in otite, giving average assays above 3% copper. Development is by a 110′ e shaft, with about 70′ of workings on the 100′ level.

Equipment includes steam and air power, with a 3-drill compressor and al mine buildings.

INBACH COPPER MINES, LTD. **GERMANY.**

)ffice: 5 Copthall Bldgs., London, E. C., Eng. Mine office: Rheinbach Bruhl-Unkel, Rheinprovinz, Germany. Oliver Wethered, chairman; A. manager; C. Acton Dodds, secretary. Organized May 11, 1907, under of Great Britain, with capitalization £150,000, shares £1 par; issued, 07. Lands, 437 hectares, showing copper, lead and zinc sulphides, opened hafts.

OSTERKOP COPPER SYNDICATE. **CAPE COLONY.**

Iine office: Kakamas, Kenhardt district, Cape Colony. Capitalization 0. Lands, 19,000 morgen, area circa 40,000 acres, known as the Farm sterkop, on the southern bank of Orange river, circa 72 miles west of wn of Kenhardt, held under 17 months option. Property shows copper between gneiss and schist, with northeasterly and southwesterly strike. pal vein, with vertical dip, opened to shallow depth only, is 3″ wide at rface, gradually increasing to 4″, carrying high grade carbonates, oxides halcocite. The veins, as developed, are trivial in width, but are rich)parently worthy of further tests.

E ISLAND COPPER CO. **MICHIGAN.**

fice: 1000-32 Broadway, New York, N. Y. Mine office: Hancock, Hough- , Mich. Employs 25 men. Chas. J. Devereaux, president; Wm. R. Todd, ry and treasurer; preceding officers, Stephen R. Dow, Chester L. Dane, awton, Isaac H. Meserve and Jas. S. Dunstan, directors; M. H. Dennis, tendent. Organized 1898, under laws of Michigan, with capitalization 00, shares $25 par; paid in, $10. Last assessment was $1, due Jan. 7. Statement, as of date Jan. 1, 1908, showed cash on hand, $58,216.51, tal quick assets of $63,672.89, and total accounts payable of $2,717.43.

Lands, 800 acres, north of the Franklin Junior, on which extensive d mond drill borings have been made, giving drill cores from the Mesn epidote, Kearsarge amygdaloid, Allouez conglomerate, Pewabic amygdal and other copper-bearing beds.

No. 1 shaft, 275′ north of the Franklin Junior boundary, is 8x18′ in si with 3 compartments, 500′ deep, sunk on the Pewabic amygdaloid, which 8′ to 10′ wide, with 2′ to 3′ near the hanging-wall well mineralized, at point This shaft, abandoned 1902, is filled with water, to the first level, on wh it connects with No. 2.

No. 2 shaft, 1,200′ north of No. 1, also is 8x18′ in size, and is circa 1,3 deep, at the 10th level. This shaft has east and west crosscuts, and a crosscut driven 180′ east, encountered the Allouez conglomerate, March, 1903, but work thereon was discontinued, July, 1904, owing to poor showing secured. The ea crosscut, on the 8th level, at depth of 1,000′, cut 2 apparently valueless amyg daloidal beds, one being the Mesnard epidote lode. The East lode, about 7′ wide, carries a little copper, but nothing especially encouraging. The Wes lode, 96′ from the shaft, is 7′ to 9′ wide, carrying occasional bunchy copper. The 4 amygdaloidal beds lying between the West lode and the Allouez conglomerate have been tested by north and south drifts, 3 proving barren. On the 9th level a 6′ vein shows about 35′ of good copper ground, but the showing on the level below is poor. The south drift on the Pewabic lode, on the 8th level, is said to develop a good stretch of copper ground, in a 600′ drift toward the Franklin Junior. The Pewabic lode was explored, 1906-1908, by drifts on various levels, a 1,400′ drift on the 8th level north showing occasional 25′ to 75′ stretches of payable ground. No. 2 has a frame shafthouse, and a Nordberg hoist capable of raising 2-ton skips from a quarter-mile depth.

No. 3 shaft, 1,800′ north of No. 2, was started May, 1905, but work was discontinued at slight depth, and attention turned to diamond drilling, to locate the Kearsarge bed. The first cores from the Kearsarge lode showed copper, in somewhat encouraging quantities, from a bed of circa 19′ width.

Surface improvements include a 30x60′ machine and blacksmith shop, a 30x50′ frame warehouse and 15 dwellings. No. 2 engine-house has a 12-drill Rand air-compressor.

It is possible that the Rhode Island may be absorbed by the Franklin, as negotiations to that end were under way, late 1908. The Rhode Island has given very discouraging results, for 10 years of conscientious effort.

RHODESIA COPPER CO., LTD. RHODESIA.

Office: Salisbury House, London, E. C., Eng. Mine office: Bulawayo, Rhodesia. Lord Gifford, chairman; Bechuanaland Exploration Co., Ltd., manager in South Africa; F. White and Percy Tarbutt & Co., consulting engineers; Tom Donald, secretary. Organized Jan. 31, 1902, under laws of Great Britain with capitalization £750,000, shares £1 par. Company has floated the Rhodesian Broken Hill mine, a zinc and lead property, and paid a 10% dividend to shareholders, 1905, in the stock of that corporation.

Lands, 640 square miles, and the right to locate 8,000 mining claims and 24 farms, in northern Rhodesia, of which 5,665 mining claims and 24 farms have been located, at last accounts. The company has a close working alliance with the Northern Copper (B. S. A.) Co., Ltd., and apparently both companies have some sort of interest in the Bwana M'Kubwa and Hippo mines, which are described under title of Northern company. The Kitakata mine, one-half mile northeast of the Broken Hill property, shows stains and hand-specimens of oxide and carbonate copper ores.

JUAN DE C. RIBILLO. CHILE.

Mine office: Carrizalillo, Chañaral, Antofagasta, Chile. Property is t

esito mine, which, 1903, produced 850 metric tons of ore averaging 15% per, equivalent to about 275,000 lbs. fine copper.

CHARD III DEVELOPMENT CO., LTD. **BRITISH COLUMBIA.**

Office: Duncans, B. C. Mine office: Mt. Sicker, Vancouver Island, B. C. nds, east of the Tyee are opened by a 510′ two-compartment shaft, with 8′ of workings on 5 levels, having ore on each level, with considerable ore good average tenor in sight. Best ore is on the bottom level, a sample ton nitet giving returns of 3.29% copper, 25.85 oz. silver and 0.66 oz. gold per n. Has shipped considerable ore to the Tyee smelter, and paid, 1907, a % dividend.

CHFIELD COPPER CO. **MEXICO.**

Office: 1410 H St., Washington, D. C. Mine office: Querobabí, Ures, nora, Mex. Dr. S. T. Haffner, president; Maj. Jas. A. Cooper, vice-president; lbys L. Fickes, secretary and treasurer; Stewart Ellis, general manager; John sson, superintendent. Organized 1908, as successor of Richfield Mining Co., ich was organized May, 1901, under laws of Arizona, with capitalization 000,000, shares $2 par. Old company had a $100,000 bond issue, at 6%.

Lands, 382 pertenencias, area 955 acres, in 2 groups, including the Dos ciones group, 12 miles east of Tuape, down the San Miguel river, and 35 es from a railroad. Also has 26,512 acres of timber lands, in the Ures dis- t. The Dos Naciones group, having traces of antigua workings, is said to w 7 contact veins, between granite and limestone, of 16′ to 40′ estimated rage width, opened by shafts of 73′ and 75′, and by tunnels of 48′ and 60′, wing oxidized ores and chalcopyrite assaying 3% copper and 20 to 60 oz. er per ton, with small gold values. Is said to have a body of high grade at depth of 350′. Has a 120-h. p. steam plant, with two 20-h. p. hoists and -drill air compressor, and several mine buildings. Camp was raided by qui Indians, 1907, whereupon the Mexican workmen left, and mine was sed down.

CHFIELD MINING CO. **MEXICO.**

Dead. Succeeded, 1908, by Richfield Copper Co. Formerly at Querobabí, es, Sonora, Mex. Described Vol. VI.

CHMOND-EUREKA MINING CO. **NEVADA.**

Office: 1114-25 Broad St., New York, N. Y. Mine office: Eureka, Eureka , Nev. Albert Fries, president; W. H. Coolidge, vice-president; A. J. Selig- n, treasurer; A. F. Holden, managing director; A. P. Mayberry, mine super- ndent. Organized October, 1905, under laws of Maine, with capitalization 00,000, shares $10 par, as a merger of Richmond Mining Co. and Eureka nsolidated Mining Co., which were in litigation, thus reconciling the con- ting interests. The Richmond Mining Co. paid dividends of about $5,000,000, m 465,297 tons of ore produced. The Unted States Smelting, Refining & ning Co. owns circa 35% of the capital stock authorized, which is about % of outstanding stock, and names one of the 3 members of the voting st.

Lands are said to be circa 700 claims, including the old Richmond and reka mines, contiguous properties, opened circa 1869, which were large ore ducers, but were tied up by litigation for some years, until formation of sent company, during which time mines were idle, except for extensive amming, done by tributors. Under former ownership mines were highly ductive and profitable. Ore values are mainly in silver and lead. The reka mine is opened by the 900′ Locan shaft and the Econ incline, with velopment mainly below the 900′ level. The Richmond mine is developed ncipally through the Lizette tunnel, the old bonanza ore bodies apparently continuing below the 600′ level. Ore bodies developed, while low in grade, sibly may turn into higher grade ore. Equipment includes a good mining

plant and an antiquated smelter, at Eureka, 3 miles from the mines, wh been idle for some years. Company has secured the very reasonable rate of $2.75 per ton to Salt Lake smelters, for ore averaging less th per ton in gross values, and, early 1908, was shipping circa 200 tons Property considered valuable and management good.

RICHMOND GROUP GOLD MINES CO. NEW M

Dead. Formerly at Hillsboro, Sierra Co., N. M.

RICHMOND MINE. MON

Mine office: Saltese, Missoula Co., Mont. Chas. J. Heidenreich, m Lands, 6 claims, southwest of Saltese, adjoining the Monitor mine, ope 4 shafts, deepest 275', on a vein parallel to the Monitor, showing fr occurrences of native copper, and auriferous copper ores of good averag values. The property has been a small producer for some years, and to have been worked at a profit.

RICHMOND MINING CO. NE

Dead. Merged, October, 1905, in Richmond-Eureka Mining Co. Fo at Eureka, Eureka Co., Nev.

RICKARD-ELY COPPER CO. NE

Letter returned unclaimed from former office, 20 Broad St., New N. Y. Mine office: Ely, White Pine Co., Nev. G. L. Rickard, pre Webster Bishop, vice-president; Jos. H. Hutchinson, second vice-pre W. A. B. Ogden, secretary; Herbert T. Cook, treasurer. Organized circa ary, 1907, under laws of Arizona, with capitalization $1,000,000, shares Lands, 5 claims, adjoining the Veteran-Ely on the west, slightly pros 1907, by churn drilling. Idle at last accounts.

RIDGE COPPER CO. MICH

Office: 1105-6 Beacon St., Boston, Mass. Mine office: Mass, Ont Co., Mich. Organized October, 1863, under laws of Michigan, with cap tion $500,000, shares $25 par. Has levied assessments of $470,000, an dividends of $100,000. Practically entire stock issue is owned by Ma solidated Mining Co., and it is planned to wind up the corporation and t its landed holdings to the Mass.

CARLOS RIESCO.

Office and works: Tiltil, Santiago, Chile. Property is the Tiltil having railroad connection. Works have two 55-h. p. boilers and three engines, with Blake crusher and two Connersville blowers. Smelter ha cining furnace and 2 water-jacket blast-furnaces. Fuel is Chilean coke, 35.5 pesos, and coal, costing 22.3 pesos, per metric ton. Slags averag 0.5% copper. Employs about 35 men, at average wages of 1.8 pesos da 1903 treated 4,850 metric tons of ore averaging 6.5% copper, produc metric tons of ejes, of about 45% average tenor, containing circa 650 fine copper.

RIGBY MINING & REDUCTION CO. AR

Office: Beaver Falls, Pa. Works office: Mayer, Yavapai Co Col. T. Johns Rigby, president and general manager; F. H. Walker, s and treasurer; preceding officers, R. D. Mead, L. S. Neely and Edward directors; A. W. Hudson, manager; Harry A. Clarke, superintendent.

Property is a custom smelting plant, on a 70-acre site, near May nected by a 3,000' spur with the Prescott & Eastern Railway.

This company holds the Yavapai county rights to the Poehle & C volatilization process, and has a 125-ton reduction plant, blown in, Apr The process of reduction is as follows: from the receiving bins, ore in tram-cars to 2 revolving dryers, one of 40" diameter by 18' length other of 60" diameter by 26' length, heated ore passing from them, by to cars, which take it to the feed-hoppers in the roll-house, latter h

of 30x14" rolls and 1 set of 20x12" rolls, with screens and elevators. Dust rolls is collected by 3 large dust-collectors. Crushed ore is taken from the ns to a 40-ton ore-bin in the mixing house, by an 84' automatic belt-con-r. In the mixing-house, ore and salt from the salt-bins are weighed by 2 of hopper scales, and deposited on a 50' belt-conveyor, which takes the rial to a box-mixer, whence the mixed charge is dumped into a car which s it to 4 feed-hoppers, which feed the charges automatically to revolving aces, in a furnace building 88x132' and 40' high, having four 25-ton re-ing calcining furnaces. Fumes from the ore are drawn from the furnaces ugh the flue-house, which contains 4 sets of 3' wrought-iron pipe, each long, into the condensing house, by 4 large blowers, each capable of lling 6,600 cubic feet of gas per minute. Fumes are cooled by water, in flue-chamber, then forced under pressure into the condensing room, where osited as chlorides, condensing-room fumes going to the filtration room, re all insoluble matter is filtered, and where metallic values are precipi-d, either by electric action, or on iron. Precipitates are melted and re-d in the ordinary manner. The residue of the roasted ore, from which the allic values are supposed to have been volatilized, is carried to the tailings p, in tram-cars. The theory of the process is that the application of heat the mixture of ore, salt and sulphur, causes a chemical reaction, by which sulphur and sodium chloride form sulphate of soda, the chlorine from the uniting with the metals to form chlorides, which pass off in the fumes, l are recovered in the manner previously explained.

The company has made several smelter tests in the past few years, all nounced satisfactory by the management, but apparently has secured no ular production, and the success of the process seems doubtful.

LLITO MINING CO. **ARIZONA.**

Letter returned unclaimed from former mine office, Tucson, Pima Co., Ariz. e and apparently moribund.

NCON MINES CO. **ARIZONA.**

Office: North American Bldg., Philadelphia, Pa. Mine office: Congress uction, Yavapai Co., Ariz. W. C. De Armond, president; S. S. White, vice-sident; Edw. P. Vogel, secretary and treasurer. Organized January, 1904, ler laws of Arizona, with capitalization $1,200,000, shares $1 par, in $200,000 mulative 7% preferred stock and $1,000,000 common stock. Lands, 31 claims, a 570 acres, in the Weaver district, showing auriferous and argentiferous per and lead sulphides.

NCON MINING CO. **ARIZONA.**

Office: care of B. J. O'Reilly, secretary, Bisbee, Ariz. Mine office: [illegible], Cochise Co., Ariz. Organized under laws of Arizona, with capitalization 500,000, shares $25 par. Lands, 27 claims, 22 miles north of Benson, de-oped by a 130' tunnel, showing ore giving assays up to 23% copper. Pro-ably idle.

NGING ROCKS COPPER MINING CO. **PENNSYLVANIA.**

Mine office: Pottstown, Montgomery Co., Pa. Idle several years.

NG VALLEY MINING CO., LTD. **TASMANIA.**

Office: Finsbury House, London, E. C., Eng. Mine office: [illegible] adas Co., Tasmania. H. T. Walker, chairman; H. St. John [illegible] y; Geo. Barker, mine manager. Organized July 20, 1900, under at Britain, with capitalization £125,000, shares 10s. par. Lease hold, on the Ring river. Is a small shipper of argentiferous ploying about 10 men.

O ARRIBA CONSOLIDATED MINES CO.

Dead. Formerly at Tres Piedras, Taos Co., N. M.

RIO BACANUCHI MINING CO. ME

Letter returned unclaimed from former mine office, Bacanochi, A Sonora, Mex. Property shows cupriferous copper and silver-lead ores. S ore shipments were made, 1907.

RIO BLANCO SMELTER. P

Owned by Peruvian Mining, Smelting & Refining Co.

COMPAÑIA MINERA RIO COLORADO. CH

Office: Santiago de Chile. Mine office: Victoria, Santiago, Chile. O ized Dec. 12, 1906, under laws of Chile, with capitalization 300,000 pesos, s 20 pesos par.

RIO DOLORES COPPER CO. U

Office: 731 East 18th Ave., Denver, Colo. Mine office: Castleton, Co., Utah. Employs circa 10 men. C. L. Dyer, president; Victor Elliott, president; Col. Thos. B. Crawford, secretary, treasurer and general man Wm. Eastman, superintendent. Organized Feb. 8, 1906, under laws of Ar with capitalization $2,000,000, shares $1 par. Annual meeting, first Thu in July.

Lands, 15 claims, area 300 acres, also 100 acres in millsites, on M Mountain, at the head of Castle Creek, 6 miles above Castleton, in the L district, showing mainly granite, with porphyritic intrusions, said to car ore bodies, of which 2 are slightly developed by tunnels, a 250' tunnel said to show a 3' vein of high grade auriferous and argentiferous coppe estimated to average 2 to 3% copper, 10 oz. silver and $3 gold per ton. are mainly lead and copper sulphides. Equipment includes a 5-drill ai pressor and 6 log buildings. The company was promoted by Fred G. Sl whose reputation is bad, but Col. Crawford, now in charge, is said to experienced mining man.

RIO DOLORES MINING CO. COLOR

Office: care of W. K. Cowan, treasurer, Chicago, Ills. Mine office: Dolores Co., Colo. Lands, 2 miles north of Rico, are said to show a 3' carrying up to 8% copper.

SOCIÉTÉ DES MINES DE CUIVRE ET DE PLOMB DE RIO FARDIS. SP

Mine office: Molinillo, Ciudad Real, Spain. Organized August, under laws of France, with capitalization 2,500,000 francs, shares 250 f. p develop argentiferous lead and copper properties, near Molinillo. Idle.

COMPAÑIA MINERA RIO GRANDE y DOLORES DE LONDRES. ME

Office: 37 Old Jewry, London, E. C., Eng. Mine office: Guadalup Grande, Coahuila, Mex. A. T. MacSwinney, manager. Property is La mine, carrying argentiferous copper ore, with values mainly in silver. steam and water power, with a 20-ton mill and leaching plant, employing 75 men.

RIO GRIO DISTRICT COPPER CO. (TOBED & CODOS EXPLORATION), LTD. SP

Dead. Title changed, January, 1907, to Aragon Copper Mines, Ltd. merly at Codos, Zaragoza, Spain.

RIO HONDO COPPER CO. NEW ME

Dead. Property sold, circa 1900, to San Cristobal Copper Co. Fo at Arroyo Seco, Taos Co., N. M.

RIO LUNA MINES CO., LTD. SP

d. Formerly at Campo La Lomba, León, Spain. Described Vol.

É DES MINES DU RIO MURTIGA. SP

e: 34 Rue de Provence, Paris, France. Mine office: Encis Spain. Organized Jan. 7, 1904, under laws of France, with capit

00 francs, shares 250 francs par. Property is the Santo Domingo and abel mines. Presumably idle.

GRO MINES, LTD. **SPAIN.**

e: 6 Suffolk St., Pall Mall, London, S. W., Eng. Mine office: Campo ba, León, Spain. Alfred DuCros, chairman; W. T. Cunningham, secre- rganized Aug. 2, 1899, under laws of Great Britain, with capitalization , shares £1; issued, £235,007. Debentures, £15,000 authorized; £14,000 Lands, 8 claims. Idle several years and apparently moribund.

MAL COPPER CO., LTD. **SPAIN.**

d. Wound up August, 1905. Formerly at Figueras, Gerona, Spain. d Vol. VI.

MBO DEVELOPMENT SYNDICATE, LTD. **PERU.**

e: 4 Broad Street Place, London, E. C., Eng. Mine office: Arequipa, Capt. W. B. McTaggart, J. P., chairman; E. J. Summers, secretary; V. Hopkins, manager. Organized Aug. 26, 1905, under laws of Great with capitalization £15,025, in 15,000 shares of £1 par and 500 founders f 1s. par. Property is gold and copper claims near Arequipa.

NIDO COPPER MINES, LTD. **SPAIN.**

d. Voluntarily liquidated, April, 1903. Formerly in Huelva, Spain.

DE COBRE DE RIO TINTO. **MEXICO.**

d. Was succeeded, 1907, by Rio Tinto Mines & Smelting Co. Formerly zas, Chihuahua, Mex. Fully described Vol. VI.

ÑIA MINERA RIO TINTO. **MEXICO.**

e office: Guadalupe, Zacatecas, Mex. Property is said to carry gold, id copper ores.

NTO CO., LTD. **SPAIN.**

e: 30 St. Swithin's Lane, London, E. C., Eng. Mine office: Las e Rio Tinto, Huelva, Spain. Works office: Port Talbot, Glamorgan- ales. Employs circa 11,000 men. Chas. Wm. Fielding, chairman; pre- fficer, Rt. Hon. Earl of Denbigh, Lionel C. G. Sartoris, John MacFarlan n M. Macdonald, directors; J. Gordon Macleod, general secretary; J. Bowes, financial secretary; Turquand, Youngs & Co., auditors; Com- Bank of Scotland, Ltd., bankers; Freshfields, solicitors; Walter J. g, mine manager; R. E. Palmer, assistant manager; W. G. Nash, estates ; G. W. Porteous, traffic manager; Geo. Davey, superintendent; Gordon , engineer; D. Gonzalo Tarin, consulting engineer.

anized March 29, 1873, under laws of Great Britain, with capitaliza- 250,000, increased, November, 1905, to £3,500,000, shares £5 par, in 00 cumulative 5% preference shares and £1,875,000 ordinary shares. e issue of 50,000 ordinary shares, par £5, was sold to shareholders at share, netting the company £3,150,000, for the redemption of an out- bond issue of £2,989,740, at 4%, which was fully retired. Transfer ommon; fee, 2s. 6d.; warrants to bearer issued in denominations of fee 6d., and 5, 10 and 25 shares, fee 1s.; fee for conversion into regis- iares, 2s. 6d. per certificate. Stock Exchange settlement, all shares n the official list. Fiscal year ends with calendar year; accounts are n April, and an interim semi-yearly report is issued in October. Divi- re payable in Paris by the Société Générale, 54 Rue de Provence, and en, Germany, by the Deutsche Bank.

idends were begun 1879, and have been paid continuously, varying according to net earnings. Dividends on the old ordinary shares, of 1879, to 1896, ranged from 6s. in 1886 to 38s. in 1896. On the present shares of £5 par, dividends have ranged from 40% in 1897 to 110% Dividends were small at first, because the company was seriously pped by three different sets of mortgage bonds, bearing 5% interest.

In 1895 the mortgage debt was consolidated into a single issue of £3,
first-mortgage debentures, bearing 4% interest, with a sinking fund an
annual redemption, which would have extinguished the mortgage in 191
by the issue of new share capital, November, 1905, floated at the trem
premium of 1,160%, the company has placed itself in an impregnable fi
position, the credit for this able stroke of finance being due mainly
Fielding. Recent dividends on ordinary shares have been as follows: £3 1
or 72½%, for 1901; £2 10s., or 50%, for 1902; £3 10s., or 70%, for 1903;
or 70%, for 1904; £4, or 80%, for 1905; £5 10s., or 110% for 1906; £2
or 47½%, for 1907.

Gross profits and dividends paid for recent years have been as f
£1,691,723 profits and £1,214,687 dividends in 1903; £1,714,507 profi
£1,214,772 dividends in 1904; £1,900,539 profits and £1,477,187 divide
1905; £2,478,594 profits and £2,139,687 dividends in 1906; £2,139,688 di
in 1907. The company ended 1908 with a reserve fund of £500,000, of
£400,000 was in consols and £100,000 in selected shares. The company'
dends in 1907 were the greatest ever paid in one year by any copper mi

Lands, 23,000 acres, freehold, of which 1,922 hectares, or circa 4,70
were secured from the Spanish government, and 18,300 acres adjoinin
purchased from various private owners. Mining operations are condu
an area of practically 5 square miles.

The Rio Tinto is much the most ancient of the great mines of the
day, and its history stretches back into the mists of antiquity. T
semi-authentic account of the mine dates from the Eleventh Century
Christ, when the Phœnicians traded in copper made from its ores. C
that vigorous young offspring of Tyre, succeeded to the hegemony
Iberian mines, and worked the Rio Tinto extensively, for several c
being displaced, in turn, by the Romans, after the repulse of the secon
invasion, followed by the total overthrow of the Carthaginian powe
Rio Tinto was worked by the Romans, for centuries, upon a very cons
scale, and, after the decadence of the Roman power, the mines were o
in a very crude way, by the Goths. Again the fortunes of war gave the
peninsula to new masters, and the Moors, in turn, were owners and o
of this great copper deposit. Following the expulsion of the Moo
southern Spain, by Ferdinand and Isabella, those most Catholic and m
like sovereigns of Castile and Aragon, the mines fell into the hand
Spaniards, and were reopened by them, very early in the Sixteenth
The Spaniards, while among the world's best miners, and the pio
silver and gold mining in both North and South America, never pa
attention to copper or iron, and, even at home, the Rio Tinto, alth
property of the Spanish Crown, was worked, during its most successful
by foreigners, as it is to this day. In the Seventeenth Century the
came a considerable producer, under the management of a Swed
Wolters, and after his death did fairly well under the direction of
metallurgist named Tiquet. In the Eighteenth Century the mine wa
by the crown to a company of English adventurers, of whom the leadi
was Lady Maria Theresa Herbert. During the chaotic period of the
invasion, early in the Nineteenth Century, the mine was abandoned, a
being reopened, in 1812, by the Spanish Crown, was worked in a sm
only. For the next sixty years the mine was under the management of
lessees, until sold outright, in 1873, to Matheson & Co., of Lon
92,800,000 pesetas, that firm organizing the present company, which ha
one of the most profitable mining corporations in existence.

The remains of mining and smelting operations of the ancients
notable. Don Gonzalo Tarin, consulting engineer of the company,

closely connected with the mine since 1867, in his very able work, norias,'' estimates the quantity of scoria remaining from ancient smelt- perations, whether Roman or Phœnician, or both, at no less than thirty n metric tons, and his acquaintance with the property and its history, his opportunities of estimating and verifying these figures, are perhaps est of any individual living. Lying above slag-piles left by the Phœnic- is a 10′ bed of alluvium, on top of which are the Carthago-Roman slags. smelting practice of the Romans apparently was very good, the slags left hem being as clean as those produced today. It is possible, however, that of the copper left in the old slags has been leached out, during some years of partial exposure to the elements, but it is the opinion of Señor n that the slags have been resmelted, in which case the very latest modern llurgical practice is but a repetition of the work of two thousand s ago.

The only remains of ancient mining tools and machinery that have been d at the Rio Tinto are three oak water-wheels, and some bronze rims of les, which presumably were of wickerwork. There also are many pot- ds, including fragments of miners' lamps of the well-known classic pattern, Roman coins are unearthed occasionally.

The Roman system of mining, so far as can be judged from the evidence ed by the Rio Tinto mine, apparently was to cut narrow seams and slab he ore in large masses, either by wedging, or by the agency of quicklime, ed into the crevices and then wetted, and possibly both methods were used, being the systems most generally employed, previous to the adoption of owder for blasting. The richer veins were followed persistently, and the nts were good judges of values, as has been learned by many a modern ng company that has reopened old mines in Spain and Italy, in the hope nding that much high-grade ore was left unmined. The Rio Tinto was not ed out, because the deposit was too vast, but the rich ores of the secondary of enrichment were quite effectually extracted, in all the old workings. cations favor the hypothesis that the ancient miners at the Rio Tinto used -faced tools and hand-drills, working directly on the faces and in the ore es.

The Rio Tinto is situated in a rugged district, in a spur of the Sierra evallo, though the hills sometimes are held to be a spur of the Sierra ena, which itself is a branch of the famous Sierra Morena. The Rio , however, is separated from the Sierra Andevallo, which is some 12 miles nt, by the rivers Odiel and Iárrama. The mines are 51 miles by rail from seaport of Huelva, in the province of that name, lying in the extreme westernmost corner of Spain, near the Portuguese boundary.

The ore bodies of the Rio Tinto occur in mammoth lenses, with clay-slate e south and porphyry to the north, and are surmounted by large gossans, decomposed. The surface ore has been leached to the point of absolute hlessness, the zone of secondary enrichment beginning at a depth of oximately 100′, and continuing to an average depth of 300′. Diamond borings have shown untouched ore bodies carrying upwards of 130,000,000 tons of ore, giving sufficient reserves for nearly 70 years' production, at present rate of mining, and it is unlikely that the full extent of the ore es available has been proven. For removal of overburden there are 4 m-shovels, each with dippers of 4 cubic yards capacity, and about 2,000,000 meters of overburden are removed yearly.

Ore, as extracted, is divided into 3 classes. Smelting ore carries 4 to 6% er, export ore about 3.5% copper and 45 to 50% sulphur, while leaching carries 1.5 to 2% copper only. The average percentage of copper carried he ores treated has ranged from 1.5% copper, in 1876, the first year of

production by the present company, to 3.234% in 1884, the average of copper extraction being 2.39% in 1903, 2.34% in 1905 and 2.411% in 1906, in which year the lower grades of ore averaged copper returns of 2.302% and 1.198%. The ores carry an average of 1.5 oz. silver per long ton, with traces of gold, and considerable silver is saved, by the Claudet process, at the smelter. About one-third of the total production is exported for sulphur contents, and about one-third of the ore produced is smelted, balance being leached, or sent abroad to burners. The ores average 4 to 5% copper in the zone of secondary enrichment, and with depth decline gradually in value, until at about 1,000′ depth the average copper tenor is only about 1.25%. The main ore body formerly was considered to carry chalcopyrite, sparingly disseminated in massive iron pyrites, but apparently the bulk of the ore is cupriferous pyrite, carrying copper in the form of fine grains of chalcocite, not chalcopyrite, as formerly generally held. Owing to the ore being unusually rich in sulphur, the shipping ores of the Rio Tinto are in good demand, and, in addition to supplying various British works, the company exports washed sulphur ore, in very large quantities, to Germany, France, Belgium and sundry seaboard acid works in the United States. The reserve heaps at the mine are estimated to carry about 150,000 long tons fine copper, and the copper output of the mine has shown little change since 1898.

The Rio Tinto has 3 mineral zones, carrying a succession of lenses, these being known as the South or Nerva lode, the Middle or San Dionisio lode and the North lode, in addition to which there are 2 smaller detached lenses, adjacent to the North lode, which, like it, are being worked open-cast. There are 5 different mines, of which 3 are worked open-cast and 2 underground, though one of the latter is being changed over for open-cast extraction. The underground mines are worked pillar-and-stall, with levels at intervals of 12½ meters, levels being opened 4 meters high, and the entire floor divided into galleries and crosscuts of 4x4 meters, leaving pillars of 6x6 meters, which is not an entirely satisfactory method of extraction, leaving, as it does, more ore in the pillars than is mined.

The San Dionisio mine, which is the westernmost, also is the deepest, having a shaft of nearly 1,200′ depth. Work was begun, 1907, in changing over the San Dionisio for open-cast extraction, and open pit production probably will begin 1911. The San Dionisio is likely to afford the chief source of ore supply for several decades to come, and the management has laid out work for 10 years in advance.

The principal workings of the Rio Tinto are open-cast, and in these the capping is sliced down, in terraces, and the ore mined in terraces also, cars being brought in by locomotives to as great depths as practicable, both in stripping and quarrying. The possibility of using the caving system for underground mining was considered, but apparently an adverse decision has been reached. The principal disadvantage of underground mining, beyond the loss of more than half of the ground left unmined in the pillars, is the scarcity and high price of wood for timbering, which could be obviated, largely, by the adoption of the caving system.

Some trouble was caused, early 1908, by subsidance of the ground over the South lode mine, this causing the collapse of a considerable number of buildings. This subsidance was not unexpected, though coming somewhat sooner than anticipated, and the buildings lost will be replaced at other points.

Owing to the extensive employment of open-cast extraction, the Rio Tinto lacks the immense hoists and powerful machinery found at the other great copper mines of the world, which is due, not to lack of enterprise, but to the mine's ability to dispense with such expensive machinery, the underground workings being neither especially deep nor extensive. The company erected,

1908, a large central electric power plant, to replace a number of widely scattered and uneconomical steam installations.

The methods of lixiviation followed by the Rio Tinto are described at length in the chapter on hydrometallurgy in this volume. In addition to the amount of copper estimated in the teleras, or primary leach-heaps, there are upwards of 100,000 long tons of copper in the tereros, or secondary leach-heaps. Owing to alternations of heavy rainfalls with protracted seasons of drought, water storage is necessary, dams having been constructed for that purpose, and an additional reservoir was built, 1907. The average rainfall of the Sierra Morena, 1873-1905, was 28" yearly, but, in 1906, the precipitation was only 18", causing serious trouble, during 1907, from lack of water, heavy rainfalls at the end of 1907 giving an ample supply for 1908 operations. The ore leached at the mines is no longer calcined, the copper becoming soluable by natural weathering, assisted by systematic sprinkling. About 7,000,000 gallons of leach-water, strongly charged with copper, are treated daily, in the various lixiviation plants of the Rio Tinto. The product of the leaching plants is cascara, or cement copper.

There are 5 towns for workmen on the property, and the company has planned an unusually heavy building campaign for 1909, as a large number of dwellings must be constructed, to replace those destroyed, early 1908, by subsidance of the workings of the South lode.

The smelter, at the mine, built 1902, is treating an increasingly large proportion of ore on the ground, including considerable ore of a grade formerly leached. The smelter has two 42x160" elliptical water-jacket cupolas, 23' 4" over all in height, with charging doors 10' above the bottoms, which are detachable, and mounted on wheels. Each furnace has 8 water-jackets and 2 charging doors, ore and fuel being charged alternately. The furnaces have continuous discharge into 30-ton settlers, 12' in diameter and 40" high, which have continuous slag discharge. Furnace product is matte, of 29 to 34% copper tenor.

Molten matte is taken, in 8-ton ladles, by electric traveling cranes, to the converter department, where there are 6 stands, rotated hydraulically, from a pulpit. Shells are 80x120", of horizontal barrel type, with spherical valves and 12 tuyeres each, and are in 2 parts, for convenience in lining. Shells are double-lined with a 4" external course of fire-brick, rarely replaced, and an inner section, 22" to 26" thick, of ground silica and low-grade quartzose copper ores, with 10% of clay for a binder. When newly lined shells have a capacity of only 3 to 4 tons each, increasing to about 8 tons when the inner linings are nearly burned out. The smelter product is converter bars, of 98 to 99% copper tenor.

The mines are connected with the seaport of Huelva by the Rio Tinto-Huelva railway, a single-gauge line of 84 kilometers length, built, 1873, by the company. This line does a general freight and passenger business, in addition to handling the company's heavy traffic, and earns substantial net profits. At Huelva, which probably is built on the site of the old Phœnician city of Onoba, at the junction of the Tinto and Odiel rivers, known to the Phœnicians and Carthaginians as the Urium and Anas rivers, the company has extensive railway terminals and wharves. The Rio Tinto company owns the steamer Don Hugo, of 1,249 tons registered burden, plying between Spain and Wales.

The Rio Tinto employs nearly 11,000 men, in Spain, of which number about 60 members of the staff are British, the balance being native workmen, latter earning average wages of 15 reals, equal to about 60 cents, per day of 8 and 9 hours. There is no Sunday work, and the men are paid daily, the labor being docile and giving very efficient and satisfactory workmen, in all grades. The population of the dual mining township of Rio Tinto-Nerva is

about 27,000, and of the port of Huelva 24,000, hence it is estimated that th Rio Tinto Co., Ltd., is the direct source of support of 50,000 people in Spai and indirectly supports perhaps half as many more in Spain, England and upo the Continent.

For many years the company maintained extensive smelters and aci works at Cwm Avon, Wales, but the lease was surrendered, 1906, the work being poorly located for receipt and dispatch of material.

The new Welsh reduction plant, at Port Talbot, Glamorganshire, Wale is a modern smelter of good design and equipment, receiving material by se from Spain, and having direct rail connection with the Great Western Rail way. Electric power is used throughout, and there are 2 Temperley trans porters, operated electrically, for carrying bags of precipitate and bars into the ore-sheds. The Port Talbot works have five 30-ton refining furnaces, tap charged by cars operated electrically, and the reverberatory furnaces have side-slag discharge. Slags from the reverberatories, carrying 4 to 6% copper are resmelted in a water-jacket blast-furnace. The works have mechanical ladleing, with traveling carriages running on rails, the carriages having ball bearings, with metal weights on the handles to counterbalance the charges. The cinder from the acid plant is treated by the Henderson wet process, for the extraction of copper.

Production of copper, for the past 5 years, has been as follows: 80,214,400 lbs. fine copper in 1904; 72,307,200 lbs. in 1905; 75,379,520 lbs. in 1906; 72,390,080 lbs. in 1907. Ore production has been as follows: 1,918,538 long tons in 1903; 1,948,819 tons in 1904; 1,930,100 tons in 1905; 1,923,716 tons in 1906; 1,906,948 tons in 1907. Average cost of copper is about 7 cents per pound. About two-thirds of the ore extracted is treated locally and balance shipped, and copper production is approximately 60% from smelting ore and precipitate, and 40% secured from the residue of ore shipped for sulphur burning.

The management of the Rio Tinto happily combines British conservatism with Twentieth Century progress, and the mine itself, having been a producer for three thousand years, scarcely requires endorsement.

RIO TINTO COPPER MINING CO. WYOMING

Dead. Formerly at Encampment, Carbon Co., Wyo.

RIO TINTO COPPER SYNDICATE, LTD. TRANSVAAL

Dead. Liquidated August, 1908. Former office was Robinson's Bldg., Johannesburg, Transvaal. Capitalization was £6,000, shares £1 par, with working capital of £2,000. Property was the Farm Klipplaatdrift No. 52. Formerly in the Middelburg district, Transvaal.

RIO TINTO DEVELOPMENT CO. U. S. A.

Office: Majestic Bldg., Denver, Colo. W. W. Ellis, president; A. A. Marshall, secretary and treasurer. Organized January, 1908, under laws of Arizona, with capitalization $2,750,000, shares $1 par, in $250,000 cumulative 15% preferred stock and $2,500,000 common stock. Was formed to buy stocks in copper mining companies.

RIO TINTO GOLD & COPPER CO. ARIZONA

Dead. Formerly at Prescott, Yavapai Co., Ariz. Described Vol. VI.

RIO TINTO (HILLGROVE) COPPER MINES, N. L. AUSTRALIA

Office: Charters Towers, Queensland, Australia. Organized Aug. 3, 1907, with capitalization £8,000, shares 2s. 6d. par.

COMPAÑIA MINERA RIO TINTO MEXICANO. MEXICO

Office: Chihuahua, Mex. Mine office: Terrazas, Chihuahua, Mex. Employs 150 men. Juan A. Creel, president; Frank Fletcher, general manager; H. L. Schneider, superintendent.

Lands, 96 pertenencias, area circa 200 acres, including the Rio Tinto group

0 hectares, at Terrazas, 25 miles north of Chihuahua, on the Mexican Cen- Railroad, and the Savanarola group, at Savanarola, circa 50 miles south hihuahua and 35 miles west of Ortiz, latter carrying argentiferous copper lead ores.

The Rio Tinto Mexicano mine, opened 1860, closed 1902, and reopened a 1905, shows limestone and altered andesite, carrying 5 lenticular ore ies, traced 1,500 meters, in a metamorphic zone between limestone and ptive rocks, ore, mainly in limestone, occurring apparently as replacements, as lenses, between the bedding planes of limestone, near a large intrusive rtzite dyke. The ore bodies are erratic in size and occurrence, but are con- ted, and practically continuous, as a rule. The limestone has an average of 45° NW., carrying 5 ore bodies, of 5′ to 6′ average width. Ores, as de- oped, are mainly oxidized, and are estimated to average 2.5% copper, with ces of lead and zinc, 5 oz. silver and 0.02 oz. gold per ton.

Development is by the 412′ Verde shaft, 350′ Promontorio shaft, 150′ nce shaft, 120′ Pedernal shaft, 180′ San Martin shaft and 100′ Vinagre ft, with about one mile of workings.

Equipment includes a 50-h. p. gas plant at the mine, and a 100-h. p. steam nt at the smelter. There are 5 hoists, of 6 to 22 h. p., good for circa 500′ th. Buildings include various shops, of adobe, and 5 stone shafthouses, h 150 adobe dwellings for workmen.

The smelter, at Terrazas, one mile from the mine, receiving ore by wagon l rail, is reached by a 1-kilometer spur from the main line of the Mexican tral Railway. Water is secured from a pumping station, one mile distant, ough a 4″ pipeline. The smelter, enlarged 1908, which does a general cus- business, has a 200-ton water-jacket blast-furnace, making matte averag- 50% copper, 50 oz. silver and 0.6 oz. gold per ton, sent to the Aguascalientes rks for refining. The smelter is planned as the first unit of a 600-ton per and lead plant. Mine fuel is wood, costing 7 pesos per cord, and coal, ting 13 pesos per metric ton, and smelter fuel is coke, costing 19 pesos ton.

Production was circa 1,000,000 lbs. fine copper in 1906, circa 1,400,000 in 1907, and circa 1,500,000 lbs. in 1908. Ore treated, 1907, was 27,000 tric tons, averaging circa 2.5% copper, secured at a mining cost of 7 pesos ton, and smelted at a cost of about 7 pesos per ton, giving an average t for finished copper of 12.5 cents per ton.

The company plans deepening its shafts and opening new ore bodies, also ilding an addition to the smelter, material for which was on the ground, e 1908, and constructing a narrow-gauge railroad between the mines and elter. In August, 1908, the mine was producing circa 75 metric tons of ore ily, averaging 2.5 to 3% copper, 5 oz. silver and 0.02 oz. gold per ton. The ne, while low in average tenor, has very large ore bodies, with a favorable ation, and the management is considered good.

O TINTO MINES & SMELTING CO. **MEXICO.**

Mine office: Terrazas, Chihuahua, Mex. Martin J. Condon, president; hn M. A. Conner, general manager; W. C. Murray, superintendent. Organ- d 1907, under laws of Mexico, with capitalization 3,000,000 pesos, as suc- sor of Minas de Cobre de Rio Tinto. Property is described under title of mpañía Minera Rio Tinto Mexicano.

O TONTO COPPER CO. **ARIZONA.**

Letter returned unclaimed from former mine office, Wickenburg, Maricopa , Ariz. Lands, 15 claims, in the Picacho district, east of Wickenburg, said show gossans of 200′ to 300′ width, traceable up to 700′ in length, with ores rying 2 to 25% copper.

RIO VERDE COPPER CO.

Letter returned unclaimed from former office, Kansas City, M office: Baborigame, Mina, Chihuahua, Mex. Oliver Krull, manager. zation, $2,000,000. Lands are the San Carlos group, 20 miles from Ba and circa 50 miles from Choix, having 2 shafts, one showing a 2′ vein copper and lead sulphides, and the other a 2′ vein of copper sulphides 12 to 15% in tenor. Presumably idle.

RIO VISTA GOLD & COPPER MINING CO. CALIF

Office: 25 Nevada Blk., San Francisco, Cal. Mine office: Fair Dorado Co., Cal. L. H. Hand, president; R. M. Harris, secretary; J. ford, superintendent. Organized January, 1901, under laws of South with capitalization $1,000,000, shares $1 par.

Lands, 5 claims, 2 patented, area 100 acres, 3 miles from Fair Play, ing the Consumnes mine, area 40 acres, opened by a 400′ shaft, said to 23′ vein, carrying a 4′ paystreak of bornite giving average assays of cir copper and $10 combined gold and silver values. Mine has about 500′ nels, the Volcano tunnel being claimed to show a 10′ vein carrying Equipment is said to include a steel gallows-frame, hoist, and 3-drill compressor, using baby drills.

The company was said to be building a 30-ton smelter, but same to materialize, and the company disappeared from its former office. C is viewed with suspicion, on account of extremely untruthful advertisin early days, and the fact that it does not pay its bills.

RIPLE COPPER MINES, LTD. NO

Office: Finsbury House, Blomfield St., London, E. C., Eng. Or May 8, 1908, under laws of Great Britain, with capitalization £175,000, £1 par, to acquire mines in Norway.

RIP VAN WINKLE CONSOLIDATED GOLD MINING & MILLING CO. WY

Office: Laramie, Wyo. Mine office: Morgan, Carbon Co., Wyo. Swigart, secretary and treasurer.

RISING SUN COPPER MINING & SMELTING CO. MAR

Dead. Formerly at Mt. Washington, Baltimore Co., Md.

RITO ALTO COPPER CO. COL

Office: 102 Exchange St., Portland, Me. Mine office: Hillside, Co., Colo. H. M. Comstock, general manager. Capitalization $1,500,00 $1 par, half common and half 8% preferred shares. Lands, circa 3 Company claimed to have 3½ miles of underground workings, and to ing a 50-ton reduction plant, but neither statement verified nor co credible.

RIVERSIDE COPPER CO. AR

Dead. Formerly at Morristown, Maricopa Co., Ariz. Described

RIVERSIDE COPPER MINING CO., LTD.

Office: Wardner, Idaho. Letter returned unclaimed from form office, Cataldo, Kootenai Co., Idaho. Lands are about 10 miles from

ROARING FORK MINING & MILLING CO. WY

Dead. Formerly at Rambler, Carbon Co., Wyo.

ROBERTA MINING CO.

Letter returned unclaimed from former mine office, Mullan, Shosh Idaho. Thos. Roberts, manager. Lands, 12 claims, patented, well t one Nine Mile Creek, having several short tunnels, lower, of 100′, plann driven 2,000′, to give a back of 800′, to tap 4 parallel veins, 1 of whi surface ores assaying up to 6% copper, 10% lead, 16 oz. silver and per ton.

[redacted]

[redacted]

[redacted]

ROCKY MOUNTAIN CONCENTRATING & MILLING CO. COLORADO.

Mine office: Black Hawk, Gilpin Co., Colo. Ores carry gold, silver and copper. Has gasoline power, 25-stamp mill and 75-ton concentrator. Presumably idle.

ROCKY MOUNTAIN COPPER CO. WYOMING.

Dead. Formerly at Encampment, Carbon Co., Wyo. Described Vol. VI.

ROCKY MOUNTAIN SMELTING CO. COLORADO.

Dead. Property was the Rocky Mountain Smelter. Formerly at Florence, Frémont Co., Colo.

SOCIÉTÉ DES MINES DE CUIVRE DE RODAM. PORTUGAL.

Office: Brussels, Belgium. L. Maudet, R. Hoëd, E. Fournier, P. Steenlé and L. Mourgues, directors; Jacques François, commissaire. Organized Feb. 28, 1906, under laws of Belgium, with capitalization 1,000,000 francs, shares 200 francs par. Presumably idle.

RODMAN MINING & MILLING CO. NORTH CAROLINA.

Dead. Formerly at Guilford College, Guilford Co., N. C.

ROEBURNE COPPER & GOLD MINES, WESTERN AUSTRALIA, N. L. AUSTRALIA.

Office: Sydney, N. S. W., Australia. Mine office: Roebourne, Western Australia. Organized circa January, 1907, with capitalization £40,000, shares 10s. par. Lands are the Carlow Castle group, leasehold, carrying 2 ore bodies, said to show considerable ore. Shipped, 1907, several small trial parcels of copper ore to New South Wales smelters, but, owing to fall in price of copper latter half of 1907, has concentrated efforts on gold claims.

ROGERS COPPER & IRON CO. TENNESSEE.

Dead. Formerly at Ducktown, Polk Co., Tenn. Described Vol. VI.

ROGERS FREEHOLD COPPER MINES, LTD. AUSTRALIA.

Office: Townsville, Queensland, Australia. Organized Aug. 31, 1907, under laws of Queensland, with capitalization £65,000, shares 10s. par.

ROGERS MINING CO. COLORADO.

Dead. Formerly at Pearl, Larimer Co., Colo. Described Vol. VI.

ROGERS SPRINGS MINING CO. ARIZONA.

Office: Detroit, Mich. Mine office: Cave Creek, Maricopa Co., Ariz. Lands, supposedly 20 claims, 36 miles from Phœnix, the nearest railroad point. Company is said to contemplate a smelter, with a first unit of 100 tons.

ROGUE RIVER MINING & SMELTING CO. OREGON.

Dead. Was abortive. Formerly at Grants Pass, Josephine Co., Ore. Described Vol. VI.

ROHR-GEDDES MINING & DEVELOPMENT CO. NEW MEXICO.

Office: Raton, N. M. Mine office: Clayton, Union Co., N. M. Fred Rohr, president; Robt. Vogl, vice-president; L. G. Gregory, treasurer; Frank A. Wall, secretary; J. E. Geddes, general manager. Lands, 420 acres, a few miles west of the Pittsburg Copper Co., in the Peacock Cañon district, having several pits and shafts of 15′ to 40′ depth, and a 267′ shaft showing sulphide ore said to assay 22% copper, with small gold and silver values.

RAFAEL ROJAS. CHILE.

Office and mine: Tres Puntas, Tocopilla, Antofagasta, Chile. Property includes Tres Puntas mines, showing a vein traceable 140 meters and opened to depth of circa 100 meters. In 1904 produced circa 200 metric tons of ore averaging about 17% copper tenor.

RONQUILLO COPPER CO. MEXICO.

Office and mine: 2 Postoffice Bldg., La Cananea, Arizpe, Sonora, Mex. A. D. Nanney, president; G. C. Eastman, vice-president and superintendent; P. J. Tehaney, secretary. Organized Aug. 31, 1905, under laws of Arizona,

pitalization $1,000,000, shares $1 par. Also is organized under laws of as Ronquillo Mining Co., S. A.
ids, 72 pertenencias, well timbered, known as the Ronquillo group, 4 om Janoverachi, 8 miles south of Cananea and one-half mile from the river. Formerly owned the Swansea group, sold circa 1907.
Ronquillo mine shows antigua workings, on a vein up to 40′ width, e nearly one mile, carrying cuprite, melaconite, malachite and azurite face, with an iron-porphyry gangue. Development is by tunnel and , of which No. 1 shaft, 71′ deep, shows 40″ of ore at the bottom, aver- 3% copper. No. 2 shaft, 32′ deep, has given ores assaying up to 35% Both Nos. 1 and 2 shafts were abandoned on account of soft ground. he main working shaft, with 2 compartments, is sunk in country rock, circa 100′ deep at last accounts. Water in this shaft is strongly im- d with copper, and the ores carry fair gold and silver values.

ILLO MINING CO., S. A. **MEXICO.**

he Mexican incorporation of the Ronquillo Copper Co.

ERG COPPER CO., LTD. **TRANSVAAL.**

d. Liquidated, 1907. Formerly in the Transvaal.

ERG MINERALS DEVELOPMENT CO., LTD. **TRANSVAAL.**

ce: Oceana Bldgs., Johannesburg, Transvaal. Organized May, 1908, ws of Transvaal with capitalization £150,000. Company has no con- with New Rooiberg Minerals Syndicate, Ltd. Lands, in the Rooiberg of the Transvaal, were taken over mainly from the Oceana Mineral ., Farrar Bros., and Anglo-French, Ltd.

TS COPPER CO. **CAPE COLONY.**

ce: care of H. Sothcott, secretary, Johannesburg, Transvaal. Mine Upington, Cape Colony. Chas. A. O. Bain, chairman; preceding officer, Poole, Gustav Sonn and W. J. Holmes, directors. Organized August, der laws of Transvaal, with capitalization £6,000.
ids are mining rights to the Farm Rooiputs, area 13,400 morgen, equiva- circa 25,000 acres, adjoining the Areachap property on the north, held option from June 30, 1908, at £1 per month for first year, and month for second year, with right to remove all ore at 2s. 6d. per ton, term of the option, and privilege of purchasing the mineral rights on m Rooiputs for £10,000 and 500 shares in any company floated. Dia- have been discovered on the farm, and it is supposed to carry the ex- of the Areachap ore bodies.

WOOD COPPER CO. **ARIZONA.**

ie office: Globe, Gila Co., Ariz. Idle and apparently moribund.

VELT GOLD & COPPER MINING CO. **ARIZONA.**

ce: care of W. G. McDonald, president and general manager, P. O. , Bisbee, Ariz. Mine office: Ft. Thomas, Graham Co., Ariz. Property, from Ft. Thomas, has a 60′ shaft showing cuprite, malachite, chalco- chalcopyrite, of good assay values. Idle several years.

VELT GOLD, SILVER & COPPER MINING CO. **MONTANA.**

d. Was organized May, 1906, under laws of Montana, with capitali- 1,000,000; shares $1 par. Directors were Del Amsden, Simon Bank, Hogevoll, Daniel McNichol and Wm. Robertson. Formerly at Butte, ow Co., Mont.

IVER GOLD & COPPER SYNDICATE. **ONTARIO.**

ce and mine: Sault Ste. Marie, Algoma, Ont. B. W. Harris, president; llivan, vice-president; Alex McIntyre, second vice-president; T. Robin- retary; Wm. Calder, treasurer. Organized under laws of Ontario, with ation $1,000,000. shares $1 par. Lands are 40 acres surface rights, eral rights to 640 acres, in Section 32, Township of Aweres, 11 miles

north of Sault Ste. Marie, on the Algoma Central railroad. Lands have a 70′ shaft, showing a vein of 12′ to 16′ width, traceable circa 1,000′, carrying auriferous and slightly argentiferous copper ore, giving average assays of 2.37% copper.

RÖROS KOBBERVAERK. NORWAY.

Mine office: Röros, Trondhjem, Norway. Employs circa 700 men. Property is a group of old mines, including the Storvarts, Kongens, Kristian VI, Muggruben and Arvedals Grube, partly owned by the Norwegian government. From A. D. 1646 to 1897, this group of mines produced 73,000 metric tons fine copper, and exported 260,000 tons of pyrites, the aggregate value of this product being upwards of $35,000,000.

The Kongens and Arvedals groups carry chalcopyrite, and ore at the other properties is cupriferous pyrite, the ores ranging in copper tenor from 4.5 to 5% in the Kongens group, about 5% in the Muggruben, up to 6 to 7% in the Storvarts mine, the pyritic ores averaging about 45% sulphur.

Equipment includes a hydraulic power installation. The workmen are treated with great consideration, company running a special train to carry the men from the mine at Saturday noon, and bringing them back again similarly Monday morning.

Ore is matted in water-jacket blast-furnaces to a first-fusion product of about 37% copper tenor, which is resmelted to low grade pimple-metal, averaging 78% copper, which, in turn, is blown up, in Bessemer converters, to black copper of 95.5% tenor.

About 40% of the ore produced is exported for sulphur values only, though slightly cupriferous, and the balance smelted on the ground. Production, 1904, was 18,000 metric tons of ore smelted, averaging a trifle better than 4% copper, and 11,000 tons of pyrites exported, giving a total output of 1,641,920 lbs. fine copper, and in 1907 was 12,700 metric tons of cupriferous pyrite, yielding 1,365,000 lbs. fine copper. This is the second largest copper mine of Norway, and apparently should be able to increase production in the near future.

ROSALIE COPPER CO. ARIZONA.

Mine office: Meyer, Yavapai Co., Ariz. Samuel L. Casey, president; Wm. Nellis, first vice-president; Marshall Haddock, second vice-president; W. N. Rynerson, treasurer; E. M. Metcalf, secretary; Geo. C. Meese, general manager; preceding officers, Chas. Schifferdecker and Wm. A. Moses, directors. Organized under laws of Arizona, with capitalization $3,000,000, shares $1 par.

Lands, 9 claims, patented, area 180 acres, in the Copper Creek district, circa 25 miles southeast of Mayer and 18 miles from Cordes Siding, nearest railroad point, with a wagon road between. Mine has numerous pits and shafts, of 10′ to 148′ depth, and a 420′ tunnel, showing a 2′ to 3′ vein carrying native copper, cuprite, azurite, malachite and a little melaconite in the oxidized zone, followed by bornite, chalcopyrite and occasional chalcocite, giving assays up to 23% copper, average assays being 4.15 to 7.3% copper, with small gold and silver values. Has a 50-h. p. gasoline engine and air-compressor, and shipped, 1907, a little ore, returning circa 8% copper. Company's prospectus is filled with misleading general statements regarding the profits of copper mines. Closed down, 1907, but plans resumption.

ROSA AMARILLA COPPER CO. MEXICO.

Office: 33 Portland Blk., Chicago, Ills. Mine office: Pueblo Nuevo, Sayula, Jalisco, Mex. A. L. Dewar, president; Danl. Campbell, vice-president; F. W. Harnwell, secretary; L. E. Fuller, treasurer; John Mann, superintendent; John A. Kruse, engineer. Organized July 25, 1904, under laws of Maine, with capitalization $5,000,000, shares $1 par, and is organized under laws of Mexico as Rosa Amarilla Copper Co., Sociedad Anonima.

Lands, 5 groups, area circa 300 acres, including the Rosa Amarilla and

Ethel copper groups, and the Talpurito silver group, circa 30 miles southwest of Autlán. Company has 3 water rights denounced, and has leased a timber tract of 1,800,000 acres, which can furnish timber at practically cost of cutting.

Lands show 4 ore bodies, probably lenses, averaging 100′ and upwards in width, in a zone of circa 600′ width, with outcrops traceable several miles. Average of upwards of 300 assays gave 7.8% copper, 6 oz. silver and a trace of gold, from oxide, carbonate and sulphide ores. Development is by 2 shafts, deepest 105′, and 4 tunnels, in addition to which some diamond drilling has been done. Property is 26 miles from the Pacific and company controls a harbor known as Puerto de Natividad. A road between the mine and port can be built with a grade not exceeding 4% at any point, and averaging about 100′ per mile.

COMPAÑIA MINERA ROSARIO. **ARGENTINA.**

Mine office: Calamuchita, Córdoba, Argentina. Ore body is iron pyrites, carrying chalcopyrite, with quartz gangue, averaging 5% to 6% copper. Has a smelter with a 36″ blast-furnace, making matte averaging 65% copper and 30 oz. silver per ton, sent to Great Britain for reduction and refining, when mine is working. Idle at last accounts.

MINA ROSARIO. **CHILE.**

Mine office: Tamaya, Ovalle, Coquimbo, Chile. Is owned by the Familia Lecaros. Mine, opened 1850, is 590 meters, or about 1,900′, in depth. Produced, 1866-1888, ore to extent of 64,589 short tons, averaging 17.7 to 29.4% copper tenor. Idle for some years, owing to decreased ore values at depth, and heavy timbering charges, but, with a railroad to Tongoi, and modern equipment, could be worked to advantage.

MINAS ROSARIO i PROVIDENCIA. **CHILE.**

Mine office: Chañarcillito, Caldera, Atacama, Chile. Mine shows 2 parallel ore bodies, averaging 8 to 10 meters width, in diorite and limestone, traceable for some distance, one ore body showing oxidized ores of copper, associated with spathic iron, these averaging about 4% in tenor and requiring concentration. The second vein carries oxidized ores only, to depth opened, these averaging about 5% copper. Ores, which are free smelting, are sent to Tierra Amarilla for reduction. Production, 1903, was about 450 metric tons of ore, averaging 16% in tenor, equivalent to about 160,000 lbs. fine copper.

ROSELLE MINING CO. **BRITISH COLUMBIA.**

Dead. Formerly on Haskins Mountain, Liard River division, Cassiar district, British Columbia.

ROSEMONT COPPER CO. **ARIZONA.**

Office: 42 Broadway, New York, N. Y. Mine office: Rosemont, Pima Co., Ariz. Is controlled by the Lewisohn interests. Geological conditions are said to be similar to those at Bisbee, and ore bodies apparently are large. Idle for some years.

ROSEWOOD CREEK COPPER & GOLD MINING CO., LTD. **AUSTRALIA.**

Office: 7A Upper St. Martin's Lane, London, W. C., Eng. R. K. Evans, secretary. Mine office: Rosewood, Denison Co., Queensland, Australia. Organized July 31, 1903, as a reconstruction of Great Northern Copper & Gold Mining Co. of Queensland, with capitalization £100,000, shares 5s. par. Lands, 65 acres. Idle several years and apparently moribund.

ROSSLAND-GREAT WESTERN MINES, LTD. **BRITISH COLUMBIA.**

Dead. Reorganized, May 17, 1902, as Rossland-Kootenay Mining Co., Ltd. Formerly at Rossland, Trail district, B. C.

ROSSLAND-KOOTENAY MINING CO., LTD. **BRITISH COLUMBIA.**

Office: Salisbury House, London, E. C., Eng. Mine office: Rossland, Trail district, B. C. C. Williamson Milne, chairman; Bedford McNeill, consulting engineer; F. A. Labouchere, secretary. Organized May 17, 1902, under

ws of Wyoming, with capitalization $1,500,000, shares $1 par. Lands, 5 aims, area 50 acres, 100 miles from nearest railroad, having about 1,000′ of nnels, said to show considerable ore assaying $3.50 to $150 per ton, in gold, lver, copper and lead. Idle some years.

OWAN GOLD & COPPER MINING CO. **NORTH CAROLINA.**

Dead. Formerly at Gold Hill, Rowan Co., N. C. Described Vol. VI.

OYALBERG COPPER MINES, LTD. **NORWAY.**

Office: 2 Basinghall Ave., London, E. C., Eng. Mine office: Kongsberg, hristiania, Norway. E. T. Evans, secretary; E. C. Plews, manager and engiseer; Ingwolf Otterbeek, superintendent. Organized Apr. 24, 1903, under laws f Great Britain, with capitalization £100,000, shares £1 par; issued, £81,600. Debentures, £1,500 at 8% and £7,500 at 5%.

Lands, 18 claims, area circa 50 acres, title by crown grant, also 20 acres imber lands, in the Fiskum district, opened by shafts of 40′, 70′ and 100′, and y tunnels of 120′ and 250′, showing four 3′ fissure veins in volcanic micahists, giving average assays of 14% copper, 20% lead, 10% zinc and 24 oz. ilver per ton, from sulphide ores, and estimated to show 30,000 tons of ore, with 15,000 tons blocked out for stoping. The West Norway railroad is 2 miles listant, and it is proposed to develop 100 h. p. from a nearby waterfall. A small concentrator has been erected at the mine, and small shipments of conentrates have been made to British works.

OYAL CONSOLIDATED COPPER CO. **NEVADA.**

Dead. Organized 1907, under laws of Arizona, with capitalization 2,500,000. L. L. Crisp was president. Apparently was promoted by the late Rev. Col. W. P. Fife. According to printed reports, the company's expert explained that the formation was "dyarite," porphyry and limestone, with large "burns" of iron gossan, ore deposits consisting of copper, gold and silver, ying in a fissure "cutting" a contact of porphyry and lime. The ore body as claimed to be 250′ wide. Obviously was merely a bit of stock-jobbery. ormer office was at Goldfield, Nev. Former mine office was at Mina, Esmeralda Co., Nev.

OYAL CONSOLIDATED MINES OF EL COBRE, LTD. **CUBA.**

Dead. Succeeded, circa 1902, by El Cobre Mines. Formerly at El Cobre, antiago de Cuba.

OYAL COPPER CO. **NEW MEXICO.**

Dead. Property sold, 1901, to Aberdeen Consolidated Gold & Copper Co., lso dead. Formerly at Lordsburg, Grant Co., N. M.

OYAL COPPER MINING CO. **UTAH.**

Dead. Title changed, 1902, to Cactus Smelting & Copper Co., also dead. ormerly at Frisco, Beaver Co., Utah. Fully described Vol. II.

OYAL COPPER MINING CO., LTD. **MONTANA.**

Office: Wallace, Idaho. Mine office: Belknap, Sanders Co., Mont. Chas. . Johnson, superintendent. Surface trenches show ore, and a 463′ crosscut nnel cuts, at 400′, a vein said to average 6% copper and 18% lead, with nall silver values.

OYAL CROWN MINING CO. **MEXICO.**

Office: Independencia No. 38, Oaxaca, Mex. Mine office: Ocotlán, Oaxaca, ex. Gustavo Stein, president; Teodoro Meyer, secretary and treasurer; . Hopley Woolrich, general manager; Martin Aguirre, superintendent. Orinized under laws of Mexico, with capitalization 300,000 pesos, shares 1 peso ir; paid in, 135,000 pesos.

Lands, 80 acres, also a 10-acre smelter site, in the Ocotlán district, showing contact veins, between quartzite and andesite, of which two are being develed, these averaging 3 meters width and giving average assays of 13% copper, 9 grams silver and $11.50 gold per metric ton, from malachite, azurite and

chrysocolla in the oxidized zone, and from chalcopyrite in the base zone. Mine is opened by shafts of 122′ and 125′, and is served by the Ocotlán & Ejutla railway, one-half mile distant. Presumably idle.

ROYAL GOLD & COPPER MINING CO. UTAH.

Dead. Apparently merged, circa 1904, in Nevada-Utah Mines & Smelters Corporation. Formerly at Milford, Beaver Co., Utah. Fully described Vol. II.

ROYAL METALS MINING & LEASING CO. NEVADA.

Mine office: Ely, White Pine Co., Nev. Organized circa April, 1907.

ROYAL MINING & INVESTMENT CO. COLORADO.

Mine office: Silverton, San Juan Co., Colo. W. R. Pyke, superintendent. Has argentiferous lead and copper ores, with steam power equipment, employing circa 20 men.

ROYAL MORELOS COPPER CO. MEXICO.

Dead. Was succeeded, 1908, by Occidental Copper Co. Was organized under laws of Arizona or Maine, or both, with capitalization $500,000, shares $1 par, holding lands through the Compañía Cobre de Morelos, S. A., organized under laws of Mexico. Officers were as follows: Hon. Aylett R. Cotton, president; Alfred Courchesne, vice-president; Emlyn Lewys, treasurer; James W. Magoffin, secretary; Edward C. Kemble, assistant secretary; S. W. Ferguson, general manager; D. B. Davison, superintendent. Lands were 13 hectares, in 6 groups, lying one-half mile to 3 miles south of the international boundary line, in the district of Ciudad Juárez, in the extreme northwestern corner of the state of Chihuahua, Mexico, showing slightly auriferous and argentiferous copper ore, giving assays up to 64% copper. Former office was 1300 Golden Gate Ave., San Francisco, Cal. Formerly at Victoria, Donna Ana Co., N. M.

ROYAL THARSIS MINING CO. TASMANIA.

Dead. Lands sold, for £13,347, to Mount Lyell Mining & Railway Co., Ltd. Formerly at North Mount Lyell, Montagu Co., Tasmania.

ROYAL VICTORIA MINING CO. BRITISH COLUMBIA.

Mine office: Grand Forks, Boundary district, B. C. John Fox, superintendent, at last accounts. Property is the Golden Eagle mine, circa 12 miles from Grand Forks, having about 400′ of openings, showing auriferous copper ore of good grade with calcite gangue. Idle at last accounts, awaiting better transportation facilities.

RUBEÑA MINING CO. MEXICO.

Office: 1208-134 Monroe St., Chicago, Ills. Mine office: La Poza, Ures, Sonora, Mex. Wm. E. Jones, president and general manager; Hon. Victor Aguilar, vice-president; R. C. White, secretary; E. J. White, treasurer; Hon. Ricardo P. Cubillas, assistant treasurer; H. F. Wiggin, superintendent. Organized Nov. 26, 1906, under laws of Arizona, with capitalization $5,000,000, shares $1 par. Chicago Title & Trust Co., registrar. Annual meeting, first Monday in November.

Lands, 140 acres, held in trust, by the vice-president, until company is protocolized, or a holding company formed, under the laws of Mexico. Lands show 4 fissure veins, in granite, of which 2, under development, traceable about 1½ miles on company's property, range 30″ to 8′ in width, opened by shafts of 326′, 150′ and 100′ and by tunnels of 225′ and 30′, showing ore averaging about 2.2% copper, 8% lead, some zinc, 15 to 2,550 oz. silver and from a trace to $5 gold per ton, ore being mainly sulphides, with occasional carbonates. Company estimates 5,000 tons of ore on the dumps and 10,000 tons broken in the stopes. Property, opened 1835, was worked intermittently thereafter by Mexican owners. Has steam power, with 6x8″ hoist good for 500′ depth, and 10 mine buildings. Plans building a 100-ton concentrator.

RUBY COPPER & GOLD MINING CO. WYOMING.

Dead. Formerly at Encampment, Carbon Co., Wyo.

RUBY GOLD & COPPER CO. **MEXICO.**

Dead. Formerly at San Marcial, Sonora, Mex. Fully described Vol. VI.

RUBY HILL COPPER MINING & SMELTING CO. **CALIFORNIA.**

Dead. Formerly at Coppervale, Lassen Co., Cal.

RUBY HILL TUNNEL & MINING CO. **NEVADA.**

Mine office: Eureka, Eureka Co., Nev. A. P. Mayberry, superintendent, at last accounts. Lands, between the Richmond and Connor mines, are opened by a tunnel, said to be 2,200′ long. Presumably idle.

RUBY KING COPPER MINING & TOWNSITE CO. **CALIFORNIA.**

Dead. Formerly in Colusa county, California.

RUBY MINING CO. **WASHINGTON.**

Office: Mansfield, Ohio. Mine office: Nighthawk, Okanogan Co., Wash. Monroe Harman; president; Jas. A. Hauer, vice-president; Chas. B. Bushnell, secretary and treasurer; preceding officers, M. L. Branyan and S. P. Ecki, directors. Organized Nov. 15, 1902, under laws of Washington, with capitalization $1,500,000, shares $1 par; issued, $1,175,000. Annual meeting, second Tuesday in June.

Lands, 7 claims, unpatented, area 136 acres, with 46 acres miscellaneous lands, held in fee, on Mt. Chopaca, near the Similkameen river, 3 miles south of the international boundary, and within 600′ of the Great Northern Railway. Lands show syenite carrying 3 lenticular ore bodies with northwesterly and southeasterly strike, and dip of 47°, one of which, under development, is of about 4′ average width, traceable 1,000′, carrying cupriferous pyrargyrite, assaying 0.5% copper, 2% lead, 1.5% zinc, 5 to 2,000 oz. silver and 80 cents gold per ton. Development is by crosscut tunnels of 226′ and 1,011′, and a 197′ tunnel in ore, with total workings of circa 6,300′, estimated to show 60,000 tons of ore. Property has no equipment. Company shipped 7 carloads of ore, 1907, netting $5,500. Idle since June 1, 1908, but management plans resumption, and the installation of a power plant.

RUDDYGORE MINE. **AUSTRALIA.**

Owned by Chillagoe Co., Ltd.

RUDIANSKI MINES. **RUSSIA.**

Office: care of P. T. Zamiatnin, Perm, Russia. Mine office: Bogoslovsk, Nijni-Tagilsk, Perm, Russia. Property is a group of old mines, including the Miednoroudiansk, famous for its great variety of copper minerals, including oxides, carbonates, silicates and phosphates, with occasional native copper, and especially notable for its production of massive malachite, a single mass weighing 330 tons having been found in 1836. Ore occurs as local enrichments, of good average tenor, in Permian red beds. Latest production officially reported, 1899, was 3,122,112 lbs. fine copper but is estimated at 2,500,000 lbs. fine copper only, for 1907.

RUDOLPH LAND CO. **WISCONSIN.**

Office: care of Rudolph M. Weyerhaeuser, Cloquet, Minn. Mine office: Gordon, Douglas Co., Wis. Organized circa 1905, succeeding the Minong Range Copper Co. Lands are in Sections 11, 12, 13 and 14, Range 43 North, Town 10 west. Property is on the southern fold of the Keweenawan syncline, opened by two 7x10′ shafts, deepest 100′, sunk at 36° in a dark amygdaloidal rock, carrying native copper in small quantities. Property is fully described, under title Minong Range Copper Co., Vol. III.

SOCIEDAD ANONIMA COBRES DE RUESGA. **SPAIN.**

Office: Bilbao, Spain. Mine offices: San Martin de Los Herreros, Palencia, Spain, and Dehesa de Montojo, León, Spain. Don Julio Lazúrtigui, president; Don Augustin Cortina, secretary. Organized 1901, with capitalization 2,500,000 pesetas, shares 500 pesetas par. Property includes the Leonor and adjoining mines. Presumably idle.

RUMAILLANA TUNNEL CO. P

Mine office: Cerro de Pasco, Junín, Perú. Development is by the Y cocha and Mesapeta shafts, suspended 1905, and by the Rumaillana, or M drainage tunnel, planned to drain and open the entire Cerro de Pasco di Tunnel was circa 1,800 meters long, 1906, but had cut none of the ex ore bodies.

RUSH & BROWN. ALA

Office and mine: Kasaan, Alaska. U. S. Rush and George E. Brown ers; John Rigby, mine superintendent. Lands, 8 claims, area 160 acre a 15-acre millsite, on Karta Bay, in the Ketchikan district, showing felsite, quartzite, conglomerate and chloritic schists, with occasional stone, carrying chalcopyrite, associated with magnetite, in veins a lenticular masses, in 3 ore bodies, having a generally east and west str which 2, developed by shafts of 20′, 80′ and 80′, and by 3 tunnels, longe show an average width of 8, giving ore assaying 3.5% copper, 1 oz. silv $2 gold per ton. Has a small steam hoist and several mine buildings. is served by a tram, taking ore to wharfs at Venus Bay, 3 miles distant, loaded on vessels and barges, for shipment to smelters. Shipped son 1907, of good average tenor. Suspended operations, late 1907, on acc depression in metal market.

RUSSELL-BALL COPPER CO. AL

Mine office: Valdez, Alaska. Lands, on Dryer Bay, are said to s 8′ body of copper ore.

RUSSELL GULCH MINING & DEVELOPMENT CO. COLO

Dead. Formerly at Russell Gulch, Gilpin Co., Colo.

RUSSELL UNITED COPPER CO. ARI

Dead. Lands sold, circa 1904, to Arizona Consolidated Mining Co merly at Benson, Cochise Co., Ariz.

RUSTLER MINING & MILLING CO. MON

Mine office: Libby, Flathead Co., Mont. Property is the Snowsho said to have shipped about $800,000 worth of ore, but idle since circa 1 account of litigation.

RUTHBURG CONSOLIDATED COPPER CO. I

Dead. Formerly at Weiser, Washington Co., Idaho. Described Vo

RUTHERFORD COPPER MINING CO. TASM

Mine office: Burnie, Russell Co., Tasmania. Ore is said to averag in copper tenor. Idle at last accounts.

RYE COPPER CO. ARI

Office and mine: care of Chas. T. Martin, secretary, Globe, Gila Co E. F. Eisenhour, president and general manager. Organized 1905, und of Arizona, with capitalization $1,000,000, shares $1 par. Lands, 17 well timbered and suitable for grazing, with an available water-power, the Mazatzal Mountains, in a slightly explored district, circa 75 mile of Globe and about the same distance south of Flagstaff. Country diorite, with intrusive porphyry dikes, carrying contact veins showing s ores associated with hematite, near surface. The mine has circa 1,000′ o ings, including shafts, tunnels and trenches. Idle.

SAAVEDRA i BESA. C

Mine office: Quebradita, Freirina, Atacama, Chile. Cornelio Saave Alfonso Besa, owners and managers. Lands, 3 hectares, 27 kilometers fro Clanca, showing a fissure vein in granite of about 5′ average width, wit of N. 42° E., and 66° dip. Mine is opened to depth of 418 meters, w treme length of 270 meters of horizontal workings, showing an oxidiz of about 40 meters depth, succeeded by sulphides, mainly chalcopyri quartzose gangue, averaging 16% copper. Water is encountered at 11

plant with three 70-h. p. boilers, and an electric plant for lighting and te pumps and mill. Employs about 140 men. Production, 1903, was 00 metric tons of ore of 16% average copper tenor, equivalent to about bs. fine copper.

WEA GOLD & COPPER MINING CO. **MONTANA.**

e: 11 Broadway, New York, N. Y. Mine office: Helena, Lewis & ., Mont. Col. Henry Altman, president and general manager; W. J. ecretary. Capitalization $5,000,000, shares $10 par. Lands, 47 claims, cratch Gravel district, adjoining the Copper-Silver Montana Mining said, 1907, to plan sinking 3 shafts. Presumably idle.

N SPRINGS MINING CO. **CALIFORNIA.**

er returned unclaimed from former mine office, Cima, San Bernardino L. I. Plummer, president and general manager; E. P. Barnes, secre- n. Heath, superintendent. Lands, 17 claims, on the western slope of k Mountain, carrying circa 3 miles of the strike of a contact deposit limestone and granite, ranging up to 65′ width, opened by a 100′ shaft 0′ tunnel.

MOUNTAIN MINING CO. **ARIZONA.**

e: 902 Chapel St., New Haven, Conn. Mine office: Christmas, Gila . Lewis S. Welch, president; Clarence Stephens, vice-president; Story secretary; Wilbur W. Delano, treasurer; Wm. D. South, manager; Jas. , smelter superintendent. Organized 1902, under laws of Arizona, with tion $1,000,000, increased, later, to $2,500,000, shares $1 par; issued, 0. Debentures, $1,000,000 first-mortgage 6-year 6% bonds, dated Oct. issued, $625,000. Floating indebtedness was cared for, Oct. 1, 1908, of 6-month notes, with privilege of 6 months renewal, at option of any.

ls, 1,441 acres, patented, with abundant water, on both sides of the r, in Gila and Pinal counties, circa 25 miles due south of Globe and rth of Tucson. Property includes copper claims lying north of the l gold, silver and coal claims directly opposite, south of the river, all lying in a radius of 6 miles.

e are 15 claims, patented, area 266 acres, of gold and silver lands, base dry ore, with a little lead and zinc and traces of copper, the of upwards of 300 assays giving a trifle better than $13 per ton in gold and silver values. The gold and silver claims have 3,450′ of

coal lands, 640 acres, patented, in the lower basin of Deer Creek, vein of low grade bituminous coal, developed by a 175′ incline shaft, a 800′ of workings, equipped with a small steam hoist and pump. a beehive coke-oven on the property, ready for test, as the coal may or prove available for coking, but is adapted to making producer gas.

e are 36 patented copper claims, area 535 acres, the principal group the junction of Disappointment Valley with the Gila river, on the e of the stream, 8 miles from Winkelman, present terminus of the & Eastern railroad, which is the nearest shipping point. The mine ed, 1883, by the San Carlos Copper Co., but was closed, 1884, because be located on the San Carlos Indian Reservation, and remained idle lands were restored to the public domain, by executive order of the Dec. 2, 1902.

property shows members of the upper Carboniferous limestone in tages of alteration, near a granite-porphyry contact, ores occurring irregular line of contact for circa 6 miles on the company's lands, replacements in limestone, and principally as carbonate ores, with ous gangue, on the limestone wall, and sulphides along the porphyry

contact at depth. The contact zone has shown copper ore wherever opened and the porphyry also carries copper ore below workable tenor. Four major ore bodies are under development, these ranging from 4′ to 60′ in width, carrying cuprite, malachite, chalcocite, bornite and chalcopyrite, latter disseminated in pyrite, all slightly auriferous and argentiferous, and self-fluxing throughout. Ore as mined has averaged about 3% copper and 30 to 40 cents per ton in combined gold and silver values, by wet assay.

Development is by shafts of 430′, 340′, 275′ and 175′, all showing oxidized and sulphide ores, and the company has planned a tunnel of circa one mile length, to connect with the 300′ main working shaft. The Christmas shaft, started 1907, has 3 compartments, each 4x5′ in the clear, and is planned for the main working shaft. No. 1 or Hackberry shaft, the deepest, shows good ore on the 120′ level, said to average 3.75% copper, also good ore on the 300′ level, the upper workings showing a blanket vein of about 6′ thickness, said to be proven for 300′ in width and 625′ in length. The 400′ level is said to show ore averaging about 5% copper tenor. The mine has circa 12,000′ of workings, with a large quantity of ore in sight, though very little is blocked out systematically, but considerable ore could be developed for stoping with little effort. The mine also has open-cast workings, of circa 30,000 square feet area, showing carbonate ores.

Equipment includes a 75-h. p. steam plant, with 4 small hoists, good for circa 500′ each, and there are larger hoists on the ground, but not installed. There are 10 buildings for various uses.

The smelter, at the mine, receiving ore therefrom by wagon and tram, has a daily capacity of circa 225 tons. The old smelter, erected, 1884, by San Carlos Copper Co., was torn down and furnaces replaced by a 150-ton Mitchell economic hot-blast furnace, which apparently has been replaced also by a 36x122″ Colorado Iron Works blast-furnace, of circa 225 tons daily capacity. The major part of the material for a 500-ton furnace, 44x200″ in size, is on the ground, but not set up. Ore is self-fluxing, and the slags carry about 36% silica and 23% iron. Product, when smelter is in blast, is matte carrying 60 to 65% copper, 10 to 14 oz. silver and circa 0.35 oz. gold per ton. A little custom smelting was done, when the smelter was in commission, to accommodate neighboring properties. Company was said, September, 1907, to have secured a site for a new smelter, at Christmas, about 1½ miles from the mine.

In addition to the railroad of the Phoenix & Eastern, the Southern Pacific is building a low grade cut-off line, to pass through the smelter site within a mile of the mine. The company did some grading, 1907, for a narrow railroad from Winkelman station to the mines and works at Christmas, having completed grading for 3 miles of line, except 3 or 4 short bridges, with rails, ties and one locomotive on the ground.

Production has been as follows: 450,000 lbs. fine copper in 1905; 2,338,492 lbs. copper, 16,410 oz. silver and 437 oz. gold in 1906; 1,751,264 lbs. copper, 7,453 oz. silver and 254 oz. gold in 1907.

Previous to blowing out of smelter the company made circa $800,000 worth of matte, and, at one time, 1907, it employed nearly 600 men, but closed down Aug. 21, 1907, owing to financial troubles. The property is considered decidedly promising, but the company requires cash for more extensive development of ore, improvement of transportation facilities and enlargement of smelter.

SADO MINE. JAPAN.

Owned by Mitsu Bishi Goshi-Kwaisha.

SAGINAW DEVELOPMENT CO. ARIZONA.

Dead. Merged, March, 1906, in American-Saginaw Development Co. Formerly at Bisbee, Cochise Co., Ariz. Described Vol. V.

SAGINAW MINING CO. **WASHINGTON.**

Dead. Formerly at Maple Falls, Whatcom Co., Wash.

SAGINAW VALLEY COPPER MINING CO. **WYOMING.**

Dead. Lands lost, 1905. Formerly at Encampment, Carbon Co., Wyo. Described Vol. V.

SAHUARIPA EXPLORATION CO. **MEXICO.**

Mine office: Sahuaripa, Sonora, Mex. Lands include the Esperitu Santo mine, 12 miles east of Sahuaripa, opened circa 1842, and closed in 1900, owing to striking of water. This has a blanket vein of argentiferous and plumbiferous tetrahedrite, carrying up to 250 oz. silver per ton. Idle several years.

ST. CROIX CONSOLIDATED COPPER CO. **WISCONSIN.**

Office and mine: Superior, Douglas Co., Wis. Organized 1903, under laws of Wisconsin, with capitalization $1,500,000, shares $1 par. Lands, 9 groups, area 22,000 acres, carrying the western extension of the Keweenawan copper belt of Michigan. Idle since organization.

ST. DAVID'S GOLD & COPPER MINES, LTD. **WALES.**

Dead. Succeeded, July 21, 1903, by St. David's Gold mines (1903), Ltd. Formerly at Barmouth, Merionethshire, Wales.

ST. DAVID'S GOLD MINES (1903), LTD. **WALES.**

Office: 29 Cornhill, London, E. C., Eng. Mine office: Barmouth, Merionethshire, Wales. Godfrey C. Isaacs, chairman; E. T. McCarthy, consulting engineer; H. J. Nicholls, mine manager; James Junner, secretary. Organized July 21, 1903, under laws of Great Britain, as a reconstruction of St. David's Gold & Copper Mines, Ltd., with capitalization £60,000, shares 5s. par. Debentures, £40,000 authorized, £10,750 outstanding, at 6%. Old company paid dividends of 40%; present company has paid dividends of 10%. Lands, 800 acres, carrying gold and copper ores. Has a 50-stamp mill and an Elmore oil concentration plant.

ST. GEORGE COPPER & COAL MINES, LTD. **AUSTRALIA.**

Office: Brisbane, Queensland, Australia. Mine office: Laura, Queensland, Australia. Organized 1906, under laws of Queensland, with capitalization £50,000. Lands are leasehold copper claims near Etheridge, in the Cook district, on which exploratory work has given promising results, also copper and coal lands at Little River.

ST. GEORGE COPPER MINING CO. **UTAH.**

Office: care of Clarence K. McCornick, president, Salt Lake City, Utah. Mine office: St. George, Washington Co., Utah. Capitalization $400,000. Grant C. Snyder, secretary and manager; B. L. Cutler, superintendent. Lands, in the Dugway Mountains, have a 100′ main shaft, on a 4′ to 5′ vein, giving assays of 4 to 40% copper. Has gasoline power and a small smelter, and was doing systematic development work and levying assessments, at last accounts. Management considered good, and property well regarded.

ST. HELEN'S COPPER CO., LTD. **ENGLAND.**

Works office: St. Helen's, Lancashire, Eng.

ST. JOE GOLD-COPPER MINING & MILLING CO., LTD. **MONTANA.**

Office: Wallace, Idaho. Letter returned unclaimed from former mine office, Saltese, Missoula Co., Mont. Lands, 9 claims, well timbered, on Kelly Creek, circa 3 miles west of the Monitor and one-half mile from a railroad, showing 2 strong ledges.

ST. JOE MINING CO. **UTAH.**

Dead. Property sold, circa 1907, by sheriff, for $25,000, this sum being inadequate to meet company's indebtedness, amounting to about $60,000. Formerly at Bingham Canyon, Salt Lake Co., Utah.

ST. JOE MINING & MILLING CO. **WASHINGTON.**

Office and mine: Latah, Spokane Co., Wash. Employs 5 men. I. H.

Stockdale, president; J. W. Olney, vice-president; J. A. Adams, secretary treasurer; E. H. Conrad, superintendent. Organized 1906, under laws of ington, with capitalization $7,500,000, shares $5 par. Annual meeting Monday in December.

Lands, 13 claims, one fractional, area circa 255 acres, well timber miles from Chicago, Milwaukee & St. Paul railway, showing quartzite, shafts of 20′ and 80′. Property has 3 buildings. Company plans cont tunnel, to cut an expected ore body at depth of circa 250′.

ST. JOE MINING & MILLING CO. WYO

Office: Fremont, Neb. Letter returned unclaimed from former mine Riverside, Carbon Co., Wyo. H. S. Beck, president; J. H. Knowles, tre Thos. Carroll, secretary and general manager. Organized 1905, as succe Fremont Copper Mining Co. Lands, 5 claims, unpatented, in Purgatory opened by a 362′ incline shaft.

ST. JULIAN GOLD MINING CO. MON

Office: care of W. A. Bercry, president, 61 East Warren Ave., I Mich. Mine office: Chico, Park Co., Mont. Has auriferous and argent copper ores, with steam power and an Elspass mill. Presumably idle.

ST. LAWRENCE MINE. MON

Mine office: Saltese, Missoula Co., Mont. Lands are near the Ri and Monitor mines, 6 miles southwest of Saltese, with ore opened on lying parallel to those of the Richmond and Monitor. Idle.

ST. LAWRENCE MINE. MON

Owned by Anaconda Copper Mining Co., at Butte.

ST. LOUIS COPPER CO. ARI

Dead. Formerly at Gila Bend, Maricopa Co., Ariz.

ST. LOUIS COPPER CO. MICH

Office: 12 Ashburton Place, Boston, Mass. Mine office: Calumet, ton Co., Mich. Organized under laws of Michigan, with capital $1,000,000, shares $25 par. Is controlled, through ownership of 36,400 out of 40,000 issued, by Calumet & Hecla Mining Co.

Lands, 800 acres, near Laurium, including the south half of Section west half of Section 20, Town 56 North, Range 32 West. Lands lie nex of the Old Colony, east of the Laurium and southeast of the Calumet &

Property was called originally the New York & Michigan, opene under permit from the War Department, and later became the Wash changing that name, eventually, to present title. In olden days a sha sunk at the point of junction between the trap belt and the Eastern stone, this showing some fine copper. Long idle.

ST. LOUIS COPPER MINING CO. ARI

Office: 503 Security Bldg., St. Louis, Mo. Mine office: Duquesne, Cruz Co., Ariz. Jas. W. Shaw, president; Silas Cook, vice-president; Ge lon, secretary; H. W. Herweck, treasurer; S. G. McWade, general m Organized circa 1906.

ST. LOUIS GOLD GULCH MINING CO. NEW M

Mine office: Silver City, Grant Co., N. M. G. A. Easton, manage gold and copper ores, and a 50-ton concentrator.

ST. LOUIS UNITED COPPER MINING CO. NEW M

ST. MARY'S CANAL MINERAL LAND CO. MICH

Entire stock issue is held by St. Mary's Mineral Land Co.

MARY'S COPPER CO. **MICHIGAN.**

Dead. Wound up, circa 1899, and lands sold to Arcadian Copper Co. Formerly at Hancock, Houghton Co., Mich. Described Vol. II.

MARY'S MINERAL LAND CO. **MICHIGAN.**

Office: 713-199 Washington St., Boston, Mass. Mine office: Houghton, ughton Co., Mich. Employs circa 50 men. Nathaniel Thayer, president; s. J. Paine and J. Henry Brooks, vice-presidents; Chas. J. Paine, Jr., secury and treasurer; preceding officers, Samuel N. Brown, Albert S. Bigelow, Nelson Perkins, Geo. P. Gardiner, Nathaniel H. Stone, Walter Hunnewell Chas. H. King, directors; Fred W. Nichols, resident agent; Dr. Lucius L. bbard, general manager and consulting geologist; Rex R. Seeber, mine superndent; Wm. Skewes, mining captain.

Organized March 4, 1901, under laws of New Jersey, with capitalization 00,000, shares $25 par; issued, $4,000,000. Controls, through ownership of re stock issue, except founders' shares, St. Mary's Canal Mineral Land Co., anized 1863, under laws of New York, to take over lands given by the state Michigan for the construction of the first ship canal at Sault Ste. Marie, is so given being 180,000 acres in Houghton, Ontonagon and Keweenaw nties, Michigan, from which tracts the Calumet & Hecla, Baltic, Trimoun-, Champion, Ojibway and other mines have been developed. Company has a 400 shareholders. Shares are listed on the Boston Stock Exchange. Old ny Trust Co., Boston, registrar.

Dividends have been as follows: $1 in 1903; $1 in 1904; $2 in 1905; $4 in 6; $5 in 1907; nothing in 1908, giving a total of $13 per share to end of 8. The company is in receipt of a large income from dividends of the mpion Copper Co., receiving $500,000 in 1907 and $150,000 in 1908 there-m, but in 1908 paid over $220,534 to King Phillip Copper Co., hence paid dividends. The company received, 1908, from lands sold to North Lake pper Co., $72,000 cash, in addition to a share interest. During 1905 the mpany sold lands, timber and wood, to the value of $275,292, and during 7 received $1,800 on land payments, $2,712 for wood and timber, $2,147.72 und rent, $12,580.45 interest on notes and contracts, $4,843.11 from miscelneous sources, and $500,000 from dividends of Champion Copper Co. Exditures for 1907 included $59,000 for the Challenge mine, and $108,456 for ck of King Phillip Copper Co., company ending 1907 with $237,390.94 cash hand.

From 1863 to 1900 the old company paid cash dividends of $2,200,000, also ck dividends of 1 share Tamarack, 1 share Iroquois, 1½ shares Baltic, ½ are Winona and ½ share Albany & Boston, on each share of stock of St. ry's Canal Mineral Land Co.

Share assets of the company at end of 1908 were as follows: 50,000 shares mpion Copper Co.; 73,767 shares King Phillip Copper Co.; 25,000 shares yflower Mining Co.; 20,165 shares La Salle Copper Co.; 20,000 shares Hanck Consolidated Mining Co.; 20,000 shares Pacific Copper Co.; 9,000 shares rth Lake Copper Co.; 2,000 shares Ojibway Mining Co.; 842 shares Winona pper Co.; 208 shares Copper Range Consolidated Copper Co.; 640 shares St. ry's Mineral Land Co.; 80 shares Old Colony Copper Co.; 10 shares Amphime Co. These holdings in various corporations were worth about $6,000,000, end of 1908.

Lands, Jan. 1, 1908, were 95,158 acres freehold, also mineral rights to 323 acres additional, lands being scattered along the Lake Superior copper t, with principal holdings on the South Range, southwest of Houghton, in ughton and Ontonagon counties.

The Challenge mine, owned outright by the company, is in Section 22, T. N., R. 35 W., circa 5 miles south of the Champion. This property works

4 power drills, and, during 1907, made 2,859′ of openings. Extensive diamo drill borings having located what supposedly is the southern extension of t Baltic amygdaloidal bed. Sinking was begun, Sept. 10, 1904, and a verti shaft, in the footwall, was 846′ deep at end of 1907. Workings show cons erable faulting, the Baltic bed having displacements of about 100′, equal t horizontal movement of 400′. The bed is 20′ to 35′ wide, showing some he copper, in small pockets, at rare intervals.

In addition to the Baltic lode, a number of other cupriferous beds h been opened by crosscuts from the Challenge shaft. Bed No. 2 is an amy loidal conglomerate, apparently without workable values. Beds 3 and 4 amygdaloids, showing a little copper. Bed No. 5 is an epidotal amygda showing copper in promising quantities. Bed No. 6, circa 25′ in width, ca no workable values. Bed No. 7, of 18′ width, carries considerable stamp Bed No. 8 is 47′ wide, where cut, carrying some fine copper. Bed. No. 9 a fair showing of copper. Bed No. 10 apparently is of small promise.

Equipment at the Challenge includes a 12x20″ Nordberg duplex good for 1,500′ depth, and an 8-drill Nordberg air-compressor. The Cha property is considered promising, though developments to date have p disappointing.

Beginning with the new century, the company refused to sell its m lands outright, preferring to join its lands with other holders in the form of new companies, taking pay therefor in shares, on a pro rata basis, or in shares and partly in cash. This policy involves heavy outlays for e atory and development work, but has resulted in giving the company interest in a magnificent new mine, the Champion, which is capable, alo furnishing funds to St. Mary's company for both dividends and develo work elsewhere, and a continuance of this policy must result, even in making St. Mary's Mineral Land Co. the part or sole owner of a n of fine mines. Owing to the great extent of its lands, mainly located Keweenawan copper belt, and stretching along the mineral range for of miles, the landed holdings of the company are of vast potential value management is vigorous and far-seeing, and no small share of the cred the present wise and successful policy is due to Mr. Rufus R. Goodel resigned, 1908, after 43 years of continuous and able service as the com resident agent.

ST. MICHAEL'S MINING, MILLING & REFINING CO. NEW ME

Mine office: Tres Piedras, Taos Co., N. M. Long idle.

ST. PAUL & BUTTE MINING CO. MONT

Dead. Was in business circa 1896. Formerly at Butte, Silver Bow Co.,

SAINT PAUL MINING & REDUCTION CO. COLO

Mine office: Silverton, San Juan Co., Colo. D. M. Cleamon, Ne Johnson, Geo. T. Braden, J. B. Ross and Frank L. Ross, directors. Org circa March, 1908, under laws of Colorado, with capitalization $100,000, $1 par. Property is an old mine, in the Red Mountain district, formerly ducer, which shipped some ore netting $1,000 per carload.

ST. REGIS COPPER MINING CO., LTD. MONT

Office: Wallace, Idaho. Mine office: St. Regis, Missoula Co., Mon ganized circa March, 1906. Lands, bought for $35,000, show auriferous ore. Presumably idle.

ST. REGIS COPPER MINING & MILLING CO. MONT

Office: Missoula, Mont. Mine office: St. Regis, Missoula Co., Mont ploys 5 men. S. J. Wilson, president; F. W. Wilson, secretary and tre Louis C. McHeffey, general manager; preceding officers, W. H. Houste A. M. Stevens, directors. Organized May, 1901, under laws of Montana capitalization $300,000, shares $1 par, in half preferred and half common

Lands, 5 claims, also a 15-acre millsite and miscellaneous lands, giving ings of 180 acres, on the Northern Pacific railway, in an unorganized dis- of Sanders county, Montana. Property shows quartzite and shale, hav- 2 ore bodies under development, of 6′ estimated average width, traceable 2,000′, carrying chalcopyrite giving average assays of 8% copper and gold per ton. Property has shown ore assaying 16 to 37% copper. De- pment is by tunnels of 60′, 380′, 800′ and 350′, estimated to show 5,000 of ore.

ERO MINES CO. **ARIZONA.**

Office: Tucson, Ariz. Mine office: Patagonia, Santa Cruz Co., Ariz. Prof. P. Blake, general manager; W. E. Balcom, superintendent. Is not incor- ed. Lands, in the Salero and Tyndall districts, circa 12 miles northwest tagonia, include the old Salero and Tumacacori properties, showing veins, rsing diorite, carrying galena, gray copper and native silver, in a gangue nganese, spar and quartz, opened by a crosscut tunnel.

he Constitution or Darwin claim has a vein of 10′ to 20′ width, carrying s of high grade copper ore, including stromeyerite and its derivative min- with quartz gangue, opened by a vertical shaft and crosscut.

third group is Moctezuma's Daughter and extensions, showing a wide dy that has yielded high grade copper ore, mainly chalcocite and stro- ite, from the Empress of India and Queen of Sheba claims. Property eam power.

DA GOLD & COPPER MINING CO. **COLORADO.**

ead. Formerly at Salida, Chaffee Co., Colo. Described Vol. V.

DO GOLD-COPPER CO. **MEXICO.**

ffice: 824-356 South Spring St., Los Angeles, Cal. Letter returned un- d from former mine office, Alamos, Sonora, Mex. Dr. Finis E. Yoakum, ent and general manager; N. N. Dietz, secretary. Organized under laws izona, with capitalization $3,000,000, shares $1 par. Apparently is a twin s Alamos Mining & Milling Co. Lands, 30 pertenencias, in the Alamos t, said to show a 60′ vein. Stock of the company is "insured" and ranteed," hence the company is looked upon as a mere stock-jobbing e. Any stock either "guaranteed" or "insured" is dangerous, and one s both almost of a certainty must prove a very addled egg.

SBURY COPPER CO. **NORTH CAROLINA.**

ffice: P. O. Box 33, Salisbury, N. C. Mine office: Gold Hill, Rowan . C. T. B. Brown, president; W. S. Blackmer, secretary and treasurer; rd Eames, Jr., general manager. Organized 1904, under laws of Arizona, apitalization $100,000, shares $100 par.

ands, 50 acres, freehold, on the line of the Southern railway, showing d slate, carrying a fissure vein with NE. and SW. strike, formerly esti- at 15′ average width, but now estimated at 4′ width, developed by a haft, showing chalcopyrite, formerly reported as giving average assays % copper, 2 oz. silver and $5 gold per ton, but now reported to average pper and $5 gold per ton. Idle, but plans resumption and deepening to 150′.

ION RIVER MINING CO. **NEVADA.**

ine office: Contact, Elko Co., Nev. Ores carry gold, silver and copper. asoline power and a small smelter. Idle several years.

ION RIVER MINING & MILLING CO. **WASHINGTON.**

ine office: Conconully, Okanogan Co., Wash. Wm. McDaniel, manager. on Peacock Mountain, are said to give a fair showing of copper. De- ent by tunnel was planned, at last accounts.

SALTESE CONSOLIDATED COPPER MINING & MILLING CO. MONTANA.

Office: 107 Second St., Moscow, Idaho. Mine office: Saltese, Missoula Co., Mont. C. H. Williams, vice-president and manager; Fred Willard, secretary; C. B. Merwin, treasurer. Capitalization $1,500,000, shares $1 par. Lands, 9 claims, showing 3 veins, including 6 claims on Deadman's Gulch, in the St. Regis district, near the National Mining Co., 6 miles from Saltese, having a 468′ crosscut tunnel cutting a 4′ vein, with 2′ paystreak showing ore assaying up to 22.3% copper, 2.4 oz. silver and $1 gold per ton.

COMPAÑIA MINERA DE SALTILLO. MEXICO.

Office: 9a de Hidalgo, Saltillo, Coah., Mex. Letter returned unclaimed from former mine office, Concepción del Oro, El Oro, Zacatecas, Mex. Antonio Rodriguez, president; Ramón Rodriguez, manager. Property is the Jesûs Nazareno mine, having auriferous and argentiferous lead and copper sulphides. Has steam power, employing circa 150 men, and, first half of 1907, was producing, monthly, circa 1,000 metric tons of silver-lead ore, of good average tenor.

SALT LAKE COPPER CO. UTAH.

Office: 11 Broadway, New York, N. Y. Operating office: Herald Bldg., Salt Lake City, Utah. Mine office: Lucin, Box Elder Co., Utah. J. H. Sumann, president; Frederick Lewisohn, vice-president; E. C. Westervelt, treasurer; preceding officers, Adolph Lewisohn, Alfred Lewisohn, O. B. Van Sant, Andrew Sakes and J. E. Shoenberg, directors; J. Parke Channing, consulting engineer; E. G. Tuttle, superintendent. Organized circa December, 1906, under laws of Maine, with capitalization $2,200,000, shares $10 par. Debentures, $236,000, at 6%, payable only out of net earnings. Net profits, 1907, are said to have been circa $120,000.

Lands, 108 acres, on Copper Mountain, in the Newfoundland district, also 100 acres within the limits of Salt Lake City. Mine has upwards of 2 miles of workings, and was estimated, 1908, to have in sight and blocked out, 75,306 tons of copper ore of 1.1% average tenor, 27,960 tons of 3.13% average tenor, and 138,370 tons of 7.2% copper tenor. Production, 1907, was circa 24,000 tons of ore, shipped to Salt Lake smelters, yielding 2,234,446 lbs. fine copper. Property considered promising and management good.

SALT LAKE & ELY COPPER CO. NEVADA.

Office: Salt Lake City, Utah. Mine office: Ely, White Pine Co., Nev. Jas. T. Finlen, president; G. L. Rickard, vice-president; W. W. Byrne, secretary and treasurer; preceding officers, Ernest E. Campbell and John A. Kirby, directors. Organized 1906, with capitalization $5,000,000, shares $1 par. Lands, 11 claims, said to be in the vicinity of the Cumberland-Ely. Presumably idle.

SALT LAKE MINING & MILLING CO. UTAH.

Letter returned unclaimed from former office, Provo, Utah. Mine office: Callao, Juab Co., Utah. W. B. Hughes, president; D. B. Hughes, secretary and treasurer. Organized 1907, with capitalization $100,000, shares 10 cents par. Lands are in the Detroit district. Presumably idle.

COMPAÑIA MINERA SALVADORA DEL HUANACO DE TALTAL. CHILE.

Office: Iquique, Chile. Mine office: Taltal, Antofagasta, Chile. Organized March 17, 1905, under laws of Chile, with capitalization £12,000, shares £5 par.

SAMPO MINING & DEVELOPMENT CO. FINLAND.

Dead. Was succeeded, December, 1906, by Finnish American Mining Co. Formerly at Kisko, Abo, Finland. Fully described Vol. VI.

COMPAÑIA MINERA DE SAN ACASIO y ANEXAS. MEXICO.

Mine office: San Juan de Guadalupe, Durango, Mex. Property includes

Acasio and Tres Rosas mines, carrying gold and copper ores. Has wer, employing circa 50 men.

IA MINERA DE SAN ANTONIO. **MEXICO.**
. Formerly at La Cruz, Centro, Tamaulipas, Mex.

TONIO COPPER CO. **MEXICO.**
: Iron Mountain, Mich. Mine office: San Antonio de la Huerta, ora, Mex. O. C. Davidson, president; preceding officer, D. G. Kerr, Sebenius, C. D. Frazer, Col. Louis W. Powell and Richard C. Flana- tors. Organized circa October, 1908, under laws of Arizona, with tion $2,500,000, shares $10 par; issued, $2,000,000.
s, 9 groups, area circa 2,000 acres, near the Yaqui river, showing a d zone of approximately 200′ to 500′ width.
lopment, which has been in progress since circa 1906, is by tunnels, be driven to give backs of about 1,100′, and considerable ore of age copper tenor has been blocked out, ores including high grade carbonates, and sulphides of good average tenor. The management ed of strong, experienced and thoroughly capable mining men.

TONIO MINING CO. **COLORADO.**
: 312 Century Bldg., Denver, Colo. Mine office: Red Mountain, , Colo. Employs circa 50 men. M. T. Chestnut, president and gen- ger; Otto Koehler, vice-president; Wm. L. Stephens, secretary and preceding officers, E. B. Morgan and Wilbur M. Warnock, directors; Coper, mine superintendent. Organized Feb. 5, 1908, under laws of with capitalization $500,000, shares $1 par. Annual meeting, last n February.
s, 30 claims, area circa 200 acres, a 20-acre millsite and 10 acres ous lands, one mile from a railroad, in the Red Mountain district and San Juan counties. Property shows porphyry, carrying several , estimated at 20′ to 30′ width, said to be traceable more than 3,000′, y company to carry enargite averaging 12% copper, 10% lead, 10 oz. $3 gold per ton, which estimate is considered high. Development is of 37′ and 200′, and by the 200′ Koehler tunnel and 625′ Camp Robber th a total of 1,200′ of workings, reported to give 1,000 tons of ore it for stoping.
ment includes a 5-h. p. air-compressor and 3 power drills. There are uildings and dwellings. Company plans extending the Koehler tunnel l installing a more powerful mining plant.

TONIO MINING & EXPLORATION CO. **MEXICO.**
office: Tapalpa, Sayula, Jalisco, Mex. John P. Johnson, president; alez Brizuela, secretary; B. S. Dewey, treasurer. Has surface ores % copper, 750 grams silver and 15 grams gold per metric ton.

TAZAR COPPER CO. **MEXICO.**
: 508 Germania Bank Bldg., Pittsburg, Pa. Mine office: Tlacolula, lex. J. Albert McKay, president; Hon. Pembrook R. Fliteraft, vice- Oscar A. Rogers, secretary; Andrew B. Berger, treasurer; Guillermo son, general manager; Frank M. Lehmer, superintendent. Organ- 14, 1904, under laws of Maine, with capitalization $1,000,000, shares ssued, $780,000.
are several groups, area 700 acres, and a 40-acre millsite, in the Tla- rict, 8 miles south of the ruins of Mitla. Country rocks are porphyry one, carrying numerous contact veins or lenses, of which 6, under de- , are reported to have an average width of 8′, outcropping for 2 last accounts mine had a 50′ shaft, showing selected oxide and car- s of 44% copper tenor, while assays of outcrops give 1 to 15%

copper, 15 to 20 oz. silver and from nothing to 16% lead. It is planne develop mainly by tunnels. Property considered promising.

SOCIEDAD MINERA DE SAN BARTOLO. CH

Office: Santiago de Chile. Mine office: Gatico, Antofagasta, Chile. ganized Aug. 8, 1905, under laws of Chile, with capitalization £120,000, s £1 par. Lands show 5 sandstone beds carrying disseminated native co Early 1908 was building a 200-ton mill, of modern design and equipment, a view to beginning regular production on a considerable scale.

SAN BARTOLO COPPER MINES, LTD. CH

Dead. Voluntarily liquidated, 1903. Formerly at Gatico, Antofogasta,

SAN BERNARDINO COPPER CO.

Dead. West Virginia charter forfeited, 1902. Formerly in San Berna Co., Cal.

SAN BERNARDINO GOLD, COPPER & LIME CO. CALIFOR

Letter returned unclaimed from former mine office, San Bernardino Bernardino Co., Cal. F. G. Stickney, president; W. H. Miller, secretar treasurer; preceding officers, I. F. Swarthout, Sydney Swarthout and Swarthout, directors. Organized circa June, 1907, under laws of Arizona, capitalization $1,000,000. Lands, in Badger Cañon, on Little Mountain, 7 north of San Bernardino, show a body of auriferous and argentiferous ore with limestone hanging, said to be 100′ wide at point of exposure. H incline shaft and a 300′ tunnel. Idle and apparently moribund.

SAN BERNARDINO MINING CO. ME

Office and mine: Schalk Bldg., La Cananea, Arizpe, Sonora, Mex. Judd, president; J. L. Stroyick, vice-president and superintendent; J. M. general manager; B. N. Norton, consulting engineer. Organized under of United States and Mexico, with capitalization $500,000, shares $5 par.

Lands, 144 pertenencias, 18 miles southeast of Cananea, 2 miles west railroad, in the Sierra Manzanal, developed by a 100′ shaft, showing a 6′ carrying auriferous copper ores giving assays up to 30% copper, 70 oz. and $8 gold per ton. Small shipments, to El Paso smelter, netted $93 pe Was worked, circa 1876, for silver, but suspended, owing to raids of Ap Property is considered promising, but is idle.

SAN BERNARDINO MINING CO. ME

Mine office: La Cananea, Arizpe, Sonora, Mex. J. M. Gibbs, ma Property shows auriferous and argentiferous copper ore. Presumably idl

SAN BERNARDINO MINING & MILLING CO. ARIZ

Dead. Formerly at Douglas, Cochise Co., Ariz. Fully described Vol

SAN BERNARDO MINING CO. ME

Office: 920 Merchants' Loan & Trust Bldg., Chicago, Ills. Mine Aduana, Alamos, Sonora, Mex. Mine, known as the Santo Domingo, shaft sunk between two veins, known as the Balvanera and Santo Do which are expected to unite at depth. Ores give assays of 46 oz. silver, small copper and lead values. Idle and apparently moribund.

SAN BERNARDO MINING CO. ME

Mine office: Alamos, Sonora, Mex. Is the Mexican incorporation Southern Sonora Development Co., and is controlled by Sonora Central Co.

SANCA CONSOLIDATED MINING CO. ID

Office: Detroit, Mich. Mine office: Priest River, Kootenai Co., Jacob Haarer, president; Lou Burt, first vice-president; O. R. Baldwin, tary and treasurer. Organized under laws of Arizona, with capitali $3,500,000, shares $1 par.

Lands, 540 acres, in the Priest River district, in the extreme norther of Idaho, lacking rail transportation. Camp No. 1 has seven 20′ pits,

veral hundred feet of development. Camp No. 2 has several hundred feet of velopment, said to show a 35′ vein giving ore assaying well in copper, silver d gold. Camp No. 3 has eight 10′ pits. Camp No. 4 has several hundred feet crosscut tunnels, said to develop 2 veins, with a back of 600′.

AN CALLETANO MINING & SMELTING CO. **ARIZONA.**

Letter returned unclaimed from former office, 121 Geary St., San Francisco, Cal. Mine office: Calabasas, Santa Cruz Co., Ariz. Lands, 12 claims, in groups, in Santa Cruz and Pima counties, from which selected samples have ven assays up to 9% copper, 400 oz. silver and $2.50 gold per ton. Idle and parently moribund.

AN CARLOS COPPER CO. **ARIZONA.**

Dead. Lands sold to Saddle Mountain Mining Co. Formerly at Christmas, la Co., Ariz.

AN CARLOS COPPER CO. **MEXICO.**

Office: 1747-25 Broad St., New York, N. Y. Mine office: Linares, Sexto, uevo León, Mex. Works office: San José, Centro, Tamaulipas, Mex. W. H. ichols, Jr., president; S. H. Steele, secretary and treasurer; Edw. D. Self, neral manager. Organized 1896, under laws of New York, with capitalization 00,000, shares $1 par.

Mining lands, 6 square miles, are in the San Carlos district of Tamaulipas. lso owns 6,400 acres of timber lands. Has contact veins between limestone d porphyry, carrying oxide, carbonate and sulphide ores, mainly latter. Development is by upwards of 50 shafts and about 7 miles of tunnels, with total orkings of circa 10 miles. Has a 38-mile railroad connecting with the Gulf anch of the Mexican Central Railway, which, in addition to handling company's own traffic, enjoys a very satisfactory general business. Closed down, rly 1907, laying off circa 500 men.

AN CARLOS DEVELOPMENT CO. **ARIZONA.**

Office and mine: Globe, Gila Co., Ariz. W. C. Duncan, general manager. ands, known as the Cobre Verde group, include the Annie Rooney mine, once eld by the Spenazuma swindle. Has shafts of 43′ and 82′, showing 2 veins, 1 bout 3′ wide. Was developing at last accounts.

AN CRISTOBAL COPPER CO. **NEW MEXICO.**

Office: 616-116 Broad St., New York, N. Y. Mine office: Arroyo Seco, aos Co., N. M. Richard Hopkins, president; B. F. Shakespeare, secretary; . K. Turner, manager; Geo. Oates, superintendent. Organized circa 1901, as uccessor of Rio Hondo Copper Mining Co. Lands, 1,850 acres, also sundry ater-rights and a railroad franchise. Mine has an 80′ ore body, carrying opper, gold, silver and lead, opened by a 1,000′ tunnel. Is said to have bought he Hawkeye group, near Amizett, Taos county. Has a smelter and cyanide lant. Original development was for copper, but later operations have been onfined to developing a big ledge of gold-bearing quartz.

OMPAÑIA MINERA SAN DIEGO. **MEXICO.**

Letter returned unclaimed from former mine office, Parras de la Fuente, arras, Coahuila, Mex. Has auriferous and argentiferous copper ore. Idle.

AN DOMINGO GOLD & COPPER CO. **ARIZONA.**

Dead. Merged, circa 1903, in Picacho Blanco Mining Co. Formerly at forristown, Maricopa Co., Ariz.

INA SAN DOMINGOS. **PORTUGAL.**

Owned by Mason & Barry, Ltd.

AN FELIPE MINING CO. **MEXICO.**

Office: Philadelphia, Pa. Mine office: Hostotipaquillo, Ahualulco, Jalisco, lex. Col. N. Z. Seitz, president and general manager; Geo. P. Roux, superintendent. Organized 1902, under laws of Arizona, with capitalization $1,000,000, hares $1 par. Development is by a tunnel, planned to be driven 3,000′, to

cut the San Felipe veins at depths of 1,600′ and 3,200′. Has a mill, ra
50 tons daily capacity, planned to be remodeled. Paid dividends from
sales, hence is viewed with much suspicion.

COMPAÑIA MINERA DE SAN FERNANDO. ME

Mine office: Zimatlán, Oaxaca, Mex. Muñoz Gomez, manager. Has
erous copper and argentiferous lead ores, employing circa 40 men, at la
counts.

SAN FERNANDO COPPER MINING & SMELTING CO. ME

Office: 3637 Fourth St., San Diego, Cal. Mine office: Ensenada,
Baja California, Mex. F. M. Woods, president; H. E. Woods, vice-pres
Warren Woods, treasurer; E. C. Humphrey, manager.

Lands, 180 pertenencias, area 445 acres, in the San Fernando district
240 miles below the California line, 25 miles east of San Carlos Landi
the Pacific, and 80 miles southeast of the harbor of San Quintín, with
wagon road from mine to the landing. Mine, discovered by the San Fra
friars, early in the Nineteenth Century, is said to have produced upwa
$500,000, from ore shipped, via San Francisco, to Liverpool, ore rangi
high as 50% in copper tenor, with good gold and silver values. Pr
shows numerous veins of 3′ to 5′ width, carrying carbonate ores at s
changing at depth to chalcopyrite. Shipments by present owners have
aged circa 20% copper. Equipment includes a hoist, pumps and labo
Has steam power and a 50-ton smelter, employing circa 30 men at last ac

SOCIEDAD ANONIMA INDUSTRIAL DE MINAS DE COBRE (
SAN FERNANDO y SANTA ROSA.

Dead. José F. Santa Eulalia, was president. Property was the Fin
Joaquin, circa 30 miles northeast of Cienfuegos and about 12 miles w
Manicaragua. The mine, 4 miles north of the Rio Mayo, was worke
considerable scale, beginning circa 1865, and shipped, 1868, to Swansea
tons of ore of 19.7% average copper tenor. Was last worked 1883-188
pending because of a revolution. The vein ranges up to 30′ in width, ca
cuprite, melaconite, azurite and chalcopyrite. Property has been idle fo
years. Company's office formerly was at Havana, Cuba. Formerly at
Clara, Santa Clara Province, Cuba.

COMPAÑIA MINERA DE SAN FRANCISCO DEL AZUL. ME

Mine office: Matehuala, Catorce, San Luis Potosi, Mex. W. B. A. Di
manager. Property includes the San Francisco and San Miguel mines, ca
gold, silver and copper ores. Has steam power, lixiviation plant and a
mill, employing circa 100 men.

SAN FRANCISCO DEL ORO MINES, LTD. ME

Office: 65 London Wall, London, E. C., Eng. Mine office: Parral, H
Chihuahua, Mex. Earl of Denbigh, chairman; James E. Hyslop, ma
Harold A. Searle, secretary. Organized Apr. 18, 1903, under laws of
Britain, with capitalization £375,000, shares £1 par; issued, £330,000.
253 acres, 14 miles southwest of Parral, carrying gold, silver, copper, le
zinc ores, undergoing development. Shipments are made to nearby sm
and profits earned in first 18 months are given by company as in ex
£22,000. Was building a 200-ton mill, 1907.

SAN FRANCISCO MINING CO. ME

Office: care of J. G. Pritchard, vice-president and general manage
bee, Ariz. Mine office: San Felipe, Arizpe, Sonora, Mex. H. M. W
president; Fred C. Hagen, secretary; W. E. Tester, assistant secretary;
Wood, treasurer; Peter Pitz, superintendent. Organized Oct. 23, 1905,
laws of Arizona, with capitalization $60,000, shares $10 par. Lands, 16
oncins, also exploratory rights over 4 square miles of adjacent lands.

s several veins of 30″ to 9′ width, giving good assay values, mainly nd silver, with from a trace to 7.19% copper, and up to 50% lead. ly idle.

ANCISCO MINING CO. **MEXICO.**
office: Autlán, Jalisco, Mex. L. E. Fuller, president. Organized trace of operations.

ACION MINERA SAN FRANCISCO y ANEXAS. **MEXICO.**
Formerly at Asientos, Ocampo, Aguascalientes, Mex.

TIER COPPER CO. **MEXICO.**
: 800-189 La Salle St., Chicago, Ills. Mine office: San Javier, Sonora, Mex. Jacob J. Smith, president; Chas. F. Sollars, vice-presi-sley R. Perry, secretary; W. Schellinger, mine manager. Organized 7, under laws of South Dakota, with capitalization $5,000,000, shares nd is incorporated under laws of Mexico with same title. Lands, 3 groups, are said to carry high grade argentiferous copper ore. In nents, October, 1907, promised a dividend within 6 months, but appar-dend failed to materialize. Is not regarded favorably.

AN JOAQUIN. **CUBA.**
d by Sociedad Anonima Industrial de Minas de Cobre San Fernando Rosa.

N JOSÉ. **CHILE.**
and mine: care of Silva y Rivas, owners, Tamaya, Ovalle, Coquimbo, ine, opened 1844, is 517′ deep. Idle at last accounts.

É CONSOLIDATED MINING CO. **MEXICO.**
office: Moctezuma, Sonora, Mex. Organized under laws of Arizona colized in Mexico. Lands, circa 100 acres, lying near the Moctezuma ., showing a vein of 5′ to 12′ width, carrying values mainly in silver with small gold and copper values. Presumably idle.

É MINING CO. **CUBA.**
Succeeded, circa 1902, by El Cobre Mines. Formerly at El Cobre, de Cuba.

AN JOSÉ y OTRAS. **SALVADOR.**
and mines: care of Luna Hermanos, owners and managers, Melapán, a, Salvador. Has auriferous and argentiferous copper ores, with wer, and a small and antiquated smelter, employing circa 250 men, counts.

IA MINERA SAN JUAN. **MEXICO.**
office: Muleje, Sur, Baja California, Mex. Presumably idle.

N JUAN. **SPAIN.**
office: Paimogo, Huelva, Spain. D. José De Soto, manager. Lands, res, including 4 old mines. Idle.

D MINERA SAN JUAN. **CHILE.**
: Calle Prat, 55, Valparaiso, Chile. Mine office: Higuera, La Serena, , Chile. Employs 170 men. Guillermo Lyon, president; José Maria nanaging director; preceding officers, E. A. Sandiford, Ruperto nd Cirilo Armstrong, directors; Miguel Scantlebury, general manager; pargoe, mine superintendent; Ricardo Everett, smelter superintend-nized Feb. 17, 1906, under laws of Chile, with capitalization 1,000,000 300,000 pesos preferred and 700,000 pesos common shares, par 20 pesos paid in. Semi-annual meeting, March and September.
, 29 claims, area 66 hectares, also a 9-hectare millsite. Country granite and diorite, showing 8 strong parallel veins, opened by a ber of tunnels and by the following shafts: Casas, 70′; Ajo, 500′; 40′; Rosario, 300′; Cocinera, 240′; Capriciosa, 700′; San Juan, 1,200′;

lerma, 200'; San Pablo, 600'. Mines are estimated to have 20,000 tons of ore blocked out for stoping.

Mines, opened 1820, have been in continuous operation since. Power plant includes 6 hoists, good for 1,000' depth each, 7 driving engines, and a Siemens & Halske electric plant for lighting purposes and for driving 4 electric rock drills, of the same make. Buildings include a 100x100' machine-shop, a 30x30' carpenter shop and a 30x30' smithy, all of wood, and about 50 dwellings for employes.

Company has two smelters, one at Las Casas mine, and the other, which is the more important, in a valley below and about one mile distant from the mines, from which ore is received in carts. The two smelters have a combined capacity of 230 tons daily. Equipment includes 12 kiln calciners, a 120-ton rectangular blast-furnace and seven 16-ton reverberatory furnaces. Product is a matte of 50% average copper tenor, sent to the works of the Sociedad Chilena de Fundiciones, at Guayacán, for refining. Nearest shipping point is the port of Potoralillo, distant 9 miles from the smelter. Fuel is soft coal, costing 30 pesos per ton, and coke, costing 35 pesos per ton, Chilean. Average cost of mining is 3 pesos per long ton, and of smelting, 10 pesos per ton. Ores treated average 8% copper. Production, first 5 months of 1906, was circa 1,000 tons fine copper, and for 1907 is estimated at 4,000,000 lbs. fine copper.

SAN JUAN BAUTISTA MINING CO. MEXICO.

Office: 513 Ouray Bldg., Washington, D. C. Mine office: Moctezuma, Sonora, Mex. Dr. F. S. Chamberlain, president; A. G. Drake, secretary and manager; Wm. Carter, treasurer; Geo. F. Woodward, general manager; Wm. M. Reese, superintendent; A. J. Klide, assistant superintendent. Organized March, 1906, under laws of Arizona, with capitalization $5,000,000, shares $10 par.

Lands, 19 claims, on El Cerro Rosario, including antiguas showing large slag piles remaining from ancient smelting operations. Property carries a mineralized zone circa 1,000' wide, traceable about 1,500', between limestone and porphyry. Development is by a 2-compartment 100' shaft on the Rosario claim, also shafts of 50' and 126' on other claims. La Bronzosa mine carries argentite, stephanite and chalcopyrite, associated with pyrite, and La Cobriza mine is said to show 30' of ore carrying highly argentiferous cuprite. Property has yielded ores assaying up to $300 gold per ton.

MINA SAN JUAN DE MALAJA. CUBA.

Mine office: Santa Clara, Santa Clara, Cuba. Lands, 6 miles northeast of Santa Clara, showing a 100' gossan, are but slightly developed, and have been idle many years.

SAN JUAN MINING CO. COLORADO.

Mine office: Central City, Gilpin Co., Colo. Ores carry gold, silver and copper. Has steam power. Presumably idle.

SAN JUAN SMELTING & REFINING CO. COLORADO.

Office: Exchange Bldg., Denver, Colo. Letter returned unclaimed from former mine office, Silverton, San Juan Co., Colo. Wm. Oliver, president; W. F. Kendrick, vice-president; John B. Humphrey, secretary; preceding officers Wm. F. Ford, John Colquhoun, Geo. P. Peck, C. I. Gagnier and John M. Braley directors; Samuel H. Dresbach, superintendent.

Organized 1903, under laws of Colorado, with capitalization $3,000,000, shares $1 par, as a consolidation of Kendrick & Gelder Smelting Co., Oliver Mining Co. and Paradox Copper-Gold Mining Co. Bonds, $250,000 authorized, issued, circa $100,000. Interest rate on bonds is variously reported as 6% and 10%. In March, 1907, was offering $100,000 of 10% bonds, at par. On 27, 1908, authorized an issue of $300,000 ten-year refunding bonds, secured by mortgage, but a shareholder secured a court order prevent issue of these bonds, because property was in hands of a receiver wh

authorized, illegally. Interest on the $100,000 bond issue was de-
arch 1, 1908, and receivers appointed, the foreclosure proceedings
reason of default in interest apparently being in the nature of a
ction, at the start, but becoming unfriendly later on. At last
June, 1908, property was held, under tax-title, by E. C. Drew, as

, circa 40 claims, 10 patented, including a millsite one mile below the
mine, lying mainly on Eureka Mountain, with 3 claims in Cinnamon
the line of the Silverton, Gladstone & Northern Railroad, 7 to 10
Silverton. Part of company's former landed holdings were under
ease, partly paid, to Ross Mining & Milling Co., at last accounts.
rincipal property is the Henrietta mine, carrying auriferous and
ous copper ores, opened by a long crosscut tunnel, estimated by
o show circa 400,000 tons of ore, of about $15 average value, blocked
traction, which figures are considered exaggerations. The Henrietta
show occasional chutes of high grade smelting ores, up to 20 and
pper tenor, with smelting ore averaging about 7% in copper tenor,
g ore averaging circa 3.5% copper. The mine has gasoline and elec-
.
melter, said to have been renovated, 1905-1906, is held under bond
by Ross Mining & Milling Co. The reduction plant included a 400-ton
or and 200-ton smelter. The Henrietta mine does not seem to impress
at Silverton as an especially remarkable property, and the com-
exceptionally bad shape, with every prospect of a total smash.

AS COPPER CO. **MEXICO.**

office: Choix, Fuerte, Sinaloa, Mex. Entire stock issue is owned
istral Copper Co.

A MINERA SAN LUIS. **MEXICO.**

Formerly at Tepezalá, Ocampo, Aguascalientes, Mex.

S MINING CO. **MEXICO.**

1104-27 William St., New York, N. Y. Mine office: Gabriel,
Mex. John G. Gibbons, president; W. J. Robinson, vice-president;
Martin, secretary and treasurer; Col. Britton Davis, managing
preceding officers, Seymour W. Tulloch, Angel L. Negrete, J. Edward
ilter S. Perry and Hollister S. Logan, directors.
ized Nov. 16, 1900, under laws of West Virginia, and capitalization
1905, to $3,000,000, shares $1 par. First dividend, 1%, was paid
1906, and a second dividend was paid July, 1906, both unearned.
eting, second Wednesday in April.
, 506 pertenencias, area 1,241 acres, in 64 groups, also a 25-acre mill-
e San Lucas and Pánuco de Coronado districts of Durango. Com-
claims to hold El Cura ranch, area 35,000 acres.
ineral property shows limestone and porphyry, carrying fissure veins
t deposits, company reporting 64 ore bodies, of which 6, under de-
, were estimated, by company, to average 3% copper, 12% lead, 1%
z. silver and $4 gold per ton, mainly from sulphide ores, the com-
ing, at end of 1905, to have 17,314′ of workings estimated to show
ns of ore, with 200,000 tons blocked out, which figures are not
because of the phenomenal untruthfulness of some of its officers.
were discovered circa A. D. 1650, and worked, more or less irregu-
1830, when closed, on account of water and Indian troubles, remain-
until reopened, 1901, by present company.
an Luis mine shows a considerable body of copper ore, of low average
some high-grade silver ore.

The Potosina mine, with 1,994′ of workings, is said to show, at the w end, a considerable body of ore of smelting grade, and a large quant milling ore.

The San Gonzalo mine, 350′ deep, shows low-grade ores, carrying s silver values above, with copper on the lower levels.

The Castillana mine, adjoining the San Gonzalo on the east, with t tinuation of the vein of the latter, is said to have been proven for a dis of 1,600′, by trenches and pits of 10′ to 60′ depth, and has an idle 120′ s

The Sidney mine has a shallow shaft, showing a 2′ vein of galena, g assays up to 45% lead, 40 oz. silver and 3 grams gold per ton, but has idle for some years, on account of a heavy inflow of water.

The San Lucás mine, area 19 hectares, 35 miles northwest of Gabri an old property, claimed to have nearly 2 miles of workings, carrying m lead and zinc.

The Aventura mine, adjoining the San Lucás, shows a heavy go with an old shaft opening a 3′ vein of carbonate ore, said to give assay 32% copper and 12 grams gold per ton.

The San Pablo mine shows parallel veins said to carry 6″ to 36″ streaks of sulphide ore, giving assays up to 16% copper, 360 oz. silver an grams gold per ton. Development is by an abandoned incline shaft, a 175′ vertical shaft, latter equipped with gallows-frame and hoist.

Equipment includes steam plants, said to aggregate 750 h. p., with 6 b and 2 Ingersoll-Sergeant air-compressors, of 12 drills combined capacity.

Buildings are said to include a 25x150′ stone machine-shop, 25x150′ wo carpenter-shop, stone smithy, offices, 4 general stores and a large numbe dwellings for workmen, with a total of 175 buildings.

The 60x180′ mill, of adobe and iron, is equipped with 2 crushers, 1 jig 4 Bartlett tables. Concentration seems to have proven more satisfactory leaching.

The Trinidad leaching mill, of 120 tons claimed daily capacity, h calcining furnaces, for roasting ore before leaching, and apparently tr only about 40 tons daily, when in operation.

Production, 1905, was reported as 30,725 tons of ore, of which 5,845 were shipped to smelters, 6,481 tons were leached, and 15,118 tons were centrated. Production, 1905, was reported as circa 450,000 lbs. fine copper net earnings, 1905, were claimed to be 277,530 pesos.

John G. Gibbons, a director, brought suit, 1907, in the Supreme Cou Mexico, to recover $500,000, alleged to have been lost or wasted by the "Gen." Walter S. Logan, a notorious shyster lawyer, who died July 19, the title boasted by the "general" having been acquired as former pre of the "Sons of the American Revolution," which is greatly to the cre that body of patriots, who permitted their ancestors to bleed for the ca liberty. The suit of Mr. Gibbons includes proceedings against Myra B. M and the Logan Estate, also including Hon. Geo. B. Agnew and Col. B Davis.

The debts of the company were claimed, in 1905, to have been paid withstanding which the capitalization of the company was increased, an payment of dividends begun, simultaneously with the selling of treasury which was a deliberate and intentional swindle on the part of the ma ment, which has been connected with some of the most notorious mining f dividends of fabulous size, and Miss Martin and the balance of her gan of the United States, including the George A. Treadwell and Copete comp The company promised, over the name of the notorious Myra B. M accuse Louis Ross, formerly general manager in Mexico, of bad manag and making misleading reports that caused the company to pay divi

a matter of fact, Mr. Ross is one of the few honest men ever connected ially with this company, and his management, instead of being bad, was ptionally good—in fact, his conduct of the company's mining affairs was nexpectedly capable that the Logan gang, which obviously started the San s as a mere bit of stock-jobbery, came to the conclusion that the mine valuable, hence wrecked the company, in accordance with the piratical hods employed by this outfit in all of its mining deals.

Despite the efforts of Mr. Ross and a few other honest men, the company rowed money, 1906, or at least is supposed to have borrowed money, accord- to the records, from some of the parties connected with the outfit, and ber, 1908, judgment was taken, by default, for $51,000, in favor of Hon. . B. Agnew, on 2 notes, made 1906, running for 18 months, payable to Myra Martin.

The newspapers that accepted the putrid advertising of this rotten con-, well knowing it to be a swindle, are now foremost in their denunciations he company, there being no further revenue derivable from the printing he company's lies. Property considered valuable, but the company is a dle.

T MARCUS-SALOME DEVELOPMENT CO. **ARIZONA.**

Office: Pittsburg, Pa. Mine office: Salome, Yuma Co., Ariz. Lands are t 4 miles from the Socorro mines, in the Harqua Hala Mountains. Pre- ably idle.

MPAÑIA MINERA SAN MARTIN y ANEXAS, S. A. **MEXICO.**

Office: Oaxaca, Mex. Mine office: San Martín de los Cansecos, Oaxaca, x. Employs 124 men. Frank M. Leonard, president and general manager; is Acevedo, vice-president; Ranulfo Bravo, secretary, treasurer and superin- dent; Jesús Linares, mine superintendent. Organized Jan. 15, 1907, under s of Mexico, with capitalization 400,000 pesos, shares 10 pesos par, in 35,000 paid shares and 5,000 assessable shares; issued, 37,995 shares.

Lands, 5 groups, area 55 hectares, circa 10 miles from Ocotlán, including antigua said to have been worked by Aztecs before the Spanish conquest. perty shows diorite, carrying a vein of 10' to 12' average width, traceable mile, with strike of 11° West, carrying ore returning, from shipments, 2% per, 2% lead, 6% zinc, 5 kgs. silver and 100 grams gold per metric ton. Equip- t includes a mill, built by former owner, having 3 stamps and 3 Wilfley les, now idle because of poor location. Property, in development stage, ported itself from sales of shipping ore, and company has no indebtedness. perty considered promising and management good.

NA SAN MIGUEL. **PERÚ.**

Mine office: Morococha, Junín, Perú. Mine has 2 tunnels, lower circa meters in length, developing mainly enargite, with some tetrahderite and ttle tennantite, associated with pyrite. Mine, opened 1894, in 10 years duced, from ore averaging 20% copper and 333 grams silver per ton, 6,400 kgs. fine copper and 10,794 kgs. fine silver. Mine was said, 1905, to producing about 800 tons monthly, of ore averaging circa 22% copper and oz. silver per ton. Production, 1907, estimated at 1,400,000 lbs. fine copper.

GOCIACION MINERA SAN MIGUEL. **MEXICO.**

Mine office: Matehuala, Catorce, San Luís Potosí, Mex. Wm. R. Boggs, general manager. Has argentiferous copper ore and gold. Equipment in- les steam power and a 100-ton leaching plant. Employs circa 300 men.

CIEDAD DE MINERALES DE SAN MIGUEL. **SPAIN.**

Dead. Was succeeded, Oct. 12, 1904, by San Miguel Copper Mines, Ltd. merly at Almonáster, Huelva, Spain.

SAN MIGUEL COPPER CO. NEW M

Mine office: Tecolote, San Miguel Co., N. M. Frank J. Buck, tendent, at last accounts. Presumably idle.

SAN MIGUEL COPPER MINES, LTD.

Office: 23 Queen Victoria St., London, E. C., Eng. Mine offic monáster, Huelva, Spain. H. Schmidtz, chairman; Geo. Emdin, secretary; E. Eberbach, managing director; F. O. Harvey, consulting engineer. ized Oct. 12, 1904, under laws of Great Britain, with capitalization £ shares £1 par; issued, £140,007. A former debenture issue, of £75,000, was fully redeemed from the share premium on a new stock issue, 1905, at £2 10s. per share. Company is said to have a reserve fund of Regular dividend rate is 25% per annum, paid quarterly.

Lands, 1,900 acres, including the San Miguel and adjoining mines of erous pyrites. The property was worked, for some years, by a Por company, the Sociedad de Minerales de San Miguel, until taken over by present owners. In 1907 the lower levels of the mine caved in, since time production has been limited to open-cast ore extraction. The prope circa 450,000 tons of partly leached ore, on surface, in teleras and terer the mine was said to show circa 500,000 long tons of ore averaging 2.5 per, before underground workings were lost, in whole or part, by caving

Property includes a 19-kilometer private railway, costing £40,000 the mine, at Almonáster, to El Cerro, where connection is secured w Ferrocarril Zafra y Huelva.

Production, 1904, was 588 long tons precipitate and 18,487 long tons erous pyrites, with copper contents of 1,612,800 lbs. fine copper. Pro 1905, was 933 tons precipitate and 3,168 tons cupriferous pyrites, bu was only 797,440 lbs. fine copper, owing to mine troubles, and, because troubles, management was changed, 1907.

SOCIEDAD MINEIRA DE SAN MIGUEL DE HUELVA.

Dead. Succeeded, Oct. 12, 1904, by San Miguel Copper Mines, Lt merly at Almonáster, Huelva, Spain.

COMPAÑIA MINERA DE SAN MIGUELITO. M

Mine office: Cumpas, Moctezuma, Sonora, Mexico. Long idle.

COMPAÑIA MINERA SAN PABLO. M

Mine office: San Pedro de las Colonias, Parras, Coahuila, Mex Cuyas, superintendent. Has gold, silver and copper ores, employing circa

SOCIÉTÉ ANONYME DES MINES DE SAN PEDRO.

Office: 39 Rue de Chateaudun, Paris, France. Mine office: Zala Real, Huelva, Spain. Don Carlos Marchal, agent. Capitalization, francs. Lands include the Barranco de los Buyes group of 10 old min 167 hectares. Idle.

SAN PEDRO COPPER CO. NEW M

Mine office: San Pedro, Santa Fé Co., N. M. Idle since circa 1899

SAN PEDRO COPPER CO., S. A. M

Mine office: La Cananea, Arizpe, Sonora, Mex. Is controlled, stock ownership, by Cananea Central Copper Co., which is a subsidi poration of the Greene Cananea Copper Co. Property consists of the can, Copper Belt, Bryan, Seguro, Square and eastern part of Massey N El Oriente claims. Property is described under title of Greene Canan per Co.

COMPAÑIA MINERA SAN PEDRO DE NOLASCO.

Mine office: San Pedro de Nolasco, Victoria, Santiago, Chile. is the Carlotta mine, opened A. D. 1795, which is developed by a 700' Presumably idle.

)MPAGNIE DES MINES DE CUIVRE DE SAN PLATON. **FRANCE.**

Office: 7 Rue Pillet-Will, Paris, France. Mine office: Almonáster, Huelva, ain. Guillermo Sundheim, manager. Organized Oct. 18, 1906, under laws France, with capitalization 3,000,000 francs, shares 100 francs par. In 1907 t earnings were 393,568 francs, 69 centimes, and, with allowance for amorti- tion, there was left a net balance of 238,211 francs, 16 centimes. Paid 5% vidends in 1907 and 1908.

Lands, 46 hectares, including the San Platon, Segunda San Platon and mento de San Platon mines. Production, 1907, was 26,116 metric tons of priferous pyrites.

AN POIL MINING & EXPLORATION CO. **WASHINGTON.**

Office: care of S. L. Boyer, manager, Spokane, Wash. Mine office: Re- blic, Ferry Co., Wash. Organized 1907, under laws of Washington. Lands e 9 groups of claims, carrying gold and copper ores.

AN RAFAEL COPPER MINING CO. **MEXICO.**

Office: Cleveland, Ohio. Mine office: Terrazas, Chihuahua, Mex. R. B. tchinson, manager; Capt. M. D. Murray, superintendent. Supposedly is ntrolled by the firm of Corrigan, McKinney & Co. Lands, known as the lumbia group, formerly were held by Federal Copper Co., of El Paso, and agoon Mining Co.

AN RAFAEL COPPER MINING CO. **MEXICO.**

Dead. Formerly at Hermosillo, Sonora, Mex. Described Vol. VI.

AN RAFAEL MINING CO. **MEXICO.**

Dead. Succeeded by Mercer-San Rafael Mining Co. Formerly at Ameca, lisco, Mex.

)MPAÑIA MINERA SAN RAMÓN DE FREIRINA. **CHILE.**

Office: Santiago de Chile. Mine office: San Juan, Freirina, Atacama, ile. Organized Nov. 22, 1904, under laws of Chile, with capitalization 160,000 sos, shares 100 pesos par.

AN REMO COPPER CO. **ARIZONA.**

Dead. Was merely a ghost, when in existence. Formerly haunted Gleeson, chise Co., Ariz. Described Vol. V.

AN SIMON COPPER CO. **ARIZONA.**

Office: Marquette, Mich. Mine office: Paradise, Cochise Co., Ariz. athan M. Kaufman, president; Hon. Norman W. Haire, vice-president; S. R. aufman, secretary and treasurer; preceding officers, Thos. F. Cole, John A. ncan, W. G. Rice and Thos. H. Collins, directors; Marshall Estes, superin- ndent. Organized circa January, 1907, under laws of Arizona, with capitali- tion $2,500,000, shares, $10 par, as a reconstruction of Chiricahua Develop- nt Co.

Lands, 40 claims, area circa 750 acres, 16 miles from nearest railway, at deo, taken over, April, 1903, by predecessor of present company, and pre- ously operated by Capt. Thos. Burns as a silver mine. Has a 750′ crosscut nnel, with a 100′ winze 700′ from portal, cutting circa 50′ of leached ore, parently the apex of a sulphide ore body. The 400′ Mars shaft, sunk on a in having a 150′ gossan, passed through leached ore, and is bottomed in alcopyrite of 2 to 4% copper tenor. The 400′ Planet shaft has drifts on the urth level. Equipment includes two 150-h. p. boilers, two 2,000′ Lake Shore uble-drum hoists, and a 16-drill Sullivan air-compressor. Has several mine ildings. Management is good. Practically idle, except for annual assess- nt work.

ANTA ANA-ARIZONA MINING CO. **ARIZONA.**

Office: P. O. Box 1715, Bisbee, Ariz. Mine office: Middlemarch, Cochise ., Ariz. A. W. McPherson, president; Geo. H. Neale, vice-president; A. F. ressler, secretary and treasurer; Wm. Goar, general manager; preceding

officers and E. J. Bennett, directors. Organized April, 1906, under law Arizona, with capitalization $2,500,000, shares $1 par; issued, $1,400,000. nual meeting, second Tuesday in February.

Lands, 14 claims, unpatented, area 280 acres, on Dragoon Mountain, in Black Diamond district, 8 miles from Southern Pacific railway, at Pe showing limestone and porphyry, with 5 ore bodies, of which 2, under velopment, show argentiferous carbonates and sulphides, latter mainly ch pyrite, estimated by company to carry an average of 10% copper, 15% and 6 oz. silver per ton. Development is by tunnels of 70′ and 80′, and shafts of 56′, 110′ and 300′.

Property has steam power, with a 10-h. p. hoist, good for 500′ depth, 2 buildings. Company plans continuous development.

SANTA CASILDA COPPER CO. MEX

Letter returned unclaimed from former mine office, La Lombardia, U pán, Michoacán, Mex. Hon. M. G. Horner, president; R. A. Mills, secret preceding officers, Rafael R. Velad, Pablo Kosidowsky and Alberto Worm, di tors. Organized under laws of Mexico, with capitalization 1,500,000 p Lands are well watered, and include a concession for development of hydraulic horse power from a near-by river. Oxidized zone is superficial, phide zone carrying mainly chalcopyrite. Mine is developing consider bodies of 5% concentrating ore, and has small quantities of ore of 15 to copper tenor. Is said to plan a 200-ton concentrator.

SANTA CRUZ COPPER CO. MEX

Mine office: Santa Cruz, Magdalena, Sonora, Mex. Idle and appare moribund.

SANTA CRUZ MINING CO. ARIZO

Office: 51st St. and Allegheny River, Pittsburg, Pa. Mine office: P gonia, Santa Cruz Co., Ariz. W. W. Hall, president; W. B. Barnes, vice-p dent; R. D. McDonald, secretary; Wm. M. Schwartz, general manager; J Tustin, superintendent. Organized Oct. 5, 1901, under laws of Arizona, capitalization $1,000,000, shares $1 par.

Lands, 6 claims, area 124 acres, 2 miles east of Patagonia, in the Har district, showing several fissure veins, of about 20′ average width, said to a general average assay of 8.5% copper, 20 oz. silver, 5% nickel and $25 per ton, mainly from chalcocite. Development is by 2 shafts, deepest circa

SANTA EMILIA COPPER CO. MEX

Office: 69 Wall St., New York, N. Y. Mine office: Coapa, Michoa Mex. John A. Kennedy, president; A. J. Peyton, vice-president and ge manager; Manual L. Ward, secretary and treasurer; J. R. Crum, superint ent. Organized 1899, under laws of Delaware, with capitalization $1,000 and reorganized, March 27, 1905, under laws of Maine, with capitaliz $2,000,000, shares $1 par. Of the increased capitalization, $500,000 was g shareholders, as a stock dividend, and balance placed in the treasury, going to the general manager for lands turned in by him. Is contr through ownership of majority of stock, by Mexican Development Co.

Lands, 113 acres, in the Tacambaro district, 24 miles from Mexican tional Railway and circa 40 miles southwest of Morelia, including a 30 property, adjoining the original tract, taken over from the general man and former president, paid for in shares from the new treasury stock.

The mine is developed by the 1,200′ Napoleon tunnel, and by a 625′ compartment shaft. The property is said to have circa 3,000′ of workings management is said to plan deepening shaft to 1,000′ and crosscutting, 800′, to intercept the Guadalupe vein. At last accounts the mines ha shown ore in payable quantities, but the management was said to conside situation encouraging.

La Lolita, La Viola and Santa Clara, located in the San Blas mountains of the Sierra Madre, midway between and 25 miles from the Mexican Central and Sierra Madre Pacifico railways. Principal development is on La Lolita group, which has shafts of 75′ and 150′, showing rich oxidized ores, assaying up to 70% copper, shipments from which have averaged 15% copper.

SOCIEDAD MINERA SANTA RITA DE ARQUEROS. CHILE.

Office: Santiago de Chile. Mine office: Arqueros, Coquimbo, Chile. Organized Dec. 12, 1905, under laws of Chile, with capitalization 400,000 pesos, shares 50 pesos par.

SANTA RITA COPPER MINING & SMELTING CO. ARIZONA.

Letter returned unclaimed from former office, 1509 Chemical Bldg., St. Louis, Mo. Mine office: Arivaca, Pima Co., Ariz. Geo. P. Meyers, R. J. Adams and C. T. Sharn, vice-presidents; N. C. Wilson, secretary; J. M. Wyatt, treasurer; C. F. Elliott, general manager. Organized June, 1901, under laws of Arizona, with capitalization $3,000,000, shares $1 par.

Lands, 40 claims, area 630 acres, also 4 timber claims and a 20-acre smeltersite, in the Tyndall district, Santa Rita Mountains, 13 miles from Arivaca, said to show 10 veins, of which 4, under development, are claimed to average 8′ to 30′ in width, and are claimed to give average assays of circa 18% copper, 6 to 10% lead, 1 to 3% zinc, 40 to 68 oz. silver and $2 to $8 gold per ton, from sulphide ores, these figures being utterly preposterous. Mine has 5 pits and shafts, of 20′ to 110′ depth, and 5 tunnels, of 40′ to 260′ length, with circa 1,000′ of workings. Company changed officers repeatedly, was a mere stock-jobbing scheme under former managements, and is regarded with suspicion.

SANTA RITA MINING CO. NEW MEXICO.

Office: 85 Ames Bldg., Boston, Mass. Mine office: Santa Rita, Grant Co., N. M. Albert C. Burrage, president; B. B. Thayer, consulting engineer; John Deegan, superintendent. Capitalization $5,000,000, shares $25 par. Is said to contemplate reduction of capitalization to $2,000,000. Paid, 1904, a $100,000 dividend.

Lands, 79 claims, 46 patented, area circa 640 acres. Is the oldest copper mine in New Mexico, and one of the oldest in the United States, having been opened A. D. 1800. Mine was abandoned, circa 1820, owing to the Mexican revolution, and was reopened, circa 1860. Development is by numerous shallow shafts. No. 8 shaft, with two compartments, is 214′ deep, carrying stopes on 5 drifts. No. 9, a 2-compartment shaft, started 1906, is to be sunk to 300′. A new shaft, of 1,000′ projected depth, was started 1907. Equipment includes a 100-ton concentrator, having rolls and Wilfley tables.

Company is exceedingly secretive, for reasons best known to the management, and is supposed to be closely allied with the Amalgamated Copper Co. Production, 1907, is estimated at 2,500,000 lbs. fine copper, largely secured by leasers.

COMPAÑIA MINERA SANTA ROSA. CHILE.

Office: Santiago de Chile. Mine office: Arqueros, Coquimbo, Chile. Organized May 29, 1905, under laws of Chile, with capitalization 200,000 pesos, shares 1,000 pesos par.

SANTA ROSA COPPER CO. ARIZONA.

Dead. Lands sold, circa 1905, to Detroit Copper Mining Co., of Arizona. Formerly at Metcalf, Graham Co., Ariz. Described Vol. V.

SANTA ROSA DEVELOPMENT CO. MEXICO.

Dead. Lands sold, 1907, to Cabullona Development Co. Formerly at Fronteras, Arizpe, Sonora, Mex. Described Vol. VI.

SANTA ROSA DE MAZAPIL MINING CO. MEXICO.

Letter returned unclaimed from former office, 20 Broad St. New York.

Mine office: Mazapil, Zacatecas, Mex. Has gold, silver, lead and copper pened by shafts and a 1,500′ tunnel. Presumably idle.

A ROSALÍA MINING CO. **MEXICO.**

ine office: Tejupilco, Temascaltepec, Mexico, Mex. Property carries rous and argentiferous copper and lead ores, and has steam power, em- g, 1906, circa 40 men.

TIAGO CONSOLIDATED MINING, MILLING & TUNNEL CO. **COLORADO.**

ine office: Georgetown, Clear Creek Co., Colo. S. K. Davis, superin- nt, at last accounts. Has gold, silver, lead and copper ores, and a 75-ton ntrator.

TIAGO COPPER MINING CO. **CUBA.**

)ead. Formerly at El Cobre, Santiago de Cuba.

TIAGO MINING CO. **MEXICO.**

)ffice: 517 Francis St., St. Joseph, Mo. Mine office: Parral, Hidalgo, ahua, Mex. Geo. J. Greene, president; Geo. Roche, vice-president; T. G. s, secretary and treasurer; Nat P. Wilson, general manager; preceding s and Henry Roach, directors. Organized March 7, 1907, under laws of na, with capitalization $1,000,000, shares $1 par. Annual meeting, third day in February.

ands, 6 claims, area 79 acres; also 1 claim, area 20 acres, in Otero county, Mexico. Chihuahua lands show limestone and porphyry, carrying bodies, said to be fissure veins of 12′ average width, giving average of 3.5% copper, 15% lead, 22 to 25 oz. silver and $6 gold per ton, from and sulphide ores. Has 7 shafts, of 55′ to 150′ depth, with total of 755′ rkings, estimated to show 150,000 tons of ore blocked out for stoping, is excessive. Has a 250-h. p. electric plant, with 3 hoists, good for each, 7-drill air-compressor, 60x85′ machine-shop of frame and adobe, ther mine buildings. Plans building a concentrator. Employs circa n.

O DOMINGO GOLD & COPPER CO. **SANTO DOMINGO.**

ine office: San Cristobal, Santo Domingo. Sly Dorsey, vice-president; 'Connor, secretary; E. F. Buchanan, treasurer. Organized Sept. 17, 1906, laws of Maine, with capitalization $64,000,000, shares $100 par.

ands claimed are alleged mining rights to 400 square miles of the Jaina , in the Province of San Cristobal, estimated, with due modesty, by the ny, to carry seven billion dollars' worth of gold, to be had for merely g it out. Notwithstanding the alleged possession of $7,000,000,000 worth d, the property was bought for $50,000 and the company spent only) for development and equipment, never employing more than 10 men. . O. Brown & Co., stock brokers of New York, voluntarily redeemed a erable portion of the stock of this company placed by them, with the ation that they had learned that the property was not as represented, ere considered entitled to commendation for an honest act, but this iled, under discreditable circumstances, a few months later, and appar- Brown & Co. refunded but part of the money, as shareholders instituted circa October, 1908, for restitution of $543,000, alleged to have been or stock. Peter Whitney, former president of the company, apparently ot responsible for the company's misrepresentations, and is said to be f a sufferer, but apparently Whitney was mixed up very closely with f the peculiar transactions of A. O. Brown & Co. The company is a , and, to all practical intents and purposes, is dead.

O DOMINGO SYNDICATE. **SANTO DOMINGO & HAITI.**

ice: care of E. A. Blanton, Jr., general manager, The Bourse, Philadel- a. Mine office: San Cristobal, Santo Domingo. Capt. J. R. De Lamar,

E. P. Earle, G. P. Lindermann, L. H. Taylor, Jr., W. T. White, Geo. R. T. C. Hall and E. T. Lavino, directors. Organized under laws of New with capitalization $100,000.

Lands, 100 square miles, in the republics of Haiti and Santo D The San Francisco Hills mine, near San Cristobal, is said by Mr. Bl show a body of chalcopyrite of 500′ width, carrying 5 to 20% copper, to $12.50 gold per ton. A 42″ gauge railway was under constructio 1906. Presumably idle.

SOCIÉTÉ ANONYME DES MINES ET USINES DE SANTOMERA.

Office: 27 Rue Mogador, Paris, France. Mine office: Santomera, Spain. A. Foques-Duparc, J. Foques-Duparc, J. L. Baille and R. C Chizy, directors. Organized May 2, 1905, under laws of France, with c zation 300,000 francs, shares 500 francs par. Was endeavoring, July, reorganize, with capitalization 1,100,000 francs, shares 100 francs par.

SANTO NIÑO MINING CO. M

Dead. Formerly at Symón, San Juan de Guadalupe, Durango, Mex.

SAN XAVIER COPPER CO. M

Office: care of Wm. Foster, secretary, Tucson, Ariz. Mine office Javier, Hermosillo, Sonora, Mex. C. C. Rountree, president; George vice-president; Max Muller, treasurer. Organized under laws of Arizon capitalization $1,000,000, shares $1 par. Mexican incorporation is th pañía Minera de Cerro Verde, S. A. Lands, 1,440 pertenencias, 80 mil of La Colorada, also 300 pertenencias lying 24 miles to the southwar circa 4 miles north of the Yaqui river. Presumably idle.

SAPHO MINING CO. NE

Mine office: Ely, White Pine Co., Nev. John Webber, superint Capitalization $1,000,000, shares $1 par. Development is by a tunnel, a back of 250′ at last accounts, said to show auriferous oxidized ores a 6 to 22% copper, with a paystreak carrying about $30 gold per ton steam power.

SARATOGA DEVELOPMENT CO. COLO

Mine office: Central City, Gilpin Co., Colo. John Owen, manager gold, silver and copper ores, with steam power. Was developing, wit 15 men, at last accounts.

SARATOGA PYRITIC SMELTING CO. COLO

Dead. Formerly at Ironton, Ouray Co., Colo. Described Vol. VI.

SARATOGA SMELTING & REFINING CO. COLO

Dead. Succeeded, 1903, by Continental Smelting & Refining Co merly at Ironton, Ouray Co., Colo.

SASAGATINI MINE. J

Mine office: Hatazako-mura, Kanoashi-gori, Iwami, Japan. P carries slightly argentiferous chalcopyrite, associated with sphalerite, and arsenopyrite, with quartz and limestone gangue, in numerous conta ranging up to 50′ in width. Production has been as follows: 274,412 copper and 62,961 momme silver in 1900; 324,183 lbs. copper in 1903; lbs. copper and 109,215 momme silver in 1907.

SASCO SMELTER. AR

Owned by Southern Arizona Smelting Co.

SATER COPPER CO. NEW M

Dead. Lands sold under foreclosure Dec. 12, 1906. Practically su by Fort Pitt Copper Co. Formerly at Kenton, Oklahoma, with lands in Co., N. M. Fully described Vol. VI.

SAUK RIVER MINING CO. WASHIN

Letter returned unclaimed from former office, 327 Pacific Blk.,

ish. Mine office: Darrington, Snohomish Co., Wash. Harold G. Price, president and treasurer; Wm. Van Waters, secretary. Organized 1898, under laws Washington, with capitalization $200,000, shares 50 cents par. Lands, 9 ims, area 180 acres, in three groups, carrying 3 veins of auriferous and ntiferous copper ore. Vein at Blue Bird group is claimed to be 98′ wide, ween porphyry and slate, carrying 3 paystreaks, of 2′, 4′ and 6′, balance of being a low-grade self-fluxing concentrating ore. Idle several years and arently moribund.

ULT GRAY COPPER CO. **ONTARIO.**

Dead. Absorbed, circa 1903, by Copper Queen Mining Co., Ltd. Formerly Bruce Mines, Algoma, Ont.

ULT PROSPECTING & DEVELOPMENT CO. **ONTARIO.**

Dead. Succeeded, circa 1903, by Copper Queen Mining Co., Ltd. Formerly Bruce Mines, Algoma, Ont.

UX HEAD COPPER MINING CO., LTD. **MICHIGAN.**

Office: 36 Home Bank Bldg., Detroit, Mich. Mine office: Marquette, arquette Co., Mich. Employs 8 men. Chas. A. Stringer, president and general manager; Frank M. Moore, vice-president; J. G. Krieg, secretary; Chas. Miller, treasurer; preceding officers and Geo. R. Purdon, directors. Organized Aug. 13, 1902, under laws of Michigan, with capitalization $2,500,000, ares $25 par. Lands, 360 acres, freehold, in the Sauk's Head district, northest of Marquette, 2 miles from Lake Superior & Ishpeming railway, showing ore bodies, said by company to occur as impregnations in granite and diorite, at stated by other authorities to be gash veins in granite, these ranging 4′ 8′ in average width, giving assays of 1 to 4% copper and $2 to $200 gold r ton. Has shafts of 50′ and 170′, and tunnels of 30′, 40′ and 70′. Has eam power with 2 donkey hoists, a 5-drill Ingersoll air-compressor and 4 wer drills. Has 7 buildings, including a 15x20′ machine-shop, store, office d dwellings. Idle.

AVAGE GOLD & COPPER CO. **ARIZONA.**

Office: 625 Noble St., Chicago, Ills. Operating office: Douglas, Ariz. ine office: Paradise, Cochise Co., Ariz. F. M. Wajtalewicz, president; J. A. wandowski, vice-president; P. Dryzmalski, secretary; A. P. Behnke, treasr; preceding officers, J. Kosinski, A. Spetz, J. Z. Wierzchowski, A. Czajor, C. Hess, Jr., and Albert Hindera, directors; Jas. Reay, general manager. anized Jan. 6, 1904, under laws of Arizona, with capitalization $3,000,000, res $1 par. Annual meeting, first Tuesday in November.

Lands, 53 claims, area circa 1,000 acres, in the California district, lying the eastern foothills of the Chiricahua Mountains, next the San Simon ley, 10 miles from Rodeo, the nearest railroad station. The property shows irregular ore bodies, apparently lenses, of which 4, under development, are 2′ to 36′ width, giving assays of 5% copper, 1% lead and from nothing to oz. silver per ton, lead values being from occasional galena.

Development is by 5 shafts, mainly shallow, the 710′ Snowball incline ft showing an ore body ranging up to 23′ in width. There also is a 350′ nel, with circa 3,000′ of workings.

Equipment includes a 60-h. p. Otto gasoline engine and a 75-kw. electric erator, 2 motors, an electric hoist and electric drills.

A much-talked-of 50-ton smelter failed to materialize, though it was said, one time, that the material therefor was on the ground. Company was d, January, 1908, to plan beginning shipments to the Copper Queen smelter.

VANIC MINE. **ARIZONA.**

Office: care of Col. H. L. Pickett, St. George, Utah. Is a partly developed e, in the northern part of Mohave county, Arizona, nearest town being

St. George. Has shipped 14 carloads of ore to Salt Lake smelters, aver 39% copper, this being hauled 140 miles by wagon and 300 miles by Property is promising, but almost inaccessible, at present. Idle several

SAVANNA COPPER CO. NEW ME

Office: 616 Lonsdale Bldg., Duluth, Minn. Mine office: Tyrone, Co., N. M. Works office: Silver City, Grant Co., N. M. H. B. Hovland, eral manager; E. A. Wayne, superintendent. Organized circa September, under laws of Arizona, with capitalization $2,000,000, shares $10 par, merger of the Copper Gulf and Comanche companies, properties of whi separately described, under their respective titles, in this work. Propert sidered valuable and management good.

SAWATARI MINE. JA

Owned by Mitsu Bishi Goshi-Kwaisha.

SCANLAND MINE. ARIZ

Office and mine: Paradise, Cochise Co., Ariz. F. S. Douglas, general ager; L. H. Scanland, mine superintendent and owner. Lands, 12 clai patented, area 240 acres, also a 10-acre millsite, in the California di showing limestone, quartzite and porphyry, with 4 ore bodies, of 4' width, of which one, under development, traceable circa 4,500', carries oxides and carbonates, but mainly chalcopyrite, galena and sphalerite mated to average 5% copper, 20% lead and 23% zinc, with a trace of Development is by a 175' shaft and 450' tunnel, with circa 700' of wo Idle, except for annual assessment work.

SCANTIC GOLD MINING & MILLING CO. COLORADO & ME

Office: 206 Continental Bldg., St. Louis, Mo. Mine offices: White Hinsdale Co., Colo., and Charcas, Moctezuma, San Luis Potosí, Mex. Leschen, president; A. D. Grant, secretary. W. F. Smith, superintend Colorado property, which has steam power, and is developing ores of silver, copper and lead. Joseph T. Murphy, manager of Mexican pr which includes the San Sebastian and extensions, carrying silver, lea copper, equipped with a 25-ton concentrator.

KUPFERKIESBERGBAU SCHATTBERG. AUS

Mine office: Schattberg, Tyrol, Austria. Was a very small copp ducer at last accounts.

GEWERKSCHAFT SCHLESISCHE NICKELWERKE. GERM

Dead. Formerly at Gläsendorf, Schlesien, Germany. Described V

SCHULL COPPER MINING CO., LTD. IRE

Office: 16 Great Winchester St., London, E. C., Eng. Mine office: County Cork, Ire. Thos. V. Anthony, W. F. Ladenburg, and Sir Thos. Tancred, Bart., directors; W. S. Pearless, mine manager; F. C. Vernon, tary. Organized Apr. 6, 1906, under laws of Great Britain, with capital £9,000, in 5,000 ordinary shares of £1 par, and 40,000 deferred shares of Property is a 60-year mining license, dated Dec. 25, 1902, covering la Coney Island and Long Island, said to have been bought for a considera £3,500. Is not regarded favorably.

SCHUYLER COPPER CO. PENNSYLV

Mine office: Phoenixville, Chester Co., Pa. Property is the Jones in Caernarvon township, Berks county, Pennsylvania. Company o the mine, 1869-1878, and built a small smelter. Idle since 1878.

SCHULYKILL COPPER CO. ARI

Dead. Formerly at Chloride, Mohave Co., Ariz.

SCOTIA MINING & MILLING CO. WASHIN

Dead. Formerly at Bossburg, Stevens Co., Wash.

SCOTTISH-AUSTRALIAN COPPER CORPORATION, LTD.

Office: Guernsey, Great Britain. Organized Jan. 14, 1904, under laws of Guernsey, with capitalization £200,000, shares £1 par. Location of lands, if any, unknown. Not regarded favorably.

SCOTTISH-CAUCASIAN COPPER SYNDICATE, LTD.

Dead. Formerly had an office at 55 West Regent St., Glasgow, Scotland.

SCOTTISH CHIEF MINE. **UTAH.**

Mine office: Park City, Summit Co., Utah. Wm. J. Lawrence, manager. Mine, opened by a 325' shaft, shows mainly silver-lead ores, assaying up to 60% lead and 21 oz. silver per ton, but has made several small shipments of ore averaging circa 14% copper and 20 to 50 oz. silver per ton, and has ores assaying 7.5% copper, 6% lead, 32 oz. silver and $1.80 gold per ton.

SCOTTISH COPPER MINES SYNDICATE OF BRITISH COLUMBIA, LTD. **BRITISH COLUMBIA.**

Dead. Formerly at Kamloops, Yale district, B. C.

SEABOARD COPPER CO. **VIRGINIA.**

Office: 77 South Market St., Boston, Mass. Mine office: Virgilina, Halifax Co., Va. M. A. Packard, president; H. J. Sampson, vice-president; Edward L. Pond, secretary; C. C. Merritt, treasurer; L. W. Tucker, general manager. Organized July, 1902, under laws of New Jersey, with capitalization $300,000, shares $1 par. Lands, 135 acres, including the Dorothy and Bailey mines, in the Virgilina district, 3 miles from the Southern Railroad, showing slate, traversed by a fissure vein of 8' estimated width, carrying cuprite, malachite and azurite in the upper part, with bornite below, giving estimated values of 3 to 4% copper, with combined gold and silver values of $1 to $1.20 per ton. Development is by shafts of 30', 265' and 115', and by 2 tunnels, of 165' each, with a total of 840' of underground workings, estimated to show 40,000 tons of ore, with 10,000 tons blocked out for stoping, and with 3,000 tons on the dumps, ready for milling. Equipment includes a 275-h. p. steam plant, with a 25-h. p. Lidgerwood hoist, good for 500' depth, and a 5-drill Ingersoll-Sergeant air-compressor. Buildings include an office, bunk-house and engine-house. Idle several years.

SEAGER-CORYELL GOLD & SILVER MINING CO., LTD. **IDAHO.**

Office: Phillipsburg, N. J. Mine office: Custer, Custer Co., Idaho. John Eilenberg, president; Reginald Coryell, secretary and general manager. Organized January, 1900, under laws of New Jersey, with capitalization $100,000, shares $1 par. Lands, 9 claims, area 170 acres, in the Yankee Fork district, showing several veins, with about 1,500' of underground openings, one claim showing melaconite, azurite, malachite and chalcopyrite, assaying 3% copper, with fair gold and silver values. Idle several years.

SEA ISLAND COPPER CO. **ALASKA.**

Mine office: Kasaan, Alaska. F. A. Barrette, superintendent. Lands, 6 claims, about 1 mile from the Rush-Brown property, on Kasaan Bay, showing chalcopyrite assaying up to 20% copper.

SEARCHLIGHT COPPER-GOLD MINING CO. **NEVADA.**

Office: 402 Stimson Bldg., Los Angeles, Cal. Mine office: Searchlight, Lincoln Co., Nev. Samuel T. Graham, president; R. P. Pierce, vice-president; John G. Davis, treasurer; V. A. Brewer, secretary; preceding officers, Robt. D. Reed, J. W. Cornick and C. Rauber, directors; John Howe, superintendent. Organized Nov. 27, 1901, under laws of Arizona, with capitalization $1,000,000, shares $1 par; issued, $880,000. Annual meeting, first Monday in November.

Lands, 7 claims, surveyed for patent, area 140 acres, showing 6 ore bodies, in granite and porphyry, of which 3, under development, of 6" to 5' width, carry oxidized and sulphide ores estimated to average 12.8% copper and up to

$140 gold per ton. Development is by the 100′ Oom Paul shaft, and by tunnels of 20′, 35′ and 100′. Hand power is employed. Old management hit badly by the property, but new directorate seems an improvement.

SEARCHLIGHT GOLD & COPPER CO. ARIZONA.

Dead. Property was 11 claims and water rights, in the Wrightson district, circa 2 miles west of Patagonia, on the Sonora Railroad. Lands showed a mineralized dyke of 250′ claimed width, with a capping of hematite and manganese, opened by three 40′ shafts, said to give ore assaying $4 to $10 per ton in combined gold and silver values. M. S. Moore was superintendent. Formerly at Patagonia, Santa Cruz Co., Ariz.

SEATON MINING & MILLING CO. COLORADO.

Dead. Formerly at Idaho Springs, Clear Creek Co., Colo.

SEATTLE-ALASKA COPPER CO. ALASKA.

Office: Seattle, Wash. Mine office: Latouche, Latouche Island, Alaska. Jas. Bjorn, secretary, treasurer and general manager. Capitalization $1,000,000, shares $1 par. Lands, 10 claims, with a water power available, said to give a fair surface showing of argentiferous and auriferous chalcopyrite, having a 65′ shaft in ore. Has steam power and employs circa 15 men.

SEATTLE-BOSTON COPPER CO. WASHINGTON.

Office: 419 Alaska Bldg., Seattle, Wash. Mine office: Skyhomish, King Co., Wash. Chas. E. Crane, president and general manager; Dr. F. A. Churchill, vice-president; Geo. H. Law, secretary; Martin B. Crane, treasurer; preceding officers and A. M. Brooks, directors; A. J. Walters, superintendent; Jas. Cosgrove, mine superintendent. Organized Sept. 19, 1905, under laws of Washington, with capitalization $2,000,000, shares $1 par, divided into $600,000 preferred 8% stock and $1,400,000 common stock, latter issued in payment for the property, and held in escrow at last accounts, 1906.

Company apparently controls the Dutch Miller Mining & Smelting Co., through lease, and creditors of latter asked, 1907, for a receiver, alleging mismanagement on the part of officers of the Seattle-Boston Copper Co.

Lands, 20 claims, area 400 acres, also a 120-acre millsite, in the Burn district, 11 miles south of the Great Northern Railway. A water-right, owned by the company, is claimed to be capable of developing 40,000 h. p. Property shows syenite, carrying 12 fissure veins, of which 3, under development, are reported as of 18′ average width, opened by tunnels of 70′, 35′ and 60′, estimated to show 20,000 tons of ore, with 5,000 tons blocked out for stoping, which figures are considered excessive, in view of the extremely limited development secured, with 1,500 tons of ore on the dump, formerly estimated to carry average values of 16% copper, 3% zinc, 6 oz. silver and $3 gold per ton, which figures are considered excessive, but ore was said, February, 1907, to average only about 7% copper and 4 to 11 oz. silver per ton, with small gold values, which figures probably are amply high.

Improvements include 5 small mine buildings, and company was said, 1906, to have ordered a 500-ton Bleichert aërial tramway, a 250-kw. Westinghouse electric generator, a 100-h. p. hoist and a 10-drill air-compressor, but none of this machinery seems to have materialized. Company also reported that it was building a 6½-mile private line, to be known as the Seattle-Boston Railroad, to have a 200-h. p. Westinghouse electric locomotive, but apparently was unable to sell sufficient stock to build the road. The property may be valuable, as claimed, but the company cannot be regarded favorably, in the light of excessive claims made at the time when stock was being sold. Presumably idle.

SEATTLE GOLD & COPPER MINING CO.

Dead. Formerly had an office at Seattle, Wash.

T COPPER MINING CO., N. L. **AUSTRALIA.**
ne office: Illewong, N. S. W., Australia. Organized December, 1907, aws of New South Wales, with capitalization £1,200, shares £10 par.

IA COPPER CO. **COLORADO.**
ne office: Salida, Chaffee Co., Colo. Capitalization is 90,000 shares, of 75,000 shares are under option, and in escrow, at $2 per share, until 909. Lands are leased for 10 years to Salida Gold & Copper Mining tion presumably is to Shawmut Consolidated Copper Co.

TÉ ANONYME DES MINES DE CUIVRE DU SEIBAL. **BRAZIL.**
ice: 40 Rue de Chabrol, Paris, France. Mine office: Camaquam, Caca-Rio Grande do Sul, Brazil. Al. Fluert, president. Organized May 5, nder laws of France, with capitalization 415,000 francs, shares 100 par. Property, near the Camaquam mine, carries argentiferous and ous copper ore, and associated minerals.

I COPPER SYNDICATE, LTD. **TRANSVAAL.**
tter returned unclaimed from former office, Johannesburg, Transvaal. ed August, 1907, under laws of Transvaal, with capitalization £3,000. n of lands, if any, unknown. Apparently moribund.

SMELTING & LEAD CO. **CALIFORNIA.**
ice: Merchants Exchange Bldg., San Francisco, Cal. Works office: Contra Costa Co., Cal. A. J. Ralston, president; Eugene E. Braden, sident and general manager; H. B. Underhill, Jr., secretary; Alfred Ropp, superintendent. Organized 1875, under laws of California, and rolled, through stock ownership, secured 1905, by American Smelters es Co., a subsidiary corporation of the American Smelting & Refining e works represent an investment of about $4,000,000.

perty consists of an extensive smelting and refining plant, equipped am and electric power, at Vallejo Junction, near Carquinez Strait, the the smelter being somewhat circumscribed. Ore is received by rail ter, the works drawing supplies from all of the Pacific states, with a portion of the ore supply coming from Nevada and California.

works include a 400-ton smelter, with both lead and copper stacks, n lead refinery, a refinery for parting gold and silver, and a plant for ufacture of bluestone. Fuel is coal, coke and petroleum.

injunction was secured, 1907, by the authorities of Solano county, of damage to agricultural interests from smelter smoke, which the y endeavored to do away with, by installing a fume precipitation n the Cottrell system, said to have been used successfully elsewhere, as planned to eliminate dust and carbon and sulphur compounds, in- sulphurous acid and sulphur anhydride, this process including the in- n of a sulphuric acid plant. Notwithstanding the attempts of the to do away with fumes, the efforts were not entirely successful, and ks were closed, August, 1908, by a permanent injunction, and appar- e out of business permanently, to the great detriment of the mining s of California and Nevada.

K MOTHER-LODE COPPER MINES, LTD. **BRITISH COLUMBIA.**
d. Formerly had an office at 5 Laurence Pountney Hill, London, E. C.,

LE COPPER MINING CO. **GEORGIA.**
d. Property sold, 1904, by the sheriff, to Carl Henrich, for $33,000. lly succeeded by Lincoln Gold & Copper Mining Co. Formerly at le, Wilkes Co., Ga. Fully described Vol. III.

LE MINE. **GEORGIA.**
ed by Lincoln Gold & Copper Mining Co.

SEMINOLE MINING CO. UT

Office: 208-69 East Third South St., Salt Lake City, Utah. Mine office: Ca Juab Co., Utah. Clyde H. Wilson, president; W. F. Wilson, vice-presid Frank L. Wilson, secretary and treasurer; preceding officers, W. R. Wilson N. R. Wilson, directors. Organized, circa 1907, under laws of Utah, with talization $125,000, shares 25 cents par. Lands, in the Clifton district, the Lucy L. Mining & Milling Co., are said to show ores carrying copper, si gold, lead, tin and nickel.

SENATOR MINES CO. COLORA

Office: 1209 Association Bldg., Chicago, Ills. Mine office: Black H Gilpin Co., Colo. Chas. Kingsley Ray, president; John G. McConnell, president; Dr. M. H. Brown, secretary; W. J. Blake, superintendent; pr ing officers and H. A. Hicks, directors. Organized 1906, under laws of rado, with capitalization $1,500,000, shares $1 par. Lands, 2 claims, havi 550′ shaft with about 2,000′ of workings, showing veins of 5′ to 7′ width, a 2′ paystreak, carrying mainly ore of concentrating grade, with valu silver, copper and gold, mainly the latter. Has a hoist good for 1,500′, plans an electric power installation.

SENECA MINING CO. MICHI

Office: 301-199 Washington St., Boston, Mass. Operating office: H ton, Mich. Mine office: Allouez, Keweenaw Co., Mich. Albert S. Big president; Wm. J. Ladd, secretary and treasurer; Hon. Norman W. general manager; S. Russell Smith, superintendent. Organized circa under laws of Michigan, with capitalization $500,000, shares $25 par.

Lands originally were 3,240 acres, reduced, 1880, by setting off Ahmeek, to 1,880 acres. The tract, which is just north of the Mohawk Ahmeek mines, is very irregular and somewhat awkward in outline, he covered with drift, and a considerable portion is swampy. Lands carr Calumet, Kearsarge and Allouez conglomerates, and the Osceola and Kear amygdaloidal beds, dependence being placed mainly on the latter, of the tract carries about 1¾ miles of the strike, the bed outcropping o northeastern corner of the lands. Property is served by the Keweenaw C Railway.

A little exploratory work was done, 1865, on the Kearsarge conglom and again, 1880, when 2 shafts were sunk thereon, to a depth of circ each, but work was abandoned, and this part of the tract was set off, Ahmeek.

Diamond drilling, begun 1907, will require several seasons to give a plete cross-section of the property, operations having been started on the western part of the tract. The diamond drill borings are said to have good cores, and some trenching was done, a test-pit being bottomed, D ber, 1907, in the ledge.

No. 1 shaft, started July, 1908, is located about 3,000′ north of shaft of the Gratiot mine, and is of 3 compartment size, sunk 60′ in the wall of the Kearsarge amygdaloid, which, where exposed, carries e This shaft, circa 175′ deep at the end of 1908, is concreted through overburden, with an anchorage of 44′ in the rock, giving 58′ of co from the collar, and is perfectly water-tight against surface seepage. shaft-rockhouse has an 18x24″ crusher.

There is room on the tract for a second shaft, on the outcrop Kearsarge lode, but this amygdaloidal bed must be reached, on the b of the property, by vertical shafts, unless adjoining lands carrying th crop are secured.

Equipment includes a small power plant building having a 15-dri

r, a Lake Shore duplex hoist, good for 1,500′ depth, and a locomotive ıiler. Buildings include a boarding-house and bunk-house. Property l very promising.

A SENZA. **ANGOLA.**

office: Senza do Itombe, Angola. Lands, 2 kilometers from Senza e and 192 kilometers from Loanda, show a 5-meter bed of calcareous , dipping at about 20°, said to carry about 5% copper. Idle at last

D MINERA LA SERENA. **CHILE.**

office: Higuera, La Serena, Coquimbo, Chile. Presumably idle.

show an ore body of 180′ width, averaging up to 6% copper. Considerable uble has been had from caving ground, and it was planned, 1906, giving a al to the caving system of mining. The property is timbered with 12x12" uare sets. In addition to underground workings, there are 4 open pits, giv- cheap extraction, some of the open-cuts showing iron ore, carrying an erage of 2.5% copper, available for fluxing silicious sulphides produced from derground workings. Extraction is by 2 double-track working tunnels, of ich one is7x8′ in size, connecting with a 1,400′ double-track incline tram, ding to the Coronado Railroad, with 6 ore-bins at either end, the tramway ving an incline of 36°. The incline has 10-ton cars, operated in counter- lance, with a retarding engine, the steel cable passing around a 13′ double um at the top, which runs a small air-compressor that generates power, while rving as an auxiliary brake.

Petroleum has been subsituted for coal, wherever possible, about the mine d works. The company maintains general stores at Morenci and Clifton, d owns a number of dwellings for employes.

Freight charges are about 35 cents per ton on ore from the mine to the ll, and the company plans building a 10-mile standand gauge railroad, to known as the Shannon & Arizona, to handle its own ore. The surveys have en made for this new high-line railway, which it is planned to complete at cost of $400,000, with an estimated saving of about $80,000 yearly, on ore ansportation, the company planning to issue bonds and keep the stock of e railway. The new line, in addition to the saving in freight charges, will ve immunity from the annual floods, which now cause yearly suspension shipments, for indefinite periods, with consequent heavy damage. The com- ny also is said to have secured a controlling interest, 1908, in the Clifton orthern Railway.

The concentrator, on the San Francisco river, 8 miles from the mine, is of el, in 2 connected sections, the 64x95′ upper section having a 9x15" Blake usher at the ore-bin, Huntington mills and a 220′ Robins belt conveyer, ommels and jigs. The 57x144′ lower section has 33 Frue vanners, 1 Wilfley d 2 Standard tables. The 32x50′ steel power-house has two 250-h. p. Stirling ater-tube boilers, and a 300-h. p. Nordberg tandem compound engine. Water taken from wells near the river by a 600-gallon electric triplex pump. The oncentrator treats about 400 tons of ore daily, this averaging 3.5 to 5.5% opper, and puts about 5 into 1, effecting a saving of about 75% of contained alues. In 1906 tailings carried up to 1.2% copper, due to highly oxidized ondition of ores, but tailings are being stored and may be leached later. ormerly there was much trouble from acid waters eating the iron screens, hile brass or copper screens in the jigs were worn out too rapidly, by abra- ion. This trouble was overcome by a simple but ingenious application of the rinciple of electrolysis, a low-voltage electric current being applied to the igs, by which the screen became a cathode in the circuit. This attracted ydrogen from the water, which in turn attacked the metallic salts, and the opper freed was deposited on that portion of the screens formerly eaten away.

The smelter, at Clifton, 7 miles from the mines, designed originally for 5 urnaces, had two 350-ton water-jacket blast-furnaces, each 42x170" at the uyeres. These 2 furnaces were thrown into one large furnace by a new sec- ion between, built on the plan first used at the Washoe works, making a ingle blast furnace of 1,000 tons daily capacity, which is the largest in rizona. Above the charging floor are 23 ore-bins, each 20x20x16′, with hutes. Fumes from the blast-furnace pass through a 10′ dust-flue to a 0x20x100′ dust-chamber with hopper bottom, discharging dust periodically nto cars on a railroad track in a tunnel beneath, fumes passing from the

dust-chamber, through a 170′ flue, to a 150′ steel smokestack. Slag losses are said to be only 0.515%. Slags are handled by an electric locomotive. The converter plant, added 1906, has 2 stands, making blister copper. The briquetting plant, for flue dust and fines, has a daily capacity of 60 tons, and there is a small sampling mill, in connection with the smelter.

A 60x80′ powerhouse, of steel on stone foundations, has a 300-h. p. tandem compound condensing engine, direct-connected to blowers, and converter blast is supplied by a 250-h. p. Nordberg air-compressor.

Production has been as follows: 11,899,920 lbs. fine copper in 190 11,027,453 lbs. in 1905; 11,892,960 lbs. in 1906; 10,874,619 lbs. fine copper 35,491 oz. silver and 1,250 oz. gold in 1907. For fiscal year ending Aug. 3 1907, production was 13,418,126 lbs. fine copper, 94,745 oz. silver and 1,2 oz. gold, from 211,857 tons of ore smelted, giving an average extraction of lbs. fine copper per ton, in addition to which circa 2,600,000 lbs. fine copp were produced from 15,338 tons of custom ore smelted. For fiscal year end Aug. 31, 1908, production was 15,207,768 lbs, fine copper, from 281,449 tons ore smelted, giving an average extraction of 53.4 lbs. fine copper per ton, addition to 1,458,000 lbs. fine copper produced from custom ores smelted. P duction, October, 1908, was 1,636,000 lbs. fine copper. Costs, as figured company, were 13.46 cents per pound for fiscal year 1906, 13 cents per pou for fiscal year 1907, and only 11.09 cents per pound for fiscal year 1908.

For fiscal year ending Aug. 31, 1908, receipts were $2,249,294 from copp $63,508 from silver and $33,626 from gold, with operating expenses $2,574,191, leaving a net profit of $88,841, compared with net profits $695,916 for fiscal year 1907 and $333,324 for fiscal year 1906. The comp ended the fiscal year 1907 with quick assets of $424,744, and current liabili of $197,407, giving excess of quick assets of $227,337. The property is valua and well managed, and made a better record, during the period of depress than the average of copper producers.

SHASTA COPPER CO. CALIFORN

Office and mine: 502 California St., Redding, Cal. J. W. Girdner, pr dent; Simeon D. Furber, secretary; Sherman P. White, treasurer. Organi Apr. 20, 1907, under laws of Arizona, with capitalization $1,000,000, shares par. Lands, 2 groups, including the Pit River group of 25 claims, circ mile south of Heroult, showing a good gossan, and the Arizona Consolida group, 25 claims, 4 miles from Redding, formerly worked for placer gold, sh ing a mineralized zone of circa 600′ width, carrying auriferous and argenti ous copper ores of low average tenor.

SHASTA COPPER MINING CO. CALIFORN

Mine office: Kennett, Shasta Co., Cal. Organized 1907, under laws Colorado, with capitalization $2,500,000, by W. R. Girdner, M. J. Jordan L. E. Dabold. Lands, near Kennett, have a 600′ tunnel, showing considera bodies of low to medium grade copper ore.

SHASTA MAY BLOSSOM COPPER CO., CONSOLIDATED. CALIFORN

Office: 6-410 Kearny St., San Francisco, Cal. Mine office: Winth Shasta Co., Cal. Morton Lindley, president; Lucius A. Booth, vice-presid S. Peter, secretary and treasurer; Sumner S. Smith, superintendent. Or ized 1903, under laws of Arizona, with capitalization $10,000,000, shares par, as a reconstruction of Shasta May Blossom Mining & Smelting Co.

nds, 18 claims, area 300 acres, 800′ from holdings of the Bully Hill, in tsburg or Copper City district, circa 37 miles northeast of Redding, miles from Terry, the nearest railroad point. Property shows promterops, the main outerop being said to be traceable 500′, along a slate olite contact, carrying ore said to give assays of 6% copper and circa per ton combined gold and silver values. Property shows 5 or more deposits, having porphyritic footwalls and slate hangings. The middle nging 5′ to 40′ in width, and said to be traceable 9,000′, carries chalbornite and chalcopyrite, and is opened by tunnels of 200′, 300′ and th circa 1,500′ of workings, showing a considerable body of sulphide fair average tenor. The west vein is said to be 40′ wide.
ipment includes an air-compressor and there is a 20x90′ machine-shop ther mine buildings.

A MAY BLOSSOM MINING & SMELTING CO. CALIFORNIA.
d. Reorganized, 1903, as Shasta May Blossom Copper Co., Consoli- Formerly at Winthrop, Shasta Co., Cal.

UCK-ARIZONA COPPER CO. ARIZONA.
ce: Duluth, Minn. Mine office: Bisbee, Cochise Co., Ariz. Employs men. Thos. Bardon, president; A. Guthrie, vice-president; Archibald holm, secretary and treasurer; Lemuel C. Shattuck, managing director; g officers and Martin Pattison, directors; Jos. Walker, superintendent; Houle, consulting engineer. Organized March, 1904, under laws of ta, with capitalization $3,500,000, shares $10 par. Is closely connected, rship and management, with Denn-Arizona Mining Co. Annual meetd Saturday in February.
ds, 6 claims, patented, area 120 acres, bought for $1,022,500, lying in theastern portion of the Bisbee camp, about one-half mile from the workings of the Copper Queen, and to the north of the Calumet &

property shows Carboniferous limestone, with intrusive porphyry d a big fault, covered with a silicious iron capping of 30′ to 50′ width. o the rugged typography of the lands tunnelling is impracticable, ing properties holding all tunnel sites, hence development is by shaft. perty has large bodies of oxidized and sulphide ores, apparently averto 6% copper tenor, with much ore of better grade, ores carrying up silver and $3 gold per ton.
elopment is by a 935′ shaft, enlarged, 1906, to 3 compartments, ′ in size, connected underground with the Cuprite shaft of the Copper The shaft was damaged somewhat, late 1907, by fire, but was promptly ed. The mine has about 18,000′ of workings, with much ore available action, principal ore bodies being developed on the 700′ and 800′ levels. ber, 1908, a large and promising ore body, of medium copper tenor, ountered on the 500′ level, about 400′ from the shaft. The 600′ level 60′ body of oxidized ore, said to average about 9% copper tenor. The l has large ore bodies developed, and the 800′ level has an ore body, stope, circa 100x300′ in size, this level showing much high grade ore, siderable native copper. The 900′ level shows a considerable body of ore, of about 4% copper tenor. Mining work was begun August, l ore shipments were begun September, 1906.
pment includes a 600-h. p. steam plant, with 5 boilers, 9-drill Ingerant, 6-drill straight-line Sullivan and 25-drill Sullivan cross-compound ressors. There are 6x10″ and 10x30″ auxiliary hoists, and an Allis- duplex double-drum hoist, working under 125 lbs. steam pressure, of handling, continuously, a 15,000-lb. unbalanced load, at a vertical

hoisting speed of 2,000′ per minute, having two 7′ drums, each carryin of 1⅛″ round steel cable. Fuel is petroleum, with a normal yearly c tion of 2,500 barrels.

There are 10 mine buildings, including a 16x24′ carpenter-shop, smithy, boiler-house, engine-house and warehouse, and a changing-hou accommodations for 200 men.

Property is served by the El Paso & Southwestern Railway, and 500-ton aërial tram of 2,300′ length, with an average grade of 18′ ported by 14 towers, of 12′ to 40′ height, built of 12″ timber, set on c foundations, the tram leading from the shaft to a 1,000-ton shipping the El Paso & Southwestern railway.

The smelter site, at Douglas, 26 miles from the mine, is just s the Calumet & Arizona smelter and west of the Copper Queen work water supply available from artesian wells. The company has mad for a 1,000-ton smelter with 2 blast-furnaces, to cost about $400,000, tain strong interests in the company, being desirous that smelting be d the Copper Queen, have held up the construction of the plant.

Production was begun Aug. 28, 1906, and ended Nov. 7, 1907, on of the refusal of the Copper Queen to take custom ore, but daily shi of 75 to 100 tons, to the Copper Queen smelter, were resumed Dec. 1 For a time during 1907 the mine shipped about 400 tons of ore daily half oxidized ores and half sulphides, former going to the Douglass and latter to Globe. Production, 1907, was 5,091,542 lbs. fine coppe considerable gold and silver values. The mine, as developed, is cap making a monthly production of about 1,000,000 lbs. fine copper, a valuable property, of very great promise.

SHAW-GIBSON MINING CO. **NEW M**

Dead. Formerly at Lordsburg, Grant Co., N. M.

SHAWMUT CONSOLIDATED COPPER CO. **COLORADO &**

Office: 62-16 State St., Boston, Mass. Mine offices: Bingham Salt Lake Co., Utah, and Salida, Chaffee Co., Colo. Lester C. Wead, pr Wm. Rotch, vice-president; Robt. A. Jackson, secretary; Wm. Tudor, urer; Herbert Williams, managing director; preceding officers, Alex. C B. W. Currier, Col. E. J. Mayo, Hon. Samuel S. Powers and John R. directors; E. Philbrick, superintendent Colorado mine; Elmer Durfee, s tendent Utah mines.

Organized 1905, under laws of Maine, with capitalization $2,500,000, $5 par. Has an old outstanding bond issue of $19,500, and was said, Fe 1908, to be negotiating with a French syndicate for the sale of new bon of $500,000, at 80, but apparently the latter did not furnish the e funds. The new bond issue was said to be planned for the purchase o tional properties. Company controls the Colorado property through an expiring May, 1909, at $2 per share, on 65,000 shares of the 90,000 capitalization of the Sedalia Copper Co., stock being in escrow. The Sh pays 15% royalty on ore extracted from the Salida property, such applying pro rata on the purchase price of the stock in escrow, if s taken. American Loan & Trust Co., Boston, registrar; State Street Tr Boston, transfer agent.

Lands, in Utah, 13 fractional claims, patented, area 152 acres, on th side of Carr Fork, near the center of the Bingham or West Mountain d showing limestone, porphyry and quartzite, carrying contact deposits b limestone and quartzite, of which 2, under development, are of 5′ es average width, carrying sulphide ores, mainly auriferous and argen chalcopyrite and galena, having an estimated average tenor of 5%

6% lead, 2 to 16 oz. silver and $2.50 to $5 gold per ton, which figures are considered excessive. Development is by a 230′ shaft and 8 tunnels, longest 25′, with upwards of 7,000′ of workings. On the Cuba claim a 5′ ore body has been developed on 2 levels. The company hopes to secure cupriferous porphyry on the Mirror claim.

Equipment of the Utah property includes a 200-h. p. steam plant and a 4-drill Rand air-compressor, with several mine buildings.

The concentrator, at Bingham, of 100 tons rated daily capacity, is of wood, having a 100-ton Gates centrifugal crusher, 2 rolls, 5 Hartz jigs, a Chilean mill and Wilfley tables. The mill is somewhat antiquated in design, and requires remodeling for use.

Lands, in Colorado, 1 claim, area 20 acres, known as the Sedalia mine, and a millsite, circa 6 miles from Salida. The property shows a 35′ to 40′ vein, carrying, near surface, oxide, carbonate and silicate ores, low in copper tenor, and mainly below smelting grade. At depth the ore is sulphide, said to average 3 to 4% copper and circa $1.40 per ton in combined gold and silver values, but carrying an average of 4.5% zinc, which renders it difficult to treat. The mine has an extreme depth of circa 700′, with about 2½ miles of workings.

The Colorado mill is connected with the Sedalia mine by a 1½-mile tramway. The mill is 76x119′ in size, with 4 stories, including a concentrator and leaching plant. The lixiviation plant, which is idle, is said to show a loss of 23% in extraction, as against 15% loss of assay values in smelting.

The Bingham property is idle, work being concentrated at Salida. Production of the Sedalia mine was 5,408 tons of ore, averaging 5.21% copper, yielding 563,513 lbs. fine copper, in 1906, and was 4,209 tons of ore, averaging 6.85% copper, equivalent to 576,696 lbs. fine copper, in 1907.

SHAWMUT GOLD, SILVER & COPPER MINING & MILLING CO. **COLORADO.**

Office: 430 Symes Bldg., Denver, Colo. Mine office: Bonanza, Saguache Co., Colo. G. C. Moore, president; Chas. E. Eckles, vice-president; H. Astor Bush, secretary; E. E. Humes, treasurer. Organized May 8, 1905, under laws of Colorado, with capitalization $1,000,000, shares $1 par. Lands, 22 claims, area 320 acres, on Kerber Creek, said to have about 9,000′ of workings. Company in debt and planned liquidation, at last accounts.

SHAWMUT MINING CO. **UTAH.**

Dead. Succeeded, 1905, by Shawmut Consolidated Copper Co. Formerly at Bingham Canyon, Salt Lake Co., Utah.

SHAWNEE COPPER CO. **COLORADO.**

Office: 424 Central Bldg., Los Angeles, Cal. Mine office: McCoy, Eagle Co., Colo. O. D. Mansfield, president; Chas. J. Price, honorary vice-president; W. R. Price, vice-president and general manager; J. C. McClintock, treasurer; C. W. Dolph, secretary; J. T. Willard, assistant secretary. Organized under laws of Colorado, with capitalization $500,000, shares $1 par. Lands, 7 claims, area circa 71 acres, just north of the Price Copper Mines, in the Red Gorge district, reported to show a blanket vein of 5′ to 7′ width, with quartzite gangue, giving assays of 20% copper, 6 oz. silver and 0.16% gold, which obviously is an error, and probably should be 0.16 oz. gold per ton. Development is by several pits and a 2-compartment 101′ shaft, not yet in ore.

SHAWNEE COPPER MINING CO. **WYOMING.**

Dead. Was merged, 1908, in Shawnee-Wyoming Mining Co. Formerly at Encampment, Carbon Co., Wyo. Fully described Vol. VI.

SHAWNEE-WYOMING COPPER MINING CO. **WYOMING.**

Office: 122½ East Main St., Shawnee, Okla. Letter returned unclaimed

from former mine office, Encampment, Carbon Co., Wyo. John H. Aydelotte, president; Hon. G. F. Hinton, first vice-president; A. M. Coffin, secretary and general manager. Organized 1908, as a merger of the Shawnee Copper Mining Co. and Kyhaco Mining Co.

Lands, 10 claims, area 200 acres, 6 miles from the New Rambler mine, in the French Creek district of the Medicine Bow Mountains, showing sundry fissure veins in granite and contact deposits between schist and quartzite, of which one vein of bog ore, under development, has a 2-compartment 112' shaft showing copper stains.

Company also holds the property formerly owned by Ak-Sar-Ben Copper Co., which had a strong gossan capping of hematite and limestone, opened by an 80' shaft. Company is said to have found some ore giving good assays in copper, silver and gold.

Equipment includes a 45-h. p. steam plant and 4 mine buildings. Idle, but said to plan early resumption.

SHEEP MOUNTAIN MINING & TUNNEL CO. COLORADO.

Dead. Formerly at Crystal, Gunnison Co., Colo.

SHELDEN & COLUMBIAN MINE. MICHIGAN.

Office and mine: care of J. H. Rice, Houghton, Houghton Co., Mich. Lands lie next north of the Isle Royale Copper Co. Idle since 1870. Fully described Vols. I and II.

SHINONOME SMELTER. JAPAN.

Owned by Furukawa Mining Co.

SHOSHONE COPPER CO. WASHINGTON.

Office and mine: Latah, Spokane Co., Wash. J. O. Adams, secretary; preceding officer, J. B. Conard, D. H. Conard, J. H. Stockdale, J. W. Olney, A. B. Shelton and Frank Hosier, directors. Organized circa 1908, under laws of Washington, with capitalization $1,500,000, shares $1 par.

SHOSHONE MINE. NEW MEXICO.

Office and mine: care of Alex Gusdorf, owner, Taos, Taos Co., N. M. Lands, 4 claims, developed by a 175' shaft, with drifts on the 100' and 150' levels, showing an 8' vein with a 2' paystreak, carrying 5% copper, 10 to 12 oz. silver and $60 to $80 gold per ton, balance of vein being claimed to average 5 to 8% copper, 4 to 5 oz. silver and $10 to $12 gold per ton. Property considered promising. Idle.

SHOSHONE MOUNTAIN MINING CO. WYOMING.

Mine office: Meeteetse, Big Horn Co., Wyo. P. W. Gates, manager. Lands, on Sparr Mountain, show a wide vein, carrying values mainly in silver-lead, opened by a 560' tunnel, on the Smuggler claim. Idle.

SHOTWELL TRI-MOUNTAIN COPPER CO. ARIZONA.

Dead. Was absorbed, Feb. 19, 1907, by Cornelia Copper Co. Formerly at Gila Bend, Pima Co., Ariz.

SHUTTLETON MINE. AUSTRALIA.

Dead. Merged, December, 1906, in Crowl Creek-Shuttleton Copper Mining Co.

SIEGEL CONSOLIDATED MINING CO. NEVADA.

Mine office: Siegel, White Pine Co., Nev. H. L. Siegel, manager. Lands, in the Silver Cañon district, show oxidized ores, carrying values mainly in silver, and sulphide ores of copper and lead, carrying values mainly in copper. The best grade of silver-lead ore ranges 80 to 200 oz. in silver tenor per ton. Development is by 2 tunnels, showing sulphide ores in No. 2 tunnel, at 250' vertical depth. Ore is hauled by wagon to Curry, 60 miles, but, with the building of a few miles of mountain road, could be brought within 50 miles of

arm Springs station, on the Nevada Northern railway. Property has been a roducer, on a small scale, since 1901.

IERRA-ALTO COPPER MINING CO. **ARIZONA.**

Dead. Formerly at Phœnix, Maricopa Co., Ariz. Described Vol. II.

IERRA CO., LTD. **SPAIN.**

Office: 32 Nicholas Lane, London, E. C., Eng. Mine office: 10 Plaza el General Santacildes, Burgos, Burgos, Spain. T. Evens, secretary. Organized Apr. 2, 1898, under laws of Great Britain, with capitalization £400,000, hares £10 par; debentures, £478,100, at 5%. Lands, sundry mines of iron, opper, silver and coal, in the provinces of Burgos and Logroño, Spain. Idle nd apparently moribund.

IERRA DE COBRE MINE. **MEXICO.**

Owned by Indiana-Sonora Copper & Mining Co.

IERRA DE ORO GOLD MINING & MILLING CO. **ARIZONA.**

Office and mine: Clifton, Graham Co., Ariz. F. T. Eldredge, president; V. H. Waite, secretary and treasurer; L. P. Potter, manager; Benj. M. Crawford, superintendent. Lands, 15 claims, near the Clifton Consolidated, also a -acre millsite, on the San Francisco river. Development is by tunnels, showng 4 parallel blind veins. A 550′ crosscut tunnel shows a 10′ vein, giving ssay values of 14% copper and up to $10 gold per ton, and a 4′ vein giving ssays of 14% copper and $48 gold per ton. Idle.

IERRA GOLD & COPPER CO. **NEVADA.**

Letter returned unclaimed from former office and mine, Reno, Washoe Co., Nev. C. A. Poage, president; DeWitt C. Turner, vice-president; W. B. Dunlap, secretary; W. V. Irwin, treasurer. Organized Apr. 7, 1906, under laws of Nevada, with capitalization $750,000, shares $1 par. Lands, 8 claims, area 140 acres, in the Peavine district, circa 20 miles north of Reno, developed by a crosscut tunnel and several shallow shafts. Presumably idle.

IERRA GOLD & COPPER MINING CO. **CALIFORNIA.**

Letter returned unclaimed from former mine office, Loyalton, Sierra Co., Cal. Is said to have high grade auriferous and argentiferous copper ore. Idle.

SIERRA MADRE EXPLORATION, LTD. **MEXICO.**

Office: 708 Salisbury House, London, E. C., Eng. J. Keatinge Pollock, chairman; J. W. Gallienne, secretary. Organized Nov. 21, 1900, under laws of Great Britain, with capitalization £60,000, shares 5s. par; issued, £40,000. Debentures, £1,000 authorized, £900 outstanding. Had options on gold and silver properties in the state of Chihuanua, Mexico, which were forfeited. Present landed holdings said to be 200 pertenencias, area 494 acres, in the state of Sonora, supposedly carrying auriferous and argentiferous copper ores. Idle.

SIERRA MORENA COPPER MINES, LTD. **SPAIN.**

Office: 2 Basinghall Ave., London, E. C., Eng. Letter returned unclaimed from former mine office, Peñaflor, Sevilla, Spain. R. Stanton, mine manager; J. E. G. Hadath, secretary. Organized Apr. 17, 1900, with capitalization 80,000, shares £1 par; issued, £60,007. Lands, 215 acres, including La Preciosa nd adjoining mines. Idle.

OCIÉTÉ ANONYME MINIÈRE ET MÉTALLURGIQUE LA "SIERRA NEVADA." **SPAIN.**

Office: 102 Blvd. du Nord, Brussels, Belgium. Mine office: Guejar Sierra, ranada, Spain. Chas. de France, president; preceding officer, Emile Toussaint, ictor-Grégoire Bock and E. LeFevre, directors. Organized March 6, 1895, nder laws of Belgium, with capitalization 1,500,000 francs, shares 500 francs ar, in 100,000 francs 6% preferred and 1,400,000 francs common shares. Prebably idle.

SIERRA NEVADA COPPER CO. NEVADA.

Mine office: Luning, Esmeralda Co., Nev. Development is by a shallow shaft, said to show ore averaging 15% copper, with small silver and gold values. A little ore was shipped, 1907. Presumably idle.

SIERRA NEVADA COPPER MINING CO. IDAHO.

Mine office: Wardner, Shoshone Co., Idaho.

SIERRA DE OAXACA MINING & MILLING CO. MEXICO.

Office: Nashville, Tenn. Mine office: Ixtlán de Juárez, Oaxaca, Mex. Geo. Clark, superintendent. Mine, known as Santa Catarina, has auriferous and argentiferous copper ores, with steam power, employing circa 50 men at last accounts.

SIERRA PACIFIC SMELTING CO. MONTANA.

Dead. Formerly at Butte, Silver Bow Co., Mont.

SIERRA-SONORA SMELTING CO. MONTANA.

Dead. Title changed, 1903, to Sierra-Pacific Smelting Co., also dead. Formerly at Butte, Silver Bow Co., Mont.

SIERRITA MINING & MILLING CO. ARIZONA.

Office and mine: care of J. P. Owen, general manager, Tucson, Ariz. Gerrit B. Linderman, president. Long idle and apparently moribund.

COMPAÑIA MINERA SIETE AMIGOS. MEXICO.

Office: 4 Great Winchester St., London, E. C., Eng. Mine office: Topia, Tamazula, Durango, Mex. Thos. J. Lawrence, president and general manager. Property includes the Comstock, Galena, Guadalupe and other mines, carrying auriferous and argentiferous copper and lead ores. Has steam power and employed circa 50 men, at last accounts.

SIGNAL COPPER CO. ARIZONA.

Dead. Lands sold, circa 1906, to Western Mining & Development Co. Formerly at Planet, Yuma Co., Ariz. Described Vol. VI.

SIGNET GOLD & COPPER MINING CO. UTAH.

Office: Salt Lake City, Utah. Letter returned unclaimed from former mine office, American Fork, Utah Co., Utah. W. H. McConahy, president; J. H. Rothwell, vice-president; W. S. Zehring, secretary; W. H. Young, treasurer; preceding officers and H. A. Hoppaugh, directors. Organized, November, 1903, under laws of Utah, with capitalization $75,000, shares 25 cents par. Lands, 4 claims, in process of patenting, known as the Signet group, in American Fork Cañon, slightly developed. Idle several years.

SILERS MEADOWS COPPER CO. NORTH CAROLINA.

Mine office: Bushnell, Swain Co., N. C. Lands, circa 1,000 acres, in the Smoky Mountains, on the Tennessee copper belt. Has 11 shafts and tunnels, all showing ore, said to give average assays of 5.5% copper and $1.80 per ton in combined silver and gold values. Idle several years.

SILVER BAR COPPER MINING CO. NEW MEXICO.

Dead. Property sold, circa 1902, to Mogollon Gold & Copper Co. Formerly at Cooney, Socorro Co., N. M. Described Vol. II.

SILVER BELL COPPER CO. ARIZONA.

Dead. Title changed, 1903, to Imperial Copper Co. Formerly at Silver Bell, Pima Co., Ariz. Described Vol. III.

SILVER BELL SMELTER. ARIZONA.

Owned by Southern Arizona Smelting Co.

SILVER BOW MINE. MONTANA.

Owned by Butte & Boston Consolidated Mining Co.

SILVER BOW MINING CO. MONTANA.

Office and mine: Butte, Silver Bow Co., Mont. G. E. DeSnell, E. H. Renish, D. S. Mack, David J. Charles and Thos. Stephens, directors. Organ-

ized Sept. 28, 1905, under laws of Montana, with capitalization $20,000, shares $1 par. Property apparently was the Metz claim, relocated January 1, 1904, as the Compromise claim, by forbears of the company, but apparently title was lost to Jos. J. Culbert.

SILVER CITY COPPER CO. **ARIZONA.**

Office: Silver City, N. M. Mine office: Santa Rita, Grant Co., N. M. C. C. Shoemaker, president; E. A. Layne, vice-president; A. F. Kerr, secretary and treasurer; preceding officers, O. C. Hinman, Max Schutz, W. B. Walton, Chas. A. Farnsworth and Saml. Allen, directors; Harry Kline, manager. Organized February, 1907, with capitalization $2,500,000, shares $10 par. Lands, circa 290 acres, near the Santa Rita mine, having several shafts, showing lead and copper ores. Is said to have a small concentrator.

SILVER CLIFF GOLD & COPPER MINING CO., LTD. **IDAHO.**

Mine office: Mullan, Shoshone Co., Idaho. Jas. D. Young, president and general manager; Ed. P. Young, secretary and treasurer. Lands, 18 claims, 7 miles from Mullan, developed by 3 tunnels, longest 1,315', showing chalcocite, bornite and chalcopyrite, giving assays up to 43% copper, with some lead and fair gold values. Has a Pelton wheel, operating under a head of 240', and an 8-drill air-compressor.

SILVER CLIFF MINING CO. **UTAH.**

Mine office: Brighton, Salt Lake Co., Utah. Chas. A. Selby, president; Herbert S. Wright, vice-president; John W. Carlson, secretary and treasurer. Organized circa January, 1908, under laws of Utah, with capitalization $130,000, shares $1 par.

SILVER CREEK GOLD & COPPER MINING CO. **WASHINGTON.**

Office: care of Hugh Clemens, president, Manchester, Iowa. Letter returned unclaimed from former mine office, Index, Snohomish Co., Wash. Organized 1896, with capitalization $1,000,000, shares $1 par. Lands, 2 claims, in the Silver Creek district, having 2 short tunnels. Idle and apparently moribund.

SILVER CREEK GOLD MINING CO. **WASHINGTON.**

Office: Everett, Wash. Letter returned unclaimed from former office, Index, Snohomish Co., Wash. A. J. Westland, president; W. B. E. Edwards, secretary. Capitalization $1,000,000, shares $1 par. Lands, 6 claims, circa 10 miles from Index, opened by about 500' of tunnels, said to show a vein of fair size, carrying small copper values and fair gold and silver values. Idle some years and presumably moribund.

SILVER CREEK MINING & MILLING CO. **WASHINGTON.**

Office: 804 East Washington St., Greensburg, Ind. Mine office: Keller, Ferry Co., Wash. R. L. Boyle, president and general manager; Harry A. Denton, vice-president; Ira J. Hollensbe, secretary and treasurer; John S. Badger, superintendent; preceding officers and R. Ray Hamilton, directors. Organized December, 1900, under laws of Washington, with capitalization $75,000. Company is closely connected with the Keller & Indiana Smelting Co. Lands, 4 claims, patented, area 80 acres, including the Gold Cord mine, in the San Poil district, 5 miles northeast of Keller, well timbered and watered. Silver Creek, near by, is capable of producing considerable water power. Lands show a fissure vein, in diorite, of 3' to 8' width, with a 30" paystreak carrying cuprite, azurite, malachite, bornite and chalcopyrite, with quartz gangue, opened by a 304' shaft and by tunnels of 130' and 620', with tunnels connected by a 195' winze. Plans installing electric power, and beginning production when Keller & Indiana smelter is blown in.

SILVER FISSURE MINING CO. **MONTANA.**

Office: 377 Broadway, New York, N. Y. Mine office: Polaris, Beaver-

head Co., Mont. Henry H. Armstead, general manager; Jas. B. Ford, manager; J. F. C. Wells, smelter superintendent. Property is the Polaris carrying silver, gold and copper ores, latter produced in small quantities by-product. Has steam and electric power, with a 100-ton smelter, emp about 100 men.

SILVER FLAT MINING & MILLING CO. U

Office: care of Abel John Evans, Lehi, Utah. Mine office: American Utah Co., Utah. Capitalization $50,000, shares 10 cents par. Lands, 5 c in the Silver Lake district, carrying auriferous and argentiferous copp lead ores. Idle some years and apparently moribund.

SILVER HILL CONSOLIDATED COPPER CO. ARIZ

Office: Tucson, Ariz. Mine office: Silver Bell, Pinal Co., Ariz. Col. Herring, president; T. M. Smith, secretary; preceding officers and Jo Ross, directors. Capitalization, $3,000,000, shares $1 par. Lands, 6 pa claims, area 120 acres, in the Silver Bell Mountains, 3 miles from Silver opened by tunnel, with about 1,000′ of workings, having an extreme dep 200′, showing copper carbonates and sulphides, apparently occurring as co deposits between limestone and granite.

SILVER HILL MINING CO. NORTH CAROL

Mine office: Silver Hill, Davidson Co., N. C. J. M. Prim, superinten at last accounts. Has auriferous and argentiferous lead, copper and zinc phides. Has a mill with crusher, rolls and 5 stamps. Idle several years.

SILVER KING GOLD & COPPER MINING CO. ID

Mine office: Mackay, Custer Co., Idaho. Development is by tunnel, a shallow shaft. Presumably idle.

SILVER LEAF MINING CO. NEV

Mine office: Luning, Esmeralda Co., Nev. Property is said to show h argentiferous copper ores. Employed 12 men at last accounts.

SILVERMAN-ALASKA MINING CO. ALA

Office: 11 Broadway, New York, N. Y. Mine office: Ketchikan, A Supposedly organized under laws of New Jersey. Lands, on Prince of W Island, are said to show auriferous copper ores, of good grade, with con able development. Idle several years.

SILVER MOUNTAIN MINE & MILL CO. COLOR

Mine office: Empire, Clear Creek Co., Colo. F. G. Bishop, superinten Property has auriferous and argentiferous copper ores, with water powe a 25-ton concentrator.

SILVER MOUNTAIN MINING CO. COLOR

Dead. Succeeded by Silver Mountain Mine & Mill Co. Formerly a pire, Clear Creek Co., Colo.

SILVER MOUNTAIN MINING CO. ID

Mine office: Mullan, Shoshone Co., Idaho. Lands, 4 claims, patented of the Morning mill, opened by a 450′ tunnel showing high grade copper

SILVER PEAK MINING CO. WASHING

Office: care of Gale Smith, secretary, Spokane, Wash. Mine office: welah, Stevens Co., Wash. Conrad Wolfe, president; F. R. Clark, first president; Capt. Hugh James, second vice-president and general ma Lands, circa 200 acres, having a 90′ shaft, showing a 4′ vein carrying ox ores, mainly azurite, assaying 4.7 to 22.7% copper.

SILVER QUEEN MINING CO. ARI

Office: 446 Pearl St., New York, N. Y. Mine office: Superior, Pin Ariz. Wm. D. Fisk, general manager. Organized 1880, but inactive recent change in management. Apparently succeeded by Copper Quee ing Co.

VER SHIELD MINING CO. **UTAH.**

Office: Salt Lake City, Utah. Mine office: Bingham Canyon, Salt Lake , Utah. Hon. Harry S. Joseph, manager. Property shows a 4′ ore body, l to give selected ores assaying about 6% copper, 27 oz. silver and $2.40 d per ton, also an ore body said to average about 1% copper, 8% lead, 10 silver and $1 gold per ton, in addition to which there is a considerable ly of low grade concentrating ore.

Equipment includes a 5-drill air-compressor and a 15-ton mill, near the uth of the Silver Shield tunnel. A proposed consolidation with the United gham was not effected.

LVER SPUR COPPER MINE. **AUSTRALIA.**

Mine office: Stanthorpe, Queensland, Australia. Property, formerly known the Texas mine, reopened 1906, has a 5′ vein, developed by shaft to shallow pth, giving assays said to average 21% copper. Production, June, 1907, was tons, 18 cwts., 1 quarter, 4 lbs. of copper ore, ounces, unfortunately, being itted from the returns.

LVER SPUR MINING CO., N. L. **AUSTRALIA.**

Office and mine: Silver Spur, Stanthorpe Co., Queensland, Australia. ploys 200 men. Robt. Thos. Vyner, chairman; Edgar Hall, secretary, treas- r and general manager; Harry Wann, mine superintendent. Organized 1879, er laws of Queensland, with capitalization £24,000, shares £1 par, fully ed; 15s. paid in. Has paid dividends, to end of 1906, of £19,650. Annual ting, in March.

Lands, 49 acres, leasehold from the crown, and a 3-acre millsite, 51 miles n the State Railway. Lands show Gympie beds, with slate and Carbonif- s limestone, having 4 fissure veins in slate, carrying lenticular ore bodies, under development, ranging 4′ to 30′ in width, the main ore body being 6′ 0′ wide on the 300′ level. Ore is exclusively sulphide, and complex, ren- ng it difficult to mill, averaging about 1.25% copper, 12% lead, 15% zinc, z. silver and 2s. gold per long ton, values being mainly in silver. Develop- t is by shafts of 180′, 420′, 80′ and 80′, and deepest level is at 400′. Mine opened 1892, and has been worked continuously since.

Equipment includes a 350-h. p. steam plant, with a hoist and a 5-drill ight-line air-compressor. Fuel is coke and wood, latter costing 12s. per . The company has a sawmill and brickyard.

The company controls a coal mine, near Ashford, New South Wales, and recting coke ovens.

The concentrator, having a Krupp ball mill, replacing a Chilean mill, and gs, was rebuilt, 1908. Ore is received by tram-line from the mine.

The smelter, rated at 35 tons daily capacity, has a Ropp calciner, a 42x100″ tin water-jacket pyritic blast-furnace, of 60 tons rated daily capacity, h is incomplete, and two 18-ton reverberatory furnaces, making matte ying an average of circa 30% copper, 600 oz. silver and 1.5 oz. gold per ton, sent to Europe for reduction. Bauxite bricks are used for lining the ox of the reverberatory furnaces, and fuel is wood. The smelter also has untington-Heberlein converter pot, installed 1907.

Production has been as follows: 71,680 lbs. fine copper in 1903; 98,560 lbs. 904; 175,840 lbs. fine copper, 51 long tons lead, 166,869 oz. silver and 202 old in 1906; 176,960 lbs. copper and 150,353 oz. silver, with lead and gold uction, secured from the treatment of circa 7,500 tons of ore, in 1907. The pany plans resumption of lead smelting, and completion of coke ovens, in .

VER TIP GOLD MINING CO. **WASHINGTON.**

Dead. Formerly at Maple Falls, Whatcom Co., Wash.

SILVERTON MINING CO. COLOR

Office: 1612 Ashland Blk., Chicago, Ills. Mine office: Silverton Juan Co., Colo. M. F. Levy, president; W. L. Springer, vice-president; W J. Gibbons, secretary; John Makin, treasurer; Thos. R. Henahan, general ager. Lands, on Sultan Mountain, including the North Star mine, are sa have produced $1,000,000 in silver values, before 1893. Is driving a long tu hoping to open a good ore body. Has steam and water power an 20-stamp mill.

SILVERTON MINING CO. WASHINGT

Dead. Formerly at Silverton, Snohomish Co., Wash.

SIMILKAMEEN COPPER MINES CO. BRITISH COLUM

Dead. Formerly at Princeton, Boundary district, B. C.

SIMILKAMEEN MINING & SMELTING CO., LTD. BRITISH COLUM

Office: care of Chas. F. Law, secretary, Vancouver, B. C. Mine of Princeton, Boundary district, B. C. Fred Buscombe, chairman; W. H. A strong, managing director; preceding officers, E. J. McFealey and Clar Marpole, directors. Organized 1905, under laws of British Columbia, w capitalization $2,000,000, shares $10 par.

Lands, 5 claims, 3 crown-granted, area circa 200 acres, known as the Lawrence and St. George groups, 8 miles from Tulameen City, on Bear Cr a tributary of the Tulameen river, in the Similkameen division of the Bo dary district. Lands, well timbered, have a 250-h. p. available waterfall. velopment is by 4 shallow shafts, of circa 50′ depth each, a short tunnel, numerous trenches, showing a strong ore body, between schist and granite, w intrusive porphyry dikes. The St. Lawrence mine has two 50′ shafts, show an 8′ vein of massive cupriferous iron sulphide, giving average assays of a $10 per ton in copper, silver and gold. The St. George group shows a 4′ v carrying ore with quartz gangue, giving average assays of 1.38% copper, oz. silver and $53 gold per ton. Property considered promising. Idle.

SINAÏ MINING SYNDICATE. ARA

Mine office: Mt. Samarah, Arabia, care of G. Beyts & Co., Suez, E M. Wanner, mine manager, at last accounts. Property is sundry old arge erous copper mines, worked by the early dynasties of Egyptian kings, abandoned probably some 1,500 years before the Rio Tinto was first opene the Phœnicians, which latter event occurred circa 1100 B. C. A little was done, in 1903. Presumably idle for another 4,500-year period.

SINALOA EXPLORATION CO. MEX

Office: Commonwealth Trust Bldg., St. Louis, Mo. Mine office: G lupe de los Reyes, Cosalá, Sinaloa, Mex. Geo. B. Clark, president; Dr. Born, secretary; Chas. Wiggins, treasurer; preceding officers, Chas. H. John Hartman, Henry Leschen, Chas. M. Rhodes and W. S. S. Rodgers, dir Capitalization $500,000, shares $1 par. Lands include 7 square miles o cellaneous timber and mineral lands. Property included the Santa Edu and La Luz mines, which have been disposed of, for stock interests, t Metates Mining Co., and another corporation. Idle.

SINALOA & SONORA MINING & SMELTING CO. MEX

Dead. Formerly in Sinaloa, Mexico.

SIN RIVAL COPPER CO. ARIZ

Office: care of Wm. G. Kirchoff, Los Angeles, Cal. Mine office: Su Pinal Co., Ariz. Lands, 25 acres, near the Silver Queen and Lake Supe Arizona mines.

SISKIYOU COPPER & GOLD DEVELOPING CO. CALIFO

Office: Medford, Ore. W. M. Baxter, president; Ernest Huth, secre Chas. Huth, treasurer. Organized Aug. 13, 1908, with capitalization $10

nds, 75 miles from a railroad, in Siskiyou county, California, are said to show ein of circa 100′ width, giving assays of 4.5% copper and $4.54 gold per ton.

SKIYOU COPPER MINING CO. **CALIFORNIA.**

Office: Lewiston, Idaho. Mine office: Ashland, Jackson Co., Ore. W. R. ley, president; Robt. Hall, vice-president; C. E. Monteith, secretary; pre- ing officers, G. W. Holmes, H. E. Babcock, Robt. E. Kizer and J. F. Reddy, rectors. Organized Oct. 10, 1905, under laws of Idaho, with capitalization ,000,000, shares $1 par. Lands, 4 claims, area 80 acres, near the Blue Ridge ine, in the Upper Applegate district, having tunnels of 75′, 100′ and 125′, said give a good showing of ore. Idle.

SKIYOU GOLD & COPPER CO. **CALIFORNIA.**

Dead. Was a swindle, perpetrated by "Baron" W. E. von Johannsen rmerly at Rollins, Siskiyou Co., Cal. Described Vol. VII.

SKIYOU GOLD & COPPER MINING CO. **CALIFORNIA.**

Dead. Formerly had an office at 44 Central Block, Salt Lake City, Utah.

X EAGLES MINING CO. **WASHINGTON.**

Office: Olympia, Wash. Mine office: Loomis, Okanogan Co., Wash. Robt. st, superintendent, at last accounts. Has auriferous and argentiferous lead l copper ores.

ANGELI MINES. **NORWAY & SWEDEN.**

Mine office: Sjangeli, Nordland, Tromsö, Norway. Lands, circa 30 miles m the coast, with good water power available, include the Sjangeli, Alakats, lfojokk and Ruopsuokjaure groups, mainly in Norway but partly in Sweden. ntry rocks are hornblende schists, with narrow strata of limestone and len- ular bodies of massive gabbro, ores occurring in the schists as cuprite, chal- ite, bornite and chalcopyrite, assaying 2.5 to 55% copper, with an average or estimated at 12.5%, which probably is too high. Development is slight. perty considered promising. Idle.

YLARK COPPER MINING & MILLING CO. **UTAH.**

Dead. Was merged, Sept. 1, 1908, in the Utah United Copper Co. For- rly at Milford, Beaver Co., Utah. Fully described Vol. VII.

ATE CREEK MINING CO. **ARIZONA.**

Dead. Formerly at Prescott, Yavapai Co., Ariz.

ATE CREEK MINING & MILLING CO. **WYOMING.**

Dead. Formerly at Wheatland, Laramie Co., Wyo.

ATER COPPER MINES CO. **MISSOURI.**

Dead. Formerly, circa 1901, at Eminence, Shannon Co., Mo.

EEMINABAD COPPER CO. **INDIA.**

Office: care of P. C. Dutt, manager, Residency Road, Jubbulpore, Central vinces, India. Mine office: Sleeminabad, Central Provinces, India. Lands 1½ miles from Sleeminabad, on the East Indian Railroad, 40 miles from bulpore, and 650 miles from Bombay, almost in the centre of India. formation is of Silurian age, showing dolomite, slate, quartzite, mica- st and jaspelite, much crumpled and metamorphosed, with numerous phyry dikes, ore occurring in the vicinity of the porphyry. The Dharwar sts, here seen, belong to the same geological horizon as the Kolar gold s. Country rocks have a generally east and west strike, and southerly dip. veins occurring at approximately right angles and having a westerly dip. veins have well defined walls, with considerable fluccan, showing slicken s. The property shows 16 veins, in a radius of 10 miles, veins averaging ridth, one vein outcropping for nearly 2 miles. Development is by a 100′ tical shaft, and some diamond drilling has been done, showing auriferous argentiferous malachite and tetrahedrite, giving assay values, according the Indian Government Survey, up to 25% copper, 197 oz. silver and 15

dwts. gold per long ton. Ore produced has been sold for £7 5s. 6d. per ton. Property is considered worthy of careful investigation. Presumably idle.

SLIDE ROCK MINE. MEXICO.

Office: care of Alpheus McCallum, 162 Randolph St., Chicago, Ills. Mine office: Magdalena, Socorro Co., N. M. Lands, 6 claims, area 120 acres, in the Magdalena district, 2 miles from the Santa Fé railway, held under bond and lease by Alpheus McCallum, Dr. Alex. McCallum and Dr. W. W. McCallum. Property has tunnels of 120′ and 200′, showing ore assaying up to 21.2% copper, 6 oz. silver and $19.84 gold per ton, with occasional lead and zinc values. Presumably idle.

SLIDING ROCK COPPER PROPRIETARY, N. L. AUSTRALIA.

Dead. Received a £2,000 subvention from the state, and repaid 12s. thereon, property reverting to the state. Formerly in South Australia.

SLOCUM COPPER CO. ARIZONA.

Mine office: Phœnix, Maricopa Co., Ariz. Lands, in the Winifred district, 22 miles north of Phœnix, have shafts of 130′ and 150′, showing ore assaying well in copper, silver and gold. Property is said to have a 10-ton smelter, and company is said to plan increasing capacity to 100 tons daily, but should open a mine first.

SMELTING & REFINING COMPANY OF AUSTRALIA (1901), LTD. AUSTRALIA.

Dead. Succeeded by Australian Smelting Corporation, Ltd. Formerly at Dapto, N. S. W., Australia. Described Vol. V.

SMOKEHOUSE MINING CO. MONTANA.

Office and mine: Butte, Silver Bow Co., Mont. Bernard Noon, general manager. Property includes the Detroit, National and Copper Bottom claims, also the Smokehouse mine, which consists of a city lot, in the heart of Butte. Was controlled, 1908, through ownership of a large majority of stock, by Davis-Daly Estates Copper Co., and presumably is controlled by successor of latter, the Davis-Daly Copper Co. Mine is described under title of latter.

SMUGGLER GOLD & COPPER MINING CO. WASHINGTON.

Office: 202½ Stark St., Portland, Ore. Mine office: Index, Snohomish Co., Wash. McKinley Mitchell, president; Samuel Hart, secretary; D. S. Williams, treasurer; W. J. Walters, general manager. Organized July, 1904, under laws of Washington, with capitalization $1,000,000, shares $1 par; issued, $600,000. Lands, 19 claims, in the Silver Creek district. Presumably idle.

SNAKE RIVER CONSOLIDATED MINING CO. WYOMING.

Office: 319 Keith and Perry Bldg., Kansas City, Mo. Letter returned unclaimed from former mine office, Encampment, Carbon Co., Wyo. Chas. W. German, president; Geo. Creel, vice-president; L. E. Wyne, secretary and treasurer. Organized July, 1906, under laws of Wyoming, with capitalization $5,000,000, shares $5 par. Lands, 9 claims, area 180 acres, also 520 acres of placer lands, with total holdings of 700 acres, in the Three Forks district, 26 miles from a railroad. Has several pits and shafts of 10′ to 90′ depth, and several tunnels of 50′ to 440′ length, showing mainly sliver-lead ores, with some copper and zinc.

SNAKE RIVER MINING CO. IDAHO.

Letter returned unclaimed from former mine office, Heath, Washington Co., Idaho. Is said to have opened a 24″ vein of ore assaying 40 to 50% copper.

SNOHOMISH MINE. MONTANA.

Owned half and half by Butte Coalition Mining Co. and Butte & Boston Consolidated Mining Co.

SNOQUALMIE COPPER MINING CO. WASHINGTON.

Letter returned unclaimed from former mine office, Skykomish, King Co.,

h. Lands, 8 claims, known as the Mountainview group, near the Dutch er mine, on the middle fork of the Snoqualmie river, showing a ledge of claimed width, opened by 3 tunnels, each showing auriferous and argentif- s copper ore, said to be of high grade. Idle.

OWBALL COPPER MINING CO., N. L. **AUSTRALIA.**

Mine office: Gundagai, N. S. W., Australia. Lands, 38 claims, leasehold, Snowball Hill, 3 miles from Mount Horeb railway station, and 9 miles th of Gundagai. Mine, discovered 1873, was worked vigorously, 1876-1880, ploying up to 400 men. Main shaft, 210′, sunk by old company, shows a n of 30″ extreme width, carrying argentiferous and slightly auriferous laconite, assaying 25% copper. Also has a new shaft of 25′. In 1907 pped 95 long tons of 6.4% copper ore to the Blayney smelter.

OW CLIFF COPPER MINING CO., LTD. **MONTANA.**

Office: 719 Bank St., Wallace, Idaho. Mine office: Saltese, Missoula Co., nt. Andrew G. Gordon, secretary. Incorporated, circa 1907, under laws of ho, with capitalization variously given as $150,000 and $500,000.

OWDRIFT MINING CO., LTD. **MONTANA.**

Office: Wallace, Idaho. Mine office: Saltese, Missoula Co., Mont. Peter din, H. M. Force, W. J. Johnson, W. J. Rhodes and Jas. A. Wayne, directors. anized 1907, under laws of Idaho, with capitalization $1,500,000, shares par.

WSHOE COPPER MINING CO. **MONTANA.**

Mine office: Canyon Ferry, Broadwater Co., Mont. Idle and presumably bund.

WSHOE GOLD & COPPER MINES, LTD. **BRITISH COLUMBIA.**

Office: 717 Salisbury House, London, E. C., Eng. Mine office: Phœnix, ndary district, B. C. Earl of Chesterfield, chairman; Geo. S. Waterlow, ., J. P., vice-chairman; H. W. Batty, secretary; Anthony J. McMillan, aging director; J. W. Astley, superintendent; J. H. Trevorrow, mine super- ndent. Organized Jan. 20, 1901, under laws of Great Britain, with capi- ation £250,000, shares £1 par; issued, £198,155. Property is under lease he Consolidated Mining & Smelting Co. of Canada.

Lands, 4 claims, freehold, area 120 acres, about a quarter-mile from the nby, showing fissure replacements of 25′ to 200′ width, with an average of t 100′, traceable 1,000′, carrying chalcopyrite averaging about 1.5% copper $1.25 gold per ton, ore occurring occasionally in distinct bodies, somewhat ed, but mainly disseminated, in minute particles, through a silicious to areous gangue, with occasional magnetite and specular hemitite. Develop- t is by tunnels of 200′, 250′ and 600′, with shafts of 200′ and 300′, the n shaft having 3 compartments, but bulk of production is secured from -cast workings.

Equipment includes a 150-h. p. double-drum electric hoist, raising 2-ton s, and the high-pressure half of a 30-drill Rand Corliss cross-compound lensing air-compressor.

Production has been as follows: 20,000 tons of ore in 1902; 74,000 tons, ed at an average cost of $1.10 per ton, in 1903; 125,001 tons in 1907, shipped reenwood and Trail smelters, yielding circa 3,125,000 lbs. fine copper. The body is low in grade, though of great size, and apparently the property can perated profitably only on the basis of copper at about 16 cents per pound.

WSHOE MINING CO. **IDAHO.**

Office: Wallace, Idaho. Mine office: Mullan, Shoshone Co., Idaho. Wil- D. Greenough, manager. Capitalization $1,500,000, shares $1 par. Lands, ry claims, partly patented, shortly west of the Snowstorm mine, supposed

to carry the extension of the Snowstorm ore body. Has a crosscut tunn showing auriferous copper ore, without silver values. Idle.

SNOWSLIDE MINING & MILLING CO. IDAHO

Dead. Was organized circa August, 1906, with capitalization $1,000,0 Geo. Snow was president. Formerly at Mullan, Shoshone Co., Idaho.

SNOWSTORM EXTENSION MINING CO., LTD. IDAHO

Office: Chicago, Ills. Mine office: Mullan, Shoshone Co., Idaho. C. M. Vaughn, president; C. M. Sommers, vice-president; J. K. Scott, secretary and treasurer. Capitalization $1,000,000, shares $1 par. Lands, 4 claims, 1 fractional, said to be in the vicinity of the Snowstorm mine.

SNOWSTORM GOLD & SILVER MINING & MILLING CO. COLORADO

Mine office: Durango, La Plata Co., Colo. J. E. Downer, manager, at last accounts. Ores are said to carry gold, silver, copper and mercury. Has water power and a 10-stamp mill. Idle.

SNOWSTORM MINING CO. IDAHO

Office and mine: Larson, Shoshone Co., Idaho. Employs about 300 men. Thos. L. Greenough, president; Wilbur D. Greenough, vice-president and general manager; C. D. Miller, secretary and treasurer; preceding officers, F. J. Kline, Jas. Bean, J. H. Heward and H. E. Chaney, directors; Leo Greenough, superintendent.

Organized 1899, under laws of Idaho, with capitalization $1,250,000, increased, 1906, to $1,500,000, shares $1 par. Net earnings were $5,677 in 1905, $144,322 in 1906, and $498,013 in 1907, gross receipts of latter year being $875,919. Dividends were $90,000 in 1906, $360,000 in 1907, and $150,000 in 1908.

Lands, 11 claims, 7 patented, area circa 220 acres, also a 2-acre millsite, with 300 acres available for tailings, on Stevens Peak, east of Mullan, in the Hunter district, near the Montana boundary. Property shows a fissure vein of 10′ to 35′ width, with an average width of circa 20′, developed for nearly 1,000′ in length. Apparently the ore body is an impregnated cupriferous zone, conforming to the bedding planes in Algonkian quartzite. The ore is highly silicious, and devoid of iron and alumina, being mainly carbonate to a depth of 750′, succeeded by slightly silicious chalcocite, with some bornite and chalcopyrite, the bornite occasionally carrying native silver in quantities up to 1,000 oz. per ton, disseminated in quartzite, all ores being more or less argentiferous, and averaging probably 4 to 4.5% copper, 6 to 7 oz. silver and circa $2 gold per ton, though considerable ore is produced averaging 8% copper.

The mine has a 200′ shaft, but development is mainly by 4 tunnels, No. 3 having a back of 1,200′, showing an ore chute circa 25′ in width and about 850′ in proven length, with No. 4 tunnel driven 500′ vertically below No. 3. Estimates of ore blocked out range from 1,000,000 to 3,000,000 tons, and probably 1,500,000 tons would be a fair figure, the mine having very large ore reserves.

The mine is connected with the railway spur at Larson by a 7,300′ tram-line from No. 2 tunnel and a 3,000′ Riblet aërial tram from No. 3 tunnel.

Electric energy is used throughout, the power installation including 4 motors and an electric light plant, water being brought through a 4½-mile pipe-line, generating 300 h. p. Equipment includes 20-drill and 40-drill air-compressors, driven by direct-connected electric motors.

Buildings include a 40x50′ office, machine-shop, smithy and sawmill, at the mouth of tunnel No. 3, a changing-house and 2 large 2-story hotels with accommodations for 300 workmen, these being 52x84′ and 40x200′ in size, the latter having cost circa $50,000.

The mill, near the mine, was remodeled and enlarged, 1907, when 3 large

ing tanks were added. The mill, of 300 tons nominal daily capacity, ated by 4 electric motors, includes a 125-ton leaching and precipitation , treating carbonate ores averaging 2 to 3% copper and circa 7 oz. silver on, which is said to obtain an extraction of about 90% of the assay values. ore is crushed and then run into 3 agitators, where mixed with a 10% tion of sulphuric acid with calcium chloride, forming a solution of copper hate, which goes from the agitators through a series of 6 settling vats, re the copper is precipitated on scrap iron, and silver is precipitated as a ride, the solution being passed through settling vats and the silver sepad from the clear solution by sodium sulphite, filtered and shipped for reng.

The upper levels of the mine formerly were operated, under a 5-year lease, royalty, by J. H. Heward & Co., but the lease was bought by the company, 4, 1906.

Production, begun 1904, ceased November, 1907, owing to depression in metal market, but was resumed Feb. 20, 1908. For 1906 and 1907 the ores said to have averaged returns of about 5% copper and 7 oz. silver per ton. duction, 1906, was 6,233,940 lbs. fine copper, and for fiscal year 1907 was 03 tons of ore, of which 9,721 tons were treated at the mine and 77,782 were shipped to smelters, yielding circa 10,000,000 lbs. fine copper and 000 oz. silver. The mine ended 1908 with daily shipments of about 500 , sent mainly to the Washoe works, with smaller shipments to smelters at e, Tacoma, Greenwood and Great Falls. Apparently the mine is capable of ling 1,500 tons of 5% ore daily, on present development, which would give nnual output of about 22,500,000 lbs. fine copper, though in all likelihood ral years will be required to reach this figure. The property is one of ptional value and future promise, and is well managed.

WSTORM MOUNTAIN COPPER MINING CO. **IDAHO.**

Dead. Formerly at Mullan, Shoshone Co., Idaho.

WTOP MINING CO. **BRITISH COLUMBIA.**

Office: Detroit, Mich. Mine office: Port Hill, Kootenai Co., Idaho. A. B. intette, president; A. S. Brown, secretary. Capitalization $2,000,000. ds, 13 claims, area circa 250 acres, also 4 timber claims, in the Creston sion of the Boundary district of British Columbia, lying 3 miles north of international boundary line, with postoffice in the United States. Lands w highly argentiferous copper ore. Has 7 buildings.

ORRO GOLD CO. **ARIZONA.**

Office and mine: Harrisburg, Yuma Co., Ariz. Geo. D. Workman, president; C. Workman, secretary; F. C. Smith, general manager. Organized 1901, er laws of Arizona, with capitalization $500,000, shares $1 par. Lands, 10 ms, area 200 acres, in the Ellsworth district, showing a 2′ fissure carrying ellite and chalcopyrite, assaying about $10 gold and 5 oz. silver per ton, h small copper values, developed by a 667′ shaft and 11 tunnels, with 2,467′ underground workings, said to give 5,000 tons of ore blocked out for stoping. a 20-stamp mill, 3 Standard concentrators and cyanide plants of 10 tons 50 tons daily capacity. Presumably idle.

LACE COPPER MINING CO. **ARIZONA.**

Office and mine: Globe, Gila Co., Ariz. Ignatius Schlinger, president and asurer; Henry Smith, vice-president; A. P. Murray, secretary; T. Schlinger, asurer; Wm. Howe, superintendent. Organized 1903, under laws of Arizona, h capitalization $500,000, shares $1 par, in $100,000 preferred and $400,000 mon shares. Lands, 4 claims, in the Bloody Tank district, circa 8 miles Globe, showing 4 ore bodies, of 20″ average width, opened by several pits, ing assays of 8% copper and $15 gold per ton. Presumably idle.

COMPAÑIA MINERA LA SOLEDAD. ME

Office: care of Dr. S. H. Quint, Ameca, Jalisco, Mex. Mine Guachinango, Mascota, Jalisco, Mex. Chris. D. O'Brien, Jr., manager. 78 pertenencias, circa 12 miles southwest of Ameca, in the Sierra Tetil trict, including the Soledad and Santa Isabel mines, carrying auriferou argentiferous copper ore and free gold, with values mainly in gold, in vein, with deepest workings circa 400', showing sulphides below the 200' with 10,000 tons of ore estimated in sight. Equipment includes steam and a stamp-mill having 10 stamps, 1 Wilfley table and 1 Pender concent

SOLMS-BRAUNSFELS'SCHE BERGWERKE. GERM

Mine office: Braunsfels, Rheinprovinz, Germany. Herr Bergas Bellinger, manager. Has iron, manganese and copper ores.

SOLOMON SPRINGS COPPER MINING CO. ARIZ

Office and mine: Naco, Cochise Co., Ariz. Lands, 20 claims, are acres, in the Naco valley, about midway between Bisbee and Naco. show a vein having a gossan of 4' to 40' width. Was under bond, 1903-1905, to Houghton Development Co. Idle several years.

SONGATOF MINE. SIBI

Mine office: Semipalatinsk, Siberia. Is a small producer, located province of Semipalatinsk, near the Chinese boundary line.

SONOMA COPPER MINING CO. NEV

Mine office: Rosebud, Humboldt Co., Nev. B. C. Williams, superi ent. Lands, circa 5 miles east of Rosebud, are opened by tunnel, showi giving good assay values in copper, gold and silver.

SONOMA MINES OF MEXICO, LTD. ME

Office: 4 Great Winchester St., London, E. C., Eng. Mine office: San Juan del Rio, Durango, Mex. Geo. H. Johnson, secretary; W. B. J mine manager; E. L. Wagner, superintendent. Organized Nov. 4, 1899, laws of Great Britain, with capitalization £500,000, shares £1 par; £450,407. Lands, 415 acres, carrying ores of gold, silver and copp Sonoma claims showing a large body carrying 2.5 to 4% copper, with fa and silver values, while the Malinche claim is said to show ore carryi to 10% copper, with small gold and silver values. Has steam power.

COMPAÑIA MINERA DE LA SONORA. ME

Mine office: Cumpas, Moctezuma, Sonora, Mex. Property is the So mine, carrying auriferous and argentiferous copper-lead ores. Has steam

SONORA BONANZA MINING CO. ME

Dead. Reorganized, 1907, as Superior-Bonanza Mining Co. Forme Imuris, Magdalena, Sonora, Mex. Described Vol. VI.

SONORA-CANANEA DEVELOPMENT CO. ME

Office: care of L. A. Burleigh, clerk, Augusta, Me. Letter return claimed from former mine office, La Cananea, Arizpe, Sonora, Mex. Org circa January, 1907, under laws of Maine, with capitalization $5,000,00 parently still-born.

SONORA CENTRAL MINES CO. MI

Office: 920 Merchants Loan & Trust Bldg., Chicago, Ills. Mine Alamos, Sonora, Mex. Employs circa 30 men. Frederick B. Smith, pre Amos C. Ballou, vice-president; W. R. Angell, secretary; Frederick E. treasurer; Jas. R. Hendra, general manager; preceding officers, Otto R. E Edw. B. Tolman, A. C. Waters, Van Ness D. Smith, Edmund J. James, N E. Eaton, Lawrence D. Ballou, A. S. Service and Don S. Harvey, directo Ernest A. Haggott, consulting engineer.

Organized July 18, 1907, under laws of Arizona, with capital $10,000,000, shares $10 par; fully issued. Continental Securities Co.

; Loan, Trust & Savings Bank, Chicago, transfer agent. Annual meeting, h Saturday in September.

The corporate relations of this company are somewhat indistinct, as the any ostensibly was a merger of the International Copper & Gold Co., hern Sonora Development Co., and Santa Cruz Mining Co., but appar- the corporations named as merged remain in existence, and the Sonora ral Mines Co. apparently controls, through stock ownership, the Interna- l Copper & Gold Co., Southern Sonora Development Co. and Santa Cruz ng Co., which in turn apparently control the Montana Copper & Gold Co., a Fé Copper & Gold Co., San Bernardo Copper Co., and Sombreretillo Min- Co., S. A. Inasmuch as the various corporations named are credited with wnership of mining properties apparently claimed also by others of the er, it has been thought best to describe, under the title of Sonora Cen- Mines Co., the various properties claimed, either through stock ownership rough control of subsidiary corporations.

Lands are reported, by the company, as 271 claims, area 780 acres, held the Mexican government, but 271 pertenencias, in Mexico, would have ea of 655 acres only. There also is a 10-acre millsite and 3,087 acres rrienltural lands in the Mayo Valley, where the company claims that 3 can be raised yearly. Lands, as reported by the company, are in the and Alamos districts of Sonora, Mexico, but, in the company's adver- ents, are reported as also occurring in Sinaloa, Mexico, and in Madison Missoula counties, Montana. There are 20 different properties, of which said to carry copper, 1 lead, 6 silver and 8 gold.

Principal property is the Santo Domingo, near the Quintera and Zambona s, showing ore bodies reported as fissure veins in granite and porphyry, as contact deposits between granite and porphyry, apparently occurring vein of 30′ width and 2,000′ length, carrying chutes of payable ore of 6′ to idth and 40′ to 90′ length. The Santo Domingo is said to have ore with twall paystreak assaying up to 220 oz. silver, from silver-copper glance, s said to have 7′ of mixed copper and silver ore, assaying 17 oz. silver on. Development is by a 360′ shaft, with circa 2,500′ of workings.

The Stone Creek mines, sometimes known as the Ballarat & Wallede group, 120 acres, 18 miles from Dillon, Madison Co., Mont., have a 300′ two-com- ent shaft, with 1,370′ of workings, and are said to have shipped some Butte smelters returning 17% copper.

The Dolcoath mine, at Alamos, is said to show ore assaying 12% copper irca 20 oz. silver per ton.

El Sombreretillo gold mine, area 112 hectares, is in the Altar district nora.

La Australia group, 20 claims, in El Fuerte district of Sinaloa, is opened 70′ shaft, with circa 400′ of workings, showing a 12′ paystreak of ore ing 15% copper and 112 oz. silver per ton.

El Sorteo group, 20 claims, 7 miles from San Bernardo, Alamos, Sonora, 30′ vein, opened by a 300′ tunnel, showing ore assaying well in copper, and gold.

El Pedregal group, 15 hectares, 17 miles from Alamos, has a 200′ shaft 1,760′ tunnel.

La Negra group, 14 hectares, adjoining El Pedregal, has a 100′ shaft, with 1,500′ of workings, and is equipped with a 10-stamp mill.

La Perla group, 5 claims, near Quiriego, has a 100′ shaft and a 250′ tunnel.

The Zacatecas group, 10 hectares, near the Trigo gold mine, has 50′ of ngs, said to show gold ore.

The Santa Cruz group includes the Marte and Cuiche gold properties, in

the Altar district, the Santa Cruz having a 380′ shaft and a 300′ tunne
the Cuiche having a 60′ shaft, the properties having circa 3,000′ of wor
and a 10-stamp mill.

El Niño group, 10 claims, 8 miles east of El Pedregal and 30 miles
of San Bernardo, has 90′ of workings, said to show silver-lead ore.

San Pablo group, 10 claims, in the Altar district, is said to be an a
with considerable workings.

La Higuera group, 8 claims, is said to show silver-lead ore.

La Josefita group, 14 claims, 30 miles east of Alamos, has 100′ of
ings, said to show copper ore.

Santa Ana group, 4 claims, has 50′ of workings, said to show silver-le

La Higuera group, 8 hectares, is said to show a 16′ paystreak in
vein carrying mainly silver values.

El Quebradillo group, 4 claims, is said to show copper ore.

The Ruth group, in Missoula county, Montana, with 100′ of worki
said to show copper ore.

The company plans deepening the Santo Domingo mine and ad
100-ton concentrator. The company has some excellent men in its direc
but is not regarded favorably, because of the antecedents of the presi
poration, and the difficulty experienced in determining which is which
matter of properties held by the different interlocking companies. The
ship of 20 scattered properties must be regarded as a source of we
rather than of strength.

SONORA CHIEF MINING CO. M

Office: 323 American Bank Bldg., Kansas City, Mo. Mine office:
de Batuc, Ures, Sonora, Mex. L. H. Jansen, president and genera
nger; Dr. Moses T. Runnels, vice-president; Dr. C. L. V. Hedrick, se
and superintendent; Harry Haldemann, assistant secretary and tre
preceding officers, A. H. Glasner and W. T. Cramer, directors; Morris

SONORA COPPER SMELTING CO. M

Office: 424 Scarritt Bldg., Kansas City, Mo. Mine office: Noria,
lena, Sonora, Mex. Employs circa 60 men. A. M. Conrad, president an
intendent; J. M. Lowe, vice-president; C. E. Kroh, secretary; W. R.

surer; preceding officers, R. S. Stone, F. E. Reed and E. E. Axline, directors. anized June 25, 1908, under laws of Arizona, as successor of Sonora Copper with capitalization $3,000,000, shares $10 par; issued, $1,500,000. Annual ting, third Tuesday in December.

Lands, circa 500 acres, with miscellaneous holdings of approximately 8,500 s of valley land, on both sides of the railroad, including a townsite at a, between Llano and Puerto. Lands are in 5 groups, known as the Ex- ion de la Washington, Cobre Grande, Creston de Cobre, Veta Grande and ge. Principal property, area 123 acres, shows limestone, diorite, porphyry, ite and quartzite, carrying various ore bodies, mainly with north and strike, principal work being on the large ore body of th Extension de ashington group, of 4' to 97' width, said to be traceable 3 miles on the any's lands, carrying cuprite, melaconite, azurite, malachite, chalcocite, opyrite, chrysocolla, tetrahedrite and galena, giving assays of 2 to 10% r, 5 to 25 oz. silver and $2.50 to $30 gold per ton. Development is by 7 s, of 53' to 260' depth, and by tunnels of 50', 200', 245', 250' and 1,150', about 4,500' of workings, estimated to show 50,000 tons of ore. Upper ngs are said to show veins of 25' and 40' width, carrying oxidized ores. Equipment includes a steam plant and a 25-h. p. gasoline hoist, and the any has a store at the mine. Company plans continuous development, ventually adding necessary mining and reduction equipments.

RA DEVELOPMENT CO. MEXICO.

ead. Lands sold, 1907, to Fay-Cananea Copper Co. Formerly at Mocte- Sonora, Mex. Described Vol. VI.

shares $1 par; issued, $860,000. Annual meeting, first Wednesday

, 8 claims, freehold, area 151 acres, in the Summit Valley district, 2
of Butte, opened by the 326′ Virginia shaft. Company also holds,
d and lease, the Daphne group of 5 claims, adjoining the Boston &
ne, in Jefferson county, having a 175′ shaft and a 460′ tunnel, said
12′ vein carrying native copper and some ore assaying up to 14%
oz. silver and $2 gold per ton. Equipment includes a 75-h. p. hoist
air-compressor, with several small mine buildings. The Daphne
eld under a bond for $83,000, due Nov. 2, 1909, with lease on 15%
yments to be applied on the bond.

UTTE MINING CO. **MONTANA.**

office: Butte, Silver Bow Co., Mont. John G. Williams, M. E. Riley
r Howell, directors. Organized May 25, 1906, under laws of Minne-
capitalization $500,000, shares $100 par. Was organized by the
thern Railway interests, and is controlled by the Lewisohns. Has
tigation with numerous individuals and companies, including the
, in efforts to quiet title to a narrow strip of the Great Northern
y, to which the mineral rights are claimed by the East Butte and
te.

UTTE ZONE MINING CO. **MONTANA.**

returned unclaimed from former mine office, Butte, Silver Bow Co.,
F. Floyd, John Redlich, Albert Cully, Geo. E. Seiple and Edward
ectors. Organized, early 1907, with capitalization $1,000,000, shares
ever operative and apparently moribund.

ANANEA COPPER MINING CO., S. A. **MEXICO.**

Mexican incorporation of the Pennsylvania & Cananea Copper Co.

ANNINDAH SYNDICATE, LTD. **AUSTRALIA.**

office: Mount Cannindah, Queensland, Australia. Lands, 1 to 2
h of the Mount Cannindah mine, are supposed to carry circa one-
of the extension of the Apple Tree ore body. Mine has a 75′ under-
showing a vein of 7′ to 8′ width, and management plans sinking 2
underlay shafts. Shipments, December, 1906, to April, 1907, of about
hand selected ore, gave average returns of circa 9.7% copper, 1.4
and 2 dwts. gold per long ton. Idle.

ATTLIN MINE. **AUSTRALIA.**

office: Ravensthorpe, Phillips River gold field, Western Australia.
th of the Mt. Cattlin, show a 30′ vein.

OLUMBUS MINING CO. **UTAH.**

Salt Lake City, Utah. Mine office: Alta, Salt Lake Co., Utah.
). Jacobson, president and manager; Walter L. Maas, secretary and
preceding officers, Val. S. Snow, S. A. Whitney and Wm. M. Bradley,
Organized Feb. 11, 1904, with capitalization $3,000,000, shares $1
cessor of Centennial-Bingham Mining Co., and increased capitaliza-
September, 1908, to $500,000, shares $1 par, to provide capital for
the Columbus-Wedge. In October, 1908, sold 70,000 shares of treas-
for $35,000 cash, leaving 30,000 shares unissued, and gave 115,000
new stock to the Columbus-Wedge Mining Co., in exchange for prop-
ter.

include the Wedge group, showing good silver-lead values, and the
y group, opposite the Columbus Consolidated, having a tunnel cut-
fissure vein having a hanging-wall paystreak assaying up to 11%

copper, 10 oz. silver and $2.80 gold per ton. In November, 1908, on t level, a crosscut showed ore assaying 10% copper, 5.5% lead and 25 oz per ton.

Company formerly held a property, circa 4 miles from Park Cit 6 acres, having a 1,050′ tunnel, showing mainly silver-lead values, wit ore of 3.5 to 45% copper tenor, from which small shipments were mad but apparently this property is idle, or has been forfeited.

SOUTHERN ARIZONA SMELTING CO. ARI

Office: 11 Pine St., New York, N. Y. Operating office: Tombstone Works office: Silver Bell, Pima Co., Ariz. Employs circa 125 men. E. B president; W. F. Staunton, vice-president and general manager; A. N. secretary and treasurer; preceding officers, Selwyn Eddy, V. L. Mason, Murphy and H. M. Robinson, directors; A. S. Donan, superintendent. ized Aug. 10, 1906, under laws of Arizona, with capitalization $1,500,000, $100 par. Is controlled, through ownership of entire stock issue, by I Copper Co. Works represent an investment of circa $500,000.

Lands, 8 miles south of Red Rock and 12 miles from the Imperial with a down grade haul, include the 110-acre townsite of Sasco, with 4 each 50x150′.

The reduction plant, known as the Sasco smelter, includes a sa mill, blast-furnace building, converter building, power-house, boile machine-shop and smithy, all of steel frames, also dwelling houses, a office and miscellaneous buildings. All of the principal buildings are p so that they can be extended in two directions, providing an almost un capacity for expansion. The smelter, blown in Feb. 1, 1908, does a custom business, but treats mainly ore of the Imperial mine, and is of 3 nominal daily capacity.

The sampling mill is small, but fully equipped. Ore is received fr mines in 50-ton steel-bottom dump cars, discharging into 4,000-ton stora

The cupola building is constructed for 2 blast-furnaces, with one installed, this, rated at 300 tons, giving an actual duty up to 400 ton Charging is by cars hauled by electric locomotives, on tracks of 36″ Settler is elliptical, slags, which are of low copper tenor, skimming int slag-trucks, hauled by steam locomotives on a standard-gauge track. T chamber is 100x350′, leading to a 175′ stack of 12′ diameter.

The converter department has a 50-ton electric traveling crane, span. There are 6 shells, 84x126″ in size, rotated hydraulically, an from the converter stands lead to an independent dust-chamber and Product is blister copper, averaging 99.3% copper, with small quant silver and gold.

The power plant has an electric traveling crane and a 650-kw. power plant with 440-volt induction motors. There are 2 Nordberg Cor densing engines, direct-connected to a No. 9 Connersville blower and berg cross-compound Corliss condensing air-compressor with 15″ and 30 cylinders, with two 36″ air cylinders and 42″ stroke. The boiler-hou Morrison marine boilers. Water is secured from wells in the Santa Cru by an 8″ pipe-line.

SOUTHERN COPPER CO.

Organized Feb. 22, 1905, under laws of Maine. Location of lands, unknown.

SOUTHERN COPPER CO. NORTH CAR

Mine office: Gold Hill, Rowan Co., N. C. A. M. A. Richardson, pr Otto Gerner, vice-president; W. M. Richardson, secretary; Walter

man, manager. Organized circa May, 1906, with capitalization $3,000,000. umably idle.

THERN COPPER MINING CO. **UTAH.**

Office: care of J. M. Reynolds, secretary, treasurer and general manager, Lake City, Utah. Mine office: Milford, Beaver Co., Utah. J. K. Persons, ident; B. J. Persons, vice-president; Ed. Mills, superintendent. Organized, , 1905, under laws of Utah, with capitalization $300,000, shares $1 par. ds, 5 claims, area 100 acres, surveyed for patents, known as the Brooklyn up, 12 miles north of Milford, adjoining the Wahsatch King. Development by a 60′ shaft and 200′ tunnel, latter cutting a vein carrying fair values in per, silver and gold. Presumably idle.

UTHERN CROSS COPPER MINE CO., LTD. **BRITISH COLUMBIA.**

Office: 8 Broad Street Ave., London, E. C., Eng. Mine office: Alberni, ncouver Island, B. C. T. D. Conway, chairman and managing director; thur Hebden, secretary. Organized March 5, 1906, under laws of British lumbia, with capitalization $750,000, shares $5 par.

Lands, 5 claims, area 250 acres, crown-granted, with an option over 500 es adjoining, on the northern side of Uchucklesit Harbor, showing a vein 12′ to 20′ width, with estimated average of 15′, traceable for some distance, eloped by an opencut and a 370′ tunnel, showing chalcopyrite assaying up 8% copper and $11 gold per ton. Is said to plan a smelter. Shipped, 1906, 100 tons of ore.

THERN NEVADA GOLD & COPPER MINING CO. **NEVADA.**

Letter returned unclaimed from former mine office, Luning, Esmeralda Nev. I. H. Hood, secretary. Organized under laws of South Dakota, with talization $1,000,000, shares $1 par. Lands, 2 claims, area 40 acres, 3 s southeast of Luning, said to be in litigation.

THERN PACIFIC GOLD & COPPER MINING & MILLING CO. **UTAH.**

Office: 213 West Fifth St., Salt Lake City, Utah. Mine office: Ogden, er Co., Utah. Employs 5 men. T. S. Freeney, president; Wm. Pow, vice-ident; J. W. Burnham, treasurer and general manager. Organized July 1903, under laws of Utah, with capitalization $1,000,000, shares $1 par; d, $773,910.

Lands, 12 claims, unpatented, area 240 acres, in the Sierra Nevada dis-, circa 8 miles north of Ogden, carrying circa 25 ore bodies, mainly as con- deposits between quartzite and gneiss, of which 3, under development, of 200′ estimated average width, show some oxidized ores, but mainly sul-es, including covellite, bornite and chalcopyrite, developed by 8 tunnels, est 330′, with circa 700′ of workings, with considerable ore in sight, giving age assays of 3.5% copper and circa 3 oz. silver per ton, with occasional gold values. Company plans continuous development.

THERN SMELTING & REFINING CO. **TEXAS.**

Dead. Abortive. Formerly at El Paso, El Paso Co., Tex. Described Vol. VI.

THERN SONORA DEVELOPMENT CO. **MEXICO.**

Office: 135 Adams St., Chicago, Ills. Mine office: Alamos, Sonora, Mex. erick E. Mills, president; Lucius W. Winchester, vice-president; Lawrence allou, secretary; Amos P. Ballou, treasurer and general manager; preceding rs, F. B. Smith and John W. Elliott, directors; J. R. Hendra, superin-ent. Organized July 1, 1904, under laws of Arizona, with capitalization 0,000, shares $1 par.

Lands, 28 pertenencias, area 69 acres, held under name of San Bernardo ng Co., showing granite and diorite carrying various fissure veins, of which Santo Domingo vein, of 14′ average width, is traceable 3,200′, and the radilla vein, estimated at 15′ average width, and the Santa Ana at 8′ ge width. Development is by a 300′ shaft, with 360′ of workings, esti-

mated to show 15,000 tons of carbonate ore, assaying 2% copper, 5% lead, 6 oz. silver and $42 gold per ton, which seems too high. Equipment includes an 80-h. p. hoist, good for 1,500', a store, assay office and mill, latter not in use.

SOUTHERN STAR COPPER & SMELTING CO.

Dead. Formerly had an office in St. James Bldg., New York, N. Y.

SOUTHERN ZINC & COPPER MINING CO. ARKANSAS.

Dead. Formerly at Gillham, Sevier Co., Ark. Described Vol. VI.

SOUTH FURNACE CREEK COPPER CO. CALIFORNIA.

Office: Union Trust Bldg., Los Angeles, Cal. Mine office: Greenwater, Inyo Co., Cal. A. T. Woods, treasurer; L. R. Myers, secretary; preceding officers, C. J. Fox and J. G. Lawrence, directors. Lands, 9 claims, 14 miles south of Greenwater, on the eastern slope of the Funeral Range, said to have a 100' shaft on a 5' vein, showing ore assaying 25% copper and 10 to 12 oz. silver per ton. Idle.

SOUTH GLOBE DEVELOPMENT CO. ARIZONA.

Dead. Lands were 12 claims, 6 miles south of Globe, having a shallow shaft showing auriferous sulphide copper ore of fair tenor. Formerly at Globe, Gila Co., Ariz.

SOUTH GREENWATER COPPER CO. CALIFORNIA.

Office: Tonopah, Nev. Mine office: Greenwater, Inyo Co., Cal. John S. Hills, president and general manager; Malcolm Smith, vice-president; R. C. Moore, secretary and treasurer; preceding officers, Hon. T. L. Oddie and Roger C. Knox, directors; H. S. Chapman, superintendent. Organized November, 1906, under laws of Nevada, with capitalization $1,500,000, shares $1 par.

Lands, 14 claims, 1 fractional, area circa 275 acres, known as the Miller group, at Miller Springs, 15 miles south of Greenwater, having 3 shallow shafts showing 2 veins, 1 carrying a promising outcrop of about 40' width, and 1 of about 6' average width carrying ore giving good assay values in copper. Property is above the average of promise in the Greenwater district. Idle.

SOUTH KEARSARGE MINE. MICHIGAN.

Owned by Osceola Consolidated Mining Co.

SOUTH MOUNT LYELL MINING CO., LTD. TASMANIA.

Dead. Formerly at Gormanston, Montagu Co., Tasmania. Described Vol. VI.

SOUTH NAMAQUA SYNDICATE. CAPE COLONY.

Dead. Was merged, circa March, 1908, in Insizwa Nickel & Copper Developing Co., Ltd. Formerly at Kokstad, Cape Colony.

SOUTH NEVADA COPPER SYNDICATE. NEVADA.

Letter returned unclaimed from former office and mine, Goldfield, Nev. Walter Stone, president; Frank B. Hobbs, secretary and treasurer; Wm. Prior, general manager. Organized 1906, under laws of South Dakota, with capitalization $2,000,000, shares $1 par. Lands, 5 claims, area 100 acres, known as the Santa Ana group, in the Slate Range, circa 14 miles south of Goldfield, having a 30' shaft, showing a 30' vein, surface ores of which assay 9 to 10% copper, 8 oz. silver and $10 gold per ton. Presumably idle.

SOUTH PACKER MINE. IDAHO.

Mine office: Ivers, Custer Co., Idaho. Has lands near the Lost Packer.

SOUTH PEACOCK MINING CO. IDAHO.

Office: 88 State St., Boston, Mass. Letter returned unclaimed from former mine office, Weiser, Washington Co., Idaho. Thos. S. Wentworth, president; Wm. L. Pratt, secretary. Capitalization, $500,000. Has a shaft showing cuprite. Idle some years.

SOUTH RANGE MINING CO. MICHIGAN.

Office: 60 State St., Boston, Mass. Mine office: Houghton, Houghton Co., Mich. John W. Belches, president; H. W. Wesson, treasurer

Nichols, secretary. Capitalization $2,500,000, shares $25 par. Lands, circa 7,000 acres, undeveloped, lying mainly between the Globe and Belt properties, in Houghton and Ontonagon counties, Michigan, and so located that future mining companies, carved out of new territory in this district, will have to see the South Range company, or organize with very jagged outlines, in many cases.

SOUTH SAN XAVIER COPPER CO. **ARIZONA.**

Office and mine: Tucson, Pima Co., Ariz. Lands show a contact deposit between limestone and porphyry, with a good gossan, of 30′ estimated width, carrying a 30″ paystreak of sulphide ore assaying up to 28% copper and 12 oz. silver per ton, opened by a two-compartment shaft of circa 200′ depth. Smelter shipments have returned 13.5 to 20% copper, with small silver values.

SOUTH SIDE MINING CO. **MICHIGAN.**

Office: 68 Devonshire St., Boston, Mass. Mine office: Leopold Bldg., Houghton, Houghton Co., Mich. John C. Watson, president; Fred W. Nichols, agent; C. O. Burbank, secretary and treasurer. Reorganized April, 1899, under laws of Michigan, as successor of company of same name, which levied assessments of about $90,000 to 1872. Annual meeting, first Monday in March. Lands, circa 200 acres, lying west of the Dakota and north of the Naumkeag, immediately west of Houghton, with one-half mile frontage on Portage Lake. Mining operations were confined to exploratory work many years ago. Idle since circa 1873.

SOUTH SWANSEA MINING CO. **UTAH.**

Office: 431 Atlas Blk., Salt Lake City, Utah. Mine office: Silver City, Juab Co., Utah. Claude V. Wheeler, president; J. M. Wheeler, vice-president; J. C. Croxall, treasurer; W. H. Farnsworth, secretary; Jesse Knight, general manager. Organized May 11, 1908, under laws of Utah, with capitalization $300,000, shares $1 par. Has paid dividends of $169,460, last dividend being disbursed April, 1904. Ore carries mainly silver values, with some copper and gold. Production, 1907, was only 3 carloads of ore.

SOUTH THARSIS MINING CO., N. L. **TASMANIA.**

Dead. Property was sold, for £45,000, to Mount Lyell Mining & Railway Co., Ltd. Formerly at North Mount Lyell, Montagu Co., Tasmania.

SOUTHWEST AFRICA CO., LTD. **GERMAN SOUTHWEST AFRICA.**

Offices: 3 Laurence Pountney Hill, Cannon St., London, E. C., Eng., and Unter den Linden 35, Berlin, Germany. E. Davis, chairman; C. Launspach, secretary; Tob. Tönnesen, African manager. Organized Aug. 18, 1892, with capitalization £2,000,000, shares £1 par; issued, £1,200,000. Property is mineral concessions covering 22,000 square miles, including nearly 4,500 square miles of freehold, in Damaraland, and mining rights to 23,000 square miles in Ovamboland, total holdings including 40,000 square miles of freehold, with mining rights over 90,000 square miles additional, also sundry railroad concessions. Holds large share interests in the Otavi Mines & Railway Co.

SOUTHWESTERN CONSOLIDATED SMELTING CO. **CALIFORNIA.**

Office: 39 Cortlandt St., New York, N. Y. F. C. Kaye, president; J. C. De Wolfe, treasurer; I. L. Thompson, secretary; E. Homer Grasty, manager. Organized August, 1904, with capitalization $2,000,000, shares $1 par. Company claimed to plan building a smelter somewhere in California. Was merely a stock-jobbing device, promoted by Messrs. Kaye, De Wolfe & Co., whose "mining" operations merely lead to the depletion of the pockets of their "customers."

SOUTHWESTERN COPPER CO. **NEW MEXICO.**

Dead. Lands sold, circa May, 1906, to Burro Mountain Copper Co. Formerly at Silver City, Grant Co., N. M.

SOUTHWESTERN COPPER CO. **TEXAS.**

Letter returned unclaimed from former mine office, Sierra Blanca, El Paso

Co., Tex. F. W. Thomme, president. Lands, 1 mile from Sierra Blanca a 200′ shaft, showing a 6′ vein, carrying ore assaying up to 18% copper steam power. Idle.

SOUTHWESTERN COPPER & IRON CO. NEW ME

Dead. Lands sold, May, 1906, to Burro Mountain Copper Co. Fo at Leopold, Grant Co., N. M.

SOUTHWESTERN DEVELOPMENT & IMPROVEMENT CO. ARI

Mine office: Clifton, Graham Co., Ariz. Property is the Polaris held under bond and lease, from Polaris Mining & Milling Co. Prop described under title of owner.

SOUTHWESTERN GOLD & COPPER CO. ARI

Dead. Formerly at Douglas, Cochise Co., Ariz.

SOUTHWESTERN MINE & SMELTING CO. ARI

Dead. Formerly at Gleeson, Cochise Co., Ariz.

SOUTHWESTERN MINING CO. ME

Dead. Was merged, circa August, 1908, in Kansas-Cananea Copp Formerly at La Cananea, Arizpe, Sonora, Mex. Fully described Vol. VI.

SOUTHWESTERN SMELTING CO. CALIFO

Dead. Formerly at Letcher, San Bernardino Co., Cal.

SOUTHWESTERN SMELTING & REFINING CO. ARI

Dead. Sold, Sept. 15, 1906, by sheriff, under execution, to Walter L. Formerly at Benson, Cochise Co., Ariz. Described Vol. VI.

SOUTH WEST SMELTING & REFINING CO. NEW ME

Office: 517 Francis St., St. Joseph, Mo. Mine and works office: Oro Otero Co., N. M. Geo. J. Green, president; Geo. A. Guild, vice-president Travis, secretary and treasurer; Daniel B. Hunt, assistant secretary; W Evans, assistant treasurer; preceding officers, Mansfield M. Riggs, Arc M. Woodson, John E. Lonsdale, Chas. B. Hughes, Clinton P. Cockrill, Standley and Ichabod McCord, directors; J. J. Murray, general manager Airheart, superintendent.

Organized Dec. 5, 1904, under laws of New Mexico, with capital $750,000, increased, circa April, 1907, to $1,250,000, shares $100 par. $150,000, at 5%. Controls, through stock ownership, New Mexican L Development Co., which owns the townsite of Orogrande, and is said to a number of other allied and subsidiary corporations. Annual meeting Tuesday in November.

Lands, 36 claims, area 720 acres, also an 80-acre smeltersite and a 6 townsite, giving total holdings of 1,440 acres, bought of the Jarilla Co., in the Silver Hill district of Otero county and the Organ district of Ana county, New Mexico. Principal holdings are in the Silver Hill d in the Jarilla Mountains, circa 60 miles north of El Paso, and, in addi copper lands, the company holds sundry placer gold claims and a mine of erous iron ore, highly suitable for fluxing. The company also owns a lim quarry for flux, which has been stated in the press to carry 80 cents to $ per ton, which seems too good to be true.

Principal mining properties are the Lucky, Nanny Baird, Iron Ma Garnet mines. The three properties first named show limestone and por carrying 16 contact deposits, of which 7, more or less developed, rang 3′ to 40′ in width, with known length of 100′ to 700′, carrying native cuprite and malachite, said to give average assays of 7% copper, 2 oz. and $5 gold per ton, all ores being slightly argentiferous and strongly auri

The Lucky mine, developed by a 300′ shaft, and by tunnels of 25 625′, is said to show a large amount of auriferous copper ore averaging 7% copper and $6 gold per ton, and the mine has proven very wet. tramway from the mine leads to the railway track.

The Nanny Baird mine has a vein of circa 25′ average width, carrying l copper and silver values, with good gold values, and to the south is a r gold tract, of some promise. Development is by a 100′ vertical shaft an 800′ incline shaft. The Lucky and Nanny Baird mines jointly have t one mile of workings, estimated by company to show 100,000 tons of of good average grade blocked out for stoping, which figures probably are high.

The Iron Mask mine, on Iron Mountain, produces auriferous iron ore, ying circa 60% iron and $2 to $8 gold per ton, with an estimated average value of $3 to $4. It is planned to reach the Iron Mask by a railroad spur.

The Garnet mine, taken over early 1908, has a 480′ shaft, equipment in- ing a 20-h. p. gasoline engine and an air-compressor.

The mining plant includes three 85-h. p. boilers, two 8x10″ hoists, good for each, and 2 Sullivan air-compressors, of 28 drills aggregate capacity, with power drills.

Buildings are 22 in number, including 4 smithies, a 20x40′ machine-shop, eral store, office, assay office and laboratory. The townsite of Orogrande electric light and a telephone exchange, maintained by the company.

Water is brought, 21 miles, from a dam across the Sacramento river, in Sacramento Mountains, by a 6″ pipe-line, leading to a 25,000,000-gallon rvoir, on the side of Baird Hill, just above the townsite of Orogrande. The y flow of the river is said to be 10,000,000 gallons, and the capacity of the e-line is circa 500,000 gallons daily, delivering water at about 800 lbs. sure per square inch, under a static head of 1,500′.

The smeltersite, less than a mile from Jarilla Junction, is about 1½ miles n the mine, and includes ore-bins, sampling mill, furnace building and er-house. The furnace building, of steel, is designed for two 250-ton fur- s, with equipment in place for both, but only one furnace is installed, this ing been blown in early November, 1907. The furnace building has a 125′ l smokestack, of 14′ diameter at the base and 9′ at the top. The smelter eached by a private spur track from the El Paso & Northeastern Railroad, is connected by a branch line with the mines.

The smelter power plant has three 150-h. p. Heine boilers, two 120-h. p. r & Stowell Corliss high-speed engines, 2 Hendrie & Bolthoff electric gen- ors and two No. 8 Connersville blowers.

The company formerly employed about 200 men, and made its first matte ment to Chrome, N. J., in July, 1907, but suspended operations May, 1908, n Geo. J. Green, the president, was appointed receiver, in a friendly action. plant was idle at the end of 1908.

TH YALE COPPER CO., LTD. **BRITISH COLUMBIA.**

Mine office: Grand Forks, Boundary district, B. C. Frederick Keffer, ager. Organized January, 1905, under laws of British Columbia, with capi- ation $450,000, shares $1 par. Apparently property was a bond and lease he Sunset group.

TH YUBA MINING & SMELTING CO. **CALIFORNIA.**

Mine office: French Corral, Nevada Co., Cal. Presumably idle.

EREIGN CONSOLIDATED COPPER CO. **OREGON.**

Office: Baker City, Ore. Mine office: Sparta, Baker Co., Ore. W. G. ding, president; John Arthur, vice-president; Kenneth O. McEwen, secre- ; J. W Patterson, treasurer; preceding officers and John Ramb, directors. nized Dec. 5, 1907, under laws of Oregon, with capitalization $2,000,000. s, 12 claims, area circa 200 acres, on Coin Creek, in the foothills of the Mountains, showing a mineralized zone of about 200′ width, traceable on the company's lands.

SOVEREIGN COPPER MINING CO. WYOMING.

Dead. Formerly at Battle, Carbon Co., Wyo.

SPANISH-AMERICAN FEDERAL SMELTING & REFINING CO. ARIZONA.

Office: 11 Buckler Bldg., El Paso, Tex. Mine office: Nogales, Santa Cruz Co., Ariz. J. V. Smith, president; F. A. Schneider, general manager; J. P. Stapleton, attorney. Organized circa January, 1908. Property apparently is the idea of building a 1,200-ton smelter at Nogales, and company apparently is a replica of the Pan-American Smelting & Refining Co., and is not regarded favorably.

SPANISH COPPER CO., LTD. SPAIN.

Office: 2 Tokenhouse Bldgs., London, E. C., Eng. Mine office: San Vicente, via Paimogo, Huelva, Spain. G. B. Mee, chairman; Miguel Yglesias, managing director. Organized June 8, 1883, with capitalization £150,000, shares £10 par; issued £110,000.

Lands, 16 claims, area upwards of 400 acres, 6 claims, area 200 acres, perpetual leasehold, being held on an annual rental of £400, also 23 acres miscellaneous lands, in the Paimogo district of Huelva, showing 6 contact veins between porphyry and clay-slate, of which 3 are developed, these averaging 20′ width and 500′ length, opened by numerous shafts of 30′ to 165′ depth, and 14 tunnels, longest 1,840′, estimated to show 2,500,000 tons of ore, with 100,000 tons blocked out for stoping. Ore is mainly cupriferous pyrite, claimed to average about 4% copper, 3 oz. silver and $2 gold per ton. Mines, first opened by the Phœnicians, were reopened 1862, and again in 1872, 1883, 1901 and 1905. The Guadiana railroad is 5 miles distant.

SPANISH MINERALS DEVELOPMENT, LTD. SPAIN.

Dead. Was succeeded, Feb. 14, 1908, by Esperanza Copper & Silver Co., Ltd. Formerly at Almonáster, Huelva, Spain. Described Vol. VI.

SPAR COPPER MINES & TUNNEL CO. COLORADO.

Office: care of F. N. Stiles, president and general manager, Denver, Colo. E. A. Stiles, secretary; F. W. Downs, treasurer. Organized June 17, 1904, under laws of Colorado, with capitalization $600,000, shares $1 par. Lands, 9 claims, on Contact Mountain, Tomichi district, Gunnison county, Colorado, formerly known as the Morning Glim, having circa 1,500′ of workings, with gasoline power and 3 mine buildings. Is said to have produced upwards of $75,000 worth of ore, in the past. Presumably idle.

SPAR GOLD & COPPER CO. ARIZONA.

Dead. Lands sold, circa 1908, to Pocahontas Copper Queen Mining Co. Formerly at Mayer, Yavapai Co., Ariz.

SPARTA MINING & DEVELOPMENT CO. OREGON.

Office: care of Chas. P. Caffrey, Logansport, Ind. Mine office: Sparta, Baker Co., Ore. Lands, 15 claims, including the Blue Boulder group, 3 miles south of Sparta, having a vein of about 100′ width, opened by a 75′ tunnel and several pits of 10′ to 20′ depth, showing auriferous copper ore.

SPASSKY COPPER MINE, LTD. SIBERIA.

Office: 60 London Wall, London, E. C., Eng. Mine office: Spassky Zavod, Akmolinsk, Siberia. Arthur Fell, M. P., chairman; Ernest Carnot, vice-chairman; John A. Clark, secretary; Herbert C. Wolmer, general manager; R. E. V. Vinicombe, mine superintendent; R. McLeod Percy, colliery superintendent; F. C. Knight, smelter superintendent; Pellew, Harvey & Fell, consulting engineers.

Organized July 9, 1904, under laws of Great Britain, with capitalization £300,000, shares £1 par, fully issued. Debentures, £300,000, at 6%, retiring former first-mortgage debenture issue of £100,000 at 5%, and a £30,000 second mortgage issue at 6%. Company authorized, March, 1908, an increase of

capitalization to £500,000, to provide for the conversion of the new issue of £300,000 debentures into shares, at £3 per share, until Jan. 1, 1912.

Lands, 100 square miles, on the Ishim river, an affluent of the Irtish, in the Kirghiz Steppe, circa 250 miles south of Petropavlovsk, on the Siberian railway, which is the nearest railroad point. Property includes about 25 square miles of coal lands, carrying 4 seams of bituminous coal, said to be of excellent grade. Lands of the company also carry gold, iron and limestone, and include the Yuspensski mine and the Spassky smelter.

The Yuspensski mine was opened 1864, closed 1884, reopened 1896 and bought by present company, 1904. Original development was by an open pit, once 150' deep, but long since caved in.

The Yuspensski shows a network of veins, at and near the contact of slate and arcose, in sedimentaries of Permian age. The 2 main veins, known as the Annensky and Vladimir, are circa 200' distant and substantially parallel, hence it is thought they may join at depth. The mine has been tested by diamond drill borings, to a depth of 475', ore in bottom of holes assaying up to 67% copper. Principal development is on the Annensky vein, which is 10' to 60' in width, carrying mainly chalcocite and bornite, with small quantities of chalcopyrite and occasional tetrahedrite, with gangue of quartz and barite, estimated by company to average 12 to 20% in copper tenor. The upper workings show some native copper, cuprite, azurite and malachite.

The mine has 35 old shafts, mainly shallow and in extremely bad condition, the mining practice of the former owners having been of the most primitive nature, timbering costs averaging $1.25 per ton of ore mined, and timber being subject to frequent crushes, owing to bad mining, after which new timbers were installed inside of the old, with the result of eventually reducing the mine openings to impassable dimensions. New development, by present company, includes 6 shafts, of 350', 375', 300', 150', 120' and 150'. The 350' main shaft, known as the Annensky, is sunk in the footwall and connected with the veins by crosscuts. The bottom level, at 350', shows a vein of 38' extreme and 15' average width, giving ore of 10 to 40% copper tenor, with an average, from actual smelting returns, of 21.77%. This vein apparently is merely the paystreak of an ore body of immense width, a crosscut on the 300' level showing, in addition to the paystreak, 651' width of vein matter, carrying declining copper values, with a tenor of circa 1% copper only, at the end of the crosscut, hence it is probable that much of the vein hitherto untouched, may be found workable, eventually. At one point the former owners had extracted chalcopyrite, leaving a wall showing slickensides of what they considered slate, but which, upon investigation, by the present management, proved to be a vein of massive chalcocite. Ore developed is estimated at about 175,000 long tons, of circa 15% average copper tenor.

The old equipment at the mine, of a most primitive nature, has been replaced by a 700-h. p. steam plant, with a 50-h. p. hoist, good for 1,000' depth, and a 10-drill straight-line air-compressor. Buildings include a 50x100' stone machine-shop, 20x30' smithy, a variety of miscellaneous mine buildings, and dwellings for workmen, constituting a small town. The company maintains schools, baths, hospital and a church, for workmen and their families.

The coal mine, about 26 miles from the smelter, shows 2 seams of 60" and 65" thickness, and yields about 60,000 long tons of coal yearly, for the company's requirements, in addition to production for commercial uses. A coking plant, with beehive ovens, has been constructed.

The company has a 26-mile private railway, known as the Spassky-Karandy line, of 600-mm. gauge, equipped with 5 locomotives and 75 cars.

Transportation between the mine and smelter, a distance of 70 miles, is

by team, a traction engine and ore-wagons bought for the purpose apparently having proven unsuitable. Under the old management ore was carried in carts, but so much ore was lost in transit that the track of the ore-carts remains emblazoned by a purple train of bornite, visible for several miles. The Russian government is said to plan building the Orenburg-Akmolinsk-Semipalatinsk railway to pass near the company's copper and coal mines, and consideration has been given to the matter of organizing a subsidiary company, to construct a railway between the mine and smelter.

The former smelting practice, under previous ownership, scarcely could have been improved on for badness. The ore was heap-roasted with coal, the process requiring 3 weeks, and as the heaps were located on the top of a hill, where furious winds prevailed, there was much cintering and heavy losses. The old smelter had 6 rectangular brick furnaces, of 2½ tons daily capacity each, and so poor was the former practice that a smelter charge of 16 tons of ore required 54 tons of fuel and flux for its reduction. Matte was run onto the casting floor, of sand, with frequent pools of water, causing serious explosions, and only about half of the matte was removed by tapping, the balance being dug out by hand. The slags run about 3% copper, and were fed back into the furnace repeatedly, until gradually worn out.

The old smelting plant, which was poorly designed, in bad condition and remarkably inefficient, has been patched up and improved, but remains far from modern. The capacity is reported, by the company, as 80 to 100 tons daily. Equipment includes 8 small Raschette blast-furnaces and seven 5-ton reverberatory furnaces, the works being designed for a capacity of 300 long tons fine copper monthly. The converter department has a 20-ton electric traveling crane and one stand, with shells of the Anaconda type, treating matte of 58% copper tenor, and turning out blister copper averaging 99% copper, 20 to 40 oz. silver and 0.4 oz. gold per ton. There is an electrically driven quartz mill for preparing converter linings.

The smelter power plant includes a 700-h. p. steam installation, 150-h. p. electric plant and a 150-h. p. air plant, with 2 Connersville blowers and a Bessemer blowing engine.

Considerable trouble was had with labor, and forces were changed, 1907. Production, Aug. 1, 1904, to Sept. 30, 1906, was 1,784 long tons fine copper, and July, 1907, was said to be 74 long tons fine copper. Production, 1907, is estimated at 1,750,000 lbs. fine copper. The company was claimed to have made a profit of £33,000 on the first 15 months' operations, but was compelled, a little later, to raise additional capital. The property is one of very great promise, but, owing to lack of adequate transportation facilities, labor troubles and other difficulties, its development to a point commensurate with its promise is likely to require some years.

SPECULATOR MINE. **MONTANA.**

Owned by North Butte Mining Co.

SPECULATOR MINING CO. **MONTANA.**

Office: Butte, Mont. Mine office: Clinton, Missoula Co., Mont. John A. Creighton, president; John Dougherty, vice-president and general manager. Property, near Clinton, includes the Black Hawk group, and options on adjoining lands. The Black Hawk is developed through the Cape Nome shaft, which this company sunk 200', to the 500' level. Company formerly owned the Speculator group, at Butte, sold, 1905, to the North Butte Mining Co. Former holdings, now owned by North Butte, were fully described Vol. V.

SPENCE & CO. **OREGON.**

Office and mine: Kerby, Josephine Co., Ore. Dr. Jas. Spence, general

manager; C. W. Spence, superintendent. Lands, 11 claims, area 220 acres, 40 miles from a railroad, showing diorite and porphyry, carrying 4 veins, under development, estimated at 4' to 100' width, opened by 7 tunnels, of 40' to 800' length, showing cuprite, melaconite, malachite, azurite and chalcopyrite, mainly the latter, giving assays of 3 to 20% copper, 1 to 6 oz. silver and $1 to $10 gold per ton. Property is being developed slowly, with a small force, but is kept out of debt.

SPENCE MINERAL CO. **CALIFORNIA.**

Office: San Francisco, Cal. Mine office: Spenceville, Nevada Co., Cal. Chas. W. Howard, Jr., general manager. Property is an old mine, operated since circa 1875, until main shaft caved in, 1903. Ores are auriferous and argentiferous sulphides, averaging about 5% copper and 45 to 50% sulphur, occurring in wide, irregular fissures, near the contact of diorite and granodiorite. Idle.

SPENAZUMA COPPER CO. **ARIZONA.**

Dead. Was a fake, promoted by Dr. R. C. Flower. Formerly at Duncan, Graham Co., Ariz.

SPIRIT LAKE POWER & MINING CO. **WASHINGTON.**

Office and mine: Chehalis, Lewis Co., Wash. R. C. Lange, secretary and general manager. Lands are said to show auriferous and argentiferous copper ores.

SPITZEE GOLD MINES, LTD. **BRITISH COLUMBIA.**

Dead. Reconstructed, August, 1905, as Spitzee Mining Co., Ltd. Formerly at Phœnix, Boundary district, B. C.

SPITZEE MINING CO., LTD. **BRITISH COLUMBIA.**

Mine office: Phœnix, Boundary district, B. C. Organized 1905, under laws of British Columbia, with capitalization $350,000, shares $5 par, as successor of Spitzee Gold Mines, Ltd. Lands, 110 clams, area circa 5,500 acres. Property produced, to September, 1905, circa 5,000 tons of ore, averaging $12 per ton in value, and was said, at that date, to have circa 30,000 tons of ore in sight. Bonded, 1907, to LeRoi Mining Co., Ltd. Idle, except for diamond drilling, at last accounts.

SPOKANE-ALASKA MINING CO. **ALASKA.**

Office: Spokane, Wash. Mine office: Ketchikan, Alaska. Wm. F. Newton, president and general manager. Lands, 15 claims, held under bond and lease, including the Sanford group, at Dahl Head, showing promising auriferous copper ore.

SPOKANE COPPER CO. **WASHINGTON.**

Dead. Formerly at Cle-Elum, Kittitas Co., Wash.

SPOKANE-MONTANA MINING & MILLING CO. **MONTANA.**

Office: Spokane, Wash. Mine office: Iron Mountain, Missoula Co., Mont. Organized circa 1907, under laws of Idaho, with capitalization $1,000,000, by Michael Luxemburger, W. McCracken and others. Lands are said to show auriferous and argentiferous copper sulphides, at shallow depth.

SPRAGG MINE. **NEVADA.**

Owned by Mason Valley Mines Co.

SPRAGUE COPPER MINING CO. **WASHINGTON.**

Office: Spokane, Wash. Mine office: Chewelah, Stevens Co., Wash. Dr. L. E. Schlegel, manager. Property is said to show, at depth of 65', a 3' vein carrying copper, gold and silver values. Company plans a 100' tunnel.

SPRINGDALE COPPER MINING CO. **OREGON.**

Mine office: Athena, Umatilla Co., Ore. Idle and apparently moribund.

SPRINGFIELD GOLD & COPPER MINING CO., LTD. **IDAHO.**

Office: 720 Bank St., Wallace, Shoshone Co., Idaho. Mine office: Mullan, Shoshone Co., Idaho. Wm. Lively, president; D. A. McKenzie, vice-president

and manager; Jos. T. Whelan, secretary; John Jecklin, superintendent. Capitalization $100,000, shares 10 cents par. Lands, 4 claims, patented, area 80 acres, well timbered, on Stevens Peak, in the St. Joe district, opened by tunnels, longest a crosscut adit of 1,700', which, at 1,400', cuts a 25' vein of copper ore below commercial grade. The upper tunnel shows chalcopyrite assaying up to 33% copper, with good gold values, and small shipments have been made.

SPRINGFIELD-MEXICAN MINING CO. MEXICO.

Office: 213½ South Sixth St., Springfield, Ills. Mine office: Unión de Tula, Autlán, Jalisco, Mex. Geo. F. Stericker, president; Geo. M. Morgan, vice-president; Harvey C. McCann, secretary; Alfred Orendorff, treasurer; Gerald G. Hereford, superintendent; Arthur Hay, engineer. Organized June 3, 1903, under laws of Arizona, with capitalization $500,000, shares $1 par.

Lands, 25 hectares, 6 miles south of Ayutla, including the Concepción group, showing 3 veins, of 4' average width, with circa 1,000' of workings. The various properties of the company show fissure veins in porphyry, of 7' average width, carrying malachite, azurite, bornite and chalcopyrite, giving average assays of 7% copper and 12 oz. silver per ton. Has shafts of 220', 58', 86', 97', 100' and 175', and 8 tunnels, 2 longest 258' and 340', estimated to show 10,000 tons of ore blocked out for stoping. Property is an antigua, closed 1821, reopened 1903. Equipment includes a 30-h. p. steam plant and 6 mine buildings. Nearest railroad, 40 miles, is the Mexican Central. Presumably idle.

SPRING GULCH GOLD MINING CO. COLORADO.

Mine office: Idaho Springs, Clear Creek Co., Colo. J. B. MacFarlane, superintendent, at last accounts. Property is the Bauty group, carrying auriferous and cupriferous silver-lead ores. Has gasoline power. Idle.

SPRUCE MOUNTAIN COPPER CO. NEVADA.

Mine office: Sprucemont, Elko Co., Nev. Is said to employ 25 men. Lands, adjoining the Latham, show ore assaying up to 40% in copper tenor, and mine was producing some ore, August, 1908, through P. A. Cole, lessee. Production, 1907, returned as 1,338,198 lbs. fine copper.

STADTBERGER HÜTTE ACTIEN GESELLSCHAFT. GERMANY.

Office: Köln, Germany. Mine office: Nieder Marsberg, Westfalen, Germany. Otto Meurer, president; Anton Hamers, vice-president; Erich Meurer, mining engineer. Organized 1872, under laws of Germany, with capitalization 2,250,000 marks, shares 600 marks par. Paid dividends, to Dec. 31, 1907, of 112,500 marks.

Lands show fissure veins in argillaceous schist, carrying ore estimated to average 1.5% copper. The property, formerly operated by the Stadtberger Gewerkschaft, was discovered circa A. D. 800, and has been working, with few idle intervals, since A. D. 1150. Property includes 3 mines, the Mina, Friedcrike and Oscar, latter idle, all three opened by new deep shafts.

Equipment includes a 400-h. p. steam plant and a 60-h. p. water plant.

The reduction plant includes a concentrator, smelter and 1-ton electrolytic refinery, latter treating argentiferous cement copper. Ore is reduced mainly by wet process. Production has been as follows: 1,609,358 lbs. in 1905; 1,388,898 lbs. in 1906; 1,322,760 lbs. in 1907, latter secured from 42,000 metric tons of ore treated.

STANDARD CONSOLIDATED COPPER CO. ARIZONA.

Office: 43-52 Wall St., New York, N. Y. Mine office: Clifton, Graham Co., Ariz. John K. Erskine, Jr., president; M. Gould, secretary and treasurer; preceding officers, John F. Brooks, Geo. Frazer and Smith Lent, directors; Geo. H. Dudley, manager. Organized 1903, under laws of Maine, with capitalization $1,500,000, shares $10 par. Is a holding company, controlling various subsidiary corporations through stock ownership. Shareholdings include $292,515 of the capital stock of the Standard Copper Mines; $700,000, or 70% of the

capitalization, of the Clifton Copper Mines, Ltd., and 26,107 shares of the capital stock of the Coronado Mining Co., control of latter being held by Shannon Copper Co. The Standard Consolidated Copper Co. owns the Standard, San José, Copper Centre and Los Angeles mines.

Lands owned and controlled by the company are all more or less contiguous, lying on both sides of Chase Creek, for 1½ miles, on the line of the Coronado railroad, 5 to 6 miles north of Clifton, the Standard mine being in the centre, flanked by the Clifton and San José groups.

The Standard mine, 5 claims, area 99 acres, is developed mainly open-cast, with upwards of one mile of underground workings, on a vein of 2′ to 4′ width, carrying ores of 3 to 60% copper tenor, with an average smelter return of circa 20%.

The Coronado group of 7 claims, adjoining the Standard mine, is supposed to carry a continuation of the Standard ore body.

The San José group of 3 claims, patented, area 48 acres, lying west of the Standard group and south of the King mine of the Arizona Copper Co., Ltd., is about one mile east of Metcalf, showing a 4′ to 5′ vein of chalcocite, of high average assay tenor. This property, slightly developed, is a small producer.

The Copper Centre group of 8 claims, partly patented, has a 280′ shaft showing a 3′ vein of chalcocite, giving assays of 30 to 40% copper.

Los Angeles group, 4 claims, area 80 acres, about 2 miles from the San José group, and near Morenci, is developed by a 110′ shaft and a 225′ tunnel.

Buildings include an engine-house, smithy, office, laboratory, boarding-house, general store, stable and several buildings. Mine equipment includes a gasoline hoist.

The ore from the Standard mine is taken to the Coronado railroad by a 3,200′ Leschen aërial gravity tram, with drop of 800′, which transports ore at an average cost of circa 5 cents per ton, as against a previous charge of $2 per ton, when shipped by burros. The tram-line has shipping-bins at the lower terminal, on the railroad tracks.

Ore, formerly shipped to the Shannon, has gone to the Detroit smelter since 1906. Production has been as follows: 1,088,952 lbs. fine copper and 2,620 oz. fine silver, of which 31,853 lbs. copper came from the San José and 37,517 lbs. copper came from the Clifton mine, in 1905; 78,097 lbs. fine copper and 4,717 oz. silver in 1906; 497,286 lbs. fine copper in 1907.

The company, under former management, began dividends before such disbursements were warranted, and much trouble arose from quarrels among the directors, but apparently matters are harmonious again, and the property is considered meritorious.

STANDARD CONSOLIDATED MINES CO. **OREGON.**

Office: Sumpter, Ore. Mine office: John Day, Grant Co., Ore. D. M. Campbell, president; Edw. W. Mueller, secretary; C. B. Wade, treasurer; H. H. Nicholson, manager. Organized May, 1903, under laws of Arizona, with capitalization $5,000,000, shares $1 par.

Lands, 26 claims, area circa 500 acres, on both sides of Dixie Creek, in the Quartzburg district, showing auriferous ores of copper, nickel and cobalt. The mine is said to have about 2 miles of workings, and equipment includes a 50-ton concentrator. Some ore was shipped, 1906. Presumably idle.

STANDARD COPPER CO. **ARIZONA.**

Mine office: Casa Grande, Pinal Co., Ariz. Lands, 7 claims, 13 miles from Casa Grande. Idle several years and apparently moribund.

STANDARD COPPER CO. **UTAH.**

Dead. Changed name, 1906, to Bingham Standard Copper Co. Formerly at Bingham Canyon, Salt Lake Co., Utah.

STANDARD COPPER CO. OF ARIZONA. ARIZONA.

Office: 520 Chamber of Commerce, St. Louis, Mo. Location of lands, if any, unknown.

STANDARD COPPER MINES. ARIZONA.

Office: 52 Wall St., New York, N. Y. Mine office: Clifton, Graham Co., Ariz. John K. Erskine, Jr., president; M. Gould, secretary; G. H. Dudley, manager. Organized Feb. 21, 1901, under laws of Arizona, with capitalization $500,000, shares $1 par; issued, $425,000. Is controlled by the Standard Consolidated Copper Co., through ownership by latter of $292,515 of issued stock. Paid dividends, to end of 1905, of $69,500. Lands, 99 acres. Buildings include an engine-house, office, laboratory, smithy, boarding-house, stables, etc.

STANDARD COPPER MINES CO. ALASKA.

Office: 68 William St., New York, N. Y. Mine office: Landlock, Alaska. Employs circa 15 men. Morris B. Mead, president; John L. Steele, vice-president and engineer; E. F. Bourke, secretary; J. O. Molander, treasurer; Jas. A. Bourke, general manager; preceding officers, Thos. R. Manley and Chas. Williams, directors. Organized Feb. 2, 1906, under laws of New Jersey, with capitalization $300,000, shares $100 par; issued, $220,000. Bonds, $300,000 issued. Cash on hand, Sept. 17, 1908, was $30,000. Annual meeting, third Saturday in December.

Lands, 13 claims, area 260 acres, also a 14-acre millsite, in the Valdez district, showing greenstone, carrying 17 fissure veins, of which 4, under development, carry chalcopyrite, estimated to average 6% copper, 1 oz. silver and 90 cents gold per ton. Mine is opened by tunnels of 260′, 80′ and 460′, estimated to show 20,000 tons of ore, with 12,000 tons blocked out for stoping.

The mine is connected with 500-ton ore-bunkers on a wharf at tidewater by a 3,300′ aërial tram, in two sections, one of 912′ and one of 2,526′ length. Production, 1907, was circa 1,000 tons of 6% ore, yielding 120,000 lbs. fine copper. Company is operated as a close corporation, and seems developing along businesslike lines.

STANDARD COPPER MINING CO. MONTANA.

Office: care of A. M. Stevens, Higgins Block, Missoula, Mont. Organized 1907, under laws of Montana, with capitalization $1,000,000, shares $1 par.

STANDARD COPPER MINING CO. WASHINGTON.

Mine office: Bolster, Okanogan Co., Wash. J. W. McBride, Jas. Caughran, Patrick Welch, E. Garlinger and Fred N. Freer, directors. Lands are on Copper Mountain, in the Myers Creek district. Presumably idle.

STANDARD COPPER MINING CO. WYOMING.

Office: 1212 Nicholas Bldg., Toledo, Ohio. Mine office: Encampment, Carbon Co., Wyo. Geo. P. Waldorf, president; Alphonse Mennell, vice-president; Jos. M. Spencer, secretary and treasurer; Chas. E. Winter, managing director; preceding officers, Fred O. Paddock, Harvey M. Cook, John H. Lloyd, John D. Dorn and John A. Scott, directors; A. H. Oldman, mine superintendent. Organized August, 1903, under laws of Wyoming, with capitalization $1,500,000, shares $1 par.

Lands, 10 claims, including the Susquehanna group of 6 patented claims, area 120 acres, about one-half mile east of the Itmay mine, carrying sundry contact and fissure veins, of 10′ estimated average width, including a vein of 40′ claimed width, opened by 7 pits and shafts of 10′ to 207′ depth, showing azurite, malachite, chalcocite, bornite and chalcopyrite, giving assays up to 18% copper and $2 gold per ton, with small silver values. Has a 600′ hoist and 5 buildings. Idle since Dec. 16, 1905.

STANDARD COPPER MINING & REDUCTION CO. MONTANA.

Office: 109 East Broadway, Butte, Mont. Mine office: Divide, Silver Bow Co., Mont. John H. Lynch, president; C. W. Siglar, vice

ident; D. C. Campbell, secretary and treasurer; preceding officers, G. D. ridge, C. J. Fellows, F. C. Geiger and C. Woltjen, directors. Organized , under laws of District of Columbia, with capitalization $1,000,000, shares ar. Lands, 5 claims, in the Fleecer Mountain district, circa 25 miles south of Butte and 5 miles from Divide, with a good wagon road to latter point. erty has 2 shallow shafts, showing ores giving good assay values in copper. several years and apparently moribund.

NDARD COPPER PYRITES CO. **ALABAMA.**

Office: 1309 Brown-Marx Bldg., Birmingham, Ala. Mine office: Pyriton, Co., Ala. Robt. Ross Zell, president; J. C. Clark, vice-president; G. John- treasurer; J. D. Stagg, secretary. Capitalization, $50,000. Lands show a ore body, giving assays up to 6% copper and carrying 42 to 46% sulphur. probable that copper values will decrease at slight depth, but property d prove valuable for its sulphur ores alone.

NDARD DEVELOPMENT CO. **COLORADO & CALIFORNIA.**

Office: 52-240 La Salle St., Chicago, Ills. W. A. McGuire, president; C. N. n, vice-president; R. J. Jennings, second vice-president; J. Jennings, gen- manager; E. C. Boisot, secretary and treasurer. Capitalization $10,000,000, s $1 par. Supposedly controls, throug stock ownership, Grand Re- Mining Co. and Mount Zirkel Mining Co., of Larimer county, Colorado, apparently are moribund. Is said also to own the Jennie "group," of res, on the McCloud river, in Shasta county, California. Company ap- tly is merely a stock-jobbing enterprise.

NDARD GOLD & COPPER MINING CO. **OREGON.**

lead. Absorbed, 1903, by Standard Consolidated Mines Co. Formerly at Day, Grant Co., Ore.

NDARD MAGDALENA MINES CO. **MEXICO.**

ffice: Los Angeles, Cal. Mine office: Nogales, Magdalena, Sonora, Mex. 107′ shaft.

NDARD MINES CO. **CALIFORNIA.**

ffice: 318 Grant Bldg., Los Angeles, Cal. Mine office: Cima, San Ber- o Co., Cal. John W. Kemp, president; Frank S. Adams, secretary; pre- officers and R. R. Patterson, directors. Lands, 11 full and several frac- claims, 10 miles north of Cima, having a 356′ shaft, with circa 2,000′ of ngs, showing carbonate ores near surface, with melaconite and sulphide ores on the 100′ level. Shipped, 1906, to Salt Lake smelter, 81 carloads, ing an average of circa 10% copper, 5 oz. silver and $2 gold per ton. ction, 1906, estimated at 250,000 lbs. Property considered promising.

NDARD MINING CO. **IDAHO.**

ine office: Silver City, Owyhee Co., Idaho. F. M. Clemens, superintend- Has lead and copper ores, presumably argentiferous, with steam power, ying circa 20 men, at last accounts.

NDARD PYRITIC SMELTING CO., LTD. **BRITISH COLUMBIA.**

ead. Formerly at Greenwood, Boundary district, B. C.

LEY BUTTE CONSOLIDATED COPPER CO. **ARIZONA.**

ffice: 601-17 St[illegible]., New York, N. Y. Mine office: San Carlos, Gila riz. Jas. E. Carpenter, general manager; Harry Pryor, superintendent. , 60 claims, held under bond and lease, having a 125′ tunnel. Presumably

LEY MINES CO. **COLORADO.**

ice: 305 Colorado Bldg., Denver, Colo. Mine office: Idaho Springs, Creek Co., Colo. Arthur G. Brownlee, president and general manager; M. Jackson, superintendent. Organized, circa 1906, as successor of the lidated Stanley Mining & Milling Co. Lands, circa 90 claims, showing

auriferous and argentiferous lead and copper ores. Has steam and water power and 10-stamp mill, employing about 40 men, at last accounts.

STAR CONSOLIDATED MINING CO. UTAH.

Dead. Merged, 1907, in Black Jack Consolidated Mining Co. Formerly at Park City, Summit Co., Utah.

STAR COPPER MINING CO. MICHIGAN.

Office: care of John C. Watson, 68 Devonshire St., Boston, Mass. P. H. Raymond, president; C. O. Burbank, secretary and treasurer. Lands, circa 760 acres, in Sections 9, 10 and 16, Town 58 North, Range 28 West, Keweenaw county, Michigan. Has 2 shafts, deepest 300', on a fissure vein, south of the greenstone, sunk 1851-1857, when company expended circa $70,000. Idle since 1857.

STARLUS COPPER & GOLD MINING CO.

Dead. Formerly had an office at 215 Dearborn St., Chicago, Ills.

STATE COMMERCIAL DEVELOPMENT CO. MONTANA.

Letter returned unclaimed from former office and mine, Butte, Silver Bow Co., Mont. J. E. Wharton, president. Lands are claims north of Butte. Idle and apparently moribund.

STATE LINE COPPER MINING CO. WYOMING.

Dead. Reorganized, circa 1904, as State Line Mining Co. Formerly at Encampment, Carbon Co., Wyo. Described Vol. IV.

STATE LINE MINING CO. WYOMING.

Office: 300 Century Bldg., Denver, Colo. Mine office: Encampment, Carbon Co., Wyo. D. W. Aupperle, president; Hon. S. M. Elwood, vice-president; W. W. Wemott, secretary and treasurer. Organized, circa 1904, with capitalization $1,500,000, shares $1 par, as a reconstruction of the State Line Copper Mining Co. Lands, 17 claims, area 340 acres, near the Colorado line, showing a 3' vein of ore, giving assays of 21% copper, from 17 pits and shallow shafts of 10' to 60' depth. Company started a crosscut tunnel and apparently is in controversy with an adjoining company, over titles. Idle.

STAUFFER CHEMICAL CO. CALIFORNIA.

Office: San Francisco, Cal. Mine offices: Kennett, Shasta Co., Cal., and Oakland, Alameda Co., Cal. Chas. E. Kunze, manager; Geo. F. Graves, superintendent. Oakland property, 80 acres, known as the Alma mine, developed mainly by tunnels, produces cupriferous pyrite, carrying 1.5 to 3.5% copper, up to 50% sulphur, and up to $2.50 gold per ton, occurring in lenses between serpentine and metamorphosed chert, in a belt traced 3,000'. The Shasta county property is the Summit group, lying northwest of the Mammoth, in the Backbone district, taken over, 1908, under bond and lease, from the Phœnix Security Co.

STEAMBOAT MINING CO. UTAH.

Mine office: Brighton, Salt Lake Co., Utah. Idle several years.

STEAMBOAT MINING & MILLING CO. COLORADO.

Mine office: Steamboat Springs, Routt Co., Colo. Lands, in the Copper Ridge district, show a 30' vein, carrying a narrow paystreak of high grade copper ore.

STEMP SPRINGS COAL & POWER CO. WYOMING.

Office: 55 High St., Oshkosh, Wis. Works office: Copperton, Carbon Co., Wyo. Employs 35 men. E. E. Mellens, president; Henry L. Larsen, vice-president; H. O. Granberg, secretary, treasurer and general manager; preceding officers, M. Brinton and J. S. Armstrong, directors; E. M. Sanders, superintendent; J. H. Glazier, mine superintendent; O. C. Finkelnburg, engineer. Organized Nov. 21, 1905, under laws of Wyoming, with capitalization $250,000, shares $1 par. Company reported, September, 1908, having $20,000 cash on hand, with no liabilities.

Lands, 762 acres, patented, being 640 acres of coal lands and 122 acres of r lands, latter including a smelter site, in the Battle Lake district. Cop- roperty shows fissure veins in schist and contact deposits between diorite quartzite, of which one, of 11′ estimated average width, traceable circa ', carries copper-nickel sulphides, opened by a 155′ shaft and a 273′ tunnel. coal lands carry 3 beds of coal, of 3′ to 6′ thickness, at intervals of circa A 15′ waterfall is leased, for 20 years, from the Jackpot Mining Co., privilege of renewal. Equipment includes a 40-h. p. steam plant at the , with a 3-drill Ingersoll-Sergeant air-compressor. Buildings include a 0′ log machine and carpenter shop and a 16x24′ smithy.

The smelter, 20 miles from a railroad, has a 60-ton McDonald furnace, ned to turn out 50% matte, or pimple metal of about 80% copper tenor. smelter has a 100-h. p. steam plant. Company plans continuous develop- and blowing in the smelter.

MWINDER MINE. **BRITISH COLUMBIA.**

Owned by Dominion Copper Co., Ltd.

PHENSON-BENNETT CONSOLIDATED MINING CO. **NEW MEXICO.**

Office: 515 Keith & Perry Bldg., Kansas City, Mo. Mine office: Organ, a Ana Co., N. M. J. I. McCullough, president and general manager; C. B. vice-president; S. Lehman, secretary; F. M. Johnson, treasurer; preceding rs, G. A. Chapin, T. S. Semple and H. B. Holt, directors; Hugh Yale, mine nan. Organized 1889, under laws of New Mexico, and capitalization since ased to $2,000,000, shares $1 par.

Lands, 17 claims, 2 miles south of Organ, in the Organ Mountains, 15 miles the Santa Fé railway, showing granite and limestone carrying silver veins, ore bodies with strong copper indications, developed by a 350′ two com- nent shaft, and a 2,000′ drainage tunnel. The lower level of the shaft is to show an ore body of 5′ to 40′ width, with a 500′ chute carrying argentif- s and auriferous copper ore.

Equipment includes a steam plant, with 3 boilers, 2 hoists good for 500′ , and a 10-drill Ingersoll-Rand air-compressor.

Buildings include a smithy, engine-house, compressor-house, warehouse, ging-house, boarding-house, office, store and 17 dwellings.

The concentrator, of 50 tons daily capacity, built of wood, has 2 jaw crush- 2 jigs and 4 Wilfley tables.

PHENS PEAL COPPER & GOLD MINING CO., LTD. **IDAHO.**

Mine office: Wallace, Shoshone Co., Idaho.

PTOE LEAD & COPPER CO. **NEVADA.**

Office: care of Wm. H. Tibbals, secretary, Salt Lake City, Utah. Letter rned unclaimed from former mine office, Ely, White Pine Co., Nev. A. J. s, president; J. J. Whittaker, vice-president; H. P. Clark, treasurer; pre- g officers and M. C. McEntire, directors. Organized 1907, under laws of na, with capitalization $1,000,000, shares $1 par. Lands, 4 claims, in the Creek district, northwest of Ely and about 2 miles from the Steptoe er.

PTOE MINING CO. **NEVADA.**

Dead. Property sold, Sept. 4, 1902, to New York & Nevada Copper Co. rly at Ely, White Pine Co., Nev.

PTOE VALLEY MINING & SMELTING CO. **NEVADA.**

Office: 165 Broadway, New York, N. Y. Works office: McGill, White Co., Nev. Silas W. Eccles, vice-president and manager; Thos. Cox, gen- superintendent. Organized circa January, 1907, under laws of Maine, with alization $10,000,000. Is controlled, through joint ownership of shares, vada Consolidated Copper Co. and Cumberland-Ely Copper Co., which are olled by American Smelters Securities Co., which is controlled by Ameri-

can Smelting & Refining Co. Lands and improvements cost $4,115,821.62, end of 1907, and the completed plant is estimated as likely to cost approximately $10,000,000.

Lands are 8 square miles, with water rights pertaining thereto, the company, with great foresight, having secured a large area, in order to prevent damage suits from agriculturists, because of smelter fumes. The lands are on the eastern side of Steptoe Valley, on the slope at the foot of the Schell Creek range, 14 miles northeast of Ely and 22 miles from the mines, on the line of the Nevada Northern railway. The smelter site is 320 acres, in a parallelogram one mile long and one-half mile wide, on a hillside having a grade of about 10%, permitting terracing of the works and handling material by gravity throughout. Lands carry water rights to Duck Creek, on the eastern slope of the hill, also water rights to the McGill ranch, estimated as capable, jointly, of furnishing water for a 25,000-ton plant.

The reduction plant has all main buildings of steel frame, and is excellently planned and equipped. At the end of 1908 the plant was of 4,500 tons daily capacity, but is so designed that it can be increased to an ultimate daily capacity of 20,000 tons.

The ore-bins, of timber, about 300' in length, are in three 6,000-ton units, located about one mile from the smelter. Ore is drawn from the bottom of the bins by belt-conveyors, which take it to small distributing bins, at the head of each section of the mill.

The sampling mill, at the southern end of the yard, has a gyratory crusher, Blake crusher, 1 pair of rolls, 3 Vezin samplers, 1 trommel and 2 conveyors.

The mill, nearly one mile from the smelter, is of steel, 338x567' in size, in terraces, supported by beams of reinforced concrete. The mill is planned to have, eventually, 10 units, first rated at 1,250 tons daily capacity each, and later planned to be of 1,333 tons daily capacity each, but which actually will have an average capacity of nearly or quite 1,500 tons each, giving the mill an ultimate capacity of circa 15,000 tons daily. Three of the 10 units were completed, and in use, at the end of 1908, each being subdivided into a right-hand and left-hand section, each section being 94' 6" wide and 338' 5" long, not including the bins, giving a floor area of about 43 square feet per ton of daily ore capacity. The sections are duplicates and each can be operated independently.

The following description of one section will serve as a description of every section: From the distributing bin ore passes to a trommel having ½" apertures, oversize going to 15x36" rolls and undersize to a ⅝" trommel, the rolls delivering crushed ore to an elevator, which returns the product to the screening system. Ore from the second trommel passes to a second set of 14x36" rolls, which deliver the product to an elevator, while undersize goes direct to an elevator discharging into a trommel of ⅝" size, from which oversize goes back to the second set of rolls, thence returning with the regular flow of material, undersize going to 2-mm. trommels, and oversize to a third set of 14x36" rolls, which deliver their product to an elevator, in the same manner as the second set of rolls. After crushing, the 2-mm. product goes to 8 Richards vortex classifiers, giving coarse and fine products, from 2 spigots, the coarse concentrates being treated by 5 jigs, which make finished concentrates and a hutch-product that is treated on 7 Wilfley tables, which make finished concentrates, and tailings that go to Huntington mills for regrinding. The fine concentrates of the Richards classifiers go to 10 Wilfley tables making finished concentrates, middlings and tailings, the middlings, together with those from the Wilfleys treating coarse concentrates, and the tailings from the jigs, being combined and taken to 3 Callow settling tanks, from which thickened pulp is reground in four 6' Huntington mills, crushing to 60-mesh size. The 60-mesh

m the Huntington mills is elevated to the screening floor, where it verflow from the Richards classifiers, going to a dewatering tank, to five 24" Callow 60-mesh screens, oversize going back to Hunting- or regrinding, and being returned thence to screen, undersize, to- h the overflow from the dewatering tanks, going to a set of 5 The spigot product of the V-boxes goes to 19 Wilfley tables, and the 10 Callow settling tanks, thickened pulp from which is fed to 20 les, the Wilfleys treating the spigot and overflow products, making ncentrates, tailings and middlings, latter retreated, those of the of tables going to 8 Callow tanks, on the vanner floor, giving a pulp eight 6x16′ Frue vanners making concentrates, concentrates from set of Wilfleys going to 8 Callow tanks, thickened product from reated by a second set of eight 6x16′ Frue vanners. Overflow from Wilfley settling tanks, together with that from the first and second ks, goes to a series of 8 tanks for final settlement, these tanks giving which passes to a third set of eight 6x16′ Frue vanners. Concen- n the Wilfley tables and vanners go to 2 tanks, 28′ in diameter and ter draining until tanks are filled. Beneath the tanks are railroad l concentrates are discharged into cars, the tanks being filled and ernately. Concentrates are handled throughout the mill by sluicing unders, and are collected in tanks, and removed therefrom by Blais- tors. Overflow from the mill goes to slum-ponds for settling.

e treated by the mill is friable, hence liable to make an unduly large of slimes, but sliming is obviated, to a considerable extent, by very eening and crushing to 2-mm. size before any jigging is attempted. la Consolidated ores carry an excess of silica, and the Cumberland- carry an excess of iron, giving, in combination, a good furnace he mill was said, July, 1908, to be concentrating Nevada Consoli- about 10 into 1, and Cumberland-Ely ores about 4 into 1, effecting saving of 70% of assay values, raw ores assaying about 2 to 2.5% m the Nevada Consolidated, and 2.5 to 3% from the Cumberland-Ely. alcining department, 228′ in length, of steel frame, has sixteen 18′ roasters, of about 40 tons daily capacity each, which reduce the nor of the ore to about 7.5%. Limestone flux is added to the ores sting, and hot calcines are trammed directly to a reverberatory r, when necessary, to a 1,500-ton brick and steel storage-bin, which a balance-wheel between the calcining and smelting departments. ugall roasters discharge fumes into a double flue, each part of 300 t cross-section and 500′ in length, leading to a brick stack 250′ high, ide diameter.

melter, of about 1,000 tons daily capacity, had 2 units completed and aring completion, with work begun on a fourth, at the end of 1908. er was designed by Walter G. Perkins and constructed under his n. Each group of furnaces has independent flues and chimneys. ne 42x240" blast-furnace, for resmelting converter slags and a small f raw ore, so planned that it can be enlarged, if desired, to 4x80′ in blast-furnace is 13′ above the ground-level, with a height of 16′ from s to the charging floor, operating with a 10′ column charge and 24 blast pressure. The furnace has separate water-jackets with 4 ch with its own blast-box and independent air and water connec- hat any jacket may be removed by breaking three simple connec- arging is done by cars dumped pneumatically, as at the Washoe l matte is tapped into ladles, on cars, for conveyance to the con- artment, slag being granulated and sluiced away.

urnace building has two 19x111′ reverberatory furnaces, with room

for a third, these being of about 250 tons daily capacity each. The reverberatories have 8x19′ grates, and ashes are sluiced to a cinder plant, for recovery of partly burned carbonaceous fuel, similar to that of the Washoe works. Each reverberatory has two 400-h. p. boilers, arranged in parallel, with suitable by-passes, instead of tandem, and each furnace has two charge-hoppers, each with 3 holes, for ore, and one charge-hopper with 4 holes for coal. The reverberatories have a flue of 300 square feet section, 200′ long, doubling back through a dust-chamber of 1,000 square feet section, 200′ in length, leading to a 300′ brick chimney, 15′ in diameter.

The converter building, 120x170′ in size, has 3 stands, operated electrically, with 96x115″ shells, of barrel type, of about 8 tons capacity each. Molten matte from the reverberatories is brought to the converter department in ladles, on cars running on a track behind and above the converters, which are charged through a chute, while the shells remain in position for blast, and silicious ores are charged into shells on the same plan as molten matte. The hoods from the converters lead to a flue of 100′ square section, 200′ in length, running to a 100′ stack of 10′ inside diameter. Blister copper is poured into a conveyor casting machine, which takes the pigs through a cooling tank, and delivers them to a loading platform, above which are air-hoists on a monorail system, for handling the pigs. Converter product is blister copper averaging 99.2% in tenor. Slag is poured into a casting machine, and bricks delivered to a bin, whence taken to the blast-furnace for resmelting, and slag skulls are broken in a 12x24″ Blake crusher, before going to the blast-furnace slag-bin.

The power-house, 136x320′ in size, has eight 400-h. p. Babcock & Wilcox boilers, with American automatic stokers. Equipment includes two 750-kw. and two 1,000-kw. Bullock generators, developing a 600-volt alternating current, used in the works, but stepped up for transmission to the mines. Blowing engines include an Allis-Chalmers 6,000′ blower and a No. 10 Connersville 12,000′ cross-compound blower, both direct-connected to compound condensing Corliss engines. A Laidlaw-Dunn-Gordon air-compressor, of 1,000 cubic feet capacity, furnishes converter blast.

The works have about 12 miles of standard-gauge railroad track, and ore and material are transported by small steam locomotives.

Miscellaneous buildings at the smelter include a 75x160′ car-shop, doing general repairing for the Nevada Northern railway; a machine-shop of steel frame and concrete blocks, a carpenter-shop and warehouse. The administration buildings are arranged in a semicircle facing west, with the general office in the center, supported by a large assay office and laboratory, and flanked by the mess-house and dwellings for heads of departments, the arrangement being pleasing to the eye, as well as eminently utilitarian.

The works were started, on a test run, April, 1908, and the first shipment of finished copper was made in August, in which month production was 1,371,261 lbs. fine copper. For November, 1908, production was 2,963,000 lbs. fine copper, of which the Nevada Consolidated made 1,491,000 lbs. and the Cumberland-Ely 1,372,000 lbs., the Nevada Consolidated ore yielding a net extraction of about 36 lbs. fine copper per ton, and the Cumberland-Ely ores 48 lbs. per ton. The Steptoe works are among the largest and most complete in the world, and are well designed, well equipped and well managed.

STERLING COPPER CO. ARIZONA.

Dead. Formerly at Clifton, Graham Co., Ariz.

STEUBENVILLE & JALISCO MINING CO. MEXICO.

Office: Steubenville, Ohio. Letter returned unclaimed from former post office, Hostotipaquillo, Ahualulco, Jalisco, Mex. Organized 1906, with capitalization $1,000,000. Idle and apparently moribund.

STORA KOPPARBERG BERSLAGS AKTIEBOLAG. SWEDEN.

Office, mines and works: Falun, Kopparberg's län, Sweden. E. J. Ljungberg, director; Lars Yngström, assistant director and general manager; Th. witt, mining engineer; K. A. Akerblom, superintendent leaching plant. Capitalization 9,600,000 kroner, shares 1,000 kroner par. Net earnings, 1907, were 2,377,987 kroner.

Lands, 5 claims, 3 patented and 2 unpatented, area 43 hectares. Mine was worked as early as A. D. 1288, and presumably earlier, oldest privileges of the present company dating from Feb. 24, 1347.

Lands include several mines and many ore bodies, largest being the Storgrufa, 370 meters long by 220 meters wide, and about 320 meters deep, mostly mined out, leaving an open pit circa 220' deep. Ore is chalcopyrite, containing selenium and bismuth, giving average returns of 2.7 to 3% copper, 10 to 15 grams silver and 2.5 to 3 grams gold per ton. Has 14 shafts, with aggregate depth of 1,800 meters, deepest being 343 meters, with about 33 kilometers of tunnels. The copper mine employs about 100 men, and gives a yearly production of about 45,000 tons of ore, which, after hand-cobbing, yields about 15,000 tons of leaching ore.

The roast stalls are one-half kilometer from the mine, and the leaching plant is one-half kilometer beyond the furnaces, all connected by tram-line. The roasted ore is crushed with salt, reroasted and leached with dilute sulphuric acid, in tanks, metallic contents of the leach-water being precipitated on scrap-iron, as cement copper, which is dissolved in sulphuric acid and turned out as bluestone. Yearly production averages circa 300 kgs. silver, 80 kgs. gold and 1,250 metric tons bluestone, equivalent to 300 tons fine copper. Company conducts extensive industrial operations, owning and operating iron and steel plants, a pulp-mill, paper-mill, sawmill, etc., and is developing an extensive water-power on the Dala river. Is one of the best managed and most successful industrial enterprises of Sweden.

STORRGRUFA MINE. SWEDEN.

Owned by Stora Kopparberg Berslags Aktiebolag.

STRATTON GOLD & COPPER MINING & MILLING CO. COLORADO.

Office: Salida, Colo. Mine office: Turret, Chaffee Co., Colo. R. F. Stratton, president; F. S. Green, vice-president; Dr. J. F. Roe, secretary; Ove Sullivan, treasurer. Organized 1905, under laws of Colorado, with capitalization $500,000, shares $1 par. Lands, 16 claims, in 2 groups, the Stratton group of 11 claims, area 220 acres, being in the Badger Creek district of Fremont county, and the Copperopolis group of 5 claims being near Turret. The Stratton group has a 1,400' crosscut tunnel, with back of 900', showing ore assaying up to 46% copper. The Copperopolis group is said to have a 600' shaft, showing an 8' vein giving ore assaying well in copper. Company said to plan a leaching plant.

ICKLEY-MONTEZUMA MINING CO. **UTAH.**

Office: Spokane, Wash. Mine office: Deadwood, Boundary district, B Jas. Schiewe, president; preceding officer, J. D. Whitels, A. S. Eldet, W. Reeder and W. O. Lewis, directors. Organized April, 1907, under laws Washington, with capitalization $250,000. Lands, one-half mile from the Sun mine of the Dominion Copper Co., have 2 shafts, one, of 60′, being said to hav good showing of low grade copper ore. Has electric power. Property con ered promising.

SUERTE MINING CO., S. A. MEXI

Mine office: La Cananea, Arizpe, Sonora, Mex. Harry Lane, preside John F. Evans, vice-president; W. R. Peters, secretary; Louis Lease, treasu and general manager. Organized 1908, under laws of Mexico. Lands, 60 h tares, in the Sierra Santa Cruz, west of La Cananea. Began development o September, 1908, by shaft.

SUGAR LOAF MINING CO. SOUTH DAKO

Dead. Formerly at Custer, Custer Co., S. D. Described Vol. VII.

SULITELMA AKTIEBOLAG. NORWA

Office and works: Helsingborg, Malmöhus Län, Sweden. Mine off Sulitjelma, Nordland, Tromsö, Norway. Employs circa 2,000 men. Lord-Lieut. Tornerhjelm, president; Consul Nils Persson, vice-president and general m ager; Sture Person Henning, assistant general manager; Vice-Consul C. Ing son, secretary; preceding officers, Aug. Sylvan, Thure Röing, R. M. B. Sch berg, C. E. Hedström, Hon. Albert Berg von Linde, Prof. Hjalmar Sjögren a Ivar Person Henning, directors; Holm Holmsen, general manager; Fr. Carls mine superintendent; P. Kjölseth, mill superintendent; J. Westlake, smel superintendent; L. D. Jenssen, engineer.

Organized 1890, under laws of Sweden, with capitalization 3,000,0 kroner, increased, 1906, to 6,000,000 kroner, and again increased, 1908, 8,000,000 kroner, shares 500 kroner par. Paid an 8% dividend, 1905, amounti to 240,000 kroner, and paid total dividends, to end of 1905, of 1,800,000 krone Annual meeting, in May.

Lands, 253 claims, area 55 acres, also a 1¼-acre millsite, and 193 squa miles miscellaneous lands, more or less extensively mineralized, in the Fros district of Nordland, mainly in the Skjerstad division of Nordland, Troms Lands include the Sulitjelma, Carlotta, Geken and Altens groups of mine The Sulitjelma, discovered 1875 and opened 1887, which has become the pri cipal copper mine of Norway, shows mica-schist of lower Silurian age, wit eruptive flows of greenstone conformable with the schists. Ore bodies occu as extended lenses, very persistent in strike and depth, on the contact o schists with metamorphosed amphibolite and olivine gabbro, lenses having generally east and west strike, with dip of 10° to 45° with the horizon. There are 18 known ore bodies, of which 15, under development, range 15′ to 20′ i width, traceable 450′ to 2,200′, deepest proven to depth of 2,300′, carrying exclusively cupriferous iron pyrites, averaging 3% copper, 45% sulphur and 0.5 oz. silver per metric ton.

Development is mainly by tunnel, there being one shaft of 280′ depth and 9 tunnels, the names and number of feet of workings of the latter, at end of 1905, being as follows: Ny-Sulitelma, 8,940′; Hanka Bakken, 1,040′; Gåse 15,800′; Carlotta, 11,100′; Måns-Petter, 2,450′; Bursi, 700′; Koch, 2,740′; Torne hjelm, 3,000′; No. Nine, 2,160′. The mine has total openings of about 1

s, showing 2,502,000 metric tons of ore, with 953,000 tons blocked out for ing, in 1906. Electric underground haulage is used exclusively, with 2 meters of track in the mines.

Ores, as mined, are divided into two classes, the first or smelting grade ying 4 to 8% copper, while the second or export grade carries 1.5 to 4% er and an average of 45% sulphur, the average tenor of all ores mined g about 3% in copper and 45% in sulphur. Of the sulphur ore exported, t half is fines and half lumps, sent to Helsingborg, Riga, Antwerp, Ghent various ports in Great Britain.

Equipment includes a 970-h. p. water power plant, 1,220-h. p. electric t, 780-h. p. air plant and 10-h. p. gasoline plant, with 400 h. p. developed at nine, 390 h. p. at the mill and 560 h. p. at the smelter. Equipment includes oists and one Ingersoll-Sergeant, one Burchard and 3 Schramm air-com- ors, with an aggregate capacity of 28 drills. There are 25 air-drills and Temple electric air-drill.

Mine buildings are of wood, the machine-shop having an area of 1,290 re feet, carpenter-shop 1,291 square feet, and smithy 1,722 square feet. e are 2 sawmills, a general store, school, church and Good Templars' lodge, a large number of dwellings, the company owning a total of 320 buildings. There is an extensive system of aërial tramways, with 15 stations and 2 r stations, the tram system including a 4-mile line to the Jakobesbakken , which is to be operated more extensively in the future.

The concentrator, of wood, area 37,950 sq. ft., is equipped with 8 Blake hers, a 15' Krupp Grusonwerk centrifugal crusher, 9 rolls, 91 Hartz jigs, ührig and Ferrari concentrators and 24 vanners. There also is a 1,000-ton ore vacuum oil concentration plant, with 12 units, in a separate mill of 00 sq. ft. area.

The smelter, at Fagerlid, 2 to 5 miles from the various mines, receiving therefrom by aërial trams, has a daily capacity of 160 tons. Equipment ades a 50-ton water-jacket blast-furnace, one reverberatory furnace, two on pyritic smelting converters of the Knudsen type, and one converter d, with 10 shells of the Manhes type, taking 7.5 metric ton charges. First- on product is a matte of 30 to 40% copper tenor, and final product is ter copper assaying 99.2% in tenor, sent, for refining, to the Helsingborg parverks Aktiebolog, at Helsingborg, Sweden, where there is a leaching t, in connection with the works. Ores smelted average 6 to 8% copper, o 34% sulphur, 34 to 36% iron and 2 to 4.5% alumina, with traces of lime magnesia. The smelter uses for conversion the Knudsen discontinuous tic process, which largely utilizes the calorific value of the sulphur, and ils small coal consumption, giving very satisfactory results. By reason nprovements made, 1907, the loss of copper in smelting amounts to about only, slags being said to run only 0.2 to 0.3% copper, as against a loss of t 15% formerly, and conversion costs are said to be under $1 per ic ton.

Miscellaneous enterprises of the Sulitelma include 7 steamers, 2 tugs, 40 es and a 13-kilometer private railway system, known as the Sulitjelma- n, of 750 mm. gauge, equipped with 3 locomotives and 120 freight cars.

Fuel consumption and costs were as follows, in 1907: 3,600 cords of wood e mine and 260 cords at the smelter, costing 10.5 kr. per cord; 1,500 metric coke at the smelter, costing 31 kr. per ton; 690 tons coke and 6,620 tons coal, costing 18 kr. per ton; 7,400 gallons petroleum.

Production has been as follows: 605 metric tons fine copper and 90,000 cupriferous pyrites, exported to sulphur burners, carrying 2,442 metric fine copper, in 1904; 447 tons fine copper from 10,479 tons ore smelted and er exported in pyrites giving a total output of 6,225,856 lbs. fine copper

in 1905; 589 metric tons fine copper and circa 2,800 tons copper contained in pyrites exported, in 1906; 1,384,486 lbs. fine copper, secured from circa 1,900 tons of ore smelted, and 102,000 metric tons cupriferous pyrites exported, averaging 3% copper, giving gross production of 8,140,562 lbs. fine copper, in 1907. During 1907 the Knafjord mines, in Alten, produced 4,150 tons cupriferous pyrites, yielding circa 1,050 tons of concentrates, shipped to the Sulitelma for smelting. The management is progressive, and the Sulitelma has by no means reached the limits of its productive capacity, though already much the largest copper producer of Norway, and one of the leading copper mines of Europe, while giving every prospect of increased production for the future.

SULTANA-ARIZONA COPPER CO. ARIZONA.

Office: 1356 First National Bank Bldg., Chicago, Ills. Mine office: Kelvin, Pinal Co., Ariz. John B. Mecham, president and general manager; Dr. H. W. Pierson, vice-president; C. H. Seamans, secretary and treasurer; preceding officers, W. Esty Curtis, L. G. Bronson, J. W. Nye and John D. Riley, directors; Jerry T. Harrington, resident manager and superintendent; H. C. Erman, consulting engineer. Organized June 5, 1906, under laws of Arizona, with capitalization $2,500,000, shares $1 par, apparently as a reconstruction of the National Mining & Development Co. Annual meeting, first Tuesday after first Monday in June.

Lands, 19 claims, 1 patented, area 380 acres, also three 15-acre millsites. Company also reports holdings of 30 acres of gold and silver lands, in the Ures district of Sonora, Mexico.

The Arizona lands, said to have been bought for $120,000, are in the Riverside district, across the Gila river from Kelvin, including the Riverside and Bryan groups. Property is said to show 7 different veins, which management says probably will unite at depth, of which 5 veins have been more or less developed. Property also is said by company to have 12 copper veins and 4 silver veins. The 5 veins under development are said to be 18" to 6' wide, and are estimated to average 4' 6" width, with a generally NW. and SE. trend, showing the usual oxidized ores above, with sulphide ore, mainly chalcopyrite, in the lower workings. Property is said to show a 4' vein, averaging 15% copper, in the upper levels, and a 6' vein, in the lower levels, carrying chalcopyrite, from which shipments to the Humboldt smelter have returned 8.7 to 10.6% copper. Average tenor of ore of all veins is estimated by company at 10% copper and 4 oz. silver per ton, which is too high.

Development is by 5 shafts, of 40' to 300' depth, and by 7 tunnels, of 30' to 264' length, with various open-cuts, giving a total of circa 3,500' of workings, of which about 1,000' were made during latter half of 1907. Company estimates 40,000 tons of ore in sight, with 30,000 tons blocked out for stoping, and there are several thousand tons of low grade ore, of fair copper tenor, on the dumps.

Equipment includes a steam plant with one hoist, and it is planned running a 1-mile aërial tram across the Gila river, to the railway station at Kelvin. Company plans a concentrator, of 200 to 300 tons daily capacity.

Company was said, October, 1907, to have settled its indebtedness, preparatory to resumption, and, early 1908, was making small but regular shipments of ore, of 12 to 20% copper tenor, to El Paso smelter. Some ore was shipped before property was owned by present company.

SULLIVAN-ARIZONA COPPER CO. ARIZONA.

Letter returned from former office, Joliet, Ills. Mine office: Kelvin, Pinal Co., Ariz. John B. Mecham, president; Chas. W. Seaman, secretary and treasurer. Organized circa March, 1907, with capitalization $2,000,000, shares $1 par. Possibly succeeded by Sultana-Arizona Copper Co.

SULLIVAN COPPER DEVELOPMENT CO. ARIZONA.

Office: Duluth, Minn. Mine office: Paradise, Cochise Co., Ariz. Geo

rosby, manager. Lands are claims adjoining the holdings of the Manhattan velopment Co., in the Chiricahua Mountains. Idle.

LLIVAN GOLD & COPPER MINING CO. **MONTANA.**

Mine office: Kalispell, Flathead Co., Mont. Idle some years.

LPHIDE COPPER CO. **COLORADO.**

Office: P. O. Box 358, Denver, Colo. Mine office: Crested Butte, Gunni- Co., Colo. J. C. Lewis, president; Frank Jerome, vice-president; Geo. S. n, secretary; Geo. N. Wheeler, treasurer; Horace Miller, manager. Lands, he Rock Creek district, have 75′ and 170′ tunnels, in argentiferous copper Idle some years.

PHIDE MOUNTAIN MINING & MILLING CO. **WASHINGTON.**

Office: care of Hon. E. C. Trimble, Seattle, Wash. Mine office: Orient, y Co., Wash. Lands include the Pomeroy mine, on Sulphide Mountain, iles northeast of Orient, in the Colville reserve, opened by sundry open-cuts a 200′ shaft, showing ore giving good assay values in copper, lead, silver gold. Idle.

IAS MINING CO. **WASHINGTON.**

Mine office: Sumas, Whatcom Co., Wash. W. W. Jones, president; Mrs. Record, secretary. Lands, near the head of Swamp Creek, show auriferous er ores. Idle several years.

MITOMO COPPER CO. **JAPAN.**

Office: Kitahama, Higashiku, Osaka, Japan. Mine office: Niihama, Iyo, oku, Japan. Works office: Shisakajima-Oshigun, Iyo, Shikoku, Japan. Suzuki, director-in-chief; T. Shidachi and Kinkichi Nakata, directors; R. io, chief auditor; K. Yukawa, manager; Munio Kubo, vice-manager; sumoto, sub-manager; S. Maki, sub-manager and mine superintendent; T. io, superintendent; Keijiro Nakamura, smelter superintendent.

Lands, 3 claims, area 6,353 acres, also a 5-acre millsite, 33,452 acres timber ls and 575 acres miscellaneous lands, in the Besshi district. Area of the shi mine proper, on Besshi Mountain, 4,400′ in height, is 209 acres. The ber lands carry large plantations of fir, set out yearly, since 1879, which e become available for mine timber, 15 to 20 years' growth being required. ter supply is taken from the Tokuriu river.

The Besshi mine shows graphitic, chloritic and sericite schists, carrying edded deposit of 4′ to 10′ thickness, with an average of 7′, having a strike N. 30° E. and average dip of 45° NE., traceable 9,000′ and proven to th of 3,000′, with workings exceeding 6,000′ in length. The bedded vein urs in alternate layers of chloritic and graphitic schist, each enveloped in uartz-schist known as "habu," with interstratification of piedmontite schist, faults, running east and west, and nearly parallel, giving frequent throws 10′ to 20′, with a maximum throw of 50′. The ore is an intimate mixture chalcopyrite and pyrite, sometimes occurring as partial segregations in te, banded with schist, averaging, as mined, circa 4% copper, brought up, dressing, to an average copper tenor of about 5.5%.

The Besshi mine, near Kyoto, in the northwestern part of the island of oku, has been in the ownership of the Sumitomo family since its opening, . 1690, and was making more than 3,000,000 lbs. fine copper yearly at the of the Seventeenth Century, being, at that time, perhaps the largest er producer of the world. The mine is opened by the Toyen shaft of ′ depth, sunk at an incline of 49°, with 9 levels opened, largest produc- being from the 6th and 7th levels, the shaft connecting on the 8th level, epth of 1,300′, with the new Tonaru crosscut tunnel, of 6,123′ length. e are other crosscut tunnels, of 430′ and 4,172′ length. The mine has a m of natural ventilation, by which hot air from the valley, entering gh the Tonaru tunnel, escapes through the mouth of the Toyen incline

shaft, near the top of the mountain, the air current being regulated by [illegible] tices. The mine is well timbered, with a tram-line on each level, and ore is extracted by overhand stoping, guncotton being used mainly for blasting, with a little dynamite and occasional gunpowder. The mine has electric pumps, forking water from the lower workings into a large sump on the 8th level, whence it is discharged through the Tonaru tunnel, which is lighted throughout by electricity, and has the terminal station of an aërial tram at its portal. The mine has circa 50,000′ of workings, with about 2,500,000 tons of ore blocked out for stoping. The company plans driving a fourth tunnel, of about 2 miles length, and sinking a 1,900′ vertical shaft to connect therewith.

Mining equipment includes a 740-h. p. installation having three 200-h. p. hoists, good for 1,200′ depth each, 3 Rand air-compressors and 2 Leyner and 3 Schramm air-compressors, with 6 Schramm air-drills and 5 Leyner air-drills. Owing to the method of ore extraction through the tunnel, no exceptionally powerful machinery is required.

As the mine, tunnel, mill and works lie on successive levels, the fullest possible advantage is taken of gravity in all operations, resulting in a great saving of power.

The crushing plant, of wood, built 1906, at the mouth of the Tonaru tunnel, is of 800 tons daily capacity, equipment including one 50-h. p. and two 40-h. p. Blake jaw crushers. Ore assortment is by hand-labor, there being no machinery, otherwise than the crushers.

Owing to complaints by farmers of damage from copper-laden waters, a cementation plant has been installed, and considerable copper is precipitated on scrap iron, the production of regulus amounting to upwards of 200 tons yearly.

Leading from the portal of the Tonaru tunnel is a 3,600-meter Bleichert aërial tram, to Hateba, with longest span of 600 meters, having an hourly capacity of 90 tons, at an average speed of 2.5′ per second. At Hateba is the terminus of a railway running to Niihama, the nearest port. The connections between the mine and shipping wharf include the 6,123′ Tonaru tunnel, circa 2 miles of aërial tram and 5½ miles of railway, a total of about 8 miles. The mine has 3 aërial trams, of 2,276′, 5,200′ and 5,178′ lengths, respectively.

The company owns 2 private railroads, of 9.73 miles total length, of 3′ gauge, equipped with 10 locomotives, 10 box-cars and 184 ore-cars.

A hydro-electric power installation, on the Tokuriu river, transmits electric energy to the central plant, at Niihama, whence power is distributed to the mine, mill, shops and smelter. The company plans a new hydro-electric installation, to utilize a flow of 30 cubic feet per second, deliverable under a 2,000′ head.

The general shops, at Niihama, about midway between the mine and smelter, include a foundry making castings up to 5 tons in weight, extensive carpenter-shops, machine-shops, boiler-shops and smithies, these works not only making ordinary repairs, but turning out a considerable part of the machinery and castings used at the mines, works and smelter.

The Besshi smelter formerly was at Niihama, but, owing to serious damage to neighboring farmers from smelter fumes, the entire reduction plant was transferred, 1906, to the Island of Shisakajima, 12 miles from Niihama, only the general shops remaining at the old smelter site.

The new Shisakajima reduction plant, built at a cost of about 4,000,000 yen, is one of the most modern in existence, both in design and equipment. Ore is received by vessel at a wharf, where unloaded by a 20-ton crane into cars that are hauled up an incline to the top of the smelting works, and

ed in counterbalance. The works are laid out in 7 terraces, gravity utilized throughout.

he smelter has 786 open stalls, for roasting ore and matte, about one- of the capacity being required for matte, each of the stalls being of is capacity, roasting of raw ore requiring an average of 30 days. The ing stalls are connected with a central high chimney. The smelter r has four 160-ton rectangular water-jacket blast-furnaces, and two 17- verberatory furnaces for refining, one being used as a spare. There also sets of Atebuki furnaces using an old Japanese process, improved by umitomo company, for the conversion of matte, these having a daily ity of 32 tons of roasted matte each, one being used as a spare. Product ster copper averaging 99.8% in tenor, carrying only about 0.015% silver .0003% gold per ton. About 20% of the product is sent to the Osaka g mill, owned by the Sumitomo family, and a greater part of the re- ler forwarded to Kobe, where it is exported, mainly to Europe. The er has three No. 4 and three No. 6 Connersville blowers, for furnace and an air-compressor for the converter department. Barren quartz es are used for fluxing, no silicious ores being available for the purpose. uel used at the mine is coal, and fuel at the smelter is coal, coke and gases from coke-ovens. The company has a coking plant, at Niihama, 72 brick kilns, with a daily capacity of 55 tons, using coal from the i mine, at Kiushiu. Cost of coal is $2.70 to $3.50 per short ton, according ade, and $4.70 per short ton for coke. Requirements are about 4,725 tons y of bituminous coal of best grade and 27,340 tons of ordinary bitu- us coal, in addition to coke for the smelter.

The company owns a very extensive fleet of vessels, including 2 steamers passengers and package freight, 2 tugs, 1 steamer for carriage of coal, 81 sailing vessels, with 20 sailing vessels held under charter. The com- operates a passenger line, with 2 steamers, plying between Niihama Kobe, a distance of 125 miles.

The company's miscellaneous enterprises are very extensive, including a number of warehouses and stores, and there is a branch of the Sumitomo at Niihama. There is a main hospital with 4 branches, and the company tains five elementary schools for children of its workmen.

The Sumitomo company employs about 6,000 people, of whom about 10% are women.

Production was 11,973,833 lbs. fine copper in 1906; 11,674,582 lbs. in and circa 12,000,000 lbs. in 1908. No copper mine in the world, of its has a better smelting equipment than the Besshi, and the management ghly progressive and efficient in all departments.

SET COPPER CO. **ARIZONA.**

Letter returned unclaimed from former mine office, Mayer, Yavapai Co., Apparently is controlled through stock ownership by, or has been sold ght to, Consolidated Copper Creek Mining Co. Lands, in the Copper district, circa 20 miles east of Mayer, are said to show a vein of 75' , traceable for several miles, which may be an exaggeration. Has a wo-compartment shaft, planned to be sunk 500', with 135-h. p. boiler, and 8-drill air-compressor.

SET COPPER CO., LTD. **BRITISH COLUMBIA.**

Head. Formerly at Princeton, Boundary district, B. C.

MIT COPPER MINING CO.

Office: care of Daniel Sinclair, Yakima, Wash. Organized, early 1907, laws of Washington, with capitalization $1,000,000.

MIT GOLD & COPPER MINING CO. **WASHINGTON.**

Letter returned unclaimed from former mine office, Laurier, Ferry Co.,

Wash. Lands show a wide vein of low grade ore, carrying a 4" paystreak giving good assay values in gold and copper. Idle.

SUMMIT MINING & MILLING CO. WASHINGTON.

Office: Davenport, Wash. Mine office: Keller, Ferry Co., Wash. C. H. Neal, president; C. A. Gray, secretary. Has a 100' shaft, showing argentiferous and slightly auriferous copper ore, giving assays of about $60 per ton. Idle several years and apparently moribund.

SUMPTER SMELTER. OREGON.

Owned by Oregon Smelting & Refining Co.

SUN-ANCHOR COPPER MINING CO. WYOMING.

Mine office: Encampment, Carbon Co., Wyo. L. W. Tennant, president; Geo. Kuntzmann, secretary and treasurer. Capitalization $1,000,000. Lands, 3 claims, area 60 acres, on Green Mountain, near the Moon-Anchor. Idle several years and presumably moribund.

SUNDOWN MINE. AUSTRALIA.

Mine office: Stanthorpe, Southern Queensland, Australia. Lands are on Ballandean Run, circa 20 miles from Stanthorpe. Property includes a tin mine on the western side of Little Sundown Creek, on which work is in progress, also a copper mine that has been idle for several years.

SUNIK MINES. RUSSIA.

Mine office: Evlach, Transcaucasia, Russia. Property is in the Zangezur district, on the Tiflis & Baku railroad, 30 miles from Evlach and near the Persian line. Ore is mainly chalcopyrite, with occasional bornite, both slightly auriferous and argentiferous, and a little native copper. Property shows a system of 20 known veins, of 7" to 4' width, cutting andesite and diabase, with fault fissures, carrying ore of about 7% average copper tenor, as mined. Development is mainly by tunnel and the workings are of a primitive nature, deepest being about 130'.

SOCIEDAD COLECTIVA C. y J. SUNDHEIM. SPAIN.

Office: Huelva, Spain. Mine office: Puebla de Guzmán, Huelva, Spain. Is an incorporated co-partnership between Don Carlos Sundheim de la Cueva and Doña Justa Sundheim de la Cueva. Wm. Guthrie Bowie, manager; Jorge Riecken, mine superintendent. Property includes the Cabezas del Pasto, Sierracilla del Tamujoso and Malagon mines.

The Cabezas del Pasto includes 6 mining concessions, area 104 hectares, with about 300 hectares of adjoining lands, having 12 shafts, deepest 104 meters, with circa 6,000 meters of workings. Ore developed for immediate extraction is estimated at 750,000 tons of pyritic ore and 1,500,000 tons of cupriferous schists. Lenses apparently increase in size with depth. Ore is extracted by overhand stoping, and dry-walling is used in depleted stopes. Ores carry 1.5 to 5% copper, 40 to 52% sulphur and 40 to 44% iron, and the schists range 0.25 to 30% in copper tenor. All pyritic ore above 1.5% copper, and all schists above 10% copper, are exported. The lower grade ores are lixiviated at the mine, and the washed sulphur ore is exported to France. The mine water carries up to 9 kgms. copper in solution per cubic metre, mostly saved by cementation. The cement copper is washed and classified, best quality averaging 98.5% copper, which is the best grade of cement copper produced anywhere. Mining by overhand-stoping and rock filling is said to prove safer and cheaper than open-cast operations. Surface plant includes Robey hoisting and pumping engines, and the mine has a tramline of 75 cm. gauge, also an aërial tram to the wharves at La Laja, on the River Guadiana.

The Sierracilla del Tamujoso was a small producer under former operators, but ore is complex, requiring special treatment, and the property has been idle for some years.

Malagon is a group of government concessions, showing good out-
th many old workings, but is idle also.

HT MINING CO. **ARIZONA.**

l. Was merged in Great Belcher of Arizona Co. Formerly at Provi-
avapai Co., Ariz.

HT MINING & MILLING CO. **COLORADO.**

e office: Sunrise, Laramie Co., Wyo. O. L. Vincent, president; H. P.
secretary. Organized, September, 1902, under laws of Wyoming.
bout 11 miles from Sunrise, were worked originally for iron ore. The
es carry gold and silver values. Mine produced, 1881-1893, ore valued
82. Idle.

COPPER MINING CO. **WASHINGTON.**

e: Glens Falls, N. Y. Operating office: Everett, Wash. Letter re-
nclaimed from former mine office, Index, Snohomish Co., Wash., Sep-
1908, at a time when the company claimed to be working 6 men.
cNutt, president and general manager; A. G. Selinghana, secretary
surer; W. W. Black, also reported by company as general manager;
officers and E. M. Melzger, trustees; B. J. Gallitspa, superintendent;
E. Ritter, engineer. Organized 1897, under laws of Washington, with
ation $3,000,000, shares $1 par, said to have been increased, circa
$4,000,000, but company reports, 1908, a capitalization of $3,000,000
mpany reported, Sept. 3, 1908, liabilities of $55,000, with $5 cash on
nnual meeting, second Tuesday in January.

ls, 36 claims, 18 patented, reported as of 780 acres area, which is im-
as the area of 36 claims would be only a trifle more than 720 acres.
clude the Sunset group of 23 claims, well timbered, on the eastern
the north fork of the Skykomish river, about 5 miles from Index,
the Ethel group. The Mountain Side group of 7 claims has circa
unnels.

Sunset mine shows granite, carrying parallel fissures, varying, on
from mere seams to several feet in width, said to be traceable up to
e smaller veins being short-lived, and disappearing entirely at shal-
h. The main vein of the Sunset, of 3′ to 17′ width, is claimed to be
here widest, carrying mainly auriferous chalcopyrite, at and near
and being reported to carry considerable argentiferous bornite at
hich seems reversing the usual order of things. Gangue is quartz,
ed at surface, but solid at depth. Company reports ore as averaging
per and 8 oz. silver per ton, with small gold values, but returns from
of selected ore, sent to the Tacoma smelter, were only 9% copper.
ent is by a 596′ tunnel, with circa 1,800′ of workings.

pment includes several small shops, bunk-houses and a small saw-

mill. A water power is said to have been developed. The mine i
have a 6½-mile tram, to Index. Work was begun on a concentrat
foot of the tram-line, but apparently the mill was not completed.
slimes badly in concentration.

The exceedingly devious methods of promotion followed by this
under various managements, none good, were fully described in Vol
and V. Apparently the present management should not be held re
for all the lies of its predecessors. Neither company nor property is
with especial favor.

Organized 1904, with capitalization $1,000,000, shares $1 par. La
claims, area 200 acres, circa 10 miles from Willcox, having shafts of
100′, showing argentiferous copper ore. Company sued a Calumet bro
$20,000 damages for offering stock at 25 cents, when company was
$1 per share. Management is composed of men of good standing, th
president being a practical and capable mining man.

SUNSET NATIONAL MINING CO. MON

Mine office: Homestake, Jefferson Co., Mont. R. L. Stevens, m
Lands, 2 groups, one of 2 patented claims, area 35 acres, and one of 76
about 4 miles north of Homestake, developed by a 250′ tunnel, showi
assaying 5% copper, 4.4 oz. silver and $3.20 gold per ton.

SUPERIOR-ALTA MINING CO.

Office: care of Walter L. Maas, secretary and manager, Salt Lak
Utah. Letter returned unclaimed from former mine office, Alta, Salt
Co., Utah. A. J. Jacobson, president; L. A. Jeffs, vice-president. Cap
tion $300,000, shares $1 par. Idle several years.

SUPERIOR-BONANZA MINING CO. ME

Office: Calumet, Mich. Mine office: Imuris, Magdalena, Sonora,
A. S. Cox, chairman; R. E. Lopez, secretary; Wm. Gmahling, treasurer;
E. Penberthy, consulting engineer; Chas. Hanley, superintendent. Org
March, 1907, with shares $10 par, as successor of Sonora Bonanza Mini

Lands, 135 hectares of mineral lands, with extensive holdings of
laneous lands, circa 35 miles south of Nogales, showing a prominent
of 10′ average width, traceable 1½ miles, giving quite uniform assays
to $7 gold per ton, the underlying vein, of 6′ to 10′ average width, a
a 3′ paystreak carrying argentiferous galena, chalcopyrite and wulfenit
occasional free gold. Has 2 shafts, of circa 450′ depth each, 1 showing
tom a 12′ vein carrying 3 to 5 oz. silver and $5 to $10 gold per ton. T
Miguel property, having a broken formation, was idle at last accounts.

Equipment includes steam plant with 3 boilers, 2 hoists, 2 pump
compressor and an electric light plant. Water is secured from a we
stored in a reservoir. Improvements include a general store, dwellin
workmen, lime-kiln, small brick plant and a small concentrator. P
considered promising.

SUPERIOR & BOSTON COPPER CO. ARI

Office: Houghton, Mich. Mine office: Globe, Gila Co., Ariz. W
Rice, president; John H. Rice, vice-president; John R. Pimlott, secreta
treasurer; preceding officers, Hon. Norman W. Haire and George E
directors; Frank H. Probert, consulting engineer in charge; W. E.
superintendent.

ganized Nov. 23, 1906, under laws of Arizona, with capitalization
,000, increased, Sept. 5, 1908, to $2,000,000, shares $10 par. Had 1,585
olders of record, Sept. 15, 1908. Fiscal year ends Sept. 30. State Street
Co., Boston, registrar; Boston Safe Deposit & Trust Co., transfer agent.
s, late 1908, were being listed on the Boston Stock Exchange.
tatement for fiscal year ending Sept. 30, 1908, gave $225,392 received
assessments Nos. 2 and 3; $247,610 from sale of additional stock issued;
.02 from interest, and $48,341.61 received from sales of ore. Expendi-
for the year included $143,010.20 for development and general expenses.
00 for commission for underwriting the new stock issue, $17,017.19 for
ruction and equipment, and $3,368.10 for patents and miscellaneous ex-
s, with a $132,800 payment on lands, leaving a balance on hand of
$42.76, of which $278,690.11 was cash. Accounts payable were $11,195.56.
hase price of company's lands was $365,000, and final payment thereon,
$44.20, was made Oct. 15, 1908.
Lands, 45 claims, 19 patented, others in process of patenting, area circa
cres, including the Globe & Arizona holdings of 22 claims, bought for
000, and an adjoining group of 21 claims, bought for $46,000, giving a
uet tract, east of and adjoining the Arizona Commercial mine and prop-
of the Old Dominion. Lands are about 4,200′ above sea-level, and circa
above Pinal Creek at Globe, hence the mine should not be as wet, at
, as is the case with the Old Dominion. The property carries ample lime-
and iron ore for fluxes. The company also has an option on the Collins
e group of 6 claims, immediately north of and adjoining the Great East-
nine, which property carries the extension of the Old Dominion vein, and
nsidered promising.
The property shows Pinal schist, overlaid by circa 600′ of quartzite, which,
arn, is covered, conformably, by circa 500′ of Globe limestone, showing
sions of diabase, causing extensive mineralization. The property shows
dominant lines of faulting, the main series, which runs northeast and
hwest, including, from north to south, the Old Dominion, Great Western
Black Hawk, Limestone, Quo Vadis, Black Oxide and Iron King faults, or
s, these being intersected, at nearly right angles, by another series of
ts, of later origin, apparently but slightly mineralized. Of the veins
ed, three show ore in commercial quantities.
Work was begun January, 1907, and Oct. 31, 1908, the mine had 6,374′
workings, exclusive of stopes. Assessment work has been done along un-
l but highly commendable lines, by sinking 2-compartment shafts, well
bered, at the common end-line of adjoining claims, or, where possible,
he intersecting corners of four claims, thus securing results of actual value
expenditures usually made merely to hold possessory title. Ultimately it
lanned to connect the workings, on all veins, by main crosscuts, between
two working shafts, driving crosscuts at vertical intervals of 200′, these
ing as the main transportation avenues for ores developed, and giving
p extraction while providing for handling heavy ore tonnages.
The oxidized zone apparently is of 500′ to 600′ depth, which indicates an
nsive zone of secondary enrichment carrying chalcocite and bornite, pre-
ably to be followed by chalcopyrite, at great depth. The leached zone
ies mainly carbonate ores, with the bottom workings showing considerable
cocite, ore increasing rapidly in quantity and copper tenor with depth. The
erty has all the ores and fluxes required for a good furnace mixture.
The Great Eastern mine, which is the principal property, as developed,
the only producer as yet, has a 420′ shaft, made from an old vertical
t cut down, and is poorly located, hence eventually must be replaced by
rger shaft to the north, but will serve to develop the property to greater

depth, and will suffice for a considerable production. Levels have been op at depths of 100', 300' and 400', the upper levels showing leached ore, of commercial importance, but the 400' level has a chute of commercial ore long, from the eastern boundary of the Arizona Commercial, beyond which vein carries small lenses of commercial ore, at irregular intervals, for 36 length, these indicating commercial ores at a little greater depth, whil the sub-level, 60' deeper, the ore chute is 320' long, proving that it pitches on the Superior & Boston, making ground rapidly at depth. On the lo level considerable chalcocite is shown, on both the foot and hanging w chalcocite being found in rapidly increasing proportions, with depth. Great Eastern mine had about $500,000 worth of ore developed, Septem 1908, and was a producer of about 40 tons of high-grade ore daily, at the of 1908, stopes being carried only 3 sets high. The Great Eastern mine is especially wet, but has been given a new Prescott pump, in anticipatio an increased inflow of water at greater depth.

The Limestone shaft is 318' deep, with levels at 100', 200' and 300', bottom level carrying a 4' footwall streak of commercial ore, each succes level showing an improvement in both width and character of ore, with p pects of large and rich ore bodies at somewhat greater depth.

The Gardner incline shaft, begun Apr. 4, 1908, at the southern end the property, on the Black Oxide vein, has 3 compartments, each 5x10' size, timbered with 10x10" timber, and was 435' deep Sept. 30, 1908. P have been cut for levels at depths of 100', 200' and 400'. A crosscut, 1908, was 44' in the Black Oxide vein, without reaching the footwall. Black Oxide vein apparently is a continuation of the Buckeye fault, on w the Old Dominion has opened extensive mines on the Buckeye, Carrie and T Blue claims. Equipment of the Gardner shaft is temporary, and it is plan to replace it by permanent equipment with capacity for sinking circa 1,

The portal of the Black Oxide tunnel is about 1,000' southwest of Limestone mine, the tunnel cutting the Black Oxide vein at 670', givin 400' back, with drifts of 96' and 397', both in the oxidized zone, showin vein filling of micaceous hematite, carrying up to 2% copper, indicating phide ore below, and showing a small chute of shipping ore. The Black O is 280' east of the True Blue mine of the Old Dominion, from which h grade ore has been mined, by leasers, for several years.

The Iron King vein, parallel with the others, shows a good iron go and has an old 70' shaft, in leached ledge matter.

Equipment includes hoists at each shaft, with 5,000-gallon and 12,000 lon oil tanks at the Great Eastern mine, petroleum being used extensively fuel. Buildings include a power-house at the Great Eastern, smithy, w house, barn and 12 two-room cottages, for workmen.

The Great Eastern shaft is reached by a 350' spur of the Arizona C mercial Railroad, over which supplies are received and ore shipped.

The company's property has an excellent site for a smelter, easily a sible by a railroad, and with ample water supply available, but further velopment will be secured before the matter of building a reduction p is given serious consideration.

Production was begun February, 1908, within thirteen months after company started work, with shipments to El Paso smelter, and, begin May 1, 1908, the company shipped circa 1,000 tons of ore monthly, sec mainly from development work, to the Globe and El Paso smelters. For t year ending Sept. 30, 1908, production was 6,624 tons of ore, yielding net, a deduction of smelting and transportation charges, $48,210.39, an average return of $7.28 per ton. Ore produced ranged in copper tenor from 5.4% February to 10.64% in September, and in silver tenor from 2.8 oz. silve

ruary to 7.24 oz. in September, the ore improving steadily in both copper silver contents. Production for calendar year 1908 was circa 1,350,000 fine copper. For September, 1908, production was 88 tons blister copper, ing circa $2,500 above all expenses. In November, 1908, a shipment of tons of ore, from the bottom level of the Great Eastern, returned 12.8% per and 11.8 oz. silver, and the last shipment of 1908, in December, gave rns of 16% copper and 20 oz. silver per ton, the steadily increasing per tages of copper and silver being due to the great improvement in ore ies secured at depth.

The company's financial position is notably strong, and the ability of the perty to make considerable ore shipments so quickly, from development rk, speaks eloquently both for the mine and its management. The Superior Boston is a property of exceptional promise and has an excellent manage- nt.

PERIOR COPPER CO. **ARIZONA.**

Dead. Formerly at Tucson, Pima Co., Ariz. Described Vol. VI.

PERIOR COPPER CO. **MICHIGAN.**

Office: 12 Ashburton Place, Boston, Mass. Mine office: Houghton, Hough- n Co., Mich. Quincy A. Shaw, Jr., president; Rodolphe L. Agassiz, vice- sident; Geo. A. Flagg, secretary and treasurer; Jas. MacNaughton, general nager; preceding officers, Alex. Agassiz and Francis W. Hunnewell, direc- s; Jas. Biscombe, superintendent.

Organized July 23, 1904, under laws of Michigan, with capitalization 00,000, shares $25 par. Is controlled, through ownership of 50,100 shares, ght Dec. 31, 1906, by Calumet & Hecla Mining Co. At end of fiscal year, . 30, 1908, had cash assets of $155,231, with total liabilities of $5,846.

Lands, 400 acres, in Section 15, T. 54 N., R. 34 W., between the Baltic Isle Royale mines, and just east of the Section 16 mine of the Atlantic. property carries circa 60,000′ of the strike of the Baltic amygdaloidal bed, a room for 3 or 4 shafts, and has a light overburden, the lode being proven trenches, at intervals of 1,000′, these showing an amygdaloidal bed of to 40′ average width, having extensive carbonate stains, due to weather- with a little fine copper near surface. Property has been trenched to Eastern Sandstone.

The mine is opened by 2 shafts, No. 1, at the north, which is the only t of importance, being sunk in the footwall, insuring solid ground, but ssitating opening the bed by short crosscuts at each level, and, owing to great width of the bed, it is necessary to crosscut along the drifts, at 100′ rvals. As a rule, the drifts are carried approximately in the center of bed, with a view to giving a fair average of values. The Baltic amygda- where opened in the Superior, carries copper impregnations in the foot- , always an evidence of strong mineralization, and there is a conglomerate about 20′ in the footwall, which carries a small amount of copper. The ip-rock is remarkably deceptive in its appearance, as the copper oxidizes ily, and rock is of little promise, after broken a few weeks, but shows h stamp-copper on fresh fractures. The mine shows a marked improve- t with depth. Owing to an intervening triangle of land, owned by other rests, between shafts Nos. 1 and 2, they cannot be connected until the level is reached.

No. 1 shaft, circa 1,200′ south of the northern boundary of the property, about 1,600′ deep, began drifting on the 10th level December, 1908, this ving a lode up to 95′ in extreme width, the shaft having about one mile rorkings, at the end of the year. There is an 18′ horse of trap on the 6th l, which disappears on the level below. This shaft shows improving es with depth, the bottom levels being the best in the mine.

No. 1 shaft has a frame shaft-rockhouse, of the same type as at N and 18 on the Osceola amygdaloidal bed at the Calumet & Hecla, equi including a Westinghouse engine and 2 crushers. The hoist, good for of 1,500′, was taken from No. 20 shaft of the Calumet & Hecla.

No. 2 shaft, 2,540′ southwest of No. 1, and circa 2,400′ from the so boundary, sunk circa 40′ in the footwall, at an angle of 53°, was 235′ d the end of 1908. Work was resumed, July, 1908, when the shaft was cut to 3-compartment size. This shaft has only a temporary equipmen shows no copper, because sunk in the footwall.

Mining equipment includes a combined boiler and engine-house, with for 5 boilers, hoist, and 10-drill and 18-drill air-compressors, all in the house, the boilers having been brought from the old Calumet & Hecla plant at Lake Linden.

Buildings include a warehouse, smithy, changing-house, office and a ber of dwellings for employes.

No. 1 shaft is connected with the main line of the Atlantic Railway 7,000′ spur, built 1908.

The Superior has a 2-year lease on 2 heads of the Atlantic mill, gi stamping capacity of about 700 tons daily. The first mill test, made D ber, 1908, was on circa 950 tons of rock, remaining after discarding 40% of rock broken for the test from the breasts of the 4 drifts on t to 10th levels, inclusive, and returned 48 lbs. mineral, equal to 35 lbs. fi per, per ton, of rock stamped, in addition to which there were heavy t losses, amounting to 7 to 10 lbs. of fine copper per ton, which probab be gradually reduced by adjustment of the washing apparatus at the m the Atlantic plant was devised and adjusted for handling lighter copp is not likely that the Superior will average 35 lbs. fine copper per to it gives every promise of making a very fine mine, of the same gener as the Baltic and Champion, opened a short distance southward, on th lode. The mine is capable of supplying easily 500 tons of stamp-rock and at the end of 1909 should be opened sufficiently to supply 1,000 ton

SUPERIOR COPPER CO., LTD. ONT

Office: 10 Adams Blk., Sault Ste Marie, Ont. Mine office: S Mine, via Algoma Central Railway, Algoma, Ont. Employs 258 men. M. Dyer, president; W. H. Teare, vice-president; F. C. Smith, secreta general manager; Emory W. Clark, treasurer. Organized Sept. 13, 1901 laws of Ontario, with capitalization $1,500,000, increased, 1903, to $2,5 and again increased, 1907, to $3,000,000, shares $10 par; issued, $2,5 Levied assessments, to Sept. 1, 1908 ,of $52,972.75, and on that date had cash on hand, with $12,700 liabilities. The company was organized assessable, but stock was rendered assessable by special act of the pr parliament of Ontario. Annual meeting, second Thursday in June.

Lands, 11 claims, area 800 acres, 8 claims, of 680 acres area, being granted. Property, in an unorganized mining district of Algoma, show ite and chloritic schists, carrying 2 fissure veins, of 10′ and 70′ estimate age widths, traceable circa 7,000′, opened by shafts of 90′, 95′, 115′, and 400′, with about 20 pits and trenches, giving a total of 2,155′ of ings, estimated to show 212,000 tons of ore, with same amount block for stoping, which figures seem high. Ore is mainly chalcopyrite, with chalcocite, having a quartzose gangue, formerly estimated to aver copper, 1 oz. silver and $2.50 gold per ton, but estimated, by present m ment, to average 4% copper, 1 oz. silver and 40 cents gold per ton.

Equipment includes a 150-h. p. steam plant, with 2 hoists and 1 Ingersoll-Sergeant air-compressor. There are 19 buildings, includi

house, smithy, 20x40' wooden machine-shop, changing-house, boarding-house and dwellings.

The 50-ton wooden concentrator has 2 jaw crushers, 2 rolls, 6 Hancock jigs and 4 Wilfley tables.

The property is connected with the Algoma Central Railway by a 4.2-mile standard-gauge private line, laid with 80-lb. steel rails, and equipped with 1 locomotive and 3 cars.

The mine closed down, August, 1904, and resumed circa 1908. Management plans a 500-ton concentrator. Property considered promising.

SUPERIOR MINING CO. **NEW MEXICO.**

Office: El Paso, Tex. Mine office: Lordsburg, Grant Co., N. M. Daniel W. Reckhardt, manager. Lands are in the Shakespeare Range, near Lordsburg. Company begun operations 1899, and in 1900 shipped some ore to El Paso smelter. Was idle at last accounts, but said to plan resumption.

SUPERIOR MINING CO. **NEW MEXICO.**

Dead. Formerly at Cerillos, Santa Fé Co., N. M.

SUPERIOR MINING CO. **UTAH.**

Mine office: Bingham Canyon, Salt Lake Co., Utah. J. E. Dow, manager. Lands, 8 claims, adjoining the St. Joe, with workings said to show ore assaying 2% copper, 35.5% lead, 29.6 oz. silver and 60 cents gold per ton. Company is said to plan sinking a shaft on the Lark side of the mountain.

SUPERIOR MINING CO. **WASHINGTON.**

Office: 407 Truax Bldg., West Superior, Wis. Letter returned unclaimed from former mine office, Berlin, King Co., Wash. J. P. Simon, president and treasurer; B. A. Baerlocher, secretary and superintendent; preceding officers and W. D. Dwyer, directors. Organized 1902, under laws of Washington, with capitalization $2,000,000, shares $1 par. Lands, 4 claims, area 80 acres, and a millsite, 4 miles south of Berlin, in the Miller River district, opened by a 140' tunnel, showing a 5' to 8' fissure vein, carrying some oxidized copper ores, but mainly auriferous, argentiferous and cupriferous pyrite, with talcose gangue, associated with galena, assaying circa 6% copper, 7 oz. silver and $1 to $30 gold per ton. Idle for some years, except for annual assessment work.

SUPERIOR-MONTANA COPPER MINING CO. **MONTANA.**

Office: 604 Rookery Bldg., Spokane, Wash. Mine office: Superior, Missoula Co., Mont. Employs 6 men. L. G. Nash, president; W. P. Smith, vice-president; S A. Matthews, secretary and treasurer; D. A. Buchanan, general manager; L. P Audrle, superintendent; preceding officers are the directors; W. M. Stephen, engineer. Organized July 1, 1907, under laws of Washington, with capitalization $1,500,000, shares $1 par; issued, $175,000. Reported $11,500 on hand Sept. 18, 1908. Annual meeting, August 15th.

Lands, 12 claims, unpatented, area 230 acres, 2 miles from Superior and one mile from C., M. & St. P. Railway, in an unorganized district of Missoula county, showing 2 ore bodies in diabase, of 35' estimated average width, traceable 7,500', carrying auriferous chalcopyrite and pyrite, estimated to average 7.3% copper, 6 oz. silver and $14.67 gold per ton, with a trace of lead. Development is by shafts of 30' and 70', and a 220' tunnel, with 1,260' of workings, estimated to block out 171,000 tons of ore for stoping, which estimate is excessive. Has 4 mine buildings. Company plans continuous development, building a sawmill and a one-mile aërial tram, installing a plant with steam power, air-compressor and hoist, and building a concentrator. Property considered promising.

SUPERIOR & MONTANA MINING CO. **UTAH.**

Office: 317 Quincy St., Hancock, Mich. Mine office: Alta, Salt Lake Co., Utah. Edw. Ulseth, president; Chas. Chynoweth, vice-president; W. Frank James, secretary; John Holman, treasurer; preceding officers, Michael Foley,

SUPERIOR & NEVADA GOLD MINING CO.

Office: 221 Breunig Blk., Superior, Wis. Mine office: S
coln Co., Nev. Hon. W. E. Hailey, president; D. N. Morgan,
L. Thomas, treasurer; B. J. Thomas, secretary; G. W. Hunt
manager. Organized July, 1906, under laws of Arizona, wit
$1,500,000. Lands, 4 claims, area 80 acres, at Searchlight, kno
Solomon group, slightly developed by tunnel, said to carry a 5
argentiferous and auriferous copper and lead sulphides, with s
assaying circa 7% copper and 2 oz. gold per ton. Also has 4
acres, at Crescent, Lincoln county, Nevada, apparently undeve

SUPERIOR & PITTSBURG COPPER CO.

Office: Calumet, Mich. Mine office: Bisbee, Cochise Co.,
circa 750 men. Chas. Briggs, president; Capt. Jas. Hoatson,
dent; Capt. Thos. Hoatson, second vice-president; Louis W.
vice-president and general manager; Peter Ruppe, treasurer; G
bell, secretary; preceding officers, Thos. F. Cole, Geo. E. Tener,
mont, Jr., Chester A. Congdon and Henry R. Rea, directors; H.
tor. Organized June 30, 1906, under laws of Minnesota, wit
$20,000,000, shares $10 par; issued, $15,000,000. Company wa
merger of the Calumet & Pittsburg Mining Co., Junction Mi
burg & Duluth Mining Co. and Lake Superior & Pittsburg Mi
pany ended 1908 owing the Calumet & Arizona circa $1,00
money. Quick assets, Jan. 1, 1908, were $759,150.50, wit
$1,275,087.66, giving a balance of liabilities, in excess of q
$515,937.16. Company and its predecessors have expended ab
on lands, development and equipment.

Lands, 100 claims, patented, largely fractional, area 1,35
ing 44 claims, area 629 acres, formerly held by Lake Superio
21 claims, area 325 acres, formerly held by Calumet & Pittsb
area 215 acres, formerly held by Pittsburg & Duluth, and 18 c
acres, formerly held by the Junction. The major portion o
tract is covered by Bisbee conglomerate, flanked on either sid
and limestone.

The property shows extensive areas of leached ore, pr

The Cole shaft, formerly known as No. 2 Lake Superior & Pittsburg, was sunk nearly 1,000′ by the former owners, and was cut down to 3-compartment size, 8x24′ in outside measurement, and retimbered, by the present management, work being begun, simultaneously, on 10 levels, and performed in record-breaking time. This shaft was 1,480′ deep at the end of 1907, and apparently was not deepened, 1908. The Cole shaft also affords the principal avenue of ore extraction from that part of the mine formerly owned by the Pittsburg & Duluth. The shaft shows considerable ore bodies on the 900′, 1,000′ and 1,100′ levels, ore improving with depth. This shaft has Prescott and Cameron station pumps, caring for a flow of 225 gallons per minute, and, at the end of 1908, was shipping 7 carloads of ore daily.

Equipment at the Cole shaft includes an 800-h. p. steam plant, burning petroleum, and a 16-drill air-compressor. There is a 16x42″ Nordberg quadruple-cylinder incline-frame double-drum hoist, capable of raising 12-ton loads from a half-mile depth, hoisting 3-deck cages carrying 3-ton cars, operating in balance, or singly, as desired, and the engine can be altered to hoist from a depth of 2,500′. Buildings at the Cole shaft include a framing-mill, smithy, office and changing-house.

No. 1 Lake Superior & Pittsburg shaft is a relic, left by former owners, of no particular use to the present company, the shaft being of small size and shallow depth.

No. 3 Lake Superior & Pittsburg shaft, 1,000′ deep, is on the Uncle Sam claim, south of the Cole shaft, and has been idle several years.

The Briggs shaft, 1,271′ deep at the end of 1907, is circa 2,000′ south of the Junction shaft, and about 3,000′ east of the Lowell shaft of the Copper Queen. This shaft shows tremendous bodies of the leached ore that has been found capping the big ore bodies of adjoining mines. The first level, at 910′, shows 600′ of good ore. The Briggs shaft has an 8″ air-line, and two 12″ water-columns, with 3 pumps.

Equipment at the Briggs shaft includes a steel gallows-frame, and a power plant, installed 1906, having 7 boilers, 5 of 250-h. p. each, burning crude petroleum, with a powerful hoist and an 18-drill Sullivan straight-line air-compressor.

The Hoatson shaft, on the Del Norte claim, circa 2,500′ from the Briggs shaft, has 4 compartments, and was 1,427′ deep at end of 1907, collar being 150′ higher than that of the Junction shaft. This shaft shows tremendous bodies of leached ore, with some cuprite and other oxidized ores, on the 12th level, and in the bottom workings carries high grade oxides and sulphides, similar to those found in the Lowell shaft of the Copper Queen. At the end of 1908 stations were being cut, on the 1,400′ and 1,500′ levels, and the Hoatson shaft was producing, daily, 2 carloads of oxidized ores, and 6 carloads of sulphide ores. There is a 1,000-gallon pump on the 1,300′ level.

Equipment at the Hoatson shaft includes a 50′ gallows-frame and a double-drum hoist, good for 1,500′ depth. The power plant has 6 boilers, and there is a framing mill, which is a duplicate of that at the Oliver shaft of the Calumet & Arizona.

The Congdon shaft, developing the Pittsburg & Duluth tract, on the Black Bear claim, only 650′ from the Calumet & Arizona mine, is 1,267′ deep, and out of commission, as the territory can be worked to better advantage through the Cole shaft. The Congdon shaft has a 1,000-gallon pump, in a station on the 1,000′ level. Surface equipment includes a 300-h. p. steam plant, with a 12x36″ double-drum hoist and a 5-drill straight-line air-compressor.

The Powell shaft was begun, late 1908, on the line of the Hope and Wagner claims of the *Calumet & Arizona*, on ground formerly owned by the Pitts-

burg & Duluth. Equipment includes a Hendrie & Bolthoff double-dru Sullivan air-compressor and two 75-h. p. Atlas boilers.

The 4-compartment Junction shaft, 1,535' deep at the end of 1908, on the boundary line of the Calumet & Pittsburg and Junction tract 1,300' level shows a great deal of ore assaying up to 9% copper, and th level, at the end of 1908, showed ore assaying above 11% copp posed to be a continuation of the ore body on the 1,300' level of th son shaft. The Junction was shipping, at the end of 1908, from b 1,300' and 1,400' levels.

The entire mine is drained through the Junction shaft, which a to assist in unwatering adjoining properties. The pumping station 1,200' level has pumps of 4,500 gallons capacity per minute, and hand water of the entire mine. A pumping station on the 1,500' level, co late 1908, has a 2,500-gallon Prescott pump, transferred thereto fr 1,200' level.

The Junction has a 75' steel gallows-frame, planned for 5 compar The power plant includes a 16x42' Nordberg 4-cylinder incline doubl hoist, good for 1,500' depth, which is a duplicate of that at the Cole There also are 12x14" and 12x15" auxiliary hoists, and 2 cross-compou compressors, of 12 drills aggregate capacity, with ten 250-h. p. marine and three 5,000-gallon tanks for storage of petroleum. There is a lar chine shop at this shaft.

The property is served by the El Paso & Southwestern Railway, reaches all the main shafts and shops of the mine.

Ore is smelted by the Calumet & Arizona, a sister company. Prod 1906, was 9,084,875 lbs. fine copper, 32,564 oz. silver and 143 oz. go precious metals, valued at $21,941, amounting to average of $4.80 per finished copper. Production, 1907, was 111,710 tons of ore smelted, re 9,691,405 lbs. fine copper and 55,464 oz. silver, with a small amount o the precious metals returning $33,401.20, equal to $6.90 per ton of coppe

Despite the great cost of developing this mine, and the unusual of time taken, it is a valuable property, of much promise, though it ha much more time and money to open than anticipated by anyone, at th The management is excellent.

SUPERSTITION MOUNTAIN MINING CO. **ARI**

Mine office: Florence, Pinal Co., Ariz. Geo. Woodbury, superint Lands, 30 claims, circa 30 miles north of Florence, showing promising outcrops.

SURE THING GOLD-COPPER MINING & SMELTING CO. **WASHIN**

Dead. Succeeded, circa 1905, by Clipper Mining Co. Formerly at Bend, King Co., Wash. Described Vol. V.

SURPRISE EAGLE MINING CO. **MON**

Office: Silver Bow Blk., Butte, Mont. Mine office: Boulder, J Co., Mont. T. D. Thomas, president and general manager; Jas. W. Ro president; Sidney E. Roberts, secretary. Capitalization, $1,500,000. L claims south of the Elkhorn mine, and 4 claims south of the Baltimor

SUTTON MINING CO. **NEW M**

Office: Elgin, Ills. Mine office: Lordsburg, Grant Co., N. M. R. A manager. Property is the Last Chance mine, in the Pyramid district, a 100' shaft showing a 7' vein carrying gray copper.

SVANO COPPER & SULPHUR MINES (NORWAY), LTD. **NOR**

Office: Gresham House, Old Broad St., London, E. C., Eng. Org June 22, 1907, under laws of Great Britain, with capitalization £15,0 25,000 preferred and 5,000 deferred shares, of 10s. par each. Was organi

quire a mining concession on the island of Svanöen, on the southwestern st of Norway. Presumably idle.

AKOPMUNDER MINEN- GESELLSCHAFT. GERMAN SOUTHWEST AFRICA.

Office: Schellingstrasse 4, Berlin, W9, Germany. Mine office: Corob, via akopmund, German Southwest Africa. Capitalization 36,000 marks. Prop- y is sundry slightly developed copper prospects. Idle and presumably ifound.

ANSEA CONSOLIDATED MINING CO. UTAH.

Office: Provo, Utah. Mine office: Eureka, Juab Co., Utah. Jesse Knight, sident. Organized circa June, 1908, under laws of Utah, with capitalization 00,000, shares $1 par, as a merger of the Swansea and South Swansea Min- companies.

ANSEA EXTENSION MINING CO. UTAH.

Office: Salt Lake City, Utah. Mine office: Eureka, Juab Co., Utah. L. Thomas, president; Hon. O. W. Powers, vice-president; Heber M. Wells, retary and treasurer. Organized circa June, 1908, under laws of Utah, with pitalization $100,000, shares 10 cents par.

ANSEA MINING CO. MEXICO.

Dead. Lands sold, September, 1905, to Ronquillo Copper Co. Formerly La Cananea, Arizpe, Sonora, Mex.

ARTHMORE CONSOLIDATED MINING CO. COLORADO.

Office and mine: Eldora, Boulder Co., Colo. Employs 10 to 70 men. Chas. Galbreath, president; Harvey Hanes, vice-president; J. E. Carpenter, secre- y; Paul Barriclow, treasurer; H. H. Carpenter, general manager. Organ- d July, 1907, under laws of Colorado, with capitalization $3,500,000, shares par; issued, $3,000,050, as a merger of the Swarthmore Copper Co. and terprise Mining Co.

Lands, 17 claims, 11 patented, area circa 60 acres, in the Grand Island ning district of Boulder and Gilpin counties. Property includes the Golden ece mine, having 2 ore bodies under development, one, of 8′ estimated aver- width, carrying auriferous and argentiferous chalcopyrite, calaverite and anite, the copper ores being estimated to average 3 to 5% copper and 3 4 oz. silver, with fair gold values. Milling ore is estimated to carry $10.84 smelting ore $24 per ton, in average metallic values. Development is by hafts, deepest 403′, and by tunnels of 800′, 1,000′ and 2,000′, estimated to e 63,000 tons of ore blocked out for stoping. Equipment includes two am plants, one with a 60-h. p. hoist and 12-drill air-compressor. There are ew mine buildings.

ARTHMORE COPPER CO. COLORADO.

Dead. Merged, circa 1907, in Swarthmore Consolidated Mining Co. For- rly at Eldora, Boulder Co., Colo.

ASTIKA COPPER CO. ARIZONA.

Office: Long Beach, Cal. Mine office: Jerome, Yavapai Co., Ariz. N. Pike, sident; Walter Thompson, vice-president; T. C. Jordan, secretary. Organ- d December, 1907, under laws of Arizona, with capitalization $3,000,000, ares $1 par, as successor of Long Beach & Arizona Mining Co. Reorganiza- n was said to have been effected to eliminate certain stock interests, on ac- unt of an alleged illegal stock issue.

Lands, 10 claims, including 3 held under bond and lease, circa 10 miles ith of Jerome, carrying auriferous copper ore, opened by a 150′ tunnel and ifts of 150′ and 250′. The Rawhide group, 7 claims, near Yaeger Cañon, 8 les southwest of Jerome, is opened by shafts of 150′ and 165′. Idle since vember, 1907.

SWASTIKA COPPER MINING CO. MONT

Office: Missoula, Missoula Co., Mont. Mine office: Superior, Mi Co., Mont. Employs 8 men. Thos. N. Marlowe, president; J. W. MacD vice-president and general manager; Geo. E. Marlowe, secretary; Th Marlowe, treasurer; E. P. Kribs, engineer. Organized July, 1907, unde of Montana, with capitalization $150,000, shares 10 cents par; fully issue

Lands, 10 claims, unpatented, area 200 acres, and a 5-acre millsit timbered, in the Carter district, showing 2 parallel veins, of 6" to 8" in traceable one-half mile, carrying paystreaks of 2" to 4", containing mal bornite and chalcopyrite, said to give assays of 17 to 32.5% copper, oz. silver and from a trace to $6.40 gold per ton, and estimated, by co to average 35% copper, 112 oz. silver and $6.40 gold per ton. Devel is by tunnels of 60', 160' and 270', with 12 trenches. Company plan tinuous development.

SWASTIKA COPPER & SILVER MINING CO. ARI

Office and mine: Tucson, Pima Co., Ariz. W. K. Royce, president; Cochran, vice-president; J. S. Hopley, secretary; J. M. Ormsby, tre Capitalization $1,500,000, shares $1 par. Lands, 24 claims, unpatent cluding the Swastika group of 14 claims and the Calendar group of 10 circa 3 miles south of Olive camp. The Swastika group carries silv ores and the Calendar group silver-copper ores. Has 360' of workin employs horsepower.

SWEDEN COPPER CO. WASHIN

Dead. Merged, circa 1903, in Mt. St. Helens Consolidated Min Formerly at Spirit Lake, Skamania Co., Wash.

SWISHELM DEVELOPMENT CO. ARI

Mine office: Benson, Cochise Co., Ariz. Lands, 40 claims, in th helm Mountains. Idle and presumably moribund.

SWISS GIRL MINING CO. ARI

Dead. Lands sold, circa 1901, to Baumann Copper Co. Formerly at Yavapai Co., Ariz.

SYCAMORE MINING, SMELTING & DEVELOPMENT CO. ARI

Office: Fort Worth, Tex. Mine office: Jerome, Yavapai Co., Ariz. Stover, president; H. Martin, vice-president and superintendent; W. I iams, secretary and treasurer; preceding officers, Henry O'Toole, H. and C. R. Knutson, directors; Max Winchel, foreman. Organized und of Arizona, with capitalization $1,000,000, shares $1 par.

Lands, on the Verde River, are distant from Jerome 4 miles in line, and 13 miles by wagon road. Mine has a 325' two-compartmen bottomed in low grade chalcopyrite, assaying 1 to 3% copper, which p will be abandoned by reason of trouble from gases and foul air. Has ore assaying 7% copper, 6 oz. silver and $18 gold per ton. Equipm cludes necessary mine buildings and a good steam plant. Was diamon ing at last accounts.

SYLVANIA GOLD & COPPER MINING & MILLING CO. WYO

Dead. Formerly at Centennial, Albany Co., Wyo.

SYNDICATED DEEP MINES, INC. WASHIN

Office: Spokane, Wash. Mine office: Republic, Ferry Co., Wash. Anderson, president; M. J. Costello, vice-president; J. E. McFarland tary and treasurer; J. L. Harper, general manager and chairman ex board; Neil Cochrane, superintendent. Organized September, 1907, und of Washington. Lands include the Lone Pine-Surprise and Pearl Conso mines, also a bond and lease on the Manila mine, which is said t considerable copper. Property was reopened and shipments to Granby begun, March, 1908. Plans sinking shaft to depth of 1,000'.

CATED DEEP MINES, INC. **WASHINGTON.**
ce: Wallace, Idaho. Mine office: Saltese, Missoula Co., Mont. Or-
1906, with capitalization $1,500,000, shares $1 par. Lands, 6 claims,
miles northwest of Saltese. Presumably idle.

ACACHI MINING CO. **MEXICO.**
ie office: Moctezuma, Sonora, Mex. R. O. Fife, superintendent. Has
us and argentiferous copper ores.

S-FINANA COPPER CO., LTD. **SPAIN.**
id. Voluntarily wound up, December, 1901. Formerly at Tablas, Granada,

MOUNTAIN COPPER CO. **ARIZONA.**
ter returned unclaimed from former mine office, Kelvin, Pinal Co.,
s controlled by Arimex Consolidated Copper Co., through ownership of
stock issue. Lands, 27 claims, in the Bunker Hill district. Long idle
small promise.

ÑIA MINERA EL TABOR y ANEXAS. **MEXICO.**
ce: Mexico, D. F. Mine office: Asientos, Ocampo, Aguascalientes,
Antonio Morfín, president; Bruno Newman, manager. Has secured ore
g up to 43% copper, with good silver and gold values.

DAD BENEFICIADORA DE METALES DE TACNA. **CHILE.**
rks office: Tacna, Tacna, Chile. Organized Jan. 10, 1901, under laws
, with capitalization 68,250 pesos, shares 250 pesos par. Property is
r, which, in 1903, treated 4,066 metric tons of ore, producing therefrom
kilograms of ejes averaging about 50% copper tenor, carrying 806,839
copper.

A CO. **BRITISH COLUMBIA & WASHINGTON.**
ce: Tacoma, Wash. Mine offices: Van Anda, Texada Island, B. C.,
rrington, Snohomish Co., Wash. A. Grant, general manager. Capital-
$3,000,000, reduced from $5,000,000. Paid a $35,000 dividend, Apr.

ds include a gold-copper mine at Darrington, idle for several years,
s of iron ore lands on Redonda Island, British Columbia, 4,000 acres
s carrying coke and coal in Washington, and the Marble Bay mine,
) acres, crown-granted, which was bought for $150,000. Profits from
e are said to have paid for the property in 3 years. Mine, about
th mile from the Cornell and Copper Queen mines, has ores of similar
r and occurrence, found mainly in large chutes, carrying argentiferous
and chalcopyrite, averaging circa 5% copper, 2 oz. silver and $1 gold
Development is by several tunnels and shafts, main shaft being 860'
ith 10th level, opened at bottom, showing auriferous bornite of good
both copper and gold, values increasing with depth. Shaft has a 90'
frame, with steam and electric power.
oncentrator, of 150 tons daily capacity, is connected by a 2,125' aërial
th ore bunkers on Sturt Bay, but has been idle several years, ore being
ected on sorting tables, before shipment. The Marble Bay property
a limestone quarry and 4 kilns, with daily capacity of 300 barrels of
Mine employs 60 men, and in 1907 shipped 6,237 tons of ore, carrying
)0,000 lbs. fine copper, production being only about 60% of normal
of a miners' strike and low price of copper. Mine considered valuable
nagement good.

A SMELTING CO. **WASHINGTON.**
ce: 71 Broadway, New York, N. Y. Works office: Tacoma, Pierce
sh. Employs 675 men. W. R. Rust, president, treasurer and general
r; Edw Brush, vice-president; D. Craig, secretary; F. W. Clark, assist-
nager; L. J. W. Jones, general superintendent; preceding officers and

E. B. Braden, directors; T. R. Wilkinson, refinery superintendent; Roger T assistant superintendent copper smelter; R. F. McElveney, assistant su tendent lead smelter.

Organized 1898, under laws of Washington, with capitalization $5 shares $1 par. Is controlled, through stock ownership, by American S Securities Co.

Lands include an extensive and well located smelter site, 6 mile Tacoma, on Puget Sound. The property is on tidewater, and tidal fl being reclaimed, by filling in with slag. There are extensive wharv ore-bunkers and automatic devices for unloading cargoes, a small electr line connecting the wharves with all departments of the works.

The smelter, of 1,200 tons daily capacity, built originally of 3 capacity, for lead ores only, now treats lead mattes, and copper, lea and gold ores and concentrates from the entire western coast of North A and even does a considerable business on South American ores.

The smelter has three 60-ton mechanical roasters, and two 10-to roasters, in addition to which a limited amount of ore is heap-roasted are 6 blast-furnaces, including four 100-ton stacks, used for lead smelt a 400-ton water-jacket blast-furnace for copper, 42x160" at the tuyer forehearth 14' in diameter and 4' high, holding 60 tons of molten m 36" cupola remelting furnace, with outside settler, can treat 75 tons matte daily. The reverberatory furnaces are of 350 tons daily capa there is a circular slag-casting machine, having 144 tilting molds. T dust-flues of the blast and reverberatory furnaces lead to a 306' stack, forced concrete.

The converter department, equipped with a 30-ton electric traveli has 2 stands and six 72x100" shells, of barrel type.

The works include a 35-ton electrolytic refinery, having a 20-ton traveling crane, for handling anodes and cathodes.

The works use electric power mainly, a 40,000-volt current, tra to the works, being stepped down, at the plant, to 100 volts, for v works require about 2,000 electric h. p., and fuel is petroleum, brou the oil fields of southern California in tank steamers. The lead furna blast furnished by 3 Connersville blowers, driven by a 200-h. p. West induction motor.

The management of the Tacoma smelter is progressive, and th lurgical practice good, this being one of the most important custom on the Pacific coast.

TADERGOUNT MINE. A

Mine office: Takitount, Philippeville, Algeria. Is owned by Sto et Cie. Property carries veins of tetrahedrite, presumably argentife oxidized copper ores in schist and limestone. Mine, slightly devel been abandoned at various times, owing to excessive inflow of w 1905, with a force of 80 men, produced 150 tons of ore, sent to St. Rhône, France, for smelting.

TAKARA MINE.

Office: Takara-mura, Minami-tsurugori, Kai, Japan. Production as follows: 417,123 lbs. fine copper in 1903; 541,065 lbs. in 1906, an lbs. in 1907.

TAKILMA SMELTING CO. C

Office: P. O. Box 1487, Colorado Springs, Colo. Works office: Josephine Co., Ore. Chas. L. Tutt, president; K. R. Babbitt, vice-p J. A. Hull, secretary and treasurer; Geo. Crerar, manager; C. J. Murph intendent. Organized under laws of Colorado, with capitalization shares $10 par.

ls, 175 acres, 160 acres patented, also a 160-acre smelter site, with ldings of 335 acres, in the Waldo district, including the Queen of nd Cowboy mines. The mining property shows diorite and serpentine, several veins, with north and south strike, of which 3 are more or loped. The company has a sawmill.

Queen of Bronze mine carries heavy auriferous copper sulphides, said, mer management, to assay 12 to 60% copper, which figures would un- y be cut heavily by the present owners. Development is by a 150′ d by tunnels of 200′, 640′ and 150′, with several thousand feet of , estimated, 1906, to show circa 20,000 tons of oxidized and sulphide ing average assays of circa 8% copper and $2.50 gold per ton, with up to 50% in copper tenor.

Cowboy mine, developed by a 310′ tunnel connecting with a 160′ in- ft, carries mainly oxidized ores.

smelter, at Takilma, receiving ore by wagon and tram-line, has a water-jacket blast-furnace, making matte averaging 45% copper, 2.5 and $2.50 gold per ton, shipped to the Tacoma smelter for refining. supply is somewhat uncertain, and in 1907 the works imported Jap- te, packed in 100-lb. bags.

g to heavy rains in fall and winter, causing impassable roads, the is worked only in summer, the nearest railroad point being Grants miles distant During the active season 60 teams are employed, to matte and haul in coke and supplies.

uction, 1905, was 7,543 tons of ore smelted, yielding 1,563 tons of about 45% copper tenor, indicating average returns of 8% copper smelted. Production, 1907, was 499,662 lbs. fine copper. The man- is good, and with rail connections, very badly needed, the property come of some importance.

AN MINING CO. **UTAH.**

l. Former office was at Salt Lake City, Utah, with officers as follows: Keon, president; Jas. Ingebretzen, vice-president; J. W. Stringfellow, and treasurer; preceding officers and Frank Knox, directors. Was 1906, with capitalization $300,000, shares $1 par. Lands were 11 claims, carrying mainly silver and silver-lead ores. Was merged, 1908, in Cedar-Talisman Consolidated Mines Co. Formerly in Beaver Utah.

OOSA COPPER MINES. **GEORGIA.**

l. Succeeded, Jan. 24, 1905, by Georgia & Tennessee Copper Co. at Temple, Haralson Co., Ga.

NIA DE MINAS Y BENEFICIADORA DE TALTAL. **CHILE.**

e: Valparaiso, Chile. Mine office: Taltal, Antofagasta, Chile. Or- May 31, 1902, under laws of Chile, with capitalization 500,000 pesos, pesos par

. RAILWAY CO., LTD. **CHILE.**

e: 32 Great George St., Westminster, London, S. W., Eng. Works Taltal, Antofagasta, Chile. Organized circa 1907, as successor of melting Co., Ltd.

ls, in the Canchas district, 30 miles from Taltal, carry a fissure vein 40″ width, showing carbonate copper ores, with ferruginous gangue, erty being but slightly developed, at last accounts.

smelter, rebuilt and blown in March, 1904, is served by the Taltal a spur of which enters the works, the main line of which runs near . The smelter has revolving calciners, an 80-ton water-jacket blast- 30x72″ at the tuyeres, 2 reverberatory furnaces, and a casting furnace. n, 1905, *under old management*, was circa 3,700,000 lbs. fine copper.

TALYSARN COPPER MINES, LTD.

Mine office: Nanttle Vale, Talysarn, Carnarvon, Wales. Organ 23, 1907, under laws of Great Britain, with capitalization £60,000, shar

TAMA MINE.

Mine office: Bastia, Corsica. In 1906 produced 385 tons of copper ore, shipped to Great Britain for reduction.

TAMARACK JUNIOR MINE.

Owned by Osceola Consolidated Mining Co.

TAMARACK MINING CO.

Office: 303-199 Washington St., Boston, Mass. Mine office: Houghton Co., Mich. Works office: Hubbell, Houghton Co., Mich. circa 1,500 men. Albert S. Bigelow, president; Hon. Norman W. H president and general manager; Wm. J. Ladd, secretary and trea ceding officers, Edw. S. Grew, J. Henry Brooks, Jos. S. Bigelow and Anthony, directors; Wm. J. Uren, general superintendent; John assistant superintendent; Chas. D. Hohl, chief engineer; John T. R eral clerk and purchasing agent; Wm. Harris, chief clerk; A. Lineo mill superintendent; H. B. Claussen, superintendent motive power; ters, chief mining captain; John Rowe and Wm. Rosevear, mining

Organized 1882, under laws of Michigan, with capitalization shares $25 par. Began dividend payments, 1888, and, to end of 19 dividends, aggregating $9,420,000. Dividends were $300,000 in $420,000 in 1907. Loss on operations, 1907, was $249,277, and oper probably resulted in a small deficit. Annual meeting, first Thursd

Lands, 1,120 acres, in Sections 10, 11, 14 and 15, Town 56 No 33 West, also the Cliff mine, in Keweenaw county, a millsite on T and miscellaneous timber lands and other realty, giving total lande of 8,640 acres.

The Tamarack mine proper is a tract of very irregular outlin on all sides by lands of the Calumet & Hecla, and the mine is ope underlays of the Calumet conglomerate and Osceola amygdaloidal mine was planned by the late Capt. John Daniell, who conceived opening the underlay of the conglomerate by a deep vertical sha work of sinking No. 1 shaft was begun 1882, and the conglomera 1885, three and a half years later, at a depth only 10′ greater tha mate of Capt. Daniell, made before the first sod was removed.

The mine is opened by 5 shafts. The South Tamarack incl Nos. 1 and 2, the original openings, while Nos. 3 and 4 are known a Tamarack, and No. 5, the newest shaft, is about midway betwee and south workings. Nos. 3 and 5 shafts are connected on a le the 38th in No. 5 and the 16th in No. 3. All shafts are connected u giving improved ventilation. The mine, as a whole, uses about 75 p and, in 1907, made 6,221′ of new openings. Sub-levels are opened cessive use of timber, and stope-drifts are opened, 12x12′ in size. are in use, saving much timbering. The entire system of minin changed, and stopes are now left with light timbering, permitting th to cave after ore is extracted. Since the earthquake of 1905, th water has been considerably increased. The company's operatio ducted extensively on the Osceola amygdaloid, as well as on the C glomerate, the latter showing decreased values with depth.

No. 1 shaft, 3,409′ deep, not deepened for some years, cuts t conglomerate at depth of 2,270′, and also cuts the Osceola amy about 1,000′ greater depth. In this shaft, as in all others, the va are reached by crosscuts, except at the actual point of intersection, ing to both the conglomerate and amygdaloidal beds. The normal

pacity of No. 1 shaft is 400 tons daily. This shaft has 2 Nordberg direct-ing duplex pumps, on 6th and 9th levels, these having Corliss steam-ends, h with capacity to lift 600 gallons per minute from the 9th level. A fire t broke out January, 1906, on the 22d level of No. 2 shaft, burned itself August, 1907, in No. 1 shaft, lasting for 19 months, after which No. 1 ft was repaired and retimbered. This fire cost about $200,000. Equipment No. 1 includes a powerful hoist, good for the life of the shaft.

No. 2 shaft, 4,355' deep, not deepened for several years, is a short distance theast of No. 1, and was straightened and retimbered, 1904, being given ouble lining, with the inner wall braced against the outer by timbers of ying lengths, which can be shortened or replaced from time to time. The in this shaft, 1906-1907, caused considerable damage, and necessitated mbering, but the shaft has been a producer since Jan. 16, 1907. No. 2 has owerful hoist and the management plans swinging Kimberley skips under cages.

No. 3 shaft, 5,253' deep, nearly a mile north of No. 1, is the deepest in the d, a 30' winze sunk near the shaft having its bottom 3' more than a mile ically below the earth's surface. This shaft cuts the Calumet conglom-e at a vertical depth of 4,185', where the bed is 20' to 25' wide, but irregu-n values, and far from rich, though payable, as a rule, normal productive acity of the shaft being circa 1,000 tons daily. A sub-shaft, starting from 14th level, was begun, 1908. No. 3 shaft has mechanical haulage on the , 16th, 17th, 31st, 32d and 35th levels. Haulage is by endless rope, with ngine actuated by compressed air, and the management plans installing a er haulage engine, 1909, on the 18th level.

No. 3 shaft has an Allis-Chalmers hoist, formerly having a double conical n, of 13' 6" diameter at either end and 36' 9" diameter in the center, the e winding over specially built-up runs of steel, affixed to the surface of drum, which worked in counterbalance. A new drum replaced the old, , the discarded drum being nearly worn out. About 20,000 rivets were oved in replacing the drum, as the old drum had to be raised and the hubs n off, and the shaft, weighing 65 tons, also had to be raised. The new n is similar to that of No. 5 shaft, being semi-conical, with 18' maximum neter. The old hoist raised, on test, a 10-ton load, vertically, at a speed 5 miles per hour, and, running at that rate, the cage was stopped in a ance of 75'. Equipment at No. 3 shaft includes a 60-h. p. fan, 10' in neter, with blades 3' 6" wide, capable of supplying 192,000 cubic feet of air per minute, to the depth of the shaft, not only ventilating the mine, also aiding in reducing the temperature, which otherwise would be nearly F., in the bottom levels. There is a 32x72" Nordberg auxiliary hoist, with 8' 6" drum having lathe-turned grooves for coiling the cable, this hoist g used for lowering and raising men and timber in No. 4.

No. 4 shaft, 600' northeast of No. 3, is 4,450' in depth, and has not been ened since bottomed, 1895. Occasional good ground is shown, but the t, as a whole, is poor. Underground connection is had with No. 3, giving ilation, and an emergency exit. No. 4 shaft is used exclusively for hoist-water, lowering and raising men, and for purposes of ventilation and ty. A new concrete lining was substituted, 1904, for the old wooden tim-g through the overburden. The old shafthouse was replaced, 1908, by a frame structure, and a large ventilating fan was taken from No. 1 and lled at No. 4 shaft.

No. 5 shaft, about 3,300' southwest of No. 4, and about midway between ld Tamarack and North Tamarack workings, is the newest and largest in the mine, being 5,089' deep. Sinking was begun Aug. 2, 1895, and onglomerate was cut Dec. 20, 1901, at vertical depth of 4,062', the late

Capt. Wm. E. Parnall having foretold the depth within 12′, and the time required within 11 days, when the work was begun, 6 years previously. This shaft is connected underground with the workings to the north and south.

No. 5 shaft is 7x29′, inside measurement, with 5 compartments in a row. The three central compartments, 5′x7′ 2″ each, are used for cages. One of the end compartments, also used for a cage, is 7′ 2″x5′ 4″, the extra 4″ being allowed for timber strain, while on the other side of the shaft is a compartment 3′x7′ 2″ for ladders, pipes and wires. The 10x14″ wall-plates of this shaft are 29′ 2″ long, and the 5x7″ runners, serving as guides for the cages, are 16′ to 22′ in length. Instead of lag-screws being countersunk, the runners have a central groove, 2″ wide and 1½″ deep, running from top to bottom on both sides of each of the 4 hoisting compartments, these grooves providing for the escape of loosened lag-screws, without damage to cages or runners. The shaft openings have automatic covers that lift for passage of the cages. In sinking this shaft, 83 separate trap, amygdaloidal and conglomerate strata, all barren, were cut before the Calumet conglomerate was reached. The north drifts on the 35th, 36th and 37th levels have been carried to the Calumet & Hecla boundary. As a whole No. 5 shaft is decidedly low in grade, although the conglomerate is of good average width.

The shafthouse and rockhouse at No. 5, built by the Wisconsin Bridge & Iron Co., at a cost of nearly $100,000, are on separate foundations and are separately framed and braced, although apparently standing as one building, 56x120′ on the ground, with an extreme height of 131′. The foundations are exceptionally massive, and the girders and framing are of unusual strength, to withstand the great strains caused by hoisting heavy cages, and the operation of powerful rock-breaking machinery. These buildings required about 700 tons of steel and 100 tons of corrugated iron siding in construction. Although 10 carloads of lumber were used in the building, no wood is exposed, except in the floors, asbestos sheathing-paper being used elsewhere to protect the wood, thus rendering the building practically fireproof. The rockhouse has 3 Portage Lake crushers of the reciprocating jaw type, with room for 5 more when needed.

Surface equipment at No. 5 is the most extensive at any shaft, including engine-house, boiler-house and compressor-building of redstone, with steel truss roofs. The engine-house has 2 duplicate 6,500-h. p. Nordberg hoists, each with four 36″ high-pressure cylinders, having 72″ stroke. The drums are 24′ in diameter, in the center, tapering to 16′ at the ends, each half carrying 6,500′ of 1½″ steel cable, the hoists operating in counterbalance, and being capable of raising, from 6,000′ depth, a net load of 6 tons of rock, this having a gross weight, with cage and cable, of about 12 tons. The hoists cost $60,000 and $90,000 respectively. The boiler-house has six 200-h. p. Burt boilers, with 84″ shells, and two 115′ brick-lined self-supporting steel smokestacks. Coal is delivered to the boiler-room from a railroad trestle.

The 50x75′ redstone compressor-house at No. 5 has a 35-drill Ingersoll-Sergeant 2-stage cross-compound air-compressor, with 18″ and 34″ steam cylinders and 36″ stroke, and a 100-drill triple-expansion Nordberg compressor with 19x53x48″ steam cylinders and 2-stage air cylinders of 18x27x48″.

The electric plant at No. 5 shaft has a 150-kw. generator, and transmits energy to all branches of the mine. Miscellaneous buildings at No. 5 shaft include a stone dry and smithy, and there is an extensive timber yard, on ground filled and graded for the purpose, the site having been swampy originally. There is a large machine-shop, doing work for practically all of the Bigelow mines.

Water for steaming purposes and domestic use is pumped from Lake *Superior*, against a head of nearly 700′. The pumping station, nearly 5 miles

of the mine, is 60x80′ in size, of brick with steel frame, housing two gallon pumps, that take water from a 40′ well on the lakeshore, connected with a tunnel driven 480′ under the bed of the lake, with intake about water-level. Water is delivered by the pumps into 2 steel tanks, 65′ diameter, standing on the highest ground of the mine location, ing a combined storage capacity of 200,000 gallons, water being discharged through the mains from these standpipes, and to the Osceola mine loca-

ompany owns and operates a hospital, 60x60′ in size, with 2 stories, and attic, basement and first floor being of selected Lake Superior upper story and attic of wood, with interior finish of selected quarter-orgia pine. The building has a sun-veranda, elevators and indirect ting.

is a private branch telephone exchange, with instruments at the pump stations in the mine, and in the various offices, shops and mills. ompany has made tentative plans for a large central electric power Dollar Bay, on Portage Lake, but, owing to uncertainty as to the several of the Bigelow mines, now in dispute, this matter has been eyance.

liff mine, owned by the Tamarack, includes the Cliff proper and the I, which were connected underground, June, 1908, on the 3d level. mine, only a short distance northeast of the Ojibway, is the oldest ie Lake Superior district, having been opened 1846, closed 1870, and 1872, but abandoned 1878. The Cliff paid dividends of $2,518,620, to 1879, inclusive. The mine was opened on a fissure vein, which y thoroughly worked out before the property was abandoned, and much silver, perhaps the most of any Michigan mine.

Tamarack secured a complete geological cross-section of the Cliff diamond drilling, 1903-1907. The property carries about 20 amygda-s, under the greenstone bluff, which is such a prominent feature of ape, rising to a height of several hundred feet. The Cliff lands pre-arry the northern extension of the Kearsarge lode. The old Cliff 4 shafts, No. 1 being at the base of the bluff, No. 3 at the edge of nd No. 4 several hundred feet back to the north, all in line, on the n, while the Avery shaft, sunk 40′ to the eastward, was used for-men, timber and pumps. Work was begun, through No. 1 South , about 1,000′ south of the Avery shaft, and in line with Cliff shafts nd 4. Old No. 1 South Cliff shaft had been idle circa 50 years, and leep. The shaft had been unwatered, June, 1908, down to the 6th ing 2 more levels to unwater. The Avery shaft is 480′ deep, with opened at 40′ intervals. In 1907 the management partially cleaned shaft, and on the 3d level, at depth of 177′, drifted on 5 amygda-s, or "floors," as they were termed formerly, by the old company. e management extended a crosscut, on the old Cliff fissure, southeast, iderable distance northwest, to the old works under the greenstone, ont 20 cupriferous amygdaloidal beds, several of which have given s, and seem worthy of further investigation, showing several bunches mp-rock, but the lodes prove, so far as opened, extremely bunchy, lar in values. In 1907 the Cliff mine did 1,046′ of drifting. Equip-o. 1 shaft includes a shaft-rockhouse.

ngs at the Cliff include a power-house, with duplex hoist, 5-drill air- and boilers, a smithy, changing-house, combination office and ware-rding-house and a number of dwellings. The Cliff mine is reached weenaw Central railway.

d waste-burrows of the Cliff, which are extensive, were [illegible] on

royalty, to Henry Warren, who built an 8-stamp gravity mill, but this did not result profitably. Expenses of the Cliff mine, 1907, were $57,214.53, charged directly to operating expenses of the Tamarack company.

The Tamarack has 2 stamp-mills, on Torch Lake, a little more than a mile south of the Calumet & Hecla mills, these having 5 compound heads and 2 simple heads, latter idle, the 5 compound heads being capable of caring for all rock crushed at present. The mills have a combined daily capacity of circa 3,500 tons of conglomerate rock. Stamp-heads are fitted with 8" mortar-grates, opening into ¼" mesh revolving screens, with Parnall-Krause hydraulic discharges. The stamps have Nordberg crushing rolls, to care for raggings from the mortars, these rolls having rigid journals, with independent wash for each set. Finisher jigs have been replaced by Wilfley tables.

No. 1 mill has 5 Allis heads, 3 of which are compounded, and this mill has a steel trestle approach. No. 1 boiler-house has four 200-h. p. Pratt boilers, operated at a steam pressure of 150 lbs. per square inch.

No. 2 mill has 2 steeple-compound Allis-Chalmers stamps, with a traveling crane, and No. 2 boiler-house has seven 200-h. p. boilers.

The joint pumphouse of the Tamarack and Osceola mines has two 40,000,000-gallon pumps and one 15,000,000-gallon pump. The two larger pumps, which are duplicates, have triple-expansion steam ends, with 22", 40" and 60" cylinders of 52" stroke, and the water end has three 30" plungers and a 42" discharge pipe. The foundation for the newest large pump is 27' deep, in solid sandstone.

The mills have a 30x90' machine-shop, of sand-lime brick, with steel roof, and there are a number of dwellings for employes at the millsite.

The Tamarack and Osceola mines have joint wharves, and steel coal-sheds with unloading apparatus, at Dollar Bay, on Portage Lake, these being among the most extensive in the district.

Tamarack mineral is smelted at Dollar Bay, by the Lake Superior Smelting Co., which is controlled by the Tamarack, Osceola and Isle Royale companies, under the same general management. All mineral is transported from mills to furnaces in hopper-cars, saving the former cost of barreling.

Production has been as follows: 657,920 tons of rock stamped, yielding 15,286,093 lbs. fine copper, with an average return of 23.2 lbs. per ton, in 1903; 642,320 tons rock stamped, yielding 14,961,885 lbs. fine copper, an average of 23.3 lbs. per ton, in 1904; 750,120 tons rock stamped, yielding 15,824,008 lbs. fine copper, an average of 21.1 lbs. per ton, in 1905; 389,680 tons rock stamped, yielding 9,832,644 lbs. fine copper, an average of 25.2 lbs. per ton, in 1906; 533,600 tons rock stamped, yielding 11,078,604 lbs. fine copper, an average of 20.8 lbs. per ton, in 1907. Production was circa 13,500,000 lbs. fine copper in 1908.

Gross costs of mining and stamping, per ton of rock, and cost of finished copper, per pound, have been as follows: $2.32 per ton and 11.5 cents per pound, in 1903; $2.42 per ton and 12.98 cents per pound, in 1904; $2.39 per ton and 13.37 cents per pound, in 1905; $3.62 per ton and 14.37 cents per pound, in 1906; $3.28 per ton and 15.82 cents per pound, in 1907. The mine made copper, 1901, for 9.1166 cents per pound, and in 1907 there was a falling off of 4.4 pounds fine copper per ton of rock stamped. The Tamarack always has been an expensive mine to work, and costs have increased, unavoidably, with depth, and the mine has suffered severely from fires. Under normal circumstances, the Tamarack is capable of earning small profits, and the management is to be commended for its vigorous efforts toward lessening costs, in all departments. The Cliff mine, while north of the proven zone of paying mines in Keweenaw county, is but a short distance from mines that are developing well, and is a property of considerable promise.

ICIÓN TAMBORAQUE. **PERÚ.**

orks office: Pacococha, Junín, Perú. Lizandro A. Proaño, owner and er. Property is a smelter, built circa 1906, having a 40-ton water-jacket urnace, 120 kilometers from Callao, at elevation of 9,820′. The Mina nia, having the same owner, has a 3′ to 6′ vein, carrying ore assaying 6% copper and 10 to 20 oz. silver per short ton.

O'SHANTER MINING CO., LTD. **IDAHO.**

fice: Spokane, Wash. Mine office: Osburn, Shoshone Co., Idaho. John urms, president; David C. Coates, secretary; Chas. Gammell, superintend Capitalization $1,000,000, shares $1 par. Lands, 7 claims, 1½ miles south burn, between the Chester and Vortex groups, in the Evolution district. rty has a vein of 5′ to 12′ width at surface, traceable circa 2,000′, carrying highly argentiferous gray copper, opened by an 80′ tunnel and a 50′ shaft, ng ore carrying silver, copper and lead values.

ANYIKA CONCESSIONS, LTD. **RHODESIA.**

ffice: 31 Clement's Lane, London, E. C., Eng. Mine office: Kansanshi, sia. Tyndale White, chairman; Robt. Williams, managing director; L. nd, secretary; John G. Watson, manager in Africa; Allan Gibb, general ger; Thos. Boyne and F. E. Stubt, assistant engineers; J. H. Hayden, manager; John R. Farrell, consulting engineer.

rganized Jan. 20, 1899, under laws of Great Britain, with capitalization 00, increased, later, to £1,000,000, shares £1 par. Debentures, £2,600,000 rized, par £8, at 5%; issued, £1,500,000. Property consists of a 45% share st in the Union Minière du Haut Katanga; a 65% interest in the Kansanshi balance being owned by British South African Co.; a 90% interest in enguella Railway Co., and a 40% interest in the Katanga Railway Co. principal operating company is the Union Minière du Haut Katanga, to the Tanganyika Concessions sold the Ruwe gold mine and the Busanga, aso and Chienzi tin mines.

ands originally were 2,000 square miles, north of the Kafue and Zambesi , in the Katanga district, near the Congo Free State boundary, also 2,000 for railroad and steamship terminals, at the southern end of Lake Tanika, and a 5-year concession, that expired 1905, to explore extensive areas e Congo Free State, and to work any discovered mine for 30 years, with n of extending the period of working to 99 years. In the Congo Free 72 large mining concessions were located, the company estimating that these claims show 15,000,000 long tons of 4% copper ore, most of which be extracted open-cast, and, on another group, the company estimates 000 tons of ore, of 13% copper tenor. The Congo Free State properties been disposed of to the Union Minière du Haut Katanga, in which the nyika company holds a large share interest. The company also has an st in various discoveries in Katanga, until 1911, and mineral prospecting expiring 1912, to circa 120,000 square miles in Angola. The properties Katanga district are in a rolling country, having a healthy climate for rial Africa, with good water and an abundance of wood. The diamond as been used extensively, proving large ore bodies, though some of the highly silicious, and apparently will require special treatment for eco- l reduction. Mr. Williams estimates the average ore tenor of all mines copper, with some mines carrying ores averaging up to 20% copper.

e principal copper mines of the company, in various stages of develop- are the Kansanshi, Kolwezi, Kambobe, Kabalela, Kakanda, Likasye, ume and Star of the Congo, principal development being on the Kan- mine.

Kansanshi mine lies at an elevation of about 5,000′, near the Congo-

Zambesi divide, 12 miles from the Congo Free State boundary, in north
Rhodesia. The Kansanshi is an old property, worked open-cast, by nati
centuries, the mine showing trenches and pits for a distance of circa
these varying in width from 1′ to 75′, and in length from 1,000′ to 1,20
an extreme depth of 50′, there being 6 principal lines of workings,
from 3′ to 30′ in width, from 5′ to 30′ in depth, and from 300′ to 1,300′

Country rock of the Kansanshi is sandstone, overlying limesto
schist, the sandstone being micaceous and fissile in places, elsewhere
clayey, through partial decomposition, the sandstone being more
charged with malachite, occurring as speiss, the upper portions carry
achite and chrysocolla, with occasional occurrences of azurite and me
and some cuprite, with silicious gangue, carrying considerable mangane
ide in the superficial portions. The ferruginous matter in the g
chiefly limonite, usually somewhat ochrous, but occasionally hard and
Surface ores are mainly malachite, said by Mr. Farrell to show no evi
having resulted from alteration of sulphides in place, the results lea
to the opinion that the malachite was deposited from hot solutions, co
fissures. The ore, as a whole, carries an excess of about 25% silica,
require heavy fluxing, for which purpose iron ore and limestone are
distant.

The Kansanshi mine has 5 shafts, sunk in old trenches, on ore bod
to 16′ width. The main shaft, of 300′ depth, is on "D" reef, of
average width, opened for a distance of circa 1,000′, on the 85′ level, o
massive, with copper impregnations in sandstone for 5′ to 10′ on eithe
the vein, ore being mainly malachite, with an average sampling o
copper and circa $2 gold per long ton. The deeper workings show a li
cocite and chalcopyrite, associated with limited quantities of pyrite,
base zone has not been reached, and the depth of the oxidized zone is
as yet. A second level has been opened in this shaft, at depth of
the Kansanshi mine, "E" reef, of 2′ to 3′ width, has been opened
500′ distance, on the 85′ level, and a new reef, of about 4′ width,
opened for nearly 500′ on the 85′ level.

The Kolwezi mine, opened by shaft, has been probed by diam
borings, showing a continuation of the copper beds to considerable d

The Kambobe No. 2 mine has 2 shafts, H and I, of about 100′ de
with crosscuts said to prove an ore body of nearly 200′ width.

The Fungurume mine has 4 short tunnels, one of which is said
penetrated 191′ of ore.

The Likasye mine, slightly developed by tunnel, apparently is id

The Star of the Congo mine is said to have ore of better aver
than the Kansanshi, and it was said, 1907, that developments had ex
tons of 8% ore, which, with assorting, would be self-fluxing.

There are small test smelters at the Kansanshi and Kolwezi min
having a small blast-furnace, and test smelting was begun, circa Janua
According to Mr. Williams, the company planned selection and dressin
so that only about 1 ton in 5 would be sent to the smelter, and it is
that the ore, as mined, requires concentration.

The Benguella railway, of 330 kilometers length, planned to be ab
miles long, when completed, running from Lobito Bay to a smelting
the Lualaba river that is centrally located as to the mines, had 100 mi
pleted and opened for traffic, early 1908. The railroad is planned
circa £4,000,000, complete.

Transportation between the principal mines and the terminus
Rhodesia railway is by 3 traction engines, and the company endeavore
to induce the Rhodesia railway to build a line to the Star of the Cong

ıd of to the Kansanshi mine, serving the latter with a branch line. The ıny hopes to secure railroad connections in 1909.

The Tanganyika Concessions, Ltd., modestly claims to possess the greatest r deposit in the world. This possibly is the case, but, while the deposits f much promise, their exact status remains to be proven by further devel- nt, and extensive smelting operations, and the properties, while of un- ted value, must be considered overestimated. Mr. Williams estimated, that with copper at £50 per long ton, the Katanga mines had $100,000,000 lues developed, and estimated the cost of production and delivery at £25 ong ton of finished copper, which figures are considered not only excessive tonnage, but much lower as to costs than are warranted. Mr. Farrell's nal estimate of costs was £12 per ton of finished copper, in Katanga, but estimate is considered entirely too low, and there is no likelihood that ompany can produce copper, in the interior of Africa, at any such ridicu- price, and if the company succeeds in making copper for three times the ıated cost of 2.6 cents per pound, it will be doing very much better than ıverage copper mine, and the profits will be ample. The Tanganyika Con- ons, Ltd., is considered a property of exceptional promise, but its manage- , while efficient, is entirely too much given to inflated estimates of ton- , and unduly depreciated estimates of probable costs.

tures, £12,500, at 10%, issued June, 1905, redeemable 1915, at par,
at 50% premium. Company offered £30,000 new debentures, late 19

Tasmanian lands are 386 acres, on Mount Black Bear, near the S
in the North Dundas district, including the Rosebery and Ring Riv
also a 5-acre smelter site, all in the West Coast district. The Rosel
has an ore body of 24′ estimated average width, traceable circa 3,
apparently is a replacement of country rock along a line of fault
having a schistose footwall, heavily impregnated with pyrite, and c
paystreak of 6″ to 5′ width for length of circa 500′, with ore assayi
copper and 1.75 oz. silver per long ton. The ore is a complex sulphid
ing auriferous chalcopyrite, sphalerite and galena, from which the zi
have been lost heretofore, no process in use having succeeded in reco
of the metallic values. The Rosebery mine is developed by tunnel
644′. Ore reserves were estimated by the company, 1905, at 158,400
and production, at last accounts, was circa 1,000 long tons monthly.
pany is said to plan a smelter at the Rosebery mine.

South Australian lands include the Blinman mine, and about
small mines and prospects, in the Blinman and Yudnamutana distri
including the Sliding Rock mine, area 78 acres, on the south side
Rock Creek, 14 miles from Beltana, and the Yudnamutana, Leigh
Warra Warra mines. The district is arid, and considerable trouble
enced, in the dry season, from inadequate water supply. The South
holdings also include 7 coal properties, area 10,000 acres, 40 miles
Blinman mine.

The Blinman mine, area 120 acres, with 320 acres of mineral
joining, is in the Flinders range, 272 miles north of Adelaide, and
1902. The Blinman mine, opened 1862 and reopened circa 1899,
bodies of irregular value in micaceous limestone, only the richer port
smelted, the bulk of ore produced requiring concentration. The mi
to have produced considerable ore of 8% average copper tenor, conce
about 23% for shipment to the smelters, in addition to which small
of hand-picked ore, of 30 to 40% copper tenor, have been shipped.
has a 450′ main shaft, and ore reserves were estimated, June, 1904,
tons. The Blinman has a smelter with a 150-ton blast-furnace, at Le
north of the mine, making matte of 50 to 55% copper tenor, when in

Production of the Blinman mine was 5,524 long tons of ore
337,075 lbs. fine copper, in 1904, and 898,240 lbs. fine copper during
half of 1907. Average return of ore smelted, first half of 1905, was ab
copper. The Blinman mine was closed down December, 1907, and
was said, 1908, to have definitely abandoned its properties in South

Flagg, secretary and treasurer; Jas. MacNaugh- anager. Organized Feb. 3, 1880, under laws of Michigan, with capital- n $2,500,000, shares $25 par; issued, $1,373,975. Is controlled, through rship of 54,249 share of the outstanding stock issue of 54,959 shares, by alle Copper Co. Ended fiscal year Apr. 30, 1908, with a debit balance 28,953.

ands, 560 acres, in a very irregular tract lying next south of the Osceola carrying circa 400 acres of the underlay of the Kearsarge amygdaloidal Work was done first on the Calumet conglomerate, where a shaft of about depth found no payable copper. A shaft of circa 2,300' depth, on the la amygdaloid, begun 1899, *was abandoned* November, 1902, being found

practically barren of copper, but recent developments to the northwar depth, in No. 6 shaft of the Osceola mine, indicate the possibility of ground on the Osceola bed, at greater depth than yet reached in the Tecu shaft.

The Tecumseh carries about 1,800' of the strike of the Kearsarge lode has 2 shafts thereon.

No. 1 shaft, of 3 compartments, 6x18' in size, sunk diagonally on the of the lode, was circa 1,400' deep, early 1908, showing a bed of about 15' age width, giving a promising showing of copper. Equipment inclu hoist good for 2,000' depth, raising 3-ton skips, and a 15-drill air-compr

No. 2 shaft, 1,000' north of No. 1, was started Aug. 30, 1905, and was deepened, 1907.

Production, under a former management, was begun circa Nov. 1, at the rate of about 100 tons of rock daily, but was soon discontinued. duction, for year ending Apr. 30, 1908, was 59,875 lbs. fine copper, s from rock mined previous to 1907.

Organized Oct. 27, 1886, under laws of Great Britain, with capit
£1,250,000, shares £2 par. Dividends have been as follows: 17½% y
1904 and 1905; 25% in 1906; 20% in 1907. To end of 1907 th
dividends aggregated 795¾% on the share capital, amounting to the
cent total of £8,852,182, in addition to which the company had writte
sum of £2,416,065, and held the large reserve of £1,138,244, in cash and
ally choice securities. The company's dividends have averaged near
per annum, since 1868, without the lapse of a year in disbursements,
dend record comparable, among copper mines, only with that of the
of Michigan. Net profits, after all deductions, have been as follows: £
in 1903; £215,593 in 1904; £225,135 in 1905; £315,147 in 1906; £216,023

Lands include the Tharsis group, area 1,143 hectares, and the La
group, area 271 hectares, at Alosno, about 30 miles west of the Rio Ti
the Calañas or Zarza group, area 618 hectares, at Calañas, midway betw
Tharsis and Rio Tinto mines. The mines at Alosno, worked by the M
and probably by their predecessors as well, are identified, by some, w
Tarsish of the Bible. General geological conditions are much the sam
the Rio Tinto, the mines being in the southern zone of the Andevallo or
Morena district of Huelva. The property shows 4 main lenses, these
their axes of length southeast by northwest. The largest lense is the C
del Sur, to the south. The Filon del Norte, to the northeast, is ab
meters long and 140 meters in extreme width. The smaller lenses
Criadero de la Sierra Buillones, and the Filon del Medio, to the nor
The Tharsis and Lagunazo have been the principal producers in the p
are nearing exhaustion. The Calañas is developing fairly, and has a
years ore reserves developed. The company also is developing the Alo
Triunfo and Vulcano mines, at Alosno.

The ores of the Tharsis average about 3% copper, 50% sulphur a
iron, with very small quantities of gold, silver, lead, zinc, nickel, b
antimony and arsenic. Ore, after extraction, is piled in heaps and we
this process being assisted by occasional sprinkling. The leach-wat
into creosoted timber sluices, where the copper in solution is depo
pig iron, and precipitate prepared for smelting in the usual manner.

The work of stripping the overburden from the eastern extensio
Sierra Buillones mine is progressing satisfactorily, stripping having a
to 83,374 cubic meters in 1907. Removal of the overburden from the
mines was 145,580 cubic meters in 1906, and 128,266 cubic meters in 1
the Lagunazo mine, operations have been confined, for several years, t
ing tereros.

The company owns a private railway, leading from the mines to
where there is a shipping pier. The line is well supplied with rollin
frequent renewals keeping the equipment modern and efficient.

Owing to the gradual exhaustion of its principal Spanish ore bo
company has been endeavoring, for some years past, to secure new
and, to that end, has investigated properties in Norway, Italy, Cyprus
Mexico, Canada, Tennessee and Arizona. Two contiguous properties,
zona, were under investigation during 1908, and the company is in the
for a mine of cupriferous pyrites, rich in sulphur, with large bodies
and would give consideration to a promising copper property, regar
sulphur values.

The company owns extensive works at various points, including
process plant at Hebburn-on-Tyne, and an electrolytic refinery at Ol

Birmingham, with other works at Wellington-on-Tyne, Cardiff, Wales, ad, a suburb of Glasgow, Scotland.
etion of fine copper was 11,147 long tons in 1898; 5,620 long tons 2,590,226 lbs. in 1905; 10,617,600 lbs. in 1906 and 9,878,400 lbs. in duction for 1907 included 81,034 long tons of ore from the Sierra and 376,658 tons from the Calañas, an increase of 34,310 tons for with the total ore extraction of 457,692 tons, an increase of 19,935 the first increase in ore production for some years, with a decrease ng tons in output of finished copper. Production, 1907, included tons of regulus, and ore shipments, including washed sulphur ore, long tons. The record of this property is one of the best ever made pper mine.

ON-LEHMER MINING CO. **MEXICO.**
returned unclaimed from former office, Omaha, Neb. Mine office: axaca, Mex. Guillermo W. Thompson, general manager. The prop- cotlán has auriferous and argentiferous copper and lead ores, with electric power, employing circa 50 men, at one time. Company also have lands in the Tlacolula, Villa Alta and Ixtlán districts of ith aggregate holdings of circa 1,000 hectares.

ON RIVER COPPER & PLATINUM SYNDICATE. **AUSTRALIA.**
office: Walhalla, Gippsland, Victoria, Australia. Peter Finlayson, Organized circa 1907. The mine, having a 140' shaft, is claimed to need 1,000 tons of copper ore in the past, being one of the very few nes of Victoria.

ON SIDING COPPER & GOLD MINES, LTD. **BRITISH COLUMBIA.**
Was dissolved August, 1904. Formerly in British Columbia.

COPPER MINING & REDUCTION CO. **NEVADA.**

alt Lake Co., Utah. Capt. Henry Stern, president; Chas. W. Sax-
ral manager; J. C. Dick, general superintendent; N. Treloar, mine
dent; E. E. Price, mine foreman. Organized, 1896, with capitaliza-
0,000, and reorganized January, 1906, under laws of Maine, with
ion $3,500,000, shares $5 par. Is controlled, through stock ownership,
ntic Co., and is operated as a close corporation, making no public

include claims in the Tintic district, now idle, on which heavy ex-
gave indifferent results, and the Yampa group, area circa 180 acres,
ork, Bingham Canyon, near the Utah Consolidated and Boston Con-
which shows a vein of 10′ to 200′ width, with average width of circa
ng disseminated chalcocite, covellite and chalcopyrite, formerly esti-
average 3.5% copper and $2 to $5 combined gold and silver values
ut now said to average 1 to 3% copper, 2 oz. silver and $1.50 gold
Ores are highly ferruginous, rendering them valuable for fluxing the
cious ores of the Bingham district.

opment is almost exclusively on the Yampa mine, a fractional claim
an 6 acres area, entirely surrounded by the Utah Consolidated. The
several miles of workings, and is developed by 2 tunnels and a 1,700′
ie Craig haulage tunnel, on the 1,200′ level, is 3,248′ long, intercept-
ain vein at about 2,200′ from the portal, and connecting with the
,448′. There are 12 levels, of which 8 are producing ore, above the
nnel, and the blind shaft on the 1,200′ level connects with the Craig
The Upper, or Yampa tunnel, intersects the shaft at 475′ and runs
)0′ on the vein, ore from the Yampa workings being sent down the
the Craig tunnel for extraction. The management is said to plan
ie shaft to 1,500′ depth. Ore is hauled, in the Craig tunnel, in trains
-ton cars, by 2 electric locomotives. As the ore is soft, heavy tim-
required, square sets being used.

ment includes an electric hoist, at the head of the blind shaft, on
evel. There also is a hoist actuated by compressed air. The power
r the portal of the Craig tunnel, has steam and electric power, with
Ingersoll-Rand air-compressor.

mine has a 12,300′ aërial tram, the longest in the Bingham camp,
on ore-bins at the upper terminal. The tramline saves about 25 cents
n transportation and insures an adequate ore supply for the smelter,
at the lower end of the tram. The smelter is described under title
ter, the Yampa Smelting Co.

ction was 4,699,765 lbs. fine copper in 1906 and 5,001,255 lbs. in
Yampa mine, though small, is valuable, and the management is good.

b Co., Utah. Hon. John A. Edwards, president; Dr. L. W. Snow,
ent; Mansfield L. Snow, secretary, treasurer and general manager;
officers, C. E. Cole and M. K. Green, directors. Organized Aug. 20,
r laws of Utah, with capitalization $100,000, shares $10 par; issued,

, 25 claims, area circa 500 acres, well watered and fairly timbered,
ne Belle district of West Tintic, 8 miles from a railroad, showing

fissure veins in porphyritic rocks and contact deposits in crushed quartzite, there being 10 ore bodies, of which 3 are under develop showing a 10" paystreak of massive galena, estimated to average 12 oz. silver and 75 cents gold per ton.

Development is by three 50' shafts, three 40' tunnels, a 100' tun 250' tunnel. Company plans continuous development.

TINTIC SMELTING CO.

Office: Salt Lake City, Utah. Works office: Silver City, Juab Chas. W. Nibley, president; Jesse Knight, vice-president and general H. E. Rolapp, secretary; John Pingree, treasurer; Bela Kadish, superi preceding officers, David Eccles and C. E. Loose, directors; Howard P. mechanical engineer; Richard F. McCaffrey, metallurgical super Organized circa December, 1906, with capitalization $500,000, share

Property is a newly built reduction plant, of 350 tons daily planned as the first unit of a 700-ton smelter, works including a mill. Smelter has two 14x60' hand-roasters, 4 Kelly cintering conve two 46x162" lead furnaces. The copper department is to include steel frame building, having a 125-ton blast-furnace. Plant is o design, and well equipped throughout, and works are well located for lead ores, with considerable copper ore available, and should prove benefit to the Tintic district and adjoining fields. Planned begin smelting July, 1908, and copper smelting circa September, 1908.

TINTIC STANDARD MINING CO.

Mine office: Eureka, Juab Co., Utah. E. J. Raddatz, general Organized circa October, 1907, with capitalization $1,000,000. L claims, having a fissure vein of 30' to 80' estimated width and a 2 showing low grade lead ore, with gold and copper values.

SOCIEDAD DE LAS MINAS DE COBRE TINTO y SANTA ROSA.

Office: Rue Archimedes, 1, Brussels, Belgium. Mine office: Za Real, Huelva, Spain. Capitalization, 3,000,000 francs. Lands, 111 including El Tinto, Santa Rosa and 9 other old mines. Has a 7- aërial tram to Calañas. Property is leased to the United Alkali Co.,

TIPTON COPPER CO. NEW

Dead. Formerly at Tularosa, Otero Co., N. M.

TIP TOP COPPER CO. A

Office: Commonwealth Bldg., Philadelphia, Pa. Western office: Blk., El Paso, Tex. Mine office: Helvetia, Pima Co., Ariz. Geo. president; S. Charles Pratt, vice-president and general manager. O 1902, under laws of Arizona, with capitalization $1,150,000, shares $1

Lands, 24 claims, area 400 acres, including the Tip Top and Cop claims, also a 100-acre millsite, in the Helvetia district, showing 3 veins, averaging 14' width, carrying carbonate and sulphide ores, givi age assays of 5% copper and 1 oz. silver per ton, with a trace of gold by 7 shafts, of 10' to 150' depth, and several tunnels, longest 958', wi 4,000' of workings. Has gasoline power and has developed consider Was bonded, 1907, to Guggenheim interest, for $250,000, with cash of $75,000, but both parties to bargain were dissatisfied, and property to owners. Made considerable ore shipments, 1906-1907. Production was 298,890 lbs. fine copper. Property considered promising.

TIP TOP COPPER CO. NEW M

Dead. Lands sold, circa 1908, to Burro Mountain Copper Co., for Was akin to a swindle; final dividend to shareholders was 1 mill on the Formerly at Silver City, Grant Co., N. M. Described Vol. VII.

TOP MINE. **ONTARIO.**

Office: Port Arthur, Ont. Mine office: Kashaboiwe, Rainy River district, Col. S. W. Ray, manager; Richard Sandoe, superintendent.

Lands, 4 claims, freehold, area 336 acres, known as locations K62, K63, and K65, 6 miles from Kashaboiwe, on Round Lake in Moss township, ing schist and diorite, carrying 3 contact deposits, ranging up to 150' in , with 2 ore bodies, of 25' estimated average width, carrying circa 18' giving average assays of 7% copper, 5 to 12 oz. silver and $1 to $2 gold ton. Development is by shafts of 50' and 208', with 640' of workings, ated to show 45,000 tons of ore, which seems high. The mine is said to blocked out a considerable amount of ore, of 4 to 6% in copper tenor, on n ranging up to 60' width in the bottom workings.

Equipment includes a 100-h. p. steam plant, with 10-h. p. and 30-h. p. s, and a 5-drill Ingersoll-Sergeant air-compressor. Part of the material smelting plant was secured, 1907, but apparently erection of smelter not . Property considered promising.

PAÑIA MINERA DEL TIRO GENERAL, S. A. **MEXICO.**

Office: 2a Ojcaliente No. 8, Aguascalientes, Mex. Mine office: Charcas, Luis Potosí, Mex. J. G. Creveling, Jr., president and general manager; Layer, vice-president; G. B. Wardman, secretary and treasurer; preced- fficers, Thos. J. Ryder and O. F. Westlund, directors; DeWitt Creveling, intendent; E. J. Cloyd, assistant superintendent; William Mueller, mine intendent; Pablo Fuentes, engineer; W. O. Staples, auditor. Organized 31, 1902, under laws of Mexico, with capitalization 375,000 pesos, shares esos par. Dividends, 1905, were 150,000 pesos.

Lands, 71 pertenencias, area 176 acres, also 25 acres of millsites and a re farm, in the Charcas district. The mine shows 2 main systems, carry- issure veins in porphyry, not far from a limestone contact, the North vein aging 3 to 8 meters width, with known length of circa 450 meters, de- ed for 350 meters length by shafts of 300m., 200m., 130m., 130m., 90m., and 55m., with upwards of 3,000 meters of workings on the North, or vein, showing circa 200,000 metric tons of ore. The workings on the h zone are idle, awaiting the establishment of a concentrating plant ted to this ore, which is of milling grade. The ore developed in the h zone is almost exclusively sulphide, and averages 2% copper, 5% lead, zinc, 430 grams silver and 0.8 grams gold per ton.

The mines, discovered circa A. D. 1583, were worked on a small scale for ly 3 centuries, and on a larger scale since 1859. The property has a 340- steam plant for hoisting and pumping, and in addition makes some use nalacates. Equipment includes 80-h. p. and 100-h. p. hoists, a Cameron on pump, and a 10-drill air-compressor. There is a combination machine carpenter shop, of stone, with good equipments.

The 100-ton mill is planned to be increased to 250 tons capacity. The l as a large number of structures, for various uses, all built of stone, in- ng, a general store, etc.

The stockholders of this company own the Potosí Central railroad, of kilometers length, running from the mine to Las Charcas station, on the can National railroad.

Fuel is Laredo coal, costing $6.85, gold, per ton, delivered, and eastern costing $8.40, gold, per metric ton, delivered. Production, 1905, was 761 lbs. fine copper, made from 48,000 metric tons of ore carrying 2.16% r. Production, 1907, estimated at 2,250,000 lbs. fine copper. Ore costs d per dry metric ton, f. o. b. cars of Mexican Central Railway. Forces, ally, are about 750 men.

Company is a close corporation, with only 35 shareholders. The ment is good, and the property is one of proven merit.

TITANTIC COPPER CO. AR

Office: 224 Milk St., Boston, Mass. Mine and works office: Coconino Co., Ariz. Organized June 3, 1907, under laws of Arizona, w talization $1,000,000, practically as successor of Anita Copper Co., w its lands through foreclosure.

Lands, 50 claims, area 1,000 acres, lying on both sides of the Brig branch of the Santa Fé railway, also a 160-acre millsite and 60 acres neous lands, giving total holdings of 1,220 acres. Property shows erous limestone strata of circa 800′ thickness, carrying 3 irregular or of which one, slightly developed, has oxide and carbonate ores 8 to 15% copper, and 3 to 4 oz. silver per ton, opened by shafts of and 580′, with several short tunnels. Ore, as extracted, carries 4 to 8%

Equipment includes a Fairbanks & Morse gasoline hoist, a 12-dr air-compressor and 8 power drills.

The smelter, at Williams, 47 miles from the mine, with direct munication, has a 100-ton water-jacket blast-furnace, with other eq for a 200-ton smelter.

The company had a contract with the Consolidated Arizona Smelt to furnish fluxing ores, on a basis of 75 cents per ton and 40% of or extracted, the Consolidated Arizona doing the mining, but owing t ruptcy of latter-named company, the contract was terminated, and was idle at last accounts.

GUSTAVO TITUS.

Mine and works office: Olmué, Limache, Valparaiso, Chile. L kilometers from the railway station of Limache, include the Felicidad, ancia and Veta Grande mines, showing large quantities of low grade an and argentiferous copper ore. Smelter, having 1 reverberatory fur 1903 treated 1,300 metric tons of ore averaging 3.5% copper, producin from ejes of 46.89% average copper tenor, carrying 79,702 lbs. fine cop

Office: Pittsburg, Pa. Mine office: Roosevelt, Gila Co., Ariz. S. V. pson, manager. Lands, 79 claims, known as the Schell group, on Tonto k, circa 60 miles from Globe, showing well mineralized ledges carrying erous copper ores giving high assay values in copper, opened by shafts tunnels, with circa 750′ of workings.

EKA COPPER CO. OF ARIZONA. **WYOMING.**
Office: 817 Kansas Ave., Topeka, Kans. Mine office: Centennial, Al- Co., Wyo. Wm. Benton, president and general manager; Dr. N. A. Kra- vice-president; M. F. Reed, secretary and treasurer; G. S. Simons, super- ndent; preceding officers and John R. Bellinger, directors; Sydney Bart- engineer. Organized March 3, 1906, under laws of Arizona, with capi- ation $1,000,000, shares $1 par; issued, $500,000.
Lands, 11 claims, partly patented, area 205 acres, known as the Maudem , in the Lake Creek district, showing fissure veins in granite and diorite, contact deposits between syenite and limestone, ore bodies carrying a little ized ore near surface, with sulphides at depth. The property has 4 ore es under development, principal vein, the Maudem, of 7′ estimated average th, said to be traceable circa 2,100′ carrying oxidized ores near sur- , with chalcocite, bornite, chalcopyrite and tetrahedrite at depth, esti- ed to average 12% copper, 1 to 8 oz. silver and $10 to $160 gold per ton. Maudem mine has a 60′ shaft and an 820′ tunnel, and the Lake Creek e has shafts of 40′ and 70′ and tunnels of 265′ and 365′, property as a le having circa 1,500′ of workings. The Maudem or Joe Davis, and Lake ek mines, are about one mile apart. Company plans continuing the Man- n tunnel to 1,200′ length and adding a light mining equipment.

PEKA MINING CO. **COLORADO.**
Mine office: Russell Gulch, Gilpin Co., Colo. Has gold, silver and cop- ores.

QUIMA COPPER CO. **NEVADA.**
Office and mine: P. O. Box 9, Manhattan, Nye Co., Nev. W. J. Stock, sident; Omer Maris, vice-president and manager; F. P. Jayne, secretary and asurer; preceding officers, J. B. Giffen and L. W. Haworth, directors. Or- ized August, 1906, under laws of South Dakota, with capitalization 00,000, shares $1 par.
Lands, 7 claims, area 120 acres, east of Manhattan and 34 miles from a ay, showing a mineralized zone apparently of about 600′ width, traceable

circa 2,000'. At surface the mineralized zone shows irregular mixtu
altered schists and coarsely crystalline limestone, with frequent irregular g
and iron blowouts, with considerable decomposed ferruginous lime,
friable, with quartz outcrops, all of the various rocks showing carbonat
per stains. Development is by a 180' shaft, at an angle of 65°, on wh
parently is the footwall of the mineralized zone, this shaft showing
bornite, but mainly chalcopyrite below a depth of 20'. Equipment incl
small electric plant, Cornish pump and whim.

TORCH LAKE MINING CO. MICH

Office: care of Thatcher Loring, president, 3-19 Central St., Boston,
Mine office: Leopold Bldg., Houghton, Houghton Co., Mich. Capital
$500,000, shares $25 par. Lands, 1,280 acres, being Sections 35 and 3
56 North, Range 33 East, lying east of the Tecumseh and midway b
Calumet and Lake Linden. Was slightly prospected, 1899-1900, by d
drill borings. Since idle.

TORPEDO MINE. NEW M

Office: 135 Adams St., Chicago, Ills. Mine office: Organ, Donna A
N. M. Geo. E. Wood, president; Harvey E. Rich, secretary; Geo. F
gerald, general manager; R. E. Pringle, engineer; L. G. Tucker, audit

Lands, 16 miles west of Las Cruces, near the Copper Bar mine, ca
ticular ore bodies between limestone and granite, said to be increasing
with depth. Mine, 500' deep, opened circa 1876, is said to have p
upwards of 4,000 tons of ore averaging 14% copper, and some seco
ore of 6% copper tenor was scrammed and shipped from waste dump
steam power. Owing to water inflow of circa 800 gallons per minute, m
idle from 1903 until summer of 1907, when shipments of one carlo
were made to El Paso smelter. Was said, August, 1907, to be building a
matting furnace. Property considered promising.

TORPEDO MINING CO. NEW M

Dead. Property sold, Aug. 11, 1906, to Geo. E. Fitzgerald, et al. I
at Organ, Donna Ana Co., N. M. Described Vol. VI.

COMPAÑIA METALURGICA DE TORREÓN, S. A. M

Office and works: Torreón, Viesca, Coahuila, Mex. Ernesto
president and general manager; Col. Carlos Gonzalez, vice-preside
Pragedis de la Peña, secretary; Lic. Pedro Torres Saldeña, treasurer;
Villegas, comisario; F. S. Villareal, assistant general manager; D
Morgan, general mine superintendent; Ivan Ragaz, assistant mine sup
ent; Ernest Harms, general smelter superintendent; C. A. Heberlein,
smelter superintendent; Chas. Moser, J. W. Pender and Pedro Va
superintendents.

Organized June, 1901, under laws of Mexico, with capitalization
pesos, increased later to 2,500,000 pesos, and again increased,
5,000,000 pesos, shares 100 pesos par, in 1,500,000 pesos 6% preferred
able stock, and 3,500,000 pesos common stock. Paid dividends, April,
14 pesos on preferred and 12 pesos on common shares. Profits, 19
629,279 pesos, and 1906 were 775,285 pesos. Is controlled by the
family.

Lands are extensive, including a number of developed and d
lead mines, and several partly developed copper mines, in northern
The San Diego and Buena Suerte mines, at Santa Barbara, Hidalgo,
mainly galena and sphalerite, having a 200-ton concentrator, and e
about 500 men. Las Adargas mine, Jiménez, Chihuahua, has auriferou
lead ores, employing about 200 men. La Voladora and La Mitra i
Nuevo León, produce silver-lead ores, with a force of circa 100 m
Cabrillas and Las Higueras mines, at Los Muertos, Centro, Coahuila,

ores, and also have promising deposits of iron ore. Company also silver-lead properties of lesser development.

nelter, having connections with all railroad lines entering Torreón, 1,250 tons daily capacity, doing a general custom business on gold, and copper ores, in addition to treating the large production of ay's own mines. Smelter has 10 blast-furnaces, including 8 lead 2 copper stacks, with 8 reverberatory roasters for lead matte, the product carrying only 10 to 15% lead, which is calcined and re- converter plant was added, 1907, to the copper plant. The works ut 600 men.

l the smelter treated 71,294 metric tons of ore, in 1904 treated tric tons, and in 1906 smelted 258,572 metric tons, showing a very growth. Production, 1907, is estimated at 1,250,000 lbs. fine copper. ent through the 1907 panic in better shape than perhaps any other nelter, and is one of the most successful and well-managed metal- erprises in the republic, its success being especially notable because ve works are owned and controlled by Mexicans, who have shown y to compete, on even terms, with the ablest American and Euro- g men and financiers.

NTINENTAL SILVER & COPPER MINING CO., LTD. **IDAHO.**

23 West Granite St., Butte, Mont. Letter returned unclaimed r mine office, Mullan, Shoshone Co., Idaho. Hon. W. W. Woods, Geo. E. Marlowe, secretary and treasurer; A. J. Gillis, general receding officers, Col. Thos. Marshall and Thos. Marlowe, directors. circa 1906, with capitalization $1,500,000, shares $1 par. Lands, near the Reindeer mine, south of Mullan, showing a vein of 100' lth, producing surface ores assaying up to 14% copper and 2 oz. on. Has a 110' tunnel.

TRANSVAAL COPPER CO. M

Office: 1408 Traction Bldg., Cincinnati, Ohio. Mine office: Moctezuma, Sonora, Mex. Louis J. Hauck, president; Louis Hehma president; J. M. Eilers, second vice-president; H. C. Beauchamp, sec Alfred Vogler, treasurer; preceding officers, Percy Andrae, Bernard F F. H. Cloud, Theo. M. Foucar and O. C. Rasch, directors; Jas. T. Mc mine superintendent. Organized December, 1901, and reorganized July under laws of West Virginia, with capitalization $6,200,000, shares $ issued, $2,700,000.

Lands, 794 pertenencias, area 1,966 acres, also a 50-acre smelter si the Cloud ranch, of circa 15,000 acres area, with an interest in the San T Tolentino ranch, of about 26,000 acres area. The ranches include timb grazing lands, all property being in the Moctezuma district. The p shows 8 ore bodies, occurring as fissure veins and lenses, on which about of development work has been done, with deepest workings circa 600'.

The copper and silver-lead ore bodies occur as fissures, and also a mineralized dikes, in trachyte and rhyolite. Copper ores are mainly and chalcopyrite, with occasional chalcocite, carrying the usual oxide a bonate ores on the outcrops. The ore bodies of the Cobre Rico and Tr are mineralized dikes of apparently 200' to 300' width, carrying low copper sulphides, associated with iron pyrites and having a quartzose hence liable to prove silicious and require heavy fluxing. The Cobre R Transvaal No. 1 are estimated by the management to show about 2, tons of low grade ore.

The Cobre Rico mine has 2 shafts and 2 tunnels, showing ore of trating grade, estimated to average about 3% copper, 3 to 4 oz. sil $1.50 gold per metric ton. Shaft No. 1 is circa 100' deep and shaft 1 140' in depth, and the tunnels are of about 2,000' aggregate length. T is wide, exposing a considerable amount of ore.

The Transvaal mine has shafts of 210' and 318', with about a tunnels, blocking out considerable ore averaging circa 3% copper, 2 silver and $1 to $1.50 gold per ton. Equipment at the Transvaal in steam hoist, 2 Cameron pumps, two 80-h. p. boilers and a Sullivan pressor.

The Buckeye mine, opened by tunnel, with about 4,000' of workin vein of 18" to 50" width, said to average circa 12% copper, 10 to 35 and $1.50 gold per ton, with 2,500 tons of ore estimated to be blocked

The San Nicolás mine has a 250' shaft and circa 3,000' of tunnel oping a 4' vein carrying silver-lead values, said to average about 60 per ton, with 6,000 tons of ore blocked out for stoping. Equipment a steam hoist, two 80-h. p. boilers and a Sullivan air-compressor.

The Ultima Chanza mine is opened by circa 500' of tunnels, sho estimated to average about 10% copper, with gold and silver values.

The Virginia mine, having a vein estimated at 15' average widt ore carrying gold values estimated as averaging $12 per ton, devel circa 1,000' of workings.

The Guadalupe mine carries cupriferous iron ore, used for flu copper ores smelted by the company.

Buildings include an engine-house, boiler-house, shafthouse, mach office, laboratory, boarding-house, 6 dwellings and a 22x90' general st a branch store at the smelter. The company has a hospital, and a $5, phone system.

Nearest railroad is the Nacozari line, 26 miles distant, but a projec has been surveyed into the district by the Cananea, Rio Yaqui y Pacific company has laid out about 35 miles of wagon roads and 25 miles of t

of about $50,000, maintenance of roads and trails requiring about $5,000 . A small smelter, having a 35-ton reverberatory furnace, located at the ye mine, was blown in, 1905, but closed down shortly, owing to unsatis- y operation, and was again blown in, circa November, 1905, when it was o be making a matte carrying up to 65% copper, 55 oz. silver and $7 er ton.

he main smelter, 15 to 20 miles from the mines, at Cumpas, where located e of ample water supply and a good site, has a 150-ton water-jacket furnace, 42x120" at the tuyeres, and a 20-ton reverberatory furnace, with nd power for 2 additional 150-ton stacks. There also is a small sampling The power plant includes three 80-h. p. boilers, a tandem-compound en- nd a Connersville blower. This smelter was blown in May 1, 1906, doing eral custom business, producing matte averaging 40% copper, 100 oz. silver .5 oz. gold per ton, shipped to Nichols works for refining.

he smelter was blown out, October, 1907, and the mine closed a little remaining idle during 1908. The property is of considerable promise, but usly cannot be operated at a profit without rail transportation. About les of narrow-gauge line will be required to connect the smelter with the s mines, and this will not be a cheap line to construct. The smelter eeds direct rail connection for receipt of fuel and shipment of its pro- n. The company's management is composed of solid business men of standing.

ERS CONSOLIDATED MINING CO. **MEXICO.**

ad. Title changed, 1905, to Travers-Durkee Coppers. Formerly at uma, Sonora, Mex.

ERS-DURKEE COPPERS. **MEXICO.**

fice: 805 Rookery Bldg., Chicago, Ills. Mine office: Moctezuma, Sonora, Richard P. Travers, president; Henry R. Durkee, secretary and treas- preceding officers, Francis H. Leggett, W. C. Travers and F. S. Lewis, rs; Thos. Travers, *superintendent.*

Organized June 14, 1905, under laws of Arizona, as Travers Con Mining Co., with capitalization $6,000,000, increased October, 1905, to $1 shares $10 par, and name changed, December, 1905, to present title ern Trust & Savings Bank, Chicago, registrar and transfer agent. meeting, first Tuesday in June.

On Feb. 23, 1907, the company borrowed, of the Copper Queen Co Mining Co., $300,000, at 6%, on notes payable one-half in 2 years half in 3 years, secured by mortgage, the company giving the Copp notes for $300,000 and a bonus of 100,000 shares of stock, for $225, The company is said to have settled all deferred payments on the from proceeds of money borrowed from the Copper Queen. Mr. T said to have promised a dividend for January, 1909, but if so, the p not likely to be redeemed.

Lands, 11 groups, area, 1,410 acres, 3 miles from the forks of t river, also a 12,000-acre ranch, surrounding the mineral lands, bought, about $25,000, and the Marguerite and Inez claims, adjoining the lands. Property includes the Promontorio mine, in the Promontor tains, circa 35 miles southeast of Moctezuma, and about 80 miles nearest railway at Nacozari. The Promontorio is an antigua, said produced the copper from which were cast the bells on the old Moctezuma, built A. D. 1640. During the American Civil War ore from this mine was packed, on mules, 40 miles, to Guaymas, and s Swansea, for smelting.

The Promontorio shows diorite, granite and limestone, carrying o in a shear zone between granite and diorite. The company report body, under development, as circa 300′ wide, carrying a 30′ paystreak to average 20% copper, with circa 12.5% copper for an additional 2.25% copper for balance of 210′, with 3 oz. silver and $4 gold p high-grade ore and circa 2 oz. silver per ton in the low-grade ore, h ore being chiefly bornite and low-grade ore disseminated chalcopyrit pany also claims that 10′ of the ore in the 30′ paystreak will aver 40%, being massive bornite. Prof. W. A. Crosby states that the facts an ore body of practically 50′ width, 1,000′ or more in length, and of depth, bordered by a broader zone of relatively low-grade ore, i grading insensibly into the rock walls. The low-grade zone is upwar in width, with a granite footwall, also carrying low-grade impregn copper. Dr. Franklin Carpenter states that the zone of secondary en may be expected to continue to considerable depth. The claims put the company are excessive, as, although there is considerable bornit in the mine, the average grade of ore is too low in copper tenor to st ment, and should be concentrated or smelted on the ground, if it worked at a profit.

Development, 1906, consisted of a 125′ shaft and tunnels of 175′ with total workings of 1,125′, estimated to show 360,000 tons of hi ore, and 1,440,000 tons of low-grade ore, which figures are excessiv property is well situated for development by tunnel.

The Inez mine shows a large gossan, mined for flux, underneath cupriferous pyrrhotite, carrying small gold and silver values, and the also to have another ore body of promise, carrying auriferous and argen copper ore.

The mine has been developed, without steam power, by tunnels, company has planned utilizing a large available water power Yaqui river.

The company has a 7-mile narrow gauge railway, laid with T rails, from the mine to the smelter, and thence to the valley, connecting by

with Nacozari. The projected Yaqui river branch of the Southern Pacific ay is surveyed to pass a short distance from the Promontorio mine. he smelter, planned to have a 75-ton water-jacket blast-furnace, was ed to be blown in November, 1907, but at last accounts was not completed, f the material not being on the ground.

little production has been secured, from high-grade ore, shipped to rs at Douglas and El Paso. Apparently the company has failed to carry very liberal promises as to production and development, and presumably , and in all likelihood is in poor shape financially.

ERSELLA MINES, LTD. **ITALY.**

TREVEDDOE MINING CO., LTD.

Office: 13 Throgmorton Ave., London, E. C., Eng. Mine offi Cornwall, Eng. Col. Wm. F. Leese, chairman; R. Arthur Thom Wm. H. Adams, secretary. Organized Aug. 13, 1900, under la Britain, with capitalization £100,000, shares £5 par; issued, £95,000 £17,500 authorized, £16,000 outstanding, at 5%. Lands, 500 a 100-year lease, subject to rental and royalty, bearing tin and Production, 1902, was 60 tons of black tin and 175 tons of 7% Operations, 1904, resulted in a net loss of £2,250, and for 1906 of £158.

TRIANGLE MINES CO.

Mine office: McCabe, Yavapai Co., Ariz. Organized 190 claims, at McCabe, having a 378' shaft showing auriferous copp of fair assay tenor. Idle at last accounts, because of legal tr

chard T. Green, directors; Woolsey McA. Johnson, consulting engineer; Bull, superintendent.

ganized 1903, under laws of Arizona, with capitalization $5,250,000. $1 par, and capitalization changed, 1906, to $5,250,000, in $250,000 ed and $5,000,000 common stock, shares $5 par. The preferred cumu- stock has dividends in arrears since 1903. At end of fiscal year June 8, the company had in cash, notes and bills receivable, $32,000, with ons of high-grade ore and 25,000 tons of milling ore extracted, estimated th $220,000.

nds include a zinc property in New Mexico, copper lands in Arizona e Tri-Bullion group of copper claims in Jefferson county, Montana.

e Tri-Bullion group, area 180 acres, in the Pipestone district of Jeffer- unty, Montana, was said, 1907, to have 800′ of shafts and opencuts. ntly this has been idle for some time.

e Arizona claims include the Tri-Bullion group of 8 gold and silver apparently idle, and the Starlight group of 14 copper and lead claims, located in Godless Gulch, in the Stanley Butte district, 8 miles south Carlos. The Starlight mine was discovered 1886, but was not opened 903, because a part of the San Carlos Indian Reservation, until lands egregated, 1901. The Starlight group shows porphyry, quartz, granite nestone, carrying 3 known ore bodies, of 3′ estimated average width, oxidized ores estimated to average 8% copper, 10 oz. silver and $1 r ton, with more or less lead, zinc, antimony and bismuth, with some aying up to 8% copper, 40% lead, 10 oz. silver and $3.50 gold per ton. e is low in silica and rich in lead and iron, rendering it self-fluxing, istanding the existence of highly deleterious elements. The Starlight as shafts of 140′ and 200′, and a tunnel, planned to connect with the t 1,000′, giving a back of 500′. The Will Ryan group has a 1,200′ t tunnel, said to show considerable quantities of low-grade ore. The ht group shows the wreck of an ancient adobe smelter, remaining from rations by Mexicans or Spaniards.

e Kelly mine, which is the company's principal property, area 13 near Magdalena, is primarily a zinc mine, with considerable lead but carries some copper, the upper working showing mainly zinc car- . First grade lead ore is said to run 20 to 25% zinc, and 8 to 12% nd zinc ore is said to average up to 2% copper, 32 to 35% zinc, 3% rea 8 oz. silver and 75 cents gold per ton. There is evidence of increas- pper values with depth. Development is by the Kelly, Paschal and shafts, latter, of 3 compartments, with a steel gallows-frame, being show a 40′ ore body on the 300′ level. The Nit mine, adjoining the , is said to show a body of heavy sulphide ore. The company estimated, 907, that by the end of the year it would have enough ore blocked 10 years' production.

uipment at the Kelly mine includes a power-house with three 150-h. p. an 18x36″ first-motion double-cylinder double-drum hoist, and a 15-drill ll-Rand air-compressor.

1907 the company planned building a 50-ton plant, at Cañon City, t Co., Colo., to make zinc-lead pigment and zinc oxide, but apparently ction of this plant has been abandoned.

e mill, at the Kelly mine, built 1907, by the Traylor Engineering Co., tly was not a success, and was remodeled and enlarged, 1908, and nned to go into commission circa January, 1909.

e Kelly mine is leased, above the fourth level, to Coney T. Brown, but as resumed by the company, November, 1908. The management gave ration, 1908, *to exchanging stock* of the company for stock in the

Kelly Smelting & Refining Co., owning property near the Kelly mines Mexico, and in Jefferson county, Montana, but this plan was unpopu shareholders, and apparently was dropped. Many shareholders are dis with the management, and have proposed an investigation. Proje sidered promising.

TRIMETALLIC MINING, SMELTING & REFINING CO.

Office: care of P. Sandoval, treasurer, Nogales, Ariz. J. L. Shepa dent. Lands, 9 groups of claims, in the Ures and Hermosillo districts Mexico, with a government concession for the equivalent of about miners' inches of water from the Yaqui river, which, under an effect of 160', could be made to develop a large water-power. Lands sh erous and argentiferous copper ores. Property considered promisi sumably idle.

TRIMOUNTAIN MINING CO.

Office: 82 Devonshire St., Boston, Mass. Mine office: Tri Houghton Co., Mich. Employs circa 800 men. Wm. A. Paine, preside eric Stanwood, secretary and treasurer; Frederick W. Denton, general preceding officers, J. Henry Brooks, Chas. A. Snow, Chas. H. Paine R. Stanton, directors; John Jolly, superintendent; Edw. Koepel, mi tendent; H. T. Mercer, engineer; Benj. D. Noetzel, clerk; Richard mining captain; Jas. Vial, master mechanic at mine; Jas. Richard mechanic at mill; Will Harris, supply clerk.

Organized 1899, under laws of Michigan, with capitalization shares $25 par; paid in, $20. Is controlled, through ownership of 99,1 by Copper Range Consolidated Co. Old Colony Trust Co., Boston, Annual meeting, second Wednesday in February.

The company paid $300,000 dividends, under a former manage paid a $5 dividend, of $500,000, Apr. 22, 1908, this being the first present management. Mining profits, 1907, were $491,480.76, with a tion account of $66,084.29, and net earnings for year were $380,302.15 ending 1907 with a surplus of $1,086,299.64. The final installment o mountain debt was paid January, 1908, by A. C. Burrage, as per agr

Lands, 1,120 acres, being the E. ½ of Section 19, W. ½ of S N. ½ of Section 29, and NE. ¼ of Section 30, all in T. 54 N., R. 3 Baltic mine is to the north, and the Champion to the south, with u lands to the east and west.

Owing to a very heavy sand overburden surmounting the ledge was opened by sinking drop-shafts through the alluvium, raising the face on the angle of dip of the bed. The Baltic lode runs 15' to 5 the Baltic tract, with an average width of about 25', usually being eralized throughout, mass and barrel copper occurring near the wall upwards of a ton in weight have been found, but values occur mainly rock. The two end shafts, toward the Champion and Baltic mines, than those in the middle, but there are prospects of better copper v depth, and a slow but fairly steady improvement has been noted, for past. The mine has electric pumps, and, during 1907, made 7,528' of ings. The shafts are all of the same size and style, being 8x22' timbers, with 3 compartments, framed with 14x14" sticks, exception timbering being required to withstand the pressure of shifting sand solid rock. Shafts 1 and 4 are the chief producers.

Lying parallel with and circa 65' west from the Baltic lode is a amygdaloidal bed, carrying some heavy copper and considerable s This, opened by a crosscut from the 7th level of No. 1 shaft, has bee to some extent, but nothing of great importance found. The gre width of the lode has led to successful experiments in dry walling w

Though at first ridiculed by some conservative mine managers, the use lls for underground walls has proven its worth in the mines of the Baltic and is being adopted quite generally in other Lake Superior mines. -rock is used also for building underground chutes. These are roughly ar, with inner diameter of about 5′, and are built and filled about with as stopes are carried upward, the chutes being built at a sharp pitch. s feared that descending rock might catch upon projections of the inner of rough mine-rock, but in practice no such trouble occurs, the wedging rounding waste-rock serving to hold the walls immovable. The saving bering resulting from the use of dry-walling and mine-rock chutes is reat.

o. 1 shaft, 1,675′ deep, Jan. 1, 1908, sunk at an angle of 68°, is 210′ of the Champion boundary line. This shaft has a sand overburden of 40′ depth, with first level opened 168′ below the collar, levels being 100′ from thence downward, No. 1 shaft developing a long stretch of excep- y uniform stoping ground, of good average grade. Equipment at No. 1 es a 2,500-h. p. Nordberg direct-acting duplex hoist, with 36x72″ cylin- nd double-conical drum, of 18′ maximum diameter, with capacity for 6-ton skips from one mile depth. The shaft-rockhouse is of wood.

o. 2 shaft, 1,023′ northeast of No. 1, was 1,575′ deep, Jan. 1, 1908, sunk at le of 68°, with a steel and concrete collar, built 1907. This shaft shows ing ground below the 14th level. The shaft-rockhouse, 40x62′ on the , and 84′ high, of steel frame, iron sheathed, has 2,000-ton rock-bins, ient including an engine, steam-hammer and two 18x24″ crushers. The s a duplicate of that at No. 1.

o. 3 shaft, 1,027′ northeast of No. 2, sunk at an angle of 68°, was 1,425′ Jan. 1, 1908. This shaft has a sand overburden of about 60′, and ground h disturbed below the 2d level, but the formation becomes more settled ater depth, where better stopes are shown, and there is a material im- ient in values below the 14th level. Equipment includes a shaft-rock- and hoist that are duplicates of those at No. 2.

o. 4 shaft, 1,100′ deep, Jan. 1, 1908, shows some of the best stopes in ne. The shaft-rockhouse is a duplicate of those at shafts 2 and 3, but ist is a temporary engine, good for a quarter-mile depth, which is to be d, eventually, by a hoist similar to those at the three other shafts.

o. 5 is merely the site for a shaft, there being an overburden of sand, with boulders, 208′ in depth, which best could be penetrated by an up-

o. 6 also is merely a tentative site for a shaft, so located as to develop mountain territory to the Baltic line.

e principal mine buildings and machinery, in the neighborhood of shafts 3, include a 32x45′ machine-shop, 40x60′ carpenter-shop, 25x45′ smithy x60′ warehouse. There is a 35-drill cross-compound Rand air-compressor 2 shaft, with a Deane condensing plant in a separate building adjoin- t No. 3 shaft the power plant, in a 68x180′ steel building, includes a of Stirling water-tube boilers and a 4,500′ Nordberg air-compressor, teed to run 45 drills only, but actually running 65 drills, 10 pumps and pneumatic machinery, giving a total duty equal to running 90 drills, e the rated capacity. At No. 3 there is a large coal trestle, supplying the boiler-room, and a cistern near No. 2 shaft stores water from a brook for the boilers. A house over the cistern has a fire-pump, with or defense of the mine buildings. The mine has a branch of the Copper telephone system.

e mine is served by the Painesdale branch of the Copper Range rail- hich reaches all shafts and the principal shops.

moving the old foundation, consisting of 3 tiers of 14x14" tim
entirely eliminating vibration, and under test this head has st
in 24 hours, heads having a normal capacity of about 800 tons d
ings losses, originally as high as 0.50 to 0.65%, were reduced
and, 1908, were reduced to 0.26%, by the installation of regri
settling tanks. The mill has a 300-h. p. engine, and a sma
machine-shop on the second floor.

The mill boiler-house, of steel, has six 250-h. p. and two 2
boilers, latter maintaining a steam pressure of 180 to 200 lbs.
which is the highest carried at any mill in the district. The
a brick-lined self-supporting steel smokestack, 165' high and 7'
At the rear of the boiler-house are 3 coal trestles, under ea
tunnel, 400' long, leading to the boiler-rooms, the floors of th
the roofs of the tunnels. Feed-water for boilers is piped from
dammed 1,000' distant.

The steel pump-house at the mill has a 20,000,000-gallon
taking water from a well connected with a 40" riveted steel pip
to an intake crib in Lake Superior. The crib, built of hea
braced by iron rods, is 42x56' on the bottom and 31' high, sunk
weighted with 1,800 tons of rock, and anchored into the sands
lake by heavy iron rods. The 40" intake pipe is laid on the f
from the crib until shallow water is reached, and is anchored
of the lake by eye-bolts. The 500' section of this line nearest
in a 14' trench, covered with cement, sunk in sacks, but this p
inadequate against heavy shore ice, and was replaced, 1908,
concrete covering, for a distance of 250'.

The mill buildings include a smithy and carpenter-shop, c
a 24x36' warehouse. The townsite of Beacon Hill, lying on
the mill, has a number of dwellings, and mill buildings and tow
by electricity, supplied by a dynamo in the engine-room of the

Production was begun Jan. 4, 1902, with one leased head,
mill, a second leased head being started in April. Two heads
train mill were started in 1902, and the third and fourth heads
1903. The Trimountain began production with returns of 37

)00, and it required five years to put the Trimountain back on a divi-
ds.
luction has been as follows: 9,237,051 lbs. fine copper in 1903;
0 lbs. in 1904; 10,476,462 lbs. in 1905; 9,507,933 lbs. in 1906; 8,190,711
907. In 1907 the mine hoisted 506,805 tons of rock, discarding 62,447
12.3%, and stamped 444,358 tons, which yielded 12,729,445 lbs. mineral
0,711 lbs. fine copper, an average return of 18.43 lbs. fine copper per
r 1907 working expenses were $1.96 per ton, or, including taxes, $2.06
and cost of finished copper, delivered, was 8.82 cents per pound, sold at
ige price of 17.78 cents per pound. At end of 1908 production was
00 tons of stamp-rock daily. The Trimountain, while it has proven
t disappointing, has reached a point where its future may be consid-
ired, thanks to a highly efficient and capable management.

ÑIA MINERA LA TRINIDAD. **MEXICO.**

e: care of Sr. D. José Luis Requeña, presidente, Mexico, D. F. Mine
Charcas, Moctezuma, San Luis Potosí, Mex. Luciano de la Rosa, man-
apitalization 300,000 pesos, shares 1 peso par. Lands include the San
mine, area 20 pertenencias, with an 80-meter shaft, also a mine with
ter shaft, with steam hoist. At last accounts was producing daily
ie carload of ore carrying 4 to 5% copper and 700 to 1,000 grams
r metric ton. Employs about 40 men.

AD MINING CO. **MEXICO.**

e: 710 Lankershim Bldg., Los Angeles, Cal. Mine office: La Trini-
uaripa, Sonora, Mex. D. Richardson, manager. Has auriferous and
rous copper ore, with steam power and a 50-ton mill, and is said also
a 10-ton smelter.

AD MINING & SMELTING CO. **MEXICO.**

office: Arcelia, Aldama, Guerrero, Mex. B. Davidson, mine man-
as silver-lead ores carrying gold and copper values. Property includes
a, Salvación, Sorpresa and Trinidad mines, carrying silver-lead ores,
d and copper values. Has steam power and a 20-ton mill, employing
men, at last accounts.

Y COPPER CO. **CALIFORNIA.**

e: 33 State St., Boston, Mass. Mine office: Kennett, Shasta Co.,
os. W. Lawson, president; Arnold Lawson, vice-president; Homer
secretary; Allen Arnold, treasurer; R. N. Bishop, general manager;
g officers, Louis Auerbach, Arthur P. French, Henry H. Arnold, Frank
and Kenneth K. McLaren, directors.
nized Oct. 18, 1900, under laws of New Jersey, with capitalization
0, shares $25 par. American Loan & Trust Co., Boston, transfer agent;
ional Trust Co., Boston, registrar.
ls, 1,700 acres, also a patented townsite, near Kennett, with total hold
3,233 acres, a smelter site of 422 acres, formerly owned, having been
he Mammoth. Property includes the Shasta King, which is the prin-
ie, the Lost Desert group, and the King Copper group.
Shasta King group, area 12 claims, is on the south fork of Squaw
djoining the Balaklala, 4 miles east of Iron Mountain. The mine is
n a deep gulch, topography being favorable for opening by tunnels,
e used exclusively for development. The main tunnel, 1,145′ long, is
ize, with double tram-tracks, equipped with steel ore-cars, and a 7x8′
ack tunnel has been driven 175′ vertically lower. The mine had, 1906,
00′ of workings, which have not been greatly increased since, and the
has been tested by 5,119′ of diamond-drill borings. The ore body is
claimed to be approximately 150′ wide by 1,000′ long, and of unknown
ut apparently the ore *does not* go to great depth, and it is possible

probably averages about 2.5 to 2.75% copper and 1 oz. silver small gold values. The Trinity also has an ore body of undete the opposite side of the gulch from the Shasta King.

The Shasta King mine has an incline tramway of circa 2,00 ing from the mine to the head-house of the Balaklala tramway at the mine, the tram-line having about 500 tons daily capacity.

The King Copper group, of 22 claims, on Motion Creek, c south of the Shasta King, had about 1,000′ of development wo counts, but apparently no ore had been found in place.

The Statesman group has been partially explored, with a vi and developing silicious ores required for fluxing the heavy su the Shasta King mine.

The Uncle Sam group, held under bond and lease, also has for fluxing ores, the Shasta King having large bodies of low pyrites, but lacking the silicious ores required to make free-su mixtures. The Uncle Sam group shows some oxidized ore, at an of 3 to 8% copper tenor.

Equipment includes a steam plant, with a 6-drill air-c power drills, and there also is a diamond drill. Buildings inc office building, assay office, warehouse, shops, hospital, and abou for employes.

The company made a bluff at building a smelter, 1901, doi ing at the time, but as the Trinity was worked mainly for the stock market, grading was discontinued, and the site so occupied by the Mammoth smelter. At the company's annual ruary, 1905, the president was authorized to build a smelter, specifications submitted by general manager Brown,'' but thi vanished into thin air, like its predecessor. If printers' ink smelters, the Trinity would have them aplenty.

Ore production was begun, Sept. 25, 1907, apparently at t tons daily, but apparently none of this ore got to the smelter, begun production again, circa October, 1908, after nearly a ye idleness, with ore shipments of approximately 150 tons daily.

The Trinity was said to have had a contract with the Bal

likely that Trinity can produce copper for much if any less than
ts per pound, and the cost may be higher.
he management of the Trinity claimed, when the shares were listed on
ston Stock Exchange, to have $745,047 cash in the treasury, and also
d to have 80,000 shares of stock in the treasury, but the first balance
made public by the company, of date Feb. 19, 1907, showed that the
y stock had disappeared mysteriously, this balance sheet giving assets
21,000 in lands, which possibly is a trifle inflated, for the reason that
ine is said to have been bought by Lawson for $165,000 and a stock
eration, and was capitalized, with the innate modesty that so distin-
s this great reformer and philanthropist, at $6,000,000, this being
n's idea of the square deal to his followers. The company's balance
of Sept. 30, 1907, showed accounts receivable of $895, and cash $40,705,
balance sheet for Sept. 30, 1908, gave cash resources of $282, with $895
ounts receivable. This seems about the Trinity's measure. The com-
s annual statements are very unsatisfactory, and no adequate explanation
en given for the disapparence of the fund originally on hand for con-
ion of a smelter. The Trinity has progressed backwards in a remarkable
r, its large cash surplus having sunk practically to the point of dis-
rance, while its 80,000 shares of treasury stock have disappeared com-
y, leaving no trace behind of the smelters promised at various times,
not only having failed to materialize, but even the hole where the first
r was to be built having disappeared also. In this connection, the Copper
ook repeats its criticism of the Boston Stock Exchange, which has lent
to Lawson's crookedness by listing this utterly rotten stock. The
n Stock Exchange generously permitted Lawson to list the balance of
shares of Trinity stock, early 1905.
a the prospectus of the Trinity Copper Co., issued Oct. 20, 1900, Lawson
ted that from August, 1901, the net earnings would be "at least"
,000 or $3,000,000 yearly, and by that time "at least" $30,000,000 worth
would be blocked out. These predictions have proven as accurate and
ful as others from the same source. When Lawson put out this stock
ve a personal "guarantee" that the stock would not sell below $25, but
declined repeatedly to a mere fraction of this figure. Lawson stated,
advertisement, Jan. 17, 1907, that he had always kept the finances of
rinity in the hands of others, and never, directly or indirectly, had the
ing of them. This is important, if true.
rnold Lawson was elected a director before he was a shareholder, and
W. Lawson, philanthropical promoter-president, was on record, at the
l meeting, 1907, as the owner of only 200 shares, which shows the
us Lawson to be a very wise personage, as he unloaded, shortly before,
investors," throughout the country, at prices as high as $44 per share.
o show what an utterly conscienceless scoundrel Lawson is, the following
rous suggestion is taken from one of his advertisement, of February,
referring to Mr. C. W. Barron of the Boston News Bureau. "In such
se the law can or will do nothing. If it were not for the law, this
would meet its death as does a skulking hyena. Some day following
er caused by Boston News Bureau—disaster like that of Saturday, for
ce—some victim less considerate perhaps than I, will kill this power
would kill a mad cur." The offense of the Boston News Bureau and
blisher consisted of telling the truth about Trinity. Fortunately no
-brained fool followed the hint, so murder was not done—no thanks to
n, the "reformer."
he Trinity is Lawson's scientific little game for parting fools from
money, and it has been worked, very cleverly, with the assistance of

the Boston Stock Exchange, which is an accessory after the fact. T
should be taken off the Boston exchange, and turned over to the Bo
which Lawson "reorganized" in 1908. Lawson saw fit to attack th
Handbook and its publisher in one of his advertisements, January,
was promptly called a liar and a bluffer, in a counter-advertisem
notified to bring suit, if he dared, but, in preference, shut up, wh
evidence that Lawson, whatever he may be, is not a fool.

NTIETH CENTURY KNIGHTS ISLAND COPPER CO. **ALASKA.**

Mine office: Valdez, Alaska. Lands, 8 claims, on Dryer Bay, adjoining the ghts Island Copper Co.

N BUTTES MINING & SMELTING CO. **ARIZONA.**

Office: 121 Wisconsin St., Milwaukee, Wis. Operating office: Tucson, . Mine office: Twin Buttes, Pima Co., Ariz. Edw. T. Davis, president; uel D. Adler, first vice-president; W. A. Barber, second vice-president; . Blakeley, secretary; Edw. P. Hackett, treasurer; preceding officers, W. H. es, Felix Isman and J. G. Baxter, directors; Capt. Wm. McDermott, mine rintendent; David L. Stinson, railroad superintendent.

Organized Sept. 8, 1903, under laws of Arizona, with capitalization 00,000, increased, 1905, to $1,250,000, shares $1 par. Bonds outstanding, ,000. Controls, through stock ownership, the Twin Buttes Railroad Co. consin Trust Co., transfer agent and registrar. Annual meeting, first day in January.

Lands, 61 claims, partly patented, area 1,250 acres, in the Helvetia dis-, in the foothills of the Sierrita Mountains. Property, opened 1880, was ccessful under former ownership, owing to lack of cash and management, gh always considered promising. Lands are reported to carry fissure veins mestone, and contact deposits between limestone and granite, with lime- foot and granite-porphyry hanging. The various properties of the com- had about a mile of workings, 1906, estimated to show 50,000 tons of ore ked out for stoping, averaging circa 7% copper and 1.85 oz. silver, with s of gold.

The Senator Morgan mine has a 7x16′ three-compartment shaft, of circa depth, said to show a vein of 25′ average width, carrying sulphide ore of 10% copper tenor in the bottom workings, but ore probably is not so rich timated. The Morgan shaft has railroad connections.

The Copper Glance mine has a 415′ shaft, sunk on an ore body having a gossan, succeeded by about 200′ of carbonate ore, and, on the 300′ level, a cut has passed through 35′ of marcasite carrying kidneys of chalcocite, a crosscut on the 400′ level encountered a promising ledge of soft leached

The Copper King mine has a 200′ shaft, developing carbonate ore upper workings, and sulphides in the bottom, the showing being co promising.

Equipment includes a 300-h. p. steam plant, burning wood and p at the Morgan mine, with a 125-h. p. Leyner double-drum hoist, rais loads, and a 10-drill Leyner compound air-compressor. There is a plant at the Copper King mine.

Buildings, 14 in number, include a power-house, machine-shop, sm store.

The Twin Buttes railroad, 27 miles in length, running from Tw to Tucson, completed July, 1906, has one locomotive and 3 flat-cars.

The matter of building a smelter was given tentative conside 1907. Water for a smelting plant can be secured from the Santa Cru miles distant.

Production was 700,329 lbs. fine copper and 11,294 oz. silver, in was 94,056 lbs. copper and 342 oz. silver, in 1907. In August, 1907, was shipping circa 50 tons daily, but suspended operations a few we resuming shipments, 1908, on the basis of 8 carloads weekly, to El Pas Property considered promising, but apparently is suffering from lac quate capital.

TWIN CITY DEVELOPMENT CO. CO

Office and mine: Jerome, Yavapai Co., Ariz. R. A. Smith, John B. Lecorr, vice-president; Paul Smyly, secretary and treasur Dixon, manager. Organized 1908, under laws of Arizona, with cap $1,000,000, shares $1 par. Lands, circa 10 miles from Jerome, have planned to be driven 700′.

TYEE COPPER CO., LTD. BRITISH CO

Office: 45 Leadenhall St., London, E. C., Eng. Operating offic

rade Bldg., Victoria, B. C. Mine office: Duncans, Vancouver Island, B. C. s office: Ladysmith, Vancouver Island, B. C. Thos. Headland Wilson, man; preceding officer, Nicol Brown, Harry von Berg, Albert Straube and dwig Loeffler, directors; Wm. Gardner, secretary; W. H. Trewartha-James, al manager; J. W. Bryant, superintendent; W. J. Watson, smelter super- dent; W. M. Brewer, ore purchaser.

Organized Apr. 4, 1900, under laws of Great Britain, with capitalization ,000, shares £1 par. Dividends were 10% in 1904; 10% in 1905; 5% in and 7½% in 1907. At end of fiscal year, Apr. 30, 1908, the company had 95 19s. invested in selected bonds and stocks of exceptional solidity, and s, for year ending Apr. 30, 1907, were £22,506.

Lands, 13 claims, crown-granted, area 342 acres, also a 45-acre smelter 60-acre tramway terminal and 800 acres timber lands, all in the Somenos ct, on Mount Sicker, circa 11 miles northwest of Duncans, and about 80 from Vancouver.

The Tyee mine shows schists carrying up to 2% copper, with small gold ilver values, suitable for fluxing, and lenses, in banded schists, of chal- ite, with barite gangue, averaging 4% copper, 2.5 oz. silver and $3 gold n, with about 7% zinc and circa 38% barium sulphate, rendering the ore tory in smelting. The main shaft, of circa 1,000′ depth, encountered no f importance below the 300′ level, though the mine was tested, systemat- , to a depth of circa 1,200′, by drifts, crosscuts and borings by 2 diamond . The north lode of the Tyee, on the I. X. L. claim, adjoining the Tyee, 500′ shaft. No. 2 shaft is circa 200′ in depth.

Mining equipment includes a 10x40″ link-motion hoist, with two 4′ drums, ting safety cages, with smaller hoists of 20 h. p. and 50 h. p., also 5-drill 0-drill air-compressors and a pumping plant capable of raising 100,000 s daily, in a single lift of 1,000′. There also is a sawmill at the mine.

Buildings at the mines include an engine-house, boiler-house, smithy, car- r-shop, store, boarding-house and bunkhouse.

The concentrator, at the main shaft, has a No. 4 Gates crusher, Blake er, grizzley, rolls, grinders, Snyder automatic samplers and an ore-sorting ore being delivered from the sorting belt to 100-ton bunkers.

Ore is taken from the bunkers by a 3½-mile aërial tram, having half-ton ts, operated by a 4-h. p. engine, for starting, gravity furnishing the e power, there being a drop of 2,000′ between the mine and the 400-ton nkers at the lower terminus of the line, on the Esquimault & Nanaimo ay. From the lower bunkers, ore is carried 17 miles, by rail, to the er, in 30-ton bottom-dumping cars.

The smelter is well located, on a 45-acre site on Oyster Harbor, where is a 40x210′ wharf, connected by an elevated incline trestle with the er-bins. Considerable improvements were made, 1907-1908, on these works, cost of circa £20,000. A notable feature of this plant is the roast-yard, h is fully described in the chapter on Pyrometallurgy of Copper, in this ne.

The smelting plant, terraced throughout, to permit handling of material ravity, has a 56x81′ wooden furnace building, with a 200-ton Allis-Chalmers r-jacket blast-furnace, 42x120″ at the tuyeres, using a hot blast, with room second furnace of the same size. The furnace has a water-jacket fore- h for matte, slag skimming into a settler and thence into a launder, where ulated and washed away by running water. The dust-flue, 8x11x165′, d over with corrugated iron, leads to a 90′ smokestack, of 7′ diameter. Furnace reduces 9.45 tons of ore and flux with one ton of coke. The reduc- plant also includes a complete sampling mill, briquetting plant for fines, olytic assay *plant and an electric light* plant. The plant does a general

custom business, handling ores from British C
sells its product, as a 50% matte, to Americ
works.

Production of the mine, 1906, was 23,8

COMPAÑIA MINERA LA UNIÓN.

Mine office: Viesca, Coahuila, Mex. Property is El Esfuerzo ing copper ores.

UNION CONSOLIDATED COPPER MINES, N. L. SOUTH AU

Offices: Collins St., Melbourne, Australia, and 8 Broad S London, E. C., Eng. Mine office: Umberatana, Lyndhurst, Soutl E. Lowenstein, chairman; A. J. Miller, managing director; Arth London secretary; W. B. Greenwood, engineer; A. G. Sarjeant, mi Organized Dec. 23, 1904, under laws of Victoria, with capitalizati shares £1 par. Owns a share interest in the Lyndhurst (South Copper Co., Ltd.

Lands, 440 acres, in the Yudnamutana district, circa 70 miles ea hurst, the nearest railroad point, and 400 miles north of Adelaide, number of old mines that have been failures in the past, on wh mining was done and an old smelter built many years ago. Lan what is known as No. 6 lode were set off as the Lyndhurst (South Copper Co., Ltd. Lands include the Daly mine, showing 5 veins, opened to a depth of about 100' only. No. 5 vein, which apparently one of much importance, is claimed to average 400' in width, tr miles, and to carry ore averaging 4 to 5% copper. Apparently the wi exceed 200' and vein is traceable about one-half mile only, instead that length. No. 5 lode is said to give oxide, carbonate and s assaying 60% copper and 8 dwts. gold per long ton, these assays obv from carefully selected samples. No. 5 lode apparently is claim pany to be a 4% proposition. Company claims the biggest surfa in Australia, which claim seems utterly unwarranted, and clai upwards of 3,000,000 tons of ore in sight, in No. 5 vein, which i impossible, in view of the limited workings. Company's chairma conviction that the lands were sufficient for at least 5 big copper m was merely a wild guess. No. 5 lode was worked, circa 1890, and p the Australians call a duffer. Company made much of the fact th mania Copper Co. was building a smelter in the district, and clai a smelting contract therewith for the treatment of 1,000 tons of at 35s. per ton, price to be reduced to 32s. 6d. when production re tons weekly, but apparently the Tasmanian Copper Co. has practi

ines in the Yudnamutana district, and its Blinman smelter as well. ls of ore, sent to smelter for tests, are said to have given average 27.7%, but such tests are important, or otherwise, according to s are selected to give an average, or to furnish high returns. Com- ently is averse to examination of its workings by other than its d is regarded with suspicion

LKALI CO., LTD. **SPAIN.**

30 James St., Liverpool, Eng. Mine office: Valverde del Camino, ain. Works office: St. Helens, Lancashire, Eng. Employs 3,000 Brock, chairman; E. K. Muspratt, vice-chairman; Eustace Carey, . H. Cresswell, general manager; C. Kaesmacher, assistant man- Hill & Stewart, consulting engineers. Organized under laws of n, with capitalization £8,750,000. Company is primarily a chemical cturing corporation, with which copper mining is merely a small he general business, and controls 46 subsidiary works and corpora- of the plants being of very great size. The company has its prin- at St. Helens, Runcorn, Flint, Widnes and Glasgow, making ex- of Spanish and Portuguese pyrites, which are burned for sulphur, the cinder remaining is leached for copper.

properties in Spain include the Sotiel Coronada and Castillo del es, which are separately described, also the Santa Rosa, Concepción, d Monte Rubio groups, all in the province of Huelva. Properties l Huelvan slates, with lenticular contact deposits between slate y, these, with a generally NW. and SE. strike, and dip of 30° to rying cupriferous pyrites.

ta Rosa group, including El Tinto mine, having a combined area res, at Zalamea la Real, Huelva, is leased from the Sociedad de las bre Tinto y Santa Rosa. The Tinto and Santa Rosa mines, with have a 9-kilometer Bleichert aërial tram to Calañas. Production, he Tinto and Santa Rosa, was 38,605 long tons of pyrites, and 803 ment copper.

nte Rubio group, held under lease from Sociedad Colectiva C. & J. cludes the Monte Rubio, Gibraltar and Atbalcal Arbalcal mines, *mbined area of circa 100 hectares*, at Palmogo, Huelva. These are

ancient properties, worked only to the level of t
Roman era, the old workings, though comparatively
mous masses of ore, occurring as oxides, sulphides
of iron ore, indicating the existence of large bodi
sulphides at greater depth. There is a 22-kilometer
to Coiña Veral, on the river Guadiana, where the
undeveloped mineral leases.

The company controls the Ferocarril Buitron, of
42" gauge, equipped with 18 locomotives, transpor
passengers.

and Salt Lake City, Utah. F. August Heinze, pres
vice-president; Stanley Gifford, secretary and treasu
J. Curtis, Sanford Robinson, Chester Glass, John
and Horace G. Abel, directors.

Organized Apr. 28, 1902, under laws of New
$80,000,000, shares $100 par, in $5,000,000 preferred
$75,000,000 common stock; issued, $50,000,000, in
$45,000,000 common shares. Stock is listed on the
exchanges. Metropolitan Trust Co., New York, Old
and Fidelity Title & Trust Co., Pittsburg, registr
Boston, Union Trust Co., Pittsburg, and C. S. Buckin
agents. Annual meeting, first Wednesday in June.

Preferred stock is redeemable, at $125 per sha
thereof, upon any dividend date, on 3 months' notic
has power to fix, determine and vary the disposition
time to time, the powers of the board being practi
shareholders without voice in the management, and a
for mismanagement.

The company paid $7,462,500 dividends to end o
was paid on preferred and $5,962,500 was paid on
dividends being $150,000 in 1902, $300,000 each in
and $150,000 in 1907. First dividend on comm

nds on common shares were $450,000 in 1905, $3,150,000 in 1906, and ,500 in 1907. The common stock was placed, 1906, on a quarterly divi- basis, at rate of 7% per annum, but the company was unable to maintain ate, after the depression in the metal market, followed by the panic 7.

or fiscal years ending June 1, the company's statements show income llows: $1,045,475 in 1904; $1,513,850 in 1905; $3,011,620 in 1906; 23.97 in 1908, of which $841,662.50 was from dividends on securities held, 19,361.47 from interest. President Heinze informed shareholders June, that the floating indebtedness of the company did not exceed $1,100,000. he United Copper Co. is a securities holding corporation solely, and was zed, ostensibly, along much the same lines as its former great rival, the amated Copper Co., except that the Amalgamated buys control of sub- corporations to retain, while the United is operated as a blind pool, the personal direction of the president, and shareholders are unable to any satisfactory statement as to what their holdings represent.

reason of the settlement of the protracted litigation between the amated Copper Co. and United Copper Co., February, 1906, through the the Heinze holdings in Butte to the Butte Coalition Mining Co., the of the United Copper Co. was changed materially, the company having business as the owner of sundry stocks and bonds of various subsidiary and holding corporations operating in Butte, as given in detail in . The price paid by the Butte Coalition Mining Co., for the various holdings taken over, is said to have been $14,000,000, but apparently art of this amount was in cash, the balance being in shares of the Butte on Mining Co., which appreciated materially in market price, the con- ion actually being rendered considerably greater than stated, in case the Copper Co. sold its holdings in Butte Coalition at the high prices ruling copper share market during the latter half of 1906 and the first quarter 7. Apparently the United Copper Co. has disposed of the bulk of its Coalition stock, which was its most valuable asset.

he shareholdings of the United Copper Co. are known only to the manage- but are supposed to include, and doubtless do include, control of the na Ore Purchasing Co., Basin Reduction Co., La France Copper Co., Ohio Co. and Stewart Mining Co., latter owning a lead mine in the Cœur e district of Idaho. Some of the holdings in subsidiary corporations are btful worth, while others are valuable, but in nearly every case the iary corporations are in need of cash, for further development.

May, 1906, the stockholders of the United Copper Co. authorized the $1,000,000 Montana Ore Purchasing bonds, and $2,500,000 Nipper Con- ed bonds, at par, to the Butte Coalition Mining Co. This presumably carry out a bargain previously made, and it is presumed that the con- ion was in shares.

os. M. Hodgens, an owner of 1,300 shares of preferred stock in the Copper Co., and formerly cashier of the Heinze bank, at Butte, secured ernative writ of mandamus, July, 1907, requiring the company to show ks, and disclose whence earnings were secured, but apparently no such ure was made. Mr. Hodgens alleges that earnings of the company were re than $1,000,000 in 1906, when an inspired article in the press said he net profits, from various sources, were $12,000,000, the company claim- rnings of $3,011,620 in 1906. The United Copper Co. was unable, 1908, nce La France Copper Co., a subsidiary corporation, to the extent of its taxes in Butte, amounting to about $5,000 only.

he company's annual reports are not satisfactory, referring as they do, *vaguest possible terms, to interests* in subsidiary corporations, without

giving definite information as to the extent of such interests. At present the United Copper Co. does not control any producing mines. The Stewart lead mine is a property generally considered valuable. The Ohio Copper Co. probably is the chief asset of the United Copper Co. at the present time, and is a property of much promise. La France Copper Co. has a zinc mine, of doubtful value.

The United Copper Co. being operated as a blind pool, shareholders have no protection whatever, and are at the mercy of the management, which has not shown itself overscrupulous. Shareholders were tremendous losers in the slump of 1907, when both preferred and common shares declined to merely nominal values. Nobody outside of the management has any exact idea of what the company owns, or does not own, but it is certain that the company does not own anything like the equivalent of its capitalization, though some of its properties, notably the Ohio, are of decided promise.

UNITED COPPER CO. **WASHINGTON.**

Office: 512-705 First Ave., Seattle, Wash. Mine office: Galena, Kittitas Co., Wash. Organized under laws of Washington, with capitalization $2,000,000, shares $1 par. Lands, 310 acres, also a 60-acre millsite, well timbered, with available water power, on Camp Creek, a branch of the Cle Elum river, said to show 3 veins, carrying chalcocite and chalcopyrite, the main vein, of 50' to 100' claimed width, said to be traceable 4 miles, carrying chalcopyrite, with a parallel vein and a cross vein carrying chalcocite. Mine is claimed to have circa 1,800' of tunnels, showing ore assaying up to 31% copper and $5 to $10 gold per ton. The Seattle Mining Exchange, having the same address as the company, claimed, 1906, in an advertisement, to have 1½ miles of chalcopyrite 50' to 100' wide, assaying $50 to $100 per ton, and copper glance 1½ miles in length assaying $200 to $300 per ton, with an 1,800' bornite ledge of 55' width adjoining the property on the same ledge, latter having a paystreak giving $1,400 per ton in gold, in addition to copper, which statements must have been made by a lunatic or a colossal liar. Property considered promising, but standing of company has been injured by the preposterous falsehoods told in its behalf.

UNITED COPPER EXPLOITATION & MINING CO. **NEVADA.**

Office: 511 Continental Bldg., Denver, Colo. Mine office: Ely, White Pine Co., Nev. A. L. Emberson, president; W. E. Flodin, vice-president; M. C. McKinnon, secretary and treasurer. Organized May, 1907, under laws of Arizona, with capitalization $10,000,000, shares $1 par. Lands are said to be 2 claims in the Ely district, and 12 claims in the Ward district, both in White Pine county. Promoters notified the public to come in as "ground floor organizers," on the basis of $250,000 cash for the lands, which seems a long way from the ground floor. Advertisements of company were highly untruthful and misleading. Cannot be learned that any development has been made, and company apparently is merely a bit of stock-jobbery.

UNITED COPPER-GOLD MINES CO. **OREGON.**

Office and mine: Grants Pass, Josephine Co., Ore. O. S. Blanchard, president; O. A. Thomas, secretary and manager. Lands, on Pickett Creek, an affluent of the Rogue River, 14 miles south of Grants Pass, are said to show veins of 5' to 10' width, carrying ore similar to that of the Waldo mine, giving assays of 6 to 8% copper and $30 to $100 gold per ton.

Wash. Employs circa 30 men. Conrad Wolfle, president and general manJ. W. Beckett, vice-president; Gale Smith, secretary and treasurer; Frank ck, superintendent; Wm. H. Stowell, engineer. Organized July 16, 1906, laws of Washington, with capitalization $1,000,000, shares $1 par; issued, 00. Bonds, $20,000 authorized. Annual meeting, fourth Thursday in ry.

ands, 8 claims, 2 fractional, unpatented, area 165 acres, also 200 acres llaneous lands, in the Chewelah district, 6 miles from a railroad, showing and schist, carrying an ore body of 6′ average width, traceable 800′, ng malachite, chalcopyrite and tetrahedrite, estimated to average 2.9% r, 6 oz. silver and 40 cents gold per ton. Ore is mainly chalcopyrite, with onal native silver.

evelopment is by shafts of 65′, 175′ and 270′, and by an 1,100′ tunnel on opper King property, of which 735′ is crosscut and 365′ in ore, mine g 1,610′ of workings, estimated to show 100,000 tons of ore.

quipment includes a 150-h. p. steam plant, with hoist, 2-drill and 4-drill din air-compressors, and 7 power drills. There are 5 mine buildings, ing a 16x24′ wooden machine shop.

roduction 1907 was 11,097 lbs. fine copper and for 1908 was circa 360,000 ine copper, and is estimated by company as likely to be about 1,000,000 n 1909. Ore was shipped to the Northport smelter. Company plans nuous development and building a 6-mile railway spur. Property consid- promising.

TED ELY COPPER CO. **NEVADA.**

Office: Goldfield, Nev. Letter returned unclaimed from former mine , Ely, White Pine Co., Nev. G. L. Rickard, president and general man- R. L. Colburn, vice-president; W. H. Waterman, secretary; H. Cook, urer; H. Chase, superintendent. Organized Oct. 22, 1906, under laws evada, with capitalization $5,000,000, shares $5 par. Lands, 20 claims, 400 acres, tested by two 250′ churn drill holes, showing no copper.

TED ELY MINES CO. **NEVADA.**

Mine office: Ely, White Pine Co., Nev.

TED EMPIRE CO. **BRITISH COLUMBIA.**

Dead. Was succeeded, December, 1906, by United Empire Co., Ltd. For- y at Princeton, Boundary district, B. C. Fully described Vol. VI.

TED EMPIRE CO., LTD. **BRITISH COLUMBIA.**

Office and mine: Princeton, Yale district, B. C. Wm. C. McDougall, dent and general manager; John M. Smith, secretary; preceding officers, M. L. McDougall, John M. Murray and R. L. Reid, K. C., directors. Organ- December, 1906, under laws of British Columbia, as successor of United ire Co., with capitalization $500,000, shares $1 par; issued, $306,000. An- meeting, first Tuesday in November.

Lands, 9 claims, area 250 acres, also 692 acres of coal lands and 2,500 acres iscellaneous lands, in the Similkameen district. The copper lands show tone, diorite and sandstone, carrying 2 ore bodies, of which one, under lopment, is estimated at 100′ width, and is said to be traceable 4,500′; ing malachite and occasional azurite, with chalcopyrite at depth, ore estimated to average 2% copper, 2 to 4 oz. silver and $1 to $2 gold per Development is by shafts of 30′ and 50′, and by tunnels of 125′, 225′ 80′. There are about 2,000 tons of ore available for extraction, but no as been blocked out for stoping. Adjoining the copper ore, on the west- oundary, is a series of coal measures, apparently of promise. Fuel is mined from the company's lands, costing circa $1.50 per ton. Manage- plans continuous development.

UNITED EXPLORATION CO. WYOMING.

Office: 113 Devonshire St., Boston, Mass. Mine office: Battle, Carbon Co., Wyo. Succeded Beulah Copper Co. Lands, 13 claims, area circa 250 acres, developed by an 800′ tunnel. Idle several years and presumably moribund.

UNITED GERMAN COPPER MINES, LTD. GERMANY.

Dead. Dissolved, September, 1904. Formerly at Münster-am-Stein, Bavaria, Germany.

UNITED GLOBE MINES. ARIZONA.

Office: 20-99 John St., New York, N. Y. Mine office: Globe, Gila Co., Ariz. Jas. Douglas, president; Geo. Notman, secretary and treasurer; Niles S. Berray, superintendent; Robt. B. Riddell, chief clerk. Capitalization $2,300,000, shares $100 par. Is controlled, through ownership of majority of stock, by Old Dominion Co. Paid dividends of $6.50, Dec. 15, 1905, and $4, July, 1907.

Lands, 29 claims, lying west of the Old Dominion group, also 3 millsites. The mine is extensively developed, having a 765′ three-compartment shaft, showing a vein of circa 30′ width, carrying an ore chute of 700′ length, averaging 4% copper and upwards. Early 1908 the Maggie vein was cut, 85′ north of B shaft of the Old Dominion, on United Globe ground, this showing sulphide ore of excellent average tenor, including considerable massive chalcopyrite. The ore bodies of the United Globe are extensive, but erratic, and are highly silicious, requiring heavy fluxing, and the mine is wet. Leasers formerly working on the property produced ores averaging 20% copper and 1 to 15 oz. silver per ton, but the first grade ore mined by the company now averages circa 14% copper, or less.

A 200-ton smelter has been idle for some years, and is not likely to be blown in again, as the mine is operated under a close working agreement with the Old Dominion Copper Mining & Smelting Co., details of which are given in the description of the Old Dominion Co., and, to all practical intents and purposes, the United Globe is now a portion of the Old Dominion mine.

Production was 4,607,537 lbs. fine copper and 5,277 oz. silver in 1906, and 3,399,084 lbs. fine copper and 12,382 oz. silver in 1907.

UNITED GOLD & COPPER CO. ARIZONA.

Office: Columbian Bank Bldg., Pittsburg, Pa. Mine office: Hereford, Cochise Co., Ariz. J. L. Currier, president; S. B. Manning, secretary and treasurer. Capitalization, $1,000,000. Lands, 11 claims, area 220 acres, 7 miles from Hereford, said to give fair surface indications of copper, with a 137′ tunnel. Idle.

UNITED METALS CO. ALASKA.

Mine office: Coppermount, Prince of Wales Island, Alaska. Harry Corbin, superintendent, at last accounts. Lands, about midway between Coppermount and Sulzer, giving a promising showing of high grade ore, and a little ore was shipped, 1905, to the Coppermount smelter. Presumably idle.

UNITED METALS SELLING CO. NEW YORK.

Office: 42 Broadway, New York, N. Y. Works office: Perth Amboy, Middlesex Co., N. J. Adolph Lewisohn, president; Henry H. Rogers, vice-president; A. W. Evarts, secretary; Urban H. Broughton, general manager;

V. Stuart Wortley, treasurer; preceding officers, Wm. Rockefeller, Jesse sohn and Frederick P. Olcott, directors. Organized Jan. 29, 1900, under of New Jersey, with capitalization $5,000,000, shares $100 par. Regular end is 7½%, quarterly. Dividends have been 15% in 1900; 5% in 1901; in 1902, 1903 and 1904; 20% in 1905 and 1906, and 30% in 1907, with dividend disbursements of $6,250,000 to Dec. 31, 1907.

The company does a general commission business in metals, and is the st copper broker in the world, being sales agent for the Amalgamated er Co. and producers affiliated with the Amalgamated, and a considerable er of independent producers. This company "held the umbrella" over copper market in 1901, and again in 1907, enabling independent com- s to market their copper, while the production of the Amalgamated and ffiliated companies was held back. Company sells yearly, 200,000,000 to 00,000 pounds of Amalgamated copper, and 250,000,000 to 300,000,000 ds of other copper, on a commission, formerly 1½%, which was cut, 1906, %, when copper passed 18 cents per pound in price. The commission is o means excessive, in view of the facilities offered, these including the antee of all sales accounts, and, when desired, advances of 75 to 90% of nvoice value of copper. A considerable part of the company's profits are ed from its extensive refining operations.

The Raritan Copper Works, on New York Harbor, completed 1899, and enlarged, is one of the largest and most modern copper refining plants in world, the works including a smelter and mammoth electrolytic refinery. smelter, having 2 furnace buildings, has two 100-ton furnaces casting es in iron moulds on a mechanical conveyor, and two 150-ton casting fur- for wire-bars and anodes.

The electrolytic refinery includes two tankhouses and a power-house, con- d by 3' concrete tunnels, power consumption being about 3,000 kilowatts, works having a capacity of nearly 1,000,000 lbs. finished copper daily. l is the old and No. 2 the new tankhouse, latter completed circa 1907. l tankhouse has 1,600 tanks, each holding 21 anodes and 21 cathodes, of 24x36", using a current of 5,000 amperes, with a cross-sectional area of 5 square inches in the busbars.

No. 2 tankhouse is 150x184' in size, having concrete foundations, with steel e and brick walls, special Berlin brick being used for the basement floor, being considered acid-proof. Permanent equipment includes 1,370,000 ds of lead, of which 1,500,000 pounds are in tank linings, and 581,000 ds of copper, divided as follows: copper cathode rods, 186,000 pounds; ping plates, 122,000 pounds; busbars and connections, 170,000 pounds; , etc., 100,000 pounds; lead anode rods, 300,000 pounds. No. 2 tankhouse 3 bays, running lengthwise, with two 10-ton 3-motor Whiting cranes in bay, equipped with special devices for handling an entire tankful of es or cathodes at one load. No. 2 tankhouse has 3 electric circuits, run- lengthwise, one in each bay, each circuit of 396 tanks being handled the power-house by one electric generator. Current is 7,500 amperes, giv- a current density of 20 amperes per square foot. Main conductor has a -sectional area of 12¾". There are 1,188 depositing tanks, arranged in ests of 11 cells each, electrode arrangement being on the Walker system, being lined with 6-pound lead containing 4% antimony. There also are al tanks for rinsing the cathodes, after removal from depositing tanks anks for scrubbing slimes from scrap anodes, latter amounting to abou by weight. Works have special shears for trimming cathode loops, an rrow loop machine for attaching copper lugs to the cathode startin s. Anodes are 28x36" and cathodes are 30x37", each tank having 2 s and 25 *cathodes, spaced on* 4⅝" centers, cathodes remaining in tan

Company uction of the Peak Downs Freehold Copper & Coal Co., Ltd., which uction of the Peak Downs Copper Co.

rca 1,200 acres, freehold, exempt from labor conditions. Property ık Downs mine, which, in early days carted ore circa 300 miles, ts therefrom of £278,250 in 15 years' operation. The mine, , by predecessors of present company, has a vein of 2' to 3' average g chutes of high-grade ore, and 3 narrow parallel veins of 6" to 20" as a whole, averages circa 4.5% copper. The mine, opened to has been thoroughly retimbered, and, when reopened, old pumps e found converted into copper precipitate, by the action of the ers.

er, built some years ago, has reverberatory furnaces, and a new -jacket-blast furnace was blown in, July 24, 1907, working inter- l October, 1907, when smelting was suspended, on account of the copper. Production, when the smelter was in blast, was said to s of matte daily, and a small amount of regulus was secured also. 907, is estimated at 500,000 lbs. fine copper. Mine is considered mising, but will require extensive development, its eyes having it by the old management.

IFS, N. L. **AUSTRALIA.**

78 Queen St., Brisbane, Queensland, Australia. Mine office: Black an, Queensland, Australia. C. C. Moulton, secretary; Cecil Rae, ger. Lands, known as the Shamrock mine, are 16 miles south of nelter has a 50-ton blast furnace and 2 reverberatories, difficulty ıced in securing adequate supplies of fuel and flux. Ore smelted 1% copper, 1 oz. silver and 9 dwts. gold per long ton. Employed it last accounts.

Controls, through p of 100,000 shares, the Peruvian Mining, Smelting & Refining Co. half interest in the United States Metals Refining Co., other half being y Aron Hirsch & Sohn, of Halberstadt, Germany. The company also ghtly less than a majority interest in the shares of the Richmond-Eureka Co. The various subsidiary corporations are described separately, eir respective titles. Control of the United States Mining Co. was by exchanging stock, three-fourths in preferred and one-fourth in shares of the United States Smelting, Refining & Mining Co. having en, share for share, plus $1 per share cash bonus, for each share of States Mining Co.

pany pays 7% on preferred stock, in quarterly dividends of 1¾%, January, April, July and October, first dividend having been paid 1906. Dividends were begun, 1907, on common stock, and in 1908 pany paid 4 quarterly dividends, of 1% each, on common shares. The 's dividend requirements, for both common and preferred shares, are 00 yearly.

company ended 1907 with an available surplus of $4,067,087, which down, by adding $733,255 to reserve, and other dispositions, to a net of $557,003. The floating debt, estimated at $3,000,000 during the eriod, late 1907, was considerably reduced, early 1908. Net earnings ,504,522 in 1906, and $2,386,539 in 1907. Net earnings were said to en circa $350,000 in September, and $385,000 in October, 1908, showing ntial recovery in business and profits.

duction, 1906, including outputs of all subsidiary corporations, was 87 lbs. fine copper, 27,828,644 lbs. lead, 4,852,292 oz. silver and 162,537 l, with a gross value of $14,747,746. Production for 1907, including of all subsidiary companies, was 38,518,378 lbs. fine copper, 53,617,324 d, 6,739,269 oz. silver and 235,822 oz. gold, with a gross value of ,655, giving net earnings of $2,386,539, for an exceedingly bad year.

e United States Smelting, Refining & Mining Co. is an ambitious king, and must be considered a serious competitor of the Amalgamated Co., Federal Lead Co. and American Smelting & Refining Co., commonly the copper, lead and smelter trusts. The company has properties of resent value, and much greater potential worth. While the company de mistakes, it invariably has profited by them, and in 10 years has from a position decidedly dubious to one where its present is assured, future most promising.

D VERDE COPPER CO. **ARIZONA.**

ce: 901-49 Wall St., New York, N. Y. Mine and works office: Yavapai Co., Ariz. Employs circa 900 men. Hon. Wm. A. Clark, presi- s. A. Macdonald, vice-president; H. H. St. Clair, secretary = has. W. Clark, *general manager*; Will L. Clark, assista

Dividend payments were begun, 1892, by old company, cents per share monthly, increased, 1896, to 50 cents per s again increased, 1898, to $1 per share monthly, maximun $4,498,680 in 1899, in which year the net earnings were $ dividends have been as follows: $2,025,000 in 1905; $2 $2,700,000 in 1907, with total dividend disbursements, to $24,405,680.

Lands, 13 claims, patented, area 230 acres, with sundry including the North Venture and South Venture claims, wh a little high-grade ore, in the Verde district of the Black average elevation of 5,600′ above sea-level, and about 1,800 of the Verde river. Property shows porphyritic rocks, sla mine, being in a zone of slates and intrusive dioritic rock limestone being superimposed unconformably, and apparent nection with the ore deposits. The United Verde was a sm mine, discovered 1880, opened 1883, and closed 1885, be until bought, 1888, by Senator Clark, who has developed it in mines of the world.

The mine is opened on a single monstrous lense of sulphi circa 600′ extreme width and about 1,900′ length, proven the ore body consisting of more or less irregular masses, in a disturbed area, the lense having a dip of 72° and being quartzite dyke that carries about 1% copper, and from 1 to which is used for converter linings. The gossan outcrop, and argentiferous oxidized ores to depth of circa 160′, has The zone of secondary enrichment carries mainly chalcocite, and other alteration minerals of copper, all highly argent zone carries mainly chalcopyrite, with a little bornite, bo argentiferous. No ore assortment is attempted, and no cen everything from the mine going to the furnaces, the avera openings formerly being circa 6.5% copper and 15 to 32% su orable gold and silver values. The ore, as a whole, is not s

Underground openings are very extensive, with enor estimated as high as 20,000,000 tons, which is much too h

h will keep a sulphur fire burning incessantly. The most serious fire, ast, 1902, caused a total suspension of mining, but finally was gotten ontrol by pumping the mine full of carbonic acid gas, this being made ting crushed limestone with dilute sulphuric acid, in iron tanks, the ng forced, by natural pressure, into the top of the shaft, whence it fell, ity, to the bottom of the mine, displacing the lighter atmospheric air. il, 1905, a serious explosion killed 5 men, and for a time threatened ire mine. The fire had eaten its way to a point below the 700′ level, ave on this level, caused by the fire, fissured the superincumbent rock- that surface water from the heavy spring rains seeped down into the ie, generating steam that blew out the solid masonry bulkheads and ered the lives of the miners by steam and sulphur fumes—a truly dia- combination. In fact, the explosion at the United Verde might be an artificial volcano, just as the "air-blasts," at the Quincy and other Superior mines, are called artificial earthquakes. The fire on the 400′ as been burning since 1897, and the mine is on fire in various places, he 7th level to surface, fire in stopes not worked being walled off by bulkheads having steel gates. Mining is in progress in the fire zone, 300′ level, under the Plenum system, introduced by J. J. Shaw. By ethod, air under pressure is blown against the face of the stopes, by fans. The air feeds the fire, which is a smouldering one, but drives he deadly fumes into the shattered rock-mass, and permits the extrac- f ore. The fire, while dangerous and annoying, cannot destroy the , all of which will be recovered, eventually, by mining or leaching.

ie mine is subject to bad caves, one of which carried down the office ig and killed a number of employes, some years ago. Owing to fires ves, the shafts sunk in ore were subject to drawing, causing their ulti- abandonment, new shafts being sunk in the country rock. From a 's standpoint, the United Verde is not an especially desirable working- as the openings are very hot, and the acid waters cause blisters and ipon the unprotected skin, while the mine fires and caving ground render ground work more or less hazardous. Strenuous efforts have been made der the mine safer, but, owing to its having been opened wrongly at art, such efforts are made at a disadvantage, but the mining system has much improved latterly, and the United Verde, while by no means an place for the employment of persons with weak nerves, is much safer ormerly.

evelopment is by shafts of 500′ and 1,000′, and by tunnels of 800′, 2,640′ 593′, tunnels having electric haulage. The old main shaft, 6x18′ in size 0′ deep, is no longer in use. The new main shaft, with 5 compartments, 000′ deep, was located 900′ from the old main shaft, to sink continuously ntry rock, but cut ore at 600′ depth, and has held it to the bottom, con- ly extending the known ore limits of the mine. Equipment of the ain shaft includes 4 cages, worked in counterbalance.

ie new drainage tunnel, of 6,593′ length, was begun Dec. 23, 1906, and ted Sept. 10, 1908, being driven from both ends, in less than 21 months. unnel, running from the Verde valley, connects with the workings on ttom level, at depth of 1,000′, and drains the entire mine. The tunnel in the clear, and at the bottom is a 2x2′ water conduit. The tunnel e track, with room for a second, to be added later.

e surface plant and smelter are located on top of the mine, the precipi- alls of the cañon rendering such a location obligatory, when the mine ened. Equipment includes a steam plant, of about 2,600 h. p., with 2 ul hoists, and a compound air-compressor of 6,000 cubic feet capacity lute, having steam *cylinders of* 28″ and 52″, with 48″ stroke, and air

120' apart, copper being precipitated from the mine water on

All ore above 12% in copper tenor is sent direct to the s being trammed through the tunnel on the 500' level to the ro the ore is heap-roasted, with cordwood, on contract, each 500-t ing 5 to 9 weeks for roasting. After roasting the ore is tran the mine, through the tunnel, and hoisted through the shafts the exceedingly precipitous nature of the ground rendering it i secure direct connection between the smelter and roast-yard, the mine.

The smelter is built on the hanging wall side of the mine, ore body, and there has been considerable trouble from cavin smelter was practically rebuilt, 1903, while in blast, and anc furnace was installed, 1907. Equipment includes 5 rectangul blast-furnaces, 4 of circa 500 tons daily capacity each, and 48x240", of 750 tons capacity, giving the works a nominal ca 2,750 tons daily, but, in practice, one blast-furnace is held i spare. The reverberatory furnace, formerly used for smeltin ores exceptionally rich in gold and silver, has been dispensed small tilting furnace for casting anodes. The smelter stack has catch flue-dust, which carries high values in gold and silver. department has 6 stands, 15 shells and two 50-ton traveling are shipped for refining mainly to the Waclark Wire Works, at Jersey, controlled by Senator Clark, where the gold and si electrolytically, copper being used mainly for drawing into wi been rumors at intervals that the smelter would be removed, tailing, very circumstantially, the alleged plans of the manage new smelter at Farmington, New Mexico, near coal, but, wh may be removed later, it will not go to the fuel, but will rema and possibly new works may be built near the mouth of the which would seem about the best site available in the near vicin

The United Verde & Pacific Railroad, controlled by the 28-mile narrow-gauge line connecting the mine with the Santa Prescott railroad, at Jerome Junction, this line traversing country. Consideration has been given, tentatively, to the e

1,733 oz. gold, valued at $6,557,918, in 1907; circa 34,000,000 corresponding gold and silver values, in 1908.
ears the United Verde made copper for 5 cents per pound, and , after deducting gold and silver values contained, but present higher. Cost, per pound of finished copper, after deducting values, has been as follows in recent years: 9.17 cents per 9.27 cents per pound in 1905; 8.69 cents in 1906; 10.54 cents ts for 1907 having been abnormal. Under average circumper of the United Verde may be figured as costing 9 to 10 with a marked tendency toward increasing costs.
Verde, owing to the former policy of the management, now doned, of withholding all information, has been lied about ly than almost any other mine in the world, and it has been y, that the mine made copper for nothing, the gold and silver all expenses, but this statement never was true, though likely the press, and in the prospectii of new mining corporations, r cash than for truth, for many years to come. The United been pointed out, repeatedly, as a perfect example of blind tory is no nearer truth than the others. The United Verde nator Clark when it was a thoroughly discredited gold-silver iberal applications of cash and brains, was developed into a er mine, consequently, the credit therefor is due to Senator o the goddess of chance. The mine, while it has seen its best st property, is one of the best copper mines of the world, and nd profitable producer for many years to come.

Federal Trust Co., Boston,

Lands, 17 claims, patented, area circa 115 acres, near the Teleg Old Jordan mines, showing limestone, quartzite and porphyry, carryi veins and irregular ore bodies in limestone, latter striking north average dip of 30°. The property shows 5 known ore bodies, 4 of said to carry ore of fair assay tenor, mainly silver-lead, with a little copper ore, latter expected to occur in considerable quantities depth. The limestone ore body, of irregular outline, circa 200′ i width and traceable about 3,000′, carries melaconite, chalcocite, ch and galena, estimated by company to average 2 to 5% copper, 10 to 5 to 16 oz. silver and 80 cents gold per ton.

Development is by a 200′ shaft and by tunnels of 250′, 360′, 420 900′, with a total workings of about 2 miles, of which about 3,000 in use.

Equipment includes a 100-h. p. electric plant, with a 100-h. Electric motor, taking current from the Telluride Power Co. Has a for 500′ depth, and a 5-drill Ingersoll-Sergeant air-compressor. Bu in number, include a 20x40′ wooden machine shop, 20x30′ smithy, 2 and 16x80′ boarding house.

Production, last quarter of 1908, was 100 to 150 tons of ore w direct to smelter, secured at estimated average mining cost of $ The property has developed considerable ore bodies, estimated, appa servatively, at 100,000 tons, with prospects of much greater tonn opened at depth. Property considered promising.

1903, under laws of New Jersey, with capitalization $1,500,000, as a reconstruction of Utah Consolidated Gold Mines, Ltd., a ion that, in turn, succeeded the Sevier Gold Mines, Ltd., Octo-perty of the Utah Consolidated Mining Co. is 2,490 shares of of the capital stock of the Highland Boy Gold Mining Co., of tter corporation holding direct title to the Utah properties. d on the Boston Stock Exchange.

of the present company, and its predecessor, have been as fol-in 1901; nothing in 1902; $900,000 in 1903; $900,000 in 1904; 905; $1,500,000 in 1906; $2,100,000 in 1907; $600,000 in 1908. ave been as follows: $1,038,637 in 1903; $1,164,348 in 1904; 905; $2,835,008 in 1906; $1,179,413 in 1907.

claims, patented, area 239 acres, known as the Highland Boy Fork Cañon, circa 2½ miles from Bingham Canyon. Company elter site, in Pine Cañon, Tooele Co., Utah, circa 4 miles across the mine, but this was sold, late 1908, to International Smelt-mpany has about 150 acres of mineral land, unexplored previous is to be thoroughly tested, and considerable diamond drilling 1908.

ty has 6 distinct ore bodies, with 3 main ore chutes developed, pproximately 320′ in extreme width, by 340′ in length, and of . It was claimed in the press, 1907, that the Highland Boy ore d into the Yampa, but this does not seem proven, though lower encountered at depth. The ore chutes apparently are leaner evels, though carrying good values, and likely to continue work-epth. Ores are sulphide, carrying 2 to 13% copper and $2.50 and silver values per ton, average ores carrying about 30% lica and sulphur, rendering them self-fluxing. Extensive under-ment was done, 1907-1908, proving much new ore of promise, rage of ore is lower in grade, since 1906. Some good new ore n opened toward the west, and considerable lead ore of promise pped. During 1907 the mine made nearly 2 miles of new open-d stopes were reopened, 1908. Ore reserves, 1907, were esti-930 tons.

nd Boy mine is opened by a 900′ shaft and 7 tunnels, of 1,000′ h, extraction being almost entirely through No. 7, the lowest s 700′ below the crest of the mountain. All tunnels are con-is milled down to the bottom tunnel for removal. There are 2 oists on the 700′ level, ore from the bottom workings being blind shafts to the level of the lowest tunnel. The ore breaks ood sized bodies, extraction being by the top slice caving sys-e-set timbering, expense for latter being heavy, with culls used d filling, and ore is broken mainly by contract. The mine has miles of workings, with electric traction in No. 7, the lowest ing tunnel.

ërial tram leads from the portal of No. 7 tunnel to ore-bins on Western railway. There is a subsidiary aërial tram, crossing n, used for handling lumber and mining supplies.

r, at Murray, 17 miles north of the mine, and 10 miles south of , is of circa 800 tons daily capacity, equipment including 20 *iners, 3 Wethey calciners and* 9 reverberatory furnaces, 2 of the

company would restrict production to 700 tons daily, which off peremptorily, and the smelter was blown out, January, 1908.

On suspension of smelting at the company's own plant, a 12- was made with the Garfield smelter, February, 1908, which extended, for 18 months, from Sept. 24, 1908. Smelting at the has been marked by much friction between the Utah Consoli American Smelting & Refining Co., the contention of the for costs are greater by about 2 to 2½ cents per pound of finished field, than they were at the company's own smelter.

The company planned, tentatively, a $1,250,000 smelter in district of Tooele county, Utah, 4 miles from the mine, whi necessitated a tunnel through or a costly aërial tram over between, or very possibly a combination of tunnel and aëri November, 1908, the company made a smelting contract with V of Butte, Montana, which was assigned by him to the newly-o national Smelting Co. This contract, for 10 years, provides for 1,200 tons daily of Utah Consolidated ores, on terms materially than were given by the Garfield Smelting Co., the contract als the sale, by the Utah Consolidated to the new smelting company site in Pine Cañon, and extensive smoke easements secured therewith. The contract calls for beginning of smelting April be necessary for the Utah Consolidated to construct, meantime, a system between its mines and the smelter, unless the Interna should see fit to provide such a system, with a view to securing also from the Bingham camp.

Production has been as follows: 233,700 tons ore, yielding fine copper, in 1904; 287,148 tons ore, yielding 17,264,474 lbs. cop silver and 28,290 oz. gold, giving an average extraction of 3% silver and 0.1 oz. gold per ton, in 1905; 18,533,974 lbs. copper, 4 and 42,001 oz. gold in 1906; 279,642 tons ore, yielding 13,987,3 390,296 oz. silver and 34,554 oz. gold, giving average returns of and 1.4 oz. silver per ton, in 1907. At end of 1908 mine was 800 tons of ore daily, to the Garfield smelter, said to average with reduced gold and silver values.

er. The Utah Consolidated is a very fine mine, with a good management, hould be capable of increased production, though it is probable that the osts of 1906 never will be repeated.

McLaren, directors; Robert C. Gemmell, general superintendent; . Shilling, mine superintendent; John McDonald, assistant mine superin ent; Frank G. Janney, mill superintendent; Geo. F. Waddell, assistant superintendent; William Spencer, mining engineer; O. O. Bradley, mechan engineer; John M. Hayes, cashier.

Organized June, 1903, and reorganized Apr. 30, 1904, under laws of New ey, with capitalization $4,500,000, shares $10 par, increased, October, 1905, 6,000,000, and again increased, January, 1908, to $7,500,000, shares $10 par; ed, $7,347,500. Retired, 1906, outstanding balance of original bond issue $750,000, at 7%, paying a premium of 5% therefor. Bonds, authorized, 00,000, in denominations of $1,000, at 6%, convertible into stock at $20 share, at option of holder, prior to Jan. 11, 1911; outstanding, Dec. 31, 1907, 64,000. Dividends, quarterly, of 50 cents each, were paid Sept. 30 and Dec. 1908, amounting to $666,824. Controls, through stock ownership, the Bing & Garfield Railway Co., organized July, 1908, under laws of Utah, with italization $1,000,000, shares $100 par. A large share interest in the Utah per Co. is held by American Smelters Securities Co. Shares are listed on Boston and Paris Stock Exchanges. Morton Trust Co., New York, regis . Annual meeting, fourth Friday in January.

Lands, 18 claims, area 200 acres, with circa 2,000 acres in mill and smelter s, also sundry surface rights for dumping waste. In 1906 the company ght surface rights to 20 acres, for $37,500, from the Little Bell and Yel companies, and surface rights to 80 acres, for $15,000, from Bingham algamated company, for railroad right of way, waste works and dumping m. Mineral lands, bought of De Lamar Gold Mining & Milling Co., lie on h sides of Bingham cañon, permitting ore extraction by tunnel, to great th.

Lands show porphyry and quartzite, country rock being monzonite, no red, decomposed, frankly porphyry, that handles easily, yet stands well, ore g mainly chalcocite, with some chalcopyrite, quite evenly disseminated ughout the porphyry, with occasional veinlets carrying high grade chalcocite bornite. The porphyry ore runs 0.75 to 2.50% in copper value, and the rage of assays at Garfield smelter, 1906, was 1.80% copper, 0.55 oz. silver and

0.16 oz gold per ton, which was practically identical with the average assays of ore milled to that date. The monzonite ore body has been proven by extensive diamond drill borings, conducted on surface and from the main tunnel to depth of 500′, proving a continuance of the ore body for a thickness of 300′ to 600′ with an estimated average depth of 310′ of workable ore. The capping, of leached country rock, carrying unworkable copper values, ranges 50′ to 65′ in depth, with ore of workable tenor underneath for 300′ to 600′ depth, succeeded by monzonite too low in copper tenor to be workable.

The mine, while having a single ore body, is being developed both underground and open-cast, but is essentially a quarrying proposition, like the Rio Tinto and Granby. The underground mine, operated by the top slice caving system, eventually will be broken into open pits, and the entire mine worked open-cast. The mine openings are rectangular, laid out like the streets of a city, with blocks above blocks, like the successive floors of a building. There are 13 tunnels, entering the hills at approximately right angles to the gulch. These tunnels are avenues, and, crossing the avenues, at right angles, parallel with the gulch, are streets, these being opened 150′ apart. Paralleling the tunnels, or avenues, are drifts, corresponding to city alleys, these being 75′ on either side of the avenues. The tunnels are 10x10′, or larger, and all openings are of exceptionally large dimensions, connections between the various floors being secured by upraises from alley to alley. Stope levels are opened at intervals of 17′ and 25′. The avenues, streets and alleys are named on the same system as is used in the street nomenclature of Salt Lake City, and the underground mine, as a whole, has nearly 20 miles of openings, under about 40 acres of ground. Timbering costs are said to be less than 2 cents per ton of ore mined, and the mine has, blocked out, above the main tunnel level, about 25,000,000 tons of ore. The main working tunnel has a double tram-track, laid with 30-lb. rails, with an electric haulage system.

The open-cast workings are planned on a truly colossal scale, in magnitude comparable only with the greatest iron mines on the Mesaba Range of Lake Superior. Removal of both overburden and ore is by steam-shovels, and stripping was begun with steam-shovels, August, 1906, the capping ranging 50′ to 65′ in depth. For the third quarter of 1908, stripping averaged 87,000 cu. yds. of capping monthly, or at the rate of about 10 acres yearly, each acre being estimated to carry about 1,000,000 tons of payable ore. The ground must be blasted before removal by steam-shovel, and the method of mining followed provides for removal of ore in 60′ benches, in sections 40′ thick and 1,000′ long, each section carrying circa 180,000 tons of ore, requiring, for blasting, about 25 tons of dynamite, ground being broken at a cost of about 1¼ cents per ton. A single blast has torn down 15,000 tons of ore. Mining equipment, for open-cast operations, includes 7 Vulcan and Marion steam-shovels, of 70 to 90 tons weight each, 3 being employed in stripping and 4 for removal of ore.

For removal of ore and deposition of overburden, the company has 10 miles of standard gauge tracks, laid with 65-lb. steel rails, equipment including 5 locomotives, and 125 dump-cars of 6 cu. yds. capacity each. The waste rock from the capping is loaded on cars, and dumped down the cañon, on lands bought for the purpose.

At the end of 1908 the company estimated that there had been developed, on a 72-acre tract, an average of 1,000,000 tons of ore per acre, at an average depth of 310′, giving 72,000,000 tons of ore proven, sufficient for nearly 30 years production, on the basis of 2,500,000 tons of ore extraction yearly. The principal disadvantage of steam-shovel work lies in the mine being on both sides of a precipitous gulch, which causes the steam-shovel employed on stripping to run speedily into ore, the cuts being unpleasantly short, owing to the sharp pitch. This disadvantage is overcome, partially, by switchbacks, and in case

ious trouble there are alternative methods available for the removal of
rden and ore, these including the construction of a cog-line railway, to
of the ore body, to give access to the upper portion.
ining equipment includes a steam plant, with air-compressors and power
but, owing to ore extraction being mainly open-cast, and underground ore
secured through tunnels, the mining plant is smaller than may be found
ny properties having a tithe of the productive capacity of the Utah
r Co.
he company has had very poor service from the Rio Grande Western
d, which, holding the entire Bingham camp at its mercy, is inclined to be
hat dictatorial and dilatory. For this reason the Utah Copper Co.
d a charter, 1908, for the Bingham & Garfield Railway Co., and plans the
uction of a 20-mile railway line, from Bingham Canyon to Garfield, at an
ted cost of about $1,000,000.
he company has 2 mills, the first being near the mine, and the second,
is one of the greatest in the world, at Garfield Beach, 19 miles distant.
he old mill, remodeled 1908, of circa 900 tons daily capacity, was so
ed that it could be increased, by units, to circa 6,000 tons ultimate
ity, but the development at the mine rendering it probable that this
ity would be insufficient, a more extensive millsite was secured, on Great
Lake. The old concentrator, at Copperton, 1½ miles below Bingham,
es ore over a spur of the Bingham branch of the Rio Grande Western
ay, the railroad track entering the mill over a trestle, ore being dumped
ins beneath the track. The building is 193x327′ in size, of wood, sheathed
iron. Equipment incudes 2 Gates centrifugal crushers, 4 sets of rolls, 6
jigs, 4 Wilfley tables, 2 Overstrom tables, 2 Card tables, 52 slime tables,
ilean mills, 18 six-foot Frue vanners, 6 hydraulic classifiers, and 6 revolv-
creens. The crushing department, 26x44′ in size, has two 1,200-ton Gates
ers, and 2 sets of 36″ and 30″ Gates rolls. Ore is drawn from the bins,
gh chutes, to a 200′ belt-conveyor that carries ore to the crushers. The
r-house, 36x100′, has eight 75-h. p. boilers, with automatic stokers, and
. p., 150-h. p., and 350-h. p. engines.
The new mill is located on a 3,000-acre site, 4 miles east of the Garfield
ter and one mile east of the works of the Boston Consolidated, reached
a 8-mile branch of the Rio Grande Western railway. The mill is of steel frame,
ncrete foundations, with reinforced concrete floors, iron siding, and composi-
roofing. The mill is in two 3,000-ton units, of 6 sections each, giving a capacity
00 tons daily to each section. Each unit is 300x505′ in size, the two units,
their outlying buildings and yards, occupying about 20 acres, and the
t is so designed that two additional units can be constructed, whenever
red, giving the mill a daily capacity of 12,000 tons. Milling was begun
e, 1907, with 2 sections, and the 12th and final section of the mill was
ted circa November, 1908.
The ore-bins are of 30,000 tons capacity, there being bins of 23,000 tons
acity in the coarse crushing department, and of 7,000 tons capacity in the
crushing department.
Equipment of each section of the mill consists of 2 No. 7½ Gates crushers;
ets of 20x54″ rolls, of special design; 12 sets of 16x36″ rolls, of special
ign; 18 six-foot Chilean mills, of special design; 36 jigs, of special design;
No. 5 Wilfley tables, and 52 six-foot suspended vanners, of special type.
The 13,000-h. p. power plant, circa 2,000′ from the mills, has two 26x54x48″
is-Chalmers Corliss cross-compound condensing engines, direct-connected to
1,500-kw. alternating current generators, and three 32x70x48″
rdberg-Corliss cross-compound condensing engines, direct-connected to three
50-kw. alternating current generators. The boiler plant has twenty 600-h. p.

Heine water-tube boilers, working under 175 lbs. steam pressure, equipped with stokers having separate mechanical drives, of special design.

The machine-shop, 50x105′, of steel frame and brick walls, on concrete foundations, is thoroughly equipped for general repair work.

Water formerly was taken from the Garfield Water Co., but a sufficient supply has been developed on the company's own lands. The pumping plant, of 10,500 gallons capacity per minute, has one 12″ two-stage turbine pump, direct-connected to a 250-h. p. General Electric induction motor, with capacity of 2,500 gallons per minute; one 12″ two-stage turbine pump, direct-connected to a 350-h. p. General Electric induction motor, with capacity of 3,500 gallons per minute, and one 15″ two-stage turbine pump, direct-connected to a 450-h. p. General Electric induction motor, with capacity of 4,500 gallons per minute. These pumps force water, from a pond, through 2,000′ of 24″ pipe, against a head of 230′ to a 5,500,000-gallon concrete reservoir. There also is an auxiliary pumping plant, forcing water to a 500,000-gallon high-service concrete reservoir, 100′ above the main reservoir, this having 2 Worthington 8″ single-stage pumps, direct-connected to induction motors, with combined capacity of 1,500 gallons per minute.

The nature of the ore, which is mainly very finely disseminated chalcocite, necessitates fine crushing, which causes considerable sliming. The ore concentrates easily, but losses in tailings are heavy, having been, 1906, at the old mill, 0.50 to 0.75% copper, and, 1908, the mills treated ore partially oxidized, which did not give very clean extraction, but the mills should do better on ores mined from greater depth. The new mill was expected to put 18 to 23 tons of ore into one, giving concentrates averaging 26 to 30% copper and $6 to $10 combined gold and silver values per ton. For the first eleven days of August, 1907, the ore treated was said to have averaged 1.91% copper, by assay, with an extraction of 1.36%, or 27.2 lbs. fine copper per ton, with losses of 0.55% copper in tailings, giving a recovery of 71%. In May, 1908, the mill was putting about 23 into one, with a recovery of only about 67% of assay values, and in July, 1908, the mill was said to be making an average recovery of 23 lbs. fine copper per ton. The management hopes, eventually, to increase the extraction to 80% of assay values, but it seems doubtful if this can be done, with ore that slimes so readily, with such high concentration.

Production was 4,698,906 lbs. fine copper for calendar year 1906, and was 33,118,409 lbs. fine copper for year ending June 30, 1908. Production, 1908, was 8,527,939 lbs. for the first quarter, 11,568,390 lbs. for the second quarter, and 12,000,095 lbs. for the third quarter, with a total production of 43,689,875 lbs. fine copper for the year. These figures render it obvious that the mine has a productive capacity of about 50,000,000 lbs. fine copper yearly, with its present milling capacity of 7,000 tons per diem.

Costs were said, for August, 1907, to have been about 45 cents per ton for actual mining, or, with general administrative costs, taxes, etc., 68 cents per ton for mining. President MacNeill stated, early 1908, that mining costs, by steam-shovel, were about 25 cents per ton only. For the second quarter of 1908 net earnings were $493,694, on a production of 11,568,390 lbs. fine copper, made at an estimated average cost of 8.16 cents per lb. For the third quarter of 1908, net earnings were $501,391,60, with copper made at an estimated average cost of 8.73 cents per lb. These figures would indicate the ability of the company to make copper for an average cost under 10 cents per lb., and perhaps for 9 cents per lb., but the estimated average cost of 7 cents per lb. is not likely to be reached. Former estimated costs of $1.75 to $1.85 per ton of raw ore treated, apparently should be increased to $2 to $2.25 per ton, to allow a reasonable margin for safety, and, with an average recovery of 23 lbs. fine per per ton of ore treated, cost of finished copper would be 8.7 cents per lb.

asis of $2 cost per ton, or 9.8 cents per lb. on the basis of cost of $2.25 f ore. It is obvious, however, that while the Utah Copper Co. has not the extreme low cost predicted by its management, and scarcely seems do so, it has fully demonstrated its ability to make copper, at the 0,000,000 lbs. per annum, at a cost safely within 10 cents per lb., and g copper, beyond question, at a somewhat lower average cost than the of costs of the ten largest copper producers of the world, of which the w is one. The ore reserves of the mine are as nearly inexhaustible as any mine of any metal.

Utah Copper Co. has been well managed, and the original owners, con- with the United States Reduction & Refining Co., are regarded with vor, as thoroughly experienced and capable mining men, but the prop- suffered somewhat, in the eyes of conservative investors, through the ion of a heavy share interest, said, in some quarters, to constitute a by the Guggenheims, and suspicions of the possible future of the prop- under Guggenheim control, were aggravated by newspaper talk of this property with other Guggenheim interests, at Ely, Nevada, which would not be to the best interests of the shareholders of the Utah Co. Thomas W. Lawson apparently was sold a call on a large block of the Utah Copper Co., in 1908, and endeavored—at least ostensibly— t the shares, whereupon they immediately sold lower, this being the ffect of Lawson's endorsement of a mining property. The management led to commendation for giving quarterly reports that furnish valuable l information, and apprise shareholders of the manner in which their ts are being conserved.

DEVELOPMENT CO. **UTAH.**

ad. Was succeeded, circa September, 1908, by North Utah Mining Co. rly at Bingham Canyon, Salt Lake Co., Utah. Fully described Vol. VII.

& EASTERN COPPER CO. **UTAH.**

fice: 127 Church St., New Haven, Conn. Operating office: Herald Salt Lake City, Utah. Mine office: Dixie, Washington Co., Utah. office: Shem, Washington Co., Utah. Louis E. Stoddard, president; E. Graham, vice-president; T. W. Farnam, secretary and treasurer; pre- officers, E. G. Stoddard, W. D. Bushnell and Fredk. F. Brewster, direc- Chas. H. Doolittle, general manager. Organized Feb. 7, 1901, under laws est Virginia with capitalization $1,500,000, increased later to $3,500,000, $5 par, in $2,000,000 preferred and $1,500,000 common stock.

ands, 11 claims, patented, area 220 acres, and a 40-acre smelter-site, g lands including the old Dixie mine, in the Tutsagubet or Cave Springs ct, near Green River. Property shows 5 ore bodies, in limestone, one, of timated average width, carrying cuprite, azurite and massive malachite, g average assays of 15% copper. Principal development was by a 775' shaft, sunk from the breast of a 225' tunnel, but the shaft caved, June 1, and it was necessary to run a new tunnel, of 800', to reopen the mine. Old ngs were said to show about 100,000 tons of ore. The mine uses gasoline

he old 25-ton smelter, antiquated and poorly located, is idle. The new er, at Shem, has a 100-h. p. water-jacket blast-furnace, with water power, d from the Santa Clara river, circa 2 miles distant, and an auxiliary plant. The smelter is about 50 miles from Acoma, on the Rio Grande rn railway, the nearest shipping point, and transportation for 14 miles of istance, with a down-grade haul, is by traction engine.

roduction has been as follows: 1,448,597 lbs. fine copper in 1904; 400,166 n 1905; 391,779 lbs. in 1907. The property was closed down, October, *owing to depression in the metal market.* Notwithstanding lack of rail

A. F. Schneider, vice-president. Lands include the Blue Bird group, near the Hickory mine of the Majestic, having a 225′ main shaft.

UTAH SOUTHERN GOLD & COPPER MINING CO. UTAH.

Dead. Formerly at Milford, Beaver Co., Utah. Described Vol. VI.

UTAH SMELTING CO. UTAH.

Dead. Was succeeded, 1908, by Independent Smelting Co. Formerly at Bonneville, Box Elder Co., Utah. Described Vol. VII.

UTAH UNITED COPPER CO. UTAH.

Office: 222 D. F. Walker Bldg., Salt Lake City, Utah. Mine office: Milford, Beaver Co., Utah. Employs 4 men. John T. Treasure, president; A. J. McMullen, vice-president and general manager; Chas. A. Weaver, secretary; A. D. McMullen, treasurer; D. P. Rohlfing, engineer. Organized Sept. 1, 1908, under laws of Utah, with capitalization $600,000, shares $1 par, as a merger of Wasatch Mining & Milling Co., and Skylark Copper Mining & Milling Co. Annual meeting, second Tuesday in October.

Lands, 12 claims, 2 patented, area 240 acres, also a 10-acre millsite, in the Beaver Lake district, showing fissures and contact veins, in and between limestone and granite-porphyry, there being 3 ore bodies, estimated by company to range 20′ to 100′, 50′ to 200′ and 50′ to 300′ in width, of which one, traceable 6,300′, is opened by shafts of 30′, 100′, 150′, 310′ and 415′, and by 4 tunnels, longest 350′, estimated to show 50,000 tons of ore blocked out for stoping. Ore is oxidized to depth of 170′, and sulphide below. Ores are claimed to average 6.2% copper, up to 60% lead, 6 oz. silver and $15.40 gold per ton. Company plans continuous development.

UTAH-YERINGTON MINING CO. NEVADA.

Office: Provo, Utah. Letter returned unclaimed from former mine office, Yerington, Lyon Co., Nev. John Roundy, president; Jos. Wirthlin, vice-president; Heber C. Jex, secretary and treasurer; preceding officers, Heber C. Harris and Jack Cockrell, directors. Organized 1907, under laws of Utah, with capitalization $100,000, shares 10 cents par. Lands, 5 claims.

UTE COPPER CO. UTAH.

Office: Salt Lake City, Utah. Mine office: Bingham Canyon, Salt Lake Co., Utah. Thos. Weir, president; John Weir, Jr., vice-president; J. M. Burt, secretary and treasurer; preceding officers, Henry Catrow and N. J. Catrow, directors. Organized 1907, under laws of Utah, with capitalization $3,000,000, shares $5 par. Lands, circa 225 acres, patented, including the old Winnimuck mine, which was an important silver-lead producer in early days. Property is opened by the 900′ Weir tunnel, and is said to be developing through the tunnel of the Bingham-Butte Mining Co. Has an air-compressor.

UTICA & BISBEE DEVELOPMENT CO. ARIZONA.

Office: Utica, N. Y. Letter returned unclaimed from former mine office, Bisbee, Cochise Co., Ariz. Organized circa 1906, to take over the Erickson group, in Tombstone Cañon, northwest of Bisbee. Presumably idle.

UTICA MINING & MILLING CO. COLORADO.

Office: 1420 Chestnut St., Philadelphia, Pa. Mine office: Ward, Boulder Co., Colo. Ores carry gold, silver and copper. Has water power and a 20-stamp mill. Presumably idle.

UTOPIA MINING & MILLING CO WYOMING.

Mine office: Centennial, Albany Co., Wyo. Development is by a tunnel, said to show a 12′ vein carrying ore giving high assay values in gold, with fair silver and copper values.

COMPAÑIA MINERA DE LAS VACAS i LOS VILOS. CHILE.

Office: Valparaiso, Chile. Mine office: Petorca, Aconcagua, Chile. Organized Aug. 6, 1905, under laws of Chile, with capitalization 400,000 pesos, shares 10 pesos par.

ELSA COPPER CO., LTD. **ITALY.**
d. Formerly had an office at 123 Wellington St., Glasgow, Scotland.

Z-BOSTON COPPER CO. **ALASKA.**
ce: Alaska Bldg., Seattle, Wash. Letter returned unclaimed from mine office, Valdez Alaska. Lands are near the Alaska-Northwest Co.

O VALENCIA. **PERÚ.**
e office: Quichin, Camaná, Arequipa, Perú. Property, near the coast, ern Perú, has argentiferous copper ore.

CIA COPPER MINING CO. **CALIFORNIA.**
d. Formerly at Sherwood, Trinity Co., Cal. Fully described Vol. VI.

DAD VALENCIANO-ANDALUZA DE ALTOS **SPAIN.**
RNOS y MINAS DE PEÑAFLOR.
ce: Glorieta, 1, Valencia, Spain. Mine office: Peñaflor, Sevilla, Spain. ldomero Deu, president and agent. Capitalization, 1,500,000 pesetas, 250 pesetas par. Property is the Elvira mine and extensions, carrying and iron pyrites, at Peñaflor, and a group of claims, area 144 hectares, olo de los Infantes, Sevilla.

NSUELLA COPPER CO. **ARIZONA.**
ice: 3543 W. 23d Ave., Denver, Colo. Mine office: Quartzite, Yuma iz. Col. Richard Darling, president and general manager; F. W. Deiner, treasurer; Geo. C. Foulkes, secretary. Organized November, 1901, laws of Arizona, with capitalization $1,250,000, shares $1 par.
nds, 7 claims, patented, area circa 100 acres, also a 60-acre mill and r site, 12 miles southwest of Quartzite, 70 miles from the Southern railroad and 15 miles from steamer landing on the Colorado river, supeing received by water. Country rocks are limestone and schist, carrycontact veins, of fair size, developed by shafts of 200′ and 270′, with 1,300′ of workings, showing malachite, azurite and oxide ores, giving e assays of 12% copper, 4 oz. silver and $4 gold per ton. Has gasoline , with two 500′ hoists, 2 engine-houses, 18x24′ smithy, and 6 dwellings, 1,000′ artesian well. Has a 30-ton Vulcan water-jacket blast-furnace. Idle.

NTINE COPPER & GOLD MINING CO. **UTAH.**
ead. Formerly at Bingham Canyon, Salt Lake Co., Utah. Described Vol. VI.

NZUELA COPPER MINING CO. **ARIZONA.**
ffice and mine: Benson, Cochise Co., Ariz. Organized 1907. Lands, 25 miles northwest of Benson, near the San Domingo mine of the Hub g & Investment Co., are said to show extensive outcrops of self-fluxing r ore.

EO MINING CO. **UTAH.**
Office: care of Hon. Thomas Kearns, general manager, Salt Lake City, . Mine office: Park City, Summit Co., Utah. J. P. Boyle, superintendent. auriferous and argentiferous copper ores. Idle.

ERIE MINE. **YUKON**
Mine office: White Horse, Yukon, Canada. Arthur D. Palmer, owner and ger. Mine, circa 3 miles southeast of the Arctic Chief, has a 100′ shaft, 18′ vein said to carry ore averaging about 10% copper. Has shipped a high grade sulphide ore. Employs circa 15 men.

ÉTÉ ANONYME FRANÇAISE DES MINES **SERVIA.**
DE CUIVRE DE VALIEVO.
Office: 13 Rue Rougemont, Paris, France. Mine office: Rebelj, Valievo, a. M. Ducos, president; A. Bevelley, vice-president. Organized Jan. 10, under laws of France, with capitalization 2,000,000 francs, shares 100 s par. *Debentures, 50,000 francs, at 6%,* in bonds of 100 francs par.

COMPAÑIA MINERA BRONCES DE VALLENA

Office: Iquique, Chile. Mine office: Vallena ized Nov. 30, 1900, under laws of Chile, with capita 50 pesos par.

VALLEY MINING & MILLING CO.

Dead. Formerly at West Cliff, Custer Co., Col

VALLEY VIEW MINING CO.

Office: San Francisco, Cal. Mine office: Linc 90 acres, patented, showing impregnations 250′ w between schistose walls. Has a gossan outcrop, long, carrying average gold and silver values of ab has average about 5% copper. Has two 5′ Hun years.

VALLEY VIEW MINING CO.

Dead. Formerly at Anaconda, Deer Lodge Co

VALRUBIO GROUP.

Office: care of M. Yglesias, owner, 2 Tokenh Eng. Mine office: Paimogo, Huelva, Spain. P rubio, San Carlos and San Andres mines, with to lying between the Romanera and Monterubio group extensions of the San Vicente veins, is under lease

Dead. Formerly at Penticton, Boundary distri

VANCOUVER COPPER CO., LTD.

Office: 4 Sun Court, Cornhill, London, E. C., Sicker, Vancouver Island, B. C. J. Proctor, chair sulting engineer; W. Cooper, secretary; Edw. Stab ized Feb. 27, 1907, under laws of Great Britain, shares £1 par; working capital, £30,000. Debent bonds, at 6%, due July, 1912.

Lands include the Lenora mine, adjoining the tion of the Tyee ore bodies in a chute of 30′ to 40′ capping. Property includes the 5-mile Mount Si with 1,136 acres of right-of-way, sundry town lots Sicker hotel. Also holds, under bond and lease, Sidney Inlet, Vancouver Island, B. C., from which late 1907. Under former management the Lenor grades, first grade averaging 7.95% copper, 3.5 oz. ton, and second grade, which constituted about t averaging 1.3% copper and 0.015 oz. gold per ton.

n 1,700 tons of ore, carrying about 140,000 lbs. fine copper. Property
ed promising.

UVER ISLAND COPPER CO., LTD. **BRITISH COLUMBIA.**

e office: Sidney, Vancouver Island, B. C. Organized 1907, under laws
h Columbia, with capitalization $100,000, shares $1 par. Lands are at
nlet, in the Clayquot division of the Alberni district, Vancouver Island,
s said to have contracted for a 200-ton Riblet aërial tram, to connect
bunkers at tidewater.

UVER ISLAND MINING & **BRITISH COLUMBIA.**
VELOPMENT CO., LTD.

e: 45 Leadenhall St., London, E. C., Eng. Mine office: Duncans,
er Island, B. C. F. H. Faviell, chairman; J. I. Fifield, secretary. Or-
Nov. 18, 1902, under laws of Great Britain, with capitalization £50,000,
l par; issued £35,895. Lands, circa 1,800 acres, apparently held under
ption, lying mainly east of the Tyee and supposedly carrying the east-
nsion of the Tyee. The Westholm has a 510′ two-compartment shaft,
t of known occurrence of ore in the Tyee, and has about one-half mile
ngs, showing, on the 500′ level, a wide mineralized zone with occasional
ations of 3 to 10% copper tenor. The Blue Bell has a 110′ shaft, from
carloads of ore, shipped 1906, gave returns of 5 to 8% copper.

UVER RAILWAY SYNDICATE, LTD. **BRITISH COLUMBIA.**

d. Property sold, February, 1907, to Vancouver Copper Co., Ltd.
at Mount Sicker, Vancouver Island, B. C.

I MINING CO., LTD. **BRITISH COLUMBIA.**

e: Salisbury House, London, E. C., Eng. Mine office: Rossland,
trict, B. C. Lord Ernest Hamilton, chairman; preceding officer, F. C. D.
, A. B. Deablo and H. W. Morrison, directors. Organized July 9, 1908,
ws of Great Britain, with capitalization £34,500, in 30,000 preference
l 1s. par. Property is the Vancouver group, 8 claims, 1 fractional, in
an district, carrying mainly silver-lead ores.

& HUGUET. **ALGERIA.**

e office: El Miliah, Philippeville, Algeria. Property is the Achaiches
hich, in 1905, employed 47 men. At last accounts planned to smelt
ne mine. Presumably idle.

PROPHET COPPER CO., LTD. **ARIZONA.**

d. Formerly at Clifton, Graham Co., Ariz. Described Vol. VI.

MINING CO. **ARIZONA.**

e: Tucson, Ariz. Mine office: Vekol, Pinal Co., Ariz. Employs
men. Maj. E. S. Garnett, president; J. V. Neuhaus, vice-president;
tton, treasurer; S. J. Garnett, secretary; Wm. Forbach, superintendent.
ds, 42 claims, said to have been bought for circa $200,000, in the Vekol
ns, about 35 miles southwest of Casa Grande. Lands include 6 old
s, dating from 1881, with about 6 miles of workings, said to have
, in the past, circa $3,000,000 in silver and lead, and the old ore dumps
to contain 350,000 tons of second grade ore that probably can be
t a profit. The old mines shipped some ore carrying up to 4,000 oz.
r ton, with considerable lead and a small amount of copper, with
dications of increased copper values at depth. The mine has a new
-compartment shaft, said to show good ore.
ipment includes steam power, air-compressor and 3 hoists, one good
′ depth. Buildings include a smithy, machine-shop, carpenter shop,
d laboratory. The mill is of 40 tons rated daily capacity. Property
ed promising.

DEÑA MINING & SMELTING CO. **MEXICO.**

e: 71 Broadway, New York, N. Y. Mine and works office: Velar-

deña, Cuencamé, Durango, Mex. Wm. C. Potter, chairman executive committee; H. M. Moran, general manager; Wm. Davey, mine superintendent; W. H. Foster, smelter superintendent. Is controlled, through ownership of 60% of capital stock, by American Smelters Securities Co.

Lands, 2,500 pertenencias, area 6,177 acres, including the town of Velardeña, with a population of 5,000. Lands include the Terneres and Santa Maria silver-lead mines, the Copper Queen mine, carrying argentiferous copper ores, and a number of smaller properties. The mines, first opened circa A. D. 1650, were worked originally for silver-lead carbonates, succeeded at depth by zinciferous and cupriferous silver-lead sulphides.

The Copper Queen, or Reina de Cobre mine, also known as El Cobre mine, is 27 kilometers by rail from Velardeña, and the ore is mainly copper, said to average about 3% copper and 250 grams silver per ton, though there is considerable silver-lead. Ores, as developed in this property, are mainly oxidized, and normal production is 400 to 500 tons daily of low grade ore.

The Santa Maria mine, at Velardeña, is opened by numerous shafts, and production is 100 to 500 tons daily of silver-lead ore.

The Terneres mine is said to have produced $22,000,000 worth of ore before coming under the present ownership. Development is by a 600′ main shaft, showing good ore in the bottom, and by a main tunnel with electric haulage. The property has about 25 miles of workings, and production, mainly copper ore, though with considerable silver-lead ore, amounts to about 400 tons daily. The Terneres has an aërial tram to Velardeña.

A 1,200-h. p. central power plant has steam power and gas producers, also a complete electric plant, with power generated partly by water, but mainly by steam and gas engines. Equipment includes electric hoists and electric air-compressors.

Buildings include necessary shops, offices and a considerable number of dwellings for employes.

The company has a private narrow-gauge railroad, known as the Ferrocarril Velardeña, of about 20 miles length, connecting the mines and smelters, the principal branch being a 29-kilometer line from Velardeña to the Copper Queen mine. The company also plans an aërial tram from the mines to the new smelter, 8 miles distant.

The concentrator, rated at 200 tons, may be increased to 500 tons daily capacity.

The reduction works include two smelters, the oldest being antiquated and out of commission.

The new smelter, blown in 1907, is about 4 miles from Pedricefia, on the Mexican National Railway. This has three 150-ton lead furnaces and three 250-ton copper furnaces, with room for an additional copper cupola. There are twelve 250-ton charging-bins, surmounted by a movable electrical steel bridge, for distribution of charges, charging-cars being loaded automatically from the bins, and hauled to the charge-floor by electric locomotives. Each blast-furnace has an elliptical double brick-lined settler, 4x12′ inside measurement, and slags are handled by 10-ton cars, hauled by electric locomotives. There are extensive dust-chambers and flues leading to a 230′ brick stack. A briquetting plant handles flue-dust and fines. The works have no converter, matte being shipped to the Aguascalientes smelter for reduction. The lead smelter includes 5 Godfrey roasters and 5 Huntington-Heberlein converters for the desulphurization of lead sulphides, with a capacity of 125 tons daily.

OLIVERIO L. VELASCO y CA. MEXICO.

Office: Apartado 953, Mexico, D. F. Mine office: Chichihualco, Be— Guerrero, Mex. Oliverio L. Velasco, general manager. Property is [illegible]

ine, carrying gold, silver and copper ores. Employed circa 75 men at unts.

er returned unclaimed from former mine office, Orient, Ferry Co., Wash. her New, superintendent. Lands, 3 miles south of Orient, are opened l and an incline shaft showing auriferous copper sulphides.

RE HILL MINING CO. **ARIZONA.**
e and mines: Jerome, Yavapai Co., Ariz. Thos. E. Campbell, president eral manager; Geo. H. Avery, vice-president and superintendent; Avery, secretary; Frank E. Jordan, treasurer. Organized 1900, under Arizona, with capitalization $3,000,000, shares $1 par. Lands, 6 pat- ims, area 110 acres, 2 miles south of Jerome, showing 2 fissure veins, by company to average 90′ width and to carry average value of 4.7% .5 oz. silver and $4 gold per ton, in oxide and sulphide ores, which is an nate, developed by shafts of 65′ and 87′, and tunnels of 205′ and 457′. nds and idle several years.

APEX COPPER MINING CO. **ARIZONA.**
e: 3 West Main St., Bloomsburg, Pa. Letter returned unclaimed from ine office, Jerome, Yavapai Co., Ariz. Chas. B. Lutz, president and ; Jas. H. Mercer, vice-president; M. P. Lutz, secretary. Organized th capitalization $3,000,000, shares $1 par. Property was sold by 906, but redeemed by president for benefit of shareholders Lands, area circa 90 acres, in Mescal Gulch, about 2 miles south of Jerome, leveloped by 2 tunnels and a shaft. Idle since circa 1904, and appar- ribund.

CHIEF COPPER MINING CO. **ARIZONA.**
: 1616-20 Broad St., New York, N. Y. Mine office. Jerome, Co., Ariz. Chas. L. Tompkins, president; Dr. W. E. Delabarre, vice- ; Frank K. Kohler, secretary and treasurer; R. H. Smith, assistant and treasurer. Organized June 29, 1900, under laws of Arizona, with ation $3,000,000, shares $1 par. Annual meeting, first Monday in July. s, 13 claims, area 260 acres, in the Verde district, 7 miles south of including the Carrigan & Gadette group, in Mescal Gulch, adjoining atra, having circa 1,700′ of workings, showing auriferous and argen ulphides. The Paragon group, 3 patented claims, has tunnels of 135′, 1,066′, the 150′ tunnel showing ore. Diamond drilling is said to n unsatisfactory results, and option on lands held by Lloyd C. Haines *xercised. Idle.*

VERDE CONSOLIDATED COPPER CO. ARIZONA.

Office: Prescott, Ariz. Mine office: Jerome, Yavapai Co., Ariz. T. E. Campbell, secretary and treasurer. Capitalization $1,500,000, shares $1 par. Lands, 6 claims, 2 miles south of Jerome. Idle several years.

VERDE GRANDE COPPER CO. ARIZONA.

Office: 252 Grant Bldg., Kansas City, Mo. Mine office: Jerome, Yavapai Co., Ariz. Hon. I. H. Kinley, president; Wm. A. Forrester, vice-president; M. J. Beirn, Jr., secretary; John McQueeney, treasurer; R. A. Smith, assistant treasurer; J. C. Scott, superintendent; preceding officers, Thos. Taylor, Jos. Larsen and R. B. Kirwin, directors. Also has an advisory board, of Jerome mining and business men. Organized September, 1906, under laws of Arizona, with capitalization $8,000,000, shares $1 par.

Lands, 10 claims, area 120 acres, partly patented, about one mile south and west of the United Verde, on the southern slope of Smelter Hill, the United Verde being on the opposite slope, lands being located on a precipitous hill, with poor roads. Development is by 3 short tunnels and a 720′ two-compartment main shaft on the Little Daisy claim, planned to be sunk 1,000′, sunk in slate and schist showing scattering copper sulphides carrying good gold and silver values, ore occurring mainly in schist. Management believes that lands carry the extension of the United Verde ore body. Equipment includes a 60-h.p. hoist and Rand air-compressor, with bunk-house, eating-house and smithy. Company plans a smelter, but should open a mine first. Work has been pushed vigorously.

VERDE GRANDE COPPER CO. MEXICO.

Office: 308 North 6th St., St. Louis, Mo. Operating office: Apartado 98, Hermosillo, Sonora, Mex. Mine office: Ures, Sonora, Mex. J. L. Simmerman, president; Wm. A. James, first vice-president; G. P. Hammer, second vice-president; Thos. Tyson, secretary; R. D. Wood, treasurer; Jairus D. Fresh, general manager; Jas. Penman, superintendent. Organized 1901, under laws of Arizona, with capitalization $2,500,000, shares $5 par.

Lands, 500 acres, in the Ures district, circa 40 miles northwest of Hermosillo, partly timbered with ironwood, cottonwood and mesquite. Main tract of 460 acres includes La Verde Grande, La Cobriza and San Luis groups, claimed to show veins of 10′ to 100′ width, with widest vein lowest in grade. The Verde Grande group has contact deposits in limestone, near igneous intrusives, giving ores assaying 6% copper, 6 oz. silver and $1 gold per ton. La Verde and La Cobriza groups have a contact vein, between granite and quartzite, claimed to be of 30′ to 60′ width, and traceable 7,000′, carrying argentiferous and auriferous ore, assaying 5.5 to 16% copper, with gangue of talcose limestone, said to be interstratified with granite and quartz. Property as a whole has 6 shafts and tunnels, with nearly one mile of workings, claimed by management to show 200,000 tons of ore.

The smelter, 1½ miles from the prinicpal workings, completed 1904, has a 100-ton Allis-Chalmers water-jacket blast-furnace, but company claimed that coke was too expensive and installed a 30-ton Medbury furnace, burning charcoal, made in 3 kilns, from ironwood and mesquite, claimed to be made for 16 pesos per ton. The management reported, Apr. 24, 1906, that "on account of the exceeding hardness of the charcoal, and in order to reduce the speed necessary of the pulverizer, they would add additional machinery which would considerably reduce the power at present required to run the machinery, and thereby lessen the expense of refining the ore." Any managment that finds it difficult to pulverize charcoal should be set to pounding sand, as the next easiest job. At last accounts, June, 1908, the management explained to shareholders, who seemed a trifle disappointed, at the lack of long-promised dividends, that the proposition, as developed, was truly magnificent, but that, owing

prices of copper, it was necessary to tap richer veins, and it was found ıry to develop sulphide ores, the management explaining that sulphur is and sulphide ores the least refractory in reduction.

om December, 1907, to June, 1908, production was 51,181 lbs. black , of 95 to 96% tenor, 4,021 oz. silver, and 16 oz. gold, sold for 12,495

leaching plant was being installed, 1904, but nothing has been heard recently, and presumably it was a failure, like everything else tried by mpany. At last accounts the company was considerably in debt, to l large shareholders, who had advanced funds to keep the property going. lvertising of this company has been utterly untruthful, though the present gement apparently is not the one that promoted the corporation, hence not be held responsible for its bad start, but the methods of develop- and operation employed have been vacillating and inefficient from the ning, and the company's metallurgical efforts are ridiculous.

DE KING COPPER CO. **ARIZONA.**

Dead. Formerly at Jerome, Yavapai Co., Ariz. Fully described Vol. VI.

assay up to 25% in copper tenor. Management claims to h
considerable body of 20% ore, carrying copper, gold and silv
statement is not credited. Wm. A. Farish is said to have s
1906, that the mine could feed a 100-ton smelter with ore of
of 15% tenor, which also is doubted.

The property was bought of the defunct Black Peak C
at sheriff's sale. The only work of importance is by 2 tunne
sional ore chutes up to 10′ in width, and 50′ to 100′ long. Th
are shallow, and confined to quartzite. There is a 500′ tunn
claim, said to give ore returning average assays of 20% copp
and silver per ton. The property was said, March 11, 1908,
workings. The property is 12 miles from Engle, to which a
been built, supplies having been packed in previously.

The company is said to have ordered, November, 1906
pressor, 3 rock-drills and a 32-h. p. gasoline engine. Buildin
eral store, and the company was said, 1907, to be building a fi
and to be making wax models of the mountains.

The company was said to plan a $250,000 smelter, whi
height of folly, until ore is developed. A small amount of o
claim was shipped, by burro, some years ago, by former own
ent company shipped a carload of ore, 1907, to El Paso smelt
copper.

The company claims to be free from debt, with lan
claimed to have $75,000 in the treasury, which is considered
said to have started a national bank at Engle. In October, 1
was selling stock at 75 cents per share, with guaranty t

empt at Lake Superior copper mining, in historic times, was
now Victoria property, in the winter of 1770-1771. The next
in 1849, when the property was opened, under the name of
of prehistoric pits containing masses of native copper, one
s of a ton. Name was changed, 1850, to Forest, and the prop-
ized, 1858, as Victoria Mining Co. Under these titles the
6 tons 1,279 lbs. fine copper, at a loss of about \$180,000. The
as burned by a forest fire, and the second was swept away by
perty was operated regularly, on a small scale, 1849-1855, and
odically. The mine was unwatered in 1881, but remained idle
egun, March 1, 1899, by present company.

located on a high and steep hill, notwithstanding which the
red with heavy sand and clay drift. The Forest amygdaloidal
e mine is opened, is 5′ to 30′ wide, with an average width of
regular in width, rolling in dip and bunchy in contents, with
66° E., and average dip of 61° to the northwest, the
out 1½ miles of outcrop on Victoria lands. The Forest bed
of the cupriferous amygdaloids of the Evergreen belt, opened
by the Mass and Adventure, but which one of the series is

had 4 shafts, numbered from east to west, opened erratically,
levels at various intervals, lifts being opened at distances of
spirit moved. Old No. 2 shaft, chosen for new operations,
2-compartment size. The formation is much disturbed near
the lode is irregular in dip, with widening noted at depth, and
ar walls. Some good stoping ground is shown from the 7th
until near the bottom, where the bed widens to about 80′,
casional bunches of copper. The Forest amygdaloidal bed is
fairly regular in copper contents, showing a little heavy cop-
values mainly in medium grade stamp-rock. All levels down
connected by winzes, giving ventilation and safety. The
ell and the mine is without timber, except in the shafts.
ons of stamp-rock have been developed. The copper chu'

rakes to the southwest, and the best ground, below the 15th level, has been found in the southwestern drifts. The mine operates 18 power drills.

In addition to productive openings, on the Forest lode, the mine has about 3,000′ of crosscuts, showing sundry cupriferous beds, but none of promise equal to the Forest. The footwall crosscuts show an amygdaloid underlying the Forest at an average depth of only 6′, this bed being well mineralized for 4′ to 5′ along the footwall, producing small masses up to 50 lbs. weight, the copper occurring mainly on the foot, with considerable epidote on the hanging-wall. Underlying this epidotal bed, at a distance of circa 60′, is a 6′ amygdaloid, showing much epidote and allied minerals, and a little stamp-rock. An amygdaloid called the Glenn, opened 1900, gave a fair showing of copper at the bottom of a shallow shaft. Diamond-drill borings north of the mine have shown nothing of special promise. The mine has crosscut tunnels of 780′, 150′ and 419′, and some work was done, 1908, in a tunnel on the side of a bluff near the river, where a lode carrying some copper was cut.

No. 1 shaft, which is 240′ east of No. 2, is an old opening, remaining from a previous management, and is 188′ deep, and idle.

No. 3 shaft, 1,190′ west of No. 2, also is an old shaft, of 350′ depth, and is idle.

No. 4 shaft, also an old opening, is only 180′ in depth, and also is idle.

No. 2 shaft, 8x12′ inside measurements, with 2 compartments, is 2,089′ deep, bottomed at the 22d level, with levels opened at 100′ intervals below the 4th. The mine has 29,563′ of workings, estimated to show 400,000 tons of stamp-rock, with 300,000 tons blocked out for stoping. The east drift, on the 22d or bottom level, showed some good ground, but the west drift was in poor ground continuously, during 1908. A crosscut, of circa 1,500′ length, sent south on the 19th level, has shown one amygdaloidal bed of some promise.

No. 2 shaft has a frame shaft-rockhouse, 34x40′, with a 16x36′ wing, and 90′ high. The power-house is 36x40′, with a 24x28′ wing, of wood on stone foundations, with steel roof. There is a 20x48″ Webster, Camp & Lane duplex-cylinder hoist, with single conical drum of 8′ minimum and 12′ maximum diameter and 11′ face, raising 4-ton skips, set on concrete foundation, bedded on rock. The old 12x28″ Nordberg hoist, with drum of 5′ diameter and 6′ 9″ face, rated at only 1,200′ capacity, was used for sinking No. 2 shaft to its full depth of 2,089′. Equipment includes two 12-drill Rand air-compressors and 20 rock-drills.

An exploratory shaft, started October, 1907, circa 2,600′ east of the present shaft, with 140′ deep, March, 1908, and a little drifting was done, meeting with small encouragement.

Buildings include a 30x60′ machine-shop, of wood, with iron roof, a 28x34′ carpenter-shop, 24x50′ smithy, 24x72′ warehouse, a 2-story frame boarding-house and office, 27x64′, with a 10x37′ wing, a 19x41′ frame schoolhouse, stone changing-house, general store and 58 dwellings, with a total of 80 buildings owned by the company. A 10x16x28′ storage cistern holds water from the mine for feeding boilers, and water for domestic use and fire protection is pumped, by a steel windmill, from a well having a storage tank and 750′ of water mains.

The company has a sawmill with a 56″ circular saw, furnishing timber and lumber for requirements of the property, which, 1907, sawed 262,956′ of lumber.

A large water-power has been developed from Glenn Falls, on the west branch of the Ontonagon river, about one mile from the mine, at a cost of $200,000. This is the best natural water-power of the Lake Superior copper district, the stream dropping nearly 150′ in 1½ miles, by a series of small falls, between which are numerous rapids, with sandstone bottoms. Power is developed by means of a dam, canal and shaft. The dam, built up from excava-

ock, is 320′ between abutments, and has 32 eighteen-inch "I" part, sunk vertically 5′ to 10′ in bedrock, with cement filling. an extreme height of 24′, with width of 14′ at the bottom and 8′ d has a 320′ main section, with wings of 100′ and 160′, giving a f 580′, built with an arch up-stream, giving great strength. The on the water side, with 5x10′ plates of ⅜″ steel, bolted to the ms through the concrete. The center of the dam has an apron a floating boom to guide logs, as the stream is used for logging dam being substantially built, so that it cannot be torn out by e outlet is a 44″ steel pipe, leading from the bottom of the dam anal. In order to insure an equable water supply a storage dam at the head of the river, near Lake Gogebic.

diverting water from the dam, nearly 6,000′ in length, runs 0′ through sandstone and 4,000′ through alluvium. On the bank s a pipe-line, providing compressed air for the removal of sand this being a novel form of dredging. The canal is 25′ wide at ide at the bottom and 16′ deep. The outlet of the canal has o sets, separated by a heavy concrete abutment. The gateways)″ "I" beams, set vertically 6′ apart, with 6 gates of heavy oak ted vertically by rack and pinion, actuated by water power. The rom the foredam, to 3 vertical inlet shafts, 19′ from center 5′ in diameter and 334′ 6″ deep, lined with concrete. The shafts ough solid sandstone, by means of 5″ holes bored to the required hich the 5″ holes were enlarged to 5′ holes, by reaming with a ving 4 cutting arms, each 30″ in length, actuated by a No. 9

rly was drawn into the shafts through 5,000 tubes of ⅜″ diam- e now is a single opening at the top of each shaft, air being ard, as bubbles, by the falling water. At the bottom of the a tunnel of 360′ length, leading to a large fan-shaped air-com- ber, 26′ in height, 18′ wide at the entrace of the tunnel and 60′ xtreme end, lined with boiler-plate. The imprisoned air, pulled fts by suction and swept along the tunnel in bubbles by the s, is released, in the compression chamber, and the constant resh air-bubbles, in myriads of millions, causes compression, the from escaping backward by the superior pressure of the falling lant was designed for an air-pressure of 123 lbs. per square inch, s pressure is exceeded, the air forces the water in the chamber ath of a 12″ vent-pipe, leading to surface. When, in operation ceeds 123 lbs. per inch, which it does speedily when the power is air rushes upward through three hundred feet of pipe with ree, carrying along with it some of the water which pulled it g a fine spray hundreds of feet in the air, with terrific roar. s to the contrary, the air-chamber is not leaking. The outflow would be called a tail-race if on surface, is sunk at an angle of to the lower river.

ulic-pneumatic power plant was completed May, 1906, and begun 00 to 5,000 h. p. under a full head of water, and has shown an 2%, under test. This plant is the most powerful single-unit air- existence, and was the fifth installation of the sort in the world. to operate one, two or three of the inlet shafts, if so desired, with variation of the energy developed. There has been some trouble of water, this being a difficulty that is faced by many power lent upon water. The simplicity and economy of the Victoria ie in its being absolutely automatic. No machinery is required,

the power being drawn off by a pipe, from pound of waste nor a gallon of oil is requi

The mine and mill are connected by a upper having a grade of 6% and the lower a at the top of the incline serves as a starte A retarding engine might be made to deve it not that the Victoria already has all th tically free, except for the interest on the line enters the mill over a 700' trestle.

The mill, near the hydraulic works, is crete foundation, equipped with an Allis-star 1908, increasing its capacity to circa 500 to machinery are of concrete beds, capping anchored by eye-bolts cemented into the r washing machinery and shafting, were brou mine. Washing machinery includes 28 Hart table taking middlings from the Wilfleys, mill was started June, 1906, and is said to 0.1%. Mineral is smelted by the Calumet &

Production has been as follows: 546,33 tons of rock hoisted and 95,035 tons of ro fine copper in 1907, giving an average produ copper per ton, secured at a cost of 15.8 c stamping circa 425 tons of rock daily, ma copper monthly, with an average return o mine, as a whole, is not looking especially cutting to the Eastern Sandstone, and, havi may be considered to have fair prospects promise than the present workings. The p the possession of the cheapest power imagina management.

and mine: Higuera, La Serena, Coquimbo, Chile. Property is 5 l a smelter. The Champeta mine, opened 1855, the principal prop- he deepest in the district, showing a considerable number of parallel h a main vein of 5′ to 7′ width dipping at 60° to 80°. The oxidized about 70 meters depth, is followed by 30 meters of rich secondary succeeded by chalcopyrite of 10 to 15% reported average copper esumably after selection. The Panchita mine, opened 1850, is circa rs in depth. The San Ramón mine, opened 1851, is 270 meters in ving a vein of 4′ average and 15′ extreme width, carrying low-grade Cortada mine, opened to depth of 150 meters and length of 200 rizontally, shows a vein of 3′ to 4′ average width, ores of La Cortada Ramón averaging about 5% copper tenor only, rendering them unavail- resent, though of future promise. La Solitaria mine, opened 1893, is 0 meters in depth with slight development.

smelter, at Higuera, 18 kilometers from Totoralillo, the nearest rail- t, has 3 reverberatory furnaces, producing ejes of about 50% average nor. The Champeta mine in 1903 produced 11,950 metric tons of ore, 11% average copper tenor, and production of all properties, 1903, was lbs. fine copper.

GO VICUÑA. **CHILE.**

e and works: Huasco, Freirina, Atacama, Chile. Property is two El Astillero works, at Huasco, include a smelter and mill, latter a rock crusher and stamps. The smelter has 6 three-deck calcining and 3 reverberatory furnaces, burning imported coke, employing 93 average wages of 1.5 pesos daily, and, in 1903, smelted 3,085 metric ore averaging 4.85% copper, making bars of 96% copper tenor, with eraging 0.8% copper. Production, 1903, of this smelter, was 1,318,364 s fine copper.

jirio smelter, at Morada, 27 kilometers from Sarco, the nearest railroad has 2 reverberatory furnaces, producing ejes of about 50% average enor, with slags running 0.5% copper, employing 50 men, at average f 1.75 pesos daily. Carriage charges to railway are 6 pesos per metric l fuel is imported coke, costing 27 pesos per ton. Production, 1903, 29 tons of 15% ore, was 359,070 kilograms fine copper. Production, both works, was 3,698,291 lbs. fine copper.

i VIDELA. **CHILE.**

e office: Cerillos, Coquimbo, Chile. Property is the Hermanos mine, *pt for leaching mine waters, from* which 162 metric tons of precipitate

of 65% copper tenor were secured, 1903, and sold to smelter at Guayacan, equal to 233,044 lbs. fine copper.

VIELLA COPPER CO., LTD. S

Dead. Compulsorily wound up, February, 1903. Formerly at Huesca, Spain.

COMPAÑIA MINERA VIESCA y COAHUILA. MI

Mine office: San Juan de Guadalupe, Durango, Mex. Property is La Lune and La Estrella mines, carrying argentiferous lead and copp phides. Has steam power, employing circa 150 men, at last accounts.

VIGSNES KOBBERVAERKS AKTIEBOLAG. NO

Office: Talbodgaden 8B, Christiania, Norway. Mine office: Trondhjem, Norway. Property includes the Vigsnes and Stavanger, known as the Meraker mines, old properties opened to great depth, shaft being 2,410'. Properties were among the principal copper produ Norway, and were worked, 1865 to 1894, by a Franco-Belgian compan ducing 900,000 tons of cupriferous pyrites, production, 1895, having be long tons fine copper. Ore averages about 2% copper and 45% sulphu small quantities of ore of higher copper tenor. Has a hydro-electric plant, installed 1907, and about 10 miles of aërial trams, connecting th with a concentrator, built 1907. Company plans a production of circa tons of cupriferous pyrites yearly, beginning 1909.

VIKING COPPER MINING CO. WASHIN

Office: care of Frank P. Milcark, Spokane, Wash. Mine office: Ferry Co., Wash. Lands, 3 claims, 3 miles from Orient, near the N mine, in the Pierre Lake district. Mine has a vein of 125' claimed carrying low and medium grade auriferous copper ore, with a 50' sh a 400' tunnel, planned to cut the vein at depth of 930'.

VILLAGE BELLE GOLD & COPPER CO. COLO

Office and mine: Walden, Larimer, Co., Colo. David Hendricksor dent and general manager; M. C. Ward, vice-president. T. John Payn tary and treasurer; preceding officers, George Post and Thomas H. S directors. Organized July 16, 1902, under laws of Wyoming, with ca tion $100,000, shares $1 par. Lands, 4 claims, unpatented, reported by as 150x300' in size, which would give an area of 4 acres, said to carr vein having ore averaging 15% copper and 7 oz. silver per ton, open 100' shaft and 150' drift. Has a 20-h. p. steam hoist and a 25x64' mill

COMPAÑIA MINERA DE VIÑA DEL MAR.

Office: Santiago de Chile. Mine office: Freirina, Atacama, Chile. ized Feb. 8, 1905, under laws of Chile, with capitalization 60,000 peso 200 pesos par.

ized 1899, under laws of South Australia, as a merger of the Moonta
roo companies, with capitalization £400,000, shares £2 par; issued,
To end of 1907 paid 30 dividends, aggregating £444,000, dividends
000 in 1906 and £140,000 in 1907. The Wallaroo company, previous
ger, produced copper to the value of £2,229,096, paying dividends of
therefrom, and the Moonta company, before the merger, produced
the value of £5,396,146, paying dividends of £1,168,000 therefrom,
property a total dividend record, to Dec. 31, 1907, of £2,042,254.
its, 1907, were £49,835 6s. 4d., company ending the year with balance
of £112,081 5s. 4d. Liberal allowances are made yearly for depreciа-
nting, 1906, to £15,142 17s. 7d., with total allowance for depreciation,
that year, of £142,873 18s. 9d.
s are extensive, including the Wallaroo and Moonta groups, about
apart, with various smaller properties, and site of the reduction
Port Wallaroo, all in the Yorke Peninsula, on Spencer Gulf. The
mine was discovered 1860, and the Moonta 1861, and both mines
n operated, practically continuously, since 1863.
mines use waste rock for filling, and, 1907, sent underground 40,000
of attle, for filling depleted stopes. The properties suffer from air-
milar to those of the Lake Superior copper mines, though only slight
cks are experienced. Cornish pumps have been replaced by Bellis
m electric pumps. During 1907 the mines made 5,675′ of new open-
the management very wisely took advantage of two years of high
r copper to make extensive underground development, and to add
o surface equipment. The mines having been opened nearly half a
ago, when mining practice was crude, there are entirely too many
or economical ore extraction, and the policy of the present manage-
been, and continues to be, for a reduction of the number of working
nd greatly increased hoisting capacity for such shafts as are retained
ission.
Wallaroo group, 6 miles east of Port Wallaroo, includes the Kurilla,
ining property, the entire tract having an area of circa 2,000 acres.
perty *shows schists and slates*, mainly metamorphosed mica-schist,

being found in good shape, and the mine produced some fluxing ore, losed down, April, 1908, and allowed to fill again.
lorth Yelta mine is opened by a main shaft, deepened 120′ in 1907, was stopped, November, 1907, and the mine allowed to fill.
ment formerly included a great number of small, isolated machinery more or less antiquated in design, and uneconomical in operation. years the efforts of the management have been bent toward the ion of separate plants, wherever possible, and their replacement by l more modern installations. The new central power plant at the enlarged 1907, has effected a very great saving in operating costs. ible was had, 1907-1908, owing to the poor supply of Beetaloo water. ings include a large number of shops and engine-houses, with large nodious changing-houses, the principal shafts having shower-baths rs.
portation is furnished by the government railway, which connects Wallaroo and Moonta mines with the reduction plant at Port

are concentrators at both groups of mines, and the process followed essentially the same, the exceptional weight and flaky nature of the ndering concentration exceedingly difficult, but the various metal- roblems have been met and conquered by persistence and technical the shafts ore is dumped on grizzlies, passing to bins for various nce drawn off to railway trucks, and carried to the concentrators. ills, after wet crushing, material goes to revolving trommels, from ersize goes to a traveling belt, whence ore is picked by boys, and rough crushers, with water. Ores passing a ⅝″ mesh are treated lly designed Hancock jigs, and raggings passing ⅞″ and 1¼″ meshes ed separately, on other specially designed Hancock jigs, while ma- igher than 1¼″ is hand-picked from the traveling belt. The well- ancock jig, now in use throughout the world, was designed by H. R. the former general manager, for the use of these mines. The largest he Wallaroo and Moonta mines treat 25 tons of material hourly. to 15% of the material handled is slimed, slimes going to spitzkasten, ification and distribution to round tables and vanners, which turn oduct of circa 12% copper tenor.
Devon mill, at the Wallaroo mine, was enlarged, 1907, by the addi- Ball mills and 6 Card tables, and, 1908, was given one new trans- cable and 2 additional 100-h. p. motors, with a belt-conveyor for tailings from the Wilfley and Card tables.
se material and tailings from the wash are piled in heaps, weathered ed. Heaps range 20′ to 60′ in height, the tops of the piles of coarser being laid out in terraces. Ore-heaps are systematically sprinkled, h-liquor, carrying 60 to 120 grains of copper per gallon, runs to vats. h-heaps cover about 30 acres, and contain upwards of 1,000,000 tons gs, a considerable length of time being required for complete oxidation ough leaching.
wastes and slimes go to a specially designed leaching plant, and are hrough a series of vats containing leach-liquor, 12 to 20 lbs. of acid being added to the leach-liquor for each ton of slimes treated. es in the vats are agitated by revolving arms, the pulp, after agita- ssing to settling dams and clarifying reservoirs. The leach-liquor is ff, in earthen pipes, to the main precipitating works, where it joins or from the various tailings heaps, and copper is precipitated there- scrap-iron. The material from the settling dams is weathered and second, and *occasionally a third*, leaching. The average production

of precipitate from these plants is 15 to 2
precipitate, the leaching plant makes cons

: care of A. Sandoval, treasurer, Nogales, Sonora, Mex. Mine office:
, Sonora, Mex. A. L. Lewis, president; Percy Sharpe, secretary
al manager. Organized 1902, under laws of Arizona, with capitaliza-
0,000, shares $5 par. Lands, 4 pertenencias, area 10 acres, showing
ns and lenses in limestone, carrying a little native copper, and oxide
nate ores, having estimated values of 18% copper, 12 oz. silver and
r ton, slightly developed by shafts and tunnels. Idle several years.

GTON TUNNEL & COPPER CO. **WASHINGTON.**

Former office was at Bridgeport, Conn. Lands were 36 claims, on
Hill. Company planned, 1907, an 8,000' double-track tunnel to test
operty and cut 8 known ledges. Formerly at Conconully, Okanogan
.

COPPER CO. **MONTANA.**

: 42 Broadway, New York, N. Y. Mine office: Butte, Silver Bow
. Employs circa 300 men. John D. Ryan, managing director; Wm.
superintendent. Capitalization $20,000,000, shares $10 par. Is con-
arough ownership of entire stock issue, by Amalgamated Copper Co.
holds title to the Washoe Reduction Works, which are leased to the
Copper Mining Co., and the Washoe Copper Co., at last accounts,
530,000 to the Amalgamated Copper Co., this being the amount bor-
construct the Washoe works.

ls, 37 acres, including the Moonlight, Clear Grit, Cambers and Poulin
hich were operating, 1907, also the Washoe, Pacific, Oden and Gold
ns, mainly fractional. Company had some litigation, 1907, with East
xtension Copper Mining Co., claiming latter had trespassed on ore
f the Washoe. Miscellaneous lands include 1,900 acres of coal lands
Creek, in the vicinity of Red Lodge, Carbon Co., Mont. The com-
o holds a controlling interest in the Cokedale Coal Co., owning coal
d 100 coke-ovens.

Moonlight mine, which is the principal producer, has ore averaging
oz. silver for each unit of copper. The Moonlight has a 1,500' three-
nent shaft, connected underground with the Blue Jay, Neversweat,
la and Pacific mines, and is timbered with 10x10" square and round
in square sets. Equipment includes a 20x48" Dickson hoist, raising
e-deck cages with a 6" flat cable, and 2 Ingersoll Sergeant air-com-
, of 50 drills aggregate capacity.

Cambers mine has a 225' two-compartment shaft, connected with the
and Henry George mines, equipped with a 10x14" hoist raising single-
ges with 1" round cable.

Clear Grit mine has a 600' two-compartment shaft, and is opened to
f 1,000' by a 400' winze, being connected underground with the West
and Mountain Consolidated mines. Hoisting is by bucket, develop-
aving been hampered, until 1906, by litigation with the Heinze interests.
e Poulin mine produces a limited quantity of ore averaging circa 2%
and 5 oz. silver per ton.

e mill, at Butte, known as the Taylor & Brunton sampling works, was
in 1904.

r year ending June, 1907, production was 121,608 tons of ore, averaging
eturns of $10.92 per ton, costing $4 per ton for extraction and $2.32 per
reduction, with net earnings of $266,973, and in the preceding year
itures were $175,721 in excess of receipts. For year ending June 1,
roduction was 115,620 *tons of ore*, yielding gross values of $1,052,956,

ELL COPPER MINES, LTD. **AUSTRALIA.**

: 62 London Wall, London, E. C., Eng. Mine office: Whim Creek,
barra Goldfield, Western Australia. Edgar Anderson, chairman and
director; preceding officer, S. Caldwell, Sidney Fawns, J. Conchie and
erlock, directors; Henry Bacon, secretary; Herbert R. Sleeman, gen-
ager; Richard Piper, mine foreman; I. Flegeltaub, metallurgist.
July 4, 1906, under laws of Great Britain, with capitalization
shares £1 par, as a reconstruction of an old company of same name.
1, 1908, had expended circa £60,000 on development and equipment.
s, 210 acres, partly freehold, known as the Whim Creek mine, 12 miles
Balla Balla, also water rights on Balla Balla Creek, sundry town lots
ed jetty at Balla Balla, and a 30-acre smelter-site at Counguina Pool, a
r lake near Balla Balla. Mining property includes 75 acres leasehold,
iron ore and limestone for fluxing. Country rocks are shales and
tter partly chloritic but mainly hornblendic, carrying mainly irregu-
r impregnations of chalcocite in silicious kaolinized strata having an
west strike and dip of only 25°, lode being very flat and conformable
g of the enclosing slates, which have been considerably crumpled.
cuprite, malachite, azurite and chalcocite, mainly the latter. Ore
3′ to 20′ in width, with an average width of 6′, and the ore zone is
circa 3,000′.

under former ownership, was poorly developed. Property has 5
unnels, of 50′, 80′, 120′, 300′ and 300′, and a 200′ tunnel in ore, with 5
afts of 60′, 69′, 74′, 77′ and 80′. About 2,000′ of openings were made
iving estimated reserves of 30,000 tons of 11% copper ore blocked out
g, with about 40,000 tons additional in sight, and 200,000 tons infer-
ore reaching the water-level. Average samples from all working
out 15 in number, gave assays of 12.18% copper, balance of ore
from assorting being estimated to carry 8% copper. Property was
07, by diamond drill. Water is either alkaline or sulphurous, each
e to the boilers, but, with careful mixing, gives feed-water causing
osion.

oncentrator, of 50 tons daily capacity, has a Gates crusher, mill being
crushing and sorting plant. Company has built a 14-mile railway,
mine to Port Balla Balla, at a cost of circa £15,000, including two
es and necessary rolling stock.

ction, 1907, was 1,808 long tons of ore averaging 22.5% copper, equal
lbs. fine copper, and before drop in price of copper, company nearly
nses from production. Employs circa 75 men. Is considered a prop-
nsiderable promise, with a good management.

E MOUNTAIN GOLD & COPPER MINING CO. **CALIFORNIA.**

: 803-405 South Hill St., Los Angeles, Cal. Mine office: Needles,
rdino Co., Cal. Jas. L. Brice, superintendent. Lands, 21 claims, on
Mountain, south of Needles, 7 miles from a railroad, showing

veins, up to circa 75′ in width, carrying promising copper and gold outcrops. Has a 175′ vertical shaft, cutting an 18′ vein carrying about 5% copper and $20 gold per ton. Has gasoline power and hoist, with an air-compressor and buildings. Shall shipments, early 1908, to Needles smelter, returned 10.8% copper, 2 oz. silver and $20 gold per ton.

WHITE CANYON COPPER CO. UTAH.

Office: 624 Peyton Blk., Spokane, Wash. Capt. A. E. Wayland, secretary. Lands are said to be 13 claims, in San Juan County, Utah, on which company planned installing a leaching plant during 1908.

WHITE CHIEF MINING & MILLING CO. MEXICO.

Letter returned unclaimed from former office, 217 Sansom St., San Francisco, Cal. Mine office: Chinipas, Arteaga, Chihuahua, Mex. M. A. Newman, superintendent. Property is the San Miguel del Castillo mine, carrying auriferous copper ore. Has steam power and a 40-ton mill.

WHITE EAGLE COPPER MINING CO. TEXAS.

Dead. Lands sold for debt. Formerly at Burnet, Burnet Co., Texas.

WHITE GIANT MINING & SMELTING CO. ARIZONA.

Office and mine: care of G. M. Willard, manager, Jerome, Yavapai Co., Ariz. Lands, 5 claims, area 100 acres, known as the Allan Hoover group, in the Squaw Peak district, circa 25 miles south of Jerome, having several short tunnels and shallow shafts, deepest 70′, said to show galena assaying up to 55% lead and $100 gold per ton. Presumably idle.

WHITE HORSE MINING CO. ARIZONA.

Office: 20 Broad St., New York, N. Y. Mine office: Prescott, Yavapai Co., Ariz. H. R. Frost, president; preceding officer, L. D. C. Ferguson. Maj. R. G. Vassar, S. P. Ostrom and M. J. McGibbon, directors. Capitalization $2,000,000, shares $1 par. Bonds, $50,000. Lands, circa 200 acres, at Squaw Creek, and company also is said to have a group of claims, now idle, in the Walker district. Development is by 2 shafts and a tunnel. Equipment includes a 10-stamp mill. J. F. Wisner was fiscal agent.

WHITE KNOB COPPER CO., LTD. IDAHO.

Office: 36 Wall St., New York, N. Y. Mine office: Mackay, Custer Co., Idaho. Wilbur K. Mathews, president; A. M. Poole, secretary and treasurer. Organized originally under laws of West Virginia, as White Knob Mining Co., and reorganized, under present title, Apr. 24, 1900, under laws of New Jersey, and again reorganized, January, 1903, under same charter and title, and yet again reconstructed, 1904, with capitalization $2,600,000, shares $10 par, "once more yet again" reconstructed, or practically succeeded, circa January, 1907, by White Knob Copper & Development Co., Ltd., but apparently the White Knob Copper Co., Ltd., retains corporate existence, though, if so, it is a mere shell, as the mine has been sold to the Empire Copper Co., and the remaining assets apparently are held by White Knob Copper & Development Co., Ltd. For further particulars see White Knob Copper & Development Co., Ltd., in this volume, and White Knob Copper Co., Ltd., in Vol. VI., which descriptions explain, in detail, the miserable flounderings of this company and its predecessors.

WHITE KNOB COPPER & DEVELOPMENT CO., LTD. IDAHO.

Office: 36 Wall St., New York, N. Y. Mine office: Mackay, Custer Co., Idaho. Wilbur K. Mathews, president; Arthur Kennedy, vice-president;

Dupee, secretary and treasurer; preceding officers, Chas. H. Dupee and rdsell, directors.

anized Apr. 6, 1905, under laws of Maine, with capitalization 00, shares $10 par, fully issued, in $2,000,000 cumulative 7% preferred nd $4,000,000 common stock, preferred stock being convertible into at option of shareholders. Company was organized as successor of Knob Cooper Co., Ltd., assets of which are said to have been sold, under ure, and bought in by holders of securities. Present company is said taken over the properties and assets of the White Knob Copper Co., New Jersey, exchanging share for share, plus a $3 assessment. Appa- he White Knob Copper Co., Ltd., of New Jersey, retains a corporate e.

give even a remote understanding of this crazy-quilt patchwork corpo- it is necessary to outline the history of the various preceding White orporations, all under the same general management—if such a respect- rd as management can be misapplied to such gross mismanagement as poration and its predecessors have suffered, from birth.

is doubtful if in the history of mining there is a finer example of utter tency than is afforded by the spectral succession of White Knob corpo- organized in various states, and at frequent intervals, all born with onstitutions, but all, unfortunately, retaining sufficient vitality to pass o their progeny the scrofulous taint with which the first was endowed. e White Knob Mining Co., which seems to have been the ancestor of the decrepit family of White Knobs, was organized, circa 1899, under the f West Virginia, with capitalization $5,000,000, and was reorganized, , 1900, under laws of New Jersey, as White Knob Copper Co., Ltd., with ization $12,500,000, which corporation was reorganized, January, 1903, he same title and charter, with capitalization reduced to $2,000,000, and ain reconstructed, 1904, with capitalization $2,600,000, shares $10 par, parently was succeeded, or at least was rendered a mere shell, Apr. , by the White Knob Copper & Development Co., Ltd., which is the corporation, though how long it may be for this world the rashest t scarce would care to guess, in view of the family history.

e various White Knob corporations expended circa $3,000,000, on the ty in Idaho, to most excellent disadvantage, the policies of the White being consistent only in their utter inconsistency. Mining officials were d repeatedly; reorganization followed reorganization; stock was increased ecreased, and again increased and decreased; bonds were authorized, and redeemed; the smelter was blown in, blown out and again blown in, t, repeatedly; local officials were changed so frequently that it scarcely be an exaggeration to say that nearly every position had three incum- —one going, one on the job, and one coming. Such a witches' dance ancial and technical lunacy would be difficult to describe adequately. t one time, in 1905, the smelter at Mackay was partially dismantled, with tention of removing it to Shasta County, California, where the company ed it had bought control of the Balaklala, but control of the Balaklala old twice, and the White Knob holdings of 50,000 shares of Balaklala said to have been sold, February, 1906, at an average price of about $9 hare. Circa 1906 the company gave a 5-year lease, on its mine and r, without royalty, to the MacBeth Lease, Inc., the company being in a bad way financially, and this lease was sold, circa 1907, to the Empire r Co., which also bought the mine and smelter, the White Knob sup- y receiving, in return for its own property, a 25% share interest in the e Copper Co., a proceeding questionable on its face, but actually to the ny's benefit, as the White Knob management is far better off owning a

25% interest in any mine under control of competent men, than to own the mine and smelter entirely, if under its own desperately inefficient management.

The company is supposed to control the Mackay Development Co., Ltd., which furnishes water for the Empire smelter and the town of Mackay. Company also is said to control, through stock ownership, the Argonaut Mining Co., of Jackson, Amador Co., California, having a gold mine with a 40-stamp mill. Apparently the company no longer has a share interest in the Balaklala.

Apparently the present corporation received a $3 assessment from at least a portion of the old shareholders, who shut their eyes and took another chance on the management. It has been said that, when Poole resigned, there was in the treasury circa $450,000 in cash, but the company's annual report, filed Oct. 8, 1907, with the State of New York, claimed that its debts did not exceed $25,000, with assets "of at least $2,000,000," the assets presumably being share interests in other mining corporations, value of which is uncertain.

The management of the company promised information to the minority shareholders, but failed to keep its word, and the minority shareholders, having failed in various attempts to obtain information regarding the company's finances, filed, through Geo. A. Hobe, et al, circa November, 1908, in the Maine supreme court, a bill of equity, asking permission to examine the company's books and records. The company and its management are viewed with utter disgust, and the shareholders with derision.

good millsite, at the mouth of the Misery river, with water availa
stream, and may build a mill in connection with King Philip Co

The main tract carries the outcrop of the Winona amygdaloid
wards of one mile. The mine was discovered, 1864, by a line
pits along the outcrop, and a single shallow shaft was then su
to entire lack of transportation facilities, little was accomplish
erty was let on tribute, 1880, but did not furnish sufficient mass
and was closed, until taken over by the present company, Apr
the old shaft was cut down, retimbered and deepened, and 3 ne
on the Winona lode, an amygdaloidal bed running 12′ to 46′
average width of circa 20′, striking N. 59° E., and having an a
about 50°. The Winona amygdaloid resembles the Baltic lode in
and also bears considerable resemblance to the Knowlton bed
green belt, carrying considerable epidote, calcite and quartz, v
amount of mass and barrel copper, bulk of the metal being fo
copper. Diamond-drill borings have located several other cuprif
the Winona tract, but none carried copper in payable quantities,

The mine is served by a spur from the main line of the
railroad, which passes nearby.

The older workings show mainly mineral of the finer grad
what heavier copper at depth, and the best ground is to the
ground conditions having improved during 1908. During 1907 t
2,232′ of new openings, and the mine ended 1908 with circa 5
ings. Shafts Nos. 3 and 4 are connected on the 3d and 4th lev
the first half of 1909 connections are to be made on several lev
territory showing considerable copper, the showing at the southe
mine being much the best. The mine has electric pumps, and
drills.

No. 1, the discovery shaft, in the NE. ¼ of the NE. ¼ of
52 N., R. 36 W., is 8x18′ inside of timbers, with 3 compartment
deep, with 4 levels opened, showing a little heavy copper and so
in the northern drifts, but was of little promise, and has b
circa 1901.

No. 2 shaft, 900′ northeast of No. 1, sunk at an angle of 72

estimated at 12 to 15 lbs. copper per ton. Work was discontinued, the shaft having sufficient opening for the present.

pment at No. 2 shaft includes a steel shaft-rockhouse, 40x70′ on the 06′ high, remodeled and improved, 1908, equipped with two 24x36″ Lake Farrell crushers and room for a third, pneumatic steel gates, e trolley cranes, and grizzlies having differential slopes, lower por- g quite flat, grizzlies feeding to crushers, with only one man required crusher.

4 shaft, circa 1,700′ southwest of No. 3 and about 400′ from the boundary, started June, 1906, is sunk on ground secured from the lip in rectifying lines. The shaft is sunk in the footwall, and was opened taneously sinking and raising. This shaft was showing good ground, nd of 1908. Equipment includes a steel shaft-rockhouse with two 'ortage Lake Farrell crushers, similar to those at No. 3.

No. 3 shaft, 900′ north of No. 2 and about 750′ deep, shows little f promise, and has been idle for some years. Old No. 4 shaft, the most, about 1,350′ northeast of No. 1, found nothing of importance has been idle for some years. Old No. 5 shaft, started on a wide idal bed located by diamond-drill, did not develop good ground, and ontinued at slight depth, some years ago.

central power plant, between shafts 3 and 4, has an Allis-Chalmers t 3-phase 60-cycle cross-compound generator, providing an alternating with a 535-h. p. induction motor direct-connected to two 250-h. p. rrent generators, speeded for 600 revolutions per minute, delivering rrent to No. 4 shaft of the Winona and No. 1 shaft of the King ach shaft having a 200-h. p. motor geared to the hoisting drum, each motor having a variable speed of 150 to 1,200 revolutions per minute. aft has an electric hoist good for 1,500′ depth, operating two 3½-ton orking in counterbalance, at a speed of 1,200′ per minute. The motor r set has 2 flywheels, of 20 tons weight each, their momentum caring ations in load, and also providing power for hoisting, for one hour e dynamo is closed down, if necessary. The electric generator set has gs of 11x33″, and 2 bearings of 9x27″, with oil pumped through them ate of 16 gallons per minute, automatically filtered and water-cooled, perfect lubrication. The central power-house also has a 40-drill g air-compressor.

engine-house, located midway between shafts Nos. 1 and 2, is 40x40′, frame on stone foundations, with corrugated iron siding and roof, a steam hoist, good for 1,500′ depth, operating shaft No. 2, and the hoist previously described for shaft No. 3, also an Ingersoll-Sergeant class A 2-stage straight-line air-compressor, and a smaller single-stage sor. Adjoining is the boiler-house, 40x48′, of steel frame on stone ions, with iron siding and roof, housing four 80-h. p. boilers. There is en coal-trestle, with tunnel beneath, leading to the boiler-house.

e mine buildings include a 20x40′ carpenter-shop, combination smithy chine-shop, 22x34′ general store, an office building, 2 boarding-houses arly 100 dwellings for employes, the dwellings being in a townsite by the company. There also is a sawmill, 30x70′, with a 42x66′ wing lers, and a 16x46′ wing containing a shingle-mill, the plant having a apacity of 20,000′ of sawed lumber.

oduction has been as follows: 1,036,944 lbs. fine copper in 1903; 646,025 1904; nothing in 1905; 278,182 lbs. in 1906; 1,285,863 lbs. in 1907; noth- 1908. For 1904 returns averaged 18.95 lbs. fine copper per ton of rock d. Production was resumed, with a leased head, at the Adventure mill, r, 1906, in which year 19,399 tons of rock stamped returned an average

Co., Wyo. L. Cavnah, president; Geo. E. House, vice-presider second vice-president; Wm. H. McAloney, secretary and treas Miller, general manager; preceding officers, Henry F. Power, W. H. Lippincott and G. G. Hodge, directors. Organized un oming, with capitalization $5,000,000, shares $1 par. Manager and company practically reorganized, Dec. 12, 1905.

Lands, 22 claims, area 404 acres, on Silver Creek in the Sulphur Mountains, of the Sunlight district, in the northweste Horn county, about 12 miles east of the Yellowstone Nationa bered, with water power available, showing porphyry and and well mineralized quartzite veins of 10′ to 25′ estimated aver ing auriferous and argentiferous chalcocite, bornite and chal old management to give assays of 15 to 52% copper, 11 to about $1 gold per ton, and said by new management to give 56%, with an average of upwards of 40% copper, and $10 to $ and silver values per ton, presumably from carefully selected tunnels, No. 2 being 254′ in length at last accounts, planned system at depth. Property considered promising by Prof. H. Geologist of Wyoming. Apparently idle except for assessmen

e: care of Benj. Blanchard, general manager, Prescott, Ariz. Mine Parker, Yuma Co., Ariz. Presumably idle.

ERINE & ARIZONA DEVELOPMENT CO. **ARIZONA.**

d. Reorganized, March, 1904, as Wolverine & Arizona Mining Co. y at Bisbee, Cochise Co., Ariz. Very fully described Vol. IV.

ERINE & ARIZONA MINING CO. **ARIZONA.**

e: Laurium, Mich. Mine office: 61 Mason Hill, Bisbee, Cochise Co., John Daniell, president; Paul P. Roehm, vice-president; Edw. Ulseth, vice-president; W. Frank James, treasurer; preceding officers, Chas. eth, Benj. F. Chynoweth, W. H. Brophy, Fred C. Smith and Michael J. ham, directors; Hon. Wm. R. Oates, secretary; W. H. Roberts, Jr., endent.

anized March, 1904, under laws of Arizona, as successor of Wolverine na Development Co., with capitalization $3,000,000, shares $15 par; 97,156 shares, par value $1,457,340, subject to assessment, and 21,792 par value $326,880, of full paid stock. Levied 25-cent assessments March 6, Sept. 17, 1906, June 17, 1907, and Nov. 18, 1907. Annual meeting, Wednesday in November.

e preceding corporation, the Wolverine & Arizona Development Co., and disbursed $223,433.93. Receipts of present company, to Dec. 31, ere $148,522.73, and for 11 months ending Jan. 1, 1907, disbursements 46,289.37. For fiscal year 1908, receipts were $27,131.32, with expendi- f $22,581.31, leaving a cash balance of $4,550.01.

nds, 9 claims, area circa 160 acres, known as the Cairo, Memphis, Ken- Georgia, Louisiana, Chicago, Warren, George and Broken Promise. The claim lies 600' from lands of the Calumet & Arizona, and is about 3,000' e Irish *Mag shaft of that company*, and from the Spray and Holbrook

shafts of the Copper Queen. The Uncle Sam and White Tail Deer claims of the Copper Queen are adjacent to the Wolverine & Arizona, and good ore was taken by leasers from the White Tail Deer claim, about 800′ from the Wolverine shaft. Final payments on lands were made Jan. 30, 1907.

The company conducted extensive exploratory work on the Broken Promise claim, which proved true to its name. The shaft on the Broken Promise claim is 700′ deep, with 3 compartments, each 5′x4′6″, well timbered, cutting limestone showing considerable iron. The shaft proved very wet, at depth, and has Nos. 7 and 9 Cameron sinking pumps, and a 500-gallon station pump. A drift on the 500′ level, running 850′ toward the Pittsburg & Duluth group of the Superior & Pittsburg Copper Co., has cut leached ore and ledge matter carrying traces of copper. Drifts running in other directions have shown leached ore, in encouraging quantities, but no ore of workable grade was developed, from the Broken Promise shaft, until 1908, when a drift cut an 18″ vein of silver-lead ore, estimated at $56 value per ton, near the centre of the Warren, or Bootleg, claim. Management plans continuing the drift, 1909, into and through the George claim, in the hope of finding oxidized ores that should lie above the sulphide ore bodies found in the Shattuck-Arizona mine, adjoining. During 1908 work was confined to extending the 300′ level drift to length of circa 2,000′, work being suspended on the 500′ level, to avoid water, which apparently is a mistaken policy, as the principal ore bodies must be gone after at depth.

The lands of the Wolverine & Arizona lie partly on the high hill west of Bisbee, but development was begun on the talus of the 500′ mural escarpment which forms the western side of the hill. Exploratory work to the west of the cliff proving disappointing, diamond drill borings of 2,694′ aggregate depth were made, 1906, on the hill, the last hole, at depth of 410′, passing through 50′ of oxidized ore, of 4 to 10% copper tenor. The ore body so located being inaccessible from the Broken Promise shaft, except under tremendous disadvantages, arrangements were made for use of the Higgins tunnel, on the Twilight claim, reaching this ground from the Bisbee side of the hill, as the ore found was located on 2 claims near the Shattuck-Arizona. Under this arrangement the old Higgins tunnel was extended 310′ through Higgins ground, to the Wolverine boundary, and was continued in a southerly direction, on Wolverine lands, during 1908. The nearest workings of the Broken Promise shaft are circa one-half mile distant, and about 500′ lower. An incline was started, October, 1907, at a distance of circa 2,700′ from the portal of the Higgins tunnel, and, during 1908, a body of oxidized ore, of about 8% average copper tenor, was proven by 497′ of workings, estimated to show 150,000 tons of ore, averaging circa 7% copper, which estimate seems unduly high, but it was estimated, at end of 1908, that these workings exposed circa $500,000 worth of ore, which estimate seems warranted.

Equipment includes a 260-h. p. steam plant, with 2 single-drum hoists and a 6-drill air-compressor. Buildings include a 25x50′ engine-house and office, bunk-house, boarding-house and a 10,000-gallon water-tank, water being pumped from Naco, 8 miles distant. All surface improvements are at the Broken Promise shaft.

Property is considered valuable, but the management should buckle down to business, and go after the ore in earnest, on a broad basis of operations, instead of confining operations to desultory exploratory work, maintained by the levying of irritating 25-cent assessments at irregular but frequent intervals. The Wolverine & Arizona has the makings of a mine, but it will require work, and cash to pay for it, to develop the property from a promising prospect to a regular producer.

formation, both east and west from the workings on the Kearsa
as far west as the Kearsarge conglomerate, which was absolutel
out, though it is known to carry some copper on the Ahmeek a
erties, to the northward. The west lode gave a little encourage
level crosscut, and may be tested further, in the future.

The mine has 5 Knowles electric pumps, of which 3 are
with one each in No. 3 and No. 4, three of these pumps having
of more than 1,000′ each. Current is taken from the Houghton
Light Co., and the electric pumps have given much relief to the

Santa Cruz Co., Ariz.

WRIGHT & LAWRENCE MINING CO.

Office: 8 Jackson Blvd., Chicago, Ills. J. T. Fortin, pre
chardt, vice-president; A. W. Nelson, secretary; Alex J. Liljestro
ent and general manager. Capitalization $1,500,000, shares $1
claims, area 220 acres, in the Doyle district of Riverside cou
said to have about 250′ of workings. Was a mere bit of rotte
as promoted, but present management apparently was not resp
deliberate swindles perpetrated by the original officers. Proper
favorably.

WRIGHT-RUSSELL COPPER MINING CO.

Office: 109 South 11th St., Lincoln, Neb. Letter returned
former mine office, Battle, Carbon Co., Wyo. J. H. Westcott, p
Dorgan, vice-president; John P. Dorgan, secretary; John B. Wr
H. M. Rice, general manager. Capitalization $1,000,000. Idle
moribund.

uprite, melaconite and chalcopyrite, in a gangue of calcspar and
n. Idle some years.

T COPPER CO. **MICHIGAN.**

68 Devonshire St., Boston, Mass. Operating office: Houghton,
ne office: Winona, Houghton Co., Mich. Employs 25 men. John C.
esident; M. A. O'Neil, vice-president; Chas. E. Adams, secretary and
preceding officers, Jos. Dorr and Matthew Van Orden, directors;
Van Orden, superintendent; Louis LaRochelle, mining captain. Or-
b. 3, 1899, under laws of Michigan, with capitalization $2,500,000,
par; paid in, $8. Has levied assessments of $200,000 since organiza-
ursements, for fiscal year ending March 30, 1908, were $25,905,
h assets of $37,144.17, with liabilities of $1,834.17. Shares are listed
ton Stock Exchange. State Street Trust Co., Boston, registrar; Fed-
Co., Boston, transfer agent. Annual meeting, second Monday in May.
1,065 acres, adjoining the Winona, in Sections 16, 20 and 21, Town
Range 36 West. Exploratory work, begun February, 1899, has been
uninterruptedly, though hampered by the great disadvantage of a
burden. Early work was done in search of the Winona amygdaloidal
forts were made later to locate the southern extension of the Baltic
which attention was turned again to the Winona bed, and latterly
directed toward locating the extension of the Lake bed. Average
ne Keweenawan formation is N. 53° E., with average dip of 65°, and
ot lands carry the strike of the beds for about 1½ miles. The mine
fts, some of which are merely pits, with 2 shafts of considerable

haft, 1,000′ deep, located in the SE. ¼ of Section 21, Town 52 North,
West, is sunk in the footwall of the Winona bed, with a parallel
amygdaloidal bed 60′ distant, both broken, and of small promise,
wing occasional patches of well mineralized ground.

exploratory shaft, 8x10′, inside measurement, was sunk 350′ on a
eling the Winona lode, at a distance of 1,200′ This lode gave en-
t, when first opened, and diamond-drill holes gave good cores, but
suspended, until 1907, when the shaft was unwatered and deepened.
located in the SE. ¼ of Section 21, Town 52 North, Range 56 West,
ed, 1908, to 700′, and a crosscut, driven to the southeast, passed,
through an epidotal amygdaloid of circa 50′ width, carrying finely
d copper of promising appearance. There also is a footwall chute
width, heavily mineralized, where cut. The epidotal bed, at the end
l about 100′ of drifting, and gave an encouraging showing of copper.
pparently about 24′ in width, showed very little copper until the
as reached, where there was found 6″ to 12″ of heavy mass and
er, at the point cut, but drifts north and south show copper more
eminated through the bed, mainly as stamp-copper, rather than
s. The showing at this point is much the best that the Wyandot
cured.

aneous work of the past included a 102′ shaft sunk on a lean cuprif-
lomerate underlying the Winona bed; a 300′ shaft sunk on an
identified as the Elm River, which gave no promising ground, and
was done also, 1904-1905, on the Misery River lode, in Section 16,
orth, Range 36 West, on a 20′ amygdaloid carrying fine copper, but
value was developed at this point.

ition to underground work, extensive diamond-drill borings have
and drilling was in progress at the end of 1908, with holes pitched
of 55°, and further drill work is planned to be carried on, in Section

16. Several years ago Section 28, Town 52 North, Range 36 West, was optioned, and a vertical shaft sunk near the west quarter post, to depth of 250', and crosscuts driven in both directions, with a total of about one-half mile of workings. The horizon of the Baltic lode was crossed in this work, but the bed was found highly altered, as was the whole country in the neighborhood. Diamond drilling, 1904, gave a core, showing a little copper, from the hypothetical horizon of the Lake lode, but this was not considered important at the time. The ground is being gone over again, with a diamond-drill, and efforts will be made to locate the extension of the Lake bed and give it such test as circumstances may warrant.

Equipment includes a Lidgerwood hoist, good for 1,000', one Ingersoll-Sergeant and 2 Rand air-compressors, of 12 drills aggregate capacity, and boilers. Buildings include a machine-shop, smithy, warehouse, barns and about 12 dwellings. The Wyandot has worked faithfully, for a decade, under most discouraging circumstances, but with great economy and persistence, and the showing secured at the end of 1908 was much the best in the history of the property.

WYOMING & ALABAMA MINING CO. WYOMING.

Dead. Formerly at Tie Siding, Albany Co., Wyo.

WYOMING CONSOLIDATED COPPER CO. WYOMING.

Dead. Formerly at Encampment, Carbon Co., Wyo.

WYOMING COPPER CO. WYOMING.

Office: Jackson, Mich. Letter returned unclaimed from former mine office, Encampment, Carbon Co., Wyo. Lands are on upper Cow Creek. Idle and apparently moribund.

WYOMING COPPER & GOLD MINING CO. WYOMING.

Office: Alma, Kan. Mine office: Encampment, Carbon Co., Wyo. C. B. Henderson, president and manager; J. R. Henderson, secretary and treasurer. Organized under laws of Arizona, with capitalization $1,500,000, shares $1 par. Lands are said to have shown ore, from the Metal Chief vein, assaying 65% copper. Idle several years.

WYOMING COPPER & MINING CO. WYOMING.

Office: 115 Dearborn St., Chicago, Ills. Letter returned unclaimed from former mine office, Rawhide Buttes, Laramie Co., Wyo. Mark E. Bennett, president; Edwin Hall, vice-president and general manager; W. M. Gager, secretary. Organized Nov. 17, 1905, under laws of Wyoming, with capitalization $500,000, shares $1 par.

Lands, 35 claims, area 700 acres, in the unorganized Rawhide Buttes district, also 100 acres timber lands, showing country rocks of quartzite, schist and limestone, said to carry 14 contact veins, of which 4, of 5' average width, are opened by shafts of 30' and 245', showing malachite and azurite above, with sulphides in the lower workings, giving average assays of 8% copper, 4 oz. silver and $3 gold per ton. Mine has 810' of workings, estimated to show 20,000 tons of ore. Equipment includes a 40-h. p. steam plant, with hoist and 4-drill air-compressor, and 4 mine buildings. Nearest railroad is the Chicago & Northwestern, 12 miles distant. Idle.

WYOMING GOLD & COPPER MINING CO. WYOMING.

Office: Salt Lake City, Utah. Mine office: Lusk, Converse Co., Wyo. Organized 1906, under laws of Utah. Lands, 3 claims, circa 18 miles south of Lusk, in the northern part of Albany county, said to have a 30' shaft, showing an ore body assaying 16% copper, with gold values.

WYOMING MINING CO. WYOMING.

Mine office. Kirwin, Big Horn Co., Wyo. Titus Sheord, president; B. F.

YALE GOLD-COPPER MINING CO. **BRITISH COLUMBIA.**

Dead. Formerly at Rossland, Trail district, B. C.

YALE MINING CO. **BRITISH COLUMBIA.**

Mine office: Hedley, Boundary district, B. C. F. A. Ross, manager. Lands, 25 claims, area circa 1,250 acres, of which 2 claims, the Nickel Plate and Sunnyside, are worked. The Nickel Plate, primarily a gold and silver mine, carrying a little copper, has water and electric power, and is closely connected with the Daly Reduction Co., which operates the Nickel Plate mill of 40 stamps. Production, normally, is about 3,000 tons of ore monthly, and for 1907 was 31,756 tons, notwithstanding the loss of 3 months time.

YAMAGATATOKITO MINE. **JAPAN.**

Mine office: Nanataki-mura, Kazuno-gori, Rikuchu, Japan. Production, 1906, was 641,120 lbs. fine copper.

YAMATE MINE. **JAPAN.**

Mine office: Takigawa-mura, Kume-gori, Mimasaka, Japan. Is a very ancient mine. Ore is slightly argentiferous chalcopyrite, associated with pyrite, galena and sphalerite, with arenaceous clay gangue, occurring in quartz-diorite. Best grade of ore yields 10 to 13% copper. Latest recorded production, 1899, was 3,044 momme silver and 99,679 lbs. fine copper. Presumably idle.

YAMPA MINE. **UTAH.**

Owned by Tintic Mining & Development Co.

YAMPA SMELTING CO. **UTAH.**

Office: 214 Dooly Bldg., Salt Lake City, Utah. Works office: Bingham Canyon, Salt Lake Co., Utah. Henry Stearne, president; Chas. W. Saxman, general manager; J. C. Dick, general superintendent; G. W. Metcalf, smelter superintendent. Organized 1903, with capitalization $100,000. Is controlled, through stock ownership, by Tintic Mining & Development Co.

Property is a smelter, at Yampa, near Bingham Canyon, built 1904, and enlarged, 1906, to 1,000 tons daily capacity. The works connect with the lower end of the aërial tram of the Yampa mine. Structures include ore-bins, calcining building, furnace building, converter department and a power plant, all buildings having steel frames.

The calcining department has eight 125-ton McDougall calciners, each with 6 superimposed hearths having sets of rabbling arms and rakes, with a dust-chamber 18x30x60′, connecting with a 120′ brick stack. Calcining reduces ore from 30% down to 5% in sulphur tenor.

The furnace building has 3 blast-furnaces, and a main stack with extreme elevation of 287′ above the tuyeres. There are also 3 reverberatory furnaces, each having separate brick stacks The converter department, installed 1907, has 2 stands, with 16 shells, converting matte of 50% average tenor to blister copper, shipped for refining to Chrome, N. J.

Production was 4,699,765 lbs. fine copper 1906, and 5,001,255 lbs. in 1907, and late 1908 works were treating circa 900 tons of ore daily, of which about 300 tons was custom ore. The smelter is threatened with damage suits, on account of fumes, though the injury seems mainly imaginary. The works are modern in design and equipment, and management is good.

YANKEE CONSOLIDATED MINING CO. **UTAH.**

Office: 609 McCornick Bldg., Salt Lake City, Utah. Mine office: Eureka, Juab Co., Utah. John E. DuBois, president; Hon. J. E. Frick, vice-president; B. H. Lehman, treasurer; preceding officers, H. C. Edwards and Chas. J. North, directors; C. J. Canfield, secretary; Louis Merriman, superintendent. Organized July 8, 1898, under laws of Utah, with capitalization $500,000, increased, circa February, 1908, to $1,000,000, shares $1 par. Annual meeting, fourth

which assays are without verification, and probably will continue to lack competent indorsement till the end of time.

Development, begun 1901, is by 2 shafts and 8 tunnels, and, so far as can be learned, the mine has shown practically no ore.

Improvements include an engine and boiler house, office building and store. Company planned the installation of a hydro-electric plant and a concentrator, but failed to secure same.

The Yaqui Copper Co. was organized for the purpose of selling stock, and was a deliberate swindle, and the lying done by its original officers was of a monumental nature. The company claimed possession of the largest copper vein ever located, but was unable to produce the same for the inspection of visitors competent to judge. Mr. Sauntry, the president, who was not connected with the original management, is an experienced lumberman, and an excellent judge of pine timber. The secretary and treasurer is a manufacturer of time-recording machines, and the former superintendent, who was killed by the Yaqui Indians, is said to have managed a photograph gallery with signal success. Apparently an unsuccessful effort was made by the Greene Gold-Silver Co. to secure control of this property. The company is exceptionally hard up, with a considerable floating debt, and is constantly pleading to shareholders for funds, and, March 21, 1908, issued a mimeographed letter to shareholders, offering the company's note for one year, in order to raise $1,600, to pay back salary due the widow of the late superintendent. So far as can be learned the property is practically valueless, and the company practically bankrupt.

YAQUI RIVER CONSOLIDATED GOLD & COPPER CO. MEXICO.

Office: Nogales, Ariz. Mine office: Quiriego, Alamos, Sonora, Mex. W. H. Smith, secretary; Walter W. Strickland, manager.

YAQUI RIVER EXPLORATION CO. MEXICO.

Dead. Formerly at San Antonio de la Huerta, Ures, Sonora, Mex.

YAQUI RIVER GOLD & COPPER CO. MEXICO.

Office: Los Angeles, Cal. Mine office: Nogales, Magdalena, Sonora, Mex. Roy Stearns, president and general manager. Property is the Mina Verde, near Nogales.

YAQUI SMELTING & REFINING CO. MEXICO.

Works office: San Antonio de la Huerta, Ures, Sonora, Mex. A. E. Klauser, president; H. R. Klauser, vice-president; H. C. Gerver, secretary and treasurer; Henry Lockhart, Jr., general manager; preceding officers and A. V. Baumann, directors; Samuel James, smelter superintendent.

Lands consist of mining claims in the vicinity of San Antonio de la Huerta, 80 miles east of Torres and 60 miles below Campo Santo Niño, circa 20 miles from the nearest railroad, and a concession has been granted the company for a 40-kilometer aërial tram, to bring ore of various mines to its works.

The reduction plant, of circa 150 tons nominal daily capacity, includes a 2-story sampling mill, one reverberatory furnace and one Allis-Chalmers blast-furnace, latter specially designed to reconcentrate, smelt and refine auriferous ores of both lead and copper. Local coke proving unsatisfactory, imported coke is employed for the blast-furnace, and wood is burned in the reverberatory furnace. The works have electric light.

Buildings include a machine-shop, smithy, laboratory, general store, hotel and an ice-plant. This is the only custom smelter in a rich mineral district, but adequate transportation facilities are lacking, and there has been great difficulty in operating the plant, owing to depredations of the Yaqui Indians.

LL MOUNTAIN COPPER CO. **COLORADO.**
e office: Steamboat Springs, Routt Co., Colo. Organized 1907. Lands, have been bought for $60,000, are on Yarwell Mountain.

AD YAURICOCHA, LIMITADA. **PERÚ.**
e and mine: Huarapampa, Yauyos, Lima, Perú. Mine carries argentif- pper ore. Was a small producer, at last accounts.

AI CONSOLIDATED GOLD-SILVER-COPPER CO. **ARIZONA.**
e office: Crown King, Yavapai Co., Ariz. W. C. Bashford, superin- Lands, 30 claims, 13 patented, including the Old Reliable mine, 3 om Crown King, opened 1875, which produced rich gold ores; the Wild group, in the Pine Grove district, and the Tiger group, in the Bradshaw ns. Properties have several thousand feet of old workings, showing a vein between porphyry and syenite, carrying slightly auriferous and rgentiferous copper ores. Has steam power and a 20-stamp mill, and l, at last accounts, to employ circa 100 men.

AI COPPER CO. **ARIZONA.**
ter returned unclaimed from former office, 317 Main St., Springfield, Mine office: Prescott, Yavapai Co., Ariz. Geo. Nightingale, president; k Carpenter, secretary. Organized circa 1900, with capitalization 00, shares $10 par. Lands, 25 claims, area 500 acres, about midway Prescott and Jerome. Idle some years, deeply involved in debt, and d.

AI DEVELOPMENT CO. **ARIZONA.**
d. Formerly at Mayer, Yavapai Co., Ariz.

IACION MINERA DE CLEMENTE YBARRA. **MEXICO.**
ne office: Promontorios, Alamos, Sonora, Mex. Clemente Ybarra, Jesús Maria Quijada, manager. Lands include the Almada, Terito, lo and Gloria mines, carrying auriferous and argentiferous copper ores, ed by shafts and tunnels.

ere are 2 small smelters, known as La Valenciana, which, 1903, pro- 9,200 kgs. blister copper, and Almada y Terito, which, 1903, produced gs. blister copper. Property is primarily a silver mine, copper being as a by-product. About 50 men are employed.

RA GOLD MINING CO. **MEXICO.**
fice: 132 Market St., San Francisco, Cal. Mine office: Calmallí, Sur, alifornia, Mex. A. J. Mayer, superintendent. Lands include the Buena- a, San Francisco and other mines, carrying auriferous and argentiferous ores. Has steam power and a 25-ton mill, employing circa 75 men at counts.

OW BUTTE COPPER MINING CO. **CALIFORNIA.**
ffice: care of W. P. Veuve, president, San Jose, Cal. Mine office: ood, Siskiyou Co., Cal. J. B. Ball, secretary; L. D. Ball, superintendent. ized 1907. Mine, 12 miles from Edgewood, on the eastern slope of Hay- Mountain, began ore shipments, early 1908, to Kennett smelter.

A NEW COPPER MINING CO., N. L. **SOUTH AUSTRALIA.**
line office: Wallaroo, Daly Co., South Australia. Presumably idle.

SEI COPPER CO., LTD. **SIBERIA.**
ffice: 269 Broad Street Place, London, E. C., Eng. Mine office: Rudnik Abakansk, Yenisei, Siberia. R. Van Gember, chairman; A. G. Terskoff, an agent; Norman J. Wallworth, secretary; Nicholas Henri de Goerke, al manager; Walter J. Stanford, mine superintendent. Organized Apr. 902, under laws of Great Britain, with capitalization £300,000, shares £1 issued, £214,400. Debentures, £5,543 issued. Has an £18,000 note out- ing.

Lands are 11 copper concessions, area circa 11,000 acres, including the Julia mine, also 10 coal concessions, and timber rights covering about 470,000 acres.

Work has been done on 2 copper claims, principal development being on the Julia, which has sundry old workings, with new shafts of 160', 100', 130', 50' and 250', property having been estimated, June, 1906, to have ore reserves of 70,000 long tons, of 5.5% average copper tenor, which was an overestimate, both as to reserves and tenor. Ore is now reported by company to average 3.4% copper, with about 4% sulphur, 30% silica, 10% magnesia, 17% iron oxide and 34% calcium oxide. Ore is highly silicious and difficult of reduction, and, under test of actual smelting, returned only 3.08% copper.

The 100-ton smelter, one-fourth mile from the mine, blown in 1907, has a 36x120" Fraser & Chalmers water-jacket blast-furnace, rated at 100 tons, but which, in actual practice, treats only 60 to 75 tons daily, burning charcoal, which is scarce, and making matte averaging 40% copper tenor, which is broken in rolls and roasted with 3% fuel charges, in shaft-ovens, and brought up to metal of 88% copper tenor, which is shipped to Swansea for refining, product being copper of 99.75% copper tenor. Production was 563,319 lbs. fine copper in 1907, and circa 1,820,000 lbs. in 1908. The company has experienced serious labor troubles, and apparently suffers also from lack of adequate cash.

YERINGTON ASSOCIATED COPPER CO. NEVADA.

Dead. Was organized 1907, under laws of Arizona, with capitalization $1,500,000. Formerly at Yerington, Lyon Co., Nev.

YERINGTON-B. C. MINING CO. NEVADA.

Letter returned unclaimed from former mine office, Wabuska, Lyon Co., Nev. H. Hamlin, superintendent. Organized circa April, 1908. Lands, 8 claims, south of the Wabuska-Yerington, supposedly carrying southern extensions of ore veins of latter. Lands are said to show a 3' gold vein, and a prominent gossan carrying up to 20% copper, presumably from selected specimens. Company planned development by shaft. Idle.

YERINGTON CENTRAL COPPER CO. NEVADA.

Office: Salt Lake City, Utah. Mine office: Yerington, Lyon Co., Nev. J. J. Beatty, manager. Mine has a 250' three-compartment shaft, showing a 3' to 5' vein of chalcopyrite, claimed to assay about 10% copper, with a 4' hanging-wall paystreak of melaconite assaying up to 59.1% copper.

YERINGTON CONSOLIDATED COPPER CO. NEVADA.

Office: Salt Lake City, Utah. Mine office: Yerington, Lyon Co., Nev. Frank J. Hagenbarth, president; Windsor V. Rice, vice-president; Walter C. Orem, treasurer and general manager; J. H. Turner, secretary; preceding officers, Col. Enos A. Wall, John Dern and Wm. Keiting, directors; S. S. Arentz, superintendent. Organized circa February, 1907, with capitalization $5,000,000, shares $5 par. Lands, circa 225 acres, in 2 groups, known as the Copper King and Copper Deposit, said to lie between the Bluestone and Mason Valley mines and to show auriferous copper sulphide ore of good tenor.

YERINGTON COPPER CO. NEVADA.

Office: Hooper Bldg., Salt Lake City, Utah. Mine office: Yerington, Lyon Co., Nev. Chas. N. Strevell, president; J. H. Pennington, vice-president; C. D. Rooklidge, secretary; H. P. Clark, treasurer; D. E. McPherson, resident director; A. A. Marsal, superintendent. Organized circa July, 1906, under laws of Utah, with capitalization $1,000,000, shares $1 par.

Lands, 14 claims, circa 3 miles east of Yerington, showing a prominent gossan, traceable one-half mile, covering a contact deposit between porphyry and limestone, carrying carbonate ore assaying 15 to 20% in copper from surface to a depth of 125', when sulphide ore appears. Has a 25' sha

and a 400′ tunnel, said to show, on the 325′ level, sulphide ore of 6 to pper tenor. Has gasoline power, and a gasoline pump working against ead.

GTON COPPER KING CO. **NEVADA.**

ce: Salt Lake City, Utah. Letter returned unclaimed from former ice, Yerington, Lyon Co., Nev. Lands, known as the Craig group, north Bluestone, are said to have shipped a little high grade ore, under former ip. Idle.

ZELAYA HERMANOS.

Office and works: Paípote, Copiapó, Atacama, Chile. Wor
drical water-jacket blast-furnace.

ZELLER EHZBERGWERKE G. m. b. H.

Mine office: Altlay bei Zell a/M., Rheinprovinz, Germa
president. Produces argentiferous lead and copper ores, latte
tities only, employing circa 100 men.

ZENITH GOLD & COPPER MINING CO.

Dead. Formerly at Encampment, Carbon Co., Wyo.

ZENOLI SILVER-COPPER CO.

Office: Salt Lake City, Utah. Mine office: Palisade, E
E. O. Howard, president; P. C. Delmas, vice-president; W. M.
tary and treasurer; preceding officers, Jos. Lippman and J.
directors; P. D. Delmas, superintendent. Organized December,
talization $150,000, shares $1 par. Lands, 5 claims, opened by
a vein of 2′ to 6′ width carrying silver-lead ore at surface, chan
erous copper ore at depth. Has secured ore assaying up to 2
ton, and shipped a little ore, 1907.

ZIMAPÁN MINING & SMELTING CO.

Dead. Formerly at Zimapán, Hidalgo, Mex. Described V

ZOMEKI MINE.

Mine office: Ikuno-mura, Abu-gori, Nagato, Japan. O
argentiferous chalcopyrite and bornite, associated with sphale
pyrrhotite, occurring in lenses and fissure veins, near liparite d
clay-slate, sandstone and limestone. Presumably idle.

COMPAÑIA MINERA DE ZOMELAHUACÁN.

Mine office: Las Minas, Jalacingo, Vera Cruz, Mex. W.
Property is La Asecuncion de Maria y anexas, carrying aurifero
erous copper and lead ores. Has water power and a 15-stamp
circa 150 men.

ZONIA COPPER MINING CO.

SOCIÉTÉ ANONYME DES MINES D'AÏN-KECHERA. ALGERIA.

Office: 11 Rue Godot-de-Mauroi, IXe, Paris, France. Mine office: Philippeville, Constantine, Algeria. L. Pelletan, F. Urrity, E. Maurice, M. Martin and L. Schwob, directors. Organized Feb. 14, 1905, under laws of France, with capitalization f600,000. Lands carry complex argentiferous sulphide ores of zinc, lead, copper and antimony.

AKUTOZAWA MINE. JAPAN.

Mine office: Yokokawame-mura, Waka-gori, Rikuchu, Japan. Property, in the district of Iwate, produced 91,869 lbs. fine copper in 1907.

ALAMOS MINES CORPORATION. MEXICO.

Mine office: Alamos, Sonora, Mex. Property is the Promontorios mine, once a considerable producer of silver, said to have been worked, at intervals, for upwards of 200 years. Assays show ore carrying 7 to 24% copper, 4 to 8 oz. silver and $10 gold per ton. Company also owns the Plata Rey mine, area 10 hectares, 15 miles west of Alamos, showing a ledge said to be traceable 1,800', giving assays, from surface ores, of 4% copper and 130 oz. silver per metric ton, with variable gold values. Some small ore shipments have been made by present company to the Quintera smelter.

ALASKA DEVELOPMENT CO. ALASKA.

Office: Seattle, Alaska. Mine office: McCarthy Creek, Copper River district, Alaska. L. C. Dillman, general manager. Property is in the neighborhood of the Bonanza mine.

ALBANY COPPER CO. NEVADA.

Mine office: Buckskin, Douglas Co., Nev. J. E. Lutz, superintendent. Property has auriferous copper ores, under development, with gasoline power.

ALFRED MINES, LTD. ENGLAND.

Office: Perranporth, Cornwall, Eng. Mine office: Bolingey, Cornwall, Eng. F. Marshall, secretary; preceding officer, A. J. Swaab, and B. Reed, directors. Organized March 28, 1906, under laws of Great Britain, with capitalization £40,000, shares £1 par, fully issued and fully paid. Debentures, £5,000. Property is the New Wheal Leisure mine, carrying chalcopyrite and sphalerite.

ALICE DEVELOPMENT CO. COLORADO.

Mine office: Idaho Springs, Clear Creek Co., Colo. W. F. Shaffer, manager. Mine is opened by a tunnel, said to show a vein, upwards of 75' in width, of ore averaging about $4 per ton in copper, gold, and silver. Property has a 12-stamp mill.

ALLEN MINING CO. ARIZONA.

Office: Chicago, Ills. Mine office: Old Glory, Santa Cruz Co., Ariz. Lands are near the Oregon & Arizona Mining Co. Presumably idle.

ALLONGOSSUK MINE. GREENLAND.

Office: care of Nyeboe & Nissen, Bellevue, Raadhuspladsen, Copenhagen, Denmark. Mine office: Julianehaab, Greenland. M. Ib. Nyeboe, managing director. Property, in the extreme southern part of Greenland, about 50 miles west of Cape Farewell, was under development, 1909.

ALMA PROSPECTING SYNDICATE. TASMANIA.

Mine office: Forth, Tasmania. Lands include the old Barrington or Alma mine, above Wilmot bridge, west of the Forth River, opened circa 1880, at which time about £1,000 was expended on development. Property shows a strong gossan, and has a 35' shaft, with main development by a tunnel parallel with the gossan, which covers a contact deposit carrying a little chalcopyrite in barite, between slate and breccia of Cambrian age.

ALMONTE COPPER CO. NEW MEXICO.

Mine office: Hanover, Grant Co., N. M. Company was organized, with capitalization $100,000, by Albert G. Dunlap, D. E. Notley, J. Calvin Hess and Wharton Barker. Dunlap, who has a prison record, was arrested, June 24, 1909,

arge of obtaining money under false pretenses on account of this com-
s not regarded favorably.

A COPPER MINING CO. **MONTANA.**

ce: Wallace, Idaho. Mine office: Saltese, Missoula Co., Mont. C. W.
resident; Timothy Kelly, vice-president and manager; A. H. Feather-
ecretary and treasurer; preceding officers, Alex. Muir and A. P. Coch-
rectors. Lands, near the Monitor mine, and 2 miles from a tunnel on
cago, Milwaukee & Puget Sound railroad, are developed by 2 long
and a shaft, showing chalcopyrite assaying up to 34% copper, with
lver and gold values. Equipment includes several buildings.

BET COPPER CO. **ARIZONA.**

ie office: Courtland, Cochise Co., Ariz. Frank Armstrong, superin-
. Company was organized circa January, 1909. Cannot be learned that
rk has been done.

CONSOLIDATED MINING CO. **UTAH.**

id. Lands were owned, 1908, by Flagstaff Copper Mining Co. For-
t Alta, Salt Lake Co., Utah.

COPPER MINES. **MONTANA.**

ce: 60 Congress St., Boston, Mass. Mine office: Corbin, Jefferson Co.,
Apparently has some connection with the Alta-Montana Copper Co.,
asury stock was being offered, February, 1909, by Hewett, Wood & Co.,
on.

CORBIN COPPER CO. **MONTANA.**

ne office: Corbin, Jefferson Co., Mont. Organized circa January, 1909,
pitalization $1,000,000. Property is the Flambeau group, area 4 claims.

MONTANA COPPER CO. **MONTANA & NEW MEXICO.**

ne offices: Corbin, Jefferson Co., Mont., and Kelly, Socorro Co., N. M.
L. Hewett, general manager. Organized circa 1909, with capitalization
00, shares $10 par, apparently as successor or reorganization of Kelly
g & Refining Co.
w Mexico lands are known as the Kelly group. Montana lands, 12
including the Alta group of 8 claims, carrying about 1½ miles of the
mother lode of the Corbin camp, also 664 acres of placer ground, near
including a townsite. The Alta mine is claimed to have produced
ls of $30,000,000 from old workings in the past, mainly in silver, no
on having been paid to copper values, and the first smelter in Montana
ilt to treat the ores from the Alta and Comet mines. The management
reopening old workings on the 500′ level, and below, hoping to obtain
lver and copper values. In May, 1909, company was said to plan sinking
partment shaft to depth of 1,000′, and to plan adding an electric hoist
0-ton concentrator later in the season, but apparently the concentrator
to materialize. Is not regarded favorably.

N MINING CO. **CALIFORNIA.**

ine office: Needles, San Bernardino Co., Cal. R. C. Hamilton, president;
Freeman, secretary; M. Freeman, superintendent. Lands, 6 claims, north
f the Dunkirk and southeast of the Eagle, in the Whipple Mountains, 8
from the Colorado River. Nearest railroad point is Parker, 15 miles by
-road. Lands show schists, limestone, diorite and slate, with intrusive.
ore occurring in and near the dykes, which frequently are completely
orphosed. Ore bodies usually have a northwest and southeast strike and
oxidized copper ores having gold values and a little silver. Development
prospecting shafts, pits and an opencut, principal workings being a 50′
and a 300′ tunnel. Property is said to have yielded ore samples assaying
$35 per ton.

ALVIN DEVELOPMENT CO.

Office: Houghton, Mich. Mine office: Sal
son Pryor, president; Ward Smith, vice-presi
Wm. D. Calverley, treasurer; Albert Cronk
1908, under laws of Arizona, with capitaliza
the capitalization 25,000 shares went for pr
option on lease. Lands, 18 claims, area 360
group, one-half mile east of the Cobralla min
from Salome, in the Harcúvar Mountains.

Property shows limestone, alternating
schists dipping to the north at an angle of 45°
dykes, standing practically vertically and sho
a 100′ shaft, and some churn drilling was don
ing oxidized ores. Equipment includes a 60
mine buildings. Property considered promisi

ce: 5 Fenchurch St., London, E. C., Eng. T. Blair Reynolds, chairman; hart, managing director; preceding officers, C. F. H. Leslie, A. J. Hugh nd S. G. Sheppard, directors; John Owler, secretary. Organized Dec. 6, der laws of Great Britain, with capitalization £100,000, shares £1 par. y floated the Perm Corporation, Ltd., to take over the Kyshtim prop- d the latter, 1908, promoted the Kyshtim Corporation, Ltd. Property Anglo-Siberian Co., Ltd. is a 50% share interest in the Kyshtim Cor- , Ltd.

ERSARY COPPER MINES, LTD. **AUSTRALIA.**
ce: Townsville, Queensland, Australia. Mine office: Herberton, Cardwell ensland, Australia. Organized August, 1909, under laws of Queensland, pitalization £40,000, shares £1 par; issued, 15,000 fully paid shares and hares 12s. paid. Company was organized to take over the New Anni- Copper Prospecting Syndicate, Ltd., and property is described under itle.

OPE MINING CO. **UTAH.**
ce: Provo, Utah. Mine office: Eureka, Juab Co., Utah. John D. Dixon, t; Arnold Dixon, secretary. Organized circa April, 1909, under laws of ith capitalization $50,000, shares 5 cents par. Lands, 3 claims. Cannot ed that any work has been done.

O MINING CO. **COLORADO.**
ce: Spirit Lake, Iowa. Mine office: Salida, Chaffee Co., Colo. C. W. president; A. E. Rose, vice-president and superintendent; John Bur- , secretary and treasurer; preceding officers, B. E. Nefzger and W. L. ey, directors. Organized under laws of Colorado, with capitalization 00, shares $1 par. Lands, known as the Tip Top group, are on the st slope of Mount Antero, in the Chalk Creek district, 4 miles from the n branch of the Colorado Southern railroad, and 25 miles northwest of Property has a vein of 4′ to 12′ width, with a claimed average of 6′, g mixed sulphides and oxidized ores, with assay values, in copper, gold er, up to $120 per ton. Property also has a vein 60′ from and apparently with the main vein, carrying auriferous and argentiferous copper, lead c sulphides, and also has various smaller veins.

CENTRAL MINING CO., LTD. **ITALY.**
ice: Finsbury Pavement House, London, E. C., Eng. Mine office: Aosta, J. Jones, managing director; P. Casparis, secretary; Francois Farinet, anager. Organized Apr. 20, 1907, under laws of Great Britain, with ization £50,000, shares £4 par, fully issued, with £11,250 vendors shares aid, and 1,250 shares 36s. paid. Lands, 495 acres, in the communes of my and Oyen, carrying ores of copper, lead and antimony.

HE MINING CO. **WASHINGTON.**
ine office: Nespelem, Okanogan Co., Wash. Lands, in the Moses district, veloped by a 100′ incline shaft and a 350′ tunnel, showing ore with a high footwall paystreak and quartz gangue, main ore body carrying 2 to 3% and about 5% lead, with some antimony and zinc, and occasional high in gold and silver. Company planned resumption, late 1908, but appar- property continued idle.

COPPER CO. **IDAHO.**
ine office: Lost River, Blaine Co., Idaho. Lands, in Caine's Cañon, carry

SOCIETA ANONIMA PER LE MINIERE APRILE.

Mine office: Santa Lucia del Mela, Italy. Salvator Property shows chalcopyrite and cupriferous pyrrhotite, la assays of 1.83% copper, 26.66% sulphur and 120 grams sil the chalcopyrite giving average assays of 9.96% copper an metric ton. Property was under development at last acco

APSLEY MINE.

Mine office: Perth, N. S. W., Australia. Francis Drak 5 miles from Perth, has been worked intermittently, unde since about 1875, and production, 1876, was 20 tons fine reopened, February, 1907, by a syndicate under the mar Longton, but operations were suspended shortly, and opti by Mr. Drake. The ore occurs as impregnations in schis walls, but the payable ore usually ranges 3′ to 5′ in widt by a 240′ shaft. On the 180′ level, for a length of 45′ and was chalcopyrite and sphalerite, associated with pyrite, assa and for 53′ on the 240′ level, with an average width of 7′ 6 7.92% copper. Ore carries up to 3 oz. silver per long ton, w Property considered promising.

ARIZONA-BOUSE COPPER CO.

Dead. Formerly at Bouse, Yuma Co., Ariz. Was reor as Little Butte Consolidated Mines Co.

ARIZONA & CHICAGO MINING CO.

Mine office: Cave Creek, Maricopa Co., Ariz. Lands, ore giving average assays of 9% copper, with considerable ues. Mine has about one-half mile of workings. Compan tion of a 10-stamp mill, at last accounts, March, 1909.

ARIZONA & CLEVELAND MINING CO.

Mine office: Dragoon, Cochise Co., Ariz. J. B. Ri Mine, opened to depth of circa 225′, shows ore carrying mainly in gold, silver and lead.

ARIZONA COPPER MINES & SHIPPING CO.

Mine office: Dragoon, Cochise Co., Ariz. Organized cir planned development by sinking a 500′ shaft, at last accoun

a smelter site. Geological conditions are markedly similar to those lanet and Clara mines. The Carnation ore body, traceable 2,000′, is l at 50′ to 100′ width, and the Eagle group shows veins of 5′ to 50′ ving assays of 4 to 25% copper and $2 to $20 gold per ton. The as a whole, has about one mile of workings, deepest circa 300′, show- ge amount of copper carbonates, with sulphide zone not yet reached. e group has incline shafts of 70′ and 300′, and 1,500′ of tunnels, show- derable ore of smelting grade, with several hundred tons of ore on s assaying 15 to 25% copper, and $5 to $20 gold per ton, planned pped immediately. The Walters crosscut tunnel cuts a 30′ vein, with 300′, assaying about 5% copper and $5 gold per ton. On the 200′ level rnation shaft an ore body of 50′ estimated width is said to assay 5% nd $5 gold per ton, carrying a 10′ paystreak estimated to average per and $6 gold per ton. Management plans building a 200-ton smelter Landing. Property considered promising.

A-INTERNATIONAL MINING CO. **ARIZONA.**

e office: Yucca, Mohave Co., Ariz. Fred W. Morrison, president. , about 12 miles east of Yucca, formerly was operated on a small copper.

COMPAÑÍA MINERA ARMANDO.

Office and mine: Zautla, San Juan de los erty is the Armando mine, ores of which carry small quantities of gold and silver.

ASSOCIATED COPPERS CORPORATION.

Office: Cassville, Oneida Co., N. Y. E. B. Leech, vice-president; John H. Spring, secreta

anager. Capitalization $1,500,000. Lands, 57 claims, area 1,280 acres, Desert Valley Mining district of Yuma County, Arizona.

TIC-PACIFIC COPPER CO. **CALIFORNIA.**

antic City, N. J. Mine office: Smith River, Del Norte Co., Cal. H. F. president. Lands, 14 claims, adjoining the Union mine on the north, nnels of 500′ and 700′. Presumably idle.

ST MINE. **ARIZONA.**

ne office: Patagonia, Santa Cruz Co., Ariz. Wm. Kemp, general man- Mine has a 250′ shaft, said to show ore averaging 17% copper and 7 oz. er ton, and management was said, May, 1909, to have closed a contract ie Old Dominion smelter for shipment of 1,000 tons of ore monthly. 1909, were circa 30 men.

LA CROWN MINING CO. **WASHINGTON.**

ne office: Lucerne, Chelan Co., Wash. Charles Rubin, superintendent. y has gold and copper ores, with water-power and a 2-stamp mill, em- a small force at last accounts.

LA GOLD & COPPER MINING CO. **COLORADO.**

ne office: Russell Gulch, Gilpin Co., Colo. Organized circa June, 1909, aws of Colorado, with capitalization $1,000,000. Property includes the mine, at Russell Gulch, and lands in Clear Creek County, Colorado.

TÉ DES MINES MÉTALIQUES DE L'AVEYRON. **FRANCE.**

ce: 16 Rue du Colysée, Paris, France. Mine office: Sauclières, Mil- eyron, France. M. Mougin, president. Property is lands carrying cop- ver-lead and zinc ores, in the communes of Sauclières and Saint Jean- l, department of Aveyron.

MINES, LTD. **MEXICO.**

ice: 138 Salisbury House, London, E. C., Eng. Mine office: Avino, , San Juan del Rio, Durango, Mex. R. H. Jeffery, general manager. ed circa 1909, under laws of Great Britain, as a reconstruction of Mines of Mexico, Ltd. The old company was not in the best of position ally, and apparently the reconstruction has inherited the monetary debil- the old company.

nds, 250 acres and a 302-acre damsite, 10 miles from a railroad. Mine 800′ shaft and 600′ tunnel, with several large pits, one being nearly width, and of considerably greater length. Property is said to show 2,000,000 metric tons of low grade silicious argentiferous copper ore, e value of ore produced, July and August, 1907, being reported at 36s. 1. Mine is claimed to have produced about $60,000,000 in the past, in silver, but presumably this should be 60,000,000 pesos, equal to about ,000. Property produces a little smelting ore, but ore yielded is mainly entrating grade.

uipment includes a steam plant and a 300-h. p. electric plant, operated rocker-Wheeler gas-engine. A large concentrator first built was found able, and was replaced by a hyposulphite lixiviation plant, which was l to save 85% of the silver and 30% of the gold values. Property was handled, the former management spending too much money on surface, t enough in the mine, in addition to making a serious mistake in the ore treatment. The mine has an immense amount of ore of dangerously erage tenor, but there have been too many changes in local management ocesses, by reason of which no management or process has been given a ial.

e office: Eureka, Juab Co., Utah. Robt. Brown, president; C. C. vice-president; S. M. Simpson, secretary; John Enlund, treasurer. d December, 1908, under laws of Utah, with capitalization $100,000,) cents par. Lands, just north of Big Hill, in the eastern section of the strict, are being developed by shaft.

COPPER CO. **MONTANA.**
e and mine: 401 State Savings Bank Bldg., Butte, Mont. Dr. M. J. anager; P. J. Scott, superintendent. Organized July, 1909. Lands, 13 rea circa 250 acres, 3 claims, known as the Linda, Copper Queen and King, being held under bond and lease, and 10 claims were bought te & Buxton Copper Mining Co. for 150,000 shares. Lands are 15 miles t of Butte, near Buxton switch, on the Oregon Short Line railway, in ills of Fleecer Mountain, in the Summit Mountain district, carrying circa the strike of a vein that was mined, circa 1890, by several shallow or silver-lead values. Country rock is granite, much similar to that , covered by a 1′ to 4′ wash, having a mineralized zone of about one- e width, carrying 4 veins, with a diorite dyke to the northward. Shal- and trenches show continuity of the veins, which are leached at sur- wing a little carbonate ore below commercial tenor.
elopment is by several old and shallow shafts, and by a new 2-com- t upraise shaft on the Linda claim, planned to be sunk to depth of by the Linda tunnel of circa 300′ length, latter showing a wide ledge a mineralized streak along the footwall, showing mainly pyrite, with gentiferous chalcopyrite and occasional carbonate stains, with a highly gangue. Property has yielded ore assaying 14 to 23% copper and 24 r per ton, with small gold values, also galena assaying 11% lead, 24 r and $1 gold per ton.
ipment includes a boiler, engine, hoist and air-compressor, adequate for the shaft to 500′, and the improvements include buildings. Property ed promising.

R CONSOLIDATED MINES CO. **COLORADO.**
e: 107 Boston Bldg., Denver, Colo. Mine office: Idaho Springs, eek Co., Colo. Fred S. Nye, superintendent. Mine carries gold and res, and has steam and air power. Property was under development ccounts.

Y CANYON MINING CO. **UTAH.**

Mine office: Wendendale, Yuma Co., Ariz. Developn
shaft, and equipment includes power drills. Company wa
carloads of good ore weekly, to El Paso smelter, circa May,

BOWYER GOLD & COPPER CO.

Office: Quartzite, Ariz. Mine office: Bouse, Yuma
McPeak, president; David Watson, vice-president; Jos. Bow
general manager; preceding officers, E. N. Jenkins and J
directors. Organized October, 1909, under laws of Arizona,
$5,000,000, shares $5 par. Lands, 6 claims, known as the S
the western slope of Dome Rock Mountains, about 10 mile
Property has a vein of 60′ estimated width, with schistose
stone footwall, carrying an iron gossan, opened for length
ore, mainly oxidized, assaying up to 7% copper and $2 gold
ment plans development by shaft.

BOYER-NEVADA COPPER CO.

Office: 508 Equitable Bldg., Denver, Colo. Mine office:
Co., Nev. Dr. Franklin R. Carpenter, president; H. R. Durk
Arthur Howe Carpenter, secretary and treasurer. Lands, 2
230′ tunnel. Property shows a leached zone carrying patch
oxidized ores said to give a general average assay of 12.68

Ures, Sonora, Mex. J. C. Pavia, chairman; preceding officer, A. Baker, . Wadham and Capt. M. W. Greite, directors; P. W. Jones, secretary. ed Nov. 30, 1907, under laws of Great Britain, with capitalization in 9,850 shares of £1 par and 3,000 founders shares of 1s par; issued, dinary shares and 2,761 founders shares. Company floated the Batuc opper Extension Syndicate, Ltd., and declared an interim dividend of r annum, October, 1908.

H-YUKON COPPER & SILVER MINING CO. **COLUMBIA.**

d. Lands, 3 claims, on Taku Inlet, were sold December, 1908, by re- for $50. Formerly at Atlin, Atlin district, B. C.

LYN BRIDGE MINING & MILLING CO. **MONTANA.**

e office: Clancey, Jefferson Co., Mont. J. Krueger, president; W. C. vice-president; W. E. Dufresne, secretary and treasurer. Lands, 15 3 patented, at the head of Lump Gulch, about 6 miles from Clancey. s about 2,000′ of development work, half of which is in shafts, deepest quipment includes a 150-h. p. boiler, 1,000′ Lidgerwood hoist and Davis rill.

OLME MINING SYNDICATE, LTD. **ENGLAND.**

ce and mine: The Thorn, Threlkeld, Cumberland, Eng. W. H. Bor- retary; preceding officer, J. W. Pattinson, J. S. Quirk, W. H. Borlase R. J. Hutchinson, J. P., directors. Organized Sept. 17, 1907, under laws t Britain, with capitalization £3,000, shares £1 par, in £1,000 preference 00 ordinary shares; issued, £812 preference and £1,000 ordinary shares, id. Property is lands carrying lead, zinc and copper. Presumably idle.

MINING CO. **MONTANA.**

ce: Wallace, Idaho. Mine office: Saltese, Missoula Co., Mont. Harry manager; James Burns, superintendent. Lands show auriferous and erous copper ore, developed by 2 tunnels, lower, of 900′ length, showing pper ore.

NBAR COPPER MINING SYNDICATE. **AUSTRALIA.**

d. The property, one mile south of the Goodrich mine, had a 120′ nd a little ore was sold to the Goodrich smelter. Formerly at Yeoval, ., Australia.

VISTA MINING CO. **MEXICO.**

ce: Pittsburg, Pa. Mine office: San Francisco del Mezquital, Durango, F. A. Ruttman, general manager. Property is La Buenavista copper d El Patrociño silver-lead mine. Development is mainly by tunnel.

AMP MINING CO. **WYOMING.**

e office: Hazelton, Johnson, Co., Wyo. F. A. Sparhawk, superintendent. how ores giving assay values in copper and gold. Equipment includes steam plant.

ON KING GOLD MINING CO. **COLORADO.**

ce: 19 Wabash Ave., Chicago, Ills. Mine office: Silverton, San Juan lo. Frank E. French, superintendent. Mine carries auriferous and ferous sulphides of lead, zinc and copper. Equipment includes an elec- nt. Company employed circa 15 men at last accounts.

FOREST COPPER & SILVER MINING CO. **MONTANA.**

ne office: Trout Creek, Sanders Co., Mont. J. L. Lee, Sr., president. sident and others were arrested, Sept. 21, 1909, for counterfeiting the States silver coinage.

IER BOY MINING CO. **WASHINGTON.**

ne office: Chesaw, Okanogan Co., Wash. Lands carry auriferous cop- s, slightly developed. Equipment includes a small steam plant.

-ALEX SCOTT COPPER CO. **MONTANA.**

ice: Palladio Bldg., *Duluth, Minn.* Mine office: Butte, Silver Bow Co.,

Lands include the Little Annie and Alex Scott clai
area 20 acres, lying between the Goldsmith and Little
west of Walkerville, is a silver property having old worl
ago, that include a 200′ incline shaft, with some drifti
is supposed to carry the northern branch of the Alice v
ing west, the Little Annie having the northern branch a
Alice company's westernmost claims. Idle some years

Principal property is the Alex. Scott, a fractional cl
adjoining the West Colusa mine of the Boston & Mor
Meaderville. Title to the Alex Scott is good, but there
litigation over apexes of the veins. The Alex Scott ca
strike of 4 veins, developed by a shaft of circa 1,400′ d
partments to depth of 900′, and three compartments
shows a vein carrying an 18″ paystreak of high grade
A vein carrying bornite was cut on the 1,000′ level. De
der way on the 1,000′ and 1,200′ levels, with drifting e
considerable good ore. Some ore was shipped, 1908, by
mont smelter, from the 600′ level, and was said to run
good gold and silver values. The Boston & Montana did
the Alex Scott shaft, for the purpose of reaching the fi
and Colusa mines.

Equipment includes a new Nordberg hoist, capable
from a depth of 3,000′. A boiler-house and compresso
1909, and the shaft has a 300-ton ore-bin.

The Little Annie is of problematical value, but t
small, is a decidedly valuable claim, being located in
triet, and surrounded on three sides by fine mines. T
unmercifully rigged, with results disastrous to the com
in April, 1909.

BUTTE-CARLISLE COPPER CO.

Office: 432 Manhattan Bldg., Duluth Minn. Mine of
Co., Mont. M. A. Ryan, president; Chas. Bergson, vice-p
pel, secretary; Edw. Lynch, treasurer; preceding officer
directors. Organized 1908, with capitalization $1,100,000

veloping an 8′ vein giving ore assaying up to 6% copper and 38 oz. r ton. A small vein on the Mammoth claim has given ore assaying per, 125 oz. silver and $6 gold per ton. Property is said to have, on s, 1,700 tons of low grade ore, worth about $6 per ton. Equipment two 80-h. p. boilers. Idle.

& VERDE GOLD & COPPER CO. **ARIZONA.**

and mine: Jerome, Yavapai Co., Ariz. Organized circa April, 1909, italization $1,500,000, shares $1 par. Lands, 10 claims, near Allen having a 200′ tunnel, said to show a 4′ vein of sulphide copper ore.

MINING & SMELTING CO. **WASHINGTON.**

office: Keller, Ferry Co., Wash. Property carries argentiferous cop- and has steam power. Was under development with a small force at unts.

COPPER CO. **ARIZONA.**

: 708 Lonsdale Bldg., Duluth, Minn. Mine office: Miami, Gila Co., . A. Eaton, president; H. B. Fryberger, vice-president; A. O. Rabideau, ; Geo. H. Mance, treasurer; C. W. Pritchett, consulting engineer; T. lton, superintendent; John L. McIver, foreman; W. H. Hamilton, mas- anic. Employs circa 75 men. Organized August, 1909, under laws of a, with capitalization $5,000,000, shares $5 par. Company was floated ver the property of the Cactus Development Co., and it is probable 500,000 shares of the Cactus Development Co. will be retired by an for an equal number of shares of the Cactus Copper Co., and that ers of the development company will be given prior rights to subscribe sues of treasury stock of the Cactus Copper Co., now planned to be from time to time, as further funds are required for development and t.

s originally were 33 claims, area circa 600 acres, and now are 38 rea circa 750 acres, in process of patenting, on Lower Pinto Creek, in rn part of the Globe district, 4 to 5 miles southwest of Miami. Lands principal groups, held under bonds and leases aggregating $415,000, of 0,000 was paid on organization, leaving $395,000 due on bonds, payable nstallments over a 7-year period, expiring 1916. The Pinto group, 9 held under bond from the Pinto Creek Copper Mining Co., and, in e with agreement, 51% of the stock of the Pinto Creek Copper Min- was delivered, October, 1909, to the Cactus Development Co., in con n of the sinking of the Hamilton shaft to a depth of 500′. Lands also 4 claims, a 15-acre mill site and 100 acres of timber lands, formerly s the McNelly-Crowley group, taken over from the Arizona National o., also various individual claims.

property shows a formation markedly similar to that of the Miami, even better surface showing of iron stains. The property carries an highly altered schist, surrounded by areas of intrusive and extrusive rocks, similar to the holdings of the Miami and Inspiration mines, 4 t, and the schistose areas of the Cactus and Miami district undoubtedly tinuous, at some ancient period, until divided by intrusions of igneous d subsequent erosion. The schist is very old, extensively metamor- nd apparently is of sedimentary origin. The schist is fractured and , affording a basis of subsequent mineralization through forming in- le cracks and crevices, there being an enormous area of coarsely bree- hist, well suited for the circulation of mineral-bearing solutions and the n of ores. The property has 150 to 200 acres of schist area exposed, schist underlies a considerably larger area, the exposed area of schist heavy iron blossoms, with occasional copper stains from disseminated

hand until the installation of an air-compressor, Augu
was sunk in remarkably short time. In the Hamilton
evidence to a depth of about 210′, succeeded by carbo
may prove workable, though the lower grade carbona
process of wet concentration, necessary in treating l
Primary sulphides were encountered at depth of 275′, a
the shaft penetrated highly altered schist, showing co
many seams of chalcocite up to an inch or more in thic
of the schist. At 385′, the shaft entered a fault-zone,
strong seepage of water. Below this point the shaft s
commercial tenor, which was expected, as the shaft w
ently was the southern boundary of the payable ore.

Laterals are being opened from the Hamilton shaf
500′ levels, but it is difficult to term these either cros
reason that the ore occurs in the country-rock itself,
found to underly scores and possibly hundreds of acre
northward, on the 3 levels of the Hamilton shaft, may
present, for the reason that they are driving toward an
Owing to the fault which throws the formation to the n
cuts must go increasing distances, with depth, to reach
The 300′ level of the Hamilton shaft is the first to b
rock not carrying commercial values at a point where
have to be opened. The eastern drift on the 300′ level p
of high grade carbonate ore, which could be smelted to
mine, as a whole, is planned to work the disseminated
centration will not permit the saving of low grade oxid
duction necessarily to sulphide ores, and to such of the
ores as can be smelted direct, without concentration.

On Nov. 15, 1909, five crosscuts on the 300′ level
seminated chalcocite of payable tenor, assaying up to
probably is above the average that may be expected thro
same time 2 crosscuts on the 400′ level were breasted
sulphide ore, while the drifts on the 500′ level had not y
zone. Development is by 6 drifts, at 200′ intervals, 3 on
on all 3 levels. Ore development is to be in blocks of 20
100′ in depth, giving block contents of 4,000,000 cubic fe

uipment includes three 100-h. p. boilers and a 12x14" double-drum second-
Mine & Smelter Supply hoist at the Hamilton shaft, and a single drum
t the Pinto shaft, a steam-line running from the Hamilton to the Pinto
Buildings include necessary mine structures and a number of dwellings
oins for workmen. A 3-mile wagon road connects the property with the
oad at the Live Oak mine.

is planned to operate the mine on a modification of the caving and mill-
tem. As developed the Cactus ores should run from 500,000 to 1,000,000
r acre of area, in the workable zone, and it is impossible to predict the
workable ore, though the property has excellent prospects of finding ore
t least 150 acres, judging from surface conditions, with chance of finding
ore in the schist where overlaid by other rocks. Assays secured have
from 0.2% copper, from dense country-rock, up to 40% from small
of rich ore. While some of the drift crosscuts on the 300' and 400'
are breasted in 4% sulphide ore, it would be much safer to estimate the
e tenor of ore to be developed as materially lower, and if the average is
o that of the Miami, 2.75%, which seems reasonable to infer, the Cactus
make one of the largest copper mines of the world. As yet the mine has
tle ore blocked out, but excellent progress has been made in a year, and
occurrence and system of mining are such that, beginning with 1910, ore
be blocked out rapidly. Management is excellent and the property is
very exceptional promise.

VERAS COPPER CO. **CALIFORNIA.**

lice: care of Mines Vending Co., Postal Telegraph Bldg., Chicago, Ills.
office: Copperopolis, Calaveras Co., Cal. Organized circa September,
nder laws of Delaware, with capitalization $5,000,000, shares $1 par.
ny is said to plan a 5-year bond issue of $450,000, at 6%.

nds, 1,700 acres, including the Union, Keystone and Empire mines, also
ns adjoining the Alto, in Del Norte County, California. Property was
, 1909, of Union Copper Mining Co. Mines, opened 1861, were consider-
roducers, paying fair dividends, circa 1861-1866. Formation is a black
is slate, in amphibolite schists, this belt running from Tuolumne County,
south, through Calaveras into Amador County, on the north. The slate
to 40' wide, with strike of 30° East of South, and dip of 30° East. Ore
as lenses of 15' average width, connected by stringers, main lense being
0' wide and 600' long. The alteration zone, circa 30' in depth only, car-
ich oxides and carbonates, and some native copper, below which occurs
pyrite, carrying neither gold nor silver, and unusually free from arsenic,
ony, bismuth and other undesirable elements, blister copper therefrom
g good wire-bars, without electrolytic refining. Product is classified as
ng ore of 10 to 11% copper tenor, and as leaching ore carrying 5 to 5.5%
r.

Main shaft, 60', is bottomed in a 15' lense of medium-grade ore, and the
has a mile of openings in ore. Equipment includes a hoist and pumps,
necessary mine buildings. There is a 100-ton Orford smelter, installed
Operations were confined, for many years, to producing cement copper
aching the old dumps, which are extensive. The old workings were
ed out and retimbered, a 90' steel gallows-frame built over the main shaft,
he smelter overhauled, 1905-1906. A survey has been made for a 12-mile
ay, to connect with the Southern Pacific, at Milton. Mine was closed
, June, 1907, and remained idle till taken over by present company.

CONSOLIDATED MINING CO. **UTAH.**

ice: Houghton, Mich. Mine office: Eureka, Juab Co., Utah. Walter president and general manager; Frederick W. Denton, first vice-presi- ohn R. Van Evera, second vice-president; William P. Seager, secretary easurer; preceding officers, J. H. Rice, Murray M. Duncan and A. B. directors; Cecil A. Fitch, superintendent; Walter Fitch, Jr., engineer. zed Feb. 16, 1909, under laws of Arizona, with capitalization $1,000,000, $1 par; issued, $810,000, Houghton National Bank, registrar. Of the ization, $500,000 went to the American Mines Syndicate for lands, and shares were issued at par. Shares are listed on the Boston Curb. meeting, third Tuesday in February. Is controlled, through half owner- y American Mines Syndicate, and controls, through majority stock owner- he Eureka City Mining Co., organized to secure mineral rights under the te of Eureka. Is absorbing the Little Chief Mining Co. through exchange share of Chief Consolidated for 3 shares of Little Chief.

nds, circa 400 acres, including 11 claims controlled directly, and through ship of shares in Eureka City Mining Co. and Little Chief Mining Co. claims are patented, with no adverses on balance. Property includes old gs of the Little Chief, 3 claims owned outright and 5 claims held under),000 bond and lease, also the Granite claim, bought for $30,000, and an ded half-interest in the American Star and Blackbird claims, bought for 0, the other half-interest in latter claims being owned by the Tintic Co. Property is the largest in the Tintic district, and is well located, ing the Eagle & Blue Bell on the north and east.

he property carries about 4,000' of the strike of the Victoria ore channel,

1,800′, and drift from the bottom to the territory under the trolled through the Eureka City Mining Co.

Equipment includes a 200-h. p. steam plant, with a ge hoist good for 1,700′ depth, and a 10-drill air-compressor. boiler and engine-house, assay office and sorting and shippin

Ore was discovered March, 1909, and to Oct. 31, 1909, tons, derived exclusively from development work. Of this was silver-lead ore, yielding a profit, after deducting all ton, balance of shipments consisting of silver ore that $4.350 above all expenses. This showing by a purely devel most unusual, and highly satisfactory. Management is exc considered exceptionally promising.

JUAN K. CHILD y CA.

Dead. Was succeeded, 1905, by J. K. Child & Co., Ltd Coro, La Paz, Bolivia.

CHINESE MINING EXPLORATION CO.

Mine and smelter office: Chang-Sha, Ho-Nan, China general manager. Is owned and managed by the governme present, is on lead ore, but the property includes promisi which it is planned to develop later.

CHINO COPPER CO.

Office: 87 Milk St., Boston, Mass. Mine office: San N. M. Charles M. NacNeill, president; Daniel C. Jacklin A. Chester, Beatty, consulting engineer; preceding officers and Col. Charles Hayden, executive committee; preceding o rose, W. Hinkle Smith, J. G. Hopkins, Henry M. Whitne Foss, Berthold Hochschild and Samuel Sloan, directors; E. I Keith Stewart, treasurer; Kurnal R. Babbitt, general coun superintendent. Organized circa August, 1909, under la capitalization $3,500,000, shares $5 par. Charter contains 2 years company must not increase its capitalization, incu nor have other liabilities in excess of $1,000,000. Company of the capital stock of the Santa Rita Mining Co. Of 425,000 shares were outstanding and 275,000 shares in the t 1909. Company began business with $250,000 in cash. Is c management and ownership, with the Utah Copper Co., Ra

g country rocks of two types, one being a quartz-diorite and the other
le-porphyry. Diorite forms practically all of the rim of the basin on the
orth and west, dipping in a generally southeastern direction, under the
ve flows which constitute the south and southeast rims. The sedi-
ies consist of a quartzite bed overlying a series of impure limestones.
desite-porphyry is a later intrusion than the diorite, cutting both diorite
he sedimentaries, and the ore bodies are associated with andesite-
ry, both intrusives and sedimentaries having been much shattered, giving
onditions for secondary enrichment. The old workings, very irregular
racter, have developed considerable high grade ore, and include No. 8
with two compartments, 214' deep, carrying stopes on 8 drifts, No. 9, a
mpartment shaft, started 1906, also No. 10, started 1907. Plans of the
t management are much more ambitious than those of the former owners,
ll for the development of an enormous quantity of low grade country-
re, which apparently occurs in a crescent-shaped belt some 7,000' in
, the property showing about 250 acres of lands that apparently should
low grade ore bodies available for development. The property is being
by 8 churn drills, boring holes at 100' intervals, checkerboard fashion.
rst 100 holes were drilled to an average depth of 263', and, of this num-
holes penetrated ore, and 21 were drilled in ore below commercial tenor,
ing developed at an average depth of 167'. The property has been divided
main ore zones, of which the Romero, Montoyo and Chino zones are ex-
to be mined opencast, by steam shovel, while the Hearst, Texas Flat
Thim Hill ore bodies are expected to be mined by the caving system,
ive of the Texas Flat section, where the ore lies very deep, early drilling
d a barren capping averaging 60' in depth, succeeded by an average of
ore. The company is developing 1,000,000 to 1,500,000 tons of ore
ly, and has about 10,000,000 tons of ore proven, estimated to average
2.5% copper. The property shows a great variety of ores, ranging from
copper to low grade sulphides, latter being expected to develop the
pal ore values, but, judging from past and present development, there
be a considerable amount of high grade ore, which will serve as a
ner for the low grade disseminated ores, and the old dumps contain
150,000 tons of ore, of about 2% estimated average copper tenor, hereto-
nworkable, but which easily can be milled at a profit with a large modern
ntrator specially planned for the treatment of low grade disseminated sul-
s.

Equipment includes a 125-ton concentrator and sampling mill, built by
s, and a test of the disseminated ore made by the present management
a concentration of about 12½ into 1, with recovery of 90 to 95% of
values, or 24 lbs. fine copper per ton, and, judging from tests in the
imental mill, a concentrator built especially to treat this ore should make
ction of about 70%. Management is said to plan using the underflow
ater along Lone Mountain draw for milling purposes. Estimated cost of
ed copper is about 9 cents per lb. The property is exceptionally promis-
and is in the hands of the capable men who have been the pioneers in the
essful development of low grade country-rock copper mines.

Office: P. O. Box 1374, Denver, Colo. Mine office: Yankee, Clear Creek Colo. Henry I. Seeman, president and general manager; Frank R. Baker, president; William H. Warinner, secretary. Organized Nov. 7, 1905, under of Colorado, with capitalization $5,000,000, shares $1 par; issued, $4,000,000. any reported, Aug. 31, 1908, having $24,531.17 cash on hand, without ed liabilities.

Lands, 171 claims, area upwards of 2,000 acres, partly patented, also about acres in mill and smelter sites, in the Lincoln district. Country rocks are s, schist and granite, with porphyry dykes, carrying fissure veins with tzite gangue, property showing about 75 veins, with reported width of 3′ 0′, said to be traceable 4 miles. Ores, which are sulphide, are reported by any to average 2 to 14% copper, 5 to 40% lead, 1 to 3% zinc, 1 to 3 oz. and $5 to $500 gold per ton. Development is by shafts of 200′, 235′ 175′, with numerous shallow shafts, and by numerous tunnels of 100′ and rds, three longest being 800′, 1,500′ and 2,200′, latter, known as the Seeman cut tunnel, 8x8′ in size, being planned to give a 5,000′ back. The mine bout 3 miles of workings, estimated to show 500,000 tons of ore blocked

Equipment includes a 25-h. p. hoist, 6-drill Sullivan air-compressor, air and ric drills. Buildings include a 30x50′ machine shop, hotel, 3 boarding s and 12 dwellings. The mill, 50x150′, of wood, with iron roof and siding, tons daily capacity, has 12 quick-drop gravity stamps, one Blake crusher,

COPPERSMITH MINING & MILLING CO.

Office: 107 Second St., Moscow, Idaho. Mine office: Co., Mont. F. W. E. Schmitz, president and general m Merwin, secretary; Benton S. Merwin, assistant secretary; mine superintendent. Organized January, 1909, with capit shares $1 par.

Lands, 8 claims, unpatented, area 160 acres, in 2 group smith group of 6 claims and the Inverness group of 2 claim and millsite, about 6 miles up Petty creek from Lothrop. P good timber. The Coppersmith claim is said to have b and located by John C. Frémont, then a lieutenant in the re to the American Civil War. Property shows 3 main veins, over 100′ wide at outcrop and traceable 1,200′, giving ore copper. The Exty vein, 500′ from and parallel with the Cop as 15′ wide, and the Inverness vein, about 4′ wide, in sla high grade copper ore with talcose gangue. Development cuts, prospect holes and 2 tunnels, lower reported by compa be 67′ long, in ore below commercial grade, but ore ex gets under the iron capping, circa 300′ further.

COPPER WORLD MINING CO.

Mine office: Jerome, Yavapai Co., Ariz. Property was with a small force, at last accounts.

CORBIN-CLANCEY CREEK MINING CO.

Office: Butte, Mont. Mine office: Corbin, Jefferson Gensberger, manager; Capt. W. C. Hosking, superintende June, 1909, under laws of Montana, with capitalization $10 Lands, 2 claims, on Gregory Gulch, west of and adjoining Development is by an old 700′ tunnel, and management p tunnel on the Minnesota vein.

CORBIN COPPER CO.

Office: 60 Congress St., Boston, Mass. Mine office: C Mont. Employs circa 50 men. Stephen R. Dow, presiden wards, general manager; Alvin R. Bailey, secretary and t officers, George E. Learnard, Noah W. Jordan and David Quinn Crowley, superintendent. Organized January, 1909, u gan, with capitalization $3,750,000, shares $25 par. Ann

are reported to carry 10 different leads, including the north lead, out-
ng for circa 3 miles on the company's property. Property shows a sys-
5 parallel leads in a cross-section of 600′ to 800′, with practically east
est strike, estimated to average about 20′ each in width, crossed by a
al vein, with an intrusive rhyolite 1,000′ to 2,000′ wide.
evelopment includes a shallow shaft, left by former owners, but new work
tunnels. Main tunnel is planned to give a back of 1,723′. Tunnels are
as the Kathleen, Dewey, Bonanza, Rosalie and Anna. The Dewey tun-
hich cuts the vein diagonally, was 600′ long September, 1909, in a vein
ut 12′ estimated average width, carrying copper ore of 5% estimated
e tenor, with lead and silver values. The Bonanza tunnel is 210′ verti-
below the Dewey, and the Rosalie tunnel is 610′ vertically below the
. On the Bahkaama claim a 6′ fissure vein in granite was cut August,
carrying a 6″ paystreak of high grade bornite and chalcopyrite, with
e of ore of concentrating grade. Work has been pushed systematically,
nnels are being driven at the rate of about 200′ each per month. Dur-
e first 5 months of operation 3,042′ of development work was done, of
2,430′ was in ore and 612′ was in crosscuts, and mine is being opened
of about a quarter-mile monthly.
roperty has a good machinery equipment, with necessary mine buildings,
s developed ore of fair grade at a number of different points.

Office: 707 Lonsdale Bldg., Duluth, Minn. M Mex. Geo. H. Mance, president; Geo. H. Crosb McLeod, secretary; Will C. Brown, treasurer; C Bennett, superintendent. Organized February $500,000, shares $10 par; issued, $300,000.

Lands, 370 acres, in 5 groups, including 4 id and the Monte Cristo silver mine. Four group Monte Cristo is held under a $200,000 bond an been paid, bond running for 3 years, with prov returns applies on purchase price.

The Azurite group, area 14 hectares, betwee and the Lampazos silver-lead mine, shows at su streak carrying carbonate ore assaying upward gold and silver values.

The Caballo de Fierro copper group, area Mountains, 16 miles east and south of Nacoza specular and magnetic iron, carrying considerabl at surface.

La Concha copper group, area 22 hectares, 6 miles west of the Southern Pacific line, now b 4′ to 10′ width, in porphyry, outcropping for argentiferous copper ore, and small shipments of by former owners in the past.

The Idaho group, area 26 hectares, and the 29 hectares, are adjoining properties, 14 miles s contact ore body between limestone and porphyr showing ore giving average assays of 14% lead

The Monte Cristo mine, area circa 300 acre was opened October, 1903, and, operated in nati 132′ level, upwards of 1,300,000 oz. of silver, the management giving smelter returns averaging a ton. The vein, of 4′ to 5′ average width, dips at in the upper levels, but holds ore values unchang of the present workings. There are about 2,000 incline shafts and a short tunnel, and present partment shaft, January, 1909, this being vert following the dip of the vein to the present d showing in the bottom. The ore contains much galena, and carries magnificent specimens of n native silver, ranging in value up to 1,300 oz. silv under present management, to Nov. 15, 1909, wa smelter returns of better than $11,000 per ca

ds of $12,000, and the mine has in sight 7 to 10 carloads of similar ore. he Southern Pacific railway extension, building from Nacozari south, reach the Monte Cristo mine eventually, but, owing to the extremely grade of ore produced, present transportation charges by pack train are serious adverse factor. Equipment includes a 40-h. p. boiler and hoist. gement is good, and property is exceptionally valuable, and is now earning rate of about 10% on the total capitalization, only 60% of which is

TH-PACIFIC COPPER CO. **WASHINGTON.**

ffice: Duluth, Minn. Mine office: Chelan, Chelan Co., Wash. A. C. ack, president; A. Keller, vice-president; Louis Hammel, treasurer; H. nn, secretary; preceding officers, W. L. Devine, A. H. Grieser and J. D. bell, directors; Arthur C. Fox, superintendent; Victor L. Rakowsky, con- g engineer. Organized 1909, under laws of Arizona, with 500,000 shares. al meeting, second Tuesday in June.

ands, 12 claims, including the Copper Glance and Copper Goat groups, of ms each, 1½ miles apart, well timbered and watered, 25 miles from a ad, with good wagon roads 5 and 8 miles distant respectively, in the t Stewart district, Wenatchee Mountains. Lands carrying fissure veins in otite, and contact deposits between gabbro and peridotite, and are said to an 18" vein of chalcocite and bornite, averaging 35 to 40% copper, with and silver values. Development is by a crosscut tunnel. Equipment les an air-compressor.

UTH & SONORA MINING CO. **MEXICO.**

)ffice: 606 Sellwood Bldg., Duluth, Minn. Mine office: La Cananea, Arizpe, a, Mex. James W. Norton, president and treasurer; A. E. Purden, vice- dent; Bernard Silberstein, second vice-president; Wm. B. Underhill, secre- Organized December, 1908, under laws of Minnesota, with capitalization 0,000, shares $10 par. Absorbed the Calumet & Sonora Mining Co., giving corporation 120,000 shares for its properties, and also absorbed the South nea Copper Mining Co., S. A., which was the Mexican incorporation of the sylvania & Cananea Copper Co., giving 120,000 shares to latter, leaving 0 shares in the treasury.

Lands are said to be circa 4,500 acres. Lands taken over from the South nea were 587 hectares, including the Collins group of 305 hectares, Arizpe p of 40 hectares, Homestead group of 60 hectares, Last Chance group of ctares and Gladys group of 150 hectares, latter adjoining the Massey mine ie Greene Cananea and supposed to carry the extension of the Massey ore of the latter, the bulk of the South Cananea lands being 3 to 4 miles south ie Oversight mine of the Greene Cananea. The Collins group has a 250' t.

Lands taken over from the Calumet & Sonora Mining Co. include the ia Vista group of 306 acres, Catalina group of 630 acres, on which the prin- l developments are located, and the Ronquillo-Duluth group of 210 acres. Buena Vista group, near the Greene Cananea, has the 100' Underhill shaft, Norton shaft, and a 552' crosscut tunnel showing a vein of 57' width, ying sulphide ores with talcose gangue assaying 1.25 to 1.75% in copper r, which is below commercial grade. The Catalina has 2 old shafts, of 75' depth each, and a new 205' shaft, with about 900' of workings, showing from surface of fair average grade. A 16-ton test shipment from the Cata- workings returned 3.64% copper, 53% lead, 113 oz. silver and $20 gold ton.

The Catalina group has a 150-h. p. machinery plant. Property considered ising.

DUNKIRK MINE.

Owned by Castle Copper Co., at Prescott, Y

DUQUESNE MINING CO.

Mine office: Globe, Gila Co., Ariz. John F Edw. S. Strawcutter, vice-president; T. A. Lukh in Gold Gulch, about 15 miles from Globe. Old a 50′ shaft on the East End claim, showing ore and $4 gold per ton, also 3 short tunnels, givi gold. Equipment includes necessary mine buil ing a 500′ shaft and crosscutting from the botto shaft.

ña de Cobre, Esperanza and other claims. Presumably idle.

KA CITY MINING CO. **UTAH.**
ine office: Eureka, Juab Co., Utah. Walter Fitch, president. Organized
with capitalization $1,000,000, shares $1 par. Is controlled by Chief
lidated Mining Co., which took $510,000 of the capital stock, under agree-
with the company to furnish funds for development work, as needed, in
t not to exceed $100,000. The Chief Consolidated turned over to the
a City Mining Co. its option on 3 claims covering part of the townsite of
a. Balance of shares are to be turned over, as necessary, to owners of
state in the city of Eureka, in exchange for deeds covering their mineral
, with the provision that no mining shall be done nearer surface than 700′.
is being given to owners of lots on the basis of about 1,000 shares per
The Chief Consolidated owned options on 3 claims, covering a large part
townsite, which the government decided was not mineral land, though it
nly is. This tract is to be developed from the 1,800′ level of the Chief
lidated, through a main drift to be driven northward. The plan followed
nizes conflicting interests, and renders available for development a val-
property heretofore impossible to work. Management is excellent and
ty decidedly promising.

KA COPPER MINING CO. **ALASKA.**
ffice: Los Angeles, Cal. A. L. Bergen, president; Mrs. M. F. Roberts,
ary; E. L. Terry, director. Capitalization, 300,000 shares. Lands sup-
y are in Alaska. The president and secretary were arrested, Oct. 2, 1909,
rious charges of embezzlement, preferred by one Terry, a director, who
s that Bergen held 190,000 shares of capital stock, and that his books
ted serious discrepancies in the accounts. The charge against Mrs.
ts was that as secretary she entered the sale of $150 worth of stock at
90, and retained $60 for her own use and benefit. The answer of the
ent was that he owns one-half of the capital stock, and that he had sold
shares of individual stock at reduced prices, claiming that the company
him $2,500, and that his arrest was due to spitework. Apparently the

president and secretary sold their own stoc
pany was endeavoring to sell stock. Is not

Lands, 8 claims, on the Little North on which development was begun early 1909.

NIBAL CONSOLIDATED MINING CO. **UTAH.**

ffice: Provo, Utah. Mine office: Silver City, Juab Co., Utah. John lmeyer, president; John M. Bestelmeyer, vice-president; H. C. Hicks, sec- y and treasurer. Organized circa September, 1909, under laws of Utah, capitalization $100,000, shares 10 cents par.

DSHELL-FLUX MINING & DEVELOPING CO. **ARIZONA.**

ffice: Tucson, Ariz. Mine office: Patagonia, Santa Cruz Co., Ariz. Heney, president; R. R. Richardson, vice-president; W. E. Francis, secre- and treasurer; Frederic John Siebert, consulting engineer; Francis J. y, counsel; J. C. Hartness, general manager. Lands, circa 30 claims, in the etto district, on the southerly slope of the Patagonia Mountains, 6 to 9 from Patagonia, including the Flux, Hardshell and Three R mines, formerly by Col. Wm. C. Greene, who was unable to meet the final payment. rty as a whole has about 800′ of workings. The Three R mine has tunnels gating about 400′ length, showing a large body of disseminated chalcopy- estimated to average 3 to 4% in copper tenor. Ore values, as a whole, ainly in silver, with some lead, copper and gold.

KLA COPPER SYNDICATE. **AUSTRALIA.**

Mine office: Irvinebank, Queensland, Australia. Wm. Swan, manager. rty, showing copper ore, was undergoing development, with a small force, t accounts.

LA CONSOLIDATED MINES CO. **WYOMING.**

ffice: 1624 Curtis St., Denver, Colo. Mine office: Hecla, Laramie Co., Henry Schwartz, president; A. E. Keller, secretary; Eli Miller, treasurer; ding officers, Henry Hirsch and Wm. L. Wilson, directors. Organized circa under laws of Wyoming, with capitalization $1,000,000, shares $1 par, as a er of the Hecla Mining Co., Amalgamated Copper Mining & Extraction Co. Kopper Krown Mining Co.

The Hecla group, 13 claims, 2 patented, and a 35-acre townsite, is in the Crown district, 4 miles from Granite Canon, on the Union Pacific rail- and 7 miles from the Cheyenne Northern line. This group is claimed to 16 fissure veins, of 8′ average width, in schist and granite, of which 3, average claimed width, are claimed to be under development, and are ed to carry oxidized and sulphide ores claimed to give average assays of opper, 3 oz. silver and $12 gold per ton, in addition to which they are ed to carry estimated values of $10 to $12 per ton in nickel, platinum and um, which values apparently are something more than doubtful. Develop- at last accounts, was by a 60′ tunnel and 14 pits and shafts, of 10′ to 140′

depth. The Hecla group made an ore shipment, previous to September, 1909, to the Boston & Colorado smelter, but the president reports company unable to continue production owing to lack of capital, but management hopes to have plenty of money soon.

The Teddy Roosevelt-Good Hope group, formerly held by the Amalgamated Copper Mining & Extraction Co., is either 10 claims, area 200 acres, or 11 claims, area 220 acres, in the Silver Crown district, 2 miles from the Union Pacific railway and 23 miles from Cheyenne, said to have about 700′ of workings, said to show ore giving fair assays in copper.

The Kopper Krown group, circa 2 miles southwest of Hecla and 22 miles west of Cheyenne, apparently is 7 claims, area 140 acres, and not 154 acres, as claimed by company, having 413′ of workings, claimed to show 10,000 tons of sulphide ore blocked out for stoping.

The Hecla mill, 80x100′ in size, has 15 stamps, a 50-ton concentrating plant and a leaching plant. The Ohly process was installed by the present management under a former organization, in an attempt to save the rare metals, but was not a success. Ore, which is mainly low in grade, is only in part adapted to concentration, and the mill requires overhauling and adaptation to the ore.

The management of the Hecla Mining Co. and the preceding corporations, which also had Mr. Schwartz as president and general manager, peddled "guaranteed" stock, claiming that 5% interest was guaranteed for 3 years on the stock investment by United States government bonds, but nobody seems to have seen the bonds. The old Kopper Krown Mining Co. advertised that it planned building a smelter, and was ready to ship on a moment's notice, but seems to have failed to receive the notice. Prospectus of the present company states that it is "one of the most substantial, conservative and successful mining organizations in the entire west," which is a rather remarkable claim, considering the history made in the past. Because of the bad record of preceding companies merged in this corporation, and operated formerly under the same management, this company is regarded with much suspicion.

HEFFERN MINING CO. ARIZONA.

Mine office: Courtland, Cochise Co., Ariz. Albert Heffern, president. Lands, 200 claims, in the Swisshelm Mountains, circa 25 miles south of Courtland and 20 miles north of Douglas. Property shows auriferous and argentiferous chalcopyrite, with occasional bornite, having quartz gangue, and carries some native gold. Development is by a 475′ two-compartment shaft. Equipment includes a 45-h. p. boiler and hoist. Employs circa 50 men, and is developing systematically, with fair prospects.

HENDERSON'S TRANSVAAL ESTATES. TRANSVAAL.

Mine office: Berkenrode, Zoutpansberg, Transvaal. Property is in the vicinity of the Messina mine, and development on a copper deposit was begun circa July, 1909.

HENRIETTA MINING & MILLING CO. COLORADO.

Office: Ernest & Cranmer Bldg., Denver, Colo. Mine office: Silverton, San Juan Co., Colo. E. C. Drew, president; Geo. H. Craft, secretary and general manager. Circa September, 1909, company bought, at sheriff's sale, the property of the San Juan Smelting & Refining Co.

Lands, circa 40 claims, 10 patented, including a millsite 1 mile below the Henrietta mine, in Prospect Basin, on the western side of Red Mountain, and in Picayune Gulch on Treasury Mountain, with some claims on Eureka Mountain, and 3 claims in Cinnamon Gulch, on the line of the Silverton, Gladstone & Northern railroad, 7 to 10 miles from Silverton. Part of the holdings were held under bond and lease by the Ross Mining & Milling Co. Principal property is the Henrietta mine, carrying auriferous and argentiferous copper ore, opened by a long crosscut tunnel, estimated, by the San Juan Smelting & Refining Co.,

ow circa 400,000 tons of ore of about $15 average value blocked out for action, which figures were much exaggerated. The Henrietta is said to occasional chutes of high grade smelting ores, up to 20 to 30% in cop- enor, with smelting ore averaging about 7% and milling ore about 3.5% in er tenor. Mine has 6,250′ of workings, including 4 tunnels, and manage- plans extending tunnel No. 10, the lowest, now 600′ long, to intersect the rietta vein at a distance of 1,200′ from the portal, with a back of about ′. No. 7 tunnel is about 2,200′ long. Property was idle for some years re purchase by present company.

Equipment includes gasoline and electric plants, latter taking current the Animas Power Co. A Trenton Iron Works aërial tram extends from railway siding to the portal of No. 7 tunnel.

CULES MINING CO. **BRITISH COLUMBIA.**

Mine office: Jedway, Queen Charlotte Island, B. C. Lands are in the nity of Awaya, Ikeda & Co., on Moresby Island. Presumably idle.

RMIDALE COPPER CO. **AUSTRALIA.**

Mine office: Hermidale, N. S. W., Australia. Organized circa August, , under laws of New South Wales, with capitalization £2,625, shares 1s. 6d. Company planned beginning prospecting, circa September, 1908.

SS-FARRIS MINERAL EXPLORATION CO. **MEXICO.**

Mine office: Chalchihuites, Sombrerete, Zacatecas, Mex. C. A. Phelps, erintendent. Property carries ores of copper and lead, and was working a small force at last accounts.

DALGO PLACER MINING CO. **MEXICO.**

Office: Washington, D. C. Mine office: Hidalgo del Parral, Chihuahua, c. Gen. L. T. Michener, president; J. Williams, superintendent. Property opper claims on the Conchos river, about 70 miles from Parral, said to show assaying up to 28% copper, at depth of 100′.

H GRADE SILVER & COPPER CO. **WASHINGTON.**

Mine office: Chewelah, Stevens Co., Wash. F. T. Hertzell, president and eral manager; L. E. Hertzell, vice-president; W. W. Dickson, secretary and asurer. Organized circa August, 1909. Property has a 110′ shaft, planned be deepened.

LDEBRAND & CO. **MEXICO.**

Office: Durango, Mex. Mine office: Bacis, San Dimas, Durango, Mex. perty is the Trinidad mine, at El Cobre, in the vicinity of Bacis, carrying iferous and argentiferous copper ore. Property has a 20-ton smelter, and tte is produced and shipped in small quantities.

LLSIDE CONSOLIDATED MINING CO. **ARIZONA.**

Office: Indianpolis, Ind. Mine office: Cherry, Yavapai Co., Ariz. John Tribby, Chas. W. Cheney and Chas. W. Green, directors. Organized circa ptember, 1909, under laws of Arizona, with capitalization $1,000,000, shares par. According to articles of association, 999,500 shares were to go to bby and his associates, in payment for the property, leaving $500 in stock the company's sole financial resources. Apparently company is a consolida- n of the Great Hillside Mining Co., Anabelle Mining Co. and Golden Idol ning Co. Lands, 19 claims in the Cherry Creek district. Presumably idle.

OLMWOOD COPPER CO. **AUSTRALIA.**

Mine office. Cowra, Bathurst Co., N. S. W., Australia. Lands, one-half le from a railway at Holmwood Station, and 5 miles northeast of Cowra, in e parish of Coota, show 4 copper veins in porphyry, with a 92′ shaft sunk rtically in the country rock to intercept the underlay. A vein of 12″ to 18″ dth contained bunches of ore assaying 8.22% copper, 3 dwts. 6 grains silver d 3 dwts. 6 grains gold per long ton. Production is reported at 60 long tons ore. Idle and apparently moribund.

HOMANZAN MINE.

Mine office: Adakaya-mura, Yatsuka-go owner and manager. The mine carries cop silver values. Equipment includes a 300-h. p. employs about 600 hands. Production, 1907,

HOPPER MINES CO.

Office: Prescott, Ariz. Mine office: C Stevens, president; S. S. Lindsay, vice-preside D. L. Williams, treasurer. Organized under tion $750,000, shares $1 par. Dead. Was reorganized as Mascota Copper Co. Formerly at Ameca, co, Mex.

IANA MINING CO. **CALIFORNIA.**

Office: 40 Currier Bldg., Los Angeles, Cal. Mine office: Needles, San ardino Co., Cal. Presumably idle.

IANA MINING CO. **MICHIGAN.**

Office: 60 Congress St., Boston, Mass. Operating office: Houghton, Mich. office: Rockland, Ontonagon Co., Mich. Stephen R. Dow, president; n R. Bailey, secretary and treasurer; Richard M. Edwards, superintendent. nized circa August, 1909, under laws of Michigan, with capitalization 0,000, shares $25 par; issued, $2,000,000; paid in, $8 per share. Company 60,000 shares to owners of lands for its property, and offered 36,000 es, August, 1909, for public subscription, and is supposed to have started ness with $128,000 cash.

Lands, 1,200 acres, bought 1909, from Indiana Copper Co., northeast of the Copper Co. and north of the North Lake, in Sections 21, 27 and 28, T. 50 R. 37 W. Property was worked on a small scale, previous to burning of mill, 864, but old workings are inaccessible, and no work was done on the southern part of the tract, in the horizon of the Lake amygdaloidal bed, which pposed to be carried by the Indiana. Diamond drilling was begun, August, , the overburden proving comparatively light, and first hole was drilled to Eastern sandstone. Property considered promising.

IAN CHIEF CONSOLIDATED MINING CO. **UTAH.**

Mine office: Newhouse, Beaver Co., Utah. Andrew Cochrane, president; P. Quinn, secretary and treasurer; preceding officers, Wm. Gray and Louis rane, directors. Organized January, 1909, under laws of Utah, with capiation $150,000, shares 10 cents par.

ICATOR MINING CO. **WYOMING.**

Office: Encampment, Carbon Co., Wyo. Property, on French Creek, is excepting for annual assessment work.

LENOOK MINING CO. **ARIZONA.**

Mine office: Prescott, Yavapai Co., Ariz. F. J. Price, president; L. S. rman, vice-president; C. C. Frost, secretary and treasurer. Organized circa , under laws of Arizona, with capitalization $3,000,000, shares $1 par. Lands, ut 320 acres, 35 miles from a railroad, on the Verde River, in the Square k district of the Black Hills, including both gold and copper claims, with e promising values on the latter. The gold mine has a 275′ tunnel and the per mine has a 150′ shaft and tunnel. Company has secured ore assaying o 40% copper, with some gold and silver.

LAND COPPER CO. **ARIZONA.**

Office: Commerce Bldg., Kansas City, Mo. Mine office: Planet, Yuma Co., z. Lands, circa 40 claims, including 2 groups of about 15 claims each, in Bill Williams range, near the Bill Williams Fork River, with a millsite, eltersite and water rights.

LAND COPPER CO. **IDAHO.**

Mine office: Troy, Latah Co., Idaho. Lands, 8 claims, east of Troy, having out 1,000′ of tunnels, showing, at depth of 160′, a 20′ vein, mainly oxidized, th streaks of rich ore assaying up to 27% copper.

TERNATIONAL CONSOLIDATED COPPER CO. **MEXICO.**

Office: Liberal, Kans. Mine office: Hermosillo, Sonora, Mex. Geo. M. Kerr, sident; O. C. Armstrong, secretary and treasurer. Organized circa 1907, der laws of Arizona, with capitalization $1,000,000, and is protocolized under

he completed plant, about 7,000 tons of structural steel, and the finished s will cost about $2,500,000. The general plan followed is much similar to of the Washoe works, though on a materially smaller scale, and the works planned on the unit system, so that they can be enlarged, when required, inimum expenditures of time, labor and money. The works were planned ve an initial capacity of 2,000 to 2,500 tons daily, but apparently will start a capacity of about 1,250 tons per diem only. Much of the material from ld Utah Consolidated smelter was used in constructing the new plant. The leted works will include a sampling-mill, power-house, calcining building 32 McDougall roasters, blast-furnace building, reverberatory furnace build- machine-shop, smithy, etc., with a 350′ brick smoke-stack on a concrete dation. It is planned to blow in the smelter circa Feb. 1, 1910, and the any has a 10-year smelting contract for handling the ore of the Utah olidated, effective March 1, 1910.

Ore will be brought from the Utah Consolidated at Bingham Canyon by a line aerial tram, but the matter of boring a 3½-mile tunnel through the tain is being given tentative consideration.

Company controls the Tooele Valley Railroad Co., having a 7-mile line ecting with the San Pedro, Los Angeles & Salt Lake railroad, and survey been made for an 18-mile line to connect with the same railroad near eld, giving a maximum grade of 1½%.

The Raritan works, on New York harbor, completed 1899, and since en- d, is one of the largest and most modern copper refining plants in the l, including a smelter and a mammoth electrolytic refinery. The smelter furnace buildings, with two 100-ton furnaces casting anodes in iron moulds mechanical conveyor, and two 150-ton casting furnaces for wire-bars and es.

The electrolytic refinery includes 2 tankhouses and a power house, con- d by 3′ concrete tunnels, power consumption being about 3,000 kilowatts, works having a capacity of about 1,000,000 lbs. finished copper daily. No. the old and No. 2 the new tankhouse, latter completed circa 1907. No. 1 house has 1,600 tanks, each holding 21 anodes and 21 cathodes, of size 6″, using a current of 5,000 amperes, with a cross-sectional area of only 5 re inches in the busbars.

No. 2 tankhouse is 150x184′ in size, having concrete foundations, with steel e and brick walls, special acid-proof Berlin brick being used for the base- floor. Permanent equipment includes 1,870,000 lbs. of lead, of which ,000 lbs. are in tank linings, and 881,000 pounds of copper divided as fol- : copper cathode rods, 186,000 lbs.; stripping plates, 122,000 lbs.; busbars connections, 170,000 lbs.; leads, etc., 100,000 lbs.; lead anode rods, 300,000 No. 2 tankhouse has 3 bays, running lengthwise, with two 10-ton 3-motor ting cranes in each bay, equipped with special devices for handling an e tankful of anodes or cathodes at one load. No. 2 tankhouse has 3 ric circuits, running lengthwise, one in each bay, each circuit of 396 tanks g handled from the powerhouse by an electric generator. Current is 7,500 eres, giving a current density of 20 amperes per square foot. Main con- or has a cross-sectional area of 12¾″. There are 1,188 depositing tanks, nged in 108 nests of 11 cells each, electrode arrangement being on the ker system, tanks being lined with 6-lb. lead, containing 4% antimony. e also are special tanks for rinsing the cathodes, after removal from de- ting tanks, and tanks for scrubbing slimes from scrap anodes, latter amount- to about 13% by weight. The works have special shears for trimming ode loops, and a Morrow loop machine for attaching copper lugs to the ode starting-sheets. Anodes are 28x36″ and cathodes are 30x37″, each having 24 anodes and 25 cathodes, spaced on 4⅝″ centers, cathodes re-

capitalization $1,000,000, shares $25 par; issued, $475,000, shares $6 paid.
Lands, circa 84,000 acres, including former holdings, 83,720 acres, of the
Royale Land Corporation, Ltd., and lands of the Island Mining Co., all on
island of Isle Royale, county of Isle Royale, Michigan. Holdings comprise
major portion of the area of this, the largest freshwater island of the globe.
siderable mining, of a rather desultory nature, has been done upon these
s at various periods in the past, and a limited production of copper secured
efrom. The Island Mining Co. and its predecessors did rather extensive
k on a conglomerate bed of the Keweenawan copper bearing belt, sinking
afts, one of which was said to be 1,000′ deep, with a fair showing at the
om of the mine, but work was suspended on this property in 1873. No
oratory or development work has been done on the island since 1892. Prop-
is idle, but is considered of great potential value.

n, Ltd., is owned by

Lands, circa 10,000 acres, mainly well wooded, near Lake Ladoga, carrying and copper ores. Mine, known as the Pitkäranta, opened circa 1820, was ed steadily until 1903, making an average annual production of about)00 lbs. fine copper during the last decade of operation, and was under the ership of the Russian Imperial Bank, which is practically the Russian rnment, from 1894 until taken over, 1908, by present company.

The property carries several ore bodies, but the one developed is a 15′ bed 'skarn,'' which is a granular mixture of augite, garnet and other ferro-nesian silicates, impregnated with chalcopyrite, in veinlets. This ore body, h dips to the south, at 40° to 50°, has been opened at intervals for a th of about 1½ miles. To the eastward the ore occurs as bunches, up to ral pounds in weight, and at this end of the workings the ore body is rated into 5 sections, the footwall bed, of about 70′ width, carrying finely eminated chalcopyrite in ''skarn,'' overlaid by a 2′ to 3′ layer of barren erial, followed in turn by 3′ of barren schist, succeeded by a cupriferous of about 20″ thickness, carrying somewhat argentiferous copper sulphides. company's lands also carry iron ore and are said to have indications of

The mine has a small smelter, and the company owns 3 steamers, known as Vulcan, Ludwig and Niemelin, and 10 barges. Property considered valu-

FORTUNA MINING CO. **MEXICO.**

Office: 315 Colorado Bldg., Washington, D. C. Mine office: Apartado 21, tlán, Oaxaca, Mex. C. E. Miller, president; Wm. H. Brown, first vice-sident; E. D. Stinson, second vice-president; Amos Tyree, secretary; Am-se Timberlake, treasurer; Wm. Nelson Brown, superintendent. Organized 6, under laws of South Dakota, with capitalization $250,000, shares $10 par. ds, 30 hectares, known as the Treadwell group, about 3 miles from Ocotlán one-half mile from the Oaxaca-Taviche branch of the Mexican Southern way. Property shows a well defined fissure vein of 2′ to 12′ width, stand-nearly vertically, cutting bedded andesite tuffs, and is greatly leached and dized to depth of 300′. Development is by a 400′ vertical shaft, with 600′ workings, and by two 100′ prospect shafts and 4 tunnels of 700′ aggregate gth. Workings show argentiferous chalcopyrite with quartz gangue, esti-ted by company to average 4.5% copper and 200 grams silver per metric . Some ore has been shipped returning 14% copper and 600 grams silver r metric ton. Company has been operating since 1906. Equipment includes 40-h. p. boiler, hoist and a small air-compressor for hammer drills. Property nsidered promising.

Lands are variously reported as 200 acres and as circa 00 acres. Property includes La Reina de Cobre mine, area circa 200 acres, out 7 miles east of El Plomo mine, in the foothills of the San Manuel Moun-ins, 30 miles northwest of Altar. Property is said to carry 6 well defined

ld. Equipment includes a hydro-electric power plant and air-compressor, roperty has a 100-ton concentrator.

RAL MINING CO. **UTAH.**

Dead. Was merged, 1903, in Butler-Liberal Consolidated Mining Co. erly at Bingham Canyon, Salt Lake Co., Utah.

GROUP MINING CO. **BRITISH COLUMBIA.**

Mine office: Jedway, Queen Charlotte Island, B. C. Property, on Moresby d of the Queen Charlotte group, is in the vicinity of Awaya, Ikeda & Co. mably idle.

MINING CO. **UTAH.**

Mine office: Eureka, Juab Co., Utah. Is controlled through ownership of hirds of stock issue, secured 1908, by Eureka Lily Mining Co.

T LODE MINING CO. **UTAH.**

Mine office: Bingham Canyon, Salt Lake Co., Utah. Chas. S. Jones, dent; W. J. Thomas, secretary and treasurer. Organized November, 1908, r laws of Utah, with capitalization $100,000, shares 10 cents par. Prop- is in the West Mountain district. Presumably idle.

LE BUTTE CONSOLIDATED MINES CO. **ARIZONA.**

Office: Phoenix, Ariz. Mine office: Bouse, Yuma Co., Ariz. Employs t 50 men. John W. Sharpe, president and general manager; David Shear, president; Homer B. King, secretary and treasurer; preceding officers, Geo. Halm and C. B. King, directors; Percy W. Sharpe, general manager; J. C. on, superintendent. Organized June 16, 1909, with capitalization 0,000, shares $1 par, as a reconstruction of the Little Butte Consolidated s Co., which was organized February, 1909, with capitalization $2,000,000, s $1 par.

Lands, in the Plomosa district, circa 4 miles northwest of Bouse, include Manipulator group of 9 claims, Sidetrack group of 6 claims, and an interest he Otis group of 20 claims, lying between the other holdings. Property s a vein of 6′ to 14′ reported width at surface, said to be wider at depth, ying considerable high grade ore, mainly chalcocite. The 272′ two-compart- t main shaft, on the Manipulator claim, has levels at 50′ and 120′, and e is a shallow incline shaft on the Little Butte claim. Equipment includes -h. p. hoist at the Little Butte shaft, which is to be deepened to 500′, and ld hoist at the new 2-compartment shaft being sunk 300′ east of the in- e shaft. Improvements include an assay office and 50-ton ore-bin, with a 0′ spur to the Arizona & California railway. Shipments, circa May, 1909, El Paso smelter, returned 13% copper and $9.70 gold per ton. Property sidered promising.

TLE CHIEF MINING & MILLING CO. **UTAH.**

Office and mine: Eureka, Juab Co., Utah. Jas. P. Driscoll, secretary. Is trolled, through ownership of majority of stock, by Chief Consolidated Min- Co., and is being absorbed by latter, through exchange of 1 share of Chief solidated for 3 shares of Little Chief, and is to be liquidated.

TLE MINT MINING CO. **MONTANA.**

Office: Wallace, Idaho. Mine office: Carter, Missoula Co., Mont. L. J. Jean, president; J. E. Gyde, secretary. Capitalization $1,500,000, shares par. Lands, 11 claims, 2½ miles from a railroad, showing 2 veins, of 25′ 30′ estimated average width on surface, carrying copper, silver and gold ues, associated with spathic iron. Has about 1,000′ of workings, with essary mine buildings, and, to end of 1908, had shipped 2 carloads of ore, urning about $30 per ton.

TTLE WONDER COPPER MINING CO. **AUSTRALIA.**

Mine office: Walcha, N. S. W., Australia. R. Rose, manager. Property s developing, with a small force, at last accounts.

fissure veins, in porphyry, giving ore assaying
per ton, and shows 2 principal veins, of which
done includes considerable trenching, and 2 s
include necessary mine buildings.

old Lake, which are developing by tunnel, and some ore has been shipped rom surface workings.

ONDON METAL BANKING CO., LTD. **AUSTRALIA.**

Office: 18 Fenchurch St., London, E. C., Eng. Mine office: Gulf Creek, ia Barraba, N. S. W., Australia. Hector Stewart, general manager; W. A. Vaite, mine superintendent; Robt. Schloesser, consulting engineer. Lands, 150 res, held under a 20-year lease, in the Barraba district, showing schist and artzite of early Silurian age, altered through basic intrusions, and indurated y-slate of Carboniferous age, with dykes of serpentine. Property shows 3 rallel veins, all under development, of 2′, 6′ and 38′ estimated average width, ceable 350′, originally carrying melaconite, azurite and malachite, which ve been worked out, and carrying, at depth, chalcopyrite in a matrix of 50% rite, 15% silica, 5% lime and 7% alumina. Development is by shafts of ′ and 370′, with 6,400′ of workings, estimated to show 66,000 long tons of blocked out for stoping.

Equipment includes a 25-h. p. steam plant, with 10-h. p. hoist, good for ′. The smelter, connected by a half-mile ground-tram with the mine, is of tons daily capacity, having two 15-ton reverberatory furnaces, turning out tte of 35% copper tenor. Equipment includes a small sawmill. Mine is ved by the Sydney to Barraba railroad, 22 miles distant. Production, 1901, s 560 long tons fine copper, from 9,400 tons of ore smelted, and in 1906 was a 70 tons fine copper, made from 2,400 long tons of ore smelted. Was specting and developing at last accounts.

RETTA MINING CO. **CALIFORNIA.**

Big Pine, Inyo Co., Cal. Wm. Eva, manager. Is controlled, through stock nership, by Chas. M. Schwab and the Gail Borden Estate. Mine has a 400′ ft, showing a 40′ vein said to average 4% copper. Improvements include mithy and several small mine buildings.

S BRONCES MINING CO. **MEXICO.**

Office: Phoenix, Ariz. Mine office: Santa Bárbara, Hidalgo, Chihuahua, x. B. W. McCausland, president; R. D. McCausland, secretary and man- er; Roy Chapman, mine superintendent. Lands, 24 hectares, including Los onces, La Esperanza and Kruger mines, carrying copper, lead, silver and ld values, developed by a 300′ main shaft, planned to be sunk to 500′. Has 25-h. p. steam hoist.

ST GULCH UNITED MINES CO. **ARIZONA.**

Office: 333 Monadnock Bldg., Chicago, Ills. Mine office: Black Warrior, la Co., Ariz. Employs circa 20 men. Jerry T. Harrington, president and neral manager; Will A. Childs, vice-president; W. Espy Curtis, treasurer; il McMillan, secretary; preceding officers and Hon. Beecher Powell, directors. pitalization $2,000,000, shares $1 par. Lands, 280 acres, in 3 contiguous oups, about 20 miles northwest of Black Warrior. The Badger and Kellner oups carry principally gold values, and the Cedar Tree group carries gold, ver, lead and copper values. Property is said to show several veins of 7′ to ′ width, and was said, August, 1908, to have secured ore assaying up to 9% pper and $100 gold per ton. Development is by a 700′ tunnel, on an ore body id to show high grade gold values at surface. Equipment includes two 80-h. p. ater-tube boilers and a 150-h. p. Corliss engine. A small stamp-mill, ft by former owners, was dismantled, and company is said to be building a ew 10-stamp mill. A test shipment of 12 tons, circa September, 1909, to El aso smelter, netted $211.10.

OST PACKER MINING & SMELTING CO. **IDAHO.**

Office: 1204-37 Wall St., New York, N. Y. Mine office: Ivers, Custer Co., daho. John T. Clarke, treasurer and managing director. Organized 1907, un- er laws of Wyoming, with capitalization $3,000,000, shares $5 par, as a hold-

ing company to gradually acquire the out
Mining Co. Company also plans acquiring
LOUISIANA & ARIZONA MINING CO.

$2.50 paid. The 15,000 full paid shares w
property, and the company has 35,000 sha
Calumet, registrar.

Lands, 53 claims, partly patented, are
owned in fee and partly held under option,
tion at Silver City, in the Burro Mountai

nes. Property includes the Porterfield group of 17 claims, area 340 acres, e Porterfield-Robinson group, Thompson group, Jackson group, Malachite oup, Lee group and 5 claims formerly held by the Azure Mining Co.

The properties show iron blossoms, carrying small quantities of copper bonates, and surface indications are almost identical with those at the rro Mountain and Chemung mines, where enormous bodies of low grade dis- inated chalcocite have been opened at depths of 400' to 600'. Property examined and reported upon favorably by J. Morgan Clements, who recom- ded churn drilling, and boring was begun 1909, holes being put down, kerboard fashion, at 200' intervals.

A railway to the district is now being constructed from Whitewater, on Santa Fé line, a distance of 14 miles. Management is good, and property nsidered decidedly promising, having an excellent chance of developing a e country-rock mine of sulphide ore.

NHATTAN COPPER & GOLD MINING CO. **NEVADA.**

Dead. Was absorbed June 10, 1907, by Nevada-Utah Mines & Smelter oration. Formerly at Pioche, Lincoln Co., Nev.

NVEL MINING CO. **CALIFORNIA.**

Mine office: Manvel, San Bernardino Co., Cal. Victor Marsh, manager. perty has a 150' shaft, on a vein reported to carry 10% copper. Presum- idle.

REQUITA DEVELOPMENT CO. **MEXICO.**

Office: La Cananea, Sonora, Mex. Mine office: Moctezuma, Sonora, Mex. pany is said to be allied to the Moctezuma-Arizpe Mining Co., and lands directly south of latter. Transportation is by a good wagon road to La anea. Sundry ore shipments, circa 1908, to La Cananea smelter, returned t $25 per ton. Presumably idle.

RTIN MINING & POWER CO. **COLORADO.**

Office: 318 Boston Bldg., Denver, Colo. Mine office: Eureka, San Juan Colo. Samuel G. Martin, general manager. Property is the Tom Moore p, formerly held by Tom Moore Consolidated Mining Co. and later by Tom re Gold Mining Co., latter organized circa 1907. At last accounts Dennis n of St. Paul was suing Mr. Martin for an accounting. Property carries ferous and argentiferous sulphides of lead, copper and zinc. Equipment udes a hydro-electric plant and a Leyner air-compressor.

RY VERNA MINING & MILLING CO. **COLORADO.**

Mine office: Frisco, Summit Co., Colo. H. T. McAllister, general manager. perty carries auriferous and argentiferous copper and lead ores. Equipment udes a small steam plant and a Leyner air-compressor. Was under develop- at with a small force at last accounts.

M. MATHEWS. **MEXICO.**

Office and mine: Etzatlán, Ahualulco, Jalisco, Mex. Lands, 220 hectares, luding the Cinco Minas, Casa Blanca, Palos Verdes, Palos Quemado and millo groups, and a number of miscellaneous claims. Development is by fts and tunnels, and mines are limited producers of ores carrying gold, sil- copper and lead values.

YFLOWER MINING CO. **ARIZONA.**

Mine office: Johnson, Cochise Co., Ariz. Mine shipped some ore, 1906. sumably idle.

OY MINING CO. **NORTH CAROLINA.**

Office: Oklahoma City, Okla. Mine office: Otto, Macon Co., N. C. Prop- originally was held under lease by an English syndicate that begun ex- tation about the outbreak of the American Civil War. Lands, 2½ miles Otto and 9 miles south of Franklin, include several adjacent tracts, with allow shafts, opened on a vein for a distance of about 500', showing sul-

OCTEZUMA COPPER CO. **ARIZONA.**

Mine office: Globe, Gila Co., Ariz. Was said, July, 1906, to have found ack sulphide ore at the bottom of a 160′ shaft. Presumably idle.

OCTEZUMA MINING CO. **MEXICO.**

Office: San Antonio, Tex. Mine office: Charcas, Moctezuma, San Luis otosí, Mex. Otto Wahrmund, president; A. L. Tuttle, general manager; C. H. offman, superintendent. Property shows chalcopyrite, estimated to average to 5% copper, with small silver values. At last accounts company was con- lering the advisability of building a concentrator.

OHOCHANG MINING SYNDICATE, LTD. **BURMAH.**

Office: 20 Copthall Ave., London, E. C., Eng. Mine office: Kijanksee, rthern Shan States, Burmah. C. A. Moreing, F. A. Govett, H. C. Hoover and Tilden Smith, directors; F. A. Grew, secretary; Bewick, Moreing & Co., nagers and consulting engineers. Organized March 2, 1909, under laws of at Britain, with capitalization £5,000, shares £1 par; issued, £3,557. Prop- r is prospecting licenses covering the Mohochang silver and lead mine, the ha copper mine near Kijanksee, in the Northern Shan States, and the ngaung silver-lead mine, 37 miles from Mandalay.

LLIE GROVES MINING & MILLING CO. **COLORADO.**

Office: 328 New York Life Bldg., Kansas City, Mo. Mine office: Parshall, nd Co., Colo. I. M. Horton, president; J. M. Percy, vice-president; J. N. h, secretary; W. H. Bousfield, treasurer; O. M. Groves, general manager; eding officers, F. M. Crews, I. H. Anthony and D. W. White, directors; rett F. Philips, general counsel. Organized March 4, 1909, under laws of orado, with capitalization $2,000,000, shares $1 par. Lands, 11 claims, atented, area 110 acres, and a 40-acre millsite, about 6 miles northwest of shall. Development is by 2 tunnels, on the vein, deepest planned to give a k of 2,300′. Vein is said by management to average 18′ in width, running wide as 30′ with a 6′ central streak carrying gray copper ore, with copper ins and copper sulphide on either side, and vein is said to be opened for a gth of 4,500′. Two mill tests, on ore taken from surface, returned 7.8% and % copper, but the company's circulars claim 72,000,000 tons of ore from the of the mountain to the tunnel level, which apparently is a typographical or for 7,200,000 tons, but nothing like even the smaller amount is proven, l apparently the management figured the full width of the vein, which is not of commercial grade, and figured on possibilities rather than on what has en proven. The company announced that a smelter was expected to be talled, early 1909, but apparently same failed to materialize. Is not regarded rorably.

ONARCH DEVELOPMENT CO. **ARIZONA.**

Mine office: Paradise, Cochise Co., Ariz. H. S. Chamberlain, president; K. Morrow, vice-president; F. S. Hayward, secretary; J. G. Sweeney, treas- r; preceding officers and J. C. Hancock, directors. Organized June, 1909, er laws of Arizona, with capitalization $1,000,000, shares $2 par. Lands, 10 ms, partly owned outright and partly held under bond and lease, including Morrow & Chamberlain group of 2 claims, having a 125′ vertical shaft.

NTANA CENTRAL MINING CO. **MONTANA.**

Mine office: Butte, Silver Bow Co., Mont. Property is the mineral rights the Black Placer claim, adjoining the Davis-Daly, located in the business ion of Butte. Property was in litigation for 30 years, until 1909.

NTANA-CLINTON COPPER CO. **MONTANA.**

Office: First National Bank Bldg., Laurium, Mich. Mine office: Elliston, well Co., Mont. Capt. Wesley Clark, president; Thos. Bastian, vice-presi- t; Michael E. O'Brien, secretary; Alex. Levine, treasurer; preceding officers, as. Kendall, Jas. Rowe, M. J. Harrington, Jos. Strobel and Chas. L. Fried-

sunk to 500', with crosscutting from the bottom, this shaft having about 0' of crosscuts and drifts, July, 1909, a crosscut from the shaft being said show an 18' vein carrying hanging-wall and footwall paystreaks of bornite d chalcopyrite, assaying about 4% copper, 8 oz. silver and 40 cents gold per n, with occasional assays up to 12% copper, 34 oz. silver and 60 cents gold r ton. The shaft has a 40' gallows frame. Equipment includes two 60-h. p. ilers, a 15-h. p. hoist and a 5-drill electric air-compressor, taking current from e Missouri River Power Co. Was idle, late 1909, but it was stated that erations were to be resumed, company having been financed.

ONTANA MINING CO. **UTAH.**

Office: Salt Lake City, Utah. Mine office: Eureka, Juab Co., Utah. John undy, president and general manager; Ernest R. Woolley, vice-president; d R. Woolley, secretary and treasurer; preceding officers, Duncan McVichie, C. Jensen and E. J. Raddatz, directors. Organized circa May, 1909, under s of Utah, with capitalization $250,000, shares 25 cents par. Lands are in vicinity of the Lily mine, and a 3-compartment shaft was begun, April, . Company was said, June, 1909, to have contracted for a complete electric ing equipment, including an 8x10" hoist, 125-h. p. air-compressor, and ric drills.

NTANA OREWAY MINING CO. **MONTANA.**

Mine office: Wisdom, Beaverhead Co., Mont. Lands are the Straight Tip p, in the Big Hole Basin, showing no ore on surface. Development is ned by a 1,500' tunnel to give an 800' back.

RESBY ISLAND MINING CO. **BRITISH COLUMBIA.**

Mine office: Jedway, Queen Charlotte Island, B. C. Property is on Moresby nd of the Queen Charlotte group. Presumably idle.

LLOS MOSER. **MEXICO.**

Office: Apartado 103, Monterey, N. L., Mex. Mine office: Cuatro Ciénegas, clova, Coahuila, Mex. Is an extensive operator of silver mines, also a zinc ducer. Property includes Santo Tomás mine, area 16 hectares, developed by 0-meter tunnel and a 50-meter shaft, producing copper carbonates with a e of 40 men, also Las Boquillas del Carmen mine, area 200 hectares, devel- d by 6 tunnels, of 900 meters aggregate length, producing carbonate and hide ores of copper, lead and zinc, with some silver, employing about 120 .

UNTAIN QUEEN MINING & MILLING CO. **COLORADO.**

Office: Victoria, Colo. Mine office: Animas Forks, San Juan Co., Colo. derick V. Bodfish, general manager. Property carries auriferous and argen- rous sulphides of lead, copper and zinc. Equipment includes an electric nt and air-compressor.

UNT BAKER GOLD, COPPER & TIN CO. **WASHINGTON.**

Mine office: Glacier, Whatcom Co., Wash. Lands, 22 claims, in 4 groups, hin a radius of 12 miles. The White Swan group, 10 miles from Glacier, ws a 5' vein, traceable circa 1,500', carrying gold and silver ore, with quartz gue, giving assay values of $4 to $35 per ton.

UNT BALFOUR COPPER MINES, LTD. **TASMANIA.**

Office: 31 Queen St., Melbourne, Australia. Mine office: Mt. Balfour, Tas- ia. A. E. Langford, chairman; Dr. B. P. Ekberg, consulting engineer. ds, on Mount Balfour, are reached by launch from Launceston and by horse- k from Zeehan and Waratah. Country rock is laminated sandstone, in es interbedded with slate, and on the eastern side of the property is a belt lack slate, carrying some large quartz veins, up to 50' in width, traceable eral miles. Principal vein, carried for 5,000' on the company's lands, is eloped by a 91' shaft, all in copper ore, with some drifting, and by shallow face trenches showing 3' to 10' of ore carrying melaconite and chalcopyrite,

EDLES EYE COPPER CO. **CALIFORNIA.**

Office: Los Angeles, Cal. Mine office: Needles, San Bernardino Co., Cal. n G. Burgess, W. A. Gordon, Alfred W. Allen, W. A. Smith and E. A. son, directors. Organized circa October, 1909, with capitalization $1,000,000.

LLIE S. COPPER MINING & MILLING CO. **WASHINGTON.**

Mine office: Republic, Ferry Co., Wash. Mine has about 800′ of workings, h about 100 tons of ore ready for shipment. At last accounts company was a bad way financially, and planned reorganization.

VADA-ARIZONA COPPER CO. **ARIZONA.**

Mine office: Hillside, Yavapai Co., Ariz. Jos. L. Giroux, president. Lands, ght 1909, of the Copper Queen Development Co., include water rights on ro and Copper Creeks, 30 miles north of Hillside, which management plans izing for electric power. Equipment includes a 50-h. p. hoist. Property s being prospected with churn drills, August, 1909.

VADA BUCKSKIN COMBINATION MINING CO. **NEVADA.**

Mine office: Buckskin, Douglas Co., Nev. J. W. Green, superintendent. perty carries auriferous copper ore, and equipment includes gasoline power.

VADA COPPER HILLS MINING CO. **NEVADA.**

Office: Mansfield, Ohio. Mine office: Luning, Esmeralda Co., Nev. Hon. S. Bricker, president; Dr. A. H. McCullough, vice-president; Dr. F. J. Foster, retary and treasurer; preceding officers, Bernard Eastman, Chas. Ritter and s. E. Fish, directors; Rowland Lea, mine manager. Organized under laws Nevada with capitalization $1,500,000, shares $1 par. Lands, 6 claims, area acres, in the Fitting district, circa 9 miles north of Luning. Company ims possession of 65 veins of ore, ranging from 6″ to 14′ in width, which ms almost too good to be true. Property is developed by opencuts, trenches a 200′ crosscut tunnel, and has secured ore giving assay values in copper, er and gold. Company's prospectus states that at the present time there ufficient work under construction, requiring copper, to consume the entire ut of all the copper mines in the world for the next 20 years, which would mportant, if true, and also states that no copper mine having a true geo- cal formation and well defined copper veins ever has become exhausted or ked out, which also would be important, if true.

VADA MINING CO. **CALIFORNIA.**

Mine office: Auburn, Placer Co., Cal. L. G. Schuster, manager. Lands, 150 s, in Placer County and 30 acres in Nevada County, former 8 miles from rest railroad, at Auburn, with a good wagon road connecting. Development y 2 shallow 2-compartment incline shafts, in a vein reported as diorite in e, carrying malachite and chalcopyrite, associated with pyrite and hematite, apparently auriferous. Buildings include a smithy and boarding house.

VADA-PACIFIC COPPER CO. **NEVADA.**

Office: 40 Exchange Place, New York, N. Y. Mine office: Luning, meralda Co., Nev. Samuel I. Silverman, manager; preceding officer, L. L. rick, A. E. Spriggs, J. H. Miller and C. H. Palmer, directors. Organized a 1909, with capitalization $3,000,000, shares $5 par, in $500,000 of 6% ferred stock and $2,500,000 common stock. Lands, in the Luning district, said to be extensive, and company was said, August, 1909, to have taken option on the Mayflower group of the Copper King Mining & Smelting Co. Silverman is variously quoted in the press as claiming to have in sight ,000 to 1,000,000 tons of ore assaying 5.5% copper, with combined gold and er values of about $1 per ton, and also is quoted as claiming that the com- y could produce copper for 7 cents per pound, which remains to be demon- ted. Company plans erecting a custom smelter on the Southern Pacific way, in the Walker Lake district, and it was stated in the press, July, 1909,

diamond drilling, with a view to locating the northern extension of the ltic amygdaloidal bed on the eastern part of the property. Management is od, and property is considered a prospect of exceptional value, by reason of great landed area on the mineral zone, and the likelihood of finding a pay- le amygdaloidal bed near the Eastern sandstone.

EW BALTIC EXPLORATION. **MICHIGAN.**

Office and mine: Shelden Bldg., Houghton, Houghton Co., Mich. Jas. P. wards, general manager. Was organized circa December, 1908, with capi- ization $20,000, shares $2 par, fully paid, but is not incorporated. Plans of nagement call for the incorporation of the New Baltic Copper Co., under the ws of Michigan, with capitalization $2,500,000, shares $25 par, and it is anned to issue one share of stock in the mining company for each share of ock in the development pool, and to give shareholders of development stock ghts to subscribe to additional stock, 3 shares for 1, at whatever subscription ice the new company may be floated at.

Lands in Section 16, east of the Arcadian, are held under option from rious owners, and an undivided quarter interest owned by the New Arcadian pper Co. is held under a $40,000 option, and it is probable that the New eadian Copper Co. will take stock in the New Baltic Copper Co., to be ganized, in payment for this amount.

Work includes considerable trenching, and holes bored with a Calyx drill, ich had considerable trouble in getting down standpipes. No. 3 borehole, at pth of 330′, cut 2′ of exceptionally good copper bearing rock, with 6″ of avy copper, and in September, 1909, a drill-core was taken from what was ought to be the western bed of the Baltic, fairly charged with copper, at pth of 300′. In November, 1909, a drill hole, pitched at an angle of 60°, cut rough an amygdaloidal bed, estimated also to pitch at 60°, in opposition, gave es of 105′ aggregate length, showing copper at various points, with the final carrying much fine stamp copper, and a considerable amount of very coarse mp copper, the bed giving every indication, from this drill hole, of carrying kable values if developed. Property considered decidedly promising.

W CONSOLIDATED MINING CO., LTD. **MEXICO.**

Dead. Was reconstructed, June 10, 1909, as Consolidated Copper Co., Ltd. nerly at Charcas, Moctezuma, San Luis Potosí, Mex.

W DOMINION COPPER CO. **BRITISH COLUMBIA.**

Office: 42 Broadway, New York, N. Y. Mine office: Phoenix, Boundary rict, B. C. Works office: Boundary Falls, Boundary district, B. C. J. A. isohn, president; Newman Erb, vice-president; Theo. Herrmann, secretary; us H. Susmann, treasurer; preceding officers, Hon. Warren W. Foster, F. L. mer, N. Bruce McKelvie and John A. Sleicher, directors; John Seward, erintendent; J. Parke Channing, consulting engineer.

Organized June 9, 1909, under laws of British Columbia, with capitalization 50,000, shares $5 par, fully issued and fully paid. Bonds, $500,000, at 6%, 10 years, convertible into stock at par. Windsor Trust Co., New York, nsfer agent. Annual meeting, first Monday in June.

Company is a reconstruction of the Dominion Copper Co., Ltd., which aulted on bond interest, June, 1908, and for which a receiver was appointed . 2, 1908, on application of the mortgage trustee. Property of the old com- y was bid in at mortgage sale, June, 1909, for $261,500, by Col. Chas. yden, chairman of the reorganization committee, and property of old com- y was turned over to the new corporation, August, 1909. The plan of rganization was extremely drastic, and there were many bitter complaints m dissenting holders of stocks and bonds of the old company. A protective mmittee of dissenting shareholders has been appointed, with B. W. Lincoln chairman, and this committee is to investigate the legal rights of the old

y low values in copper, about 1 oz. silver and up to $7.50 gold per ton, but ected to carry somewhat better copper values below the oxidized zone.

Property in the Summit camp includes a half interest in the Lancashire e, having a silver vein, and a three-fourths interest in the Mountain Rose e, with combined area of 74 acres, carrying fluxing ores. The Mountain e, owned one-fourth by the Hall Mining & Smelting Co., has 2 tunnels, aing a vein of about 15′ width, and produced 3,999 tons of fluxing ore in

Power for the mine and works is mainly electric, current being furnished he South Kootenay Power Co., from Bonnington Falls, circa 25 miles dis- . The Phoenix group has electric hoists and a 25-drill Canadian Rand air- pressor, driven by a 450-h. p. Canadian Westinghouse electric motor. The est crusher is a Jenckes-Farrel-Bacon, with 42x30″ jaw openings, weighing a 125,000 lbs., with an hourly capacity of 150 tons of ore reduced to 6″ size, g one of the largest ever built.

Ore is transported 4 to 25 miles by rail from the various mines to the lter. The matter of building a 5-mile aërial tram to cost circa $100,000 was n tentative consideration by the former owners, but financial considera- s precluded its construction. Rail freights are 17 cents per ton on Dead- d ore, and 30 cents per ton on ore from the Phoenix and Summit camps.

he 1,500-ton smelter, 4 miles from Greenwood, was built by the Standard itic Co., passing later to the Montreal & Boston Consolidated Mining & elting Co., Ltd., thence to the Dominion Copper Co., Ltd. The smelter was rly equipped and poorly located, but was overhauled and modernized by the minion company, and lands were added for slag storage.

The works include a small sampling mill, equipped with crushers, rolls, -conveyors and Vezin and Bridgeman automatic samplers.

The 120x182′ blast-furnace building has, in the building, sixteen 10x25′ ore- s, and there are 3 large ore and coke-bins outside, with railroad tracks run- g above. There are two 325-ton water-jacket blast-furnaces, 40x176″ at the eres, and one 600-ton 44x255″ furnace, all having automatic feed. The dust- , 200′ long, has a 30x50′ brick dust-chamber, and leads to a stack 112′ high 9′ 6″ in diameter, and a self-supporting stack 100′ high and 8′ in diameter. g is handled by a 7x12″ locomotive, on a 40″ gauge railroad track.

The power plant at the works includes No. 7 Connersville blowers and a -light dynamo. The old machinery plant, burned 1908, was rebuilt. The rks include a machine-shop.

When operated the smelter works three 8-hour shifts, product being a tte carrying about 45% copper, 13 oz. silver and 3 oz. gold per ton, shipped the British Columbia smelter at Greenwood for refining. The smelter also es custom work when in blast.

Production, for year ending July 31, 1907, was 187,981 tons of ore, yielding 10,695 lbs. fine copper, 42,606 oz. silver and 10,321 oz. gold, realizing 20,184.84, with total operating expenses of $740,002.72, giving a net mining ofit of $80,942.91. The former company's financial statement showed a profit, perations for 18 months ending July 31, 1906, of $139,144. Production for year ing July 31, 1907, averaged 15.5 lbs. fine copper, 0.5 oz. silver and $1.10 gold ton, and the management was said to have secured costs of $1.34 per ton mining, including freight, and $1.32 for smelting, or total mining and smelt- costs of $2.66 per ton. Allowing 34 cents miscellaneous expenses, the cost ld be $3 per ton on ore reduced to matte, to which should be added 40 to ents per ton for conversion, refining, smelting and miscellaneous expenses, ng total costs of about $3.50 per ton on ore, exclusive of interest on bonded btedness. Deducting therefrom $1.40 per ton for included gold and silver es, cost of copper contained in a ton of ore, amounting to 15.5 lbs., would

be $2.10, or 13.5 cents per pound, instead of the alleged cost of 8 cents per pound that was claimed by the management of the old company. These figures, reprinted from Vol. VIII, show why the Dominion Copper Co., Ltd., came to grief.

Matte of the New Dominion smelter was converted, when the property was operated, at the British Columbia works, and it is probable that the New Dominion will contract with the British Columbia for smelting its ores at the Greenwood smelter of the former, suspending operations at the Boundary Falls works. The new company planned resuming mining and smelting in August, 1909, but was idle at last accounts, though with prospects of resumption shortly. The property is dangerously low in grade, but has enormous ore bodies, and, under the present strong management, and especially if operated in close working alliance with the British Columbia, should become a large producer eventually.

NEW DOMINION COPPER MINING & DEVELOPING CO. WASHINGTON.

Mine office: Chewelah, Stevens Co., Wash. Lands are the Enterprise group of 4 claims, 3 miles east of Chewelah, adjoining the Copper King and United mines, developed by a 100′ shaft, showing an ore body, widening with depth, from which assays of $75 to $200 per ton have been secured in silver and copper.

NEW ENGLAND & ARIZONA GOLD & COPPER MINING CO. ARIZONA.

Office: 235 Main St., Lewiston, Me. Mine office: Humboldt, Yavapai Co., Ariz. Geo. A. Whitney, president; Lewis Harlow, treasurer. Organized 1906, with capitalization $750,000, shares $1 par. Company was short of cash at last accounts. Lands, 9 claims, 3 patented, circa 2 miles from Humboldt. Mine is developed to depth of 400′, showing ore giving gross assay values of $1.22 to $68.56 per ton.

NEW KEYSTONE COPPER CO. ARIZONA.

Office: 42 Broadway, New York, N. Y. Mine office: Miami, Gila Co., Ariz. Employs circa 50 men. Samuel A. Lewisohn, president; J. Parke Channing, vice-president; Julius H. Susmann, secretary and treasurer; preceding officers, Adolph Lewisohn, Walter Rosen, Jacob Langeloth, Theo. I. Herrmann, Ralph S. Lupton and Herman Cook, directors; Geo. C. Lawton, superintendent; H. Britton Gottsberger, general manager; Louis Wright, consulting engineer.

Organized circa August, 1909, under laws of Delaware, with capitalization $3,000,000, shares $5 par; issued, $1,500,000. Company was organized as a reconstruction of the Keystone Copper Co., shareholders of old corporation taking stock in new company in exchange for the property. Is controlled by the General Development Co., which also is in control of the Miami.

Lands, 12 claims, area 240 acres, lying next east of the Live Oak and near the Inspiration and Miami mines. Property shows granite and quartz-porphyry, with occasional schists. East of the main workings there are surface deposits of chrysocolla, said to assay 3 to 7% copper, and a conglomerate bed of 4′ to 12′ thickness, said to be impregnated with copper to the extent of 3 to 6%, from which values apparently could be recovered by leaching. Ore, as developed, is mainly chrysocolla, with disseminated carbonates and occasional sulphides, latter including chalcocite of 40 to 60% copper tenor. Principal ore body is a 12′ vein carrying a 15″ paystreak said to average circa 22% copper and 2 to 5 oz. silver per ton, balance of vein carrying concentrating ore of 3 to 5% copper tenor, which has been left standing, for later extraction.

Development by former owners included 3 tunnels, with about one-half mile of workings. No. 2 tunnel, of 570′ length, shows chrysocolla and carbonate ores of 4 to 24% tenor, and No. 3 tunnel, circa 600′ long, shows somewhat similar ore. Development by present management is along different lines, with a view to making a mine from disseminated sulphides in the Pinal schist. The

3-compartment Keystone shaft was 350′ deep August, 1907, with cross-ting and drifting in progress on the 150′ level. Work is planned to block out in squares of 200′, with levels at 100′ intervals. The new work shows dis-inated sulphides in Pinal schist, similar to those of the Miami, but appar-ly somewhat lower in grade, being about 2.5% in copper tenor, with some carrying up to 3% copper. In addition to underground work, prospecting n progress by two No. 5 Keystone churn drills, boring to depth of 400′ to ′, making an average progress of 15′ daily.

Equipment includes a 25-h. p. gasoline hoist and a 3-drill air-compressor, a 25-ton experimental plant, built 1905, using a modification of the epfner sulphide process, for leaching chrysocolla, carbonate ores and roasted phides. By this process ore is reduced to fines, pulped and leached for 3 rs in a slowly revolving chlorination barrel. The leaching solution is cupric oride, which is changed to cuprous chloride by the absorption of one atom of per. The enriched solution goes to precipitation tanks, where the extra ecule of copper is precipitated upon large copper sheets, and the solution, s regenerated to cupric chloride, is returned to the storage tank for further . The mill does not seem to have proven a success.

The Keystone has been a small producer since 1899, shipping ores giving elter returns of 22 to 27% copper, in addition to yielding low grade silicious s of 3 to 5% copper tenor, used at Old Dominion smelter for converter lin-gs. Production, 1907, was 208,801 lbs. fine copper. Management is good and perty considered decidedly promising.

EW MONARCH MINING CO. **COLORADO.**

Office: 310 Cuyahoga Bldg., Cleveland, Ohio. Mine office: Leadville, Lake ., Colo. Jas. B. McDonald, manager; Frank Fuller, superintendent. Property ries auriferous and argentiferous copper, lead and zinc sulphides. Equip-nt includes steam power and an air-compressor. Employs circa 50 men.

EW PLANET COPPER MINING CO. **ARIZONA.**

Office: 42 Broadway, New York, N. Y. Mine office: Planet, Yuma Co., Ariz. as. S. Barton, president; Wm. G. Nickerson, vice-president; O. J. Ashman, retary; Julius H. Susmann, treasurer; preceding officers, S. S. Rosenstamm d Alexander Rae, directors; Samuel Untermeyer, general counsel; J. Parke anning, consulting engineer; W. E. Upham, superintendent. Organized circa y, 1909, under laws of Delaware, with capitalization $4,000,000, shares $5 par, a reconstruction of the Planet Copper Mining Co. Stock in old company was ired by exchange of 240,000 shares of New Planet stock, 560,000 shares going the General Development Co., which is in control and will finance the prop-y. Company is said to have a guarantee fund of $1,000,000 for development.

Lands, 34 claims, area circa 650 acres, also 40 acres in millsites, in the rcúvar district, on the south side of Bill Williams Fork river, 12 miles east the Colorado river. Property shows about 50 exposures of ore, with 2 ore ies, apparently metamorphic contact deposits, having diorite on the footwall, erlaid by sedimentary shales and impure limestone, much altered by inter-ated eruptives, the veins, which carry a heavy iron capping, mainly of hema-e, for a distance of 3,000′, ranging up to 200′ in width, with average width of out 30′. Apparently the gossan is of workable grade, and it is estimated that property shows about 500,000 tons of 60% iron ore. The main ore zone, ceable about 2,700′, ranges up to 300′ in width, carrying oxidized and silicate s estimated to average 7 to 8% copper and 50 cents gold per ton, with traces silver, but apparently the workable portion of the vein is 3′ to 20′ in width. e vein is very flat, dipping about 15° only.

Development is by 3 incline shafts, deepest 800′, giving a vertical depth of 5′, showing ore of 5 to 12% copper tenor, with 12 vertical pits and shafts, of to 325′ depth, and 8 tunnels, longest 225′, with total workings of 0,000′,

addition to copper lands, the company holds sundry placer gold
mine of auriferous iron ore, highly suitable for fluxing. The com-
ns a limestone quarry for flux, which has been claimed in the press
ents to $6 gold per ton, which seems to have been too good to be

mining properties are the Lucky, Nanny Baird, Iron Mask and
. The three properties first named show limestone and porphyry,
ontact deposits, of which 7, more or less developed, range from 3'
lth, with known lengths of 100' to 700', carrying native copper.
nalachite, said to give average assays of 7% copper, 2 oz. silver
er ton, which figures are too high, all ores being slightly argentif-
ongly auriferous.
y mine, developed by a 300' shaft, and by tunnels of 250' and 625',
ow a large amount of auriferous copper ore averaging circa 7%
6 gold per ton, also considered too high, and the mine has proven
500' tramway from the mine leads to the railway track.
ny Baird mine has a vein of circa 25' average width, carrying
and silver values, with good gold values, and to the south is a
ract, of some promise. Development in the Nannie Baird is by
al shaft and an 800' incline shaft. The Lucky and Nanny Baird
have about one mile of workings, estimated by former owners to
tons of ore of good average grade blocked out for stoping, which
oo high.
Mask mine, on Iron Mountain, has auriferous iron ore, assaying
0% iron and $2 to $8 gold per ton, with an estimated average gold
to $4, also considered too high. It is planned to reach the Iron
ilroad spur.
net mine has a 480' shaft, equipment including a 20-h. p. gasoline
n air-compressor.
ing plant includes three 85-h. p. boilers, two 8x10" hoists, good for
d 2 Sullivan air-compressors, of 28 drills aggregate capacity, with
lls.
s, 22 in number, include 4 smithies, a 20x40' machine-shop, general
ssay office and laboratory. The townsite of Orogrande has electric
telephone exchange, maintained by the company.

brought, 21 miles, from a dam across the Sacramento River, in the
Mountains, by a 6" pipe-line, leading to a 25,000,000-gallon reser-
side of Baird Hill, just above the townsite. The daily flow of the
to be 10,000,000 gallons, and the capacity of the pipe-line is said
00,000 gallons daily, delivering water at about 800 lbs. pressure per
under a static head of 1,500'. If these figures are correct there is
parent for the use of steam power.

ltersite, less than a mile from Jarilla Junction, is about 1½ miles
ie, and the plant includes ore-bins, a sampling mill, furnace build-
er-house. The furnace building, of steel, is designed for two 250-
, with equipment in place for both, but only one furnace is
s having been blown in early November, 1907. The furnace build-
5' steel smokestack, of 14' diameter at the base and 9' at the top.
s reached by a private spur track from the El Paso & Northeastern
is connected by a branch line with the mines.

lter power plant has three 150-h. p. Heine boilers, two 120-h. p.

ain tunnel, with about one-half mile of workings. Mine has rail con- and a 200-h. p. electric plant.

MINING CO. **NEW MEXICO.**

e office: Lordsburg, Grant Co., N. M. Lands, 52 claims, area 1,145 the Virginia district, formerly held by Aberdeen Copper Co., which ery badly managed concern, paying a dividend of $32,175 which came e of treasury stock, and not from earnings.

perty is said to show 10 fissure veins, of which 7, of about 5′ average re more or less developed, having 8 shallow shafts, deepest 400′, which nned to sink to 600′ and possibly 1,000′, mine having about 3,000′ of s. Equipment includes steam power, air-compressor and a 50-ton con- r.

VASH CONSOLIDATED MINES CO. **WASHINGTON.**

e office: Conconully, Okanogan Co., Wash. Wm. Baines, president; H. ell, vice-president; F. J. May, secretary and treasurer; David Gubser, manager; Dr. Jacob May, fiscal agent. Organized as successor of Wash- Consolidated Copper Co., and has absorbed several minor companies, irca 50 claims, in the Mineral Hill district, including the Mineral Hill 20 claims, originally held by Mineral Hill Mining Co, and later by ton Tunnel & Copper Co. The Mineral Hill group has an 1,800′ tunnel, ut 3 veins carrying auriferous and argentiferous copper ores, mainly rous tetrahedrite. The 400′ main tunnel is planned to be continued to o cut 8 known ledges. Mine also has several shallow shafts. Property vailable water power, rated as capable of developing circa 4,000 h. p., a steam plant, crusher, ore-bunkers and sawmill.

IC CONSOLIDATED GOLD MINES CO. **COLORADO.**

e office: Central City, Gilpin Co., Colo. John C. Planchuelz, superin- Mine carries auriferous and argentiferous copper ore, with values n the precious metals. Equipment includes a steam plant, air-com- 70-stamp mill and 150-ton concentrator.

, DODGE & CO., INC. **ARIZONA & MEXICO.**

e: 99 John St., New York, N. Y. Prest., Jas. Douglas, president; Geo secretary; preceding officers, Cleveland H. Dodge, Arthur C. Agnew, ean, Geo. B. Agnew, E. H. Perry, Francis L. Hine, V. Hayward and Osburn, directors. Organized Dec. 14, 1908, under laws of New York, talization $50,000,000, shares $100 par. Shares are listed on the New ork Exchange. Company was organized as successor by the firm of Dodge & Co., composed of Cleveland H. Dodge, Arthur Curtis, R. C. nd Jas. McLean. The firm of Phelps, Dodge & Co. has a history of century, its founder, Wm. Earle Dodge, having been one of the great merchants of America, and a noted philanthropist. The company pays quarterly dividends at $2.50 per share, and earned, 1909, a safe margin e dividends, with copper selling on an average at 13 cents per lb.

any controls, through ownership of more than 90% of the various ons, the Copper Queen Consolidated Mining Co., Montezuma Copper mit Copper Mining Co. at Morenci, and Ray Central Ray Co., Ariz- ed at $6,000,000. Company apparently owns or controls in the Old s or Indiana & Sonora, which are controlled by the members of the Company does not own the El Paso & Southwestern Railway system, controlled by the Phelps Dodge interests, owners of a very good majority of ed Phelps Dodge & Co., Inc. The company is reported to have taken k in the various subsidiary companies on the basis of $75 for each e of the Copper Queen, $50 for each $100 share of the Montezuma, each $100 share of the Detroit Copper Co., and $100 for each $100 Ray Central Ray Co., this arrangement calling for nearly $17,000,000

l absorbed the Tetro company, circa March, 1909. Shares are listed on Lake stock exchange.

ds, 14 patented claims, including the Tetro group, carrying auriferous entiferous lead and copper ores. Company began operations Feb. 1, roperty has a 500′ shaft and circa 3,500′ of tunnels. In 1909 new work ed a 3′ vein of carbonate ore, averaging about 45% lead and 30 oz. sil- ton. Equipment includes a 75-h. p. electric motor, hoist and air-com- and improvements include an office, shops and necessary mine build- Production, 1903-1904, under former ownership, was 1,250 tons of ore, have netted $70,000. Management is good and property considered e.

OSA MINING CO., LTD. **CHILE.**

ce: Dashwood House, New Broad St., London, E. C., Eng. Operating Antofagasta, Chile. Mine office: Collahuasi, Tarapacá, Chile. Em- rca 500 men. A. Bertrand, D. Burns, C. Furn, F. W. Hayne and J. R. irectors; F. W. Bishop, secretary. There also is a Chilean board, with as follows: Juan G. Searle, president; Carlos A. L. Dick, secretary; outh American Bank, treasurer, preceding officers, Carlos Gregorio Gustavo Jullian, Thompson Matthews and Carlos A. Gibbes, directors; Hawxhurst, Jr., general manager; M. A. Wolff, superintendent; August mine superintendent; A. Y. Hardy, engineer.

anized Nov. 27, 1908, under laws of Great Britain, with capitalization), shares £5 par, fully issued and fully paid. Corporation is merely a uction of Compañía Minera Poderosa de Collahuasi, organized to bring perty under the laws of Great Britain, in order to make an English for the shares. The new corporation paid the old company £480,000 in ull paid shares for its property. The old company showed a profit of for 6 months ending June 30, 1908, and paid dividends of £60,000.

ds, 37 contiguous claims, area 185 hectares, equal to 457 acres, carrying e of the ore formation for 4,500′. Lands inclue the Poderosa mine, which rincipal property, and the San Carlos, Rosario and Condor mines. Lands, at an extreme elevation of 15,400′, on the Bolivian plateau, lie above ber-line, and are barren of vegetation, with the exception of a fungus the botanical name of fungi cordillerensi, which forms the local fuel of rict. There are no high hills in the vicinity, lands being on the top levated plateau, surrounded, at a considerable distance, by high peaks ndes. There are no running streams, and potable water is scarce. The is extremely bleak, winter prevailing 12 months yearly, with snow or ling nearly every day in the year. Copper mines in the district were in the era of Spanish domination, and previously by the Indians, as y the ancient remains of furnaces, fragments of matte, scoria, and tools old workings.

country-rock is feldspar-porphyry, stratified and fissile, there being a tratification, with dip of about 70 degrees to the westward, with an loidal diabase running northwest and southeast, dipping with the coun- to the westward, ore bodies occurring in contact with and in the im- vicinity of the intrusive dykes. There has been considerable disinte- and overburden covers the rock formation so that few outcrops are hese usually carrying low grade malachite and chrysocolla, or brochant- gangue being mainly felsitic rock, much decomposed. The Poderosa sists of several parallel bodies of partly or wholly decomposed country ith considerable faulting, having a general strike of N. 40 W., crossed, ically right angles, by a secondary set of leaner veins, the master veins ssures in a shear-zone. Characteristic ores of the Poderosa system are melaconite, malachite, chalcocite, covellite, bornite, chalcopyrite,

chrysocolla, brochantite, atacamite and tetrahedrite, the latter deci
gentiferous, the ores, as a whole, averaging about 8 to 12 oz. silver p
ton.

The Poderosa mine, which is the principal property, has a 433' m
with about 7,000' of workings, carrying oxidized ores on the 400' le
mine has 2 veins, known as the Poderosa and Portillo, of 3' to 30' w
rying paystreaks of high grade ore 1' to 20' wide, with average width
4', the gangue being decomposed quartzose felsite, very soft, requir
timbering, while, unfortunately, the old timbering remaining in pl
tremely poor. The hanging-wall is well defined, but the ore shades
into the altered country-rock of the footwall, there being a fluccan,
3" to 12", and even up to 4' width, on the hanging, with an occasi
on the footwall. The main shaft is only 6x8' inside of timbers, and
cut down to larger size, and the shaft is in the hanging-wall, west o
crossing the vein about the fourth level, with five levels opened, s
meter intervals, the shaft cutting another vein about midway betwee
and sixth levels, this vein, averaging circa 30" width and dipping t
main vein, carrying exceedingly high grade ore. The various level
nected by winzes. There are indications that the ore will grow r
the base zone is reached. The mine is quite wet, making about 90,
of water per day, in the wet season. Estimated ore reserves of th
mine alone, March, 1907, were 101,600 long tons, with an averag
23.66% copper, and circa 10 oz. silver per long ton. These figures, wh
ing very high, seem warranted. Equipment of the Poderosa mine is
consisting only of a wooden head-frame, with a 10x15" single Ta
raising half-ton buckets.

The Rosario mine, northwest of the Poderosa, has a 166' inclin
a 30" vein dipping at about 80°, ore assaying about 15% copper, s
bottomed in the top of the base zone, which shows chalcopyrite, a
and pyrite. The San Carlos mine, practically an extension of the Po
to be connected therewith, has a 146' shaft, showing a 3' vein carr
about 19% average copper tenor. The Condor mine has a 147' sha
a 2' vein carrying ore giving average assays of about 18% copper.
panil mine, a new property, is being opened by shaft. Mine timbe
fir and pine, costing, at Antofagasta, £9 per thousand feet, with 4d.
foot transportation charges thence to the mine. During the period
ment, supplies and ore were hauled 65 miles, over an extremely rou
tween Estación Carcote and the mine, one week being required fo
trip, but a branch of the Antofagasta & Bolivian railway has been
Ollagüe to the mine.

Labor is supplied mainly by Bolivian Indians, from the neig
public, who work intermittently, putting in about half time, an
drunken and lazy, but, bad as it is, the labor supply is short, thou
pletion of the railway should give improvement. The manager de
port Chinese, which would seem a sensible plan.

The mine has 9x18" and 6x20" crushers, reducing ore to 2" to
fore shipment. Ore formerly was hand-picked to an average ten
45% copper, for shipment, and ore shipped, to end of 1906, was 7
grams, giving average returns of nearly 40% copper and 17.5 oz. sil
ton. Production, 1908, is estimated at 8,000,000 lbs. fine copper.

This is a property of exceptional promise, and has been well
Mr. Hawxhurst, under exceedingly trying circumstances.

POINT LEWIS REDUCTION WORKS. CA

Owned by Mountain Copper Co., Ltd., at Martinez, Contra Co

F-SYSSTERSKI WORKS. **RUSSIA.**
e and works office: Nijni-Tagilsk, Perm, Russia. Property is a smelter. on, first 9 months of 1908, was 10,462 poods, equal to 377,804 lbs. fine nd production, 1908, is estimated at 500,000 lbs. fine copper.

GHORN MINING CO. **CALIFORNIA.**
e office: Ingot, Shasta Co., Cal. R. Polkinghorn, superintendent. Lands, in process of patenting, developed by shaft. Presumably idle.

e office: Pietersburg, Zoutpansberg, Transvaal. Property is mineral the farm Wagendrift, on the Buffels road, about 50 miles from Pieters- small shipment of ore, for test purposes, was made November, 1908.

MINES DEVELOPMENT CO. **COLORADO.**
e office: Copperfield, Frémont Co., Colo. E. S. Halter, superintendent. carries copper ore, and is developing with steam power and a small

RO A. PROAÑO. **PERÚ.**
ks office: Pacococha, Junín, Perú. Property includes La Victoria ar Backus & Johnston, at Morococha, the Chapichaca mine, and various the Tamboraque district. Principal property is the Germania y Perú the Pacococha district, having a 3′ to 6′ vein, producing ore assaying copper, and 10 to 20 oz. silver per short ton.
smelter, known as La Fundición Tamboraque, 120 kilometer from t an elevation of 9,820′ above sea level, built 1906, has a 40-ton water- last-furnace. Production, 1907, was 1,055 metric tons of ore averaging er and 1,140 grams silver per metric ton, yielding 139,551 lbs. fine cop- 1,202 kgs. silver.

NTORY MINING CO. **UTAH.**
e office: Promontory, Box Elder Co., Utah. Property, near Promontory as an 88′ incline shaft showing an 8′ vein, with a 14″ paystreak carry- ssaying 5 to 18% copper, 1 to 40 oz. silver and $9 gold per ton.

NTORY SIGNAL MINING CO. **UTAH.**
e: Salt Lake City, Utah. Mine office: Promontory, Box Elder Co., . F. Lehn, president and treasurer; W. E. Buys, vice-president; Ed. A. secretary; H. E. Buys, manager; preceding officers, G. L. Asher, H. C. and L. J. Risco, directors. Organized circa July, 1908, under laws of th capitalization $60,000, shares 10 cents par.

ÑÍA MINERA LA PROTECTORA y ANEXAS. **MEXICO.**
e: Gante 12, Mexico, D. F. Mine office: San Salvador, Mazapil, s, Mex. Percy A. Babb, president and general manager; J. L. Miranda, ; D. B. Andrews, superintendent. Organized 1907, under laws of Mex- capitalization 100,000 pesos, fully paid in. Lands, 68 hectares, includ- Protectora y Anexas and San Francisco mines, carrying argentiferous nd carbonates of copper, lead and zinc, occurring as replacements in e. Low grade ores average 2.5 to 5% copper, and high grade ores 12 copper. Mine has a depth of 100 meters, with about 1,500 meters of . Equipment includes a 15-h. p. hoist. Employed about 50 men at unts.

ENCE COPPER CO. **ARIZONA.**
e: 18 Tremont St., Boston, Mass. Mine office: Paradise, Cochise Co., A. Lewandowski, general manager; Samuel S. Supplee, superintendent. d 1908, under laws of Arizona, with capitalization $1,250,000. Lands,

ruction of the Okanogan County electric railway from Nighthawk to ster, Washington, crossing the Q. S. property, and it is hoped this line will mpleted in 1910.

Notwithstanding the claims of the company as to tonnage and ore values, are greater than are warranted by present developments, the property is f much promise, and the management, despite its financial troubles in the is to be commended for its persistence, while the work done seems well ed and executed.

IBY MINING CO. **CALIFORNIA.**

line office: Quinby, Trinity Co., Cal. Lands, 6 claims, on Quinby Creek, ing a vein of 4′ to 6′ width, opened by tunnels of 100′ and 120′, with 1,000′ of workings, showing chalcopyrite, associated with pyrite in quartz ie. Copper in the upper portion of the vein is oxidized, leached and rede- d as chalcanthite. Property has a small mill, treating ore for gold values.

CY-THOMPSON CONSOLIDATED MINING CO. **UTAH.**

line office: Park City, Summit Co., Utah. Organized circa July, 1909, apitalization $1,250,000, shares $1 par, as a merger of West Quincy Min- g. and Thompson Mining Co., and, of the capitalization, 400,000 shares given the West Quincy, 330,000 shares were given the Thompson Mining nd 200,000 shares were given the Daly West, and Ontario companies for ge and operation easements, leaving 370,000 shares in the treasury.

roperty of the West Quincy Mining Co. was a ⅝ interest, with an option remaining interest, in the mine of the J. I. C. Mining Co. Lands of the . are 5 claims, supposed to carry the extension of the Quincy ore body of aly West mine. Development is by a 625′ two-compartment vertical and a crosscut tunnel through the Little Bell mine, cutting a contact t carrying ore assaying up to 20% lead, 160 oz. silver and $2 gold per ton. expected that the main ore body will be cut at depth giving a back of nd that the Daly West contact ore body should be cut at depth giving a of 900′. Considerable trouble has been had from shifting ground and a inflow of water. Property was probed, 1907, to depth of 1,300′, by nd drills.

TAN REFINING WORKS. **NEW JERSEY.**

wned by International Smelting & Refining Co., at Perth Amboy, Middle- ., N. J.

CENTRAL COPPER MINING CO. **ARIZONA.**

ffice: 42 Broadway, New York, N. Y. Mine office: Ray, Pinal Co., Ariz. ys 138 men. Julius A. Lewisohn, president; Oscar A. Turner, first vice- ent; Benj. A. Hazell, second vice-president; Julius H. Parke Channing, consulting engineer.

rganized Jan. 28, 1909, under laws of Delaware, with capitalization ,000, shares $5 par; issued $4,000,000. Bonds, $2,000,00 authorized, at old, convertible at par into shares at any time between March 1, 1911, larch 1, 1916. Company holds 200,000 shares unissued, in the treasury, t the convertible bonds authorized but unissued. Bankers Trust Co., New registrar. Shares are listed on the New York curb. Annual meeting, Wednesday in January.

ompany is controlled by the Lewisohn interests, through the General pment Co. Property was bought of the Kelvin-Calumet Copper Mining share of Ray Central being given for 5 shares of Kelvin-Calumet, and, ing to the contract of sale with the Kelvin-Calumet, the Ray Central has end not less than $310,000 on development work during 1909, and ,000 subsequently. Company was said, April, 1909, to have expended, in

cash and shares, $3,714,000 for lands and option to have $246,000 cash in its treasury.

Lands, circa 380 acres, including the Big L Kelvin-Calumet in March, 1909, and 3 claim bought circa July, 1909, and the Carrie Natio group bought August, 1909. Property as a wh 15, 1909.

The Globe-Isabella group of 30 acres is ent of the Ray Consolidated, and the company ho to 12,000,000 tons of low grade disseminated average grade as the Ray Consolidated, of whi The Globe-Isabella tract, developed by the 300 surface, and at depth carries chalcocite dissem in sight June, 1909, on the Globe-Isabella tra 3% average copper tenor. Developments on two shafts, about 400′ apart, of which one, of laine, shipped, under former ownership, some h with oxidized ores claimed to average circa 3 and silver values.

The Calumet group, area circa 100 acres, h grade carbonate ores. Geological conditions similar to those at the Globe-Isabella, though n as yet in the schist, considerable work having between schist and greenstone, from which sl smelting ore have been made in the past.

The Copper Contact group, area about 40

The power plant at the Madelaine shaft steam hoist and a 12-drill air-compressor.

The Big Lead property has an old 4-stamp centrator, including a 35-ton McIntosh leachin a secret process to secure instantaneous resu forthcoming. Mill is terraced, all material bei doubtful whether operations will be carried on management, which is not given to secret proce per at a profit by the ordinary means of mining

Production, 1907, of the Big Lead mine, w agement is good and property considered decid

RAYMOND-ILLINOIS MINING CO.

Mine office: Eureka, Juab Co., Utah. J preceding officer, Hon. Thomas Kearns, John Ly Wheeler, directors. Mine has a 1,500′ vertic workings, which, as yet, have shown but littl ment planned diamond drilling to test the gro ent workings.

RAY NORTHERN COPPER CO.

Office: Phoenix, Ariz. Mine office: Ray, president; Dr. Walter Harvey Weed, consulting 1909, with capitalization $1,000,000. Lands, 14 group, 2 miles north of Ray, said to have ab some ore of fair grade. Sinking of a new mai tember, 1909.

RED MOUNTAIN COPPER-GOLD MINING

Office and mine: Cisco, Nevada Co., Cal. 640 acres, unpatented, 3½ miles from Cisco, sh ous copper ore between schist and slate walls,

.5% copper, 1 oz. silver and $15.50 gold per ton. Mine has but slight ipment, and presumably is idle.

RAVEN MINING CO. **B. C.**

Mine office: Jedway, Queen Charlotte Island, B. C. Property, on Moresby l of the Queen Charlotte group, is in the vicinity of Awaya, Ikeda & Co. ıably idle.

ROVER COPPER MINING CO. **ARIZONA.**

ffice and mine: Phoenix, Maricopa Co., Ariz. Organized circa July, 1909, laws of Arizona, with capitalization $1,000,000, shares $1 par. Lands, aims, known as the Red Rover group, 15 miles north of Camp Creek and les north of Phoenix, the nearest railroad point. Mine has a 200′ tunnel 200′ incline shaft, with about one-half mile of workings, showing a 10′ ody between limestone and porphyry, carrying a 3′ paystreak estimated erage 10% copper, 6 to 60 oz. silver and $20 gold per ton. The Red Rover discovered 1882, has shipped, from shallow workings, about $200,000 of high grade ore, running about 15 to 25% copper, with values mainly ver chlorides, one carload of 20 tons netting $41,000, with no allowance for copper contents.

AURADORA MINING & MILLING CO. **MEXICO.**

line office: Huautla, Juárez, Morelos, Mex. Chas. L. North, general man- Mine carries auriferous and argentiferous copper and lead ores. Equip- includes a steam plant and 20-ton mill.

DAD MINERA LA RICA MINA (BAJO RIO TINTO). **SPAIN.**

ffice: 7 Calle Churruca, San Sebastian, Spain. Mine office: Berrocal, a, Spain. Prince J. Piguatelli de Aragon, P. Duthie de la Tuque, A. Bar- . Fernandez and E. Wisse, directors. Organized Jan. 1, 1907, under laws in, with capitalization 1,250,000 pesetas, 5 pesetas par. Lands include a mine.

ARDS-CLIFTON MINING CO. **UTAH.**

ffice: Salt Lake City, Utah. Mine office: Ibapah, Tooele Co., Utah. P. Richards, president; Richard W. Young, vice-president; Harold E. , secretary and treasurer. Organized September, 1909, under laws of with capitalization $50,000, shares $1 par. Property is in the Clifton t.

FIELD CONSOLIDATED MINING CO. **UTAH.**

ffice and mine: Bingham Canyon, Salt Lake Co., Utah. Organized circa t, 1907, under laws of Utah, with capitalization $100,000 shares, 10 cents Thos. H. Quillen, president; Francis W. Quinn, secretary and treasurer; ling officers, E. C. Ashton and Ray Van Cott, directors. Lands, 4 claims, West Mountain district.

INTO TREADWELL MINING CO. **WASHINGTON.**

line office: Curlew, Ferry Co., Wash. G. B. Dennis, president; J. L. Mar- anager. Lands, 7 claims, 24 miles from Phoenix, B. C., showing 4 parallel with north and south strike, claimed to range 50′ to 100′ in width. Ore lcopyrite, associated with galena, both argentiferous and auriferous, giv- says up to $18.50 per ton, in combined values of copper, lead, silver and Mine has several shallow shafts and an 85′ tunnel, latter planned to be to 400′.

AQUI CO. **MEXICO.**

ffice: Bisbee, Ariz. Mine office: San Antonio de la Huerta, Ures, , Mex. Fritz L. Harrington, president; Geo. Buxton, vice-president; A. eler, secretary; Jos. E. Morrison, treasurer. Organized circa 1909. Lands, acres, adjacent to San Antonio Copper Co., including the San Antonio do group, showing some traces of antigua workings.

showing mainly sulphides, with some copper oxides, associated with lead, and antimony, all slightly auriferous.

ESELSKABET SAINT KNUT'S GRUBER. **NORWAY.**

Mine office: Lille-Elvedalen, Trondhjem, Norway. A. M. Baastad, agent. ized under laws of Norway, with capitalization 100,000 kroner. At last its was doing exploratory work for copper, with a small force.

T MARY MINING CO. **UTAH.**

Office: Palladio Bldg., Duluth, Minn. Mine office: Milford, Beaver Co., Patrick Ryan, president and treasurer; L. B. Bohn, vice-president; P. D. ing, secretary; preceding officers, Jas. Barrett and Isidore Lessing, direc- W. J. Merritt, superintendent. Lands, 3 claims, 2 patented, area 30 acres, e eastern flank of Picacho Mountain, 4 miles from Milford, in the Star ct. Mine has an 85′ two-compartment shaft and a 375′ tunnel. A carload ment of ore gave smelter returns of 17.07% copper, 2.5% zinc, 10.5 oz. r and $2.20 gold per ton. Equipment includes a 36-h. p. gasoline hoist.

NEOT MINING SYNDICATE, LTD. **ENGLAND.**

Office: 6 Queen Street Place, London, E. C., Eng. Mine office: Liskeard, wall, Eng. W. F. Garland, secretary; John Taylor & Sons, managers. nized July 4, 1907, under laws of Great Britain, with capitalization £5,000, es £1 par; issued, £4,907, of which 1,000 shares are fully paid and 3,907 are paid in. Property is an option over copper and tin mining rights, in the sh of St. Neot, near Liskeard, consideration for which was £1,000 in full shares.

ERINO SALAZAR. **MEXICO.**

Mine office: Matehuala, Catorce, San Luis Potosí, Mex. Lands, 9 groups, 60 hectares, including La Valenciana mine at Hacienda de Vánegas, near ehuala, developed to depth of about 60 meters, carrying argentiferous cop- carbonates, from which a small production has been secured. Also owns Independencia mine, near Concepción del Oro, Zacatecas, Mexico, area 38 ares.

TDALEN OG STREMEN'S GRUBERSELSKAB. **NORWAY.**

Office: Gransvits, Norway. Mine office: Kaafjord, Tromsö, Norway. perty is sundry copper claims, under development at last accounts, in 1907.

TILLO MINING & MILLING CO. **MEXICO.**

Mine office: El Salado, Catorce, San Luis Potosí, Mex. Merle M. Stewart, ral manager. Property is El Saltillito mine, carrying auriferous and ar- iferous copper ores, with values mainly in the precious metals. Equipment des steam and electric plants and a 3-stamp mill. Employs circa 100 men.

UDA COPPER MINING CO. **SOUTH CAROLINA.**

Office: Lynchburg, Va. Mine office: Donalds, Abbeville Co., S. C. Frank arman, president; J. P. Smith, vice-president; John F. McGee, secretary, surer and general manager; preceding officers, P. K. McCully, Sr., J. M. Mc- ell, Thos. Atten and G. W. Ould, directors. Organized under laws of South lina, with capitalization $50,000. Lands, about a mile from Donalds, were ected, to some extent, by individuals, before organization of present com- Development is by temporary shafts, showing sulphide copper ore carry- small quantities of gold. It is claimed that the average of 10 assays was copper, which seems doubtful, unless samples were selected with great Company plans shipping ore to Ducktown, Tennessee, and building a er later.

AÑÍA MINERA SAN BERNABE y ANEXAS. **MÉXICO.**

Office and mine: Zacatecas, Zacatecas, Mex. C. A. Bentley, manager. s, 25 hectares, including La Confianza, El Faro and La Fama mines, west e Malanoche mine. Lands include the oldest mine in Zacatecas, discov- circa A. D. 1546, which was a considerable producer of silver in olden

days. Property formerly was under option to an English company, but option was dropped after unwatering the old shaft. Ore is highly argentiferous copper, associated with some lead, values being mainly in silver. Was shipping, April, 1909, some copper and lead ore.

MINA SAN BRUNO. SPAIN

Mine office: Paimogo, Huelva, Spain. Lands adjoin the Sociedad Anonima Minas Peñuelas Paimogo. Mine, supposedly bottomed, is not a producer, but ore outcrops apparently might be followed. Idle.

SAN CARLOS MINING CO. MEXICO

Office: 42 Broadway, New York, N. Y. Mine office: Ures, Sonora, Mex. Jos. H. Everett, president; F. Willard Carlisle, secretary and treasurer, Geo. D. Stonestreet, engineer. Capitalization $500,000, shares $1 par. Company planned, August, 1909, to reorganize under proposed title of Sonora United Mines. Lands, 169 acres, including various groups. San Carlos No. 1, area 9 acres, and San Carlos No. 2, adjoining, area 50 acres, are 9 miles south of Matape and 45 miles northeast of the terminal of the Torres y Prieta railroad, connecting with the Southern Pacific. The San Carlos group shows good outcrops, and has several veins carrying rich ore. La Paloma group, area 25 acres, 8 miles from Matape, has a 50′ shaft, showing ore assaying 13% copper. A 15-ton mill was installed, April, 1908, on San Carlos No. 1.

SAN JUAN MINES CO. MEXICO

Office: 317 Equitable Bldg., Denver, Colo. Mine office: San Javier, Hermosillo, Sonora, Mex. J. F. Williams, superintendent. Ores carry gold, silver and copper values. Was developing with a small force at last accounts.

COMPAÑÍA MINERA DE SAN LUIS POTOSÍ. MEXICO

Mine office: Mapimí, Durango, Mex. Property is the Siderita y Anexas mines, carrying copper ore. Was a small producer at last accounts.

SAN LUIS POTOSÍ SMELTER. MEXICO

Owned by Compañía Metalurgica Mexicana, at San Luis Potosí, S. L. P., Mex.

SAN MARCOS MINING CO. MEXICO

Office: Calle Espiritu Santo 5, Mexico, D. F. Mine office: Etzatlán, Ahualulco, Jalisco, Mex. F. W. Green, president; T. J. Pomeroy, secretary and treasurer; Riley R. Morrison, general manager; E. B. Elliott, superintendent. Lands, 100 acres, on Tepehuaje Mountain, in vicinity of Etzatlán, showing veins carrying copper, which have been slightly developed.

SAN MARINO MINING & MILLING CO. WASHINGTON

Mine office: Nespelem, Okanogan Co., Wash. Capitalization $50,000. Lands, 4 claims, area 64 acres, in process of patenting. Property shows a north and south vein and 3 cross veins. Development is by a 180′ tunnel, with lead of 150′, intersecting a 12′ vein carrying mainly gold and silver values; by an opencut 25′ deep showing ore assaying well in gold and silver, and by shafts of 28′ and 40′, latter showing ore assaying 2 to 3% copper and $2.60 per ton in combined gold and silver values.

SAN MARTÍN MINING CO. MEXICO

Office: : Paseo Bolivar 407, Chihuahua, Chih., Mex. Mine office: Urraldi, Rayón, Chihuahua, Mex. John J. Clague and John J. Waterson, managers. Lands, 68 hectares, having 4 shafts and a 1,600′ tunnel, developing ore carrying copper, lead, zinc, silver and gold. Equipment includes a 50-h. p. Pelton wheel and a concentrator with two 4′ Bryan mills, 2 Bartlett tables and 3 Wilfley tables. There also is a small smelter with 25-ton reverberatory furnace. Employed about 50 men at last accounts.

SAN ROBERTO MINING CO. MEXICO

Office and mine: Zacatecas, Zacatecas, Mex. C. A. Bentley, general man-

Property, slightly developed, shows auriferous and argentiferous copper lead ores, and small smelter shipments have been made.

SALVADOR MINING CO. **MEXICO.**

Mine office: Terrazas, Iturbide, Chihuahua, Mex. Alberto Terrazas, presi- Felix MacDonald, general manager. Property is San Salvador mine, ed by 2 shafts, showing lead and copper ores. Has a gasoline hoist.

TIMOTEO MINING & SMELTING CO. **MEXICO.**

Mine office: Uruáchic, Rayón, Chihuahua, Mex. T. A. Ripperdan, super- dent. Mine carries auriferous and slightly argentiferous copper ore, said verage about 50 pesos per ton in gross values. A smelter, built 1909, has -ton reverberatory matting furnace.

TA ANA MINING CO. **MÉXICO.**

Office: Paseo Bolivar 284, Chihuahua, Mex. Mine office: Jiménez, Chi- ua, Mex. Alberto Goldschmidt, president and general manager. Property, ilometers from Jiménez, has a 150′ shaft developing auriferous copper ore. umably idle.

IPAÑÍA MINERA SANTA ELENA DEL COBRE y ANEXAS, S. A. **MEXICO.**

Mine office: Sultepec, Mexico, Mex. Organized Aug. 24, 1907, under laws lexico, with capitalization 66,000 pesos. Property includes La Santa Elena, rotectorio, La Salvadora and La Esmeralda mines.

TA FÉ CONSOLIDATED MINING CO. **MEXICO.**

Office: Bisbee, Ariz. Mine office: La Cananea, Arizpe, Sonora, Mex. Tehaney, president; B. A. Packard, vice-president; C. I. McReynolds, sec- y; R. L. O'Neil, treasurer; preceding officers and C. W. McHenry, directors. nized April, 1909, under laws of Arizona, with capitalization $500,000, es $2.50 par. Lands, 238 hectares. Property was worked, 1886, by Col. C. Greene.

TA LUCIA SYNDICATE, LTD. **CHILE.**

Office: 4 Copthall Chambers, London, E. C., Eng. Mine office: Los An- , La Ligua, Aconcagua, Chile. H. K. Paxton, director; F. E. Hodges, secre- Organized Dec. 24, 1906, under laws of Great Britain, with capitalization 00, shares £1 par; issued, £5,570, fully paid. Property was an option on er mining claims on the Canaveral Estate, near Los Anjeles, which option id to have been surrendered.

IPAÑÍA MINERA SANTA RITA. **MEXICO.**

Office: Chihuahua, Chih., Mex. Mine office: Santa Barbara, Hidalgo, uahua, Mex. Alberto Terrazas, president; Miguel Horcasitas, manager. erty is the Santa Rita mine, in the Chorreras Mountains, showing ore car- g values mainly in copper.

IPAÑÍA MINERA SANTA ROSA. **MÉXICO.**

Mine office: Mazapil, Zacatecas, Mex. Lands, showing copper ore, were er development at last accounts.

IPAÑÍA MINERA BENEFICIADORA DE SANTA TERESA, S. A. **MEXICO.**

Office: Mexico, D. F. Mine office: Coyuca de Catalán, Mina, Guerrero, Organized Apr. 30, 1897, under laws of Mexico, with capitalization 00 pesos. Property is the Santa Teresa mine, in the Mina district, carry- rgentiferous copper ores.

IEDAD MINERA SANTO DOMINGO HUACHUAMACHAY. **PERÚ.**

Mine office: Morrococha, Junin, Peru. Mine has a vein of 60 to 70 centi- rs width, traceable circa 400 meters, with irregular mineralization, carry- rgentiferous copper ores, developed by 4 tunnels, at distances of 40 to 60 rs vertically. Product is exported to Liverpool for reduction.

9.1% copper. Company apparently is devoting its attention mainly to tion of its asbestos claims.

N TWELVE EXPLORATION CO. **MICHIGAN.**

ce: Hancock, Mich. Mine office: Houghton, Houghton Co., Mich. M. hell, agent; Jas. P. Edwards, engineer. Capitalization $20,000, shares convertible into shares at subscription price in case of the organization ning company to succeed the exploration pool, which is not incorporated. 440 acres, held under option, adjoining the Isle Royale on the southeast, g the Lynch farm, lands being in Section 12, T. 54 N., R. 34 W. and 6 and 7, T. 54 N., R. 33 W. Company is boring with diamond drill northern extension of the Baltic lode, and secured, November, 1909, r-bearing drill core, but experienced much delay from caving ground. y considered promising.

ITY GOLD & COPPER CO. **WYOMING.**

ne office: Atlantic City, Frémont Co., Wyo. Lands, west of Atlantic ow a vein of 20′ estimated width, carrying ore said to give good gold

ITY MINING & DEVELOPMENT CO. **MONTANA.**

ne office: Princeton, Granite Co., Mont. Lands, 5 claims, near the n group, showing a porphyry dyke of 130′ estimated width, in lime- vith entire dyke claimed to carry average values of 15 oz. silver, with d and copper values. Mine, opened to depth of 175′, shipped 15 car- ore during development, having average assays of 2.98% copper, 7.5% .7 oz. silver and 40 cents gold per ton.

ANZA MINING CO., S. A. **MEXICO.**

ce: Apartado 295, San Luis Potosí, Mex. Mine office: Zacualpam, , Mexico, Mex. G. Waddill, president; preceding officer, F. C. Doty, C. ggerhoff, E. Lavin and Pedro Barcena y Trueba, directors; A. Kraemer, sario. Organized 1907, under laws of Mexico, with capitalization 300,000 hares 10 pesos par. Lands, 25 hectares, an antigua mine, said to have rked in the Sixteenth Century, near Zacualpam, adjoining the Carbon- ne, carrying 7 defined veins, opened by about 1,500 meters of tunnels, o tunnel exploiting a vein of about 35′ width, said to carry 1 to 3 kgs. nd 4 to 10 grams gold per ton. Company also owns copper claims, car- uriferous and argentiferous copper ore, in the state of Michoacán, which tly are idle. Company was said, 1908, to have ordered a 120-ton mill.

OR GOLD MINING & MILLING CO. **COLORADO.**

ne office: Breckenridge, Summit Co., Colo. M. M. Howe, manager. y carries auriferous and argentiferous copper ores, with values mainly in ious metals. Equipment includes a small steam plant.

ROCK MINE. **CALIFORNIA.**

ice: P. O. Box 117, Placerville, Cal. Mine office: Greenwood, El Co., Cal. Lle. H. Wilkins, owner and manager. Lands, 28 claims, area es, in Section 26, and 12 claims, area 150 acres, patented, in Section 24, N., R. 9 E. Property, well watered and timbered, is 3 miles from Green- in the Foothill copper belt, and is about equally distant from Auburn acerville. The tract carries about 4,500′ of the strike of a copper ore aving a hemitite footwall and porphyry hanging-wall. Several prospect show the continuity of the ore body, which is sulphide, estimated to aver- out 6% copper, with fair to good gold and silver values. Developments the 80′ Lipton tunnel, showing an ore body of 2′ to 4′ width, giving up to 4% copper, 12 oz. silver and $10 gold per ton, and the 180′ Dundee in ore, breasted in a vein of about 4′ width carrying a 2′ paystreak g good values in copper, gold and silver. The floor of the Dundee tun-

nel gives ore assaying 4% copper, 12
some ore assaying up to 8% copper, 12

SILVER ROCK MINING CO.

Office and mine: Wallace, Shoshon
Lands, 9 claims, between the Argentine
the Oregon Railway & Navigation line,
heavy iron outcrop carrying gray coppe

SILVER SEAL MINING CO.

Mine office: Pilares de Teras, Mo
superintendent. Work was begun, ear

l ore assaying up to 15% copper and 400 oz. silver per metric ton. Up ust, 1909, company shipped, by pack trains, 15 miles to Nacozari, about worth of ore, said to have given smelter returns of $75 to $90 per metric roperty considered promising.

R SPUR PROPRIETARY, N. L. **AUSTRALIA.**

ine office: Silver Spur, Stanthorpe Co., Queensland, Australia. Property mediately south of the Silver Spur mine. Presumably idle.

MOUNTAIN COPPER CO. **ARIZONA.**

ine office: Johnson, Cochise Co., Ariz. Edward Ball, manager. Was de- ug with a small force at last accounts.

SELSKABET SKANDIA KOBBERGRUBER. **NORWAY.**

ine office: Narvik, Tromsö, Norway. Property includes copper claims fjord, Salten and Nordreisen, Tromsö, and pyrite claims at Ofoten.

UTTLE MINING CO. **BRITISH COLUMBIA.**

ine office: Jedway, Queen Charlotte Island, B. C. Property is on by Island. Presumably idle.

KUM COPPER CO. **WASHINGTON.**

ine office: Cle Elum, Kittitas Co., Wash. Property was under develop- vith a considerable force, and management planned a 250-ton concentrator accounts.

UNA MINING CO. **COLORADO.**

ine office: Idaho Springs, Clear Creek Co., Colo. Rufus C. Bonney, gen- anager. Lands are the Sun and Moon group, formerly owned by the Sun n Mining & Milling Co. The mines carry auriferous and argentiferous and lead ores. Equipment includes steam and electric plants, a Leyner npressor and a 50-ton cyanide plant.

RA CONSOLIDATED MINES CO. **MEXICO.**

ffice and mine: Hermosillo, Sonora, Mex. Max Müller, president; Herman er, general manager; Hon. Victorano Aguilar, secretary. Organized 1909, apitalization $2,000,000. Lands include about 20 different groups, adja- o the new line of the Southern Pacific, showing ores containing gold, copper and mercury.

HERN NEVADA COPPER CO. **NEVADA.**

ffice: Blackfoot, Idaho. Mine office: Gold Butte, Lincoln Co., Nev. Hardy tts, president; John W. Jones, secretary and treasurer; Orange W. Earle, er. Capitalization $750,000, shares $1 par. Lands, 6 claims, showing a on blowout carrying copper carbonates and sulphides, said to exist in e quantities. Development is by a 185′ tunnel.

HERN OREGON CO. **CALIFORNIA.**

ine office: Hutton, Siskiyou Co., Cal. Horace Monroe, manager. Develop- is by tunnels, longest, of circa 400′, showing a main vein of 7′ to 10′ ted width, carrying sulphide ore said to assay 4 to 5% copper, 5 oz. silver 2.80 gold per ton.

HERN SULPHUR ORE CO. **ALABAMA.**

ffice: Atlanta, Ga. Mine office: Pyriton, Clay Co., Ala. W. T. Williams, intendent. Property is a mine producing cupriferous and slightly rous and argentiferous iron pyrites. Equipment includes a steam plant. employs about 50 men.

H LAKE MINING CO. **MICHIGAN.**

ffice: 68 Devonshire St., Boston, Mass. Mine office: Greenland, Ontonagon ich. John C. Watson, president; F. W. Morandi, secretary and treasurer. ized 1863, under laws of Michigan, with capitalization $1,000,000, shares r, as the Aztec Copper Co., and title changed, Aug. 9, 1909, to South Lake g Co., at which time capitalization was increased to $2,500,000, shares $25 Outstanding shares of old company were $4.60 paid in. Of the 60,000 new

shares, 20,000 were issued at $2 each, in August, 1909, to sha record, in proportion to their holdings, thus raising $40,000 for oper

Lands, 320 acres, being the W. ½ of Section 31, T. 51 N., R. 1,214 acres of agricultural and timber lands, in Sections 10, 12 and 1 R. 38 W. Work was begun on the property in 1862, and the mine ha mill in early days, producing 756,863 lbs. fine copper, of which 10 secured in a single mass. Exploratory work was done, 1905-19 Knowlton lode of this property by the Aztec-Algomah Development mond drill borings were begun September, 1909, starting work at t Evergreen Bluff, near the footwall of the Evergreen belt, thence wor ward toward the Eastern sandstone. Property, though small, is co have good prospects of locating the Lake amygdaloid.

SOUTH MOUNTAIN COPPER MINING CO. M

Mine office: Smithsburg, Washington Co., Md. Warren H. Go ager. Organized 1907, under laws of Delaware, with capitalization shares $1 par. Lands, 80 acres, 3 miles southeast of Smithsburg, of South Mountain. Property, under development by tunnel, is sa native copper, and has secured good copper assays, with fair gold values, and the precious metals are said to exist in sufficient quanti copper without cost, which possibly may not prove the case, inasm not the case in any other copper mine.

SOUTHWEST CONSOLIDATED MINING & MILLING CO.

Office and mine: Farmington, Davis Co., Utah. J. D. Wood J. H. Robinson, vice-president; J. H. Wilcox, secretary and treasure officers, David Hess and W. Crawford Anderson, directors; W. general manager. Capitalization $30,000, shares 10 cents par. Pro contact deposit, with quartzite hanging and gneiss footwall, dev 345′ tunnel, showing a 40″ vein carrying ore said to average 1.5% lead, 2.5 oz. silver and $2 gold per ton.

SOUTHWESTERN DEVELOPMENT CO.

Office: 22 Congress Square, Boston, Mass. Mine office: Moctezu Mex. Capitalization $500,000, shares $1 par. Federal Trust Co., istrar. Lands are 9 claims in the Marius Mountain district o County, California, said to carry "stratas" of high grade ore, ma with some silver and gold, also 200 acres, known as the Casa Viej properties, in the district of Hermosillo, Sonora, Mexico, said to car fissure veins. Company also was said to have had an option on the mine of the Travers-Durkee Coppers, but apparently same was no Property was boomed systematically by M. C. Barnard & Co., of unc from 10 cents to $1.06 per share, whence it slumped back promptly the market sponsers going broke. Is not regarded favorably.

SPANISH PROSPECTING CO., LTD.

Office: 151 Cannon St., London, E. C., Eng. J. B. White, cha ceding officer, Wm. C. Punchard and Stephen Vivian, directors; Hopper, secretary. Organized May 14, 1901, under laws of Great B capitalization £20,000, shares £1 par; issued, £10,817, of which 6,01 fully paid and 4,800 are 13s. 6d. paid in. Property is 1,152 shares Copper Co., Ltd., and £3,840 debentures of Esperanza Copper & S Ltd.

SPECIE PAYMENT GOLD MINING CO. C

Office: 752 Equitable Bldg., Denver, Colo. Mine office: Idah Clear Creek Co., Colo. A. M. Welles, general manager; A. E. Simps tendent. Mine carries auriferous and argentiferous copper ores, mainly in gold. Equipment includes an electric plant, air-compr 20-stamp mill.

ER MOUNTAIN TUNNEL CO. COLORADO.
ne office: Eldora, Boulder Co., Colo. J. A. Gilfillan, superintendent. developed by tunnel, carries auriferous and argentiferous copper ores. ent includes a steam plant and air-compressor.

G CREEK MINE. AUSTRALIA.
ine office: Melrose, South Australia. Lands, 11 claims, on the bank of Creek, north of Melrose, on the northern flank of Mount Remarkable. ty has country rocks of clay-slate and sandstone, giving a strong sur- howing of copper ores, including cuprite, azurite and malachite and ional native copper. Ore is bunchy, being mainly cuprite, malachite tetrahedrite, associated with iron, and a general sample of ore from the gs gave 4.9 to 8% copper. Development is by a 140′ shaft and a tunnel. roperty is said to have yielded considerable ore in early days, and a r was built nearby, on the Melrose road. Production, 1907, was 70 long f ore returning 5 to 15% copper.

RE DEAL MINING & MILLING CO. ARIZONA.
ffice: Marquette, Mich. Mine office: Cave Creek, Maricopa Co., Ariz. any was organized, 1907, by A. Manthei, Frank E. Withey and Geo. E. h. Lands, 15 claims, 5 miles from Rogers Springs. Presumably idle.

NDARD CONSOLIDATED MINING CO. UTAH.
Office: Provo, Utah. Mine office: Cedar City, Iron Co., Utah. J. W. Will- n, president; F. B. Clark, vice-president; Geo. Schultz, secretary and urer; preceding officers, J. R. Richards and Monroe Clark, directors. Organ- circa October, 1909, under laws of Utah, with capitalization $250,000, s 25 cents par. Lands, well timbered, near Sand Springs, above the heads allion and Chloride cañons, in the Antelope range, carry a vein claimed to age 194′ between walls, also claimed to give surface ores averaging 3 to 8% er, 8 to 33% lead and $1 to $9 gold per ton, but the company's claims are dered excessive.

CESS MINING CO. COLORADO.
Mine office: Alma, Park Co., Colo. E. O. Moynihan, superintendent. Prop- carries auriferous copper ore, and has a small steam plant.

FIELD & KING MINES. QUEBEC.
Owned by A. O. Norton, at Suffield, Sherbrooke Co., Que.

MIT GOLD & COPPER MINING CO. WASHINGTON.
Office: Spokane, Wash. Mine office: Rockcut, Ferry Co., Wash. N. T. on, president and general manager; Stephen Tanner, secretary and treas- Lands are 2 groups, known as the Railroad and Summit claims. The mit group, 7 claims, has a 110′ tunnel crosscutting a vein of 25′ estimated ge width, and also has a 7′ vein, said to carry $10 gold per ton. The ad group, between Rockcut and Laurier, shows a vein of 25′ estimated , showing 4′ to 5′ of chalcopyrite of smelting ore, and about 20′ of ore of ntrating grade, opened by a 147′ incline shaft.

NYSIDE COPPER MINING CO. AUSTRALIA.
Mine office: Marodian, Queensland, Australia. Mine has shafts of 60′ and nd an opencut, and in 1907 shipped 12 long tons of ore giving average er returns of £17 7s. 6d. per ton, of which 2 tons returned 14% copper. at last accounts.

SET MINING & DEVELOPMENT CO. WASHINGTON.
Mine office: Northport, Stevens Co., Wash. H. W. Working, superintendent. s carry auriferous and argentiferous copper ores, under development with n power and a small force at last accounts.

ERIOR COPPER MINING CO. WASHINGTON.
Mine office: Chewelah, Stevens Co., Wash. Property carries 3 veins, of h 1, of 14′ width, is opened by a 600′ crosscut tunnel, showing auriferous

chtweih, vice-president; S. Howard Leech, secretary and treasurer; A. F.
ider, general manager; preceding officers and P. A. Holm, directors.
ized April, 1909, under laws of Arizona, with capitalization $600,000,
s $1 par. Lands, 4 claims, known as El Paso group, next west of the
e Carlo mine. Property has 2 fissure veins, crossing near the 70′ main
, which is said to show 5′ of ore assaying up to 21% copper and 200 oz.
per ton. Management was said, April, 1909, to have let a 2-year contract
levelopment.

S SEÑORES MINING CO. MEXICO.
Mine office: San Pedro Ocampo, Mazapil, Zacatecas, Mex. Property in-
s La Providencia and La Poderosa mines, near San Pedro Ocampo, yielding
that have given smelter returns of 10% copper, 3,234 grams silver and 120
s gold per metric ton.

ANGLE MINING CO. MÉXICO.
Office: 1251 Michigan Ave., Chicago, Ills. Mine office: Pesqueira, Ures,
ora, Mex. Hiram Baldwin, president; Winthrop Burdick, secretary; W. J.
lick, superintendent. Organized under laws of Arizona, with capitalization
,000, shares 50 cents par. Has a $25,000 bond issue, in denominations of
per bond, which the company was endeavoring, March, 1909, to sell at par,
ng 400 shares of capital stock as a bonus with each bond. Lands, 10
ares, about 25 miles east of Pesqueira, including the Rey Eduardo mine, said
e an antigua, and the Elena mine having an 80′ shaft and a 50′ drift said
how ore giving assays of 30 to 40% copper. Company claims to have 3
en properties, which seems doubtful, and advertised, March, 1909, that
in 3 months it could be shipping 5 cars of selected ore daily, averaging
es of $200 per ton, which seems something more than dubious. The com-
also advertised that it should be able to pay 4% monthly dividends, but
ends apparently have failed to materialize. Is not regarded favorably.

ANGLE MINING & DEVELOPMENT CO. MONTANA.
Mine office: Clinton, Missoula Co., Mont. Robt. B. Hughes, president and
al manager. Company bonded its property, circa January, 1909, to the
tana-Clinton Copper Co., but latter forfeited the bond, October, 1909, and
erty reverted to the Triangle company, after a payment of $15,000 cash
some stock in the Montana-Clinton. Lands, 11 claims, unpatented, well
ered and timbered, including the Triangle group of 6 claims and the Grass
ow group of 5 claims, in the Wallace district, about 2 miles northeast of
ton and 19 miles south of Missoula. Company also owns several blocks in

the townsite of East Clinton, and a
perpetual lease on the upper workings
half mile from the Triangle, at a roy
the ore, which seems a high percentag

UTAH METAL MINING CO.

Office: 161 Devonshire St., Boston,
Salt Lake Co., Utah. Samuel H. Treloar
tendent. Was promoted by Walter B.
of the Bingham Metal Co., and W.
Standard Copper Co. Organized 1909, u

,000, shares $5 par, as a merger of the Bingham Central Mining Co., am Standard Copper Co. and Bingham Central-Standard Copper Co., being a holding company controlling the two other corporations previously l. The new company gave the Bingham Central-Standard Copper Co. 0 shares of stock, or about 1 share for 3, leaving 785,000 shares in the ry of the new company. The Bingham Central-Standard had a $347,000 l indebtedness, and bond-holders have been given the privilege of con- g bonds into stock, within 2 years, on the basis of $2 per share, or may cash in 5 years instead. After providing stock for the conversion of the , there remained about 612,000 shares in the treasury, which the manage- planned underwriting at $3 per share, to provide a large working capital e extensive equipment and development of the consolidated property.

ands, circa 3,500 acres, including mineral lands and extensive timber , with a millsite, and a water-right estimated as capable of developing h. p. Company's holdings extend from Carr Fork Cañon, in Bingham n, over the divide of the Oquirrh range into Middle Cañon, Tooele County, Property includes former holdings of the Bingham Metal Mining Co., am Metals Co., Bingham Central Mining Co. and Bingham Standard r Co. Lands of the Bingham Metal Mining Co. and Bingham Metals Co., e Tooele side of the divide, were circa 1,300 acres, in Middle Cañon, timbered and having a saw-mill. The Middle Cañon lands show a lime- belt much similar to that on the Bingham side of the divide. The Tooele , in Middle Cañon, have 5 tunnels, No. 1 being 1,400′, No. 4 being 1,700′ No. 5 being 500′ in length. It is thought that the cupriferous porphyry ngham Canyon may extend to this property.

Tunnel No. 1 of the Bingham Metal group, about 3,000′ long, Sept. 15, is planned to cut entirely through the mountain, in a length of circa 0′. At a further distance of about 2,500′, this tunnel should cut into the issures of the Bingham Central-Standard group, and the tunnel will give k of circa 2,300′, vertically, at the deepest point, under the Ridge claim. el No. 1 is 9x9′ in the clear, and double-tracked, with a launder beneath vater, seepage of which is about 600 gallons per minute, which should be led by the completion of the tunnel. Tunnel was idle at last accounts, ing relaying of track with 35-lb. steel rails, and the construction of a new r house, electric plant and haulage system. By cutting through the entire o the Carr Fork side, No. 1 tunnel will afford drainage for the entire rty, also transportation facilities, and will tap, at depth, the ore bodies e Bingham Central-Standard group. This tunnel cost only a trifle above r foot for the first 3,000′.

No. 2 tunnel is located about one mile down the cañon from No. 1, and vertically lower.

The Carr Fork property, in the Bingham Canyon district, adjoins the n Consolidated, Utah Consolidated and Bingham-New Haven properties, includes the Bingham Central and Bingham Standard groups, carrying 3 vein systems, known as the Saginaw, Burning Moscow and Nast, each able for a distance of circa 4,500′, and all intersected by the Old Jordan . Property also carries several smaller lead veins.

Lands of the Bingham Standard Copper Co. were 320 acres, partly pat- l, developed by the Saginaw tunnel, and the mine is said to have produced 000 worth of ore under a former management, shipping some ore in 1907. The lands of the Bingham Central Mining Co. were 190 acres, patented, loped by 2 tunnels, known as the upper or Whiteley tunnel, and the lower ff Davis tunnel, with about 9,000′ of workings.

The Whiteley or upper tunnel, of about 2,000′ length, shows mainly silver-

lead ore, and has about 500' to drive to reac
be tapped at depth of about 150' below the L

The Jeff Davis or lower tunnel, of circa from the portal, a vein of sulphide concentrat with small gold and silver values, and at a di lead vein, of 2' to 8' width, carrying a consid with copper values of 2 to 5%. In 1908 this of 3' to 4' width, giving assays of 12% coppe lead ore of good average tenor.

The Amelia tunnel, with portal about 17 tunnel, shows a vein of about 75' estimated s of circa 90', carries low grade concentrating copper and $1.50 gold per ton, with small sil

The Deems tunnel, from Log Fork, is an a strong vein carrying some good ore.

The Saginaw tunnel, about 700' long, fol showing 1' to 12' width of ore, from which made.

The Mountain Maid tunnel of the Bi about 950' in length.

The property includes a millsite in Midd tunnel, and has enough water developed for supply can be obtained from springs on th and it is planned to pipe water through the to Bingham Canyon, where water is needed.

Equipment includes small mining plants power plant in Middle Cañon has direct-con agement plans installing a heavy electric eq number of buildings at the various properties and mill is about 4 miles from the Internati

The Utah Metal Mining Co. is an ambiti acreage of land, but has a number of proper devoid of promise, though it will require a erty adequately.

OMIYA MINING CO. **JAPAN.**
e office: Mihara-mura, Itsuki-gori, Bitchu, Japan. Mine, having no lant, employed 666 hands in 1907. Production, 1907, was 80,531 lbs. ,201 oz. silver and 30 oz. gold, in addition to 3,470,931 lbs. of auriferous entiferous copper ore, giving total production for 1907 estimated at lbs. fine copper.

NONI. **PERÚ.**
e office: Casapalca, Oroya, Perú. Property, in the vicinity of Backus ton, employed 30 men, at average wages of 1 peso daily, in 1907. Pro- 1905, was 300 metric tons of ore, yielding 99,207 lbs. copper and 390 er, and production, 1907, was 700 metric tons of ore, averaging 14% nd circa 1,200 grams silver per ton, returning 216,050 lbs. fine copper kgs. silver.

KYSSHTIM WORKS. **RUSSIA.**
ed by Kyshtim Corporation, Ltd., at Kyshtim, Perm, Russia.

COPPER MINING CO. **ARIZONA.**
e: 303-167 Dearborn St., Chicago, Ills. Mine office: Jerome, Yavapai z. W. P. Cooper, president; E. C. Weatherley, vice-president; John general manager; J. J. O'Donohue, secretary and treasurer; J. P. superintendent. Organized January, 1904, under laws of Arizona, pitalization $3,000,000, shares $1 par, as North Verde Copper Co., and anged, January, 1909, to present title. Lands, 6 claims, area 120 acres, United Verde, having a 375′ shaft, which management planned sinking of 1,000′, and a 250′ tunnel, latter showing calcspar, iron and soft rock, e of circa 150′ width, with a very little ore carrying 2.5% copper and ver per ton, with a trace of gold. Equipment includes a 70-h. p. boiler, Fairbanks & Morse double-cylinder hoist and an air-compressor. Lands mped, January, 1908, but company claimed that assessment work was perly, and jumping illegal, and apparently won out on this contention. was idle for more than 2 years, until March, 1909, when it was stated rk was about to be resumed, but property apparently has remained idle.

MINING CO. **UTAH.**
e office: Alta, Salt Lake Co., Utah. Lands, 7 miles from Alta, in the district, near the mouth of Little Cottonwood Cañon, are 6 claims, but is in litigation with the Great Copper Flat Mining Co. over ownership of these claims, and possibly may be consolidated with the Copper Flat. ably idle.

COPPER CO. **PENNSYLVANIA.**
ce: York, Pa. Mine office: Charmian, Franklin Co., Pa. J. H. Dechert, t; H. S. Wiest, treasurer; C. E. Wills, general manager. Capitalization . Lands, about midway between Charmian and Gladhill, in the Blue lountains, show ore giving assay values of $25 to $600 per ton in native silver and gold. Mine has a 200′ shaft, sunk at an angle of 47°, and drilling was begun, July, 1907, this including 4 holes, of 165′ to 800′. ent includes a hoist and air-compressor.

NIA DEVELOPMENT CO. **MEXICO.**
e office: Fronteras, Arizpe, Sonora, Mex. W. B. McBride, president; , manager. Lands, 32 hectares, near the Cabullona mine, having a 40′ aid to show native copper and mixed carbonates, claimed to give average f 26% copper, 30 oz. silver and $4.96 gold per ton.

N COPPER CO. **ARIZONA.**
ce: Prescott, Ariz. Mine office: Jerome, Yavapai Co., Ariz. Chas. T. president; W. S. Norvell, secretary; Jos. Larsen, superintendent. Capi- n $3,000,000, shares $10 par. Lands, 8 claims, partly fractional, area , in Deception Gulch, surrounded by the United Verde, Hull, Haynes

and Verde Grande properties. Mine is being developed by tunnel giving a lea of about 300′, and management has planned sinking a 2-compartment shaft, t connect with the tunnel.

WALLABY COPPER MINES, LTD. AUSTRALIA.

Office: 17 Abchurch Lane, London, E. C., Eng. Mine office: Northampton Western Australia. B. Argall and A. E. Powell, directors. Organized Feb. 3, 1909, under laws of Great Britain, with capitalization £20,000, shares 1s. pa Lands, 100 acres, freehold, known as the Wheal Fortune Extended mine, formerly held by Wheal Fortune Extended, Ltd. The company claims to have a lead vein of 3′ 6″ width, and to have raised therefrom 20 tons of ore returning 70% lead. Company also claims to have ore running as high as 40% copper. Property was idle for many years. Company's prospectus claims entirely too much, and the corporation is not regarded favorably.

WALLA WALLA COPPER MINING CO. WASHINGTON.

Office: Walla Walla, Wash. Mine office: Keller, Ferry Co., Wash. Lands are near Keller, in the southern half of the Colville reserve. Considerable work has been done on the property, and ore of fair assay grade in copper and gold was developed by former owners.

WANAMAKER MINING CO. IDAHO.

Letter returned unclaimed from former mine office, Mullan, Shoshone Co., Idaho. Jas. Taylor, superintendent. Lands, 6 claims, 2 of which are supposed to carry the extension of the Iron Spar vein, adjoining the Bullion on the north, said to have a fair copper showing. Idle.

WANIBUCHI MINING CO. JAPAN.

Mine office: Hatazako-mura, Kamoishi-gori, Iwami, Japan. Property is the Wanibuchi mine, employing circa 200 hands, without power installation. Production, 1907, was 38,658 lbs. fine copper, 2,339 oz. silver, 1,594,890 lbs. copper ore and 1,486 metric tons of zinc ore, of the total value of 32,986 yen.

WASATCH-UTAH MINING CO. UTAH.

Office: 221 Atlas Block, Salt Lake City, Utah. Mine office: Brighton, Salt Lake Co., Utah. A. W. Nieman, manager; Frank Rumel, secretary. Organized circa 1908, as successor of Consolidated Jefferson Gold & Copper Mining Co. Lands of old company were 49 claims, 7 fractional, and 40 acres of placer grounds for a building site, but property of present company is said to consist of 22 patented claims, near the mouth of Little Cottonwood Cañon. Property has a 1,400′ tunnel, with about a quarter-mile of workings, showing sulphide ores said to average circa 5% copper, with small silver and large gold values. Equipment includes a good machinery plant and necessary mine buildings. Was developing with a small force at last accounts.

WELLWOOD COPPER SYNDICATE. AUSTRALIA.

Mine office: Lucknow, N. S. W., Australia. Property is in Wellwood paddock, near Lucknow, and prospecting work was begun thereon, circa 1907.

WESTERN COPPER CO. NEWFOUNDLAND.

Mine office: York Harbour, Birchy Cove, Bay of Islands, Nfld. H. V. Smythe, general manager. Lands, 4 claims, area 6,400 acres, also 26,880 acres of timber lands, giving total holdings of 33,280 acres. Mining lands are located back of the Bay of Islands, on the western coast of Newfoundland. In addition to the York Harbour mine, company holds 2 additional areas having extensive surface indications of copper. Country-rock is diorite, carrying 12 known fissure veins in serpentine, of which 5, including one of 50′ width, have been more or less developed. The country-rock is a dark green to black serpentine, the serpentine having a generally northeast and southwest trend, with dip of about 73° southeast, carrying superimposed lenticular masses of low-grade chalcopyrite, practically conformable in trend and dip, the lenses having been

crushed or broken near surface, but occurring in solid masses of nd tons at depth.

rk Harbour mine, at the head of Eagle Nest brook, about 4,000' y, and at an elevation of about 1,000' above tidewater, carries pyrite, assaying 3 to 18% copper, with occasional zinc, up to 50% to 4 oz. silver and 40 cents to $1.40 gold per ton. The ore is com- se-grained, with average values of circa 4.5% copper and 38 to 41% sulphur being valuable for use in the manufacture of acid, after n of copper values. Development is by shafts of 54', 64', 70' and out one-half mile of workings, giving about 40,000 tons of ore in new series of lenses is under development. The 360' main shaft is ngle of 72° to the southeast, practically the same as the dip of the Levels are opened at 60' intervals, with drifts driven southwest, rike of the ore bodies. One shaft is idle, and the two others are ping and ventilating purposes only. Extraction is carried on by pes, averaging 10' to 30' in width, and timbering is with 12x12" iare sets.

fthouse has a crusher of 500 tons daily capacity, reducing ore to a 6" ring, whence it goes into cars on the main tramway, which g, with an elevation of 1,000', having a 36" gauge track, trains, f 2 steel 3-ton self-dumping cars, which are lowered by a hoist ore into a 2,000-ton pocket on the bay, to a double-tracked tunnel, f which are fitted with chute gates, connecting with the super- the pier, over which one-ton cars are trammed, delivering ore into he steamer. The facilities suffice for loading 700 tons of ore daily. nt includes a 250-h. p. steam plant, with a 50-h. p. Flory hoist l Norwalk high-altitude air-compressor. Improvements include an , boiler-house, sawmill and 15 dwellings. Property considered

MINES DEVELOPMENT CO. **ARIZONA.**

ice: Swansea, Yuma Co., Ariz. C. C. Davis, president; W. C. Row- esident; R. W. Baxter, secretary and treasurer; preceding officers, eller and F. A. Jones, directors. Organized April, 1909. Mine office: Kellogg, Shoshone Co., Idah
Property is on the north side of the river,
between Kellogg and Osburn.

WOLVERINE COPPER MINING CO., LTD

Office: Wallace, Idaho. Mine office: M
Thompson, president and general manager

I. Baillie, M. B. Thompson and G. B. Cotrell, directors. Organized De- 1906, under laws of Idaho, with capitalization $1,000,000, shares $1 ands are east of Snowstorm. Presumably idle.

ING HILLS MINING CO. **WYOMING.**

ice and mine: Encampment, Carbon Co.,. Wyo. John J. Totten, presi- W. B. Dorsey, secretary; Leo Davis, agent; preceding officers, S. B. A. B. Tolen, Chauncey H. Clark, Chas. Chenny, Geo. Harding and John , directors. Organized September, 1909, under laws of Utah, with capi- on $300,000, shares $1 par.

PAI GOLD, SILVER & COPPER MINING CO. **ARIZONA.**

ne office: Crown King, Yavapai Co., Ariz. Property is the Crowned ine, in the Bradshaw Mountains, bought by present company from B. ner, receiver of the corporation formerly owning the property, for half in cash and half in shares. Lands are 18 claims, and mine has considerable producer, mainly of gold, in the past. Property has a p gold mill.

GTON MINES & EXPLORATION CO. **NEVADA.**

ne office: Yerington, Lyon Co., Nev. Otto Taubert, president; O. N. , secretary; preceding officers, August Taubert, C. S. Durand and Taubert, directors. Lands, 33 claims, in 4 groups, aggregating 23 copper and 10 gold claims, in Lyon and Douglas counties. The Taubert group, er claims, adjoins the Wabuska Copper Mines Co., and the Copper Flat claims, 1 mile east of Yerington, adjoins the Empire Copper Mines Co., f the Bluestone. Development is by a shaft, said to show ore carrying 200 gold per ton, and company plans building a mill at Nordyke, Lyon vada.

GTON NATIONAL COPPER CO. **NEVADA.**

ne office: Yerington, Lyon Co., Nev. I. A. Strosnider, secretary; C. W. er, treasurer; W. A. Johnson, superintendent. Capitalization $1,250,000, $1 par. Shares are listed on the Salt Lake stock exchange. Lands, 19 15 surveyed for patent, area circa 340 acres, adjoining the Western on the west and the Malachite on the south, about 1½ miles from the e of Mason and 12 miles from the Wabuska branch of the Southern Railroad, which line is surveyed to run across the property. Develop- by 2 prospect tunnels, of 100′ and 300′ length, and a 40′ shaft. Man- t plans development by a double-track tunnel, to be driven about a the vein, giving a back of about 1,000′. The longer tunnel has cut te ores averaging about 3% copper, with small gold and silver values.

IITE MINES CO. **UTAH.**

ne office: Bingham Canyon, Salt Lake Co., Utah. W. Mont Ferry and Bamberger, directors. Organized circa August, 1909, with capitalization 00, shares $1 par. Is practically controlled by Bingham Mines Co., a large share interest. Lands, 12 claims, including the Yosemite group tented claims, the Cluster group of 5 claims, and the Mississippi claim ng. Property is said to have produced upwards of $1,000,000 in gross es, under previous ownership. It is planned to develop the mine by a tunnel from the Mascot tunnel, giving a back of 1,500′ on the dip of the the beginning of the branch tunnel.

TANI COAL MINE CO. **JAPAN.**

ne office: Satokawa-mura, Nomi-gori, Kaga, Japan. Property is the mine, having power installations of 213 and 1,367 h. p. Ore carries gold nor silver values. Company employs circa 700 hands. Production 1,491 lbs. fine copper in 1906, and 960,052 lbs. fine copper in 1907.

AMERICA MINE. **NEW MEXICO.**

ne office: Magdalena, Socorro Co., N. M. W. Russell, lessee and man-

ager. Property carries auriferous copper ores, and has a small steam plant, employing about 20 men at last accounts.

YUMA COPPER CO. ARIZONA.

Office: Shelden Bldg., Houghton, Mich. Mine office: Vicksburg, Yuma Co., Ariz. Employs circa 25 men. Samuel Brady, president; John L. Harris, vice-president; Courtney C. Douglass, secretary; Wm. B. McLaughlin, treasurer; preceding officers, Prof. A. E. Seaman, Allen F. Rees and Thos. C. Job, directors; Dr. Ernest A. Haggott, consulting engineer; Enoch Henderson, superintendent; W. M. Wilson, mine foreman. Organized March, 1909, under laws of Arizona, with capitalization $2,000,000, shares $10 par; issued, 50,000 full-paid shares and circa 100,000 shares $1 paid, leaving 50,000 shares unissued. The full-paid stock was given in part payment for lands and options and for promotion profits, and the full paid stock is in escrow until September, 1911. Stock is listed on the Boston curb.

Lands, 31 contiguous claims, area circa 600 acres, in the Ellsworth mining district of the Harcúvar Mountains, north of McMillan valley, 9 miles northwest of Vicksburg and 5 miles from Arizona & California railroad, also a millsite and townsite on the railroad line, 6 miles from Vicksburg and 5 miles from the mine. Property includes the Lind-Griffin group of 21 claims, and 10 claims adjoining, formerly held by the Ironwood & Arizona Development Co., which expended about $25,000 on the property, and sold same to the Butte & Arizona Copper Mining Co., which in turn disposed of it to the Yuma Copper Co. Price of lands, in addition to full-paid shares, was $75,000, of which $29,000 has been paid, leaving $46,000 due, in equal installments of $23,000 June, 1910, and March, 1911.

The hills to the west, north and northeast enclose a central amphitheatre, apparently forming an anticlinal fold, the basin lying 1,000′ to 1,700′ higher than the railroad valley, 5 miles below. The property shows 2 main mineralized zones of limestone, ranging from east and west, there apparently being a much greater limestone area capped by andesite. The southerly zone has a strike of about southeast and northwest, with dip to the northwest of apparently about 15°, but same probably will be found about 30° to 50° at depth, the surface dip being deceptive, due to erosion underneath the heavy iron capping. The southerly zone is frequently cut and faulted by cross dykes of andesite, with surface evidences of enrichment, and the footwall of both zones is a siliceous schist. Both zones carry heavy gossans, ranging from 100′ to more than 500′ in width, the gossan of the southerly zone being marked by magnetite and silicified limestone carrying copper carbonates and traces of copper sulphides. The northerly zone, with similar cross dykes of andesite, lies practically east and west, running through 5 claims, with similar but wider gossans. The great extent of crushed limestone and iron cappings renders the surface indications unusually promising, and geological conditions favor extensive ore bodies at depth. Ores as developed by numerous pits and trenches remaining from exploratory workings, from which a little selected high-grade carbonate ore was shipped, show mainly copper carbonates, below commercial tenor, with occasional small masses of rich oxidized ores, all carrying small gold and silver values. Surface ore is mainly malachite, with some azurite, and sulphides in the bottom workings. Ores developed have assayed up to 14% in copper tenor, not including rich selected samples.

Old workings of the Ironwood & Arizona, on which about $25,000 expended to rather poor advantage, included a short tunnel on the Co claim, showing a 6′ vein of leached ore, carrying copper carbonates commercial tenor. The Ironwood & Arizona also sunk the 3-compa Tribune shaft, on a line between the Tribune and Fraction claims, to th ′ only, and indications are that this shaft would have to be sunk

watered. Property carries a contact depo
to about 15' in maximum width. Develo
shaft and a 110' shaft, with about 1,500'
at depth of about 165'. Ore is estimated
and can be brought, by hand selection,
between October, 1908, and May, 1909, t
smelter, Butte, and 1 carload to the Tac
11%, 14.5%, 15% and 32.5% respectively.

The company alleged in its prospectus
1906, which claim was unwarranted, an

greatly retarded. Notwithstanding the s
in confidently predicting dividends for 19
work of making a mine, and is entitled t

CHAPTER XXVI.

General Copper Statistics.

This, the final chapter of the work, devoted to the statistics of the copper try, contains a larger number of tables than in the earlier editions, and two or three times as much matter per page, it having been found possible nsolidate two and even three of the tables of the earlier editions into a single It will be found, in many cases, that a single table gives figures covering -dozen or more different but cognate points.

The exact order of precedence in which these tables are published is varied le, from year to year, as required by mechanical exigencies. The task of ing-up" for the press upwards of forty different tables of statistics, each in what different form from any other, and of greatly varying lengths, so as to r in logical sequence, yet give full pages without awkward breaks or bad ıg, is one that can be appreciated only by an experienced printer, and the ıal degree of success that has been secured in the typographical handling of extremely awkward matter also is to be fully appreciated only by those who wrestled with similar problems. There is, however, a grouping of the tics contained in this chapter, under nine sub-heads, which are given, in edition, in the following invariable order, though there may be occasional positions of individual tables contained in a subdivision:

World's Production: Eight tables covering a variety of features.

American Production: Two tables.

Lake Superior Production: Two tables.

American Imports: One table.

American Exports: Two tables.

World's Copper Trade: Eleven tables covering imports, exports, supplies onsumption, for the world and for all leading consuming countries.

Prices and Values: Six tables.

Copper Share Finances: Eight tables, devoted to dividends, assessments, alization and sales of shares of American copper mining companies.

Twentieth Century Production: One table, giving comparative figures ithmetical progression, based upon the figures of production and consump- of the preceding century.

ll tables are fully entered, both by titles and by numerous cross-references, index at the end of the volume.

PRODUCTION OF WORI

In this table are given annual produ
really important copper mines of the wo
smaller mines making as much as 100,00
The products in round numbers are estir
available, the other figures being exact

....192,299,191	26,363,449	4,940,000	18.8	2.57
....208,355,905	27,307,307	5,432,500	20.0	2.61
....230,437,902	36,516,946	9,226,000	25.2	4.02
....229,632,606	43,964,722	12,917,500	29.9	6.07
....216,136,747	43,719,949	11,409,550	27.1	5.28
....222,674,918	31,539,257	4,457,500	14.9	2.37
..4,669,099,702	$366,520,746	$109,340,370	25.4	2.92

he average price received for all Lake Superior copper, from 1845 to 1907, ve, was 13.46 cents per pound, with average dividends of 3.7 cents per pound. g an estimated cost of 10.26 cents for all years. While this may be accepted arbitrary figure, the cost might be figured much higher, or materially higher. dding $60,000,000 to the cost of production, for money lost in unproductive es, the cost of copper produced would be made about exactly 11.5 cents per . By adding another $15,000,000 for assessments on mines that have given in dividends the original assessments, cost of copper would be increased to 11.85 cents per pound, leaving a net margin of profit, for the entire production, ost exactly 2 cents per pound, plus the present aggregate values of the mines, would be about equal to total dividend disbursements to date, or about 3.7 per pound.

mitting the production of mines that have not proven profitable, the average f copper produced by dividend-paying Lake Superior mines probably has been 9.5 cents per pound, for all years.

AMERICAN COPPER IMPORTS.

he following table, showing imports of copper, in various forms, into the United s, is summarized from the official figures of the United States government. overnment statisticians have seen fit to vary the methods employed in presenting these figures, from time to time, but the present plan of giving contents in fine r of imported ore and matte is preferable to the old plan of giving actual t of imported ore and matte:

(Pounds Avoirdupois.)

Copper Contents Ore & Matte.	Blue Copper.	Old Copper.	Total Fine Copper.

TWENTIETH CENTURY COPPER PRODUCTION.

1901-2000

Under this title an effort is made to forecast the future production o
in light of the figures of output of the past. Detective in details as such a
ecessarily must prove, when compared with actual figures of output, th
by no means fallacious.

The following table gives the copper production of the Twentieth C
ecades, with the percentages of increase of each decade compared wit
ecennium, and with the preceding decade:

Long Tons.

Decade.	Total Production.	Yearly Av'ge Production.	Percentage of First decade.
1801–1810	91,000	9,100	.....
1811–1820	96,000	9,600	5.50
1821–1830	135,000	13,500	48.35
1831–1840	218,400	21,840	140.00
1841–1850	291,000	29,100	219.77
1851–1860	506,999	50,699	457.13
1861–1870	900,000	90,000	889.01
1871–1880	1,189,000	118,900	1,206.59
1881–1890	2,373,398	237,339	2,508.12
1891–1900	3,708,901	370,890	3,975.71

Analysis of these figures shows that the average decennial percentage
r the century was 53.91%; for the last half of the century, 67.90%, and f
enty years, during which the electrical industry became a great consun
er, the average decennial increase in copper output was 77.83%. Me
ecades the increase in copper production during the Nineteenth Century
ld, from the first decennium to the last, while measured by years, and
ie production of 1801 at 9,000 tons, the production of 1900, which an
36,363 tons, was just fifty-fold as great as one hundred years earlier.
ncrease in production during the present century would give an output of
ons of copper for the year 2000.

The actual annual percentage of increase for the Nineteenth Cent
ery small fraction more than 4%, measuring outputs by decades, and
ver 4%, measuring annual products from 1801 to 1900, inclusive. I
now the actual increase in production by decades, as compared with the
ncrease at 4% yearly, the appended table is given, 1% being figured as eq
ncrease in 10 years, though actually but 48.02%.

TWENTIETH CENTURY COPPER PRODUCTION. (Continued.)

1901–2000

Long Tons.

Years.	Yearly Averages Theoretical	Actual	Actual Gain	Actual Loss	Percentage Theoretical Production
1801–1810	9,000	9,100	100	.....	101.11
1811–1820	13,500	9,600	.....	3,900	71.11
1821–1830	19,750	13,500	.....	6,250	68.35
1831–1840	29,625	21,840	.....	7,785	73.72
1841–1850	44,437	29,100	.....	15,337	65.48
1851–1860	66,656	50,699	.....	15,957	76.05
1861–1870	99,984	90,000	.....	9,984	90.00
1871–1880	149,992	118,900	.....	31,092	78.66
1881–1890	224,964	237,339	12,375	.....	105.99
1891–1900	337,447	370,890	33,443	.....	109.99

The foregoing table shows very plainly the effect of electrical demand for the metal, which first became a factor of importance in the ninth decade, shortly after 1880. Previous to that decade the theoretical increase of 4% annually, compounded, exceeds the actual increase in every decade, but after 1880 the actual increase exceeds the theoretical ratio. The actual copper output of 1900 was 486,732 tons, and the theoretical output for that year, based on the average of the decade 1890–1900, with 21⅔% increase for 5 years from the mean of 1895, would have been 410,560 tons. It is evident that the average ratio of increase of slightly more than 4% yearly, which ruled during the Nineteenth Century, is not the factor of the present electrical age. What that factor may be is uncertain. The electrification of the globe, while wonderful progress has been made, is not yet a sufficiently established fact to give accurate data for an average ratio of increase in consumption. The theoretical increase of 8% yearly, compounded, based upon the actual output of 486,732 long tons in 1900, would give a theoretical production of 811,404 long tons in 1907, whereas the output actually was only 713,155 long tons— or very materially less than the theoretical production on the basis of 8% compounded yearly, though the 8% increase was very fairly maintained during the first lustrum of the Twentieth Century.

In this connection it may be remarked that the highly valuable statistical compilations of the late M. Georges de la Bouglise, never published, but which M. de la Bouglise gave the author of this work the opportunity of inspecting, show, from 1840 to 1900, inclusive, an average annual increase, compounded yearly, of about 6.5% for all the leading commercial metals, including iron, copper, lead, tin and zinc, with a nearly similar percentage of increase in the output of coal, so necessary a concomitant of the metals. Following 1880, owing to the electrical demand, now consuming nearly one-half the world's production, copper made rapid gains over all the other commercial metals, except nickel and aluminum, metals so comparatively new in extensive commercial use that the percentages of gain are too abnormal to be used as basis for forecasting future consumption.

ENTIETH CENTURY COPPER PRODUCTION. (Continued.)

1901-2000

io of increase in copper production of the world has been 6 to 8% for s past. It has grown to be considered an axiom in the copper trade that increase is 8% yearly, but this ratio, while it may be considered the pres- as not been established for a sufficiently long time to be assured for an eriod in the future. The following table gives hypothetical outputs for year during the Twentieth Century, based upon various percentages of figured from the actual production of the closing year of the Nineteenth The compound increases, for facility in computation, are taken at slight n their actual value, as, for instance, 4% compounded for ten years is)% increase, instead of 48.02%, the actual figure; 5% is figured at 60%, 2.89%; 7% compounded is figured as 80% in ten years, instead of % is figured as only 110% instead of 115.89%.

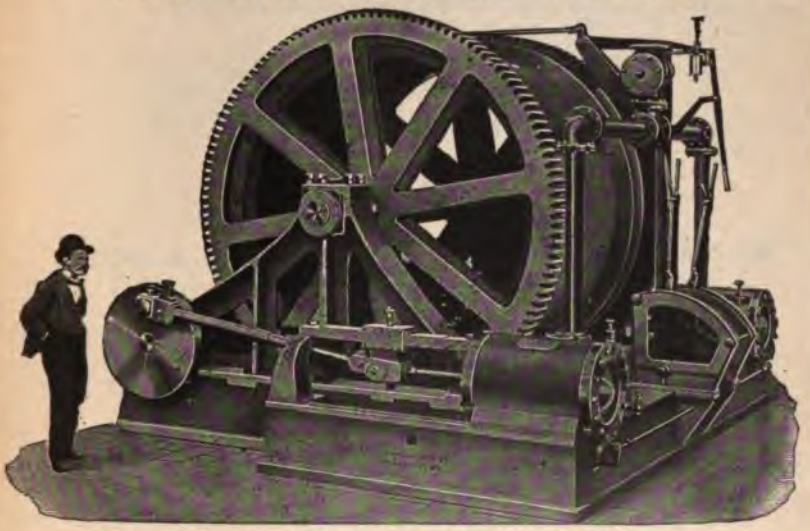
HOISTING ENGINES

Are Standard for Mines



LIDGERWOOD DOUBLE GEARED MINING HOIST

The engraving illustrates our 18 x 24 size of Double Geared Mining Hoist. This engine is equipped with our regular form of post brake, which is operated by one of the hand levers shown in the rack, having a thumb latch and quadrant, and is so compounded that it will safely hold any load the engine is capable of hoisting. The drum gears are ten feet in diameter, and the drum nine feet in diameter and five feet face. ***Five of these engines are in successful operation at the mines of the Calumet and Hecla Mining Company,*** hoisting from a depth of four thousand feet, compressed air being used instead of steam.

"A Grand Journal"

"While three score years and ten may be the span of life allotted to man—his period ness drawing at that age to a close—it is not so with *The Mining Journal*. Time has wrinkle upon its brow; stronger, brighter, better than ever, and of great good to mank over the world."—*Los Angeles Mining Review.*

The Mining Journ

46 Queen Victoria Street, London, E.C., England

THE OLDEST MINING PAPER AND THE PIONEER OF THE TECHNICAL AN PRESS OF THE WORLD.

Circulates all over the World, amongst Miners, Metallurgists, Engineers, Manufacturers, Capitalists and Investors. . .

Published every Saturday - Pric

ANNUAL SUBSCRIPTIONS (post free):—United Kingdom, 24s.; Canada, Rest of the World, 30s., payable in advance.

The Mining Journal advocates the interests of the Mining and Metallurgical Industr and abroad, and has a unique reputation for its Special Correspondence from all the tricts of the World, and also for its Prices Current of Metals, which are bought and sold of the Globe upon the basis of the "next published *Mining Journal* prices."

The Mining Journal was established seventy-five years ago, and still maintains its the leading organ of the World's Press devoted to mining and its allied interests.

The Mining Journal's advertising pages form a complete Buyer's Directory.

The Mining Journal is neither controlled, nor is any interest in it held or exerc Mine-owner, Speculator, or Syndicate, nor is it in any way whatever connected with a Share Dealing Agency.

The Monitore Bibliografico Tecnico-Scientifico of Palermo, in its January issue, c following above the signature of the Editor:—"*The Mining Journal* . . . . . Th the name of this most important review will not be new, but many perhaps have no k edge of it than our summaries afford. I do not say that the perusal of so many abs publish are sufficient to found a judgment, but they show how great is the intellectu this paper. The practical importance of the questions treated, the incisive language (property of English), the information on the mineral industry of the world, the comme ment of mineral substances, the technical articles on the more famous mining centre and articles of unquestionable value on the progress of mineralogical science and its deserve recognition in summarizing the main features of the most important review wi have the pleasure of exchanging issues. No other European review, however full, can many and important correspondents in Australia, America, &c.—In short, to an i chronicle of the industry of the world there is added an intelligent and thoughtful crit rt of mining."

MINING MAPS

We can supply MAPS of

Any Copper District of the World

A folding pocket map of the Lake Superior District, in strong manila covers, will be sent to any address for $2.00

This Map is lithographed in colors on good paper, is accurate, well made and thoroughly reliable. It shows all active mines of the district, and the great majority of the idle mines as well, covering the entire Copper Bearing Belt from Keweenaw Point to the Devon Mine, west of the Ontonagon River.

In manila, $2.00

The PENINSULAR NEWS BUREAU

HOUGHTON, Mich., U. S. A.

The New Smith Premier Billing Machine

Cut B

akes out a bill in duplicate or triplicate and, with same operation, records it on loose leaf sales book.

ssures an entry on loose leaf sales book for every invoice made out and makes discrepancies impossible.

ndenses the charges on the sales sheets without loss of space.

capitulates and classifies the sales.

es not soil the sales sheets with the carbon, and by means of its two color device

Writes the credit in red and the body of the page in purple copying or non-fading black ink.

e New Smith Premier Billing Machine adjusts itself to the needs of any office; reducing bookkeeping to its lowest terms, saving time, promoting accuracy and insuring neatness and legibility.
